CASE 22-T-0346 - Application of Empire Offshore Wind LLC for a Certificate of Environmental Compatibility and Public Need for the Construction of Approximately 12 Miles of Transmission Lines from the Boundary of New York State Territorial Waters to a Point of Interconnection in the Town of Hempstead, Nassau County.

NOTICE OF PUBLIC INFORMATION FORUMS, PUBLIC STATEMENT HEARINGS,  
AND SOLICITING COMMENTS

(Issued September 20, 2023)

On June 17, 2022, Empire Offshore Wind LLC filed an application (Application) for a Certificate of Environmental Compatibility and Public Need pursuant to Article VII of the Public Service Law seeking to construct, operate, and maintain the New York portion of the transmission facilities required to interconnect its proposed Empire Wind 2 Offshore Wind Generating Facility to a Point of Interconnection with the New York State Transmission System at the Barrett 138-kilovolt (kV) Substation located in Oceanside in the Town of Hempstead, New York (the NY Project). On August 1, 2023, Empire Offshore Wind LLC and EW Offshore Wind Transport Corporation (collectively, EOW) amended its request and modified aspects of its proposal.

The NY Project will extend a total of approximately 12.2 miles within the State of New York and includes several components: two three-core 345-kV high-voltage alternating current (HVAC) submarine export cables located within an approximately 7.7-nautical mile (nm) submarine export cable corridor from the boundary of New York State waters three nautical miles offshore to the cable landfall; a cable landfall in the City of Long Beach; two 345-kV onshore export cable circuits, each with three single-core HVAC onshore export cables

within an approximately 1.6-mile onshore export cable corridor from the cable landfall to the onshore substation; an onshore substation in the Village of Island Park, within the Town of Hempstead, which will house major control components for the electrical system and perform functions such as voltage regulation, reactive power compensation, and harmonic filtering; two 345-kV interconnection cable circuits, each with three single-core HVAC interconnection cables within an approximately 1.7-mile interconnection cable corridor from the onshore substation to the newly proposed Hampton Road substation; the new Hampton Road substation in Oceanside in the Town of Hempstead, New York, which will include substation facilities that will provide the necessary breaker arrays and 345-kV/138-kV transformers; and, four 138-kV loop-in/loop-out lines cable circuits, located within an approximately 0.1-mile cable corridor from the Hampton Road substation to existing Long Island Power Authority transmission lines located under Lawson Boulevard in Oceanside, New York.

Under New York State Law, the Public Service Commission (Commission) may adopt or reject EOW's proposal, in whole or part, or modify it. In doing so, the Commission will consider input from the participating parties and the general public. Administrative Law Judges (ALJs) Ashley Moreno and Tara Kersey are presiding over the gathering of public comments and all evidence related to the NY Project. As indicated in this Notice, public statement hearings will be held to obtain comments from the public concerning EOW's proposal.
