Features:

Alterations:

Physical Description: The Gilbert Young Farmstead is a 97.2-acre agricultural property with a two-story Greek Revival–style farmhouse, several agricultural outbuildings, and formal garden. The farmhouse is built on a gable-and-wing plan, with a front-gabled wing extending south from the rear of the side-gabled wing of the primary volume and a single-story enclosed porch that spans the west

New York State Trekker Inventory Form

Report Created: August 08, 2024

Physical elevation. The residence has a stone foundation, wood clapboard siding, and an asphalt shingle roof with cornice returns. The primary entrance is a wood door with a glass panel, and it is flanked by one window to the west and two windows to the east, all of which are sheltered by a partial porch that spans the side-gabled wing and features a flat roof supported by square columns. Each corner of the residence has an engaged column with a capital that is incorporated into the wide frieze band that surrounds the building at the second story and contains horizontal openings with decorative metal grills. The fenestration is characterized by two-over-two single-hung windows with wood trim entablatures. There are brick chimneys on the west and east elevations of the primary volume and the west elevation of the rear wing, which also has a partial porch on its east elevation. The property also includes three single-story agricultural outbuildings with a front-gabled roof, a single-story garage with a side-gabled roof, a one-and-one-half-story barn with a front-gabled roof, a two-and-one-half-story bank barn with a side-gabled roof, and a single-story outhouse. All of the outbuildings have asphalt shingle roofs but the two larger barns, which have sheet metal roofs. Much of the barnyard is occupied by a formal garden divided into three geometric sections.

Architect(s)/Buil

Statement of Significance: The Gilbert Young Farmstead was established by Gilbert Young, who moved to the area in 1802, was one of the Town of Venice's founders, and built the second grist mill in town. At the time of the 1853 map of Cayuga County, the property belonged to Gilbert's son, Phineas, and it had been acquired by Elihu Slocum by 1875. The property remains in agricultural use

New York State Trekker Inventory Form

Report Created: August 08, 2024

Statement of Significance: and retains its integrity of location, setting, association, design, materials, and feeling. It appears to meet National Register Criterion A in the area of Agriculture for its role in the development of the Town of Venice's agricultural economy, as well as Criterion C in the area of Architecture as an intact example of a nineteenth-century farmstead with a Greek Revival-style farmhouse.

Physical Description: The John Stoyell Residence is a two-story Federal-style residence with a side-gable configuration and a single-story wing that extends to the north. The primary volume's façade is three bays wide; at the first story, the center bay contains the primary (non-historic) entrance with sidelights, a decorative surround, and a broken pediment, and each of the two side bays has two

New York State Trekker Inventory Form

Report Created: August 08, 2024

Physical Description: windows. Fenestration is characterized by one-over-one double-hung windows with modest wood trim. A porch with modest support columns spans the addition's façade and wraps around to cover half of its north elevation. Three chimneys, two of brick and one of concrete block, extend past the primary volume's low-pitched sheet metal roof, while the addition's roof contains a skylight on the eastern half. The property also contains a one-and-one-half-story side-gable barn with vertical wood clapboard, varied fenestration, and a sheet metal roof.

SIGNIFICANCE/HISTORY

Approx. Date 1750-1819

**Range of
Construction:**

**Specific Date of
Construction (if
known):**

Architect(s)/Buil

Statement of Significance: The John Stoyell Residence was constructed in the early nineteenth century by the Town of Moravia's first non-Native settler, John Stoyell. According to Storke's History of Cayuga County, Stoyell was economically and socially active throughout the area and contributed to the area's initial economic growth. His son, John Stoyell, Jr., inherited the residence after his father's death in 1842. He organized the local temperance society and was an abolitionist who aided and reportedly housed freedom seekers, which suggests the residence has a connection to the Underground Railroad. When the residence was surveyed and photographed in 1977, the primary entrance was located in the northernmost bay of the primary elevation and the center bay contained a tripartite window. Although the exterior has been significantly altered, the residence appears to meet National Register Criterion A in the areas of Social History and Exploration/Settlement for its association with the Abolitionist movement and Underground Railroad and with the early history of Moravia, respectively.

