(4) **Timer reproducibility.** With a timer setting of 0.5 sec or less, the difference between the maximum exposure time (T_{max}) and the minimum exposure time (T_{min}) shall be less than or equal to 10 percent of the average exposure time (T), when four timing tests are performed:

$(T_{max} - T_{min}) \# 0.10\ T.$

(5) **Accuracy.** Deviation of technique factors from indicated values shall not exceed the limits specified for that system by its manufacturer. In the absence of manufacturer's specifications, the deviation shall not exceed 10% of the indicated value.

(6) **Kilovolts peak limitations.** Dental x-ray machines with a nominal fixed kVp of less than 50 kVp shall not be used to make diagnostic dental radiographs of humans.

(7) **Conditions for operation of equipment.** (i) Patient film holding devices shall be used when techniques permit. The x-ray system shall always be operated in such a manner that the useful beam at the patient's skin does not exceed the requirements of §175.58(b)(2).

(ii) The tube housing and the PID shall not be hand-held during an exposure.

(iii) Dental fluoroscopy shall not be used.

(iv) Time-temperature techniques or automatic processing shall be used to develop pre-operative diagnostic dental x-ray films. Processing techniques shall be consistent with those recommended by the x-ray film manufacturer. Sight developing of dental radiographs is prohibited except for films taken during operative procedures.

(v) Dental x-ray exposure technique factors and dental processing conditions shall yield entrance skin exposure (ESE) values for the bitewing x-ray projection that are identical to the range of ESE values for dental "D" and "E" speed film designations as published in HHS document #FDA-85-8245 (August 1985) or superseding documents.

(vi) Dental intraoral x-ray radiography shall be conducted with dental film classified American National Standards

Institute (ANSI) speed group "D" or faster.

(vii) The tube head shall remain stationary when placed in the clinical exposure position.

(viii) All x-ray units manufactured before August 1, 1974 shall be equipped with electronic means (timers) for exposure control not later than January 1, 1997.

(ix) Persons not required for the dental x-ray procedure shall not be present in the dental x-ray room.

(8) For extraoral dental radiography, the x-ray film used as the recording medium during the x-ray examination shall show substantial evidence of cut-off (beam delineation).

(9) **Additional requirements applicable only to certified systems.** Certified dental x-ray units shall meet the following additional requirements:

(i) **Reproducibility.** When the equipment is operated on an adequate power supply as specified by the manufacturer, the estimated coefficient of variation of radiation exposures shall be no greater than 0.05 for any specific combination of selected technique factors.

(ii) **Linearity.** When the equipment allows a choice of x-ray tube current settings and is operated on a power supply as specified by the manufacturer in accordance with the requirements of applicable federal standards, for any fixed x-ray tube potential within the range of 40-100 percent of the maximum rating, the average ratios of exposure to the indicated mAs product obtained at any two consecutive tube current settings shall not differ by more than 0.10 times their sum:

$(X_1 - X_2) \# 0.10 (X_1 X_2)$

where X_1 and X_2 are the average mR/mAs values obtained at each of two consecutive tube current settings.

(iii) **Accuracy.** Deviation of technique factors from indicated values shall not exceed the limits specified for that system by its manufacturer.

(iv) **Beam quality.** All certified dental x-ray systems manufactured on or after December 1, 1980 shall have a minimum half-value layer not less than 1.5 mm aluminum equivalent. Systems operating above 70 kVp are subject to the filtration requirements of §175.56(f).

§175.59 Podiatric radiography.

(a) **Equipment.** (1) Collimating devices capable of restricting the useful beam to the area of clinical interest shall be used.

(2) The x-ray films used as the recording medium during the x-ray examination shall show substantial evidence of cut-off (beam delineation).

(3) A device shall be provided which terminates the exposure after a preset time interval or exposure. The exposure switch shall be of the dead-man type and where protective barriers are required shall be so arranged that it cannot be operated outside the shielded area.

(4) Each installation shall be arranged so that the operator can stand at least two (2) meters (6 feet) from the patient, the x-ray tube and the useful beam during exposure. A protective barrier shall be provided when the operator

cannot stand at least 2 meters (6 feet) away from the patient, the x-ray tube and the useful beam during exposures.

(b) **Conditions for operation of equipment.** (1) No person shall hold film during the exposure.

(2) Only persons required for the radiographic procedure shall be in the radiographic room during exposure.

Health Code of the City of New York

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 175 RADIATION CONTROL General Provisions

§175.60 Fixed radiography (excluding dental, veterinary and podiatric radio- graphy).

(a) **Equipment.** (1) Collimating devices capable of restricting the useful beam to the area of clinical interest shall be used.

(2) The x-ray films used as recording medium during the x-ray examination shall show substantial evidence of cut-off (beam delineation). In addition, general purpose equipment, exclusive of spot-film devices, shall be equipped with adjustable collimators with a means of visually defining the entire field. The total misalignment of the visually defined field with the x-ray field, along either the length or width dimensions, shall not exceed 2 percent of the SID. Such devices shall be calibrated in terms of the size of the projected useful beam at specified source-film distances with the same degree of accuracy.

(3) The technique factors to be used during an exposure shall be indicated before the exposure begins, except when automatic exposure controls are used, in which case the technique factors which are set prior to the exposure shall be

indicated. On equipment having fixed technique factors, this requirement may be met by permanent markings. Indication of technique factors shall be visible from the operator's position except in the case of spot films made by the fluoroscopist.

(4) A device shall be provided which terminates the exposure after a preset time interval or exposure.

(5) A dead-man type of exposure switch shall be used and so arranged such that it cannot be operated outside a shielded area. Exposure switches for spot-film devices used in conjunction with fluoroscopic equipment are excepted from this shielding requirement.

(b) **Conditions for operation of equipment.** (1) No person shall be regularly employed to hold patients or films during exposures nor shall such duty be performed by an individual occupationally exposed to radiation in the course of that individual's other duties. When it is necessary to restrain the patient, mechanical supporting or restraining devices should be used. If patients or films must be held by an individual, that individual shall be protected with appropriate shielding devices such as protective gloves and a protective apron of at least 0.25 mm lead equivalent. No part of the holding individual's body shall be in the useful beam. The exposure of any individual used for holding patients shall be monitored. Pregnant women and individuals under 18 years of age shall not hold patients under any conditions.

(2) Only persons required for the radiographic procedure shall be in the radiographic room during the exposure and, except for the patient, all such persons shall be equipped with appropriate shielding devices such as protective gloves and a protective apron of at least 0.25 mm lead equivalent.

(3) For patients who have not passed the reproductive age, gonadal shielding of not less than 0.5 mm lead equivalent shall be used during radiographic procedures in which the gonads are in the useful beam, except for cases in which this would interfere with the diagnostic procedure.

§175.61 Portable, bedside or mobile equipment (excluding dental, veterinary and podiatric radiography).

