| Reconstruction data with the function of the functin of the function of the function of the functin of the ## Forecast Rate Year 3 Revenue at Rate Year 2 Rates

⁴ Revenue Requirement Allocated to Lighting: \$42,446,412

⁵Surcredit Allocated to Lighting: -\$2,024,914 Revenue Requirement for Lighting Rate Year 3: \$40,421,498

Dollar Increase for Lighting Rate Year 3: \$1,098,177

Percentage Increase for Lighting Rate Year 3: 2.79%

## Facility Revenue Target Adjustment

	_	Facility Revenue	
Total Target	t Facility Revenue:	\$29,017,392	a = Proposed Revenue Requirement less Proposed T&D Revenue
⁶ PE % Inc.:	10.68%	\$785,758	b = Present SC2 PE Facility Dollars x PE % Inc.
⁷ LED % Inc.:	1.46%	\$4,766,076	c = Present SC1 LED + SC2 LED Facility Dollars x LED % Inc.
Non-PE & Non-LED Target	t Facility Revenue:	\$23,465,559	d = a - b - c
Non-PE & Non-LED Present	t Facility Revenue:	\$22,821,658	e = Present Total Facility - SC2 PE Facility - SC1 LED Facility - SC2 LED Facility
Dollar Increase for non-PE & n	on-LED Facilities:	\$643,901	f = d - e
Percentage Increase for non-PE & r	non-LED Facilites:	2.82%	g = f/e

Notes:

(1) Facility Price Exceptions ("PE") on SC-2 customer accounts.

(2) Special Contracts within SC-2 customer accounts.

(3) The SC-4 basic service charges are included in "facility revenue" above and elsewhere, for convenience of presentation.

(4) Source: Appendix 2, Schedule 3.7, Line 11, page 2. Rate Year 3 Target Distribution Revenue for Lighting.

(5) Source: Appendix 2, Schedule 3.7, Line 11, page 2. Surcredit RY3 for Lighting.

(6) PE facility increase based on 10-year phase out per Appendix 2, Schedule 8.4c; rate shown is average increase across all PE facilities.

(7) LED facility increases reduced based on replacement cost analysis per Appendix 2, Schedule 8.9c, page 1.

SC-3 Sec	12.44%	\$47,516	4,072,699	\$0.01	\$/kW
SC-3 Pri	5.03%	\$19,213	1,417,651	\$0.01	\$/kW
SC-3 SubT/Tran	1.79%	\$6,837	561,042	\$0.01	\$/kW
SC-3A Sec/Pri	2.46%	\$9,396	920,282	\$0.01	\$/kW
SC-3A SubT	3.83%	\$14,629	1,223,646	\$0.01	\$/kW
SC-3A Tran	14.53%	\$55,499	4,631,185	\$0.01	\$/kW
Lighting	0.01%	\$38	54,199,106	\$0.00	\$/kWh
Total	100.00%	\$381,961			

Notes:

(1) Non-bypassable surcharge included on the delivery line item of customers' bills

(2) Coincident Peak (1CP) Allocator: Case 20-E-0238 Joint Proposal, Appendix 2, Schedule 2.4, line 45, page 2.

(3) Costs include Non-labor OpEx costs associated with operating the ETS facility described in Case 20-E-0380 Joint Proposal Section IV.12.2.9. Project costs shown are estimated for the period beginning March 2024 through June 2024.

(4) March 2024-June 2024 Sales Forecast; excludes EJP & EZR qualifying load; kWh for non-demand classes, kW for demand classes

(5) The surcharge will be reset annually until such costs are included in the next rate case for recovery

Calculation of Time-of-Use Incremental Customer Charge

For Service Classification No. 1 (SC1), Special Provision L and Service Classification No. 2 (SC2ND), Special Provision O Meter Equipment and Installation Cost Calculations

ter Equipment and Installation Cost Calculations

- Notes:
- 1 Complex meters are considered any meter that is transformer rated; managed by Meter Data Service (MDS); meter count as of 12/31/19.
- 2 Self-contained meters are considered remaining non-transformer rated; managed by Customer Metering Service (CMS); meter count as of 12/31/19.
- 3 Line 1 + line 2; percent of total creates weighted complex vs. self-contained.
- 4 Typical complex meter cost as listed in SAP (Aclara KV2C meter Form 9S, CL20 120-480V); cost as of 12/31/19.
- 5 Typical self-contained meter cost as listed in SAP (Aclara KV2C meter Form 16S, CL200 120-480V); cost as of 12/31/19.
- 6 Meter costs listed in Line 4 & Line 5 times respective weighted meter count percentages in Line 1 & Line 2.
- 7 NMPC weighted average sales tax from June 2019 to May 2020.
- 8 Line 6 x (1+Line 7).
- 9 Program installation time estimate received from NY Electric Meter Lab
- 10 Meter & Test (M&T) Field Tester D (PG20-step 2), Local 97 Blue Book, Wage Schedule P; Effective 4/1/2020.
- 11 Meter Shop Tester C (PG18-step 2), Local 97 Blue Book, Wage Schedule P; Effective 4/1/2020.
- 12 Labor rates listed in Line 10 & Line 11 times respective weighted meter count percentages in Line 1 & Line 2.
- 13 Line 9 x Line 12.
- 14 NMPC non-management Labor Overhead rate; as of April 2020; percentage times Line 13.
- 15 Line 13 + Line 14.
- 16 Line 8 + Line 15.
- 17 Installation time estimate received from MDS and CMS.
- 18 Travel time estimate received from MDS and CMS.
- 19 Line 17 + Line 18.
- 20 M&T Field Tester D (PG20-step 2), Local 97 Blue Book, Wage Schedule P; Effective 4/1/2020.
- 21 M&T Field Tester E (PG22-step 2), Local 97 Blue Book, Wage Schedule P; Effective 4/1/2020.
- 22 Line 20 and Line 21 weighted by frequency.
- 23 Service Representative C (PG20-step 2), Local 97 Blue Book, Wage Schedule P; Effective 4/1/2020.
- 24 Labor costs listed in Line 22 & Line 23 times respective weighted meter count percentages in Line 1 & Line 2.
- 25 Line 19 x Line 24.
- 26 NMPC non-management Labor Overhead rate; as of October 2019; percentage times Line 25.
- 27 Line 25 + Line 26.
- 28 Line 19.
- 29 Cost per hour of Van Compact AWD vehicle with fuel; from Fleet Management; as of 12/31/19.
- 30 Line 28 x Line 29.
- 31 Line 16 + Line 27 + Line 30.
- 32 NMPC Distribution Capital Overhead rate; as of April 2020; percentage times Line 31.
- 33 NMPC A&G Capital Overhead rate; April 2019-March 2020 average; percentage times Line 31.
- 34 Line 31 + Line 32 + Line 33.
- 35 NMPC Supervision & Administrative Overhead rate; as of September 2019; percentage times Line 34.
- 36 Line 34 + Line 35; value used as capital cost input in Revenue Requirement calculation (column C).

Calculation of Hourly Pricing Incremental Customer Charge For Service Classification No. 2-Demand (SC2D), Special Provision P and Service Classification No. 3 (SC3), Special Provision L & N

### Annual Operating Expenditure Cost Calculations

Notes:

- 1 Count of meters based on number of hourly-priced customers; as of 12/31/2019.
- Customers in SC3 exempt from paying incremental customer charge include those enrolled in economic development programs. Spares not included in annual operating expense calculation
- 2 Annual wireless network fee charged to the customer for communication to digital cell meter; annual fee times Line 1.
- 3 Monthly service costs for a land line serviced by Granite Telecommunication; blended cost by frequency.
- 4 Monthly service costs for a land line serviced by Granie Feedominandulon, blended cost by frequency; annual fee times Line 1.
- 5 Line 2 + Line 4
- 6 Percent estimate provided by Meter Data Services (MDS); percentage times Line 1.
- 7 Percent estimate provided by Meter Data Services (MDS); percentage times Line 1.
- 8 Line 6 + Line 7
- 9 Labor on troubleshooting call: M&T Field Tester D (PG20-step 2), Local 97 Blue Book, Wage Schedule P; Effective 4/1/2020; blended rate weighted by frequency. Troubleshooting hour estimates provided by Meter & Test by meter type.
- 10 Labor on troubleshooting call: M&T Field Tester E (PG22-step 2), Local 97 Blue Book, Wage Schedule P; Effective 4/1/2020; blended rate weighted by frequency. Troubleshooting hour estimates provided by Meter & Test by meter type.
- 11 Blended labor rate in Line 9/10 times hour estimates in Line 9/10.
- 12 Line 8 x Line 11
- 13 NMPC non-management Labor Overhead rate; as of April 2020; percentage times Line 12 total.
- 14 Supervision over service calls: MDS average salary Management Band E.
- Supervision hour estimates provided by MDS by meter type.
- 15 Labor rate in Line 14 times hour estimates in Line 14.
- 16 Line 8 x Line 15
- 17 NMPC management Labor Overhead rate; as of April 2020; percentage times Line 16 total.
- 18 Line 12 + Line 13 + Line 16 + Line 17.
- 19 Cost per hour of Van Compact AWD vehicle with fuel; from Fleet Management; as of 12/31/19.
- Installation hour estimates from Line 9/10 by meter type.
- 20 Transportation rate in Line 19 times hour estimates in Line 19.
- 21 Line 8 x Line 20.
- 22 Line 5 + Line 18 + Line 21.
- 23 NMPC Supervision & Administrative Overhead rate; as of September 2019; percentage times Line 22.
- 24 Line 22 + Line 23; value used as annual operating cost input in Revenue Requirement calculation (column Q).

# Appendix 3

# Index of Exhibits

Schedule 1	Rate Years 1-3 Gas Revenue Forecast
Schedule 2	Revenue Allocation Rate Year 1, Rate Year 2 and Rate Year 3
Schedule 3	Rate Design Rate Year 1, Rate Year 2 and Rate Year 3
Schedule 4.1	Customer Bill Impacts – Current versus Proposed Rate Year 1
Schedule 4.2	Customer Bill Impacts – Rate Year 1 versus Rate Year 2
Schedule 4.3	Customer Bill Impacts – Rate Year 2 versus Rate Year 3
Schedule 4.3	Customer Bill Impacts – Rate Year 3 versus Stayout Period
Schedule 5	Tariff Fees
Schedule 6.1	Merchant Function Charges ("MFC") – Total Annual MFC
	RY1 and GAC Year
Schedule 6.2	Merchant Function Charges ("MFC") – FY to GAC Year
	conversion for Credit and Collection and Gas Procurement
	Target
Schedule 6.3	Merchant Function Charges ("MFC") – Setting Rates for each
	MFC components for September 2021 -August 2022 and
	Annual Reconciliation
Schedule 6 .4	Merchant Function Charges ("MFC") – Illustrative Example -
	Stub Period Calculation for Annual Reconciliation Jan 1, 2023
Schedule 7	Revenue Decoupling Mechanism ("RDM") Targets

# Appendix 3

Schedule 8	Lost and Unaccounted for Gas ("LAUF") Target
Schedule 9	Earnings Adjustment Mechanism ("EAM") - Illustrative
	Calculation
Schedule 10	Net Revenue Sharing ("NRS") Targets – Illustrative
	Calculation
Schedule 11	Net Plant Tracker & Incremental NE:NY Costs Surcharge -
	Illustrative Calculation
Schedule 12	Delivery Revenue Adjustment ("DRA") - Pro-Forma
Schedule 13	Make Whole Provision - MFC
Schedule 14	ETIP Reconciliation and Target ETIP revenues – Illustrative
	Calculation
Schedule 15	Load Factor Ratio - Illustrative Example
Schedule 16	Daily Balancing Service Demand Charge (swing charge) -
	Illustrative Example
Schedule 17	EJP - Phased in EJP rates

# Niagara Mohawk Power Corporation d/b/a National Grid Merchant Function Charge

Illustrative Example - Calculation of Gas Supply Procurement Charge for September 2021 and Reconciliation Applicable to Customers taking Sales Service under Service Classification Nos. 1, 2, 12 and 13 & 5, 7 and 8

1) Set Gas Procurement and Commodity-Related Sales Promotion Expenses for:		
September 1, 2021 - August 31, 2022		
a) Allowed Expenses	\$	674,066
b) Forecasted SC 1, 2, 12 and 13 Sales & 5, 7, 8 Sales		585,329,704 Therms
c) Unit Rate effective September 1, 2021 - August 31, $2022 = (1a / 1b)$		0.00115 \$/Therm
2) Perform Annual Reconciliation for September 1, 2021 - August 31, 2022 :		
January 1, 2023 - December 31, 2023		
a) Actual Recoveries	\$	560,000
b) Allowed Expense	\$	674,066
c) Resulting Over Recovery (-) / Under Recovery (+) = $(2b - 2a)$		\$114,066
d) Forecasted SC 1, 2, 12 and 13 Sales & 5, 7, 8 Sales		593,016,846 Therms
e) Annual Reconciliation effective January 1, 2023 - December 31, $2023 = (2c / 2d)$		0.00019 \$/Therm
(surcharges/credits shall include simple interest at the Commission's other customer	capit	al rate)

2 Std Deviations	2.548%	1.000%
LAUF Target & Dead Band LAUF% Target (% of Deliveries)		1.672%
Upper Dead Band (Mean + 2 Std Dev Cap) *		2.672%
Lower Dead Band (Mean - 2 Std Dev Cap) *		0.672%

Factor of Adjustment (1/(1 - LAUF % target))

1.01700

Note: In accordance with the Staff's Draft White Paper, if the standard deviation of the five-year historic average is greater than 0.5%, the dead bands should be limited to plus or minus one percent.

Note: Inactive account penalty will be a monetary adjustment (inactive account volumes x weighted average cost of gas), replacing the volumetric adjustment.

Note: Loss Percentage was calculated by dividing LAUF by metered deliveries in Case 17-G-0239. In Case 20-G-0381, the loss percentage will be calculated by dividing LAUF by metered receipts.

## Case 20-E-0380 & 20-G-0381 Appendix 3 Schedule 16 Page 1 of 1

## Niagara Mohawk Power Corporation d/b/a National Grid Illustrative Example - Power Generator Swing Charge Calculation November 1, 2021 - October 31, 2022

	Dinalina FT	No Notice	Cl	NG & Peak		
Portfolio Demand Costs / Capacity	Fipenne F I	Storage		Shaving	To	otal
Annual (\$)	\$ 40,422,897	\$ 25,823,075	\$	1,101,000	\$	67,346,972
Annual (dt)	184,743,490	66,587,856		843,000		252,174,346
Annual Unitized Demand Costs (\$/dt)	\$ 0.22	\$ 0.39	\$	1.31	\$	0.27
Portfolio Max Daily Quantity (dt/day)	525,618	438,078		20,200		983,896
Portfolio Peak Day Cost (\$/dt)	\$ 76.91	\$ 58.95	\$	54.50	\$	68.45
	60%	38%		2%		100%

Po	wer Generation Transport (@2% Tolerance)		Pipeline	FT	1	No Notice Storage	CNG & Pea Shaving	ık Total	
1/	Annual Quantity (dt) (avg last 3 years LF)	43,889,067							
2/	Maximum Daily Quantity (dt/day)	308,318							
	Daily Balancing Tolerance: (+ / - )	2%							
3/	Daily Balancing Quantity = $MDQ \times \%$ Tolerance	6,166							
4/	Allocation Across Categories		(	0.0%		100.0%	0.0	)%	100.0%
	Billing Determinants	6,166		-		6,166	-		
	Allocated Demand Costs	\$ 363,484	\$	-	\$	363,484	\$ -		
5/	Swing - Unit Cost (\$/Dt)	\$ 0.0083							

1/ Annual Quantity (dt) = Combined MDQ x LF x 365

MDQ = Sum of maximum daily quantities as stated in current gas transportation agreements

LF = Average of last 3 calendar years load factors

365 days used for non-leap years, 366 will be used for leap years

2/ Maximum Daily Quantity (dt/day) = Combined MDQ for ALL generators

3/ Costs and quantities updated each GAC Year on Nov 1

4/ Assumed 100% of imbalance are handled by No Notice Storage

5/ Demand Costs / Annual Quantity

## Niagara Mohawk Power Corporation (d/b/a National Grid) NY PSC Case 20-E-0380 & 20-G-0381 Example of Carrying Charges on Deferrals (\$000's)

#### ELECTRIC EXAMPLE

	(a)	(b)	(c)	(d)	(e)
<u>Month</u>	Beginning <u>Balance</u>	Spending in Excess of <u>Threshold</u>	<u>Interest Rate</u> 7.66%	<u>Interest</u>	Ending Balance
Jul-21	-	(5,000)	0.64%	(12)	(5,000)
Aug-21	(5,000)	(3,750)	0.64%	(32)	(8,750)
Sep-21	(8,750)	(6,000)	0.64%	(55)	(14,750)
Oct-21	(14,750)	(4,000)	0.64%	(78)	(18,750)
Nov-21	(18,750)	(3,500)	0.64%	(96)	(22,250)
Dec-21	(22,250)	(2,750)	0.64%	(110)	(25,000)
Jan-22	(25,000)	1,500	0.64%	(113)	(23,500)
Feb-22	(23,500)	4,500	0.64%	(99)	(19,000)
Mar-22	(19,000)	4,500	0.64%	(78)	(14,500)
Apr-22	(14,500)	3,500	0.64%	(60)	(11,000)
May-22	(11,000)	3,000	0.64%	(44)	(8,000)
Jun-22	(8,000)	1,750	0.64%	(33)	(6,250)
				(812)	

#### Column Notes:

Column (a)	Prior month Column (e)
Column (b)	Actual monthly deferred spending
Column (c)	Authorized Carrying Charge Rate (Pre-Tax WACC or Other Customer Capital Rate) divided by 12
Column (d)	Column (c) times (Column (a) + Column (b) / 2) * 73.2725%
Column (e)	Column (a) + Column (b) - NOTE interest will be booked it a separate deferral account with interest

**Note:** This example calculation is for a deferral that carrying charges can be calculated monthly. Some carrying charges will be applied on an annual basis and would use the annual carrying charge rate.

Notes and Assumptions:

100.00%

Notes and Assumptions:
1) Monthly cash flow percentages in Rate Allowance based on two year average of 2018 and 2019 percentages
2) Allocate fiscal year total capex forecast based on monthly cash flow percentages
3) Close monthly capital expenditures to plant based on project's associated closing rule utilized in rate allowance If displaced project was a transmission major project with a specific in service date utilized in rate allowance, use the specific in service date utilized in rate allowance to project was associated depreciation rate for the associated project type
5) Utilizes pre-tax WACC by fiscal year per filing with a 900% ROE.
6) RYE June 30, 2023 balances will be rolled forward to RYE June 30, 2024, calculating a return on the net plant investment and associated depreciation expense.
7) RYE June 30, 2023 balances will be rolled forward to RYE June 30, 2024, calculating a return on the net plant investment and associated depreciation expense.

Case 20-E-0380 Appendix 5 Schedule 8 Page 2 of 2

Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 20-E-0380 & 20-G-0381 General Principles of the SIR Deferrral Mechanism

Established pursuant to the Financial Recovery Agreement (the "FRA"; Clause 16), approved by the Public Service Commission in Opinion No. 89-37(D); first applied in 1990 and continued to date applies to Site Investigation and Remediation (SIR) program sites, including:

- Former manufactured gas plant (MGP) sites
- Other Operating sites (previously designated by NM as "Industrial Waste Sites" and "Corrective Action Sites"; they include service centers, electric substations, and company properties)
- Potentially Responsible Party (PRP) sites (not owned by NM but pose alleged liabilities pursuant to Federal/State Superfund and other NYS Environmental Conservation Law-related regulations)

Allowable costs include:

- Consultant and contractor costs for site investigation and remediation efforts
- SIR activities that develop or implement remediation approaches to reduce the volume, mobility, or toxicity pre-existing contamination (caused or alleged to be caused by past practices or operations)
- Incremental external costs, including insurance premiums and legal costs, incurred to seek recovery from third parties or to otherwise seek to mitigate the cost or liability of the Company associated with the SIR program

Allowable costs shall be offset by:

- Net gains recognized from the sale or transfer to Non-utility Property of NM land and buildings included in rate base¹ or from the sale of stone, gravel, sand, or timber from such land, or
- Any net gains recognized from the leasing of such land or from the sale or lease of mining or drilling rights to such land, and
- Net insurance proceeds and net recoveries from third parties.

Department of Public Service Staff reserves the right to review for ultimate Commission determination the reasonableness of the actual deferred costs, which shall depend, inter alia, on the adequacy of the Company's efforts to seek contribution for those costs from other responsible parties.

¹ For land and buildings which have been removed from rate base prior to date that this policy became effective, Niagara Mohawk shall propose the appropriate sharing of net gains in a filing that is subject to the approval of the Commission.

## Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 20-E-0380 & 20-G-0381 Deferral of Electric Property Tax Expense (\$000's)

# ELECTRIC EXAMPLE

		Rate	Electric e Year One	Rate	Electric e Year Two	Rate	Electric Year Three
1	Example of Actual Expense	\$	220,000	\$	230,000	\$	250,000
2	Rate Allowance	\$	217,760	\$	234,545	\$	249,829
3	Under (over) spending	\$	(2,240)	\$	4,545	\$	(171)
4	Customer share of under (over) spending		90%		90%		90%
5	Amount Deferred to (from) Customers	\$	(2,016)	\$	4,090	\$	(154)

## Notes (by line number)

1. Example of Actual Expense

2. Forecasted Rate Year Expense. See Joint Proposal Section 12.1.6.

3. Line 2 less Line 1

4. Deferral for under (over) spending will be based on 90% customer and 10% company basis.

5. Line 3 * Line 4

### Niagara Mohawk Power Corporation d/b/a National Grid Deferral of Variable Pay Expense (\$000's)

		Rate Jur	Year Ending ne 30, 2022	Rate Jur	Year Ending ne 30, 2023	Rate Ju	e Year Ending ne 30, 2024
			Electric		Electric		Electric
1	Actual Expense	\$	18,000.0	\$	20,000.0	\$	19,000.0
2	Rate Allowance	\$	18,926.2	\$	19,627.5	\$	20,280.4
3	Amount Deferred to Customers	\$	926.2	\$	_	\$	1,280.4

If the actual expense is greater than the rate allowance, there is no additional recovery from customers. This is a downward only reconciliation per Joint Proposal Section IV 12.1.10

### Line Notes

Input Actual costs - Under the Company's management variable pay program (Annual Performance Plan) the evaluation period is on a fiscal year basis ending March.

- Variable pay expense is accrued monthly, with the final accrual in March reconciling the annual variable pay total to the expected pay out in June.
- 2 Forecasted Rate Year Variable Pay Expense
- 3 Line 2 less Line 1 (if Line 2 is greater than Line 1)

## Niagara Mohawk Power Corporation d/b/a National Grid Deferral of Variable Pay Expense (\$000's)

		Rate Ju	Year Ending ne 30, 2022	Rate Jun	Year Ending e 30, 2023	Rate Jur	Year Ending ne 30, 2024

Total	\$	87,379	\$	97,426	\$	107,824	\$	292,629

9 Month Stayout Period \$ 12,875 \$ 74,192 \$ 87,067

Notes:

LED ST Lighting, Ecommerce and EMV costs are included in the Base EE.

The Rate Years span July 1st through June 30th. In order to accurately display this, the Rate Years prorate the calendar years accordingly.

The 9 month Stayout Period span July 1, 2024 through March 31, 2025. In order to accurately display this, the calendar years are prorated accordingly.

### ELECTRIC EXAMPLE

		Electric		Electric		Electric		Electric
	Ra	ate Year One	F	Rate Year Two	F	ate Year Three	Sta	yout Period
1 Actual Expense	\$	100,000	\$	95,000	\$	96,500	\$	85,000
2 Rate Allowance	\$	87,379	\$	97,426	\$	107,824	\$	87,067
3 Difference - underspend / (overspend)	\$	(12,621)	\$	2,426	\$	11,324	\$	2,067

#### Assumption

Pursuant to the NE:NY order, the Company is permitted to carry deferred overspent or underspent funds forward from year to year through 2025, for offset or use in future year Energy Efficiency programs provided that the Company does not exceed the cumulative budget authorized by the NE:NY Order.

#### Notes (by line number)

1 Input - Actual Costs - Illustrative Example

2 Per NE:NY Order: Case 18-M-0084 prorated to Rate Year basis, July 1st through June 30th and 9 Month Stayout Period

## Niagara Mohawk Power Corporation d/b/a National Grid AMI Downward-only Operations and Maintenance Tracker (6 Year Deployment Period) Actuals vs Target Example

6 Year Cumulative Estimated Revenue Requirement Actuals	121,311,316
6 Year Cumulative Revenue Requirement Target	119,174,923
6 Year Cumulative Actuals (Over)/Under Target	(2,136,393)
6 Year Cumulative Estimated Revenue Requirement Actuals	118,116,256
6 Year Cumulative Revenue Requirement Target	119,174,923
*6 Year Cumulative Actuals (Over)/Under Target	1,058,668

Note: Downward only O&M reconciliation - no amounts due from customer if actuals are higher than target *In the event the Company is below the cumulative target at the end of 6 Year Deployment period, the Company will defer the revenue requirement impact for the benefit of customers.

**Actuals will be tracked in aggregate and compared to the total O&M target of \$119.17M

Inflation				2.296%		2.055%		

Total Allowance

#### Per Joint Proposal Section IV 12.2.4 and Appendix 14

Minor storm expenses are subject to a cumulative reconciliation mechanism over the term of the three-year rate plan.

This reconciliation is downward-only, with an upward threshold of \$30 million (\$10 million annually).

There is a 90%/10% cost sharing mechanism (90% customer/10% company) for any amount exceeding the total cumulative

allowance plus the \$30 million deadband.

#### Example 1:

Company incurred \$172M in minor storm costs over the term of the rate plan, a cumulative overspend of \$46.3M. However, due to the deadband, the Company would defer for future recovery from customers \$14.6M.

	Rate Jun	Year Ending e 30, 2022	Rate Ju	Year Ending ne 30, 2023	Rate Jui	Year Ending ne 30, 2024	Tota Rat	al Cumulative te Allowance

Notes and Assumptions:
1) Monthly cash flow percentages in Rate Allowance based on two year average of 2018 and 2019 percentages
2) Allocate fiscal year total capex forecast based on monthly cash flow percentages
3) Close monthly capital expenditures to plant based on preject's associated closing rule utilized in rate allowance
4) Depreciation is based on the approved composite depreciation rate for the associated project type
5) Utilizes pre-tax WACC by fiscal year per filing with a 9.00% ROE.
6) RYE June 30, 2022 balances will be rolled forward to RYE June 30, 2023 and RYE June 30, 2024, calculating a return on the net plant investment and associated depreciation expense.
7) RYE June 30, 2023 balances will be rolled forward to RYE June 30, 2024, calculating a return on the net plant investment and associated depreciation expense.

Case 20-G-0381 Appendix 6 Schedule 8 Page 2 of 2

Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 20-E-0380 & 20-G-0381 General Principles of the SIR Deferrral Mechanism

Established pursuant to the Financial Recovery Agreement (the "FRA"; Clause 16), approved by the Public Service Commission in Opinion No. 89-37(D); first applied in 1990 and continued to date applies to Site Investigation and Remediation (SIR) program sites, including:

- Former manufactured gas plant (MGP) sites
- Other Operating sites (previously designated by NM as "Industrial Waste Sites" and "Corrective Action Sites"; they include service centers, electric substations, and company properties)
- Potentially Responsible Party (PRP) sites (not owned by NM but pose alleged liabilities pursuant to Federal/State Superfund and other NYS Environmental Conservation Law-related regulations)

Allowable costs include:

- Consultant and contractor costs for site investigation and remediation efforts
- SIR activities that develop or implement remediation approaches to reduce the volume, mobility, or toxicity pre-existing contamination (caused or alleged to be caused by past practices or operations)
- Incremental external costs, including insurance premiums and legal costs, incurred to seek recovery from third parties or to otherwise seek to mitigate the cost or liability of the Company associated with the SIR program

Allowable costs shall be offset by:

- Net gains recognized from the sale or transfer to Non-utility Property of NM land and buildings included in rate base¹ or from the sale of stone, gravel, sand, or timber from such land, or
- Any net gains recognized from the leasing of such land or from the sale or lease of mining or drilling rights to such land, and
- Net insurance proceeds and net recoveries from third parties.

Department of Public Service Staff reserves the right to review for ultimate Commission determination the reasonableness of the actual deferred costs, which shall depend, inter alia, on the adequacy of the Company's efforts to seek contribution for those costs from other responsible parties.

¹ For land and buildings which have been removed from rate base prior to date that this policy became effective, Niagara Mohawk shall propose the appropriate sharing of net gains in a filing that is subject to the approval of the Commission.

# Niagara Mohawk Power Corporation d/b/a National Grid PSC Case 20-E-0380 & 20-G-0381 Deferral of Gas Property Tax Expense (\$000's)

# GAS EXAMPLE

			Gas		Gas		Gas
		Rate	Year One	Rate	Year Two	Rate	Year Three
1	Example of Actual Expense	\$	58,000	\$	60,000	\$	70,000
2	Rate Allowance	\$	56,017	\$	61,125	\$	66,803
3	Under (over) spending	\$	(1,983)	\$	1,125	\$	(3,197)
4	Customer share of under (over) spending		90%		90%		90%
5	Amount Deferred to (from) Customers	\$	(1,785)	\$	1,012	\$	(2,878)

# Notes (by line number)

1. Example of Actual Expense

2. Forecasted Rate Year Expense. See Joint Proposal Section 12.1.6.

3. Line 2 less Line 1

4. Deferral for under (over) spending will be based on 90% customer and 10% company basis.

5. Line 3 * Line 4

## Niagara Mohawk Power Corporation d/b/a National Grid Deferral of Variable Pay Expense (\$000's)

		Rate Year Ending June 30, 2022		Rate Jun	Year Ending e 30, 2023	Rate Jui	Year Ending ne 30, 2024	
			Gas		Gas	Gas		
1	Actual Expense	\$	4,600.0	\$	4,900.0	\$	4,800.0	
2	Rate Allowance	\$	4,623.4	\$	4,808.5	\$	4,970.9	
3	Amount Deferred to Customers	\$	23.4	\$	_	\$	170.9	

If the actual expense is greater than the rate allowance, there is no additional recovery from customers. This is a downward only reconciliation per Joint Proposal Section IV 12.1.10

#### Line Notes

Input Actual costs - Under the Company's management variable pay program (Annual Performance Plan) the evaluation period is on a fiscal year basis ending March.

- Variable pay expense is accrued monthly, with the final accrual in March reconciling the annual variable pay total to the expected pay out in June.
- 2 Forecasted Rate Year Variable Pay Expense
- 3 Line 2 less Line 1 (if Line 2 is greater than Line 1)

Niagara Mohawk Power Corporation d/b/a National Grid Screvice Company Reats Existing Screvice Company Capital Software/Hardware allocated to Operating Companies as Rent Expense For the Rate Year ended June 30, 2024 NMPC G 8 2,708,492

#### Niagara Mohawk Power Corporation d/b/a National Grid Deferral of Gas Energy Efficiency NE:NY (\$000's)

	Energy Efficienc	y - (	GAS PORTFOLIO	) (2	021-2025) Per NE	:NY	Y Order			
	CY 2021		CY 2022		CY 2023		CY 2024	CY 2025	С	Y 2021 - CY 2025
¹ Base EE + Incremental NENY + LMI	\$ 15,818	\$	17,413	\$	19,848	\$	22,683	\$ 26,067	\$	101,830
Total	\$ 15,818	\$	17,413	\$	19,848	\$	22,683	\$ 26,067	\$	101,830

1 Appendix A - Table A4 in NE:NY Order Case 18-M-0084

Energy Efficience	cy - (	GAS PORTFOLI	0, i	n Base Rates by R	ate `	Year			
	R	ate Year Ending	F	Rate Year Ending	R	ate Year Ending	Total Amount in	0 Mon	h Stavout Pori
		June 30, 2022		June 30, 2023		June 30, 2024	Base Rates	9 1010	ii Stayout Peri
Base EE + Incremental NENY + LMI	\$	16,616	\$	18,631	\$	21,266	\$ 56,512	\$	17,85
Total	\$	16,616	\$	18,631	\$	21,266	\$ 56,512	\$	17,85

Notes:

Ecommerce and EMV costs are included in the Base EE.

The Rate Years span July 1st through June 30th. In order to accurately display this, the Rate Years prorate the calendar years accordingly.

The 9 month Stayout Period span July 1, 2024 through March 31, 2025. In order to accurately display this, the calendar years are prorated accordingly.

#### GAS EXAMPLE

		Gas	Gas		Gas	Gas	
	Rate	Year One	Rate Year Two	R	ate Year Three	Stayout Perio	od
1 Actual Expense	\$	17,000	\$ 18,500	\$	20,000	\$ 1	18,000
2 Rate Allowance	\$	16,616	\$ 18,631	\$	21,266	\$ 1	17,858
3 Difference - underspend / (overspend)	\$	(384)	\$ 131	\$	1,266	\$ 	(142)

#### Assumption

Pursuant to the NE:NY order, the Company is permitted to carry deferred overspent or underspent funds forward from year to year through 2025, for offset or use in future year Energy Efficiency programs provided that the Company does not exceed the cumulative budget authorized by the NE:NY Order.

Notes (by line number)

1 Input - Actual Costs - Illustrative Example

2 Per NE:NY Order: Case 18-M-0084 prorated to Rate Year basis, July 1st through June 30th and 9 Month Stayout Period

### Niagara Mohawk Power Corporation d/b/a National Grid AMI Downward-only Operations and Maintenance Tracker (6 Year Deployment Period) Actuals vs Target Example

<ul><li>6 Year Cumulative Estimated Revenue Requirement Actuals</li><li>6 Year Cumulative Revenue Requirement Target</li><li>6 Year Cumulative Actuals (Over)/Under Target</li></ul>	121,311,316 119,174,923 (2,136,393)
<ul> <li>6 Year Cumulative Estimated Revenue Requirement Actuals</li> <li>6 Year Cumulative Revenue Requirement Target</li> <li>*6 Year Cumulative Actuals (Over)/Under Target</li> </ul>	118,116,256 119,174,923 1,058,668

Note: Downward only O&M reconciliation - no amounts due from customer if actuals are higher than target *In the event the Company is below the cumulative target at the end of 6 Year Deployment period, the Company will defer the revenue requirement impact for the benefit of customers.

**Actuals will be tracked in aggregate and compared to the total O&M target of \$119.17M

Notes and Assumptions: 1) LPP replacement capital expenditures in base rates total \$68,364 million (46,13 miles) in RYE June 2023, \$77,102 (50 miles) million in RYE June 2023 and \$79,533 million (50 miles) in RYE June 2024. Revenue requirement assumes capital expenditures are placed in-service in the month spent.

Depreciation is based on the composite depreciation rate for mains and services based on 3/31/2020 plant balances.
 Utilizes pre-tax WACC by fiscal year per Joint Proposal with a 9.00% ROE.
 The unit cost are capped and the lesser of the average explicit performance or step mile of proactive LPP in the applicable rate year or 102% of the capital unit cost allowances for LPP replacement in the applicable rate year.
 The WIT close storemental mileage spend will be colled forward to the RYE June 2023 and RYE June 2023 and RYE June 2023 incremental mileage spend will be colled forward to the RYE June 2024 surcharge, calculating a return on the net plant investment and associated depreciation expense.
 The RYE June 2023 incremental mileage spend will be colled forward to the RYE June 2024 surcharge, calculating a return on the net plant investment and associated depreciation expense.

# APPENDIX 7

# EARNINGS ADJUSTMENT MECHANISMS

## **INCENTIVE SUMMARY**

Beginning January 1, 2021, the Company will adopt seven electric and three gas Earnings Adjustment Mechanisms ("EAMs") associated with electric and/or gas during the rate plan. The EAMs will be measured on a calendar year basis for RY1, RY2, and RY3, except for the Gas Peak Reduction EAM, which will be measured on a heating season basis. If any of the performance levels detailed below are achieved, the Company can earn an annual pre-tax positive revenue adjustment.

EAMs shall be awarded at minimum, midpoint, and maximum target levels, or on a prorated basis between minimum and midpoint target levels and between midpoint and maximum target levels, in dollars only, as specified below. Basis point amounts associated with each metric and achievement level are provided for illustrative purposes only.

For periods beyond RY3, the Company may annually file a petition for Commission consideration proposing EAMs for the upcoming year until it files to establish new base delivery rates. The EAMs, targets, and positive revenue adjustments are described in the sections that follow. The targets and associated incentives are outlined in the tables below.

## EAM CALCULATIONS

#### 1.0 Electric EAMs

#### **1.1 Electric Peak Reduction**

#### Description

The Electric Peak Reduction ("EPR") EAM incentivizes the Company to deliver New York Control Area ("NYCA") coincident electric system peak reductions that provide additional system benefits and lower supply costs to customers. To the extent that there is a decline in the actual weather normalized NYCA-coincident electric system peak below the rate year minimum level established for the EPR EAM, the Company will receive an incentive under the EPR EAM.

#### Metric

The minimum, mid-point and maximum levels of achievement are set below the adjusted NYISO Installed Capacity ("ICAP") requirement developed by the Load Forecasting Task Force (LFTF) issued in December prior to each calendar year, based on the last five years of historical data. The minimum, mid-point and maximum targets will be 0.25, 1.0, and 1.75 Standard Deviations below a downward revision of 1.0% Improvement Factor.

#### Target

The EAM minimum, midpoint, and maximum annual targets will be:

EPR Target (MW) = NYISO ICAP Forecast * (100%- Improvement Factor) – Standard Deviation

Where,

*NYISO ICAP Forecast* =NYISO ICAP load forecast for the Company's system coincident peak per the preceding year's LFTF "Final ICAP Forecast". The adjusted forecast will apply a regional growth factor to determine a pre loss weather normalized load forecast. Most commonly referred to as "Adj. W/N Load Less Losses" by the LFTF.

*Improvement Factor* = 1%

*Standard Deviation* = 0.25, 1.0, 1.75 for minimum, midpoint, and maximum targets respectively.

The targets for achievement will be as follows:

EAM	Level	CY 2021 Sendout
Electric Peak	ICAP Forecast	6274.6
Reduction (MWs)	Minimum	6187.6
	Midpoint	6114.9
	Maximum	6042.1

Note: 2022 and 2023 forecasts cannot be calculated until December of the year prior, based on NYISO LFTF ICAP process for that upcoming year.

#### **Achievement and Basis Points**

The EPR EAM performance will use the NYISO reported weather-adjusted coincident peak for the Company's service territory.

 $CY_x$  Normalized Peak = NYISO reported peak in MW for the Company's service territory for Calendar Year x.

#### Where:

x = 1, 2, 3, etc. for Calendar Year 1 (2021), Calendar Year 2 (2022), Calendar Year 3 (2023), etc.

 $CY_x$  Normalized Peak = in MW, generally published in the table "CY_x New York Control Area Peak Load Forecast" from the "CY_{x+1} Final ICAP Forecast" presentation in December of the Calendar Year x, for Calendar Year x. Any amounts actually curtailed from contracted resources enrolled in the NYISO Installed Capacity- Special Case Resource program during the NYCA Peak Hour will be included.

All data used will come from the NYISO. Peak load forecasts and actuals will be reported by the NYISO and then used to determine EAM achievement. Achievement will be determined as the current Calendar Year's coincident NYISO peak contribution relative to expected target levels.

Achievement will be based on the Company reducing its electric peak below the targeted thresholds described above. The Company's achievement will result in eligible basis points if the metric meets or exceeds target thresholds, with linear scaling between minimum and midpoint, and between midpoint and maximum basis points as further discussed below in Section 3.0.

## 1.2 LSRV Load Factor

## Description

The LSRV Load Factor ("LLF") EAM is designed to improve the load factor of constrained portions of the distribution system that are not current or likely Non-wires Alternatives ("NWA") areas. The LLF EAM will be based on load factor improvements in LSRV (Locational System Relief Value) substations identified in the Company's Value of Distributed Energy Resources (VDER) Value Stack Credits Statement.

The substations ("LLF Sites") that will constitute the LLF EAM are: LLF site1: 21 Main Buffalo Substation, transformer BFL02114.2TR1_R103 LLF site2: 74 Military, transformer MILTRD115TB1 LLF site3: 74 Military, transformer MILTRD115TB2 LLF site4: Southwood Substation, transformer SOWOOD113.8TB1L.S LLF site5: Pinebush, transformer PINEBU1115TB1 LLF site6: Duguid Substation, transformer DUGUID113.8TR.1 LLF site7: Salisbury ES Substation, transformer SALISB113.8TB11

#### Metric

For each LLF Site, the load factor ("LF") will be calculated each year using the following formula, rounded to the nearest tenth of one percent:

## $CY_{r}$ LLF Site LF

 $= \frac{\sum CY_x MW_{Measured}}{(CY_x MW_{Peak} * CY n hourly readings) * (CY_x Peak Load % of Normal SummerBank Rating)}$ 

#### Where.

x = 1, 2, 3, etc. for Calendar Year 1 (2021), Calendar Year 2 (2022), Calendar Year 3 (2023), etc.

y = Ranges from 1 to 9 for each of LLF sites

 $CY_x$  *MW* measured = MW readings measured every hour at a given LLF sites in Calendar Year x

 $CY_x MW_{peak}$  = The peak MW measurement for a given LLF site in Rate Year x

 $CY_{x}n$  hourly readings = Number of hourly readings taken in Calendar Year x

*CY_xPeak Load* % of Normal Summer Bank Rating=be the summer normal thermal rating of the transformer bank, a power limit that the transformer cannot exceed for extended periods during the summer.

