**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. Please state the names of the members of the Revenue Requirements  
2 Panel ("Panel").

3 A. Our names are Jodi L. Harris, Rory T. Goodman, and Alexis B. Breheny.

4 Q. Ms. Harris, please state your current employer and business address.

5 A. I am employed by Central Hudson Gas & Electric Corporation ("Central  
6 Hudson" or the "Company"), and my business address is 284 South  
7 Avenue, Poughkeepsie, New York 12601.

8 Q. Ms. Harris, in what capacity are you employed by Central Hudson and  
9 what is your scope of responsibilities?

10 A. I am employed by Central Hudson as Director of Regulatory Planning. In  
11 that capacity, my responsibilities include the planning, coordinating, and  
12 development of short- and long-term revenue requirement projections. In  
13 addition, my responsibilities include directing, coordinating, and  
14 developing financial analyses used for a variety of purposes, such as  
15 developing business plans and analyzing operating results.

16 Q. Ms. Harris, what is your educational background and professional  
17 experience?

18 A. In 2005, I received a Bachelor of Science Degree in Business  
19 Administration with a concentration in Accounting from Pace University.  
20 From 2005 through 2007, I worked for Ernst & Young, LLC and earned my  
21 Certified Public Accountant license. I joined Central Hudson in 2007 as an  
22 Associate Accountant in the Plant Accounting Department. In 2009, I was

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 promoted to Accountant and subsequently transferred to the Cost & Rate  
2 Department as an Analyst. In 2012, I received a Master of Science  
3 Degree in Business Administration from Marist College. In 2013, I  
4 transferred to Regulatory Planning as a Regulatory Planning Analyst and  
5 was then promoted to Senior Regulatory Planning Analyst in 2015. In  
6 2022, I was promoted to my current role as Director of Regulatory  
7 Planning.

8 Q. Ms. Harris, have you previously testified before the New York State Public  
9 Service Commission ("PSC" or the "Commission")?

10 A. Yes, I testified before the Commission in Cases 14-E-0318, 14 G-0319,  
11 17-E-0459, 17-G-0460, 20-E-0428 and 20-G-0429.

12 Q. Mr. Goodman, please state your current employer and business address.

13 A. I am employed by Central Hudson and my business address is 284 South  
14 Avenue, Poughkeepsie, New York 12601.

15 Q. Mr. Goodman, in what capacity are you employed by Central Hudson and  
16 what is your scope of responsibilities?

17 A. I am employed by Central Hudson as an Associate Regulatory Planning  
18 Analyst. In that capacity, my responsibilities include the development of  
19 short- and long-term revenue requirement projections and preparing  
20 financial analyses used for a variety of purposes, such as developing  
21 business plans and analyzing operating results.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. Mr. Goodman, what is your educational background and professional  
2 experience?

3 A. I have a Bachelor of Science Degree in Accounting from Liberty University  
4 and a Master of Science in Taxation from SUNY Albany. I held various  
5 accounting and finance related roles from 2015 through 2022, before I  
6 began my Central Hudson career in December 2022 in my current role.

7 Q. Mr. Goodman, have you previously testified before the Commission?

8 A. No, I have not.

9 Q. Ms. Breheny, please state your current employer and business address.

10 A. I am employed by Central Hudson and my business address is 284 South  
11 Avenue, Poughkeepsie, New York 12601.

12 Q. Ms. Breheny, in what capacity are you employed by Central Hudson and  
13 what is your scope of responsibilities?

14 A. I am employed by Central Hudson as a Regulatory Planning Analyst. In  
15 that capacity, my responsibilities include the development of short- and  
16 long-term revenue requirement projections and preparing financial  
17 analyses used for a variety of purposes, such as developing business  
18 plans and analyzing operating results.

19 Q. Ms. Breheny, what is your educational background and professional  
20 experience?

21 A. I have a Bachelor of Science Degree in Accounting and a Master of  
22 Business Administration in Finance from St. Thomas Aquinas College.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 From 2017 through 2019, I worked for KPMG as an Audit Associate. I  
2 began my Central Hudson career in July of 2019 as an Associate  
3 Accountant in the Financial Reporting Department and in 2021, I was  
4 promoted to Accountant. In 2023, I transferred to the Regulatory Planning  
5 Department as a Regulatory Planning Analyst.

6 Q. Ms. Breheny, have you previously testified before the Commission?

7 A. No, I have not.

8 Q. What is the purpose of the Panel's testimony in these proceedings?

9 A. The Panel's testimony in these proceedings will address the following:

- 10 1. Development of the Company's electric and gas revenue  
11 requirements for the twelve months ending June 30, 2025  
12 ("Rate Year");
- 13 2. The basis for the projections for a number of specific elements of  
14 the cost of providing service;
- 15 3. Development of the Company's rate base for the historical twelve-  
16 month period ended March 31, 2023, as well as the forecast  
17 periods for the twelve-month periods ending December 31, 2023,  
18 December 31, 2024, and June 30, 2025; and
- 19 4. The disposition of accumulated deferred costs and credits and  
20 proposed recovery or pass back from/to customers. The Company  
21 estimates that at June 30, 2024 it will have approximately \$22.0  
22 million and \$12.1 million available for rate moderation for electric

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 and gas, respectively, through means of a traditional balance sheet  
2 offset. A net credit balance was preserved for immediate return to  
3 customers by the Company extending recovery of some significant  
4 regulatory assets over a 10-year period, including major storm  
5 costs, energy efficiency and heat pump costs, and excess deferred  
6 FIT and SIT resulting from the Tax Cut and Jobs Act in 2018.

7 5. Proposing elements of the revenue requirements that are subject to  
8 update during the pendency of this proceeding.

9 Q. Is the Panel sponsoring any exhibits in support of its testimony?

10 A. Yes, we are sponsoring the following exhibits, which were prepared by or  
11 under the direction of the Panel or one of the Panel's members:

12 1. Exhibit \_\_ (RRP-1) entitled "Projected Change in Delivery Revenue  
13 Requirements" which identifies the drivers and offsetting savings  
14 reflected in the projected Rate Year Ending June 30, 2025 as  
15 compared to the Commission-authorized delivery revenue  
16 requirements for the rate year ending June 30, 2024 pursuant to  
17 the November 18, 2021 Order Establishing Rate Plan in  
18 Cases 20-E-0428 and 20-G-0429 ("2021 Rate Order");

19 2. Exhibit \_\_ (RRP-2) entitled "Electric Income Statement" which  
20 addresses the historical period of the twelve months ended  
21 March 31, 2023; the Rate Year of the twelve months ending

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 June 30, 2025; and the relevant bridge periods of the years ending  
2 December 31, 2023 and 2024;

3 3. Exhibit \_\_ (RRP-3) entitled "Gas Income Statement" which  
4 addresses the historical period of the twelve months ended  
5 March 31, 2023; the Rate Year of the twelve months ending June  
6 30, 2025; and the relevant bridge periods of the years ending  
7 December 31, 2023 and 2024;

8 4. Exhibit \_\_ (RRP-4) entitled "Direct Labor" which provides details of  
9 labor for electric and gas expense, labor by employee classification,  
10 and the allocation of labor costs to electric expense, gas expense,  
11 construction, and other categories of costs for the historical period  
12 of the twelve months ended March 31, 2023; the Rate Year of the  
13 twelve months ending June 30, 2025; and the relevant bridge  
14 periods of the years ending December 31, 2023 and 2024;

15 5. Exhibit \_\_ (RRP-5) entitled "Management Audit Cost Estimates"  
16 which lists each management audit recommendation and estimated  
17 labor and non-labor costs and savings included in the development  
18 of revenue requirements or in the Company's five-year capital plan;

19 6. Exhibit \_\_ (RRP-6) entitled "Rate Base - Twelve Months Ended  
20 March 31, 2023";

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

7. Exhibit \_\_ (RRP-7) entitled “Rate Base - Years Ending December 31, 2023 and December 31, 2024, and Twelve Months Ending June 30, 2025”;

8. Exhibit \_\_ (RRP-8) entitled “Net Deferred Balances Available for Moderation”; and

9. Exhibit \_\_ (RRP-9) entitled “Items Subject to Update.”

**I. Development of Revenue Requirements**

Q. What is the purpose of Exhibit \_\_ (RRP-2)?

A. Exhibit \_\_ (RRP-2) presents the electric delivery base rate revenue requirement for the Rate Year. In other words, it focuses solely on electric delivery and excludes revenues and expenses such as commodity, Sales for Resale, the surcharge for the Clean Energy Fund (“CEF”), the Rate Adjustment Mechanism (“RAM”), and all other items included in the MISC surcharge.

Q. Have you prepared a similar exhibit with respect to the gas base rate revenue requirement?

A. Yes, Exhibit \_\_ (RRP-3) pertains to the development of the gas base rate revenue requirement for the Rate Year. It shows the development of the revenue requirement related to establishing a gas delivery rate, which excludes consideration for purchased gas revenues and expense, Sales for Resale, including off-system sales, the RAM and all other items included in surcharge revenues.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. Please describe the information shown on Schedule A of Exhibit \_\_\_\_  
2 (RRP-2) which is entitled "Electric Operations Income Statement and Rate  
3 of Return."

4 A. Schedule A sets forth the operating revenues, operating revenue  
5 deductions, operating income, rate base, and associated rate of return for  
6 the electric department for the historical period, the bridge periods, and  
7 the Rate Year. It also shows the projected revenue requirement for the  
8 Rate Year before and after the effects of the rate changes necessary to  
9 establish base rates for the Company's delivery service to provide the  
10 overall rate of return of 7.10% addressed in the testimony of the  
11 Finance Panel.

12 Q. Please describe Schedule B of Exhibit \_\_\_\_ (RRP-2).

13 A. Schedule B shows normalization and ratemaking adjustments to the  
14 historical period, including those necessary to display operating income  
15 related to delivery service only. It also addresses the reclassification as a  
16 cost of service of certain items that are recorded as non-operating for  
17 financial accounting purposes.

18 Q. What is the purpose of Schedule C of Exhibit \_\_\_\_ (RRP-2)?

19 A. Schedule C of Exhibit \_\_\_\_ (RRP-2) shows the actual, normalized, and  
20 projected amounts, by Commission functional classification, for most of  
21 the operating revenue deductions listed in Schedule A of Exhibit \_\_\_\_ (RRP-  
22 2) for the historical period, the bridge periods, and the Rate Year.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Operating revenue deductions not included in Schedule C are  
2 Depreciation and Amortization, which are shown on Exhibit \_\_ (ATP-2),  
3 and Federal and State Income Taxes which are shown on Exhibit \_\_  
4 (ATP-10). Exhibit \_\_ (ATP-2) and Exhibit \_\_ (ATP-10) are both sponsored  
5 by the Accounting and Tax Panel.

6 Q. Has the Panel prepared a schedule demonstrating the gas revenue  
7 requirement similar to schedules A and B of Exhibit \_\_ (RRP-2)?

8 A. Yes. Schedules A and B of Exhibit \_\_ (RRP-3) show information for the  
9 gas revenue requirement in similar form to that for electric set forth in  
10 Schedules A and B of Exhibit \_\_ (RRP-2).

11 Q. Has the Panel prepared a schedule for gas operating deductions similar to  
12 Schedule C of Exhibit \_\_ (RRP-2)?

13 A. Yes, Schedule C of Exhibit \_\_ (RRP-3) presents historical and projected  
14 information related to operating deductions for the gas department.

15 **II. Presentation of Revenue Requirements**

16 Q. Is the Company's presentation of revenue requirements in this rate case  
17 filing consistent with the Company's prior rate cases?

18 A. Yes. We have continued to follow the spirit and intent of the  
19 Commission's Statement of Policy on Test Periods in Major Rate  
20 Proceedings issued November 23, 1977 ("1977 Policy Statement"). The  
21 Commission's Policy Statement called upon utilities to improve the  
22 presentation of the forward-looking Rate Year and to provide a verifiable

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 link from the historic test year to the forward-looking Rate Year. That said,  
2 this rate case filing provides the needed level of visibility and clarity into  
3 the elements of expense that are causing the need for additional revenues  
4 needed to properly align the projected costs to serve our customers with  
5 the revenues billed to customers.

6 Q. Please elaborate and expand upon the Commission's 1977 Policy  
7 Statement as it relates to the development and presentation of  
8 expense projections.

9 A. The Commission was very explicit in how expense projections were to be  
10 developed. First, forecasts were to be developed for individual elements  
11 of expense, whereby projections were predicated on a historical base  
12 adjusted for changes in unit prices and in activity levels. Further, all  
13 assumptions in unit price because of inflation or other factors and changes  
14 in activity levels due to modified work practices or other reasons were to  
15 be separately developed and identified.