(a) **Equipment.** (1) Collimating devices capable of restricting the useful beam to the area of clinical interest shall be used.

(2) The x-ray films used as the recording medium during the x-ray examination shall show substantial evidence of cut-off (beam delineation). General purpose equipment, exclusive of portable equipment, shall be equipped with adjustable collimators with a means of visually defining the entire field. The total misalignment of the visually defined field with the x-ray field, along either the length or width dimensions, shall not exceed 2 percent of the SID. Such devices shall be calibrated in terms of the size of the projected useful beam at specified source-film distances with the same degree of accuracy.

(3) A device shall be provided which terminates the exposure after a preset time interval or exposure.

(4) All mobile, portable or bedside equipment shall be provided with cones or metal frames so that the minimum source-to-skin distance is at least 31 cm (12 in.).

(b) **Conditions for operation of equipment.** (1) No person shall be regularly employed to hold patients or films during exposures, nor shall such duty be performed by an individual occupationally exposed to radiation in the course of that individual's other duties. When it is necessary to restrain the patient, mechanical supporting or restraining devices should be used. If patient or films must be held by an individual, that individual shall be protected with appropriate shielding devices such as protective gloves and a protective apron of at least 0.25 mm lead equivalent. No part of the holding individual's body shall be in the useful beam. The exposure of any individual used for holding patients shall be monitored. Pregnant women and individuals under 18 years of age shall not hold patients under any conditions.

(2) For patients who have not passed the reproductive age, gonadal shielding of not less than 0.5 mm lead equivalent shall be used during radiographic procedures in which the gonads are in the useful beam, except for cases in which this would interfere with the diagnostic procedure.

(3) Personnel monitoring shall be required for all persons operating mobile or portable x-ray equipment.

24 RCNY 175.62

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 175 RADIATION CONTROL General Provisions

§175.62 Fluoroscopy.

Fluoroscopic systems and associated components shall meet the following requirements:

(a) **Primary protective barrier.** (1) **Limitation of useful beam.** The entire cross-section of the useful beam shall be intercepted by the primary protective barrier of the fluoroscopic image assembly irrespective of position. The fluoroscopic tube shall not produce x-rays unless the barrier is in position to intercept the entire useful beam. The exposure rate due to transmission through the barrier with the attenuation block in the useful beam combined with radiation from the image intensifier, if provided, shall not exceed 5.16 E-7 $C\text{-}kg^{-1}$ (2 milliroentgens) per hour at 10 cm (4 in.) from any accessible surface of the fluoroscopic imaging assembly beyond the plane of the image receptor for each roentgen per minute of entrance exposure rate.

(b) **Field limitation.** (1) **Image-intensified fluoroscopy.** For image-intensified fluoroscopic equipment the total misalignment of the edges of the x-ray field with the respective edges of the visible area of the image receptor along any

dimension of the visually defined field in the plane of the image receptor shall not exceed 3 percent of the SID. The sum, without regard to sign, of the misalignment along any two orthogonal dimensions intersecting at the center of the visible area of the image receptor shall not exceed 4 percent of the SID. For rectangular x-ray fields used with circular image receptors, the error in alignment shall be determined along the length and width dimensions of the x-ray field which pass through the center of the visible area of the image receptor. Means shall be provided to permit further limitation of the field. The minimum field size, at the greatest SID, shall be equal to or less than 5 by 5 cm (2 by 2 in.).

(c) **Activation of tube.** X-ray production in the fluoroscopic mode shall be controlled by a device which requires continuous pressure by the operator for the entire time of any exposure. When recording serial fluoroscopic images, the operator shall be able to terminate the x-ray exposure(s) at any time, but means may be provided to permit completion of any single exposure of the series in process.

(d) **Entrance exposure rate limits.**

(1) The fluoroscopic exposure rate when measured under the following conditions shall not exceed 5 Roentgens per minute:

(i) the controls are set to the dose rate mode used for the fluoroscopic procedure most commonly performed on that fluoroscopic unit; and

(ii) the image intensifier is set to the largest field of view; and

(iii) the image intensifier is at 12 inches (30 cm) above the tabletop or the over table fluoro tube is at a source to image distance normally used for an average patient; and

(iv) a patient phantom composed of 1 and $^{1}/_{2}$ inch (3.8 cm) thickness of Type 1100 aluminum and 0.02 inch (0.5 mm) thickness of copper or an equivalent device is completely intercepting the useful beam; and

(v) the measurement is made at the measurement location specified in 21 CFR §1020.32(d)(3).

(vi) If the exposure rate cannot be measured, the exposure integrated for one minute under the same conditions as subparagraph (i) or paragraph (7) shall not exceed 5 Roentgens.

(2) The maximum exposure rate measured in air shall not exceed 10 Roentgens per minute, when measured in the manner as specified in 21 CFR §1020.32(d)(3), except as follows:

(i) Equipment manufactured before May 19, 1995 and certified in accordance with 21 CFR Part 1020 and having an optional high level control is limited to a maximum output of 5 Roentgens per minute unless the high level control is activated and an audible signal to that effect is provided. When the high level is activated, the maximum exposure rate measured in air at a point where the center of the useful beam enters the patient shall not exceed 20 Roentgens per minute.

(ii) Certified equipment manufactured after May 19, 1995 with automatic exposure rate and having an optional high level control is limited to a maximum output of 10 Roentgens per minute unless the high level control is activated and an audible signal to that effect is provided. When the high level control is activated, the maximum exposure rate measured in air at a point where the center of the useful beam enters the patient shall not exceed 20 Roentgens per minute.

(iii) Certified equipment manufactured after May 19, 1995 without automatic exposure rate is limited to 5 Roentgens per minute unless the high level control is activated and an audible signal to that effect is provided. When the high level control is activated, the maximum exposure rate measured in air at a point where the center of the useful beam enters the patient shall not exceed 20 Roentgens per minute.

(3) With the system configured for the most frequently performed fluoroscopic procedure, exposure rates shall be measured with each of the following attenuators in the beam:

(i) 0.75 inches (19 mm) of aluminum (pediatric patient-25 kg.),

(ii) 1.50 inches (38 mm) of aluminum (small adult patient-50 kg.),

(iii) 1.50 inches (38 mm) of aluminum and 0.02 inches (0.5 mm) of copper (average adult patient-75 kg.),

(iv) 1.50 inches (38 mm) of aluminum and 0.08 inches (2.0 mm) of copper (large adult patient-100 kg.),

(v) 1.50 inches (38 mm) of aluminum and 0.08 inches (2.0 mm) of copper and 0.12 inches (3.0 mm) of lead (for maximum fluoroscopic exposure rate only).

The fluoroscopic exposure rates for the most frequently performed procedure shall be posted so that they are conspicuous to the operator.

