Re: Case 14-M-0094 – Proceeding on Motion of the Commission to Consider a Clean Energy Fund

Case 18-M-0084 – In the Matter of Comprehensive Energy Efficiency Initiative
Order Directing Energy Efficiency and Building Electrification Proposals

Dear Secretary Phillips:

Pursuant to the State of New York Public Service Commission's Order Directing Energy Efficiency and Building Electrification Proposals, issued July 20, 2023, in the above captioned proceedings, (the "Order") New York State Electric & Gas Corporation ("NYSEG") and Rochester Gas and Electric Corporation ("RG&E" together, the "Companies") hereby submit our updated proposal for our Energy Efficiency and Beneficial Electrification portfolios.

On November 1, 2023, the Companies filed our (non-low income) portfolio of energy efficiency and building electrification (EE/BE) programs for 2026-2030. After review of all proposals, the Department of Public Service staff ("Staff") found that the proposals responded to the Order requirements with varying levels of information on the contemplated EE/BE portfolios, including estimated budgets, savings, and other performance metrics. In order to compare proposals and conduct a meaningful assessment of the proposed activities by Staff and stakeholders, more information and clarity was requested.

This attached proposal is in response to questions and clarifications requested by Staff. The attached proposal (and appendix) is intended to respond to all required supplemental information. For clarity, the contents of these attached documents are intended to replace, in entirety, the proposal, documents and appendices from the November 1, 2023, filing. The proposed budget estimates, program designs and resulting impacts are based on our current understanding of the market and may be further refined.

Yours Sincerely,
Hammad Chaudhry
