Note from Charlie Trick (NYSEG/RG&E):

Sorry for this late question but we were looking at how our system was going to handle the new transactions and notice something we thought might be tweaked a bit.

In the next four pages from the 814E IG we were thinking that the gray boxes on all four might be better off reading as we propose in the yellow highlighted section.

Especially look at the ICAP and Future ICAP segments in the current version- it says   Utility Response: Not Applicable and also Utility Request: Conditional – those don't make sense for the 814E.