(e) **Indication of potential and current.** During fluoroscopy and cinefluorography, x-ray tube potential and current shall be continuously indicated. Deviation of x-ray tube potential and current from the indicated values shall not exceed the maximum deviation as stated by the manufacturer in accordance with applicable Federal standards (21 CFR Part 1020 or successor regulations).

(f) **Source-skin distance.** Means shall be provided to limit the source-skin distance to not less than 38 cm (15 in.) on stationary fluoroscopes and to not less than 30 cm (12 in.) on mobile fluoroscopes. In addition, for image-intensified fluoroscopes intended for specific surgical applications that would be prohibited at the source-skin distances specified in §175.62(f), provision may be made for operation at shorter source skin distances but in no case less than 20 cm (8 in.). When provided, the manufacturer must set forth precautions with respect to the optional means of spacing in addition to other information as required in accordance with applicable Federal standards.

(g) **Fluoroscopic timer.** Fluoroscopy equipment shall not be operated for medical use unless a means is provided to preset the cumulative on-time of the fluoroscopic tube. The maximum cumulative time of the timing device shall not exceed 5 minutes without resetting. A signal audible to the fluoroscopist shall indicate the completion of any present cumulative on-time. Such signal shall continue to sound while x-rays are produced until the timing device is reset.

(h) **Contrast tests.** (1) The spatial resolution of the fluoroscopic system shall be measured using a test tool composed of a line pair (lp) plate with discreet line pair groups and a maximum lead foil thickness of 0.1 mm or an equivalent device. The test tool shall be placed on a 0.75 inch (19 mm) thickness of type 1100 aluminum, large enough to completely intercept the useful beam, with the test tool 12 inches (30 cm) from the entrance surface of the image receptor assembly. If the system has variable source-to-image distance (SID), the measurement SID shall not exceed 40 inches (100 cm). The image receptor of the fluoroscopic system shall be operated in the six inches (15 cm) field of view (FOV) to conduct this test. If six inches (15 cm) FOV is not available, the system shall be operated in the smallest FOV that exceeds the six inches (15 cm) FOV. The minimum spatial resolution at the center of the beam for all FOVs shall be determined by the following equation:

2 lp/mm × (6 inches (15cm)/size of FOV used) = minimum number of lp/mm.

(2) The low contrast performance of the fluoroscopic system shall be capable of resolving a minimum hole size of 3 mm using a test tool composed of a 1.0 mm aluminum sheet with two sets of four holes of dimension 1.0, 3.0, 5.0 and 7.0 mm and a phantom composed of a 1 and $^{1}/_{2}$ inch (3.8 cm) thickness of Type 1100 aluminum large enough to completely intercept the useful beam or an equivalent device. The test tool shall be 12 inches (30 cm) from the entrance surface of the image receptor assembly. The image receptor of the fluoroscopic system shall be operated in the six inches (15 cm) FOV to conduct this test. If six inches (15 cm) FOV is not available, the system shall be operated in the

smallest FOV that exceeds the six inches (15 cm) FOV.

(i) **Conditions for operation of equipment.** (1) The operator of any fluoroscopic installation shall determine and record the outputs made pursuant to §175.62(d) where the center of the useful beam enters the patient during routine fluoroscopy and cinefluorography. The rate shall be determined at least annually, each time a major component is serviced or replaced, when the outputs exceed the limits specified in §175.62 or when there is a reason to believe that the operating factors have changed significantly. Notwithstanding the requirements of §175.54, such measurements and measurement of stray radiation to operators and observers, are required when the equipment is first placed in operation.

(2) Protective garments of at least 0.25 mm lead equivalent shall be available and worn by the fluoroscopist during every examination.

(3) Unless measurements indicate that they are not needed, protective gloves and aprons of at least 0.25 mm lead equivalent each shall be worn by any person within the fluoroscopy room.

(4) Only persons needed in the fluoroscopy room shall be present during the ex- posure.

(j) **Exemptions.** (1) Fluoroscopic radiation therapy simulation systems are exempt from the requirements of §175.62(a), (d), and (g) provided that:

(i) the systems are designed and used in a manner such that no individual other than the patient is in the x-ray room when the system is producing x-rays; and

(ii) systems which do not meet the requirements of §175.62(g) are provided with a means of indicating the cumulative time that an individual patient has been exposed to x-rays. Procedures shall require that the timer be reset between cases.

HISTORICAL NOTE

Section repealed and added City Record June 27, 1994 eff. July 27, 1994.

Section in original publication July 1, 1991.

Open par amended City Record Apr. 3, 2001 eff. May 3, 2001. [See Vol. 9 Statements of Basis and Purpose No. 16]

Subd. (d) amended City Record Sept. 29, 2006 eff. Oct. 29, 2006. [See Vol. 9 Statements of Basis and Purpose No. 25]

Subd. (d) par (3) added City Record Apr. 3, 2001 eff. May 3, 2001. This par (3) was bracketed out of rule in City Record Sept. 29, 2006 amendment.

Subd. (h) amended City Record Sept. 29, 2006 eff. Oct. 29, 2006. [See Vol. 9 Statements of Basis and Purpose No. 25]

Notes:

Subdivisions (d) and (h) of §175.62 were amended on September 26, 2006, to conform with the requirements of the New York State Sanitary Code §16.58 for fluoroscopic equipment, and FDA performance standards in 21 CFR 1020.32.

The first sentence of §175.62 was amended and paragraph (3) of subsection (d) was added on March 21, 2001 to include additional requirements for entrance exposure rate limits for fluoroscopic equipment in compliance with state and federal regulations.

Rules of the City of New York

***** Current through December 2009 ****

24 RCNY 175.63

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 175 RADIATION CONTROL General Provisions

§175.63 Mammography.

(a) **Applicability.** The provisions of this section apply to all facilities which produce, process or interpret mammograms for screening and/or diagnostic purposes and are in addition to, and not in substitution for, other requirements of this Code.

(b) **Requirement for certification.** (1) Except for facilities holding provisional certificates as described in §175.63(b)(2), effective October 1, 1994 each mammography facility shall have received a certificate indicating approval by the U.S. Food and Drug Administration (FDA) to provide screening and diagnostic mammography services pursuant to 21 CFR Section 900.11, or any successor law or regulation.

(2) A provisional certificate issued pursuant to 21 CFR Section 900.11, or any successor law or regulation, will be accepted in lieu of the certificate required by §175.63(b)(1) for a period of not longer than six (6) months from the date of issuance plus one ninety (90) day extension.

(c) **Equipment.** (1) Radiographic equipment designed for conventional radiographic procedures that has been modified or equipped with special attachments for mammography shall not be used for mammography.

(2) Radiographic equipment used for mammography shall:

(i) be certified by the U.S. Food and Drug Administration pursuant to 21 CFR 1010.2, or any successor law or regulation, as meeting the applicable requirements of 21 CFR 1020.30 and 21 CFR 1020.31 in effect on the date of manufacture; and

(ii) be specifically designed for mammography; and

(iii) incorporate a breast compression device; and

(iv) have the provision for operating with a removable grid, except for xeromammography systems.