#### Target

Each year, the percent change of the substation LF will be calculated based on a baseline of the previous year's LF. A LLF site will be counted towards achievement if the site shows no decline or an improvement in its LF as further shown formulaically below.

$$CY_x LLF Site_y = 1 if \frac{LF_{CY x} - LF_{cy x-1}}{LF_{cy x-1}} \ge 0; Else 0$$

Where:

x = 1, 2, 3, etc. for Calendar Year 1 (2021), Calendar Year 2 (2022), Calendar Year 3 (2023), etc.

y = Ranges from 1 to 9 for each of LLF sites

The targets for achievement will be as follows:

EAM	Level	# of sites
LSRV Load Factor (# of Areas)	Minimum	4
	Midpoint	5
	Maximum	7

#### **Achievement and Basis Points**

Achievement will be based on the number of LSRV areas that maintain or improve its LF each year. The Company's achievement will result in eligible basis points if the metric meets or exceeds target thresholds, with linear scaling between minimum and midpoint, and between midpoint and maximum basis points as further discussed below in Section 3.0.

#### 1.3 Distributed Energy Resource Utilization ("DER") EAM

#### Description

The DER Utilization EAM incentivizes the Company to increase efficiency during the interconnection process and work with third parties to expand the use of DER resources in the Company's service territory. This metric will measure the sum of the annualized megawatt hours ("MWh") from incremental DER, including solar and energy storage resources.

#### Metric

Performance will be calculated by determining the MWs of solar and energy storage successfully interconnected by the Company in a given calendar year. The amount of MWs of solar and storage will then be multiplied by the expected annual output to be measured against target levels set on an annual MWh basis.

The DER Utilization metric is the sum of the MWh produced, or discharged and calculated as follows:

DER Utilization (MWh) = + Solar PV MWh annualized production + Battery storage MWh annualized discharge

Where:

Solar PV MWh annualized production = MW installed * 13.4% capacity factor * 8765 hours/year

*Battery storage MWh annualized discharge* = MW installed * 4 hour discharge * 365 days per year

#### Target

The baseline will be set using Company MW share of the CLCPA goals. The targets for achievement will be as follows:

DER Min=DER Baseline*105%

DER Mid=DER Baseline*120%

DER Max=DER Baseline*140%

EAM	Level	CY 2021	CY2022	CY2023
DER	Baseline (CLCPA)	136	165	159
Utilization	Minimum	143	173	167
(MW)	Midpoint	163	198	191
	Maximum	190	231	233

Appendix 7 Page 9 of 26

EAM	Level	CY 2021	CY2022	CY2023
DER	Baseline (CLCPA)	165, 938	199,979	192,963
Utilization	Minimum	174, 235	209,978	202,583
(MWhs)	Midpoint	199,125	239,975	231,523
	Maximum	232,313	279,971	270,111

#### **Achievement and Basis Points**

The Company's achievement will result in eligible basis points if the metric meets or exceeds target thresholds, with linear scaling between minimum and midpoint, and between midpoint and maximum basis points as further discussed below in Section 3.0.

#### 1.4 Electric Share the Savings EAM

#### Description

The Electric Share the Savings ("ESTS") EAM incentivizes the Company to reduce the unit costs of its_energy efficiency portfolios (excluding heat pump and LMI programs). The Company can achieve incentives under this EAM by reducing total portfolio expenditure, by increasing the overall achievement above the approved baseline level of first-year energy savings, or by increasing the average lifetime of measures implemented in the portfolio. The Company will be awarded 30% of unit cost savings, as detailed in the metric below.

#### Metric

ESTS performance and associated incentives will be calculated by determining: (i) a baseline energy efficiency ("EE") unit cost savings; (ii) the difference between that baseline and the actual acquired EE unit cost savings; and (iii) applying a percent share (30%) to the result. The formula is as follows:

STS EAM (\$) =

 $(CY_x Baseline LMWh Unit Cost - CY_x Acquired LMWh Unit Cost) * CY_x Acquired LMWh * 30\%$ 

#### where

x = 1, 2, 3, etc. for Calendar Year 1 (2021), Calendar Year 2 (2022), Calendar Year 3 (2023), etc.

 $CY_x$  Baseline LMWh ("lifetime MWh") Unit  $Cost = \frac{CY_x Baseline Budget}{CYx Baseline LMWh}$ 

*CY_x Baseline Budget* = The Company's total non-LMI energy efficiency electric budget approved in the January 2020 New Efficiency:New York ("NE:NY") Order

 $CY_x$  Baseline LMWh = CY_x Baseline AMWh * Portfolio EUL

 $CY_x$  Baseline AMWh ("annual MWh") = The Company's annual non-LMI electricity energy savings target approved in the January 2020 NE:NY Order *Portfolio EUL* = The Company's portfolio-level Effective Useful Life in the year prior to  $CY_x$ , as determined by the applicable Technical Resources Manual ("TRM"), and utilizing a verified gross savings methodology²

 $CY_x$  Acquired LMWh Unit  $Cost = \frac{CY_x Actual Expenditures}{CYx Acquired LMWh}$ 

 $CY_x$  Actual Expenditures = The Company's total expenditures on its electric energy efficiency portfolio in  $CY_x$  exclusive of LMI and Heat Pump programs

 $CY_x$  Acquired LMWh = CY_x Acquired AMWh * CY_x Portfolio EUL

 $CY_x$  Acquired AMWh = The Company's acquired annual verified gross energy savings, exclusive of savings from LMI and Heat Pump programs, as reported in the Company's year-end scorecard

 $CY_x$  Portfolio EUL = The Company's portfolio EUL, as determined by the applicable TRM at the time the savings are acquired, and utilizing a verified gross savings methodology³

*LMI* & *Heat Pump programs* = the portfolio of programs and budgets established in the implementation plans for NY Clean Heat and the Statewide Low and Moderate Income Portfolio.

## Target

This EAM is computed formulaically, per the Metric above, and as such has no minimum, midpoint, or maximum targets.

## Achievement and basis points

Achievement is based on the formula detailed in the "Metric" section above. To account for the shifting of funds between years, the threshold for qualifying to collect the ESTS EAM shall be achievement of each year's NENY annual savings target (excluding LMI and Heat Pump programs) plus the cumulative over- or under-performance from all years dating back through 2019, divided by the remaining number of years in the NENY period (2019-2025), as follows

Threshold =  $(Over/underperformance CY_{x-1} + Over/underperformance CY_{x-2} + ...) \div$  $2026 - CY_x$ 

where

Over/underperformance = Actual annual MWh savings achieved via the Company's market-rate

³ For measures and programs where verified gross savings studies have not been completed, there may need to be adjustments in future years to the portfolio EUL as those studies are completed. Also, the baseline EUL would be recalculated using the EULs associated with the updated TRM version in effect for the year in which performance is being measured, so that the baseline and actuals are compared on a like-to-like basis. *E.g.* if the TRM EUL of a boiler replacement changes during 2021, the associated EUL for all boiler replacements in 2020 would be recalculated based on that updated EUL.

energy efficiency portfolio – Annual MWh market-rate annual savings target as set in the NE: NY Order

and where the first CY in which over/underperformance is measured is 2019.

If the Commission authorizes additional budgets and/or targets, the EAM calculation, including the threshold for qualification, will be updated accordingly.

#### 1.5 Electric Low & Moderate Income ("LMI") Energy Efficiency Customer Savings EAM

#### Description

The Electric Low & Moderate Income Energy Efficiency Customer Savings ("ELMI") EAM incentivizes the Company to exceed the cumulative annual savings targets for its LMI portfolio, as defined in the 2020 Statewide Implementation Plan.

The LMI EAM is a term EAM that is measured as the cumulative performance over a three-year term, and as such its performance will be measured through the entirety of CY 2023.

#### Metric

The LMI EAM metric is based on the sum of annual MWh savings targets for the Company's LMI energy efficiency portfolio over a three-year term. Annual targets for the LMI portfolios have been established in the 2020 Statewide Implementation Plan.

Where:

*LMI Baseline* = the sum of the Company's annual electric LMI savings targets for calendar years 2021-2023 as outlined in the 2020 Statewide Implementation Plan

*Acquired LMI AMWh Savings* = the sum of acquired annual verified gross energy savings (measured in MWh) for calendar years 2021-2023 of the Company's electric LMI portfolio.

#### Target

The targets for achievement will be as follows:

LMI Min = LMI Baseline * 105% LMI Mid = LMI Baseline * 120% LMI Max = LMI Baseline * 140%

EAM	Level	CY 2021- 2023
	Baseline (NENY)	4705
LMI EAM	Minimum	4940
(MWh)	Midpoint	5646
	Maximum	6587

#### **Achievement and Basis Points**

Achievement will be based on the targets as outlined above, with a linear scale between minimum and midpoint basis points, and between midpoint and maximum basis points as further discussed below in Section 3.0.

If the Commission authorizes additional budgets and/or targets, the EAM calculation, including the threshold for qualification, will be updated accordingly.

#### **1.6 Building Electrification**

#### Description

The Building Electrification ("BE") EAM metric incentivizes the Company to reduce carbon emissions by facilitating the penetration of heat pump water heating and space heating technologies in its service territory.

#### Metric

Performance will be calculated as the lifetime tons of avoided carbon dioxide from incremental heat pumps rebated in a given calendar year. Incremental heat pumps will be measured as the number of rebates provided by the Company for NY Clean Heat Program- eligible technologies.

For the purposes of this EAM, the beneficial electrification technologies are:

Technologies		
ASHP Space Heat		
<b>GSHP</b> Space Heat		
<b>GSHP</b> Water Heating		
<b>GSHP</b> Desuperheater		
ASHP Water Heating		
Custom		

At the time a customer is awarded an incentive for a heat pump, the heat pump will be considered as installed for the purposes of calculating this EAM. Typical residential installations will be counted based on (1) whether they are space-heat only air-source heat pumps or ground source heat pumps, (2) whether they are heat pumps which provide water heating only, (3) whether the heat pumps are used for both space heating and water heating, and (4) whether a ground source heat pump includes a desuperheater, and then awarded an assumed level of lifetime CO₂e savings. If a heat pump can provide both water heating and space heating, it will be awarded the sum of the appropriate values.

Projects that receive a custom incentive will be counted on a residential proxy basis, whereby the square footage of the installation will be divided by an average residential square footage based on previous heating fuel source and then awarded the appropriate number of corresponding residential or small business heat pump installations. Projects replacing oil, propane or natural gas will be divided by an expected residential square footage of 2,000 sq. ft./ per housing unit while projects replacing electric resistance will be divided by 530 sq. ft/ per housing unit.

The below carbon factor calculations account for both the previous heating source, new technology, Company specific values.

SPACE	HEATING	Existing Fuel Source			
LIFET	IME CO2	Electric			Natural
SAV	<b>INGS</b>	Resistance	Propane	Oil	Gas
Heating	GSHP	49.6	102.2	152.7	80.0
Technology	ASHP	26.1	47.5	77.8	34.2

WATER HEATING		Existing Fuel Source			
LIFETIME CO2		Electric			Natural
SAV	INGS	Resistance	Propane	Oil	Gas
Haating	GSHP	28.5	27.1	41.2	20.8
Teahnology	Desuperheater	38.6	45.4	59.6	39.2
rechnology	ASHP	11.6	6.3	14.8	2.6

The total CO₂ emissions reductions for each Rate Year will be calculated as follows:

CY_x Total Lifetime CO₂ Emissions Reduction (tons) =

- + CY_x ASHP and ASHP mini-split lifetime CO₂ emissions reductions
- + CY_x GSHP lifetime CO₂ emissions reductions
- + CY_x ASHP water heating lifetime CO₂ emissions reductions
- + CY_x GSHP water heating lifetime CO₂ emissions reductions
- + CY_x GSHP Desuperheater lifetime CO₂ emissions reductions

#### Where,

- x = 1, 2, 3, etc. for Calendar Year 1 (2021), Calendar Year 2 (2022), Calendar Year 3 (2023), etc.
- *ASHP* = include partial and full load heating air source heat pumps and mini- split heat pumps (MSHP) as defined by the NY Clean Heat eligibility. As well as, heat pump equivalent for custom applications.

*GSHP* = includes full load ground source heat pumps as defined by the NY Clean Heat eligibility. As well as, heat pump equivalent for custom applications.

*ASHP water heating* = includes both residential and commercial HPWH defined by the NY Clean Heat eligibility. As well as, heat pump equivalent for custom applications.

GSHP water heating = includes dedicated domestic hot water (DHW) and water to water heat pumps (WWHP) as defined by the NY Clean Heat eligibility. As well as, heat pump equivalent for custom applications.

*GSHP Desuperheater* = include ground source heat pumps as defined by the NY Clean Heat eligibility. As well as, air source heat pump equivalent for custom applications.

#### Target

First, a set number of installations for each technology that would result in the Company's meeting its MMBtu annual heat pump targets established in NENY order was determined. The number of installations was then multiplied by carbon reduction emission factors to establish the EAM baseline.

Installs per Year*	2021	2022	2023
GSHP - SH	607	792	969
ASHP - SH	1,012	1,320	1,615
GSHP - WH	202	263	323
Desuperheater - WH	102	133	163
ASHP - WH	102	133	163

*Assumes replacement of existing oil equipment

The targets for achievement will be as follows:

BE Min=BE Baseline*105%

BE Mid=BE Baseline*120%

*BE Max=BE Baseline*140%* 

EAM	Level	CY 2021	CY2022	CY2023
BE Lifetime	Baseline	187,280	244,295	298,963
	Minimum	196,644	256,510	313,911
	Midpoint	224,736	293,155	358,755
	Maximum	262,192	342,014	418,548

#### Achievement and Basis Points

Achievement of the Beneficial Electrification EAM will be based upon lifetime  $CO_2$  emissions reductions provided by the incremental beneficial electrification technologies added in each Calendar Year.

If the Commission authorizes additional budgets and/or targets, the EAM calculation, including the threshold for qualification, will be updated accordingly.

If emission factor methodology or assumptions are finalized by the Climate Action Council, the emission factors for each technology and/or previous fuel source EAM factors may be recalculated and applied in the following calendar year. However, the number of installations used to set the baseline will remain fixed through CY 2023.

#### **1.7 Transportation Electrification**

#### Description

The Transportation Electrification ("TE") EAM encourages Company efforts that will result in increased adoption of light-duty electric vehicles which lead to a decrease in lifetime CO2e (carbon dioxide or carbon dioxide equivalent) emissions on a marginal emissions basis.

These technologies are considered based on their associated annualized lifetime CO2e emission reductions as further discussed below. To the extent that the amount of lifetime CO2e emissions due to incremental adoption of such technologies in a given calendar year are reduced by an amount exceeding the minimum levels for the calendar year as described below, the Company will receive an incentive under the TE EAM.

#### Metric

For the purposes of this EAM, the beneficial electrification technologies are:

Technologies
Light-duty Battery Electric Vehicle ("BEV")
Light-duty Plug-in Hybrid Electric Vehicle ("PHEV")
Light-duty Commercial Electric Vehicles ("Fleet")

The TE EAM metric will be the total lifetime CO2 emissions reductions provided by annual incremental beneficial electrification technologies in any given calendar year.

CYx Lifetime CO2e Reduction (tons) =

- + CYx BEV lifetime CO2e emissions reductions
- + CYx PHEV lifetime CO2e emissions reductions
- + CYx Fleet lifetime CO2e emissions reductions

Where,

x = 1, 2, 3, etc. for Calendar Year 1 (2021), Calendar Year 2 (2022), Calendar Year 3 (2023), etc.

Technologies	Carbon Factor (lifetime tons CO2)
Light-duty Battery Electric Vehicle ("BEV")	48.5 tons
Light-duty Plug-in Hybrid Electric Vehicle ("PHEV")	26.5 tons
Light-duty Commercial Electric Vehicles ("Fleet")	100.2 tons

#### Target

The performance targets will be set such that the level of CO2e emission reductions will align maximum achievement with the trajectory necessary to meet the ZEV MOU vehicle targets. The minimum target assumes a 100 percent annual growth rate.

EAM	Level	CY 2021	CY2022	CY2023
Transportation	Minimum	136,038	272,077	544,180
Electrification	Midpoint	238,528	448,115	843,153
(tons CO2)	Maximum	341,018	624,105	1,142,174

The targets for achievement will be as follows:

#### **Achievement and Basis Points**

Achievement of the TE EAM will be based upon lifetime CO₂ emissions reductions provided by the incremental beneficial electrification technologies added in each Calendar Year. The lifetime tons of avoided carbon dioxide from incremental electric vehicles registered in the Company's service territory. Data will be obtained from the R.L. Polk Vehicles in Operation data source.

#### 1.8 Make Ready Share the Savings EAM

#### Description

The Make Ready Share the Savings ("MR STS") EAM incentivizes the Company to reduce the unit costs of the Company's EV Make Ready Program that incentivizes the installation of Level 2 ("L2") and/or Direct Current Fasting Charging ("DCFC") infrastructure. The Company can achieve incentives under this EAM by reducing total expenditure and/or by increasing the overall achievement above the approved baseline level of installed ports. The Company will be awarded 30% of unit cost savings, as detailed in the metric below.

#### Metric

EAM Performance will be based on the number of L2 and DCFC ports incentivized by the Program and the average incentive per plug paid for each type after a threshold minimum port requirement is met.

Minimum Port Threshold	Midpoint Review	End of Program
L2	3,146	15,728
DCFC	101	504

ESTS performance and associated incentives will be calculated by determining: (i) a baseline port unit cost savings; (ii) to the difference between that baseline and the actual acquired cost savings; and (iii) applying a percent share (30%) to the result. The formula is as follows:

$$L2 Award = \left\{ \begin{bmatrix} \left(\frac{\$ Incentive}{Port_{Public,baseline}}\right) \left(Ports incented_{Public,actual}\right) \\ + \left(\frac{\$ Incentive}{Port_{Non-public,baseline}}\right) \left(Port incented_{non-public,actual}\right) \\ + \left(\frac{\$ Incentive}{Port_{DAC,baseline}}\right) \left(Ports incented_{DAC,actual}\right) \\ - \$ Incentive_{public,actual} + \$ incentive_{non-public,actual} \\ + \$ incnetive_{DAC,actual} \right) \right\} (30\%)$$

Where:

$$\frac{\$ Incentive}{Plug_{public, baseline}} = \$5, 400$$

 $\frac{\$ Incentive}{Plug_{non-public,baseline}} = \$3,000$ 

 $\frac{\$ Incentive}{Plug_{non-DAC\ baseline}} = \$6,000$ 

(*Ports incented*_{public,actual}) = The number of qualifying public L2 ports outside of disadvantaged communities during the applicable program period

(*Ports incented*_{non-public,actual}) = The number of qualifying non-public L2 ports outside of disadvantaged communities during the applicable program period

(*Ports incented*_{DAC,actual}) = The number of qualifying L2 ports inside of disadvantaged communities during the applicable program period

\$ *Incentive* _{public,actual} = Total incentives paid to qualifying public L2 ports outside of disadvantaged communities during the applicable program period

 $Incentive_{non-public,actual}$  = Total incentives paid to qualifying non-public L2 ports outside of disadvantaged communities during the applicable program period

 $Incentive_{DAC,actual}$  = Total incentives paid to qualifying L2 ports within disadvantaged communities during the applicable program period

*Disadvantaged Communities*= Project sited that meet the EV Charging Make Ready Program eligibility.⁴ If the definition of Disadvantaged Communities is subsequently modified through the Climate Action Council authorized by the CLCPA, the MRP eligibility requirements will be modified and updated accordingly.

$$DCFC \ Award = \left\{ \left[ \left( \frac{\$ \ Incentive}{KW_{Public,baseline}} \right) \left( KW \ incented_{Public,actual} \right) + \left( \frac{\$ \ Incentive}{KW_{Non-public,baseline}} \right) \left( KW \ incented_{non-public,actual} \right) + \left( \frac{\$ \ Incentive}{KW_{DAC,baseline}} \right) \left( KW \ incented_{DAC,actual} \right) \right] - \$ \ Incentive_{public,actual} + \$ \ incentive_{non-public,actual} + \$ \ incentive_{DAC,actual} \right) \right\} (30\%)$$

 $\frac{\$ Incentive}{KW_{public,baseline}} = \$330$ 

 $\frac{\$ Incentive}{KW_{non-public,baseline}} = \$183$ 

 $\frac{\$ Incentive}{KW_{non-DAC\ baseline}} = \$367$ 

(*KW incented*_{public,actual}) = The total public KW port capacity installed outside of disadvantaged communities during the applicable program period

(*KW* incented_{non-public,actual}) = The total non-public KW port capacity installed outside of disadvantaged communities during the applicable program period

 $(KW_{DAC,actual})$  = The total KW port capacity installed within disadvantaged communities during the applicable program period

\$ *Incentive* _{public,actual} = Total incentives paid to qualifying public DCFC ports outside of disadvantaged communities during the applicable program period

\$ *Incentive non-public,actual* = Total incentives paid to qualifying non- public DCFC ports outside of disadvantaged communities during the applicable program period

\$ *Incentive* _{DAC,actual} = Total incentives paid to qualifying DCFC ports within disadvantaged communities during the applicable program period

*Disadvantaged Communities*= Project sited that meet the EV Charging Make Ready Program eligibility.⁵ If the definition of Disadvantaged Communities is subsequently modified through the

⁵ https://ngrid.maps.arcgis.com/apps/webappviewer/index.html?id=e90cc8f135d545378d93cf8b43eca615

Climate Action Council authorized by the CLCPA, the MRP eligibility requirements will be modified and updated accordingly.