16 Q. Please describe the general methodology that was followed in the  
17 Company's preparation of the projections of expense used in developing  
18 the electric and gas revenue requirements.

19 A. In developing the various forecasts for each expense element, the historic  
20 period costs were first reviewed to determine actual costs incurred and  
21 any specific costs or activities that should be normalized. Then, the  
22 functions captured in each expense component were evaluated to

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 determine whether the forecast needed to be based on factors particular  
2 to the individual component that influence its future level or whether  
3 escalation at inflation was appropriate. For expense components that  
4 were forecasted by inflating historic period costs, the Gross Domestic  
5 Implicit Price ("GDP") deflators used to inflate historical period costs were  
6 2.5% for 2023 over the historic period, 2.5% for 2024 over 2023, and 1.1%  
7 for the Rate Year over 2024. These inflation rates are addressed in the  
8 testimony of the Forecasting and Rates Panel.

9 Q. When are specific costs or activities normalized?

10 A. Specific costs or activities are normalized when they are related to the  
11 Company's commodity activities, excluded from revenue requirements  
12 under Commission policy, non-recurring, related to an out-of-period event,  
13 or only a partial reflection of an annual cost. As previously indicated,  
14 normalization adjustments related to electric costs are shown on Exhibit  
15 \_\_ (RRP-2), Schedule B and those related to gas costs are shown on  
16 Exhibit \_\_ (RRP-3), Schedule B.

17 Q. How were costs that relate to both electric and gas operations allocated  
18 between the two departments?

19 A. Costs of a common or corporate nature were allocated using the  
20 Company's current common cost allocation ratio of 80% electric and 20%  
21 gas, consistent with the allocation method that was utilized to set rates

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 during the term of the 2021 Rate Order. The Accounting & Tax Panel  
2 discusses the common allocation methodology in greater detail.

3 Q. Please explain and identify the elements of expense that have  
4 been included in the development of revenue requirements in  
5 these proceedings.

6 A. Each element is set forth and discussed in turn below.

7 A. **Internal Labor**

8 Q. Do the exhibits sponsored include further information related to the  
9 projection of Direct Labor Costs?

10 A. Yes. Exhibit \_\_ (RRP-4) was prepared to present detailed information  
11 related to the projection of Direct Labor costs. Schedule A of that exhibit  
12 addresses electric expense, Schedule B addresses gas expense, and  
13 Schedule C summarizes labor costs by employee classification and the  
14 allocation of labor costs to electric expense, gas expense, construction,  
15 and other categories of costs.

16 Q. Please explain generally how Internal Labor costs were projected.

17 A. Internal Labor costs were first developed using annual base salaries and  
18 wages, by classification, for regular employees on the Company's payroll  
19 on March 31, 2023. The salaries and wages were increased, where  
20 applicable, by the average premium pay (i.e. overtime, shift differential,  
21 etc.) percentages that occurred during the historical period and then by  
22 the applicable salary and wage increase rates set forth in the testimony of

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 the Workforce, Compensation and Benefits Panel. The regular employee  
2 level reflected in the labor cost projection is based on the March 31, 2023  
3 employee level of 1,138 plus an incremental 243 employees planned to be  
4 hired during the bridge period and the Rate Year. The incremental work  
5 requirements for 243 additional employees are addressed in the testimony  
6 of the Workforce, Compensation and Benefits Panel and other Company  
7 testimony in this filing.

8 Requirements for 39 temporary employees (primarily college  
9 interns) were also included as provided by Human Resources to arrive at  
10 a total Direct Labor cost projection.

11 Q. Please identify the assumed effective hire dates for the 243 incremental  
12 employees noted above as reflected in revenue requirements.

13 A. Revenue requirements are based on a general assumption that  
14 incremental employees are hired on a quarterly basis, with the effective  
15 hire date assumed to be the first day of each calendar quarter. The list of  
16 incremental employees as provided to the Revenue Requirements Panel  
17 by the Workforce, Compensation and Benefits Panel designated  
18 employees by classification, consistent with those identified on Exhibit \_\_\_\_  
19 (RRP-4), Schedule C, and by period of hire (April – December 2023,  
20 January – June 2024, July – December 2024 and Jan - June 2025).  
21 Within each of the aforementioned time periods, employees within each

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 classification were assumed to be hired equally across each quarter in  
2 that period.

3 Q. How were employee labor costs allocated to electric and gas expense?

4 A. Allocations to electric and gas expense were determined based on the  
5 normalized distribution of payroll costs for the twelve months ended March  
6 31, 2023. Most notably, the distribution of payroll was normalized to  
7 reflect expected capital/expense ratios for the 243 incremental employees.

8 **B. Incentive Compensation**

9 Q. Does the Company's filing include consideration for any forms of  
10 incentive compensation?

11 A. Yes. The Company is including rate allowances for both executive short-  
12 term incentive compensation and for non-executive, non-union variable  
13 incentive compensation.

14 Q. Please explain how you arrived at the forecast of executive incentive  
15 compensation.

16 A. The projection of executive incentive compensation was determined  
17 consistent with the treatment in the Company's current rate plan, which  
18 recognized and provided rate recovery of STI pay linked to safety,  
19 reliability, customer service and the environment, as well as a limited  
20 portion linked to meeting financial metrics. Consistent with past practice,  
21 we have excluded long-term incentives.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. Please describe how the projection for the non-executive variable  
2 incentive compensation was derived.

3 A. Please refer to the testimony of the Workforce, Compensation and  
4 Benefits Panel for information on the cost of this new program.

5 C. **Employee Benefits**

6 Q. Please describe how Employee Benefits were forecasted.

7 A. Employee Benefits are comprised of Medical Insurance (including Dental  
8 and Vision), Group Life Insurance, Savings Incentive Plan ("SIP"),  
9 Employee Stock Purchase Plan ("ESPP"), and Other Employee Benefits.  
10 Projections for healthcare and pharmacy medical Insurance costs  
11 (i.e., excluding Dental and Vision) are based on a study conducted by a  
12 third-party expert witness. Please refer to the testimony and exhibits of  
13 the Workforce, Compensation and Benefits Panel for more information  
14 regarding the methodology used to develop the forecasts for the bridge  
15 period and the Rate Year. Projections for Dental and Vision insurance  
16 costs are based on annualized activity for the twelve months ended March  
17 31, 2023. GDP inflation factors were applied to this base to arrive at the  
18 costs projections for the bridge periods and the Rate Year. Additionally,  
19 costs associated with incremental employees were included in the  
20 projection for the bridge period and Rate Year.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. Please continue.

2 A. Group Life Insurance costs are based on the premium and employee  
3 contributions incurred for the month of March 2023 on a per-employee  
4 basis, which was then annualized to arrive at a cost-per-employee  
5 projection base. Costs were then projected using the GDP inflation  
6 factors and an employee level of 1,381, weighted appropriately to reflect  
7 effective hire date, for the Rate Year.

8 Q. Please explain how the projection for SIP was calculated.

9 A. SIP projections are comprised of two components. The first component is  
10 the calculation of voluntary employee contributions matched by the  
11 Company and the second component is the non-elective contribution  
12 made by the Company for all management employees hired on or after  
13 January 1, 2008 and for all union employees hired on or after May 1,  
14 2008.

15 Q. How was the Company's match of the voluntary employee contribution of  
16 the SIP program determined?

17 A. The projection for voluntary employee contributions is based on the actual  
18 twelve months ended March 31, 2023 contribution level adjusted for  
19 applicable wage increases, plus an estimated Company contribution  
20 associated with the voluntary contributions of new hires. Voluntary  
21 contributions for new hires were estimated by calculating a weighted  
22 average of elected contributions for all new hires in the historic year. For

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 those who chose to contribute a percentage above the maximum matched  
2 by the Company (i.e., 8%), it was assumed that their election was 8%.

3 The weighted average percentage calculated was then multiplied by 75%,  
4 which represents the Company match portion of the contribution. The  
5 resulting percentage was applied to the estimated base salaries for the  
6 incremental employees.

7 Q. How was the cost associated with the non-elective Company contribution  
8 determined?

9 A. The projection for non-elective contributions is based on the actual 2023  
10 payout (based on 2022 wages), which is equal to 5% of the base wage of  
11 all eligible employees. This is inclusive of the new Supplemental  
12 Retirement Plan discussed by the Workforce, Compensation and Benefits  
13 Panel. To arrive at the Rate Year forecast, the 2023 payout was adjusted  
14 for applicable wage increases, an increase in the Supplemental  
15 Retirement Plan contribution from 1% to 1.25%, and estimated  
16 contribution for new employees included in the “non-elective pool.”

17 Q. In regard to ESPP and Other Employee Benefits, how were forecasts  
18 developed?

19 A. In terms of the Company’s Employee Stock Purchase Plan (“ESPP”), the  
20 historic expense level was escalated at the projected wage increases to  
21 develop the forecasts for the bridge periods and the Rate Year.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Other Employee Benefits were projected based on the historic  
2 expense level escalated at inflation to arrive at the forecasts for the bridge  
3 periods and the Rate Year.

4 Q. How were projections allocated to electric and gas expense?

5 A. The allocation of Medical, Group Life, SIP, and ESPP costs to electric and  
6 gas expense are based on the normalized distribution of payroll.

7 D. **Pension Plan (FAS 87)**

8 Q. Please describe the basis for the Company's projection of Pension Plan  
9 (FAS 87) costs.

10 A. The cost estimate for the Company's Pension Plan, which includes the  
11 Retirement Income Plan and Supplemental Executive Retirement Plan  
12 ("SERP"), are based on the latest estimate provided by the Company's  
13 actuary. The service component of the plans was allocated based on the  
14 Company's normalized payroll distribution as shown in the testimony of  
15 the Accounting and Tax Panel. The non-service component was allocated  
16 only to electric and gas expense and was done so on a proportional basis  
17 of the normalized distribution of payroll costs charged to electric and gas  
18 expense.

19 Q. What level of pension plan expense has been reflected in the  
20 development of revenue requirements in this proceeding?

21 A. The development of revenue requirements for the Rate Year includes a  
22 credit of \$7.3 million and \$2.1 million for electric and gas, respectively.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1        These credit amounts represent the net amount after a 1% allocation  
2        to affiliates for SERP.

3        E.     **Other Post-Employment Benefits (OPEB-FAS 106)**

4        Q.     What level of OPEB expense has been assumed by the Panel in the  
5        development of revenue requirements?

6        A.     The development of revenue requirements for Other Post-Employment  
7        Benefits (“OPEBs”) for the Rate Year includes a credit of \$5.8 million and  
8        \$1.6 million for electric and gas, respectively. These projections are  
9        based on an estimate developed by the Company’s actuary. Allocation of  
10       the service and non-service component of these plans is consistent with  
11       the methodology explained above for the Pension Plans. That is, the  
12       service component is allocated based on the Company’s normalized  
13       payroll distribution for the historical period and the non-service component  
14       of these plans are allocated to electric and gas expense on a proportional  
15       basis of the normalized distribution of payroll costs charged to electric and  
16       gas expense.

17       F.     **Employee Training, Safety & Education**

18       Q.     Please describe the Company’s projections for Employee Training,  
19       Safety & Education Expenses.

20       A.     The Rate Year projection was developed by initially reviewing the historic  
21       year expense to identify appropriate normalization adjustments and  
22       normalized historic year expenses were then escalated at inflation to

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 project the Rate Year. Additionally, an estimated cost per employee  
2 based on normalized historic year expense was calculated, escalated at  
3 inflation to arrive at a rate year cost per employee, and then applied to the  
4 projected number of incremental employees in the rate year. Lastly,  
5 incremental expense for new training programs and enhancements to  
6 existing programs, as further discussed by the Workforce, Compensation  
7 and Benefits Panel, was included in the development of revenue  
8 requirements.

9 **G. Production Maintenance**

10 Q. How did the Company project Production Maintenance expenses?

11 A. Production Maintenance consists of maintenance performed at the  
12 Company's hydro and gas turbine electric generating facilities. Projected  
13 costs for the Rate Year were provided by the Company's Manager of  
14 Substation Engineering and Operations consistent with planned operating  
15 objectives at these facilities.

16 **H. Right of Way Maintenance**

17 Q. Please explain how Right of Way Maintenance projections  
18 were developed.

19 A. This expense component represents the estimated costs of the program,  
20 as addressed in the testimony of Company's Electric Capital and  
21 Operations Panel.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

I. **Stray Voltage Testing**

Q. Please describe the Company's cost projections for Stray Voltage Testing.

A. The forecast for Stray Voltage Testing (Mitigation and Non-Mitigation) was prepared by first reviewing the historic period expense to determine if normalization or other adjustments were necessary. Using this normalized expense as a base, the forecasted Rate Year expense was developed by factoring in projection assumptions related to vendor contract terms and escalation rates that were received from the Director of Electric Distribution & Standards. Finally, the Company is seeking continuation of symmetrical deferral accounting as authorized in the 2021 Rate Plan.