(3) Beam quality for mammographic systems with a molybdenum target-molybdenum filter combination.

(i) When used with screen-film image receptors, and the contribution to filtration made by the compression device is included, the useful beam shall have a half-value layer (HVL) between the values of measured kVp/100 and measured kVp/100 0.1 mm aluminum.

(ii) For xeromammography, the HVL of the useful beam with the compression device in place shall be at least 1.0 and not greater than 1.6 mm aluminum, measured at 49 kVp with a tungsten target tube.

(d) **Dose.** (1) The average glandular dose delivered during a single cranio-caudal view of an approved phantom simulating a 4.5 cm thick, compressed breast consisting of 50 percent adipose and 50 percent glandular tissue, shall not exceed:

(i) 1 mGy (100 millirads) per exposure for screen-film mammography procedures without a grid;

(ii) 3 mGy (300 millirads) per exposure for screen-film mammography procedures with a grid; or

(iii) 4 mGy (400 millirads) per exposure for xeromammography procedures.

The dose shall be determined at least annually using the technique factors and conditions that are used to produce the phantom images submitted for accreditation.

(e) **Personnel.** The following requirements apply to personnel involved in any aspect of mammography, including the production, processing and interpretation of mammograms and related quality assurance activities.

(1) Interpreting physicians shall meet the following requirements:

(i) be licensed to practice medicine in the State of New York; and

(ii) have had the following training:

(A) be certified in an accepted speciality area by one of the bodies approved by FDA to certify interpreting physicians; or

(B) have had at least two (2) months of documented full-time training in the interpretation of mammograms, including instruction in radiation physics, radiation effects and radiation protection; and

(C) have forty (40) hours of documented continuing medical education in mammography. Time spent in residency specifically devoted to mammography is acceptable, if documented in writing by a fully qualified interpreting

physician; and

(iii) have had the following initial experience:

(A) have read and interpreted the mammograms from the examinations of at least 240 patients in the six (6) months preceding application; or

(B) read and interpret mammograms as specified in §175.63(e)(1)(iii)(A) under the direct supervision of a fully qualified interpreting physician; and

(iv) have the following continuing experience:

(A) continue to read and interpret mammograms from the examination of an average of at least 40 patients per month over 24 months; and

(B) continue to participate in education programs, either by teaching or completing an average of at least five (5) continuing medical education credits in mammography per year.

(2) Radiologic technologists shall meet the following requirements:

(i) have a New York State license to perform radiographic procedures; and

(ii) have satisfied the requirements set forth in 21 C.F.R. §900.12(a)(2), or its successor regulation.

(3) Medical physicists shall meet the following requirements:

(i) have approval by the Department to conduct evaluations of mammography equipment and procedures required under the Public Health Service Act; or

(ii) be certified in an accepted speciality area by one of the bodies approved by FDA to certify medical physicists; or

(iii) for those medical physicists associated with facilities applying for accreditation before October 27, 1997, meet the following criteria:

(A) have a masters, or higher, degree in physics, radiological physics, applied physics, biophysics, health physics, medical physics, engineering, radiation science, or in public health with a bachelor's degree in the physical sciences; and

(B) have one (1) year of training in medical physics specific to diagnostic radiological physics; and

(C) have two (2) years of experience in conducting performance evaluation of mammography equipment; and

(iv) participate in continuing education programs related to mammography, either by teaching or completing an average of at least five (5) continuing education units per year.

(f) **Quality assurance.** (1) Each registrant performing mammography examinations shall establish and maintain a quality assurance program to assure the adequate performance of the radiographic equipment and other equipment and materials used in conjunction with such equipment to ensure the reliability and clarity of its mammograms. The program shall also require periodic monitoring of the dose delivered by the facility's examination procedures to ensure that it does not exceed the limit specified in §175.63(d) and is appropriate for the image receptor used.

(2) For screen-film systems, the mammography quality assurance program required by §175.63(f)(1) shall be substantially the same as that described in the 1992 edition of "Mammography Quality Control: Radiologist's Manual, Radiologic Technologist's Manual and Medical Physicist's Manual," prepared by the American College of Radiology,

Committee on Quality Assurance in Mammography, or in any superseding document.

(3) For systems with alternate image receptor modalities, the mammography quality assurance program required by §175.63(f)(1) shall be substantially the same as the quality assurance program recommended by the image receptor manufacturer, which, if followed, will allow a facility to maintain high image quality.

(4) The mammography quality assurance program required by §175.63(f)(1) shall provide for the maintenance of log books documenting compliance with the requirements of §175.63(f)(1) through (3) and recording corrective actions taken.

(5) Prior to performing patient mammography, using a breast equivalent phantom specified in §175.63(f)(7)(i), (ii) or (iii), the registrant shall optimize the mammographic system and determine image resolution, which shall be the reference image resolution for the mammographic system.

(6) The registrant shall use the breast equivalent phantom used to satisfy the requirement of §175.63(f)(5) to test image resolution of the mammographic system at monthly intervals; mobile and portable equipment shall be so tested each time the unit is moved or at monthly intervals, whichever is less.

(7) No patient mammogram shall be performed unless the mammographic system is capable of imaging, using phantom objects as follows:

(i) the phantom image shall achieve at least the minimum score established by an accreditation body approved by the FDA in accordance with 21 C.F.R. §900.3(d) or 900.4(a)(8), or successor regulations; or

(ii) the equivalent test object resolution on another phantom approved by the Department.

(8) **Diminished phantom test object resolution and facility follow-up.**

(i) If, when tested pursuant to §175.63(f)(6), the mammographic system detects two (or more) fewer test objects than the reference resolution image made pursuant to §175.63(f)(5), the cause of resolution loss shall be determined and corrected and the mammographic system re-optimized pursuant to §175.63(f)(5).

(ii) If the imaging system resolves less than seven (7) test objects in the phantom, in addition to the requirements of §175.63(f)(8)(i), there shall be:

(A) a review of monthly phantom images to determine at which point the image resolution fell below the minimum specified in §175.63(f)(7); and

(B) a review, by a physician(s) not from the facility who is approved by the Department and meets the requirements of §175.63(e)(1), to determine the diagnostic quality of the mammographic images.

(iii) The review required by §175.63(f)(8)(ii)(B) shall include:

(A) images from the range of studies performed by the facility which such physician(s) ascertains to be sufficient to determine that the clinical images are of diagnostic quality; and

(B) images from the time interval from when such review is required to the date when the system met the requirements of §175.63(f)(7).

(iv) If film images reviewed by the physician(s) pursuant to §175.63(f)(8)(iii)(B) are identified as not being of diagnostic quality, the facility shall, within five (5) business days, notify:

(A) the referring physician or other authorized referring practitioner, or the patient, if not referred by a practitioner,

of the need for follow-up; and

(B) the Department of the results of the investigation and follow-up contacts.

