

Attachment D.
Cassadaga Wind, LLC - Cassadaga Wind Project
Environmental Management & Construction Plan
Notice of Minor Change

Project: Cassadaga Wind Project **Notice Number:** 26

PSC Case Number: 14-F-0490

Project Drawings / Sheets: 32 and 34 of 165 Tree Clearing Plan

Condition No: 27 - Project Plans

Feature Changed: Alternate Circuit Route from T53 & Relocation of Collection Line

Description of change:

Cassadaga Wind LLC is requesting approval to modify the collection line routing between Cook Road and T53. The modified route would utilize a portion of the T53 access road, a permitted crane walk to the north of the permitted collection route, and would shift the section parallel to Lewis Road approximately 25-feet to the east to avoid drain tiles and an artesian well. This alternate route would also allow for the avoidance of impacts to Wetland U and co-locate the crossing of Stream T to a single crossing.

Cassadaga Wind LLC has obtained the land rights for the additional LOD.

Initiated By: Patrick McCarthy - Director Env Affairs & Permitting **Date:** 11/16/2020