J. **System Engineering & Compliance**

Q. Please describe the Company's projected expenses for System Engineering & Compliance.

A. These expenses relate to the preparation of engineering studies, analyses, planning, and compliance with standards of our T&D system. The forecast for System Engineering & Compliance was prepared by reviewing the historic period expense to determine appropriate normalization adjustments. These normalized historic expense levels were then escalated at inflation to develop the forecasts for the bridge periods and the Rate Year. The revenue requirement for gas also

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 considers incremental expense for non-labor costs to research and draw  
2 new map records as discussed in the testimony of the Gas Safety Panel.

3 K. **Substation Testing & Maintenance**

4 Q. Please explain the Company's projected revenue requirements for  
5 Substation Testing & Maintenance.

6 A. Substation Testing & Maintenance expenses relate to the inspection,  
7 testing, and maintenance of our substations. The forecast for these  
8 expenses was prepared by first reviewing the historic period expense to  
9 determine if normalization adjustments were necessary. One  
10 normalization adjustment was made to remove an out of period expense  
11 adjustment. Normalized historic expense levels were escalated at inflation  
12 to develop the forecasts for the bridge periods and the Rate Year.

13 L. **T&D Repair & Maintenance**

14 Q. Please explain the Company's projected revenue requirements for T&D  
15 Repair & Maintenance.

16 A. Expenses for T&D Repair & Maintenance center on the daily work of  
17 repairing and maintaining our electric and gas T&D system.

18 1. *Electric Transmission Repairs & Maintenance*

19 Q. How did the Company project expense for Electric Transmission Repairs  
20 & Maintenance?

21 A. The development of the projection began by first reviewing the historic  
22 year expenses to determine if normalizations were required. As a result of

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1       this review, an adjustment was made to normalize work associated with  
2       routine overhead line inspection to reflect a three-year average, as the  
3       Historic Year did not reflect the average level of work expected to occur  
4       annually. Normalized historic year expenses were then escalated at  
5       inflation to develop the forecasts for the bridge periods and the Rate Year,  
6       with the exception of one function number. The one expense function that  
7       was not projected based on inflation includes work activities that trend the  
8       Category 12, Electric Transmission, capital budget as set forth by the  
9       Electric Capital and Operations Panel. The Direct Testimony of that Panel  
10      explains the correlation of the expense work to the capital program. In  
11      order to project these expenses, the Electric Capital and Operations Panel  
12      provided projected contractor hours and an estimated contractor hourly  
13      cost for 2024. The hourly cost was inflated to arrive at the cost per hour  
14      used to calculate Rate Year contractor expense, which was ultimately  
15      calculated by multiplying the forecasted hours by the calculated rate. This  
16      methodology is consistent with that established in Case 17-E-0459 and  
17      continued in Case 20-E-0428, where we recognized that certain  
18      transmission expenses are linked to and trend with Electric Transmission  
19      capital work.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

2. *Electric Distribution Repairs & Maintenance*

Q. How did the Company project expense for Electric Distribution Repairs & Maintenance?

A. The development of the projection began by first reviewing the historic year expenses to determine if normalizations were required. Normalized historic year expenses were then inflated to arrive at the Rate Year projections, with the exception of two function numbers. First, similar to transmission, distribution capital has an expense component of work tied to the Category 15, Electric Distribution Improvement, capital plan as set forth by the Electric Capital and Operations Panel. That panel provides an explanation of the correlation of the expense work to the capital program. In order to project these expenses, the Electric Capital and Operations Panel provided projected contractor hours and an estimated contractor hourly cost for 2024. The hourly cost was inflated to arrive at the cost per hour used to calculate Rate Year contractor expense, which was ultimately calculated by multiplying the forecasted hours by the calculated rate. This methodology is consistent with that established in Case 17-E-0459 and continued in Case 20-E-0428, where we recognized that certain distribution expenses are linked to and trend Electric Distribution Improvement capital work.

Second, the function number used to track expense attributable to distribution trimming for dispatch orders was escalated at a rate consistent

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 with the distribution trimming activities included in the Company's Right-of-  
2 Way Maintenance program to arrive at the Rate Year projection. Please  
3 refer to the testimony and exhibits of the Electric Capital and Operations  
4 Panel for more information on distribution trimming escalation factors.

5 **3. Gas Transmission & Distribution Repair & Maintenance**

6 Q. Please explain the Company's forecast for Gas Transmission &  
7 Distribution Repair & Maintenance.

8 A. The forecast of gas transmission and distribution repairs and maintenance  
9 was developed by first reviewing the historic expense to determine if  
10 normalization adjustments were required. Normalizations were made to  
11 reflect other accounting adjustments and normalized historic year  
12 expenses were then inflated to arrive at the Rate Year projection. The  
13 revenue requirement for gas transmission and distribution repairs and  
14 maintenance also considers two incremental expenses. One incremental  
15 expense is related to canopy trimming, which is explained in more detail in  
16 the testimony of the Gas Capital and Operations Panel. The second  
17 incremental expense reflects an additional damage patroller, which is  
18 explained in more detail in the testimony of the Gas Safety Panel and  
19 Management Audit Recommendation 6.4 as shown in Exhibit \_\_ (RRP-5).

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 M. **Transformer Installations & Removals**

2 Q. How were expenses for Transformer Installations & Removals forecasted?

3 A. The expense in this cost element captures work related to installing and  
4 removing electric transformers along with the associated credits to  
5 expense for first time installations and removals. Initially the installation  
6 and removal costs are charged to expense. Then, if the work is related to  
7 a first-time installation or removal of a transformer, a credit is recorded to  
8 expense to either capitalize the installation or to charge the removal to the  
9 depreciation reserve. The projection related to the installation and  
10 removal of transformers is based on the Category 15, Electric Distribution  
11 Improvements, capital plan set forth by the Electric Capital and Operations  
12 Panel. Projected contractor hours were received from that Panel along  
13 with an estimated hourly cost for 2024. The hourly cost was inflated to  
14 arrive at the cost per hour used to calculate Rate Year contractor  
15 expense. In order to calculate the projected credits to expense, internal  
16 labor related to transformer work was also considered. The historic year  
17 labor was escalated at the assumed union wage increases, as discussed  
18 by the Workforce, Compensation and Benefits Panel, to arrive at the  
19 estimated labor in the Rate Year. The transformer credits were calculated  
20 by assuming full offset of the contractor costs and estimated internal labor.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 N. **Gas Pipeline Integrity and Inspection**

2 Q. Please describe the expenses forecasted for Gas Pipeline Integrity &  
3 Inspection.

4 A. The forecast was prepared by first reviewing the historic period expense to  
5 determine if normalization adjustments were necessary. Normalized  
6 historic year expenses were then inflated to arrive at the Rate Year  
7 projections. The revenue requirement also considers two incremental  
8 expenses. One incremental expense is to reflect continued  
9 implementation of the Safety of Gas Transmission Pipelines Rule as set  
10 forth in Case 20-G-0429 and discussed in the testimony of the Gas Capital  
11 and Operations Panel. The other incremental expense is to reflect  
12 continued implementation of the Pipeline Safety Management System as  
13 discussed in the testimony of the Gas Safety Panel.

14 O. **Gas Leak Repairs – Distribution Main**

15 Q. Please describe next the expenses forecasted for Gas Leak Repairs –  
16 Distribution Main.

17 A. The projection was developed by calculating a cost per repair for the  
18 twelve months ended March 31, 2023. The cost per repair was then  
19 inflated to arrive at the cost for the Rate Year and was multiplied by the  
20 leak repair projection provided by the Gas Safety Panel. All other  
21 expenses included in this cost element were projected by applying  
22 inflation to historic year expenses.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 P. **Meter Installations, Removals & Maintenance**

2 Q. What type of work activity is included in this element of expense?

3 A. This cost element includes expenses for activities related to the daily work  
4 of installing, removing, and maintaining electric and gas meters along with  
5 the associated credits to expense for first time installations. Initially the  
6 installation costs are charged to expense and, if the work relates to a first-  
7 time installation, a credit is recorded to expense to capitalize the  
8 installation.

9 Q. What are the Company's forecasted expenses for electric and gas meter  
10 installations, removals, and maintenance?

11 A. The forecast of Meter Installations, Removals, and Maintenance was  
12 developed by first reviewing the historic year expense to determine if  
13 normalizations were required. For both electric and gas, the historic year  
14 level of meter credits was normalized to reflect the planned number of  
15 meters purchased, based on assumptions put forth by the Electric and  
16 Gas Capital and Operations Panels, at the latest known meter credit  
17 amount. The normalized historic year was then inflated to arrive at the  
18 projected Rate Year.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. **Informational & Institutional Advertising**

2 Q. What are the Company's forecasted expenditures for Informational &  
3 Institutional Advertising?

4 A. The Rate Year projection was developed by first reviewing the historic  
5 year to determine whether any normalizations were required; no  
6 normalizations were noted. Using the historic year as a base, the Rate  
7 Year was projected by escalating these costs at the rate of inflation.

8 R. **Research & Development**

9 Q. What are the Company's forecasted expenses for Research &  
10 Development ("R&D")?

11 A. Projected R&D costs for the Rate Year were provided by the Company's  
12 Director of Research Development & Innovation and are consistent with  
13 current program goals and objectives. These costs are subject to revenue  
14 matching accounting and deferral, as required by the Commission's  
15 Technical Release #16.

16 S. **Economic Development**

17 Q. What are the Company's forecasted expenses for  
18 Economic Development?

19 A. Consistent with Cases 20-E-0428 and 20-G-0429, the Company has  
20 included \$800,000 for Economic Development in the determination of  
21 electric revenue requirements and \$200,000 in the determination of gas

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 revenue requirements. The Company also proposes continuation of the  
2 two-way true-up mechanism for Economic Development expenses.

3 T. **Meter Reading, Collections & Call Volume Overflow**

4 Q. What are the Company's forecasted expenditures for Meter Reading,  
5 Collections and Call Volume Overflow?

6 A. Costs classified in this expense element include the non-internal labor  
7 expense incurred to read meters, carry out collection efforts, and for our  
8 third-party call center to handle call volume overflow as needed. The Rate  
9 Year projection for meter reading, collection agency fees, waiver of  
10 reconnection fees, and the third-party call center were forecasted based  
11 on projected changes to activity or cost, as further described below. The  
12 remaining ancillary costs, which are only a nominal portion of this expense  
13 element, were projected based on escalating historic year expenses at  
14 inflation to arrive at a Rate Year estimate.

15 Q. Please describe how you arrived at the estimated cost for meter reading.

16 A. For both electric and gas, a normalization was made to historic year  
17 expense to annualize meter reading expense to reflect a shift from internal  
18 labor to contractors in the HY, as well as to update for rates included in  
19 the new vendor contract effective January 2023. An annual growth rate  
20 consistent with that included in the current vendor agreement was applied  
21 to arrive at the projections for the Bridge Period and Rate Year.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. Does the Company have anything else it would like to add pertaining to  
2 meter reading?

3 A. Yes, pursuant to the Company's Plan to Implement Monthly Meter reading  
4 in Case 22-M-0645 and the interim agreement reached between the  
5 Company and DPS Staff on July 27, 2023 ("interim agreement"), which  
6 prescribes an accelerated implementation of the Company's transition to  
7 monthly meter reading, the Company would incur incremental operating  
8 expense of approximately \$4 million in the Rate Year. Given the timing of  
9 the interim agreement, the full costs associated with the revised monthly  
10 meter reading plan included in the interim agreement are not reflected in  
11 the Rate Year revenue requirements. As such the Company proposes  
12 that revenue requirements be updated at a later stage in this proceeding  
13 for all impacted components of revenue requirements pertaining to the  
14 monthly meter reading plan.

15 Q. Please describe how expenses related to collection activities, including  
16 collection agency fees and waiver of reconnection fees, were derived.

17 A. As the Company was not performing normal collection activities during the  
18 historic year, collection related expenses incurred during that period could  
19 not serve as the basis for the Rate Year projection.

20 As it relates to collection agency fees, with the change in arrears  
21 and the uncollectible landscape creating uncertainty for future collections,  
22 the Company is proposing to maintain the rate allowance established for

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 the Rate Year Ended June 30, 2024 in Cases 20-E-0428 and 20-G-0429.  
2 Thus, the historic year for both electric and gas was normalized to align  
3 with the prior period rate allowance, as noted. This expense level was  
4 held constant for the Bridge Period and Rate Year, as the Company is  
5 also proposing a true-up mechanism for this expense. Please refer to the  
6 testimonies of the Customer Experience and Accounting and tax Panels  
7 for additional information.