(v) A record of the reviews and findings made pursuant to §175.63(f)(8)(ii)(B) shall be maintained by the registrant at the facility for review by the Department.

(vi) A record of the results of investigations and actions taken to correct any deficiency pursuant to this section shall be maintained for review by the Department for three (3) years.

(9) Each facility shall establish and maintain a clinical image quality control program, including at a minimum:

(i) monitoring of mammograms repeated due to poor image quality; and

(ii) maintenance of records, analysis of results and a description of any remedial action taken on the basis of such monitoring.

(10) Each facility shall establish a system for reviewing outcome date from all mammography performed, including follow-up on the disposition of positive mammograms and correlation of surgical biopsy results with mammogram reports.

(11) As part of its overall quality assurance program, each facility shall have a physicist with the qualifications specified in §175.63(e)(3) establish, monitor and direct the procedures required by §175.63(f) and perform a survey of the facility to assure that it meets the quality control and equipment standards as specified in §175.63(c)(2). Such surveys shall be performed at least annually and reports of such surveys shall be prepared and submitted to the body which accredited the facility. Each such report shall be retained by the facility for inspection by the Department.

(g) **Medical records.** (1) Each facility shall maintain mammograms and associated records in a permanent medical record of the patient as follows:

(i) for a period of not less than five (5) years or not less than ten (10) years, if no additional mammograms of the patient are performed at the facility, or longer as mandated by any applicable law or regulation; or

(ii) until requested by the patient to permanently transfer the records to a medical institution, to a physician of the patient or to the patient, and the records are so transferred.

(2) Each facility shall prepare a written report of the results of any mammography examination. Such report shall be completed as soon as reasonably possible and shall:

(i) be signed by the interpreting physician; and

(ii) be provided to the patient's physician(s) (if any); or

(A) if the patient's physician is not available or if the patient does not have a physician, the report shall be sent directly to the patient; and

(B) if such report is sent to the patient, it shall include a summary written in language easily understood by a lay person; and

(iii) be maintained in the patient's record pursuant to §175.63(g)(1).

(h) **Revocation of accreditation and accrediting body approval.** (1) If a facility's accreditation is revoked by an accrediting body (as defined in 21 CFR Section 900.2), the facility's certificate (as defined in 21 CFR Section 900.2)

shall remain in effect until such time as determined by the FDA or other certifying body on a case-by-case basis after an investigation into the reasons for the revocation. If the FDA or other certifying body determines that the revocation was justified by violations of applicable quality standards, the FDA or other certifying body will suspend or revoke the facility's certificate and/or require the submission and implementation of a corrective action plan, whichever action will protect the public health in the least burdensome way.

(2) If the approval of an accrediting body is revoked by FDA, the certificates of the facilities accredited by such body shall remain in effect for a period of one (1) year after the date of such revocation subject to FDA's determination that the facility is continuing to perform mammography of acceptable quality. The facility must obtain accreditation from an approved accrediting body within one (1) year of the date of revocation.

HISTORICAL NOTE

Section repealed and added City Record June 27, 1994 eff. July 27, 1994.

Section in original publication July 1, 1991.

Subd. (e) par (2) amended City Record Apr. 3, 2001 eff. May 3, 2001. [See Vol. 9 Statements of

Basis and Purpose No. 16]

Subd. (f) par (7) amended City Record Apr. 3, 2001 eff. May 3, 2001. [See Vol. 9 Statements of

Basis and Purpose No. 16]

Notes:

Subparagraph (ii) of paragraph (2) of subsection (e) was amended and subparagraphs (iii) and (iv) were repealed on March 21, 2001 to amend the requirements for radiologic technologists in accordance with federal regulations.

Subparagraph (i) was amended; subparagraph (ii) was repealed; and subparagraph (iii) was relettered to be known as subparagraph (ii) of paragraph (7) of subsection (f) on March 21, 2001 to reflect federal regulations now in place for testing the minimum imaging quality of equipment prior to performing patient mammograms.

Rules of the City of New York

***** Current through December 2009 ****

24 RCNY 175.64

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 175 RADIATION CONTROL General Provisions

§175.64 Therapeutic radiation machines.

(a) **Purpose and scope.** (1) This section establishes requirements for the use of radiation machines used for therapeutic purposes in the healing arts to protect public health and safety and for which the registrant is responsible. The requirements of this section are in addition to, and not in substitution for, other applicable provisions of this Code. Except as specifically provided otherwise in this section, the requirements of this section are applicable to all therapeutic radiation machines used in the City of New York for the treatment of humans, regardless of the date of installation.

(b) **Certified registration for therapeutic radiation machines.** (1) **Certified registration required.**

(i) Section 175.64(b) applies only to therapeutic radiation machines subject to the requirements of §175.64(g) of this Code.

(ii) All new facilities with therapeutic radiation machines subject to the requirements of §175.64(g) of this Code, and all such existing facilities not holding a certified registration on August 1, 1994, shall obtain a certified registration from the Department in accordance with the provisions of this section.

(2) **Certified registration application.** (i) If the application is for use sited in a medical institution, only the institution's management may apply; for use not sited in a medical institution, any professional practitioner may apply.

(ii) An application for a certified registration shall be filed in duplicate (original plus one copy) on, and shall contain completely and accurately all information called for by, a written form prescribed by the Department.

(iii) When a change affecting a radiation source or installation subject to the certified registration requirements of this section is considered by a registrant, including but not limited to changes ordered pursuant to this Code, so that the information on file with the Department, either in the initial certified registration application, or subsequent request for amendments, or in the initial certified registration or amendment previously granted, will no longer be accurate, the registrant shall so inform the Department in writing.

(A) For ministerial changes, such notification shall be within 10 days of effecting such change.

(B) For all other changes, an amendment must be requested and received pursuant to §175.64(b)(2)(xiv).

(C) Failure to notify the Department of a change of ownership or address of a radiation installation may result in revocation of the installation's certified registration under §175.64(b)(2)(xii).

(iv) At any time subsequent to the filing of an application for a certified registration and before the termination of a certified registration issued in response thereto, the Department may require the applicant to submit supplementary statements containing additional information to enable the Department to determine whether such application should be approved or denied, or whether a previously issued certified registration should be amended, suspended or revoked.

(v) Each application or supplementary statement shall be signed by either the applicant personally or a person duly authorized by the applicant to sign for and on the applicant's behalf.

(vi) The Department will approve an application for, and issue in response thereto, a certified registration if the Department determines that the following requirements have been met:

(A) the applicant's proposed use, equipment, facilities and procedures will protect health and safety and will minimize danger to life and property from radiation hazards; and

(B) the applicant's instrumentation is appropriate for detecting and measuring the type(s) of radiation produced (either directly or indirectly) by the radiation source requested in the application; and

(C) the applicant, or the applicant's personnel, if the applicant is not an individual, is qualified by training and experience to use such radiation source for the purposes covered by the application so as to protect public health and safety and to minimize danger to life and property from radiation hazards; and

(D) the applicant submits sufficient information to support a determination that the requirements of §175.64(b)(2)(vi)(A), (B) and (C) are met.

