The webinar will be held on **December 5, 2024 from 1:00 – 3:00 PM.**

**BACKGROUND:**

In the January 16, 2020 *Order Authorizing Utility Energy Efficiency and Building Electrification Portfolios through 2025* (“Order”), the New York State Public Service Commission directed the New York Utilities and NYSERDA to develop and implement a Statewide LMI Portfolio to provide more complementary program offerings to increase the adoption of energy efficiency solutions for residential customers in affordable multifamily buildings, improve customer experience and access to programs, and increase the impact of ratepayer funding administered in the LMI market segment. Following the Order, the New York Utilities and NYSERDA developed and filed an initial *LMI Implementation Plan* on July 24, 2020, outlining the goals and components of the Statewide LMI Portfolio. The New York Utilities and NYSERDA subsequently filed revised *Implementation Plans*, including the most recently revised Implementation Plan Version 5 filed on November 1, 2024.

In accordance with the Order and as outlined in the *Implementation Plan*, two stakeholder meetings are held annually. This webinar is the second of two stakeholder meetings in 2024. At the stakeholder webinar, the New York Utilities and NYSERDA will provide an update on progress made to date and planning for the 2025 program year, including transitions, and will seek input from stakeholders and market partners.