8 As for fees associated with waiver of reconnection, as the  
9 Company did not terminate service during the entirety of the historic year,  
10 neither expenses, nor the offset, were incurred. As such, the historic year  
11 and all forecast periods were normalized to reflect the allowance agreed  
12 upon in Cases 20-E-0428 and 20-G-0429. Consistent with past practice,  
13 the offset to the credit included here is in the Energy Affordability Program  
14 and is subject to deferral.

15 Q. Finally, how did the Company arrive at its forecast for Call Volume  
16 Overflow?

17 A. Costs for this component of this expense element was provided by the  
18 Customer Experience Panel and are set forth in Exhibit \_\_ (CEP-4).

19 U. **Bill Print**

20 Q. What is the Company's forecast for Bill Print expenses?

21 A. The Bill Print expense element includes costs for the printing and mailing  
22 of customer bills, excluding postage, by an outside vendor. The Rate

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

Year projection was developed by first reviewing the historic year to determine whether any normalizations were required. For both electric and gas, two normalization adjustments were made. First, the expense recorded in March 2023 was lower than the typical monthly run rate for customer billing, so March expense was normalized to the average of the prior months 11 months. Second, as the Company was not performing standard collection activities during the period of the historic year, costs associated with collection related mailings are not reflected in the historic year at a level expected to occur in the Rate Year. As a result, the Company normalized the historic year expense to pre-pandemic levels by setting it equal to the historic year ended March 31, 2020 adjusted for GDP. Using the normalized historic year as a base, the Rate Year was projected by escalating these costs at the rate of inflation.

V. **Postage**

Q. Please describe the Company's projected expenses for Postage.

A. For both electric and gas, the Rate Year projection is based on escalating normalized historic year expense by inflation. The normalization to the historic year was made to increase postage for collection related mailings, as the Company was not performing normal collection activities during the historic year and today, as discussed by the Customer Experience Panel, has three times the number of customers in arrears than average historic levels. The normalized historic year was estimated at pre-pandemic levels

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 by setting it equal to the historic year ended March 31, 2020, adjusted for  
2 GDP, and then tripling the expense amount to align with the growth in  
3 customers in arrears.

4 W. **Payment by Credit/Debit Card**

5 Q. How did the Company project expense for Payments by  
6 Credit/Debit Card?

7 A. Expenses captured in this expense element are related to providing  
8 customers the option to make payment of their utility bill through means of  
9 a credit or debit card or at a walk-in center without being assessed a fee to  
10 do so. With the change in the arrears and uncollectible landscape, there  
11 is significant uncertainty surrounding future customer payment behavior.  
12 As a result, the Company is proposing that it maintain the rate allowance  
13 for payment by credit card that was provided for the Rate Year Ended  
14 June 30, 2024 in Cases 20-E-0428 and 20-G-0429 with the understanding  
15 that any variation will be captured through the continued symmetrical  
16 deferral for this element of expense.

17 X. **Energy Affordability Program**

18 Q. Please describe the projected expenses associated with the Company's  
19 Energy Affordability Program ("EAP").

20 A. The EAP is comprised of expense for the Low Income Bill Discount  
21 Program ("LIBDP") and the Waiver of the Reconnection Fee Program.  
22 The projection of expense for the LIBDP is in accordance with the

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

parameters of the August 12, 2021 Order in Case 14-M-0565. As further explained by the Customer Experience and Forecasting and Rates Panels, when considering growth in participation as well as forecasted bill discounts, the LIBDP is projected to hit the 2% cap for both electric and gas in the Rate Year. The projection for this component of the EAP, is based on 2% of revenues for the prior period defined by the parameters of the aforementioned Order, escalated by 2% of the proposed rate increase, as this represents an assumed increase in customers' energy burden.

The Rate Year expense associated with the Waiver of Reconnection Fee Program are aligned with program levels established and approved in both the Company's 2018 and 2021 Rate Orders.

Y. **Uncollectible Accounts**

Q. Please describe the projected expenses for Uncollectible Accounts.

A. As noted by the Customer Experience, at this time, there is a significant level of uncertainty surrounding the level of net write-offs that may be experienced during the Rate Year. As a result of this uncertainty, the Company is proposing that it: (1) maintain the rate allowance for the delivery portion of uncollectibles that was provided for the Rate Year Ended June 30, 2024 in Cases 20-E-0428 and 20-G-0429, (2) assume the same uncollectible percentage for fuel and other surcharge components of the bill as established in the aforementioned cases, and (3) the uncollectible true-up mechanism afforded under the existing Rate Plan

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 continue with modifications. The modifications are discussed in more  
2 detail in the testimony of the Customer Experience Panel and include the  
3 addition of a deferral of collection agency fees, as also noted in the above  
4 discussion of collection related costs, and the elimination of the ten basis  
5 point threshold currently applicable to the mechanism as it exists today. It  
6 should also be noted that absent a true-up mechanism for uncollectible  
7 expense, the rate allowances assumed in the development of revenue  
8 requirements and the proposed uncollectible factors, which as previously  
9 noted are all consistent with those established for the Rate Year ended  
10 June 30, 2024, would have to be adjusted.

11 **Z. Regulatory Commission General Assessment**

12 Q. Please describe the Company's projected expenses for the Regulatory  
13 Commission General Assessment.

14 A. The expense projection is based on the Department of Public Service's  
15 Statement of Estimated General Assessment for the fiscal year ending  
16 March 31, 2024, escalated annually by 10% to arrive at the Rate Year  
17 forecast. The growth factor is based on a historical average of the most  
18 recent three years of growth in these assessments.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 AA. **Environmental Expenses**

2 1. *Environmental - SIR Cost Recovery*

3 Q. How did the Company project expense for Environmental – SIR  
4 Cost Recovery?

5 A. As it relates to the projection of Environmental Site Investigation and  
6 Remediation (“SIR”) Cost Recovery, the Company is proposing that the  
7 rate allowance in these proceedings be based on a three-year average  
8 (twelve months ended March 31, 2021; 2022; and 2023) of expense  
9 adjusted to March 2023 dollars and then inflated. This projection  
10 methodology has been employed consistently since its inception in Cases  
11 08-E-0887 and 08-G-0888, when it was proposed by Staff, and is  
12 consistent with other elements of expense where an averaging technique  
13 is employed to develop a historical base upon which to project the  
14 forward-looking Rate Year.

15 2. *Environmental - All Other*

16 Q. Please describe the Company’s projected expenses for Environmental –  
17 All Other.

18 A. The Rate Year projection was developed by initially reviewing the historic  
19 year expense to identify appropriate normalization adjustments and  
20 normalized historic year expenses were then escalated at inflation to  
21 project the Rate Year. For both electric and gas, a normalization

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

adjustment was made to reflect incremental environmental clean-up projects that are planned to occur annually.

**BB. Information Technology**

Q. What are the Company's projected expenses for Information Technology?

A. This expense element includes the Company's current and projected information technology requirements primarily related to hardware maintenance, software maintenance, and license costs. The projection for the Rate Year, as provided by the Technology Capital and Operations Panel, was developed by first reviewing the historic year to determine if any normalizations were required. Adjustments to the historic year were made to annualize expense to latest known amounts and to remove out-of-period or non-recurring expenses. The normalized historic year was escalated at inflation or, for specific IT vendors, at 8% for expenses that were expected to continue into the Rate Years. The 8% average IT vendor increase is explained in more detail in the testimony of the Technology Capital and Operations Panel. In addition, incremental IT expenses have been added to and removed from the Bridge Period and Rate Year, including costs and savings associated with Management Audit Recommendations 4.4 and 4.5 as shown in Exhibit \_\_ (RRP-5). The incremental expenses added are related to the Company's efforts to continue to enhance IT infrastructure, improve the customer experience, and to protect against on-going cyber security threats. The expense

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 removed, which include O&M of over \$8 million, was primarily related to  
2 the Company's SAP Customer Information System ("CIS") stabilization.  
3 These expenses are not expected to recur in the Rate Year. Specific IT  
4 capital initiatives and applicable O&M expenses, as well as SAP CIS  
5 stabilization, are further discussed in the testimony of the Technology  
6 Capital and Operations Panel. The amortization of software costs is  
7 included in the depreciation schedules sponsored by the Accounting  
8 and Tax Panel.

9 CC. **Telephone**

10 Q. Please describe the Company's projected Telephone expenses.

11 A. Projections of Telephone expense were based on a review of historical  
12 charges and current billing rates for communication expenses and the  
13 application of inflation factors. In addition, incremental telecommunication  
14 savings from the Company's efforts to modernize its communications  
15 network have been reflected in the bridge period and Rate Year forecasts.

16 DD. **Rental Agreements**

17 Q. Please describe the Company's projected expenses for  
18 Rental Agreements.

19 A. The forecast for Rental Agreements was prepared by reviewing the  
20 historic period expense to determine whether rental arrangements were  
21 expected to be ongoing, expiring or changing pursuant to contract terms.  
22 Normalization adjustments to the historic year were made to annualize

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

specific vendor expenses to latest known amounts. With the exception of tower rentals and select transmission contracts, the Rate Year was projected by escalating normalized costs at the rate of inflation. For the items noted as exceptions, projections were specifically based on contract agreements.

EE. **Security of Infrastructure**

Q. What are the Company's projected expenses for Security of Infrastructure?

A. The Rate Year projection for Security of Infrastructure was established by initially reviewing the historic year expense to determine if normalizations were required; none were noted. Using the normalized historic year as a base, the Rate Year was projected by escalating these costs at the rate of inflation, with the exception of costs for the standard contract for guard services at Central Hudson facilities. The project for these costs were based on newly proposed contract rates, as well as incremental services that will be required for the Company's Primary Control Center. Please refer to the testimony and exhibits of the Common Capital and Operations Panel for additional detail.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

FF. **Maintenance of Buildings & Grounds**

Q. Please describe the Company's projected expenses for Maintenance of Buildings & Grounds.

A. These expenses and activities relate to the day-to-day work of maintaining our office buildings and other properties. The historic expense level was escalated at inflation to develop the forecasts for the bridge periods and the Rate Year, with the exception of expense associated with three Company facilities. Projections for these facilities consider incremental expenses for known contract increases above inflation, as well as for segments of the Company's Training Academy and Primary Control Center ("PCC") complex that are estimated to increase coincident with the in-service of the new PCC and the construction of the remaining training facilities.

GG. **Storm Expenses**

1. *Major Storm Reserve*

Q. Please explain the Company's forecast for the Major Storm Reserve.

A. A major storm reserve has been established for incremental expense incurred for weather events that qualify as chargeable to the reserve, and an allowance of \$14.8 million was included in the development of electric revenue requirements. This augmented rate allowance recognizes the increased level of major storm activity experienced since the establishment of the reserve, and specifically over the last five years. In

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 order to mitigate the rate increase, the allowance was developed by  
2 employing a 10-year average projection methodology, normalized for an  
3 accounting entry that was recorded outside of the historic year as a result  
4 of timing and for changes to the pre-staging thresholds as put forth by the  
5 Electric Capital and Operations Panel. It is essential that the Major Storm  
6 Reserve Allowance be enhanced, as the Company has been significantly  
7 under reserved throughout the current Rate Plan and has accrued a  
8 significant regulatory asset, as further discussed below.

9 *2. Major Storm Amortization*

10 Q. Has the Company had adequate reserves to cover the cost of major  
11 storm activities?

12 A. No. As of March 31, 2023, the Company had accrued a regulatory asset  
13 of \$56.3 million for major storm activity above and beyond the funding of  
14 the reserve.

15 Q. How is the Company proposing to recover this significant regulatory  
16 asset?

17 A. The development of electric revenue requirements includes an  
18 incremental \$4.1 million in the Rate Year to begin collection of the accrued  
19 regulatory asset. The \$4.1 million is based on an assumption that the  
20 \$56.3 million asset will be reduced by the major storm reserve rate  
21 allowance that remains to be collected over the term of the existing rate  
22 plan (\$5.8 million) and by \$10 million that is estimated to be included in

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 the Company's Rate Adjustment Mechanism ("RAM") at December 31,  
2 2023, which on average, is the amount of storm costs collected annually  
3 through the RAM. The remaining \$41 million was then assumed to be  
4 collected over 10 years or through the RAM as further described below.

5 Q. Does the Company have any additional comments regarding the proposed  
6 recovery of storms costs in excess of the reserve balance?

7 A. Yes. There are two additional items to note. First, the determination of  
8 the \$4.1 million allowance noted above assumes no major storm activity  
9 occurs from the end of the historic year through the end of the current rate  
10 plan and estimates the amount to be collected through the RAM. Given  
11 the uncertainty in these assumptions, the Company proposes to update  
12 this calculation later in these proceedings to reflect an update of storm  
13 activity and actual RAM collections, if known. Second, the Company  
14 proposes that these storm costs continue to be RAM eligible. Any  
15 collection through the RAM would simply reduce the 10-year collection  
16 period noted above.