#### Target

This EAM is computed formulaically, per the Metric above, and as such has no minimum, midpoint, or maximum targets.

#### **Achievement and Basis Points**

Performance will be measured at two distinct milestones, the Program's midpoint review and the end of Program review.⁶ Based on Make Ready order, the midpoint review will include performance from Program launch through September 30, 2022 and then October 1, 2022 through the end of program in 2025.

#### 2.0 Gas EAMs

## 2.1 Gas Peak Reduction

#### Description

The Gas Peak Reduction ("GPR") EAM incentivizes the Company to deliver reductions in daily firm heating load gas demand in its territory. It sets performance targets based on a linear regression of historical gas peak heating load demand data sourced from the prior five winter periods preceding each Calendar Year, e.g., the 2021-2022 winter season will be measured against the baseline set using the prior five winter seasons (2016-17, 2017-18, 2018-19, 2019-20, and 2020-21). Minimum, mid-point and maximum targets are based on .25, 1.0, and 1.75 standard errors from 1% below the winter peak as predicted by the regression. Achievement is based on the ability of each Company to meet those gas system peak reduction targets.

#### Metric

The metric is based on the non-firm heating load, measured as thousands of dekatherm-days (MDtday) per effective degree day (EDD). This is also referred to as "heat factor."

Since the Company has two major pooling areas ("East Gate" and "West Gate") that are separately metered for sendout and can have different daily weather, heat factors are calculated for each and then aggregated to create a combined heat factor.

Non-heating load is removed by subtracting the prior summer's peak sendout from the winter peak sendout. Thus, the general equation for the metric is as follows:

 $CY_x \ Heat \ Factor = \\ [(CY_x \ East \ Gate \ Winter \ Firm \ Peak \ Demand \ - \ CY_x \ East \ Gate \ Summer \ Firm \ Peak \ Demand) + \\ (CY_x \ West \ Gate \ Winter \ Firm \ Peak \ Demand \ - \ CY_x \ West \ Gate \ Summer \ Firm \ Peak \ Demand)] \\ \div \\ (CY_x \ Sendout \ Weighted \ East \ Gate \ Winter \ Firm \ Peak \ Day \ EDDs \\ + \ CY_x \ Sendout \ Weighted \ West \ Gate \ Winter \ Firm \ Peak \ Day \ EDDs) \\ \end{cases}$ 

where

x = 1, 2, 3, etc. for Calendar Year 1, Calendar Year 2, etc.

 $CY_x$  Heat Factor = The non-heating firm gas demand in Calendar Year x, weather-adjusted via sendout-weighted EDDs

*Peak Demand* = The highest sendout during the entirety of a gas day during the winter and summer seasons, including supplies from any LNG and CNG facilities within each Company's territory and all trucked CNG, with non-firm customer consumption and gas used for power generation removed

 $CY_x$  Winter Firm Peak Demand = The winter gas peak demand (as measured on a gas day basis) in Calendar Year x, for the period between November 1 of Calendar Year x through March 31 of Calendar Year x+1; so, by this definition "Calendar Year" refers to the winter season extending from one calendar year into the next.

 $CY_x$  Summer Firm Peak Demand = The summer gas peak demand (as measured on a gas day basis) in Calendar Year x, for the period between July 1 of Calendar Year x through August 31 of Calendar Year x, with all days where HDDs > 0 removed (in order to remove the rare days on which customers may have turned on their heating equipment due to an unseasonably cold day); this element of the metric is presumed to represent the baseline non-heating load of Calendar Year x

 $CY_x$  Winter Firm Peak Day EDD = A weather-related measure that incorporates wind speed and air temperature, computed as follows:

$$EDD = HDD \times (1 + \frac{WS_{avg}}{100})$$

where

EDD = effective degree day

HDD = heating degree day, or the number of days that the peak gas day's 24-hour dry bulb temperature is below 65° F

 $WS_{avg} = Average daily wind speed$ 

Measurements for East Gate figures are taken at the Albany International Airport (KALB), while measurements for West Gate weather figures are taken at the Syracuse Hancock International Airport (KSYR).

*Sendout-weighted EDDs* = EDDs proportional to the sendout in each region, calculated as follows:

 $(CY_x \text{ East Gate Winter Firm Peak Demand} - CY_x \text{ East Gate Summer Firm Peak Demand}) \div EDDs in each region$ 

## Target

The calendar year minimum, midpoint, and maximum targets for heat factor (Dth/EDD), are set based on the following formula:

 $CY_x$  GPR  $Min = CY_x$  adjusted gas peak forecast - .25 standard error

 $CY_x$  GPR Mid =  $CY_x$  adjusted gas peak forecast - 1.0 standard error

$$CY_x$$
 GPR  $Max = CY_x$  adjusted gas peak forecast - 1.75 standard error

where

x = 1, 2, 3, etc. for CY₁, CY₂, CY₃, etc.

 $CY_x$  adjusted gas peak forecast = The forecast heat factor for Calendar Year x, based on the trendline of the linear regression of the last five years' heat factors, and reduced by 1% (i.e. multiplied by .99)

*Standard error* = The standard error of the linear regression derived from the last five years' heat factors

Appendix 7

#### Achievement and basis points

The Company's achievement will result in eligible basis points if the metric meets or exceeds target thresholds, with linear scaling between minimum and midpoint, and between midpoint and maximum basis points as further discussed below in Section 3.0.

#### 2.2 Gas Share the Savings EAM

#### Description

The Gas Share the Savings ("GSTS") EAM incentivizes the Company to reduce the unit costs of its gas energy efficiency portfolio (excluding LMI programs). The Company can achieve incentives under this EAM by reducing total portfolio expenditure, by increasing the overall achievement above the approved baseline level of first-year energy savings, or by increasing the average lifetime of measures implemented in the portfolio. The Company will be awarded 30% of unit cost savings, as detailed in the metric below.

## Metric

GSTS performance and associated incentives will be calculated by determining: (i) a baseline energy efficiency ("EE") unit cost savings; (ii) the difference between that baseline and the actual acquired EE unit cost savings; and (iii) applying a percent share (30%) to the result. The formula is as follows:

STS EAM (\$) =

 $(CY_x Baseline LMMBtu Unit Cost - CY_x Acquired LMMBtu Unit Cost) * CY_x Acquired LMMBtu * 30\%$ 

where

x = 1, 2, 3, etc. for Calendar Year 1 (2021), Calendar Year 2 (2022), Calendar Year 3 (2023), etc.

 $CY_x$  Baseline LMMBtu ("lifetime MMBtu") Unit Cost =  $\frac{CY_x$  Baseline Budget  $CY_x$  Baseline LMMBtu

*CY_x Baseline Budget* = The Company's total non-LMI energy efficiency budgets approved in the January 2020 New Efficiency:New York ("NE:NY") Order

 $CY_x$  Baseline LMMBtu =  $CY_x$  Baseline AMMBtu * Portfolio EUL

 $CY_x$  Baseline AMMBtu ("annual MMBtu") = The Company's non-LMI gas energy annual savings target approved in the January 2020 NE:NY Order

*Portfolio EUL* = The Company's portfolio-level Effective Useful Life in the year prior to  $CY_x$ , as determined by the applicable Technical Resources Manual ("TRM"), and utilizing a verified gross savings methodology²

 $CY_x$  Acquired LMMBtu Unit Cost =  $\frac{CY_x$  Actual Expenditures  $CY_x$  Acquired LMMBtu  $CY_x$  Actual Expenditures = The Company's total expenditures on its gas energy efficiency portfolio in CY_x exclusive of LMI programs

 $CY_x$  Acquired LMMBtu =  $CY_x$  Acquired AMMBtu *  $CY_x$  Portfolio EUL

 $CY_x$  Acquired AMMBtu = The Company's acquired annual verified gross gas energy savings, exclusive of savings from LMI programs, as reported in the Company's year-end scorecard

 $CY_x$  Portfolio EUL = The Company's portfolio EUL, as determined by the applicable TRM at the time the savings are acquired, and utilizing a verified gross savings methodology⁷

*LMI programs* = the portfolio of programs established in the Statewide Implementation plan (see Section 2.3 below)

#### Target

This EAM is computed formulaically, per the Metric above, and as such has no minimum, midpoint, or maximum targets.

#### Achievement and basis points

Achievement is based on the formula detailed in the "Metric" section above. To account for the shifting of funds between years, the threshold for qualifying to collect the GSTS EAM shall be each year's NENY annual savings target (excluding LMI programs) plus the cumulative over- or underperformance from all years dating back through 2019, divided by the remaining number of years in the NENY period (2019-2025), as follows:

 $Threshold = (Over/underperformance CY_{x-1} + Over/underperformance CY_{x-2} + ...) \div (2026 - CY_x)$ 

where

Over/underperformance = Actual annual MMBtu savings achieved via the Company's market-rate energy efficiency portfolio – Annual MMBtu market-rate annual savings target as set in the NE: NY Order

and where the first CY in which over/underperformance is measured is 2019.

⁷ For measures and programs where verified gross savings studies have not been completed, there may need to be adjustments in future years to the portfolio EUL as those studies are completed. Also, the baseline EUL would be recalculated using the EULs associated with the updated TRM version in effect for the year in which performance is being measured, so that the baseline and actuals are compared on a like-to-like basis. *E.g.* if the TRM EUL of a boiler replacement changes during 2021, the associated EUL for all boiler replacements in 2020 would be recalculated based on that updated EUL.

If the Commission authorizes additional budgets and/or targets, the EAM calculation, including the threshold for qualification, should be updated accordingly.

## 2.3 Gas Low & Moderate Income ("LMI") Energy Efficiency Customer Savings EAM

#### Description

The Gas Low & Moderate Income Energy Efficiency Customer Savings ("GLMI") EAM incentivizes the Company to exceed the cumulative annual savings targets for its LMI portfolio, as defined in the 2020 Statewide Implementation Plan.

The GLMI EAM is a term EAM that is measured as the cumulative performance over a three-year term, and as such its performance will be measured through the entirety of CY 2023.

#### Metric

The LMI EAM metric is based on the sum of annual MMBtu savings targets for the Company's LMI energy efficiency portfolio over a three-year term. Annual targets for the LMI portfolios have been established in the 2020 Statewide Implementation Plan.

#### Where:

*LMI Baseline* = the sum of the Company's annual LMI savings targets for calendar years 2021-2023 as outlined in the 2020 Statewide Implementation Plan

*Acquired LMI AMMBtu Savings* = the sum of acquired annual verified gross energy savings (measured in MMBtu) for calendar years 2021-2023 of the Company's LMI portfolio.

## Target

The targets for achievement will be as follows:

LMI Min = LMI Baseline * 105% LMI Mid = LMI Baseline * 120% LMI Max = LMI Baseline * 140%

EAM	Level	CY 2021- 2023
	Baseline (NENY) ⁸	67,245
LMI EAM	Minimum	70,607
(MMBtu)	Midpoint	80,694
	Maximum	94,143

⁸ Statewide Low-and Moderate-Income Portfolio Implementation Plan filed July 24, 2020 in Case 18- M- 0084 and Case 14-M-0094, Appendix B.

#### Achievement and Basis Points

Achievement will be based on the targets as outlined above, with a linear scale between minimum and midpoint basis points, and between midpoint and maximum basis points as further discussed below in Section 3.0.

If the Commission authorizes additional budgets and/or targets, the EAM calculation, including the threshold for qualification, should be updated accordingly.

#### 3.0 Scaling

For EAMs that include minimum, midpoint, and maximum targets, the Company's incentive will be calculated if the metrics meet or exceed target thresholds, with linear scaling between (a) minimum and midpoint and (b) midpoint and maximum earnings.

Linear scaling will be calculated as follows:

a) If EAM Achievement < Target_{Min}:

 $BP_{awarded} = 0$ 

b) If  $Target_{Min} \leq EAM$  Achievement  $\leq Target_{Mid}$ :

$$BP_{awarded} =$$
  
 $BP_{Min} + (Min/Mid Slope) * (EAM Achievement - Target_{Min})$ 

where

$$Min/Mid Slope = \frac{BP_{Mid} - BP_{Min}}{ABS(EAM_{Mid} - EAM_{Min})}$$

c) If  $Target_{Mid} < EAM$  Achievement  $\leq Target_{Max}$ :

$$BP_{awarded} =$$
  
 $BP_{Mid} + (Mid/Max Slope) * (EAM Achievement - Target_{Mid})$ 

where

$$Mid/Max \ Slope = \frac{BP_{Max} - BP_{Mid}}{ABS(EAM_{Max} - EAM_{Mid})}$$

d) If EAM Achievement >  $Target_{Max}$ :

$$BP_{awarded} = BP_{Max}$$

#### 4.0 Reporting

The Company will file annual EAM reports with the Secretary no later than April 15 of each year setting forth the Company's performance relative to each EAM metric target, the actions taken by the Company to achieve target performance savings and benefits achieved, and calculations for incentives earned, including scaling of any incentives related to metric achievement between the minimum, midpoint, and the maximum

target levels, and explanations for any targets not achieved. The Company will also file with the Secretary quarterly reports no later than 60 days after the end of each calendar quarter to describe the Company's progress toward each EAM's metric target and a forecast of whether the Company expects to meet its annual EAM targets.

## **5.0 Allocation**

The Company will be permitted to recover earned EAM positive revenue adjustments for all EAMs through surcharges beginning May 1, 2022, as set forth in Sections 3.4.1 and 4.5.2 of the Joint Proposal.

## **Electric and Gas Pension and OPEB Expense Provisions**

1. Niagara Mohawk will determine the percentage of pension and OPEB costs that will be capitalized, and the corresponding entries into the pension and OPEB deferral accounts, using the methodology set forth herein. For both the electric and gas segments, the percentage of pension and OPEB costs to be capitalized will be determined as follows:

- a. The Company will calculate a capitalization rate at the beginning of each fiscal year using the actuarial estimates of pension and OPEB expenses for the year, along with all other fringe benefit costs subject to capitalization, and will adjust this rate for updated actuarial and other estimates provided in September of each year. The rate may also be adjusted at other times throughout the year if there is a fluctuation in the rate of greater than +/- 20 percent.
- b. After the close of each fiscal year, the Company will compare the amount of fringe benefits (including pension and OPEB costs), payroll taxes, and workers compensation actually capitalized on the books using actual fiscal year results to the amount that would be capitalized if the calculation used to determine the pension and OPEBs expense in these proceedings were applied. The Company will adjust the amount capitalized associated with fringe benefits (which includes, but is not limited to pension and OPEBs) for any differences resulting from this reconciliation. In addition, the Company will adjust the applicable pension and OPEB deferral accounts to reflect the capitalized pension and OPEB costs determined pursuant to the above methodology.

## Journal Entry Details Monthly Deferral

- c. Actual pension and OPEB expense comprise the following three elements:
  - Expense booked directly by the Company pursuant to FAS 87 or FAS 106, derived from actuarial reports.
  - Pension/OPEB expense allocated from National Grid USA Service Company, Inc. and National Grid Engineering & Survey, Inc. (collectively, "Service Company"). The amount allocated from the Service Company is reduced by any Supplemental Executive Retirement Programs ("SERP") related amounts as directed in Attachment A hereto. A reduction to pension/OPEB expense for the amounts capitalized will represent and include credits for the normal capitalization of payroll, intercompany billing revenues, and credits for third party billing revenue. The amount of capitalization of payroll (covering all three of these types of credits) will be determined based upon the process described above.
  - Monthly, the sum of the two elements noted above are compared against the preestablished level of pension/OPEB expense reflected in rates (see Section 10.1.1 of the Joint Proposal). This pre-established level takes the annual amounts

reflected in rates and divides them by twelve to perform a monthly reconciliation. The amount above or below the threshold is the amount deferred monthly. Separate entries are recorded for the pension and OPEB deferrals.

#### Annual Reconciliation Adjustment

d. An adjusting entry will be made annually, but no later than May of the subsequent fiscal year, for the reconciliation of fringe benefits capitalized in accordance with Section 1b above.

2. Deferred pension and OPEB costs will be credited with the costs associated with employees covered by the Niagara Mohawk pension and OPEB plans that are transferred to and from the Service Company between valuations for each fiscal year to eliminate double-counting. The method for determining the credit is as follows:

- a. After the close of each fiscal year, the Company will: (1) identify all employees who transferred from Niagara Mohawk to the Service Company or from the Service Company to Niagara Mohawk during the fiscal year; and (2) making the hypothetical assumption that all employee transfers occurred on January 1 of the fiscal year, calculate the difference in pension and OPEB expense allocated between Niagara Mohawk and the Service Company for (a) the capitalized portion of pension and OPEB expense; and (b) the Company's share of the monthly Service Company allocation. This adjustment for (b), above, will be subject to Niagara Mohawk's ability to provide support to Staff that the annual pension and OPEB costs for Service Company are derived from actuarial estimates of Service Company pension and OPEB expenses for the year. The revised valuations as of January 1 will be provided by the Company's actuaries. The credit determination, if any, resulting from this Section 2 will follow the determination set forth in Section 1 above. An example calculation of the adjustment described above will be applicable from April 2006 forward and is presented in Table 1 of Attachment B hereto.
- b. The Company further agrees that the amount of pension and OPEB costs allocated to Service Company, net of pension and OPEB costs allocated back from Service Company and otherwise included in pension and OPEB cost deferrals, will be funded on an as-incurred basis.

3. The Signatory Parties agree the funding for pensions and OPEBs should be done in a tax effective manner. Accordingly, Niagara Mohawk will have the discretion to allocate the funding requirements contained in the Commission's *Statement of Policy on Pensions and Post-Retirement Benefits Other than Pensions* in Case 91-M-0890 ("Statement of Policy") to efficiently use available tax benefits, manage the pension and OPEB obligations of the Company, and to meet other financial requirements associated with the funding. For purposes of the Statement of Policy, the funding requirements of both OPEB and pensions will be evaluated on the sum of the OPEB and pension plans, and excess funding for pensions or OPEBs will be offset against deficiencies, if any, in Niagara Mohawk's other pension or OPEB funding obligations under the Statement of Policy. This will be accomplished by providing a return

calculated in the manner set forth in the Statement of Policy on the debit balance of the internal reserve for a plan to the extent that such debit balance is less than or equal to a credit balance of the internal reserve for another Niagara Mohawk plan caused by the limitations on tax benefits. However, except as set forth below, no return will be allowed for any plan having a debit balance in its internal reserve for the amount by which the plan assets exceed the plan obligations. To earn a return on a portion of the debit balance of the internal reserve attributable to plan assets that exceed plan obligations, Niagara Mohawk must request such authority from the Commission and demonstrate that such funding in excess of the rate allowance is necessary and in the interest of customers even though the plan is fully funded.

#### 4. Statement of Policy

In general, Niagara Mohawk will adhere to the Commission's Statement of Policy. Under the Statement of Policy, Niagara Mohawk reconciles its pension and benefit expense with the allowance in its rates and will realize no profit or loss from changes to retiree benefits under its pension and benefit plans. However, Niagara Mohawk and National Grid will be granted waiver from the requirements of the Statement of Policy in the following limited respects:

- a. Although Niagara Mohawk and National Grid will not merge their pension funds without prior approval of the Commission following notice to Staff, they may establish a single master trust, with separate segregated sub-trusts for its New York and New England retirees, as long as a complete separate accounting of the assets, liabilities and annual expense levels can be made for the Niagara Mohawk sub-trust.
- b. Service Company will be permitted to manage the pension/OPEB plans subject to Commission staff review as long as a separate, non-affiliated entity is handling the investment decisions pertaining to the plans.