Alterations:

Physical Description: The Wolsey Residence is a two-and-one-half-story Italianate-style residence on a corner lot. The brick building has a stone foundation and a hipped asphalt shingle roof with wide eaves and a clapboard-clad cupola near the center. The primary volume is three bays wide and four bays deep, with the façade facing west onto North Main Street. A two-story addition, two bays

New York State Trekker Inventory Form

Report Created: August 08, 2024

Physical Description: wide on each side, extends from the two central bays of the primary volume's south elevation. The primary entrance is in the south bay of the primary volume's façade and set within a wood surround that features sidelights and a transom. The north bay of the addition's façade contains a secondary entrance that is simpler and features only a transom. A porch with decorative square support columns and a low-pitched double-hipped roof shelters the southern two bays of the primary volume's façade and the entire façade of the addition; although the roof is contiguous, the deck is split in two, thereby making the porch two porches in effect. The fenestration is characterized by two-over-two single-hung windows with bracketed stone sills and ornamental brick pseudo-three-centered-arch lintels. A belt course of denticulated brick surrounds the residence above the second story. The half story between the belt course and the roof features paired decorative brackets flanking each bay, which contains a rounded-arch window.

Architect(s)/Buil

Statement of Significance: The Wolsey Residence is a mid-nineteenth-century Italianate-style residence with a notable degree of detail. Based on historic maps, it was constructed between 1859 and 1875. In the 1875 map of the Village of Moravia, the house is identified as the residence of W.G. Wosley, who was a local carriage manufacturer. The residence retains integrity of location, setting, design, materials, association, and feeling. It is a contributing resource to the S/NRHP-Listed North Main Street Historic District and appears to meet National Register Criterion C individually in the area of Architecture as a representative example of a relatively sophisticated Italianate-style residence in the Village of Moravia.

Architect(s)/Buil

Statement of Significance: The Whitten Farmstead was established in the early nineteenth century by Benjamin Whitten (1791-1846), one of the earliest non-Native settlers in the Town of Venice. After his death, his son of the same name inherited the property and remained there until his death in 1880. The 1904 map of Cayuga County identifies R. Parmley as the property's owner, and the property was then known as Creek View. The property retains its integrity of location, setting, design, materials, and feeling. Therefore, it appears to meet National Register Criterion C in the area of Architecture as a representative example of a nineteenth-century farmstead with a Greek Revival-style farmhouse in the Town of Venice.

886 NY-34, Genoa

USN:

Property Name: Main Farmstead

Historic Property

Name:

Address: 886 NY-34

Municipality: Genoa

County: Cayuga

Zip: 13071

Parcel ID: 228.00-1-55.21

Lat/Long: 42.6560, -76.5254

DESCRIPTION

Current Use: Domestic

Historic Use: Domestic, Agriculture/Subsistence

Materials: <Foundation> - Stone, Concrete <Walls> - Synthetics <Roof> - Asphalt

Architectural Italianate

Classification:

Outbuildings / Barn

Landscape

Features:

Alterations:

Physical Description: The Main Farmstead is a 5.7-acre former agricultural property that has a two-story Italianate-style farmhouse and a barn complex. The farmhouse has an irregular footprint characterized by a two-bay-wide, three-bay-deep main volume with an equal-sized volume offset one bay to the south and east and a rear wing with its gable end facing east and a two-car garage

New York State Trekker Inventory Form

Report Created: August 08, 2024

Physical Description: opening on the south. The residence has a stone foundation, vinyl siding, and asphalt shingle roofs. The main volume's hipped roof features a hexagonal cupola. The primary entrance is in the west bay of the main volume's façade and features a set of double doors beneath a bracketed portico with a denticulated cornice. There is a secondary entrance on the west elevation of the ell formed by the main volume and south volume; it has a single door with two rounded-arch lights that has modest wood trim and is sheltered by a partial porch that occupies the ell space in the residence's southwest corner. This porch has a hipped roof, columns, and decorative trim along the cornice and between the columns. The west half of the south elevation of the south volume contains a full-height bay window whose cornice and roof are integrated into those of the entire residence. Fenestration is characterized by paired or single one-over-one double-hung windows with modest wood trim, entablatures, and flanking shutters. Above the second story, decorative brackets support the wide eaves. The barn complex is comprised of two perpendicular barns, each with their own additions, that have been extended to form an L. The two historic barns that have been connected have parged concrete foundations, vertical board siding, sheet metal roofs, sliding barn doors on their façades, and few window openings. Extending from the larger barn's north gable end is a single-story saltbox barn with barn doors on the north and west elevations, vertical metal siding, and a metal roof. A single-story shed-roofed pole barn extends south from the south elevations of both historic barns.

SIGNIFICANCE/HISTORY

Statement of The Main Farmstead was established in the mid-nineteenth century and first

New York State Trekker Inventory Form

Report Created: August 08, 2024

Significance: appears on the 1875 map of the Town of Genoa as the property of Amos Main (1824-1909), who is identified as the owner of the house across the road in the 1859 map, having acquired it sometime after 1853. Keeping both properties, Main built several agricultural buildings, and by the time of the 1904 map, the cluster of buildings on either side of the road was known as Willow Brook Dairy. Today, the Main Farmstead only includes the buildings on the east side of the road and only 5.7 acres of land, and it has lost some of its historic materials. However, the property retains its integrity of location, setting, design, association, and feeling. It appears to meet National Register Criterion C in the area of Architecture as a representative example of a former farmstead with an Italianate-style farmhouse and barns.