17 3. *Non-Major Storm Restoration*

18 Q. What is the Company's forecast for expenses related to Non-Major  
19 Storm Restoration?

20 A. The projection for Non-Major Storm Restoration Expense was derived by  
21 use of a four-year average (twelve months ended March 31, 2020; 2021;  
22 2022; and 2023) of non-major storm expenditures adjusted to March 2023

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 dollars, which were then inflated by the GDP factors. The historic  
2 expense level also includes a normalization to reflect a change in the pre-  
3 staging sharing provisions as proposed in the Electric Capital and  
4 Operations Panel Testimony and to reflect an accounting entry that was  
5 recorded outside of the historic year as a result of timing; these  
6 normalizations are offsets to those noted above in the discussion on the  
7 Major Storm Reserve. Use of a four-year average follows the averaging  
8 methodology generally accepted by Staff and the Company to project this  
9 expense and used to determine the rate allowance it a least the  
10 Company's last three Rate Plans. The Company is seeking update at a  
11 later stage in these proceedings to reflect the latest known information in  
12 development of the four-year average.

13 HH. **Material & Supplies**

14 Q. What are the Company's forecasted expenses for Materials & Supplies?

15 A. This expense element represents the amount of material and supplies  
16 charged directly to electric and gas expense. The bridge period and Rate  
17 Year projections were developed by applying rates of inflation to the  
18 normalized historic year expense. In terms of normalizations, the only  
19 adjustment was to reflect a three-year average of gas materials and  
20 supplies, as Company subject matter experts indicated that the historic  
21 year expense was not indicative of projected annual spend, with one main  
22 driver being the lower than average expense for inspections and repairs.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1       II.     **Stores Clearing to Expense**

2       Q.     What is the Company's forecast for Stores Clearing to Expense?

3       A.     The expenses contained in this element of expense are those charged to  
4             the stores clearing account that are not allocable to other cost elements.

5             The forecast for stores clearing to expense was prepared by applying  
6             inflation to normalized historic year expenses to arrive at the projections  
7             for the Bridge Period and Rate Year. Normalizations were made to  
8             remove one-time, non-recurring expenditures and to reflect an adjustment  
9             to gas expense that is aligned with the three-year average projection  
10            methodology used to establish the projection of materials and supplies.

11       JJ.    **Transportation Expenses**

12           1.     *Transportation Depreciation*

13       Q.     Please describe the Company's forecast for Transportation Depreciation.

14       A.     Please refer to the testimony and exhibits of the Accounting and Tax  
15             Panel, as the amount of depreciation related to transportation equipment  
16             was provided by that Panel.

17           2.     *Transportation Fuel*

18       Q.     What is the basis for the Company's forecast for Transportation  
19             Fuel expense?

20       A.     The forecast for Transportation Fuel was prepared by escalating  
21             normalized historic year expenses at a rate of inflation. In terms of the

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1           normalization made, the adjustment was to reflect a three-year average of  
2           the capital expense distribution applied to allocate these expenses.

3           3.       *Transportation All Other*

4   Q.     Please describe the Company's forecast for all other expenses related  
5           to Transportation.

6   A.     This expense element captures all other transportation related costs, that  
7           is to say excluding depreciation, fuel costs, and costs allocable to other  
8           elements of expense, that are charged to the transportation clearing  
9           account. The forecast for Transportation All Other was prepared by first  
10          reviewing the historic period expense to determine if normalization  
11          adjustments were necessary. Similar to Transportation – Fuel, an  
12          adjustment was made to reflect a three-year average of the capital  
13          expense distribution applied to allocate these expenses. The Historic  
14          Year expense was escalated at inflation to arrive at the forecasts for the  
15          bridge period and Rate Year.

16   KK.    **Rate Case Expenses**

17   Q.     Please describe the Company's forecasted Rate Case expenses.

18   A.     Rate Case Expenses include those expenses that are traditionally  
19           incurred related to a rate case application. The filing assumes  
20           continuation of the deferral accounting and three-year amortization of  
21           these costs as authorized in the 2015, 2018 and 2021 Rate Plans to arrive  
22           at the forward-looking Rate Year. In addition, we have included the

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 projected deferred balance with assumed costs and recovery in the  
2 development of Rate Base.

3 **LL. Legal Services**

4 Q. What are the Company's projected expenses for Legal Services?

5 A. The forecast for Legal Services expenses was prepared by first reviewing  
6 the historic period expenses, and it was determined that two normalization  
7 adjustments were necessary. First, a normalization was made to the  
8 electric historic year to remove one-time, non-recurring credits associated  
9 with two of the vendors that provide the Company with legal services.  
10 Second, legal expenses that were incurred in connection with the  
11 investigations and proceedings related to the Company's transition to the  
12 new SAP CIS system were removed, as these are not projected to recur in  
13 the Rate Year. The normalized historic year expenses were then inflated  
14 to arrive at the rate year projections.

15 **MM. Consulting & Professional Services**

16 Q. What are the Company's forecasted expenses for Consulting &  
17 Professional Services?

18 A. The forecast for Consulting and Professional Services was prepared by  
19 escalating historic year expense at inflation to arrive at the Rate Year  
20 projection, with the exception of the items subsequently noted. External  
21 audit fees were escalated at a three-year average historical growth rate,  
22 and vendor costs incurred in support of the semi-annual DSIP filing were

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

adjusted to reflect total estimated costs for the project, escalated at inflation, incurred every other year. There were also additional incremental expenses considered in the Rate Year projection, including costs to participate in the JD Power survey as per Management Audit Recommendation 8.1 shown in Exhibit \_\_ (RRP-5), to support the Company's evolving DEI program as per Case 22-M-0314, to provide for an updated BCA for AMI in conjunction with the 2025 DSIP filing, and to augment HR needs as it relates to talent attraction.

NN. **Miscellaneous General Expenses**

Q. What Miscellaneous General Expenses are forecasted by the Company?

A. The forecast for Miscellaneous General expense was prepared by first reviewing the historic period expense to determine if normalization adjustments were necessary. Normalizations required included adjustments to (1) annualize association dues at latest known cost, (2) annualize fees for the Board of Directors to reflect full complement for the entire historic year period, (3) to adjust for an out-of-period accounting transaction, and (4) to reflect costs for the Company's annual management meeting that fell outside of the Rate Year due to timing. Normalized historic year expenses were then inflated to arrive at the projections for the bridge period and Rate Year, with the exception of administrative costs allocated from Fortis, Inc. to Central Hudson. Central Hudson's allocation of these Fortis administrative costs for the Rate Year

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

are based on annual estimates provided by Fortis escalated at inflation.  
Finally, incremental expense was also added to the Rate Year projection  
to account for incremental Board of Director Fees as existing Board  
members term off and temporarily overlap with their successors to allow  
for transition and for training and recruiting expenses related to the new  
workforce development program as discusses in the Workforce,  
Compensation and Benefits Panel Testimony.

OO. **Injuries and Damages**

Q. Please describe the Company's projections for expenses related to  
Injuries and Damages.

A. The Injuries and Damages expense element includes insurance coverage  
for workers' compensation, excess liability, personal and property damage  
claims and accident and safety activities.

The cost estimate for workers' compensation is based on the latest  
known actual premiums, as well as claims paid based on a three-year  
average (twelve months ended March 31, 2021; 2022; and 2023) adjusted  
to March 2023 dollars. The projected costs were allocated on the basis of  
the Company's adjusted payroll distribution.

Q. How did Central Hudson project costs for excess liability insurance?

A. The projected costs for excess liability insurance are based on the most  
recent known premiums and expected growth rates that were provided by  
the Company's Senior Treasury and Risk Administrator.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. How were costs for personal and property damage claims developed?

2 A. Projections for personal and property damage claims were derived by  
3 taking a three-year average (twelve months ended March 31, 2021; 2022;  
4 and 2023) of claim payments adjusted to March 2023 dollars and inflating  
5 to arrive at the Rate Year projection.

6 Q. What costs are included in Accident and Safety Activities expense?

7 A. Accident and Safety Activities expense is made up of Cyber Insurance,  
8 Miscellaneous Accident Expense, and Claims Billing Credits. With the  
9 exception of Miscellaneous Accident Expense, cost projections were  
10 based on inflating normalized historical period costs. Miscellaneous  
11 Accident Expense was projected by taking a three-year average (twelve  
12 months ended March 31, 2021; 2022; and 2023) of normalized expense  
13 adjusted to March 2023 dollars and then applying inflation. The only  
14 required normalization to the three-year data set was the removal of one  
15 out-of-period transaction.

16 PP. **Other Operating Insurance**

17 Q. What costs has the Company projected for Other Operating Insurance?

18 A. Forecasts of Other Operating Insurance are based on the most recent  
19 known premiums that were provided by the Company's Senior Treasury  
20 and Risk Administrator. Other Operating Insurance includes Directors and  
21 Officers ("D&O") Insurance, All Risk Property Insurance, Miscellaneous  
22 Other Insurances, and Brokerage Fees. With the exception of All Risk

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

Property Insurance, cost projections were based on inflating normalized historical period costs. Regarding All Risk Property Insurance, the cost of the insurance is based on the value of the property being insured. For the purposes of cost projections, the property is classified into three groups: 1) dams; 2) gas regulator stations/electric substations; and 3) other. The insured value of each classified property at July 1, 2023 was escalated at a three-year average historical growth rate to arrive at the Rate Year insured value. The insured value was then multiplied by an assumed rate per million of insured value, which was provided by the Company's Senior Treasury and Risk Administrator. All Risk Property Insurance also includes other miscellaneous insurances that were projected based on inflating normalized historic year expenses.

**QQ. Office Supplies**

Q. Please describe the forecasted expenses for Office Supplies.

A. The historic year level of Office Supplies expense was escalated at inflation to arrive at the forecast for the Bridge Period and Rate Year.

**RR. Management & Operational Audit Costs**

Q. What costs are projected for Management & Operational Audit Costs?

A. Management & Operational Audit Costs includes the Company's actual and estimated management audit expenditures, which, consistent with past practice, are proposed to be amortized and recovered over a five-year period. The five-year amortization results in a Rate Year rate

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

allowance of \$129,000 for electric and \$32,000 for gas. In addition, the Company is proposing continuation of full deferral accounting as most recently authorized in the 2021 Rate Order for any new Commission initiated or required management and/or operational audits.

**SS. Energy Efficiency & Heat Pump Programs**

Q. How did the Company determine the rate allowance for its internal suite of Energy Efficiency Programs and for the Heat Pump Program?

A. As discussed by the Earnings Adjustment Mechanisms Panel, Revenue requirements include recovery of the budgets prescribed in the January 16, 2020 *Order Authorizing Utility Energy Efficiency and Building Electrification Portfolios Through 2025* in Case 18-M-0084 (“the NENY Order”), as subsequently amended by the Clean Heat Order, reduced by the balance of Clean Energy Fund (“CEF”) carrying charges projected at June 30, 2024. The use of CEF carrying charges to offset a portion of the rate allowances is in accordance with the provisions of the NENY Order. Additionally, the Company proposes to continue deferral treatment for over/under spending compared to the modified rate allowances, as reflected by the Accounting and Tax Panel.

Q. Is the Company proposing an update for the Rate Year rate allowances of Energy Efficiency and the Heat Pump Program?

A. Yes. As also noted by the Earnings Adjustment Mechanisms Panel, the rate allowances included in the development of revenue requirements are

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1       premised on an estimate of accrued CEF interest, and thus the Company  
2       is proposing an update at a later stage in these proceedings to recognize  
3       a more current projection.

4       TT.    **Amortization of Energy Efficiency/Heat Pump Deferred Costs**

5       Q.    Is the Company collected Energy Efficiency and Heat Pump program  
6       funding in alignment with budgets established in the NENY Order under  
7       the terms of its current Rate Plan?

8       A.    No, as part of the outcome of the Joint Proposal in Cases 20-E-0428 and  
9       20-G-0429, the Company deferred collection of \$18.8 million of electric  
10      funding.

11      Q.    How is the Company proposing to recover the deferred collections?

12      A.    The development of electric revenue requirements includes an  
13      incremental \$1.9 million in the Rate Year to begin collection of the accrued  
14      regulatory asset. In an effort to mitigate the rate increase, this estimate is  
15      based on an assumed collection of costs over ten years. However, the  
16      Company proposes that these deferred costs continue to be RAM eligible  
17      at that any collection through the RAM simply reduce the ten-year  
18      collection period.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

UU. **Expenses Allocated to Affiliates**

Q. What are the Company's projected Expenses Allocated to Affiliates?

A. The projection of Expenses Allocated to Affiliates is based on inflation of historical period credits to Central Hudson due to costs determined to be chargeable to its affiliates.