## Attachment A

- <u>Reconciliation of Pension and OPEB Expense</u>. Niagara Mohawk will reconcile its actual Pension and OPEB expense recorded under FAS 87 and FAS 106, and its allocated share of Pension and OPEB expense from Service Company, but excluding Pension and OPEB expense associated with SERP or other executive plans, programs, or arrangements that would otherwise factor into FAS 87, FAS 88, or FAS 106, and unregulated operations, to the amounts reflected in rates (as shown in Section 10.1.1 of the Joint Proposal). Capitalized FAS 87 and FAS 106 costs will be excluded from actual FAS 87 and FAS 106 costs in the reconciliation.
- 2. Termination Benefits, Settlements, and Curtailments Associated with Transfers to Service Company and National Grid Other Affiliates. The Signatory Parties recognize that the movement of employees between Niagara Mohawk and Service Company or National Grid Other Affiliates (as defined in the Company's Corporate Structure and Affiliate Rules (Appendix 16 to the Joint Proposal), could result in the inequitable shifting of FAS 87 and FAS 106 expense between Niagara Mohawk and Service Company or National Grid Other Affiliates. Consequently, Niagara Mohawk will implement mechanisms to prevent such inequitable shifting of FAS 87 and FAS 106 expense during the term of the Rate Plan, including the prevention of any effects associated with such transfers on any termination benefits, settlements, or curtailments. The objective will be, for example, to assure that a Niagara Mohawk employee who is transferred to Service Company and bills all or a portion of the employee's time to Niagara Mohawk does not unfairly increase or decrease Niagara Mohawk's recoverable FAS 87 and FAS 106 expense, or that an employee of Service Company who was billing all or a portion of the employees time to Niagara Mohawk and then is transferred to Niagara Mohawk does not unfairly increase or decrease Niagara Mohawk's recoverable FAS 87 and FAS 106 expense.
- 3. <u>All Other Termination Benefits, Settlements, and Curtailments</u>. Niagara Mohawk is required to follow the procedures set forth in the Commission's Statement of Policy, as it may be revised from time to time.

# APPENDIX 10

## **GBE Program Scope**

## High-Level GBE Program Scope by Workstream

**Asset Management** –an enterprise asset management platform that will provide a single view of all assets and system of record

- Implement an enterprise-wide Geographic Information System ("GIS"), investment planning, integrity management, and design systems /tools integrated with the work management system
- o Develop enterprise-wide investment planning / risk management capabilities

**Work Management** – a work management system with an integrated field mobile application allowing a single view of all work with the ability to prioritize work

- Implement an enterprise-wide work management system, including scheduling and mobility platforms with ability to optimize routes
- Develop planning and prioritization capabilities to ensure commitments are met, mandated work is completed and capital work is delivered
- Deploy enterprise-wide standardized processes and roles

**Customer Engagement** - enable easier customer interactions through greater visibility to planned activities and scheduling of upcoming work

- Implement an interaction platform with multi-channel, customer self-service options
- Provide access to real-time customer information and history

## **Regulatory & Compliance**

- Incorporate pipeline safety and compliance standards into all elements of the design
- Develop robust technical training capability
- Simplify and align policies, procedures, work methods and training
- Incorporate elements of API 1173 Pipeline Safety Management System (process safety)

## Detailed Backbone Capabilities

- Enterprise Asset Management platform integration with SAP
- Enterprise Work Management system integrated with a field mobile application and back office systems (*i.e.*, Powerplan and SAP)
- Scheduling and dispatch
  - Optimized routing
- Field mobility solutions
  - o electronic data capture
  - visibility to customer payment history

- $\circ$  Spatial crew visibility
- acceptance of credit card payments
- o print capability

- electronic work packages
- o field access to maps

• field asset correction and geolocation

- GIS Consolidation, GIS Data Remediation, Landbase Conflation
- Enterprise GIS/Enterprise Asset Management Platform Integration
- Data management, archiving, record-keeping
- Customer collections status visibility
- Standardized compatible unit library
- Customer appointment booking
- Contractor mobility solution
- Mobile time entry and tracking
- Material traceability
- Work forecasting and planning solution
- Asset investment planning and management tool
- Integrity management application
- Mobility tool for customer meter services work, inspection and maintenance work, preventative maintenance activities, construction work, leak inspection and leak repair
- Gas safety instructor-led, video-based, and mobile technical training

## Detailed Enhanced Capabilities

- Asset investment scenario planning
- Graphical Work Design and CU estimating
- Customer contact center front end application integrated with customer information systems and field mobility solution providing 360° view of the customer
- Field crew customer interaction portal
- Customer self-service portal
- Employee support interaction portal
- Projects and program management platform
- Complex design tools
- Auto work notifications
- Supervisor mobile platform

- Field mobile redlining and GIS mapping
- Project Management Platform integration with GIS, Enterprise Asset Management and asset accounting
- Spatial asset risk visibility
- Large commercial and landlord interaction portal

16	<ul> <li>Re-allocated value</li> <li>Line 11 + Line 15 for underperforming KPls or Line 7 for outperforming KPls</li> </ul>	\$304,279	\$454,450	\$298,834	\$276,315	-\$270,689	\$5,518,090	\$6,581,281
17	Reallocated Metric performance to FY24 Target = Maximum of Line 16 / Line 7 or 0%	63%	53%	%96	93%	0%0	70%	
18	Total Value to be deferred back to customers for underperformance = (1 - Line 17) * Line 6	\$1.29 M	\$1.62 M	\$0.13 M	\$0.35 M	\$5.00 M	\$3.30 M	\$11.69 M

If any KPI outperforms its target, demonstrating more value was delivered than anticipated, then the incremental value delivered can be reallocated to support any underperforming KPIs based on the following principles: 1. Re-allocation is based on the calculated dollar value of the KPI outperformance, not purely on a percentage basis 2. Any reallocation to an underperforming KPI is capped at 50% of its value (e.g. if performance was at 25% of the target, the maximum performance it could be enhanced to through reallocation is 75% of the target if there was available outperformance) 3. Through the reallocation process, the total dollar value demonstrated from the KPIs cannot increase (i.e. performance cannot exceed 100% of KPI value)

#### Case 20-E-0380 & Case 20-G-0381 Appendix 10 Page 10 of 10

# APPENDIX 11

# Appendix 11

## **Enhanced High Emitter Methane Detection Program**

The Company agrees to incorporate an Enhanced High Emitter Methane Detection Program, which will target leaks of exceptionally large size (10 standard cubic feet per hour or greater) for repair or replacement to reduce methane emissions from the distribution system and prevent lost gas. The Company will hire an advanced leak detection contractor to aid in prioritizing for repair possible large emitters within areas previously identified as possible high leak concentration areas. The Company will hire a contractor and begin advanced leak detection surveys within 12 months of Commission approval of this Joint Proposal.

#### Annual Report and Meetings

Beginning in calendar year 2022, the Company will file publicly-accessible annual reports with the Commission by April 15th of each year until the conclusion of the Company's next base rate case, documenting its implementation of the program, any methane emission reductions achieved, and efforts to advance any improvements to leak quantification methods. Interested parties will have an opportunity to respond to such reports 30 days after their submission.

Beginning in calendar year 2021, the Company, EDF, and any other interested party will have at least one meeting annually by the end of September until the conclusion of the Company's next base rate case.

#### Proposal for Extended Application

Within 24 months of the program's initiation (*i.e.*, approximately within 36 months of Commission approval of the Joint Proposal), if the Company determines the pilot to be successful, the Company will submit a petition to the Commission for expanded application of advanced leak detection technology. The petition will address how advanced leak detection can further any methane-reduction targets developed in New York under the CLCPA and how advanced leak detection can contribute to more accurate tracking of distribution system emissions.

# APPENDIX 12

# Sample Customer Advocate Check List

The Company agrees to implement training for Consumer Advocates on the use of a new proposed customer assistance checklist targeted to Niagara Mohawk residential customers with arrears totaling more than \$300 or who have not made a payment to Niagara Mohawk in the 3 billing cycles. An example of the proposed checklist follows:

# **Customers Assistance Check List**

**Step 1:** Identify heating or non-heating customers who are either \$300 or more behind on their bill OR who have not made a payment to Niagara Mohawk within the last 3 billing cycles.

**Step 2**: Proceed through the checklist below:

□ **Temporary Assistance**: If a customer has exhausted all of the HEAP they are eligible to receive or if HEAP has closed for the season and the customer has defaulted off of a minimum DPA and is out of DPA options with their utility and has a shut off notice and cannot pay their bill, refer them to their local DSS/HRA office to see if they are eligible for a One-Shot/4 month payment -<u>https://otda.ny.gov/programs/heap/contacts/</u>

#### Vet customer for HEAP Eligibility and educate them on the program:

- **Regular HEAP** (criteria based on income and number in the household)
  - Determine if customer received R HEAP and/or if they qualify:
    - UNY <u>https://www.nationalgridus.com/Upstate-NY-Home/Bill-Help/Grant-</u> Programs
    - HEAP information for New York State: NYS HEAP Hotline at (800) 342-3009
- □ To **apply** for R HEAP:
  - **On-line** at <u>https://mybenefits.ny.gov/mybenefits/begin</u>
  - In person to find your local DSS contact <u>https://otda.ny.gov/programs/heap/contacts/</u>
  - o In writing HEAP application <u>https://otda.ny.gov/programs/applications/3421.pdf</u>
    - Mail application to your local DSS district contact https://otda.ny.gov/programs/heap/contacts/
- □ **Emergency HEAP** (criteria based on income and number in the household and a utility disconnect notice/emergency)
  - If customer has received R HEAP and has a disconnect notice educate them on E HEAP and that they can apply by telephone (find your local DSS contact): https://otda.ny.gov/programs/heap/contacts/
    - Electric-Only Non-Heating customers whose electric is needed for their heat may be eligible for a Domestic Electric Emergency HEAP grant.

#### HEAP Opens the Door to:

□ **National Grid's Energy Affordability Program** is automatic with the receipt of HEAP and affords customers **a monthly bill credit**.

- Explain to customers they can qualify for EAP through other qualifying programs if they do not receive HEAP or if they heat with another utility or fuel vendor, such as:
  - Low Income Home Energy Assistance Program (LIHEAP)
  - Temporary Assistance (Family Assistance)
  - Safety Net Assistance Public Assistance
  - Supplemental Security Income (SSI)
  - Medicaid
  - SNAP (Food Stamps)
  - Veterans Disability Pension
  - Veterans Surviving Spouse Pension
  - Child Health Plus
  - Lifeline
  - Tribal Programs
- o EAP information: Energy Affordability Program (nationalgridus.com)
- Contact the EAP team by telephone at (866) 305-1915 or by email at Affordability@nationalgrid.com
- □ HEAP's Heating Equipment Clean & Tune
  - To apply contact the local DSS office: <u>https://otda.ny.gov/programs/heap/contacts/</u>
- □ HEAP's Heating Equipment Repair & Replacement
  - To apply contact the local DSS office: <u>https://otda.ny.gov/programs/heap/contacts/</u>
- □ HEAP's Cooling Benefit
  - To apply contact the local DSS office: <u>https://otda.ny.gov/programs/heap/contacts/</u>
- **Energy Assistance for Veteran's (Don't forget EAP)** 
  - o <a href="https://freegrantsforveterans.org/">https://freegrantsforveterans.org/</a>
  - o New York State Division of Veterans' Services | (ny.gov)

#### Offer to help customers find needed services in New York State:

□ NYS Find Services: <u>https://findservices.ny.gov/app/survey</u>

#### Energy Efficiency:

- □ Weatherization Assistance Program (WAP)
  - o <u>Resources for Working Families | OTDA (ny.gov)</u>
- □ Empower New York
  - o EmPower New York NYSERDA or call 1-877-NYSMART

#### Fuel Funds:

- □ National Grid's Care & Share Heating Fund
  - HeartShare Human Services of New York | Energy Assistance & Community Development or call (855) 852-2736 to apply

#### Average Median Income (AMI) criteria program – for Renter's Impacted by COVID:

# Emergency Rental Assistance (ERAP)

• <u>https://otda.ny.gov/programs/emergency-rental-assistance/</u> or call 1-844-NY1-RENT (1-844-691-7368). For TTY (hearing impaired) services dial, 1-833-843-8829.

# APPENDIX 13

# NON-WIRES ALTERNATIVES ("NWA")

# Overview

The Non-Wire Alternative Incentive Mechanism (NWA Incentive Mechanism) establishes a methodology for determining incentives applicable to all NWA Projects. Through the NWA Incentive Mechanism, the Company may retain a share of the present value of net benefits identified through the Benefit Cost Analysis (BCA) methodology consistent with the BCA Handbook. The incentive amount available to the Company will be adjusted based on the difference between the forecast and actual costs of achieving deferral. In the event the number of megawatts (MWs) and/or the number of megawatt hours (MWhs) required to defer the traditional project increases or decreases, the incentive amount would be further adjusted. The NWA Incentive Mechanism provides an incentive floor of \$0 and a cap of 50 percent of the initially-identified net benefits.

NWA Project Costs will be deferred with carrying costs.¹ Recovery of such costs will be amortized over ten years, with offsetting credits to the extent that an NWA Project defers the need for a traditional infrastructure project included in the Company's Average Electric Plant in Service Balance.

The Company also may petition the Commission to modify the general NWA Incentive Mechanism described below if doing so is in the public interest.

# <u>BCA</u>

For all Projects, the Company will use a BCA to calculate the present value of the net costs and benefits of an NWA project. The BCA will consider all the benefit and cost categories in the Commission's January 21, 2016 *Order Establishing Benefit Cost Analysis Framework* (BCA Order) and use the Company's BCA Handbook. A Project specific BCA will be developed to determine the Initial Net Benefits, and the Initial Incentive will be set as 30 percent of these Initial Net Benefits.

#### NWA Incentive Mechanism

The Company will establish an "Initial Incentive" equal to 30 percent of the present value of net benefits (Initial Net Benefits), *i.e.*, the present value of net benefits projected at the time the Company has either entered into contracts with distributed energy resource (DER) providers for the entire NWA project portfolio, or when there is reasonable certainty on the price of the NWA project portfolio. To establish the Initial Incentive, the Company shall make a compliance filing in Case 20-E-0380 as part of the implementation plan. Prior to making its compliance filing to set the Initial Incentive, the Company shall seek input from Department of Public Service Staff.

¹ Carrying costs shall be at the pre-tax weighted average cost of capital.

Once the NWA Project has become operational and implemented, the Company will calculate the difference in NWA Project Cost, which will be equal to the initially-forecast cost of the NWA Project, less the actual cost of the NWA Project. The Final Incentive will equal the sum of the Initial Incentive and 50 percent of difference in NWA Project Cost. The Final Incentive is subject to a floor of \$0 and a cap of 50 percent of the Initial Net Benefits. The Final Incentive may be adjusted on a yearly or monthly basis based on changes in NWA Project Cost. This mechanism and other mechanisms within this Appendix also apply to projects included in base rates (i.e., Rensselaer, Pine Grove and Watertown projects).

If additional MWs and/or MWh are needed to achieve the initially proposed deferral of a traditional infrastructure project, or to increase the duration of the deferral, and the Company finds it beneficial to procure additional MWs and/or MWhs, the Company shall seek input from Department of Public Service Staff and procure to meet the need. So long as it is feasible and remains cost beneficial to procure the additional MWs and/or MWh to continue deferral, the Company will be authorized to receive cost recovery of the expenditures incurred in obtaining the additional MWs or MWhs, including carrying charges. However, the Company's Final Incentive would not reflect either the costs² or the benefits associated with the additional MWs or MWhs. In the event the Company determines that acquiring additional MW or MWhs is technically or operationally infeasible, it will plan to implement an alternative solution. Recovery of any incentives related to that project will be halted without requiring a refund of the amounts already collected at that time.

In the event fewer MWs and/or MWhs are needed to achieve the intended deferral of traditional infrastructure, the Company will only reduce the number of MWs and/or MWhs it plans to procure if both the need for reduced MWs or MWhs is shown to be a sustained downward trend over a three-year period, and the Company needs only 70 percent or fewer of the initially-forecast MWs and/or MWhs to achieve the intended deferral. The Company will true-up the incentive by converting the Initial Incentive to an Initial Unit Incentive by dividing its 30 percent share of Initial Net Benefits by the initial number of MWs it forecasted. Similarly, the Difference in NWA Project Cost to achieve deferral will be calculated on a per-MW basis, the Unit Difference in NWA Project Cost, by dividing the actual NWA Project Cost by the number of MWs required. The Final Incentive will be calculated as the sum of the Initial Unit Incentive plus or minus the Unit Difference in NWA Project Cost, multiplied by the reduced amount of MWs determined to be necessary, subject to the same 50 percent share of Initial Net Benefits incentive floor provisions.

#### NWA Cost and Incentive Recovery

Consistent with the Track Two Order, the Company's Capital Investment Reconciliation Mechanism is revised to remove the financial disincentive utilities face when engaging in NWA projects. To the extent an NWA project results in the Company displacing a capital project that is

² The expenditures related to acquiring such additional MWs will not be considered in the Difference in NWA Project Cost used to calculate the Final Incentive.

reflected in the Average Electric Plant in Service Balances, the balance(s) will be reduced to exclude the forecasted net plant associated with the displaced project. The carrying charge associated with the displaced project will be applied as a credit against the recovery of the associated NWA project cost to be recovered from customers. In the event the carrying charge on the net plant of any displaced project is higher than the recovery of the associated NWA project costs, the difference will be deferred for the benefit of customers.

NWA project costs and the Final Incentive under the NWA Incentive Mechanism will be allocated to each Service Class (SC) based on the following allocators: (1) 1CP for the transmission portion (if any) of the deferred traditional project; and (2) non-coincident demand allocator for the sub-transmission and distribution portions of the deferred traditional project. For example, the costs and incentives related to an NWA project which defers the need for sub-transmission demand allocator. Similarly, the costs and incentives related to an NWA project which defers the need for primary-voltage distribution infrastructure would be allocated to SCs based on their non-coincident primary demand allocator. If an NWA project will benefit only certain classes of customers, the cost allocation will be limited to the benefitted classes. Once allocated to each SC, these costs would be recovered through an electric rate statement, which will be filed with the Commission and posted to the Company's website, that indicates the NWA surcharge rate to be included in the delivery charge, and to roll the NWA surcharge into the delivery charge line item on customers' bills, either the per kW or per kWh rate, on a demand-basis where available and on an energy-basis where necessary.

#### Amortization of NWA Project Costs and Incentives

The Company will recover its NWA project costs over a ten-year period. The ten-year recovery period will begin when the NWA project costs are realized. Any unamortized costs plus carrying charges, will be incorporated into base rates when electric base rates are reset.

The Company will be awarded and begin calculating and collecting the Final Incentive from customers once at least 70 percent of the MWs it procured for the NWA project have become operational and have been verified through the Company's measurement and verification procedures. For all NWA Projects, once awarded, the Company will amortize the Final Incentive of an NWA project over the remainder of the ten-year term, inclusive of carrying costs on the unamortized balance of the Final Incentive.

#### **Reporting Requirements**

The Company will submit a detailed implementation plan and BCA for each NWA project once there is reasonable certainty as to the costs of the NWA project portfolio. The implementation plan for each NWA will include, at a minimum: (1) detailed measurement and verification procedures; (2) the portfolio of component load reductions or DER to be implemented; (3) the anticipated costs of the NWA; (4) a demonstration of whether the costs of the NWA projects are incremental to the Company's revenue requirement or will be displacing a project subject to the Capital Investment Reconciliation Mechanism; (5) a customer and community outreach plan, if applicable; and (6) the BCA results when available. The implementation plan for each project will be updated at least annually; however, the Company will also update relevant plans promptly, if it determines it needs to increase or decrease the number of MWs or MWhs required to effectuate an NWA project, or if the length of the deferral period for the traditional infrastructure solution associated with the NWA is modified. Annual implementation plans will be filed by January 31 of each year. If the number of MWs, MWhs, or length of deferral is modified, the Company shall also file an updated BCA, as appropriate.

In addition, the Company also will file quarterly reports showing: (1) NWA project expenditures and all relevant details with respect to project costs; (2) a description of the NWA project activities; (3) anticipated project in-service dates; (4) NWA cost and incentive recoveries; and (5) identification of operational savings or other benefits. The quarterly reports shall be filed in Case 20-E-0380 60 days after the close of each calendar year quarter.

