A school's level of economic disadvantage will be determined by the percentage of its students eligible for participation in the national school lunch program, and a library's level of economic disadvantage will be calculated on the basis of school lunch eligibility in the public school district in which the library is located. A non-public school may use either eligibility for the national school lunch program or other federally approved alternative measures to determine its level of economic disadvantage. To be eligible for the discount, schools and libraries will be required to comply with the terms and conditions set forth in the Rules. Discounts are available only to the extent that they are funded by the federal universal service fund. Schools and libraries may aggregate demand with other eligible entities to create a consortium.

4. SERVICE AND RATE DESCRIPTION (Continued).4 Miscellaneous (Continued).20 Telecommunications Service Priority (TSP) Program.1 General

- .1 The Telecommunications Service Priority (TSP) Program is a federal program used to identify and prioritize telecommunications services that support national security or emergency preparedness (NS/EP) missions.

NS/EP services are defined as those telecommunications services which are used to maintain a state of readiness or respond to and manage any event or crisis which causes or could cause injury or harm to the population, damage or loss to property, or degrades or threatens the NS/EP posture of the United States.

TSP restoration and/or provisioning shall be provided in accordance with Part 64, Appendix A of the Federal Communications Commission's Rules and Regulations (47 C.F.R.), and the "Service Vendor Handbook For The Telecommunications Service Priority (TSP) Program" and the "Service User Manual for the Telecommunications Service Priority (TSP) System" (NCS Manual 3-1-1) (Service User Manual) issued and updated as necessary by the Office of Priority Telecommunications (OPT) of the National Communications System. Any changes to or reissuance of these regulations or manuals supersede language contained herein.

- .2 The TSP program has two components, restoration and provisioning.
 - .1 A restoration priority is applied to new or existing telecommunications services to ensure restoration before any other services during a service outage. TSP restoration priorities must be requested and assigned before a service outage occurs.
 - .2. A provisioning priority is obtained to facilitate priority installation of new telecommunications services during a service outage. Provisioning on a priority basis becomes necessary when an end-user has an urgent requirement for a new NS/EP service that must be installed immediately or by a specific due date that can be met only by a shorter than standard or expedited Company provisioning time frame. As a matter of general practice, existing TSP services will be restored before provisioning new TSP services.

INTERCITY TELECOMMUNICATIONS SERVICES

4. SERVICE AND RATE DESCRIPTION (Continued).4 Miscellaneous (Continued).20 Telecommunications Service Priority (TSP) Program (Continued).2 TSP Request Process – Restoration

To request a TSP restoration priority assignment, a prospective TSP user must:

- .1 Determine that the user's telecommunications service supports an NS/EP function under one of the following four TSP categories.
 - .1 National Security Leadership
 - .2 National Security Posture and U.S. Population Attack Warning
 - .3 Public Health, Safety, and Maintenance of Law and Order
 - .4 Public Welfare and Maintenance of National Economic Posture
- .2 Identify the priority level to be requested for the telecommunications service. The priority level is determined by the end-user's TSP category and service profile. The service profile defines the user's level of support to the portion of the telecommunications service that the user owns and operates, such as customer premises equipment or wiring. The five levels of priority and seven element groups that define the service profile are contained in the Service User Manual.
- .3 Complete the TSP Request for Service Users form (SF 315) available on the National Communications System (NCS) website (<http://tsp.ncs.gov/>).
- .4 For non-federal users, have their TSP requests approved by a federal agency sponsor. Non-federal users should contact the OPT, at the NCS website (<http://tsp.ncs.gov/>), for information on identifying a sponsor for TSP requests.
- .5 Submit the SF 315 to the OPT.
- .6 Upon receipt of the TSP Authorization Code from the OPT, notify the Company, and include the TSP Authorization Code in any service order to the Company requesting restoration of NS/EP services.

INTERCITY TELECOMMUNICATIONS SERVICES

4. SERVICE AND RATE DESCRIPTION (Continued).4 Miscellaneous (Continued).20 Telecommunications Service Priority (TSP) Program (Continued).3 TSP Request Process – Provisioning

To request a TSP provisioning priority assignment, a prospective TSP user must follow the same steps listed in .2 above for restoration priority assignment except for the following differences. The user should:

- .1 Certify that its telecommunications service is an Emergency service. Emergency services are those that support one of the NS/EP functions listed in .2.1 above and are so critical that they must be provisioned at the earliest possible time, without regard to cost to the user.
- .2 Verify that the Company cannot meet the service due date without a TSP assignment.
- .3 Obtain approval from the end-user's invocation official to request a provisioning priority. Invocation officials are designated individuals with the authority to request TSP provisioning for a telecommunications service, and include the head or director of a federal agency, commander of a unified/specified military command, chief of a military service, commander of a major military command, or state governor.

.4 Responsibilities of the End-User

End-users or entities acting on their behalf must perform the following:

- .1 Identify telecommunications services requiring priority.
- .2 Request, justify, and revalidate all priority level assignments. Revalidation must be completed every 2 years, and must be done before expiration of the end-user's TSP Authorization Code(s).
- .3 Accept TSP services by the service due dates.

- .6 Report to the Company any failed or unusable services with priority levels.
- .7 Designate a 24-hour point of contact for each TSP request and apprise the OPT.

.11 Disclose content of the NS/EP TSP database only as may be required by law.

.12 Comply with regulations and procedures supplemental to and consistent with guidelines issued by the OPT.

.6 Preemption

When spare facilities are not available, it may be necessary for the Company to preempt the facilities required to provision or restore a TSP service. When preemption is necessary, non-TSP services may be preempted based on the Company's best judgment. If no suitable spare or non-TSP services are available, the Company may preempt an existing TSP service to restore a TSP service with a higher restoration priority assignment. When preemption is necessary, prior consent of the service user whose service will be preempted is not required; however, the Company will make every reasonable effort to notify the preempted customer of the action to be taken.