VV. **Miscellaneous Charges**

Q. What are the Company's projected Miscellaneous Charges?

A. Miscellaneous Charges consists of the activities and expenses that have not been identified elsewhere within an element of expense discussed in this testimony. In other words, it represents the residual accounts payable and non-labor journal voucher transactions incurred during the historic year. The forecast for Miscellaneous Charges was prepared by first reviewing the historic period expense to determine if normalization adjustments were necessary, which resulted in the historic year being adjusted to remove COVID-19 expenses, as these expenses are not expected going forward. The normalized historic year expenses were then escalated at inflation to project the Rate Year. Additionally, pursuant to the Company's Plan to Implement Monthly Meter reading in Case 22-M-0645, the Company would incur incremental operating expense beginning in the Rate Year and in the subsequent period for customer outreach. Projected costs for the Rate Year were included in the development of revenue requirements.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 WW. **Amortization of Unprotected Asset ("TCJA")**

2 Q. Please explain the basis for the forecasted amortization of the  
3 Unprotected Asset ("TCJA").

4 A. As described in the testimony of the Accounting and Tax Panel, the  
5 Company is proposing to collect its deferred federal income tax balances  
6 that resulted from the 2017 TCJA that are non-asset based and not  
7 protected under the tax normalization rules, by amortizing the regulatory  
8 asset over a ten year period.

9 XX. **Productivity Imputation**

10 Q. Does the Company's filing reflect a productivity adjustment?

11 A. Yes. We have imputed a 1% productivity credit to capture future  
12 productivity gains in a manner similar to that customarily employed by the  
13 Commission. The base upon which the 1% productivity adjustment was  
14 applied includes labor, employee benefits (including pensions and  
15 OPEBs), variable compensation and payroll taxes. This base, with the  
16 exception of variable pay which is new in these Cases, has been utilized  
17 by the Commission since Cases 05-E-0934 and 05-G-0935, where New  
18 York State Department of Public Service Staff ("Staff") expanded the base  
19 to include non-labor components. It should be noted that this productivity  
20 adjustment is in addition to cost reductions that are included in the  
21 development of revenue requirements that are not in the form of a  
22 percentage applied to any particular base, but rather through the

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

Company's focus on continuous improvement. The historic period ended March 31, 2023, which serves as the basis to project many of the elements of costs, reflects the productivity gains that the Company has achieved through continuous improvement and are therefore already reflected in the development of revenue requirements. Additionally, the Policy Panel discusses multiple other cost savings that have been reflected in this rate filing for the benefit of customers.

**YY. Amortization of Depreciation Reserve Adjustment**

Q. Is the Company proposing recovery of the under-reserve of its accumulated book depreciation reserve?

A. Yes. Please refer to the testimony of the Accounting and Tax Panel for more information on recovery included in the development of revenue requirements, which equals \$4.8 million for electric and \$3.3 million for gas in the Rate Year.

**ZZ. Recovery/Refund of Rate Change Timing**

Q. What is the Company proposing related to recovery/refund as it relates to the timing of the Company's rate change?

A. For ratemaking purposes, rate design assumes that all kwh or Ccf billed in the month of the rate change are billed at the newly effective base delivery rates. However, on an actual basis, sales billed in the month of a rate change are billed at a blended rate, which reflects both old and new rates. This results in an under/over collection relative to approved rates. As

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 such, the development of revenue requirements for both electric and gas  
2 includes recovery for the forecasted under collection, which was  
3 developed using a historical three-year average to determine the percent  
4 of under/over collection compared to the total agreed upon rate change.

5 AAA. **Taxes Other than Income Taxes**

6 1. *Revenue Taxes*

7 Q. What are the Company's projected revenue taxes?

8 A. Revenue taxes are a surcharge applied to delivery rates and are collected  
9 in the same manner as other surcharges. As such, the income statement  
10 presentation shows Revenue Taxes as both a revenue line item within  
11 Operating Revenues and as an expense line item within Other  
12 Deductions. The projection of revenues taxes was provided by the  
13 Forecasting and Rates Panel.

14 2. *Payroll Taxes*

15 Q. What are the Company's projected payroll taxes?

16 A. Payroll taxes, consisting of Federal Insurance Contributions Act ("FICA"),  
17 federal and state unemployment insurance, and Medicare tax were  
18 calculated by applying the appropriate tax rates to the related taxable  
19 wage base projected for the applicable periods. The Metropolitan  
20 Commuter Transportation Mobility Tax on payrolls within the Metropolitan  
21 Transit Authority ("MTA") region is being deferred and collected through

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 the existing MTA tax surcharge mechanisms and, as such, no allowance  
2 for this tax is included in the payroll tax rate allowance.

3 *3. Other Taxes*

4 Q. What other taxes are included in the Company's forecast?

5 A. Other taxes include sales and use taxes and hazardous waste taxes.

6 Sales and use taxes were projected by first applying inflation to historical  
7 period costs. Further, incremental sales tax above inflated levels was  
8 included in the projection of the Rate Year in order to reflect an increased  
9 sales tax expense directly correlated to incremental O&M expense in  
10 select cost elements. The hazardous waste tax projection is based on  
11 applying inflation factors to a three-year average (twelve months ended  
12 March 31, 2021; 2022; and 2023) of hazardous waste tax adjusted to  
13 March 2023 dollars.

14 *4. Property Taxes*

15 Q. What property taxes are projected by the Company?

16 A. Property taxes were projected and are explained in the testimony of the  
17 Accounting & Tax Panel. The testimony of that Panel also includes the  
18 Company's request for update of latest known property taxes at a later  
19 stage in these proceedings. Details of the projections are provided on  
20 Exhibit \_\_ (ATP-15) and Exhibit \_\_ (ATP-16) for electric and gas,  
21 respectively, which are sponsored by the Accounting & Tax Panel. The

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 projection schedules detail real estate and special franchise taxes levied  
2 by school districts and by towns, counties, cities, and villages.

3 **III. Development of Rate Base**

4 Q. Referring to Schedule A of Exhibit \_\_ (RRP-6), what does this  
5 schedule show?

6 A. This schedule shows Electric and Gas rate base for the historical period of  
7 the twelve months ended March 31, 2023 and summarizes the  
8 components that make up the rate base.

9 Q. Are any items included in the rate base for the historical and forecast  
10 periods supported by a witness or Panel other than this Panel?

11 A. Yes. The rate base amounts for Net Plant and Noninterest-Bearing  
12 Construction Work in Progress for the historical period and all projected  
13 periods were provided by the Accounting and Tax Panel and are  
14 addressed in that Panel's testimony.

15 Q. Please describe the amount labeled "Customer Advances for Under-  
16 grounding" appearing on Schedule A of Exhibit \_\_ (RRP-6).

17 A. The amount represents the average balance of advances to the Company  
18 by customers for underground construction for the historical period.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. Please describe the amount labeled "Preliminary Survey & Investigation"  
2 appearing on Schedule A of Exhibit \_\_ (RRP-6).

3 A. The amount represents the average balance of charges incurred related to  
4 the preliminary work of the proposed training facility, which were ultimately  
5 transferred to construction work-in-progress during the historic year.

6 Q. Please describe the amounts labeled "Deferred Charges" as shown on  
7 Schedule A of Exhibit \_\_ (RRP-6).

8 A. The deferred charge balance listed on Schedule A is shown in detail on  
9 Schedule B of this Exhibit. Deferred charges generally represent (1) costs  
10 incurred by the Company or credits due customers which, in accordance  
11 with the Uniform System of Accounts or by permission granted by the  
12 Commission, are deferred when they occur and are reflected as an  
13 expense or income in a subsequent period or (2) the interest accrued on  
14 these deferred balances.

15 Q. Please describe the items appearing on Schedule B of Exhibit \_\_ (RRP-6).

16 A. These deferred balances represent the average balance during the  
17 historical period of each item.

18 The deferral of "Research and Development Costs" results from the  
19 accounting treatment set forth in Commission Opinion No. 78-3, issued on  
20 March 6, 1978 in Case 27154. In general, such deferrals result from the  
21 monthly matching of expense to revenues collected for the Research and  
22 Development Program.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1           The amounts shown for “MTA Tax” represent the unrecovered  
2           portion of the Company's payments of the Temporary Metropolitan  
3           Transportation Business Tax Surcharge.

4           The amounts shown for “Unamortized Debt Expense” are  
5           amortized over the terms of the various securities to which they are  
6           related in accordance with the Uniform System of Accounts. The amounts  
7           shown on Schedule B were allocated 70% to the Electric Department and  
8           30% to the Gas Department based on the proportional shares of the  
9           historical period earnings base.

10          “Deferred Revenues - Attachment Rents” result from the  
11          Company's accounting treatment recognizing the attachment rents as  
12          revenues during the period to which they are earned rather than when  
13          they are received.

14          “Unamortized Loss on Reacquired Debt” is amortized over the  
15          terms of the various securities to which it is related in accordance with the  
16          Uniform System of Accounts. The amounts shown on Schedule B were  
17          allocated 70% to the Electric Department and 30% to the Gas Department  
18          based on the proportional shares of the historical period earnings base.

19          “Economic Development” represents the remaining funding  
20          earmarked for Economic Development, as approved by the Commission in  
21          Cases 05-E-0934 and 05-G-0935, an additional \$4.5 million of funding  
22          from Fortis, and a transfer of \$0.5 million from the Competition Education

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Fund as directed in the Acquisition Order (pg. 26). These funds were  
2 exhausted at the end of the historic year, as the Company was ordered to  
3 utilize unspent funds in conjunction with Case 14-M-0565/20-M-0266  
4 Phase 2 Arrears Report.

5 “NYSERDA Pre-February 2016” represents the over-collection of  
6 funds prior to February 2016 that are not subject to carrying charges and  
7 are earmarked for remittance to NYSERDA for their suite of energy  
8 efficiency program expenditures.

9 “Carrying Charge on Environmental SIR Costs & Recoveries”  
10 represents the average balance during the historical period of the  
11 accumulated interest due (to)/from customers related to the funding for  
12 such costs established by the Commission in Cases 05-E-0934 and 05-G-  
13 0935 (2006 Rate Order at pg. 69).

14 “Carrying Charge on Property Taxes” represents the accumulated  
15 interest due (to)/from customers related to the deferral of the over- and  
16 under-recovery of property taxes as authorized by the Commission in  
17 Cases 20-E-0428 and 20-G-0429 (2021 Rate Order, Joint Proposal at pg.  
18 16).

19 “Carrying Charge on RDM” represents the accumulated interest  
20 due (to)/from customers related to the deferral of the difference between  
21 the targeted delivery revenue for each applicable service class versus the  
22 actual revenue collected (2021 Rate Order, Joint Proposal Appendix O).

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1                   “Management & Operational Audit Costs” represents the  
2                   unrecovered deferral of actual Management and Operational Audit costs  
3                   being amortized over a 60-month period as authorized in Cases 20-E-  
4                   0428 and 20-G-0429 (2018 Rate Order, Joint Proposal at pg. 16).

5                   “Federal Tax Rate Change (Unprotected)” represents the net  
6                   amount due from customers for the deferred tax balances that were  
7                   adjusted to the 21% tax rate.

8                   “Federal Tax Rate Change (Unprotected) – Reclass from  
9                   Protected” represents the net amount due to customers for the deferred  
10                  tax balances that were adjusted to the 21% tax rate that were deemed to  
11                  be unprotected under the normalization rules of Internal Revenue Code  
12                  (“IRC”) 168(f).

13                  “NYS Tax Rate Change (Unprotected) – Reclass from Protected”  
14                  represents the net amount due to customers for the deferred tax balances  
15                  that were adjusted to the 6.5% tax rate that were deemed to be  
16                  unprotected under the normalization rules of Internal Revenue Code  
17                  (“IRC”) 168(f).

18                  Per the Company’s JP in Cases 20-E-0428 and 20-G-0429, \$25.6 million  
19                  of the combined federal and state electric balance and \$5.5 million of the  
20                  gas balance is to be transferred to available for moderation as of July 1,  
21                  2023 to be used for rate moderation.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1                   “Federal Tax Rate Change (Protected)” represents the amount due  
2                   to customers for the deferred tax depreciation and other plant-related  
3                   deferred tax balances that were adjusted to the 21% tax rate and are  
4                   being amortized over the depreciable lives of the underlying assets.

5                   “New York State Tax Rate Change (Protected)” represents the  
6                   amount due to customers for the effect on state income taxes due to the  
7                   deferred tax depreciation and other plant-related deferred tax balances  
8                   that were adjusted to the 6.5% tax rate and are being amortized over the  
9                   depreciable lives of the underlying assets.