# APPENDIX 14

# **Major and Minor Storm Expense Provisions**

# 1.0 <u>Major Storms</u> 1.1 <u>Definitions</u>

1.1.1 <u>Major Storm</u> – a period of adverse weather during which service interruptions affect at least 10 percent of the customers in a region, and/or results in customers in a region being without electric service for durations of at least 24 hours. Niagara Mohawk will provide data showing that a period of adverse weather qualifies as a Major Storm by affected region as part of its backup support for the deferral of Incremental Costs.

1.1.2 <u>Incremental Costs</u> – Incremental Costs for a Major Storm include overtime and payroll taxes paid to employees to restore service following a Major Storm, rest time wages incurred as the result of a Major Storm as specified in Niagara Mohawk's union contracts, outside vendor costs (including the costs of crews from affiliate companies), lodging and meal charges, and material and supply charges that Niagara Mohawk would not have incurred, except for the Major Storm. Any capitalized costs will be excluded from Incremental Costs, and proceeds from insurance, the Federal Emergency Management Agency, New York State or any other reimbursement or proceeds received to cover such costs will be deducted from Incremental Costs. Niagara Mohawk will open work orders to track Major Storm incremental costs which will be subject to audit by DPS Staff.

1.1.3 <u>Ten Days Following Restoration</u> – For deferral purposes only, a Major Storm will include the ten days following restoration of all customers. Except as provided below, Niagara Mohawk will not defer costs incurred after this period. The Company, however, will have the right to petition the Commission for authorization to defer qualifying Incremental Costs (as defined below) incurred more than ten days following restoration of all customers that are associated with extraordinary Major Storms. In the petition, Niagara Mohawk must demonstrate that the costs are qualifying Incremental Costs (*i.e.*, that the Incremental Costs qualify for deferral under the provisions set forth in this Appendix); however, the Company is not required to demonstrate that the Incremental Costs are material or that the Company is not earning above its allowed return on equity.

# 1.2 <u>Funding</u>

The Company's annual electric revenue requirements provide funding for Major Storm Incremental Costs of \$30 million in each Rate Year. The Company will defer the difference between the base rate allowance and actual Major Storm Incremental Costs for future refund to or recovery from customers. As of the Effective Date, Niagara Mohawk will credit the deferral account with a monthly amount of \$2.5 million, which equals 1/12th of the \$30 million included in base rates. An illustrative example of the Major Storm Incremental Costs reconciliation is provided in Attachment A hereto.

# 1.3 <u>Per Event Deferral Threshold</u>

To qualify for deferral, Incremental Costs of an individual Major Storm must be equal to or greater than \$0.750 million among all qualifying regions in the Company's service territory. If the Incremental Costs of an individual Major Storm are equal to or greater than \$0.750 million, all Incremental Costs associated with that event qualify for deferral (not just the amount that exceeds \$0.750 million).

# 1.4 <u>Per Storm Deductible for Incremental Costs Incurred More Than Ten (10)</u> <u>Days After Restoration of the Last Customer</u>

Subject to the foregoing threshold provision, all Incremental Costs of a Major Storm incurred within 10 days of restoration of the last customer are subject to deferral with no per storm deductible. If the Company petitions for authorization to defer qualifying Incremental Costs incurred more than 10 days after restoration of the last customer interrupted by a Major Storm, a per storm deductible of \$0.750 million will apply to the deferral of such costs. In the event the Company does seek to defer qualifying Incremental Costs incurred more than 10 days beyond the restoration of the last customer, the Company also will perform an analysis of such costs to gather information for deductible levels in future rate proceedings.

# 1.5 <u>Contractor Disallowance</u>

The portion of Niagara Mohawk's costs of contractors that qualify for Major Storm deferral as Incremental Costs will be determined in accordance with the Contractor Disallowance rule. The Contractor Disallowance rule provides that straight-time costs for contractors replacing employees with certain job titles who perform Major Storm restoration work and who have left the Company cannot be considered Incremental Costs where the headcount in those job titles is below the level assumed in base rates. The Contractor Disallowance pertains to only the following job titles: (i) Transmission Line Worker B 2/C; (ii) Chief Line Mechanic A Hotstick; (iii) Line Mechanic Hotstick; (iv) Line Mechanic C; (v) Line Mechanic B; (vi) Line Mechanic A; (vii) Line Mechanic Helper; (viii) One Person Line/Trouble Mechanic; (ix) Trouble Mechanic C Hotstick; (x) Trouble Mechanic D Hotstick; (xi) Cable Splicer A; (xii) Cable Splicer B; (xiii) Cable Splicer C; (xiv) Cable Splicer Helper; (xv) Chief Cable Splicer A; (xvi) Transmission Chief Live Line Bare Hand Specialist; (xvii) Transmission Line Worker A 3/C; (xviii) Transmission Line Worker C 1/C; (xix) Transmission Line Worker Hot Stick; (xx) Transmission Live Line Bare Hand Specialist; and (xxi) Transmission Line Worker Helper. An example of the Contractor Disallowance calculation is set forth in Attachment B hereto.

# 2.0 <u>Minor Storms</u>

# 2.1 **Definitions**

2.1.1 <u>Minor Storm</u> – adverse weather (forecasted and actual) that results in preparation and execution of restoration activities for customer service interruptions that do not qualify as a Major Storm.

# 2.1.2 <u>Minor Storm Expense</u> – Incremental Costs incurred in responding Minor Storms.

2.1.3 <u>Incremental Costs</u> – Incremental Costs for a Minor Storm include overtime and payroll taxes paid to employees to restore service following a Minor Storm, rest time wages incurred as the result of a Minor Storm as specified in Niagara Mohawk's union contracts, outside vendor costs (including the costs of crews from affiliate companies), lodging and meal charges, and material and supply charges that Niagara Mohawk would not have incurred, except for the Minor Storm. Any capitalized costs will be excluded from Incremental Costs, and proceeds from insurance, the Federal Emergency Management Agency, New York State or any other reimbursement or proceeds received to cover such costs will be deducted from Incremental Costs. Niagara Mohawk will open work orders to track Minor Storm incremental costs which will be subject to audit by DPS Staff.

## 2.2 **Funding and Reconciliation Mechanism**

2.2.1 <u>Funding</u> – The Company's annual electric revenue requirements provide funding for Minor Storm Expense of \$41 million in Rate Year 1, adjusted for inflation thereafter. An illustrative example of the Minor Storm Expense reconciliation is provided in Attachment A hereto.

2.2.2 <u>Reconciliation Mechanism</u> – The Company will compare Minor Storm Expense funding in rates over the three-year period of the Rate Plan (cumulatively \$123 million before inflation) to actual Minor Storm Expense incurred over that period and reconcile costs to rate recovery as follows:

- a. If cumulative actual Minor Storm Expense over the three-year Rate Plan period is *less than* the cumulative Minor Storm Expense rate allowance for that period, the Company will defer the difference for the benefit of customers (100% downward reconciliation).
- b. If cumulative actual Minor Storm Expense over the three-year Rate Plan period is greater than the cumulative Minor Storm Expense rate allowance for that period by up to \$30 million, there will be no reconciliation (\$30 million upward dead band).
- c. If cumulative actual Minor Storm Expense over the three-year Rate Plan period exceeds the cumulative Minor Storm Expense rate allowance for that period by more than \$30 million, the Company will defer 90 percent of the amount in excess \$30 million over the cumulative rate allowance for future recovery from customers (90/10 customer/Company sharing above \$30 million dead band).

# 2.3 <u>Reporting</u>

The Company will track Minor Storm Expense on work orders which will be subject to audit by DPS Staff. Within [45] days after the end of each quarterly period, the Company will submit a report to DPS Staff with details of Minor Storm Expenses incurred during the preceding quarter. In addition to event analyses expenses will be segregated into two categories proactive and reactive. Proactive storm expenses will include circumstances where the Company forecasted the need for advanced preparation of crews and captured data related to the adverse weather and restoration preparation efforts. Reactive storm expenses will include circumstances where the forecast did not warrant formal advanced preparation efforts, but interruptions nevertheless occurred, and restoration efforts were required due to adverse weather conditions.

The report will provide details regarding both proactive and reactive costs associated with Minor Storm Expense. In addition, for proactive storm expenses, the report will include data related to the weather conditions, crew preparations and customers impacted.

## Additional Provisions

# 3.1 **Pre-Staging Costs**

Based upon the severity of weather forecasts, the Company sometimes prepares in advance of a storm event by procuring and/or mobilizing contractor crews prior to the adverse weather with the intention of deploying those crews to shorten the duration of customer interruptions. If the actual weather does not occur as forecast and those crews are released without having worked on restoration efforts, the Incremental Costs (as defined in Sections 1.1.2 and 2.1.3, above) associated with those preparation efforts and advance crew mobilization are Pre-Staging costs subject to the cost recovery provision in Section 3.1.1, below.

## 3.1.1 Pre-Staging Cost Recovery

Pre-staging costs less than \$0.250 million per event will be charged to Minor Storm expense. If pre-staging costs reach \$0.250 million for an event, then 100 percent of pre-staging costs up to \$1.5 million per event will be charged to the Major Storm deferral. Pre-staging costs above \$1.5 million per event will be charged 85 percent to the Major Storm deferral and 15 percent to Minor Storm expense. The deferral of costs as described is independent of the severity of the actual event.

An illustrative example of the Pre-Staging Costs calculation is provided in Attachment A hereto.

# 3.2 <u>Affiliated Company Costs</u>

In its summary of Incremental Costs to be deferred with respect to any Major or Minor Storm, Niagara Mohawk will identify the portion of such Incremental Costs that represents payments to any affiliated company or companies separately from the portion of Incremental Costs that represents internal costs and costs paid to unaffiliated third-parties. Affiliated company costs will be broken down into the same cost components as used for internal Company costs.

Niagara Mohawk will defer 30 percent of base labor, associated overheads (other than pension and OPEBs), and transportation costs originating from the National Grid USA Service Company as Major Storm Incremental Costs.

# 3.3 Other Costs

Niagara Mohawk will not defer storm-related claims costs; stores handling costs originating from Niagara Mohawk; transportation costs originating from Niagara Mohawk; pension and OPEB costs; equipment rental costs unless the Company demonstrates that such costs are Incremental Costs; base labor costs associated with the contractor Pro Unlimited, its successor and or similar agencies with a majority of employees being former Company employees; and costs for cell phone usage.

# Attachment B

# **Calculation of Contractor Disallowance Costs**

## **Principles**

- 1. The adjustment for contractor straight time is to be applied to line restoration.
- 2. The baseline and the month prior to the storm internal employee counts are defined using job titles, which are set forth in Table 2 below. The Signatory Parties agree that these job titles represent union employees with primary responsibility for line restoration activities and are the functions most likely to be supplemented with contractors during a storm response. If job titles are changed, the Company will provide a reconciliation of prior job titles to new job titles for purposes of applying the adjustment. The employee count shall pertain only to Niagara Mohawk.
- 3. The Company will provide a monthly report of internal staffing levels for the job titles defined in Table 2 below.
- 4. The Signatory Parties agree the baseline employee counts for line restoration in Rate Years One, Two, and Three are 972.
- 5. The hourly billing rate applied to the contractor hours to determine the straight time is described in Line D below.
- 6. An example of how the calculation will be developed is presented in Table 1 below.
- 7. Other activities may be subject to a contractor disallowance and will be reviewed on a case by case basis.
- 8. Employees of Company affiliates will be treated as contractors.
- 9. In the event the Company employs more internal employees in the specified job titles than indicated in Principle 4, above, the Company may petition the Commission for an adjustment to the storm deferral to account for the incremental straight time of the additional employees.

## <u>Illustrative Example</u>

Table 1 is an example of the template agreed to for calculating the adjustment to deferrable contractor Major Storm costs. The example reflects contractor and applicable employee storm response and restoration staffing and costs for several days after a hypothetical Major Storm. This example is presented to illustrate the method and the sources of the data to be used and is not intended to reflect the final or agreed upon deferrable cost of any storm.

# **Explanation of Lines on Table 1**

Line [A] – See Table 2 for the agreed upon list of qualifying job titles for Line Restoration and the column titled "Staffing Baseline in Rates" in that table for the associated employee counts. The counts represent all Niagara Mohawk employees within each job title. This data should not change during the Rate Plan.

Line [B] – See the column titled "Total Actual Staffing" in Table 2 for an example of a report reflecting the number of Niagara Mohawk employees in qualifying job titles, at the end of the month prior to the month in which a Major Storm occurs. The Company will provide by the 15th of every month, the number of line restoration employees by job title who were in qualifying positions per Table 2. If a listed job title is reclassified for operational reasons, the Company will notify on-site PSC Staff of the reclassification and include that job title on subsequent monthly reports. However, listed job titles cannot be commingled with other job titles not subject to this clause.

Line [C] – The level of non-deferrable contractors equal to the total baseline employee count Line [A] less total actual employee count Line [B].

Line [D] – The agreed upon Line Contractor hourly rates for the Rate Years are \$178.97, \$183.08 and \$186.84, respectively. Rates beyond the Rate Years will be equal to the Rate Year Ended June 30, 2024 rate inflated using Moody's Economic Indicators consensus forecast of the GDP Deflator at the start of the year in which the rates apply.

Line [E] – Eight hours of straight-time per day.

Line [F] – Daily straight-time adjustment prior to the expense/capital allocation as determined for each Major Storm, which is the result of multiplying Lines [C], [D] and [E].

Line [G] – Expense ratio equal to the sum of listed employees' labor costs charged to expense plus contractors' labor costs charged to expense, divided by the sum of listed employees' total labor costs plus contractors' total labor costs. This ratio is calculated for and applicable to each Major Storm.

Line [H] – Line F multiplied by Line G

#### Line Notes

- 1 3 The 2014-2016 rates were originally calculated in Section 1.2.3.3, Attachment 2a, Principle 5 of the Rate Plan Provisions in Case 12-E-0201
- 4 8 For years beyond March 31, 2016 through March 31, 2021, the rate for a given year is equal to the 2016 rate inflated to that year using the Blue Chip GDP Deflator forecast in Exhibit____RRP-8CU in Case 17-E-0238.
- 9 11 For years beyond March 31, 2021, the rate for a given year is equal to the 2021 rate inflated to that year using the Moody's Analytics GDPIPD forecast as of July 2021.

# APPENDIX 15

#### **APPENDIX 15: SERVICE QUALITY ASSURANCE PROGRAM**

There will be a Service Quality Assurance Program for the Rate Plan that includes Customer Service Performance Indicators ("CSPI") and Electric Reliability performance measures. These measures will involve potential negative revenue adjustments with a total annual pre-tax value of \$33.8 million (\$19.8 million for CSPI and \$14 million for Electric Reliability) in calendar year 2021 if satisfactory levels of service are not delivered. All of the amounts reflected below are pre-tax dollars. The Service Quality Assurance Program will be measured on a calendar year basis. For calendar years 2022-2024, total negative revenue adjustments associated with the CSPI will be measured in basis points, with up to 40 basis points in negative revenue adjustments in calendar year 2022 and up to 48 basis points in calendar years 2023-2024. For calendar years 2022-2024, total potential negative revenue adjustments associated with the Electric Reliability performance measures will remain \$14 million.

#### 1.0 **PROGRAM OBJECTIVE**

The objective of the Service Quality Assurance Program is to encourage Niagara Mohawk to provide high levels of service quality in all areas of performance throughout the Rate Plan.

#### 1.1 <u>Electric and Gas CSPI</u>

The Customer Service Performance Indicators set forth in Section 3.0, below, are designed to maintain and improve service quality in the following operations of the Company:

Call Center Operations
 Billing and Collections
 Field Services

#### 1.2 <u>Electric Reliability</u>

The Electric Reliability performance measures set forth in Section 4.0, below, are designed to maintain reliability by establishing standards for the following:

Service Reliability (SAIFI and CAIDI)
 Estimating
 Inspection and Maintenance ("I&M") Program

# 2.0 OVERALL APPROACH

#### 2.1 <u>Reporting</u>

1) Niagara Mohawk will submit annual performance results, together with supporting data and reports, to the Secretary within three months after the conclusion of each full calendar year. The annual CSPI reports will be filed in both this rate case and Case 15-M-0566. For calendar years 2022-2024, the annual CSPI reports shall reflect the migration from the prior Service Quality Assurance Program metrics to the new CSPI titles and metrics as shown in the tables below. The annual CSPI reports for calendar years 2022-2024 will reflect the change from fixed dollar negative revenue adjustments to equivalent basis points of 10 basis points per metric for calendar 2022, and 12 basis points per metric for calendar years 2023-2024. The annual CSPI report will include the dollar value of a combined basis point for the electric and gas businesses for the applicable calendar year.

2) Niagara Mohawk's annual CSPI reports will include the number and total dollar amounts paid to customers for missed appointments. Additionally, the Company will update its Integrated Voice Response ("IVR") scripts regarding making appointments to include language on service-related calls to inform customers that if an appointment is missed by the Company, the customer will receive a credit on their next bill.

2) The Company will submit monthly CSPI reports in Case 15-M-0566. The annual CSPI report will include a description of the service quality measures, the method for calculating performance, the results for the period, supporting calculations of annual results in spreadsheet format, and a narrative overall assessment of customer service performance during that calendar year.

3) For Electric Reliability, the Company will submit quarterly reports thirty days after the conclusion of the first, second, and third quarters of each calendar year. The quarterly reports will include SAIFI, CAIDI, Estimating, and I&M Program targets and actual results. The fourth quarter or annual Electric Reliability performance report will include SAIFI, CAIDI, Estimating, and I&M Program targets, actual results, potential pretax negative revenue adjustments and pretax negative revenue adjustments incurred.

### 2.2 Exclusions

The target levels established for the CSPI measures listed in Section 3.0 and the Electric Reliability measures listed in Section 4.0 are based on performance under all operating conditions except:

1) "Major storms" that are defined as a period of adverse weather resulting in a service interruption affecting at least ten percent of the customers in an operating area or causing customers to be without electric service for at least 24 hours as stated in 16
NYCRR Part 97. Niagara Mohawk will exclude interruption data associated with major storms in a consistent manner with established procedures. The Company will request any major storm related exceptions or adjustments for the Customer Service measures detailed in Section 3.0 in its annual report to the Commission.

- 2) Abnormal operating conditions, including during any period of catastrophe, natural disaster or other unusual event not in the Company's control, affecting more than ten percent of the customers in an operating area. Niagara Mohawk may petition for the exclusion of performance data associated with such an event. The petition should include justification for exclusion, as well as a detailed analysis of the Company's performance prior to and subsequent to the event.
- 3) Events that result from orders by the New York State Independent System Operator that are not a result of inappropriate actions by the Company. Niagara Mohawk may petition for the exclusion of performance data associated with such an event. The petition should include justification for exclusion as well as a detailed analysis of the Company's performance prior to and subsequent to the event.

#### 3.0 <u>CUSTOMER SERVICE PERFORMANCE INDICATORS</u>

#### Impact of COVID-19 Pandemic

The Parties recognize that COVID-19 could impact the Company's performance under certain CSPI metrics. To that end, the Company can file a petition with the Commission requesting to avoid a negative revenue adjustment due to the CSPI performance impacts that the Company can demonstrate resulted from the COVID-19 pandemic for calendar year 2021. Should the COVID-19 pandemic affect the Company's performance for these CSPI metrics in future years, an additional petition for exclusion may be submitted to the Commission. In a petition for relief due to the COVID-19 pandemic, the Company will provide all data collected for monthly and annual CSPI calculations and a detailed explanation of how the Company attempted to maintain, where possible, its performance.

If the Commission takes action on the service quality metrics in the Generic COVID proceeding, Case 20-M-0266 – *Proceeding on Motion of the Commission Regarding the Effects of COVID-19 on Utility Service*, the Commission's determination in that proceeding supersedes those agreed upon in these rate proceedings.

#### Customer Service Performance Indicators Metrics

A total pre-tax potential negative revenue adjustment of \$19.8 million in calendar year 2021 moving to 40 basis points for calendar year 2022 and 48 basis points for calendar years 2023-2024 will be associated with electric and gas customer service allocated across the following four CSPI measures, which are described in detail in the following subsections:

PSC Complaint Rate
 Residential Customer Satisfaction Survey
 Small/Medium C&I Customer Satisfaction Survey
 Percentage of Calls Answered by a Representative within 30 Seconds

#### 3.1 PSC Complaint Rate

A PSC Complaint is initiated with a dispute being filed by, or on the behalf of, a consumer with the Staff of the DPS Office of Consumer Services. The calculation of the metric will be based on the methodology and exclusion/downgrade process used in the Historic Test Year (the 12 months ended December 31, 2019). This statement does not prohibit DPS Staff from making changes to its internal processes provided that those changes do not materially alter performance results.