(vii) Certified registrations issued by the Department shall be in the form of a written authorization permitting possession and use of radiation therapy machines capable of operating at 500 kV (photons) and/or 500 keV (electrons) or higher. Such possession and use provided for in the foregoing shall be subject to the requirements of:

(A) all applicable provisions of this Code; and

(B) all conditions as stated on the certified registration issued by the Department.

(viii) Except as otherwise provided in this Code, each certified registration shall expire on the expiration date stated on the certified registration. If any registrant duly files with the Department an application in proper form for renewal of such certified registration, or for a new and superseding certified registration, not less than 30 days prior to the stated expiration date, such certified registration shall not be deemed to have expired until the Department has finally determined such application.

(ix) The Department may terminate any certified registration upon the written request of the registrant.

(x) The Department may at any time set forth in any certified registration or incorporate by reference therein, additional conditions, restrictions or requirements applicable to the registrant's transfer, receipt, possession or use of any radiation source covered by such certified registration in order to protect the public health and safety and to minimize danger to life and property from radiation hazards.

(xi) Any certified registration may be amended or revoked by the Department by reason of amendment of this Code, or any other applicable law or regulation.

(xii) Any certified registration may be suspended or revoked by the Department for:

(A) any material misstatement in the application therefor or in any supplementary statement thereto;

(B) any condition revealed by such application, supplementary statement, report, record, inspection or other means, which would warrant the Department's refusal to grant a certified registration on an original application; or

(C) any violation or failure to observe any condition of such certified registration, this Code, or any other applicable rule, regulation or law now or hereafter in effect.

(xiii) Any application by a registrant for the renewal of a certified registration, including amendments, shall be considered as an application for a certified registration and shall be filed on, and shall contain completely and accurately all information called for by, a written form or other manner prescribed by the Department. In considering any such application for renewal, the Department will apply the requirements set forth in §175.64(b)(2)(vi).

(xiv) A registrant shall apply for, and shall have received approval for, a certified registration amendment before:

(A) permitting anyone to work as an authorized user under the certified registration; (B) permanently changing the radiation safety officer or radiotherapy physicist;

(C) making any change in the treatment room shielding;

(D) making any change in the location of the therapeutic radiation machine within the treatment room;

(E) using the therapeutic radiation machine in a manner that could result in increased radiation levels in areas outside the treatment room;

(F) relocating the therapeutic radiation machine;

(G) allowing an individual not listed on the registrant's certified registration to perform the duties of the radiation therapy physicist, except during the temporary absence of the radiation therapy physicist when a person who is otherwise qualified to perform such duties may perform such duties. Such temporary absence shall not exceed sixty (60) days; or

(H) before changing non-ministerial statements, representations and/or procedures incorporated by reference into

the certified registration.

Any application by a registrant for an amendment of a certified registration shall be filed in writing with the Department and shall set forth in detail the reasons for such requested amendment. In considering any such application for amendment, the Department will apply the requirements set forth in §175.64(b)(2)(vi).

(c) **Training requirements.** (1) The registrant of any therapeutic radiation machine shall require the authorized user to be a physician who:

(i) is certified in:

(A) Radiology, therapeutic radiology or radiation oncology by the American Board of Radiology; or

(B) Radiation oncology by the American Osteopathic Board of Radiology; or

(C) Radiology, with specialization in radiotherapy, as a British "Fellow of the Faculty of Radiology" or "Fellow of the Royal College of Radiology"; or

(D) Therapeutic radiology by the Canadian Royal College of Physicians and Surgeons; or

(ii) is in the active practice of therapeutic radiology, and has completed 200 hours of instruction in basic radiation techniques applicable to the use of an external beam radiation therapy unit, 500 hours of supervised work experience, and a minimum of three (3) years of supervised clinical experience.

(A) To satisfy the requirement for instruction, the classroom and laboratory training shall include:

(a) radiation physics and instrumentation;

(b) radiation protection;

(c) mathematics pertaining to the use and measurement of radiation; and

(d) radiation biology.

(B) To satisfy the requirement for supervised work experience, training shall be under the supervision of an authorized user at an institution and shall include:

(a) review of the full calibration measurements and periodic quality assurance checks;

(b) preparing treatment plans and calculating treatment times;

(c) using administrative controls to prevent misadministrations;

(d) implementing emergency procedures to be followed in the event of the abnormal operation of an external beam radiation therapy unit or its console; and

(e) checking and using survey meters.

(C) To satisfy the requirement for a period of supervised clinical experience, training shall include one (1) year in a formal training program approved by the Residency Review Committee for Radiology of the Accreditation Council for Graduate Medical Education or the Committee on Postdoctoral Training of the American Osteopathic Association and an additional two (2) years of clinical experience in therapeutic radiology under the supervision of an authorized user at a medical institution. The supervised clinical experience shall include:

(a) examining individuals and reviewing their case histories to determine their suitability for external beam radiotherapy treatment, and any limitations or contraindications;

(b) selecting the proper dose and how it is to be administered;

(c) calculating the external beam radiotherapy doses and collaborating with the authorized user in the review of patients' progress and consideration of the need to modify originally prescribed doses as warranted by patients' reaction to radiation; and

(d) post-administration followup and review of case histories.

(2) The registrant of any therapeutic radiation machine shall require the radiation therapy physicist to:

(i) be certified by the American Board of Radiology in:

(A) Therapeutic radiological physics; or

(B) Roentgen ray and gamma ray physics; or

(C) X-ray and radium physics; or

(D) Radiological physics; or

(ii) be certified by the American Board of Medical Physics in Radiation Oncology Physics; or

(iii) be certified by the Canadian College of Medical Physics; or

(iv) hold a master's or doctor's degree in physics, biophysics, radiological physics, or health physics, and have completed one (1) year of full time training in therapeutic radiological physics and an additional year of full time work experience under the supervision of a radiotherapy physicist at a medical institution. To meet this requirement, the individual shall have performed the tasks listed in §175.64(e)(1) and §175.64(g)(8) and (9) of this Code under the supervision of a radiation therapy physicist during the year of work experience.

(v) Notwithstanding the provision of §175.64(c)(2)(iv), as of January 1, 2000, the radiation therapy physicist shall be an individual who is certified as described in §175.64(c)(2)(i), (ii) or (iii).

(3) **Qualifications of operators.** (i) Any person, other than a qualified physician, who operates a therapeutic radiation machine for medical use shall be a licensed and registered radiation therapist, or a student currently enrolled in an approved program of study in radiation therapy technology and under the direct supervision of a qualified physician or licensed radiation therapist. Such direction or order to apply, or application of, radiation shall be in compliance with all applicable provisions of Title 10 of the New York Code of Rules and Regulations, Part 89, Subchapter L and Article 35 of the Public Health Law of the State of New York, or any successor laws or regulations.