10                  “Carrying Charges on Arrears Management” represents the  
11                  accumulated interest due from customers related to deferrals resulting  
12                  from the Arrears Management Program (“AMP”) Phase I and II arrears  
13                  forgiveness customer credits.

14                  “Carrying Charges on Uncollectible Write-Offs” represents the  
15                  accumulated interest due from customers related to deferral of differences  
16                  between the actual 12 months of net-write-offs compared to billed  
17                  uncollectibles (2021 Rate Order, Joint Proposal at pgs. 28 - 29).

18                  “Carrying Charge on Deferred Interest (Variable)” represents the  
19                  accumulated interest due (to)/from customers related to deferral of the  
20                  difference between the actual interest rate and the interest rate assumed  
21                  in setting rates related to variable rate debt as authorized in Cases 20-E-  
22                  0428 and 20-G-0429 (2021 Rate Order, Joint Proposal at pgs. 15 - 16).

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1           “Carrying Charge on EV Fast Charge Incentive” represents the  
2           accumulated interest due to customers related to NYSERDA funding to  
3           provide incentive payments for fast charging stations as authorized in the  
4           Commission’s February 7, 2019 Order Establishing Framework for Direct  
5           Current Fast Charging Infrastructure Program in Case 18-E-0138 at pgs.  
6           50-51.

7           “Carrying Charge on EV Make Ready Customer Owned” and “CC –  
8           EV Make Ready Implementation Costs” represent the accumulated  
9           interest due from customers as authorized in the Commission’s July 16,  
10          2020 Order in Case 18-E-0138.

11          “Carrying Charge on Deferral of Over/Under Collection of Interest”  
12          represents the accumulated interest due (to)/from customers related to  
13          deferral of the difference between the actual average cost rate of long-  
14          term debt (fixed and variable) and the average cost rate assumed in  
15          setting rates as authorized in Cases 20-E-0428 and 20-G-0429 (2021  
16          Rate Order, Joint Proposal at pgs. 14 - 15).

17          “Carrying Charge on Credit Card Fee Deferral” represents the  
18          accumulated interest due (to)/from customers related to the over- and  
19          under-recovery of the payment by credit or debit card program, including  
20          walk-in center transaction fees and outreach and education, as authorized  
21          in Cases 20-E-0428 and 20-G-0429 (2021 Rate Order, Joint Proposal at  
22          pg. 17).

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1           “Carrying Charge – Tropical Storm Isais” represents the  
2           accumulated interest due to customers related to Central Hudson’s  
3           obligation to establish an interest-bearing account to fund storm hardening  
4           per the Commission’s Order in Case 20-E-0641 (pg. 4).

5           “Carrying Charge on Asset Sale to Transco” represents the  
6           accumulated interest due to customers related in accordance with the  
7           Commission’s Order Authorizing the Transfer of Transmission Property  
8           and Easement Interest in Case 22-E-0077.

9           “Rate Case Expense Deferral” represents the unamortized deferred  
10          rate case expense balance being amortized over 36 months as  
11          established in Cases 20-E-0428 and 20-G-0429 (2021 Rate Order, Joint  
12          Proposal at page 17).

13          “Carrying Charge on Major Storm Reserve” represents the  
14          accumulated interest due from customers that has been recorded related  
15          to the difference between the Major Storm rate allowance and actual  
16          Major Storm Costs as authorized in Case 20-E-0428 (2021 Rate Order,  
17          Appendix U).

18          “Carrying Charges on Sales Tax Refund and Assessment”  
19          represents accumulated interest due (to)/from customers associated with  
20          the deferral of sales tax assessments and refunds as established in Cases  
21          20-E-0428 and 20-G-0429 (2021 Rate Order, Joint Proposal at page 32).

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1           “Carrying Charges on Call Volume Overflow” represents  
2           accumulated interest due from customers associated with the deferral of  
3           incremental call volume overflow costs. Under the provisions of the JP in  
4           Cases 20-E-0428 and 20-G-0429, the Company was able to collect \$1.5  
5           million for incremental costs that were expected to be incurred in the first  
6           rate year, but that were collected evenly over the three years of the Rate  
7           Plan (2021 Rate Order, Joint Proposal at page 28 and Appendix F,  
8           Schedule 4).

9           “Carrying Charges on Make Whole Provision” represents the  
10          accumulated interest due from customers on the deferred balance  
11          attributable to the Make Whole Provision from Cases 20-E-0428 and 20-  
12          G-0429 (2021 Rate Order, Joint Proposal at pg. 9).

13          “Carrying Charges on Economic Development – Customer  
14          Funding” represents the accumulated interest due to customers on the  
15          difference between Economic Development program costs and amounts  
16          collected in rates (2021 Rate Order, Joint Proposal at pgs. 22-23).

17          “Carrying Charge on Management Audit – Electric & Gas”  
18          represents the accumulated interest due from customers on the net  
19          deferred asset recorded in conjunction with costs incurred for the  
20          Company’s management audit in Case 21-M-0541 (2021 Rate Order,  
21          Joint Proposal at pg. 16).

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1           “Carrying Charge on Safety of Gas Transmission Rule” represents  
2           the accumulated interest due from customers on the increment costs  
3           incurred to fulfill requirements of this requirement beyond what was  
4           included in rates (2021 Rate Order, Joint Proposal at pg. 32).

5           “Carrying Charges on Rate Moderators” and “Carrying Charges on  
6           EBC/GCB” represent the accumulated interest due to customers on the  
7           net deferred regulatory credits available for rate moderation, as well as the  
8           over/under of the pass back of the moderation as authorized in Cases 20-  
9           E-0428 and 20-G-0429 (2021 Rate Order, Joint Proposal at pgs. 8, 23 and  
10          34).

11          “Carrying Charges on Danskammer Gas Revenue” represents the  
12          accumulated interest due from customers on the actual delivery revenues  
13          associated with providing gas service to Danskammer compared to the  
14          revenues imputed in rates. (2021 Rate Order, Joint Proposal at pg. 24).

15          “Carrying Charges on Energy Affordability” represents the  
16          accumulated interest due to customers related to the underspending of the  
17          Bill Discount and Waiver of Reconnection Fee components of the Energy  
18          Affordability Program as authorized in Cases 20-E-0428 and 20-G-0429  
19          (2021 Rate Order, Joint Proposal at pgs. 41-42).

20          “Carrying Charges on NWA Targeted Demand Management  
21          Program” represents the accumulated interest due from customers related  
22          to the deferral of revenue requirements on projects and incentives as

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 authorized by Order Implementing with Modification the Proposal of Cost  
2 Recovery and Incentive Mechanism for Non-Wire Alternative Project  
3 issued July 15, 2016 in Case 14-E-0318. (2021 Rate Order, Joint  
4 Proposal at pgs. 18 and Appendix F).

5 “Carrying Charges on REV Demo Projects” represents the  
6 accumulated interest on the revenue requirement effect of the Company’s  
7 Reforming the Energy Vision (“REV”) Demonstration Project as authorized  
8 in Cases 120-E-0428 and 20-G-0429 (2021 Rate Order, Joint Proposal at  
9 Pg. 18).

10 “Carrying Charges on Non Pipe Alternative (NPA)” represents the  
11 accumulated interest due from customers on the incremental revenue  
12 requirement effect of development and implementation costs associated  
13 with NPA projects as authorized in Case 20-G-0429 (2021 Rate Order,  
14 Joint Proposal at pg. 18).

15 “Carrying Charges on COVID Lost Revenues” represents the  
16 accumulated interest on the over/under deferral of finance charge revenue  
17 and reconnection fee revenue compared to that assumed in the  
18 establishment of rates in Cases 20-E-0428 and 20-G-0429 (2021 Rate  
19 Plan, Joint Proposal at Pg. 28).

20 “Carrying Charges on Clean Energy Fund – NYSEDA & CHGE  
21 Internal EE Programs” represents the net accumulated interest due to  
22 customers on (1) the difference between actual remittances to NYSEDA

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 in connection with the Clean Energy Fund programs to the costs collected  
2 from customers and (2) the difference between expenditures for the  
3 Company's internal suite of Energy Efficiency and Heat Pump programs  
4 and collection in rates as authorized in Cases 20-E-0428 and 20-G-0429  
5 (2021 Rate Order, Joint Proposal at pgs. 17, 52 and 52).

6 "Carrying Charges on Revenue Requirement – Leak Prone Pipe"  
7 represents the carrying charge on the deferred revenue requirement due  
8 from customers for miles of leak prone pipe eliminated in excess of the  
9 targets established for calendar year 2021 and authorized in Case 17-G-  
10 0460 (2018 Rate Order, Joint Proposal at pg. 22).

11 "Pension Reserve (Net of Tax)" represents the accumulated  
12 collection from customers over/under the accumulated amount of the  
13 Company's contributions to the related Plan trust established for benefits  
14 to be distributed to plan participants.

15 "Carrying Charge Pension Reserve" represents interest accrued on  
16 the variation between actual reserve balances and the amounts included  
17 in the development of rate base used to establish delivery rates as  
18 authorized in Cases 20-E-0428 and 20-G-0429 (2018 Rate Order, Joint  
19 Proposal at pg. 16).

20 "OPEB Reserve (Net of Tax)" represents the accumulated  
21 collection from customers over/under the accumulated amount of the

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Company's funding or contributions to the related Plan trusts established  
2 for benefits to be distributed to plan participants.

3 "Carrying Charge OPEB Reserve" represents interest accrued on  
4 the variation between actual reserve balances and the amounts included  
5 in the development of rate base used to establish delivery rates as  
6 authorized in Cases 20-E-0428 and 20-G-0429 (2018 Rate Order, Joint  
7 Proposal at pg. 16).

8 "Carrying Charges on Rate Adjustment Mechanism (RAM)"  
9 represents carrying charges accrued during the RAM collection period on  
10 the deferred RAM eligible balances being collected or returned via the  
11 RAM as authorized in Cases 20-E-0428 and 20-G-0429 (2020 Rate Order,  
12 at Pg. 52 and Appendix G).

13 "Miscellaneous Adjustment" reflects immaterial rounding or  
14 balancing adjustments necessary to align the complex rate base model  
15 with the simplified model included in the development of revenue  
16 requirements.

17 Q. Would the Panel please explain what is shown on Schedule C of  
18 Exhibit \_\_ (RRP-6) entitled "Deferred Federal Taxes?"

19 A. Schedule C shows the average balance of accumulated deferred federal  
20 taxes for the historical period. The majority of the items listed represent  
21 the deferred federal income tax associated with the deferred charges  
22 shown on Schedule B. Other items listed on Schedule C result from

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 deferred tax accounting authorized or required by long-standing  
2 Commission policy.

3 Q. Would the Panel please explain those deferred federal tax items included  
4 in Schedule C of Exhibit \_\_ (RRP-6) that are not directly related to the  
5 items shown on Schedule B?

6 A. "Contributions In Aid of Construction" is the result of normalizing the tax  
7 effect of such contributions from customers being considered a reduction  
8 of plant cost for book purposes, but an item of income for tax purposes.

9 "Unbilled Revenue" represents the taxation of unbilled revenues  
10 under the Tax Reform Act of 1986 and the related accounting and  
11 ratemaking requirements established by the Commission in a policy  
12 statement issued July 7, 1987 in Case 29465 (Statement of Policy on  
13 Accounting and Ratemaking Procedures to Implement Requirements of  
14 the Tax Reform Act of 1986 at pgs. 26-29).

15 "Deferred Avoided Cost Interest Capitalized" represents the  
16 deferred federal income tax resulting from the capitalization of  
17 construction-related interest costs under the Tax Reform Act of 1986 and  
18 the related accounting and ratemaking for such change in tax treatment  
19 established by the Commission in its related policy statement issued in  
20 Case 29465 (Statement of Policy on Accounting and Ratemaking  
21 Procedures to Implement Requirements of the Tax Reform Act of 1986 at  
22 pgs. 40-42).

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1           The amount shown as “Bonds Redeemed” represents the deferred  
2 income tax on both the unamortized redemption premium and deferred  
3 mortgage recording taxes related to redeemed bonds.

4           “Cost of Removal” is the deferred federal income tax associated  
5 with the costs of retiring plant in service.

6           “Normalized Depreciation” results from the normalization of the  
7 federal income tax benefits of tax depreciation related to plant investment  
8 as required by tax law and adopted by the Commission.

9           “Repair Allowance” represents the deferred federal income tax  
10 benefits resulting from the ability to expense for tax purposes certain  
11 replacements of plant, which are capitalized for book purposes.

12           “MACRS – Capital Reliability Program” represents the deferred tax  
13 benefits related to depreciation of electric reliability projects, the book  
14 costs of which were recovered from the Customer Benefit Fund.