The issue of concern forming the basis for the complaint must be one within the utility's responsibility and control, including an action, practice, or conduct of the utility or its employees. Only "charged" complaints are included in the PSC Complaint Rate metric. A complaint will be considered charged when a customer, after first having contacted Niagara Mohawk to express dissatisfaction with an action, practice, or conduct of Niagara Mohawk, and having provided Niagara Mohawk a reasonable opportunity to address the matter, contacts the Commission to express dissatisfaction with such action, practice, or conduct. A complaint will not be charged if the contact with the Commission is for an opinion or inquiry. For the purposes of the PSC Complaint Rate metric, an "opinion" is an instance where a customer is contacting the Commission to voice a view on a particular issue or condition, such as a pending rate case, a change in rates or charges or the imposition of new rates or charges, or the level of executive compensation. Matters within the responsibility or control of an alternative service provider(s) will not be counted as a PSC Complaint against Niagara Mohawk under this measure.

For calendar year 2021, the metrics and targets established in Case 17-E-0238 and 17-G-0239 shall remain in effect. For calendar years 2022-2024, targets and negative revenue adjustments will be as follows:

PSC Complaint Rate per 100,000 Customers	Basis Points at Risk CY 2022	Basis Points at Risk CY 2023 and 2024
$\leq 1.0$	0 BP	0 BP
> 1.0	2 BP	3 BP
≥ 1.2	5 BP	6 BP
≥ 1.4	10 BP	12 BP

#### 3.2 <u>Residential Customer Satisfaction Survey</u>

The Residential Customer Satisfaction Survey is calculated from monthly telephone survey results of a sample of residential customer transactions with the Company occurring in each month of the calendar year.

The survey population will include all customers of the Company in that month that had any one of the following transactions with the Company:

- 1) Connect
- 2) Disconnect
- 3) Electric Service Orders/Gas Service Orders
- 4) Service Orders
- 5) Budget
- 6) High Bill
- 7) Collections
- 8) Direct Debit

The parameters of the survey include the following criteria: a) only surveys where the respondent answered question No. 28 will be considered complete; and b) the Company will seek to perform a minimum of 600 surveys each month.

Question No. 28 on the survey will be used to measure the Company's performance under this measure. The question asks "Overall, on a scale from 1 to 10, where 1 means dissatisfied and 10 means satisfied, how satisfied are you with the service provided by National Grid?" Satisfaction is measured by a score of 8 or higher on the question.

For calendar year 2021, the metrics and targets established in Case 17-E-0238 and 17-G-0239 shall remain in effect. For calendar years 2022-2024, targets and negative revenue adjustments will be as follows:

Residential Customer		Basis Points at Risk
Satisfaction Survey	Basis Points at Risk	CY 2023 and 2024
Interval	CY 2022	
$\geq 82.0\%$	0 BP	0 BP
< 82.0%	2 BP	3 BP
$\leq 81.0\%$	5 BP	6 BP
≤ 79.9%	10 BP	12 BP

#### 3.3 <u>Small/Medium Commercial & Industrial (C&I) Customer Satisfaction Survey</u>

The Small/Medium C&I Customer Satisfaction Survey is calculated from monthly telephone survey results of a sample of SC2 customer transactions with the Company occurring in each month of the calendar year.

The survey population will include all customers of the Company in that month that had any one of the following transactions with the Company:

- 1) Connect
- 2) Disconnect
- 3) Electric Service Orders/Gas Service Orders
- 4) Service Orders
- 5) Budget
- 6) High Bill
- 7) Collections
- 8) Direct Debit

The parameters of the survey include the following criteria: a) only surveys where the respondent answered question No. 28 will be considered complete; and b) the Company will seek to perform a minimum of 120 surveys each month.

Question No. 28 on the survey will be used to measure the Company's performance under this measure. The question asks "Overall, on a scale from 1 to 10, where 1 means dissatisfied and 10 means satisfied, how satisfied are you with the service provided by National Grid?" Satisfaction is measured by a score of 8 or higher on the question.

For calendar year 2021, the metrics and targets established in Case 17-E-0238 and 17-G-0239 shall remain in effect. For calendar years 2022-2024, The measure targets and negative revenue adjustments will be as follows:

Small/Medium C&I		Basis Points at Risk
<b>Customer Satisfaction</b>	Basis Points at Risk	CY 2023 and 2024
Survey Interval	CY 2022	
$\geq 78.0\%$	0 BP	0 BP
< 78.0%	2 BP	3 BP
≤75.5%	5 BP	6 BP
≤73.0%	10 BP	12 BP

#### 3.4 Percentage of Calls Answered by a Representative within 30 Seconds

This measure is the percentage of all inbound Customer Service and Collection calls to Niagara Mohawk or its agents, regardless of location, that are answered within 30 seconds, including inbound calls to numbers used for outbound collections calls. The measure will exclude calls answered by any current or future IVR applications, such as Niagara Mohawk's Customer Connection, icCallMe or OnCall applications.

Annual performance will be based on 12 months' data. For the year, the measure is the number of calls answered within 30 seconds as a percentage of the total calls answered during the year.

% Calls Answered by a Representative Within 30 Seconds	Basis Points at Risk	Basis Points at Risk CY 2023 and 2024
≥ 79.2%	0 BP	0 BP
< 79.2%	2 BP	3 BP
$\leq$ 77.0%	5 BP	6 BP
<74.9%	10 BP	12 BP

# 4.0 <u>ELECTRIC RELIABILITY</u>

A total pre-tax potential negative revenue adjustment of \$14 million per year associated with Electric Reliability shall be allocated across the following four measures, which are described in detail in the following subsections:

- 1) System Average Interruption Frequency Index
- 2) Customer Average Interruption Duration Index
- 3) Estimating
- 4) Inspection and Maintenance ("I&M") Program

#### 4.1 <u>System Average Interruption Frequency Index ("SAIFI")</u>

The SAIFI metric will be based on data excluding major storms and other excludable events set forth under Section 2.2.

If the Company's SAIFI performance for the calendar year exceeds 1.08, the Company will incur a \$4 million negative revenue adjustment.

#### 4.2 <u>Customer Average Interruption Duration Index ("CAIDI")</u>

The CAIDI metric will be based on data excluding major storms and other excludable events set forth under Section 2.2.

If the Company's CAIDI performance for the calendar year exceeds 2.10, the Company will incur a \$4 million negative revenue adjustment.

#### 4.3 Estimating

For each calendar year beginning January 1, 2018, the Company will implement an estimating metric consisting of: (i) a project-specific metric and (ii) a portfolio-based metric.

#### Project Metric

In each calendar year, for each individual distribution or sub-transmission capital project with an initial design estimate greater than \$100,000, the Company will compare the final engineering estimate of each such project with the total actual costs for the project. The Company will be subject to up to \$3 million in negative revenue adjustments as indicated in the table below based on the percentage of individual projects whose actual costs are within plus or minus 25 percent of their respective final engineering estimates.

Percent of Projects with Final Costs within	Negative Revenue Adjustment
+/-25% of Final Engineering Estimate	
$\geq 80\%$	\$0
$\geq 70\%$ but < 80%	\$1 million
$\geq 60\%$ but < 70%	\$2 million
<60%	\$3 million

#### Portfolio Metric

In each calendar year, the Company will compare the sum of all final project actual costs against the sum of all associated final engineering estimates. If the sum of actual project costs differs from the sum of associated project final engineering estimates by more than plus or minus 15 percent, the Company will be subject to a \$1 million negative revenue adjustment.

Projects not subject to the Project Metric and not included in the Portfolio Metric include: (1) Distributed Generation, (2) Underground Residential Development, (3) Programs, and (4) Substations. For calculation purposes of both metrics, the Company may normalize overheads to calculate "effective rates" for overheads to be applied to the final engineering estimate of a project at the end of the project lifecycle for comparison to actual project costs. The Company also may request exceptions for discrete projects where there are scope changes or significant circumstances (*e.g.*, external stakeholder driven changes (*e.g.*, NYSDOT Project); in-ground conditions; *et cetera*).

#### 4.4 <u>I&M Program</u>

The Company is subject to a negative revenue adjustment of \$1 million if it fails to repair at least 85 percent of Level II deficiencies (as defined in the Safety Orders in Case 04-M-0159 ("Safety Orders")) that have a repair due date within the respective calendar year within the time period allowed for such repairs under the Safety Orders (*i.e.*, one year).

The Company is subject to an additional negative revenue adjustment of \$1 million if it fails to repair at least 75 percent of Level III deficiencies (as defined in the Safety Orders) that have a repair due date within the respective calendar year within the time period allowed for such repairs under the Safety Orders (*i.e.*, three years). The Company will meet with Staff periodically to discuss I&M program repair performance.

#### 5.0 <u>ACCOUNTING MECHANISM</u>

With the exception of negative revenue adjustments that are passed back to customers under the next paragraph, Niagara Mohawk will include in the deferral account any negative revenue adjustments associated with failure to meet the CSPI performance targets set forth above.

Whenever the performance report filed under Section 2.2, above, shows that total negative revenue adjustments of \$7.5 million or more have accrued in the prior year, Niagara Mohawk will reflect the entire amount as a credit to the customer charge of each of its electric and gas customers using the following methodology. The portion of the credit associated with negative revenue adjustments relating to electric reliability will be determined by dividing the amount of electric reliability negative revenue adjustment accrued in the prior year by the number of Niagara Mohawk's total electric bills expected for the following July. The portion of the credit associated with negative revenue adjustment accrued in the prior year by the number of the credit associated with negative revenue adjustments relating to customer service will be determined by dividing the amount of customer service negative revenue adjustment accrued in the prior year by the number of point of the prior year by the number of electric and gas bills expected for the following July. The credit will be implemented in July billings, will be accompanied by a bill insert explaining the credit, and will be fully reconciled through the deferral mechanism.

For deferral or refund purposes, the negative revenue adjustments will be accounted for as follows:

		<u>Electric</u> <u>Gas</u>
1)	CSPI Measures	See Attachment 1, Table 1
2)	Electric Reliability Measures	See Attachment 1, Table 2 (electric only)

#### 6.0 COMMISSION AUTHORITY

The Signatory Parties explicitly recognize that the Commission has the authority to modify the Service Quality Assurance Program for prospective application at any time, if, in its opinion, acceptable service quality is not maintained.

In the event that abnormal operating conditions, as defined in Section 2.2.2, above, or factors not in the Company's control, affect normal business operations (*e.g.*, the COVID-19 pandemic or the 2020 Moratorium on Terminations), the Signatory Parties recognize that the Commission has the authority to temporarily suspend potential failures, such as negative revenue adjustments, or incurred incentives, such as positive revenue adjustments, that were hindered or bolstered by these outside influences. This temporary suspension of the metrics may not extend beyond the rate year any adjustments that would have been assessed, unless the effects of the abnormal operating conditions, or factors, continue to impact the Company's performance in the following year(s).

# APPENDIX 16

#### <u>Corporate Structure, Affiliate Rules, and</u> <u>Miscellaneous Corporate Provisions</u>

#### 1.0 <u>Corporate Structure and Affiliate Rules</u>

#### 1.1 Definitions used in this document

UK HoldCo – the top-level holding company in the National Grid group. This is National Grid plc or its successor as the ultimate parent company.

US HoldCo – the immediate parent and holding company for National Grid's US Utility operations. This is National Grid USA or its successor.

As used in this Section 1.0, "HoldCo" refers to both UK HoldCo and US HoldCo. Where explicit reference to one of the HoldCos is required, the term "UK HoldCo" or "US HoldCo" will be used.

RegCo or Niagara Mohawk – means Niagara Mohawk Power Corporation or its successor. Niagara Mohawk Power Corporation is a wholly owned indirect subsidiary of US HoldCo and carries on regulated transmission and electric and gas distribution services.

ServiceCo – means National Grid USA Service Company, Inc. and National Grid Engineering & Survey Inc., or any successor(s) thereto, which provide a variety of traditional corporate and administrative services.

Unregulated Competitive Energy Affiliate(s) – means any of US HoldCo's current or future unregulated affiliates engaged in competitive energy markets in New York State, including but not limited to exploration and/or production, generation, distributed energy resources ("DER"), retail energy services, or HVAC services.

Unregulated Affiliate(s) – means any of US HoldCo's current or future affiliates engaged in competitive retail services that Niagara Mohawk contracts for or provides.

National Grid FERC Regulated Affiliates – means affiliates of HoldCo in New York that are exclusively regulated by the Federal Energy Regulatory Commission ("FERC").

National Grid Other Affiliates – means affiliates of HoldCo, including affiliates of Niagara Mohawk, but excluding National Grid FERC Regulated Affiliates, Unregulated Competitive Energy Affiliates, and Unregulated Affiliates.

# 1.2 <u>Rules Governing Affiliate Transactions</u>

#### 1.2.1 <u>Separation and Location</u>

RegCo, HoldCo, Unregulated Competitive Energy Affiliates, Unregulated Affiliates, National Grid FERC Regulated Affiliates, and National Grid Other Affiliates will each be operated as

separate entities and will maintain separate books and records of account. RegCo, HoldCo, ServiceCo, and National Grid Other Affiliates may occupy the same building. RegCo may also share premises with National Grid's affiliates engaged in regulated gas and/or electric transmission and/or distribution operations if such sharing provides for efficiencies in occupancy and use of resources. RegCo may not share a building with any Unregulated Competitive Energy Affiliates or Unregulated Affiliates.

#### 1.2.2 Board of Directors

A majority of the RegCo Board of Directors will be Eligible Directors. An Eligible Director is any individual who is not (i) an officer or director of HoldCo or (ii) an officer or director of any National Grid FERC Regulated Affiliate, or (iii) an officer or director of any Unregulated Competitive Energy Affiliate or Unregulated Affiliate. No member of the RegCo Board of Directors will also be an employee, officer, or director of any Unregulated Competitive Energy Affiliate or Unregulated Affiliate. No member of the RegCo Board of Directors will also be an employee, officer, or director of any unaffiliated competitive energy firm engaged in exploration and/or production, generation, DER, retail energy services or HVAC services in RegCo's service territory. No member of the RegCo Board of Directors will also be an employee, officer, or director of any unaffiliated firm engaged in competitive retail services that Niagara Mohawk contracts for or provides.

#### 1.2.3 Accounting Issues and Dividend Limitations

#### **1.2.3.1** Dividend Payments

Provided that the Dividend Restrictions set forth in Section 2 of the Financial Protections adopted in the Commission's March 28, 2008 Order in Cases 01-M-0075 and 06-M-0878 do not apply and subject to compliance with Section 1.2.3.2 below, Niagara Mohawk will be permitted to pay dividends in any year up to any amount permitted under applicable law.

#### **1.2.3.2** <u>Debt Limit</u>

For purposes of this Section 1.2.3.2, "Average Total Debt" is defined as an amount equal to (i) long-term debt, plus (ii) notes payable (including current maturities of long-term debt) appearing on Niagara Mohawk's consolidated balance sheet. "Average Total Capital" is defined as the sum of (i) Average Total Debt, (ii) common shareholder equity (excluding goodwill), and (iii) preferred stock. It is expected that, for any six-month period ending at the end of a quarter, Niagara Mohawk's Average Total Debt ratio will not exceed 55 percent of its Average Total Capital, excluding goodwill.

If the Company's Average Total Debt ratio does not exceed 55 percent for the most recent six or three month period ending at the end of a quarter, there will be no dividend restrictions. If the Company's Average Total Debt ratio exceeds 55 percent for both the most recent three and six month periods, but does not exceed 57 percent in the most recent three or six month period, then Niagara Mohawk will be permitted to pay dividends up to an amount equal to but no greater than 50 percent of its net income for the previous twelve months ending at the end of a quarter until its

Average Total Debt ratio for the most recent six month period ending at the end of a quarter is less than or equal to 55 percent. In addition, absent a Commission order to the contrary, if during both the most recent six and three month period ending at the end of a quarter, Niagara Mohawk's Average Total Debt ratio exceeds 57 percent, then the Company will not pay further dividends until the Average Total Debt ratio is reduced to 55 percent or less over the most recent six months ending at the end of a quarter.

#### **1.2.3.3** Bond Ratings and the Cost of Debt

If the bond rating of Niagara Mohawk falls below BBB- (Standard & Poor's) or Baa3 (Moody's), then the price of any long-term debt issued by Niagara Mohawk during the period of such reduced credit rating will be deemed, for the purpose of establishing revised electric or gas base delivery rates, to be the market price Niagara Mohawk would have incurred for issuance of the debt had the debt been issued by a BBB- (Standard & Poor's) or Baa3 (Moody's) utility at the same issue date, and any resulting difference in interest expense will be disallowed for ratemaking purposes. Niagara Mohawk's earnings sharing reports will reflect the actual debt rates outstanding for Niagara Mohawk. This provision completely supersedes Section 3 of the Financial Protections adopted in the Commission's March 28, 2008 Order in Cases 01-M-0075 and 06-M-0878.

#### 1.2.3.4 Debt and Equity Components Used for Ratemaking Purposes

The debt and equity components used to establish Niagara Mohawk's rates will be established in individual rate proceedings.

#### 1.2.3.5 Additional Financial Protections

Except for those noted as superseded herein, the Commission's financial protections in the terms and conditions of its (i) May 15, 2009 and July 29, 2009 Orders in Case 08-M-1352 and (ii) March 28, 2008 and May 29, 2008 Orders in Cases 01-M-0075 and 06-M-0878 continue in full force and effect.

#### 1.2.4 Cost Allocation and Audit

**1.2.4.1** Appropriate cost allocation procedures will be followed by HoldCo and its affiliates to assure the proper allocation on a fully distributed basis, to HoldCo, RegCo, or other affiliates of the costs of any HoldCo personnel, property or services used by RegCo or other affiliates of HoldCo.

**1.2.4.2** Any future revisions to cost allocation methodologies of ServiceCo will be filed with the Secretary of the Commission.

**1.2.4.3** The FERC carries out regular audits of ServiceCo. Such audits include examination of authorized cost allocation calculations and a review of internal audit policies, procedures and reports. DPS Staff will be invited to participate in such audits, in order to receive assurance that applicable transactions and/or allocations are being carried out in a

compliant fashion. DPS Staff will also receive copies of all reports issued to the Company by the SEC or FERC as a result of such audits.

**1.2.4.4** The Company will meet annually with DPS Staff to review all aspects of cost allocations and their application.

**1.2.4.5** If at any time the Company becomes aware of events likely to cause a reconsideration of or material change to cost allocations, it will advise Staff and arrange a meeting in order to consider those issues at that time.

# 1.2.5 <u>Transfer of Assets from or to RegCo</u>

Transfers of assets (or rights to use such assets) from RegCo to Unregulated Competitive Energy Affiliate(s) and Unregulated Affiliate(s) will be priced at the higher of book value or fair market value and will be subject to Commission approval, except as otherwise provided in Mutual Assistance Agreements. Transfer of assets (or rights to use such assets) from Unregulated Competitive Energy Affiliate(s) and Unregulated Affiliate(s) to RegCo will be priced at the lower of book value or fair market value. Transfer of assets (or rights to use such assets) between RegCo and National Grid FERC Regulated Affiliates will be at book value.

#### 1.2.6 <u>Transfer of Services</u>

The provision of corporate services will be subject to written contracts that, as applicable, identify the personnel, assets, and services that will be provided. The services will be provided on a fully loaded cost basis. The RegCo, HoldCo, ServiceCo, Unregulated Competitive Energy Affiliates, Unregulated Affiliates, National Grid FERC Regulated Affiliates, and National Grid Other Affiliates may be covered by common property/casualty and other business insurance policies. The costs of such policies will be allocated among the RegCo, HoldCo, ServiceCo, Unregulated Competitive Affiliates, Unregulated Affiliates, National Grid FERC Regulated Affiliates, and National Grid Competitive Affiliates, unregulated Affiliates, National Grid FERC Regulated Affiliates, and National Grid Other Affiliates in an equitable manner.

#### 1.3 <u>Human Resources</u>

# 1.3.1 <u>Separation of Employees and Officers</u>

RegCo will have separate employees from Unregulated Affiliates and Unregulated Competitive Energy Affiliates. Operating officers (*i.e.*, those officers providing other than corporate services) of RegCo will not be operating officers of any of the Unregulated Affiliates and Unregulated Competitive Energy Affiliates. Operating officers of RegCo that engage in legal or policy advocacy before FERC or the Commission will not be officers of National Grid FERC Regulated Affiliates. Other RegCo officers, such as Information Technology and Human Resource officers or their supervisors, may be officers of National Grid FERC Regulated Affiliates. An officer of HoldCo may not be an officer of both RegCo and an Unregulated Affiliate or Unregulated Competitive Energy Affiliate. No RegCo employee or officer will also be an employee, officer or director of any unaffiliated competitive energy firm engaged in the exploration or production, generation, retail energy services, DER, or HVAC services in RegCo's service territory. No RegCo employee or officer will also be an employee, officer or director of any unaffiliated firm engaged in competitive retail services that Niagara Mohawk contracts for or provides.

