Subject: Clarification on I-210+c meter labels
Project # 11279587
Report # R11279587-ANSI
Dated August 31, 2016

Dear Kenneth,

This letter is intended to provide clarification on the faceplate label of the Aclara I-210+c meter sample provided. This meter was used by UL for the ANSI validation of the I-210+c meter with SSN NIC 510 per UL project # 11279587 as referred above.

Although the meter faceplate is labeled as NIC 411, the meter contains an SSN NIC 510. The new nameplate labels for the SSN NIC 510 were not completed at the time that those meters were assembled, which resulted in using previously released labels assigned to the NIC 410. You will find attached the new label that will be used in production.

Regards,

A handwritten signature in black ink, appearing to read "Guy Lafond".