15           “Prepaid Insurance” represents the deferral of federal income tax  
16 benefits associated with the deduction of prepaid insurance.

17           “Repair Deduction” represents the deferred taxes related to the  
18 reclassification of certain assets from capital to expense for federal and  
19 state income tax purposes. This is a timing difference and will reverse  
20 over the book life of the asset.

21           “NOL Carryforward” represents the Company’s federal Net  
22 Operating Loss (“NOL”). That NOL will be carried forward to be applied

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 against future taxable income. The NOL Carryforward reverses when  
2 there is taxable income to offset the balance.

3 “Unamortized R&D Expenses” represents the deferral of federal  
4 income tax associated with the deduction of R&D expenses.

5 “Interest Expense on Tax Reserve” represents the deferred taxes  
6 on the interest payable on the reserve for the gas repair deduction  
7 deemed to be at risk while awaiting final tax regulations. On April 14,  
8 2023, the IRS issued Revenue Procedure 2023-15, which provides a safe  
9 harbor method of accounting for gas repairs. Upon adoption of the  
10 Revenue Procedure the allowable reserve will be reversed.

11 Q. Are there any other comments that the Panel would like to make regarding  
12 the deferred tax items shown on Schedule C of Exhibit \_\_ (RRP-6)?

13 A. Yes. Schedule C does not include amounts related to unamortized debt  
14 expense and unamortized loss on reacquired debt because the  
15 amortization periods for these costs are the same for both book and tax  
16 purposes and, therefore, no deferred taxes result. In addition, executive  
17 deferred compensation is non-deductible for tax purposes and, therefore,  
18 no deferred taxes result. Finally, the Company has federal contra tax  
19 accounts to recognize the federal benefits of deferred state income taxes.  
20 In other words, a state income tax rate at 6.5% multiplied by the federal  
21 tax rate of 21%.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. Please explain what is shown on Schedule D of Exhibit \_\_ (RRP-6)  
2 entitled "Deferred State Taxes."

3 A. Schedule D shows the accumulated deferred New York State taxes for the  
4 historical period. As with Schedule C, some of the items listed represent  
5 the deferred state income tax associated with the deferred charges shown  
6 on Schedule B. Other items listed on Schedule D result from deferred tax  
7 accounting authorized or required by the Commission as previously  
8 described regarding federal income taxes on Schedule C.

9 Q. Please explain what is shown on Schedule E of Exhibit \_\_ (RRP-6),  
10 entitled "Working Capital."

11 A. The working capital items which have been summarized on Schedule A  
12 are shown on Schedule E of Exhibit \_\_ (RRP-6). This schedule sets forth  
13 the working capital component of rate base for the twelve months ended  
14 March 31, 2023. The schedule identifies the standard items that make up  
15 the working capital rate base in accordance with established Commission  
16 practice. Included are Other Materials and Supplies, Prepayments and an  
17 allowance for operation and maintenance ("O&M") expenses,  
18 excluding commodity costs and uncollectibles.

19 Q. How were the amounts shown on Schedule E of Exhibit \_\_ (RRP-  
20 6) developed?

21 A. Monthly balances for materials and supplies and prepaid expenses were  
22 derived from the Company's monthly balance sheets. The allowance for

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 operation and maintenance expenses was developed from the  
2 departmental income statements by applying the Federal Energy  
3 Regulatory Commission ("FERC") formula, as approved by the  
4 Commission. Since the Company began billing all customers monthly  
5 effective July 2016, a one-eighth (1/8) factor was used to determine the  
6 cash working capital related to operation and maintenance expenses other  
7 than uncollectible expense and commodity costs. The Commission's  
8 Order issued on December 22, 1971 in the Niagara Mohawk Power  
9 Corporation Case 26088 (Order at pgs. 5-9) established the 1/8 factor as  
10 appropriate, since the "FPC (Federal Power Commission) method  
11 comprehends a working capital cash allowance of 1/8 of annual operating  
12 expenses based on service being billed on a monthly basis." The historic  
13 year level of cash working capital was normalized to recognize the  
14 adjustments made to O&M expense excluding commodity costs and  
15 uncollectibles.

16 Q. How were common components of working capital allocated between the  
17 Electric and Gas Departments?

18 A. Common items in the materials and supplies portion of working capital  
19 were allocated 71% to the Electric Department and 29% to the Gas  
20 Department based on the ratio of average electric and gas gross utility  
21 plant, excluding common and future use plant for the historical period.  
22 Prepaid property taxes were allocated 71% to the electric department

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 and 29% to the gas department based on the allocation of the underlying  
2 plant assets that served as the basis of the property taxes paid. All other  
3 prepayments were allocated 80% to the electric department and 20% to  
4 the gas department as authorized in Cases 14-E-0318 and 14-G-0319  
5 (2015 Rate Order, Joint Proposal at pg. 10.)

6 Q. Please explain the derivation of the amounts labeled "Capitalization  
7 Adjustment to Rate Base" appearing on Schedule A of Exhibit \_\_ (RRP-6).

8 A. These amounts are developed on Schedules F through H of Exhibit \_\_  
9 (RRP-6). Schedule F shows the average capitalization per the Company's  
10 books for the twelve months ended March 31, 2023. Schedule G shows  
11 the average corporate earnings base for the twelve months ended March  
12 31, 2023. The amounts developed on Schedules F and G are used on  
13 Schedule H, which compares the historical period earnings base and  
14 capitalization to determine the extent to which the unadjusted rate base  
15 must be adjusted so that the final earnings base and capitalization are in  
16 balance.

17 Q. Please explain the derivation of earnings base as shown on Schedule G of  
18 Exhibit \_\_ (RRP-6).

19 A. The earnings base shown on Schedule G is the earnings base for the  
20 historical period before the application of the earnings base-capitalization  
21 adjustment to rate base. It, therefore, consists of the unadjusted rate  
22 base shown on Schedule A of Exhibit \_\_ (RRP-6), as well as interest-

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 bearing construction work in progress (shown on Exhibit \_\_ (ATP-1),  
2 Schedule A) and a series of items on which interest or carrying charges  
3 are accrued, net of applicable deferred tax balances.

4 Q. Why has the total capitalization shown on Schedule F been adjusted on  
5 Schedule H prior to comparing it to the earnings base?

6 A. Capitalization has been adjusted for several reasons. The first is to  
7 recognize that capital has been used to support non-earnings base items.  
8 Related adjustments shown on Schedule H include the Company's  
9 average investment in non-utility property, property subject to FERC  
10 regulation, and accumulated OCI – available for sale securities.

11 The second purpose of adjusting capitalization is to more  
12 accurately reflect the cashflow available to the Company from the various  
13 sources of capital than is indicated by the monthly average capitalization  
14 shown on Schedule F. In this regard, capitalization was decreased to  
15 reflect the average daily, rather than monthly, balance of common equity  
16 and long-term debt and increased for short-term debt.

17 The third reason for adjusting capitalization relates to recognizing  
18 that short term deferred and working capital costs are collected through  
19 the Energy Cost Adjustment Mechanism (“ECAM”) and Gas Supply  
20 Charge (“GSC”). Adjustments shown in Schedule H to reflect this are  
21 those identified as “Deferred Gas Costs”; “Working Capital – Material &

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

Supplies Inventory”; “Deferred Electric Fuel Costs”; and “Deferred Long  
Term Gas R&D/GRI Costs.”

Finally, the last adjustments to capitalization serve to remove the  
effects of negative and positive revenue adjustments, earnings adjustment  
mechanisms, other penalties, and prepayments received from third party  
developers that are not included to determine the amount of capital  
required to support rate base in the determination of revenue  
requirements.

Additionally, the deferred contra income tax effect of the adjustments  
to capitalization noted above was recognized.

Q. What is the result of the comparison on Schedule H of Exhibit \_\_ (RRP-6)  
of the historical period earnings base and adjusted capitalization?

A. The comparison shows that adjusted capitalization exceeds earnings base  
by \$125.5 million. Accordingly, the unadjusted rate base has been  
increased by this amount as shown and identified as "Capitalization  
Adjustment to Rate Base" appearing on Schedule A of Exhibits \_\_ (RRP-  
6) and \_\_ (RRP-7). This adjustment reflects the consistent application of  
the method used by the Company and endorsed by the Commission in  
previous rate cases.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. How has the capitalization adjustment to rate base been allocated  
2 between the Electric and Gas Departments?

3 A. The capitalization adjustment to rate base has been allocated 70% to the  
4 Electric Department and 30% to the Gas Department based on their  
5 respective contributions to the total earnings base for the historical period  
6 as calculated on Schedule G of Exhibit \_\_ (RRP-6).

7 Q. Turning now to the subject of forecasting various components of the rate  
8 base and referring to Exhibit \_\_ (RRP-7), Schedule A, please explain how  
9 the amounts labeled "Customer Advances for Undergrounding" were  
10 forecasted.

11 A. The amounts shown on Schedule A for these items represent the latest  
12 known balances as of February 28, 2023, which were held constant  
13 throughout the bridge period and Rate Year.

14 Q. Please explain the method used to develop the projected amounts shown  
15 on Schedules B, C and D, of Exhibit \_\_ (RRP-7), entitled "Deferred  
16 Charges," "Deferred Federal Income Taxes," and "Deferred State Income  
17 Taxes," respectively.

18 A. The amounts shown on Schedules B, C and D were developed by  
19 projecting monthly balances for the items shown, which were all previously  
20 described, and then determining the average monthly balance for each  
21 twelve-month period. For those items appearing on all three schedules,

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 the deferred tax balances shown on Schedules C and D track the  
2 projected balances for the item as shown on Schedule B.

3 Q. How was the amount shown on Schedule A of Exhibit \_\_ (RRP-7), related  
4 to "Working Capital," for the projected periods calculated?

5 A. The calculation of working capital as summarized on Schedule A is shown  
6 on Schedule E of Exhibit \_\_ (RRP-7).

7 Q. Referring to Schedule E, please explain how the working capital  
8 components were projected.

9 A. Working Capital related to prepaid insurance, other prepayments and  
10 other material and supplies were forecasted by escalating the previous  
11 year's monthly balance by inflation.

12 The projected balance of prepaid property taxes was based on the  
13 timing of cash payments to municipalities and a subsequent twelve-month  
14 amortization. Projected monthly balances were determined based on the  
15 relationship of the average actual monthly prepaid balance for the period  
16 2020 through 2022.

17 Finally, consistent with the historic year discussion earlier in this  
18 testimony, the operation and maintenance cash working capital  
19 component was developed by applying the FERC one-eighth (1/8) formula  
20 applicable to operation and maintenance expenses.

**DIRECT TESTIMONY OF THE REVENUE REQUIREMENTS  
PANEL**

1 Q. What is the projected rate base by Department for the Rate Year?

2 A. As shown on Schedule A of Exhibit \_\_ (RRP-7), the projected rate base  
3 for the Rate Year is \$1.756 billion for Electric and \$745.1 million for Gas.

4 Q. Is the Company proposing to update rate base?

5 A. Yes, the Company is proposing to update rate base, including EBCAP, for  
6 actual results at a point later in this proceeding.

7 **IV. Disposition of Deferred Items**

8 Q. What is the Company's proposal related to the deferred balances  
9 identified as available for moderation?

10 A. Schedule A and B of Exhibit \_\_ (RRP-8) show the projected deferred  
11 balances available for moderation for electric and gas, respectively. The  
12 projected electric balance as of July 1, 2024 is a regulatory credit of \$22.0  
13 million and a regulatory credit of \$12.1 million for gas. The use of these  
14 balances as a rate moderator is discussed in further detail within the  
15 testimony of the Policy Panel.

16 The final makeup of these balances, including the recognition of  
17 unanticipated items, and any necessary related rate base adjustments will  
18 be updated at a later stage in these proceedings based upon actual  
19 known items and balances at that time.

PANEL**

**V. Provision for Updates**

- 1
- 2 Q. Please specify the areas of data that the Revenue Requirements Panel
- 3 and other Company witnesses have proposed to update later in these
- 4 proceedings.
- 5 A. Exhibit \_\_ (RRP-9) provides a listing of all proposed items subject to
- 6 update, although, we may have inadvertently omitted areas where an
- 7 update is being proposed. As such, the Company reserves the right to
- 8 revise the composition of Exhibit \_\_ (RRP-8) subject to Staff review and
- 9 approval. The majority of the proposed update items have been included
- 10 in previous Company rate cases. These updates have traditionally been
- 11 performed for inclusion in the Company's Brief on Exceptions under a
- 12 one-year litigated outcome or during the course of settlement negotiations
- 13 for multi-year Rate Plans.
- 14 Q. Does this conclude your direct testimony at this time?
- 15 A. Yes, it does.