(ii) The names and training of all personnel who currently operate any therapeutic radiation machine(s) shall be kept on file at the facility. Information on former operators shall be retained for a period of three (3) years beyond the last date such a person was authorized to operate a therapeutic radiation machine at the facility.

(4) The training and experience specified in §175.64(c)(1), (2) or (3) shall have been obtained within the 5 years preceding the date of application or the individual shall demonstrate continuing applicable experience since the required training and experience was completed.

(d) **General administrative requirements.** (1) The registrant shall be responsible for directing the operation of any therapeutic radiation machine and shall ensure that the requirements of this section are met in the operation of the

therapeutic radiation machine(s).

(2) A therapeutic radiation machine which does not meet the requirements of this Code shall not be used for irradiation of patients.

(3) A physician shall not act as an authorized user for any therapeutic radiation machine which is subject to the provisions of §175.64(g) until such time as said physician's training has been reviewed and approved by the Department.

(4) **Written safety procedures and rules.** (i) Written safety procedures and rules, including any restrictions required for the safe operation of a particular therapeutic radiation machine, shall be developed by a radiation therapy physicist. At a minimum, these shall include:

(A) the procedure to be followed to ensure that, except for contact therapy machines, only the patient is in the treatment room before turning the primary beam of radiation on to begin a treatment or after a door interlock interruption; and

(B) the procedure to be followed if the operator is unable to turn the primary beam of radiation off with controls outside the treatment room or in the event that potential harm to the patient or personnel is imminent; and

(C) the names and telephone numbers of the authorized users, radiation safety officer and radiation therapy physicist to be contacted immediately if the therapeutic radiation machine or console operates abnormally.

(ii) Such procedures and rules shall be provided to each individual who operates a therapeutic radiation machine and shall be available at the control console of the therapeutic radiation machine.

(iii) The operator shall be able to demonstrate familiarity with these rules.

(iv) The registrant shall provide instruction in the written safety procedures and rules required by §175.64(d)(4)(i) to all individuals who operate a therapeutic radiation machine and shall provide appropriate refresher training to such individuals at intervals not to exceed one (1) year. Such instruction shall include "dry runs" of emergency procedures.

(v) The registrant shall retain for three (3) years a record of individuals receiving instruction required by §175.64(d)(4)(iv), a description of the instruction, the date of instruction, and the name of the individual who gave the instruction.

(5) All individuals associated with the operation of a therapeutic radiation machine shall be instructed in, and shall comply with, the provisions of the registrant's quality assurance program as required by §175.07 of this Code.

(6) Individuals shall not be exposed to the useful beam except for medical therapy purposes and unless such exposure has been ordered in writing by an authorized user who meets the training requirements of §175.64(c). This provision specifically prohibits deliberate exposure of an individual for training, demonstration or other non-healing arts purposes.

(7) For radiation therapy machines installed after August 1, 1994, the registrant shall maintain the following information for each therapeutic radiation machine for inspection by the Department:

(i) report of acceptance testing;

(ii) records of calibrations and periodic spot checks for the therapeutic radiation machine, as well as the name(s) of the person(s) who performed such activities;

(iii) records of major maintenance and modifications performed on the therapeutic radiation machine after August

1, 1994, as well as the name(s) of the person(s) who performed such services; and

(iv) copies of all correspondence with this Department regarding that therapeutic radiation machine.

(8) For each radiation therapy machine, the registrant shall retain records of all surveys for inspection by the Department.

(9) **Record retention.** (i) Unless specified otherwise, all records required by this section shall be retained until disposal is authorized by the Department. All required records shall be retained in an active file from at least the time of generation until the next Departmental inspection. Any required record generated prior to the last Departmental inspection may be microfilmed or otherwise archived providing a complete copy of such record can be retrieved until such time as the Department authorizes final disposal.

(e) **General technical requirements.** (1) **Protection surveys.**

(i) The registrant shall ensure that radiation protection surveys of all new facilities, and existing facilities not previously surveyed, are performed with an operable radiation measurement survey instrument calibrated in accordance with §175.64(h). The radiation protection survey shall be performed by a radiation therapy physicist or by a physicist certified by the American Board of Health Physics or by the American Board of Radiology, the American Board of Medical Physics or the Canadian College of Medical Physics in the appropriate specialty and shall verify, with the therapeutic radiation machine in a "BEAM-ON" condition with the largest clinically available treatment field and with a scattering phantom in the useful beam of radiation, that:

(A) radiation levels in restricted areas are not likely to cause personnel exposures in excess of the limits specified in §175.03(c); and

(B) radiation levels in unrestricted areas do not exceed the limits specified in §175.03(d).

(ii) In addition to the requirements of §175.64(e)(1)(i), a radiation protection survey also shall be performed prior to any subsequent medical use:

(A) after making any change in the treatment room shielding;

(B) after making any change in the location of the therapeutic radiation machine within the treatment room;

(C) after relocating the therapeutic radiation machine;

(D) before using the therapeutic radiation machine in a manner that could result in increased radiation levels in areas outside the external beam radiation therapy treatment room; or

(E) whenever there is reason to believe that radiation levels in unrestricted areas may have increased.

(iii) The survey record shall indicate all instances where the facility, in the opinion of the physicist performing the survey, is in violation of applicable regulations. The survey record also shall include the date of the measurements, the reason the survey is required, the manufacturer's name, model and serial number or other unambiguous identification of the therapeutic radiation machine and of the instrument(s) used to measure radiation levels, a plan of the areas surrounding (including accessible areas above and below) the treatment room which were surveyed, the measured dose rate at several points in each area expressed in mSv (millirems) per hour, the calculated maximum radiation exposure in a period of one (1) week for each restricted and unrestricted area, and the signature of the individual conducting the survey.

(iv) If the results of the surveys required by §175.64(e)(1)(i) or (ii) indicate any radiation levels in excess of the respective limits specified in §175.64(e)(1)(i), the registrant shall lock the control in the "OFF" position and not use the

unit:

(A) except as may be necessary to repair, replace or test the therapeutic radiation machine, the therapeutic radiation machine shielding or the treatment room shielding; or

(B) until the registrant has applied for, and received, a specific exemption from the Department.

(2) If the survey required by §175.64(e)(1) indicates that an individual in an unrestricted area may be exposed to levels of radiation greater than those permitted by §175.03(d) of this Code, prior to the first medical use of the radiation therapy machine the registrant shall:

(i) equip the unit with beam direction interlocks or install additional radiation shielding to ensure compliance with §175.03(d) of this Code;

(ii) perform the survey required by §175.64(e)(1) again; and

(iii) include in the report required by §175.64(e)(3) the results of the initial survey, a description of the modification made to comply with §175.64(e)(2)(i), and the results of the second survey; or

(iv) request and receive an amendment to the certified registration that authorizes radiation levels in unrestricted areas greater than those permitted by §175.03(d) of this Code.