#### 1.3.2 <u>Employee Transfers</u>

**1.3.2.1** If a RegCo employee accepts a position with an Unregulated Affiliate or Unregulated Competitive Energy Affiliate, he or she will be required to resign from RegCo unless there is a conflict with the collective bargaining agreement in which case the collective bargaining agreement would control. Any such employee will be prohibited from copying or taking any non-public customer or competitively sensitive market information from RegCo.

**1.3.2.2** Employees may be transferred from RegCo to an Unregulated Affiliate or Unregulated Competitive Energy Affiliate. Transferred employees may not be reemployed by RegCo for a minimum of one year after transfer. Employees transferring or returning to RegCo may not be transferred again to an Unregulated Affiliate or Unregulated Competitive Energy Affiliate for a minimum of one year. RegCo will file annual reports to the Commission showing transfers between RegCo and Unregulated Affiliates or Unregulated Competitive Energy Affiliates by employee name, former company, former position, new company, new position, and salary or annualized base compensation. There will not be any temporary employee transfers between RegCo or US HoldCo and any Unregulated Affiliates.

**1.3.2.3** Except as provided in this Section 1.3.2, employees also may be transferred from RegCo to HoldCo, to a National Grid FERC Regulated Affiliate and/or any National Grid Other Affiliate (and vice-versa) without restriction.

#### **1.3.3** Employee Loans in an Emergency

The foregoing provisions in no way restrict any affiliate from loaning employees to RegCo to respond to an emergency that threatens the safety or reliability of service to customers.

# 1.3.4Compensation for Transfers to Other than a Transmission or<br/>Distribution Company

A one time employee transfer credit equal to 25 percent of the employee's annual salary will be applied to the deferral account for each transfer from RegCo to any Unregulated Competitive Energy Affiliate.

#### **1.3.5 Employee Compensation and Benefits**

The compensation of RegCo employees and officers may not be tied to the financial and/or stock performance of any Unregulated Competitive Energy Affiliate or National Grid Other Affiliate, but may be tied to the financial performance of HoldCo and stock performance of UK HoldCo.

Employees of HoldCo, RegCo, Unregulated Affiliates, Unregulated Competitive Energy Affiliates, National Grid FERC Regulated Affiliates, and National Grid Other Affiliates may participate in common pension and benefit plans.

#### 1.3.6 Legal Representation

RegCo will have its own senior counsel, who shall not be shared with any Unregulated Affiliate or Unregulated Competitive Energy Affiliate and whose primary responsibility is RegCo. The same law firm may represent RegCo and any affiliate on any matter other than transactions between RegCo and that affiliate. On any matter not involving such an intracorporate transaction in which the interests of RegCo may be adverse to the interests of an affiliate, RegCo will take appropriate steps to ensure that RegCo's interests are vigorously and independently protected (such steps, by way of example and not limitation, could include having separate attorneys if a single law firm is used and creating an ethical wall as an information barrier between such attorneys to avoid any potential conflict of interest). With respect to all matters handled by outside counsel, HoldCo and its affiliates will instruct outside counsel to take all reasonable steps to ensure that non-public customer and competitively sensitive information in the possession of RegCo is not communicated to an affiliate.

# 1.4 Access to Books, Records and Reports

DPS Staff will have full access, on reasonable notice, and subject to resolution of confidentiality and privilege (*e.g.*, attorney client, attorney work product, self critical) issues, to: 1) the books and records of UK HoldCo and of the US HoldCo and its majority owned subsidiaries; and 2) the books and records of all other HoldCo subsidiaries or affiliates, in English, to the extent necessary to audit and monitor any transactions that have occurred between the RegCo and such subsidiaries or affiliates. Such access to books and records will be provided at the Company's Syracuse headquarters, provided however, that if such access is not practicable, access will be provided at whatever reasonable location the Company deems appropriate at the Company's expense.

DPS Staff currently receive copies of a number of internal utility documents. It is the Company's intention in the future to continue to provide information with a similar scope and content to that currently provided. However, the Company may wish to modify the form and/or content of its internal documents from time to time. In such cases the Company will discuss and agree with Staff the ongoing information requirements and the most appropriate way for them to be met in the future.

# 1.5 <u>Reporting</u>

Annually, RegCo will file reports on: transfers of assets, cost allocations, employee transfers and employees in common benefit plans. Quarterly, US HoldCo will file a list of all National Grid's SEC filings with the Commission.

#### 1.6 <u>Standards of Competitive Conduct</u>

The following standards of competitive conduct shall govern RegCo's relationship with any Unregulated Competitive Energy Affiliates, Unregulated Affiliates, or National Grid Other Affiliates, in addition to any already covered by the Commission's rules governing Uniform Business Practices.

#### **1.6.1** Use of Corporate Name and Royalties

There are no restrictions on any affiliate using the same name, trade names, trademarks, service names, service marks or a derivative of a name of the HoldCo or RegCo, or in identifying itself as being affiliated with the HoldCo or RegCo. However, no non-National Grid company will be allowed to use the same name, trade names, trademarks, service names, service marks, or a derivative of a name of RegCo in any manner, except for the purposes of assisting with the marketing of Commission approved energy efficiency programs.¹ Further, no non-National Grid company will be allowed to use the same name, trade names, trademarks, service names, service marks, or a derivative of a name of HoldCo in New York State for a period exceeding six months, provided that such use will be limited to the situation where National Grid has sold the relevant business (or the assets of the business) and restricted to (i) use of the National Grid logo during the pendency of the transition to new ownership (e.g., vehicle and facility signage) and (ii) educating customers about the sales transaction and the impacts on customers. During that six month period, DPS Staff will be given the opportunity to preview any communication using National Grid's name or logo that is to be sent from a non-National Grid company to National Grid's utility customers in New York. DPS Staff may, in the exercise of reasonable discretion, reject any customer communication it deems not in compliance with this section by providing National Grid with written notice of its specific objections. A communication will be deemed acceptable unless DPS Staff objects in a writing received by the Company within five business days of Staff's receipt of such communication from National Grid. DPS Staff and the Company will work collaboratively to resolve any disagreement as to the content of the communication.

#### 1.6.2Sales Leads

RegCo will not provide sales leads involving customers in its service territory to any affiliate or non-affiliated companies without the advanced permission of the Commission.

#### 1.6.3 <u>Customer Inquiries</u>

If a customer requests information about securing any service or product offered by energy services companies ("ESCos"), the RegCo may provide a list of all known ESCos operating in the area, which may include its Unregulated Competitive Energy Affiliate(s).

# 1.6.4 <u>Customer Information</u>

¹ The exception for the use of same name, trade names, trademarks, service names, service marks, or a derivative of a name of RegCo for the purposes of assisting with the marketing of Commission approved energy efficiency programs is in accordance with the Order Granting Waiver issued in Case 19-G-0690 on May 15, 2020.

Except for purposes of complying with applicable statutes, regulations, and orders, RegCo will not disclose to any Unregulated Competitive Energy Affiliate(s), Unregulated Affiliate(s), or nonaffiliates any customer information about its electric and gas businesses that may provide a competitive advantage in the electric or gas markets. Customer information includes, but is not limited to, confidential information that RegCo receives from a customer, prospective customer, or marketer that is not available from sources other than RegCo, unless RegCo makes such information available to all competitors on an equal basis.

RegCo will restrict access to customer information to only those employees of RegCo, or affiliates or non-affiliates whose functions require that they have access to such information. Such employees will be instructed to maintain the confidentiality of such information.

#### 1.6.5 No Advantage Gained by Dealing with Affiliate

**1.6.5.1** RegCo will refrain from giving any appearance that RegCo speaks on behalf of an affiliate or that an affiliate, other than ServiceCo, speaks on behalf of the RegCo. RegCo will not participate in any joint promotion or marketing with its Unregulated Competitive Energy Affiliates or Unregulated Affiliates.

**1.6.5.2** RegCo will not represent to any customer, supplier, or third party that an advantage may accrue to such customer, supplier, or third party in the use of the RegCos services as a result of that customer, supplier, or third party dealing with any affiliate.

**1.6.5.3** RegCo's affiliates will not represent to any customer, supplier, or third party that an advantage may accrue to such customer, supplier, or third party in the use of the RegCo's services as a result of that customer, supplier, or third party dealing with that affiliate.

**1.6.5.4** RegCo will not cross-subsidize National Grid FERC Regulated Affiliates or any Unregulated Competitive Energy Affiliate(s) or Unregulated Affiliate(s).

**1.6.5.5** Release of proprietary customer information relating to customers within the RegCo's service territory will be subject to prior authorization by the customer and subject to the customer's direction regarding the person(s) to whom such information may be released. If a customer authorizes the release of information to a RegCo affiliate and one or more of the affiliate's competitors, RegCo will make that information available to the affiliate and such competitors on an equal basis.

**1.6.5.6** RegCo will not disclose to its affiliates any customer or marketer information relative to its service territory that it receives from a marketer, customer, or potential customer that is not available from sources other than RegCo, unless it discloses such information to its affiliates' competitors contemporaneously on an equal basis to the extent practicable.

**1.6.5.7** RegCo will use competitive bidding practices or standard offers to purchase DER until such time as the Commission determines otherwise. If a RegCo affiliate participates in a competitive bidding process for DER procurement, RegCo will engage an independent party to monitor the DER procurement selection process.

**1.6.5.8** These provisions do not restrict the use of the name of HoldCo or RegCo as set forth in Section 1.6.1.

### 1.6.6 <u>No Rate Discrimination</u>

All similarly situated customers, including ESCos and customers of ESCos, whether affiliated or unaffiliated, will pay the same rates for the RegCo's utility services, including those applicable to interconnections and dispatch. If there is discretion in the application of any tariff provision, RegCo must not offer its affiliate more favorable terms and conditions than it has offered to all similarly situated competitors of the affiliate. Should RegCo provide to an ESCo or a customer of an ESCo, whether affiliated or unaffiliated, a delivery, billing, metering, or other service set forth in its tariff or associated operating procedure, at a discounted or negotiated rate or pursuant to a special arrangement, RegCo will expeditiously post on its website the information that the Commission requires a utility to file in association with providing a discounted or negotiated rate or special arrangement, subject to the Commission's trade secret rules, if applicable, in the same manner and within the same time period for affiliates and non-affiliates.

#### 1.7 <u>Annual Meeting</u>

Senior management of RegCo and US HoldCo will meet annually with senior Commission Staff to discuss the Company's plans related to capital attraction and financial performance.

#### 1.8 Training and Certification/Adherence to Standards

**1.8.1** US HoldCo and RegCo will conduct training on these principles for officers, directors, and senior managers. On an annual basis, designated officers should provide certification to the Commission of the Company's adherence to these standards.

**1.8.2** Additionally, all RegCo employees will receive annual training on Section 1.6, Standards of Competitive Conduct, to include the types of information that may or may not be shared and RegCo policies and procedures restricting information sharing, with verification that such training has been completed.

**1.8.3** If the Commission at any time makes a finding that it believes that compliance with these provisions has been lacking the Commission can order RegCo to pay for an independent auditor review of all applicable transactions and/or allocations.

#### 1.9 <u>Commercialization of Products and Technologies Developed as a</u> <u>Result of Research and Development</u>

The Company's affiliates may invest in commercialization of R&D products and technologies developed by RegCo consistent with its affiliate rules. If an affiliate elects to invest, it will fairly compensate RegCo, assume the business risk(s) and will be entitled to the benefits associated with that investment.

#### 1.10 Dispute Resolution

If any competitor, whether an affiliated or non-affiliated company, or customer of RegCo, believes that RegCo has acted in violation of Section 1.2, Rules Governing Affiliate Transactions, and/or Section 1.6, Standards of Competitive Conduct, such competitor or customer may provide RegCo with a written notice of the complaint. RegCo will respond to any such complaint within twenty (20) business days after receipt of the complaint. Within fifteen (15) business days after responding to such complaint, the parties will meet in an attempt to resolve the matter informally. If the parties do not meet or are not successful in resolving the matter informally, then the complainant may refer the matter to the Commission for disposition within fifteen (15) business days of such meeting. The Commission will maintain continuing jurisdiction over Section 1.2, Rules Governing Affiliate Transactions, and Section 1.6, Standards of Competitive Conduct. This dispute resolution process will also be posted on RegCo's website.

### 2.0 <u>Miscellaneous Corporate Provisions</u>

# 2.1 <u>Monthly Deferral Submittal</u>

A monthly update of the deferral account balances for Niagara Mohawk's deferral accounts will be provided electronically to DPS Staff as close as possible to the 15th day of the following month, but in any event no later than the 21st day of the month following closing. The monthly updates will: contain page referenced summaries, include adequate and legible backup support; the pages will be numbered, and provide the name of the Company personnel responsible for each journal entry.

# 2.2 <u>Reports</u>

**2.2.1** Niagara Mohawk will provide designated audit Staff with monthly general ledger reports, monthly financial report(s), and journal entries, as close as possible to the 15th day of the following month, but in any event no later than the 21st day of the month following closing.

**2.2.2** Niagara Mohawk will provide designated audit Staff other reports on a timely basis. These reports include: Board of Director minutes, Commodity Adjustment Clause ("CAC") monthly filing, Transmission Revenue Adjustment Clause ("TRAC") monthly filing, PSC filings made by the Company, SEC filings, monthly budget variance reports, and financial performance reports. Supporting documentation for the filed CAC and TRAC amounts

will also be provided. Niagara Mohawk and Staff will meet semiannually in May and November to review the population of reports being provided and to modify the reports in a manner that may be agreed upon. Niagara Mohawk agrees to provide a weekly IR status log to designated audit Staff.

# 2.3 PSC Annual Report

Niagara Mohawk is authorized to delay its filing of its PSC Annual Report to June 1 of each calendar year.²

# 2.4 <u>Timely Correction of Errors and Adjustments</u>

When the Company finds an error on the Company's books of account regulated by the Commission or agrees to an adjustment proposed by Staff, a journal entry correcting the error or making the adjustment (the "Correction") will be made. Where practicable, the journal entry will be made during the month of the determination that the Correction was required. To the extent that a journal entry cannot be made before the close of the month in which the Correction was acknowledged and the Correction affects an entry in an account included in the Company's monthly deferral submittal, the Company will note the pending journal entry in that monthly submittal, together with a brief description of the Correction. In any event, the Company will make a journal entry reflecting the Correction within three months.

# 2.5 Adjustments to Billing Loading Factors

Niagara Mohawk will adjust third-party job order billings loading factors no more than twice each year (in April and September), provided however, that, in addition, Niagara Mohawk may adjust such loading factors at any other time in the event there is a change in such loading factor (whether positive or negative) of greater than 20 percent. The April adjustment will also include any adjustment necessary to reconcile the loading factors used during the prior period to actual amounts. Further, the Company will follow the same method for capitalizing fringe benefits into its construction costs, subject to Section 1 of Appendix 9, Electric and Gas Pension and OPEB Expense Provisions.

# 2.6 Internal Audits of Deferral Accounts

For each fiscal year, Niagara Mohawk will conduct internal audits on at least two different deferral accounts until otherwise ordered by the Commission. When Niagara Mohawk develops its internal audit plan, it will advise on-site Staff which deferral accounts will be audited in the upcoming fiscal year. If Niagara Mohawk proposes to audit the same deferral account in two consecutive years, Niagara Mohawk will discuss this with Staff and advise Staff of the basis for the consecutive audits. Prior to conducting each internal audit of a deferral account, Niagara Mohawk's internal audit department will interview designated audit Staff to identify potential areas of concern with respect to the eligibility of costs or revenues in that account for deferral.

 $^{^2}$  To the extent available, the Company agrees to provide DPS Staff unaudited financial information after April 30.

### 2.7 Journal Entry Support

Niagara Mohawk will include with each journal entry provided to designated audit Staff a summary explanation of the purpose of the journal entry and documentation supporting and, if needed, detailing the calculations of the amounts charged to the various accounts shown.

#### 2.8 <u>Goodwill Not Recovered in Jurisdictional Rates</u>

Niagara Mohawk will not recover any portion of the \$1.215 billion in goodwill recorded in connection with the acquisition of Niagara Mohawk by National Grid, as shown in Attachment 8 of the Stipulation of the Parties dated March 27, 2007 in Case 01-M-0075 et al., in any rates regulated by the Commission during or after the period covered by the Merger Joint Proposal. In addition, no portion of such goodwill will be included in the equity component of Niagara Mohawk's capitalization for purposes of calculating Niagara Mohawk's return, future revenue requirements or any other component of such rates after the period covered by the Merger Joint Proposal.

#### 2.9 Resolution of Nine Mile Sale Compliance (Case No. 01-E-0011)

With the exception of accounting resolved by Sections 7.1 - 7.4 of the Stipulation of the Parties, dated March 27, 2007 in Case 01-M-0075 *et al.*, nuclear-related costs or receipts that were unknown or unknowable at the time of the sale of the nuclear assets (for example, the results of sales tax audits, NEIL refunds, etc.) will be governed by precedent established in Case 01-E-0011 or Case No. 01-M-0075. Any adjustments resulting from any such historic or prospective costs or receipts shall be subject to audit by DPS Staff.

# 2.10 **Operations in New York**

Niagara Mohawk will notify the Commission prior to implementing any significant changes to the location(s) and/or means of delivery of services, including emergency response, associated with its customer service functions. Further, Niagara Mohawk's corporate headquarters will be maintained in Syracuse, New York. Niagara Mohawk also agrees that senior management responsible for day-to-day electric and gas operations in New York will maintain offices in New York State. To achieve customer service and reliability objectives, Niagara Mohawk agrees to maintain a level of workforce in New York that, in its view, is sufficient to achieve these objectives and to utilize all other necessary resources, including but not limited to, internal and external human resources, and investments in plant and technology.

# APPENDIX 17

#### **Electric Capital Reporting Requirements**

The Company will provide quarterly and annual capital reports on a Fiscal Year basis as follows:

- (i) Annual Transmission and Distribution Capital Investment Plan (commonly referred to as the Five-year CIP) filed annually, which will include:
  - a. The Company's projected five-year capital investment plan on the electric transmission, sub-transmission and distribution system.
  - b. Details on major projects¹ including:
    - i. Annual investment amounts for the period covered by the plan.
    - ii. Primary investment drivers and customer benefits.
    - iii. Schedules.
  - c. The Five-year CIP will be filed with the Secretary annually by January 31.
- (ii) Annual Capital Investment Plan Quarterly Report, filed quarterly, which includes the following:
  - a. Budget variance reports (actual spending vs. approved annual budget for total electric delivery system capital investment, and segregated by transmission, sub-transmission, and distribution).
  - b. For "major" projects:
    - i. Budget changes or project cost overruns that require management approval.
    - ii. Schedule changes (and reasons for changes) for major projects.
  - c. For completed projects:
    - i. Comparison of initial budget vs. actual capital expenditures.
    - ii. Comparison of projected vs. actual in-service date.

¹ "Major" projects are individual distribution or sub-transmission projects with spend of more than \$1 million in any fiscal year, and individual transmission projects with spend of more than \$1 million overall.

- d. Climate Leadership and Community Protection Act Phase One projects²
   will be included in the Quarterly reports regardless of the level of spending or status.
- e. On or about the date of each Quarterly report filing, the Company will submit to Staff copies of all sanction papers approved for major projects during the relevant quarter and any supporting workpapers.
- Each Quarterly report will be filed 45 days following the end of each Fiscal Year quarter.
- (iii) Distributed System Implementation Plan, filed every other year, in accordance with Commission orders issued in Cases 14-M-0101 and 16-M-0411.
- (iv) Report on Conditions of Physical Elements of Transmission and Distribution Systems (also known as the Asset Condition Report) filed every other year, and in the same year in which the Company files its Distributed System Implementation Plan. The Report will continue to relate inspection findings, testing and monitoring of the Company's transmission, sub-transmission, and distribution systems to the capital plan. The Asset Condition Report will be filed by October 1 in the year it is filed.
- (v) 15-Year System Plan, filed every other year, in the opposite years in which the "Report on Conditions of Physical Elements of Transmission and Distribution Systems" is filed. The report will continue to provide:
  - a. Short term (0 to 5 years), medium term (6 to 10 years) and long term (11 to 15 years) strategic plans.
  - b. Link company objectives to the strategic plans.
  - c. Identify key drivers and influences on planning.

The 15-Year System Plan will be filed by December 31 in the year it is filed.

² As outlined in the Order on Phase 1 Local Transmission and Distribution Project Proposals issued February 11, 2021 in Case 20-E-0197.

CASES 20-E-0380 and 20-G-0381

SUBJECT: Filings by NIAGARA MOHAWK POWER CORPORATION D/B/A NATIONAL GRID Amendments to Schedule P.S.C.