Physical Description: Mosher Store is a two-story Greek Revival-style commercial building on the southeast corner of the primary intersection of the hamlet of Poplar Ridge. The primary entrance is in the north bay of the west gable end and is a multi-panel wood door with six lights, set within a modest wood surround. The rest of this façade's first story is occupied by a garage door with multiple

New York State Trekker Inventory Form

Report Created: August 08, 2024

Physical lights and wood panels. A full-width wood awning with a sheet metal roof, supported by three metal wires anchored to the second story, shelters the first story of the façade. Fenestration varies and includes one-over-one double-hung, two-over-two single-hung, nine-light fixed, and eight-light fixed windows. Based on the difference in siding, the large first-story window in the center of the north elevation appears to have previously been an entrance. The west bay of the north elevation's second story has a door that extends beyond the roof line and is contained within a gabled dormer. A metal fire escape extends from the building beneath this door. A brick chimney in the west half of the north elevation extends beyond the roof, which has an unadorned frieze band and cornice returns.

Architect(s)/Buil

Statement of The Greek Revival–style Mosher Store is located on the central intersection of the hamlet of Poplar Ridge and has played a central role in the hamlet's development since its construction. The store is on the site of the hamlet's first store, built by Jethro Wood in about 1800. Storke's History of Cayuga County claims that the present store used the timbers from Wood's store, and that William Mosher bought the store in 1820. The building passed between various members of the Mosher family and other members of the community several times until George Mosher bought the store from William Sprague in 1859; from that point, the store remained within the Mosher family until at least 1904. The building has undergone some major alterations, especially to the west façade, and it appears to have lost its commercial function. However, it retains its integrity of location and setting, as well as most of its integrity of materials. It therefore appears to meet

New York State Trekker Inventory Form

Report Created: August 08, 2024

Statement of Significance: National Register eligibility criteria as a contributing resource to the proposed Poplar Ridge Historic District under Criterion A in the area of Community Planning and Development for its association with the commercial development of Poplar Ridge, as well as under Criterion C in the area of Architecture as an example of a Greek Revival – style commercial building.

Architect(s)/Buil

Statement of Significance: Hazard Library is located at the central intersection of the hamlet of Poplar Ridge, on the site of a hotel that operated throughout the nineteenth century. The 1904 map of Poplar Ridge indicates that the current Hazard Library building was already constructed on the site by 1904. It was deemed eligible for the National Register in 2018 (USN 01108.000070). The building retains its integrity of location, setting, design, and materials. Thus, it appears to meet National Register Criterion C as an extant example of a Neoclassical-style public building in the Town of Venice. It is also a contributing resource in the proposed Poplar Ridge Historic District.

Architect(s)/Buil

Statement of Significance: The Italianate-style octagonal residence at 2599 NY-34B may be identified in the 1853 map of Cayuga County as the property of S. Young, but it is not definitively clear. It is, however, clearly identified in the 1875 map as the property of a Mrs. Smith. It retains its integrity of location, setting, design, materials, and feeling. Thus, the residence appears to meet National Register Criterion C in the area of Architecture as a rare extant example of an Italianate-style octagonal residence in Cayuga County. It should also be noted for its cobblestone foundation. Additionally, the residence is a contributing resource to the proposed Poplar Ridge Historic District.

Alterations:

Physical Description: Ashland Farm is a 172.3-acre agricultural property with a two-story Italianate-style farmhouse and several agricultural buildings. The farmhouse is essentially five bays square, with a one-bay-wide and three-bay-deep indent along the north elevation, thereby forming an L-shaped footprint. The farmhouse has a stone foundation, vinyl siding, and an asphalt shingle

New York State Trekker Inventory Form

Report Created: August 08, 2024

Physical Description: double-hipped roof. The primary entrance is in the center bay of the façade and features a set of double doors flanked by vertical siding. A partial porch with square corner columns supporting the roof, which is integrated to the bay windows on either side of the façade, shelters the primary entrance. Fenestration is characterized by one-over-one windows with modest trim and wood sills. Paired corbels support the wide eaves. There is a secondary entrance on the north elevation of the single-story side-gabled garage that extends from the east elevation of a small addition in the main volume's northeast corner. Agricultural buildings include a large side-gabled bank barn with a stone foundation and vertical board siding, and various sizes and styles of metal pole barns.

