To comply with federal requirements at 40 CFR §121.5(b) for New York State Section 401 Water Quality Certification, all items below must be completed and the applicant must sign page 2 of this form.
1. By signing this form, the applicant affirms that the project proponent(s) and a point of contact were accurately identified in the Joint Application for Permit provided with this supplement.
2. By signing this form, the applicant affirms that the proposed project is accurately and completely identified in the Joint Application for Permit provided with this supplement, and in any supporting plans, photos, reports or other project information.
3. Identify here the applicable federal license or permit for this request:
Section 404
If this request relates to a Section 404 Nationwide Permit administered by the US Army Corps of Engineers, please identify the appropriate Nationwide Permit number(s): Nationwide Permit 57
4. Please identify the location and nature of any potential discharge that may result from the proposed project and the location of receiving waters (attached additional information as needed):
Dewatering during construction will be the source of any potential discharge for this Project. Prior to dewatering, areas and locations potentially requiring discharge will be reviewed by DPS.
5. Please provide a description of any methods and means proposed to monitor the discharge and the equipment or measures planned to treat, control, or manage the discharge (attach additional information as needed):
The different methods of discharge are described in the EM&CP and the SWPPPs. Primarily, discharge will be pumped into a geotextile filter bag and disposed of properly. The Environmental and Agricultural Inspector will be present whenever dewatering will occur as a result of construction.
For further details on the methods and means to monitor discharge, see the EMCP and the SWPPP.