SIGNIFICANCE/HISTORY

Approx. Date 1860-1889

**Range of
Construction:**

**Specific Date of
Construction (if
known):**

Architect(s)/Buil

Statement of Significance: The Ashland Farm farmhouse and side-gabled barn were constructed in the second half of the nineteenth century, and the pole barns date from the late twentieth and early twenty-first centuries. Though the property is now known as Ashland Dairy, it was known as Ashland Farm in 1904, as indicated by the county map of that year. The farmhouse has lost integrity of materials due to the introduction of vinyl siding and windows, and the banked barn appears to be the only surviving period agricultural building. The construction of multiple large cow barns in the late twentieth and/or early twenty-first century has altered the setting of the farmhouse and historic barn. Therefore, the property does not appear to meet National Register eligibility criteria.

Statement of The Howland Cobblestone Store was constructed in 1837 and is listed in the
Significance: S/NRHP under Criterion C in the area of Architecture as an example of
cobblestone commercial architecture. It meets the registration requirements
set forth in the Cobblestone Architecture of New York State multiple property
documentation form as one of about 20 extant commercial cobblestone
buildings in New York State.

Outbuildings / Barn,Garage_or_Carriage_House

Landscape

Features:

Alterations:

Physical Description: Pettit Farmstead is a 99-acre agricultural property with a two-story Italianate-style farmhouse and several outbuildings sited on a wedge-shaped lot formed by the forked intersection of Ridge Road and NY-34B, with most of the acreage across Ridge Road to the west. The farmhouse faces south and is comprised of a three-bay-square two-story

New York State Trekker Inventory Form

Report Created: August 08, 2024

Physical Description: main volume with a single-story enclosed porch spanning most of the east elevation and a series of additions extending to the west and north. The primary entrance is recessed into the west bay of the south façade and features sidelights, an elliptical transom light, and decorative trim surround with pilasters. A partial porch spans the south elevation of the west addition and has a shed roof and vinyl columns and railings. The enclosed porch on the east elevation of the main volume has a hipped roof and screens rather than windows. Fenestration throughout the residence is characterized by six-over-six windows with modest wood trim, headers, and shutters. Paired corbels support the eaves of the residence's double-hipped roof, which is topped by a cupola with a pyramidal roof and a set of paired rounded-arch windows on each elevation. Outbuildings include a single-story stable with a shed roof and clapboard siding, a one-and-one-half-story front-gabled carriage house with eave returns in the gable ends and a frieze band, a one-and-one-half-story front-gabled barn with a three-car garage extending from its west elevation, and a small front-gabled shed.

SIGNIFICANCE/HISTORY

Approx. Date 1820-1859

**Range of
Construction:**

**Specific Date of
Construction (if

Architect(s)/Buil

Statement of Significance: Ridgeway Cemetery was established as early as 1813 and remains an active burial ground. Its burial markers represent a wide range of materials, styles, and ornamentation that have been common throughout the nineteenth, twentieth, and twenty-first centuries, such as modest marble tablets, hand-engraved marble monuments, and polished granite monuments. It appears to meet National Register Criterion A in the area of Exploration/Settlement for its association with the early history of the Town of Venice, as well as Criterion C in the area of Art for its variety of burial marker styles, materials, and ornamentation typical of nineteenth- and twentieth-century funerary art.

Architect(s)/Buil

Statement of The Glover House is a one-and-one-half-story Greek Revival-style

Significance: residence with a temple front located in the hamlet of Genoa. It is identified as the property of Delos W. Glover (1819-1864) in the 1853, 1859, and 1875 maps of Cayuga County. However, based on Delos's death date, it is more likely that Delos's son, Dewitt L. Glover (1850-1921), was the owner by the time of the 1875 map. The residence retains its integrity of location, setting, design, materials, and feeling. Thus, it appears to meet National Register Criterion C in the area of Architecture as a remarkably intact example of a Greek Revival-style residence with a temple front in the Town of Genoa. It additionally is a contributing resource to the proposed Hamlet of Genoa Historic District.

Statement of Significance: The Hewitt Farmstead was constructed by 1853 and continues to be a working farm. According to historic maps of the Town of Genoa, the property belonged to L. Hewitt, a member of the locally prominent farming family, in 1853 and was owned by P.B. Young by 1875. The prominence and size of the twentieth- and twenty-first-century agricultural buildings suggest that the property has continued to be part of a successful agricultural venture. The introduction of new agricultural buildings has not substantially diminished the legibility of the nineteenth-century farm buildings nor their spatial relationships. The farmstead retains its integrity of location, setting, design, materials, association, and feeling. Thus, the property appears to meet