(3) **Reports of external beam radiation therapy surveys and measurements.** (i) The registrant for any therapeutic radiation machine subject to the requirements of §175.64(f) or §175.64(g) of this Code shall furnish a copy of the records required in §175.64(e)(1) and (2) to the Department within thirty (30) days following completion of the action that initiated the record requirement.

(4) A registrant shall control access to a therapeutic radiation machine treatment room by a door at each entrance.

(5) A registrant shall equip each entrance to a therapeutic radiation machine room with a beam condition indicator light.

(6) **Dosimetry equipment.** (i) The registrant shall have a calibrated dosimetry system available for use. The system shall have been calibrated for cobalt-60 by the National Institute of Standards and Technology (NIST, formerly the National Bureau of Standards) or by an American Association of Physicists in Medicine (AAPM) Accredited Dosimetry Calibration Laboratory (ADCL). The calibration shall have been performed within the previous two (2) years and after any servicing that may have affected system calibration.

(ii) The registrant shall have available for use a dosimetry system for quality assurance check measurements. To meet this requirement, the system shall be compared with a system calibrated pursuant to §175.64(e)(6)(i) and shall have been performed within the previous twelve (12) months and after each servicing that may have affected system calibration. Alternatively, the spot check system may be the same system used to meet the requirement in §175.64(e)(6)(i).

(iii) The registrant shall maintain a record of each dosimetry system calibration, intercomparison, and comparison for the duration of the registration or certified registration. For each calibration, intercomparison, or comparison, the record shall include the date, the model numbers and serial numbers of the instruments that were calibrated, intercompared, or compared as required by §175.64(e)(6)(i) and (ii), the correction factors that were determined, the names of the individuals who performed the calibration, intercomparison, or comparison, and evidence that the intercomparison was performed by, or under the direct supervision of, a radiation therapy physicist.

(f) **Therapeutic radiation machines incapable of operating at 500 kV or above.** (1) **Leakage radiation.**

(i) When the x-ray tube is operated at its maximum rated tube current for the maximum kV, the leakage air kerma rate shall not exceed:

(A) for 5-50 kV systems: 1 mGy (100 mrad) in any one hour at any position 5 cm from the tube housing assembly; or

(B) for 50 and kV systems: 1 cGy (1 rad) in any one hour in any direction at 1 m from the source. This air kerma measurement may be averaged over areas not larger than 100 cm^2. In addition, the air kerma rate at a distance of 5 cm from the surface of the tube housing shall not exceed 30 cGy (30 rad) per hour.

(2) **Permanent beam limiting devices.** (i) Permanent diaphragms or cones used for limiting the useful beam shall provide at least the same degree of attenuation as required for the tube housing assembly.

(3) **Adjustable or removable beam limiting devices.** (i) All adjustable or removable beam limiting devices, diaphragms, cones or blocks shall not transmit more than 5 percent of the useful beam for the most penetrating beam used.

(ii) When adjustable beam limiting devices are used, the position and shape of the radiation field shall be indicated by a light beam.

(4) **Filter system.** (i) The filter system shall be so designed that:

(A) filters cannot be accidentally displaced at any possible tube orientation;

(B) for equipment installed after August 1, 1994, an interlock system prevents irradiation if the proper filter is not in place; and

(C) the air kerma rate outside the useful beam measured 1 m from the filter slot shall not exceed 1 cGy (1 rad) in any hour under any operating conditions.

(ii) Each filter shall be marked as to its material of construction and its thickness.

(5) **Tube immobilization.** (i) The x-ray tube shall be mounted so that it cannot accidentally turn or slide with respect to the housing aperture; and

(ii) the tube housing assembly shall be capable of being immobilized for stationary portal treatments.

(6) **Source marking.** (i) The tube housing assembly shall be marked so that it is possible to determine the location of the source to within 5 mm, and such marking shall be readily accessible for use during calibration procedures.

(7) **Beam block.** (i) Contact therapy tube housing assemblies shall have a removable shield of material, equivalent in attenuation to 0.5 mm of lead at 100 kV, which can be positioned over the entire useful beam exit port during periods when the beam is not in use.

(8) **Timer.** (i) A suitable irradiation control device shall be provided to terminate the irradiation after a pre-set time interval.

(ii) A timer which has a display shall be provided at the treatment control panel. The timer shall have a pre-set time selector.

(iii) The timer shall be a cumulative timer which activates with an indication of "BEAM-ON" and retains its reading after irradiation is interrupted or terminated. After irradiation is terminated and before irradiation can be reinitiated, it shall be necessary to reset the timer.

(iv) The timer shall terminate irradiation when a pre-selected time has elapsed, if any dose monitoring system present has not previously terminated irradiation.

(v) The timer shall permit accurate pre-setting and determination of exposure times as short as 1 sec.

(vi) The timer shall not permit an exposure if set at zero.

(vii) The timer shall not activate until the shutter is opened when irradiation is controlled by a shutter mechanism unless calibration includes a timer error correction to compensate for mechanical lag.

(viii) The timer shall be accurate to within 1 percent of the selected value or 1 second, whichever is greater.

(9) **Control panel functions.** (i) The control panel, in addition to the displays required by other provisions in §175.64(f), shall have:

(A) an indication of whether electrical power is available at the control panel and if activation of the x-ray tube is possible;

(B) an indication of whether x-rays are being produced;

(C) a means for indicating x-ray tube potential and current;

(D) a means for terminating an exposure at any time;

(E) a locking device which will prevent unauthorized use of the therapeutic radiation machine; and

(F) for therapeutic radiation machines installed after August 1, 1994, a positive display of the specific filter(s) in the beam.

(10) **Multiple tubes.** (i) When a control panel may energize more than one x-ray tube:

(A) it shall be possible to activate only one x-ray tube at any time;

(B) there shall be an indication at the control panel identifying which x-ray tube is energized; and

(C) there shall be an indication at the tube housing assembly when that tube is energized.

(11) **Target-to-skin distance (TSD).** (i) There shall be a means of determining the central axis TSD to within 1 cm and of reproducing this measurement to within 2 mm thereafter.

(12) **Shutters.** (i) Unless it is possible to bring the x-ray output to the prescribed exposure parameters within 5 sec after the x-ray "ON" switch is energized, the beam shall be attenuated by a shutter having a lead equivalency not less than that of the tube housing assembly. In addition, after the unit is at operating parameters, the shutter shall be controlled electrically by the operator from the control panel. An indication of shutter position shall appear at the control panel.

(13) **Low filtration x-ray tubes.** (i) Each therapeutic radiation machine equipped with a beryllium or other low-filtration window shall be clearly labeled as such upon the tube housing assembly and shall be provided with a permanent warning device on the control panel that is activated when no addition filtration is present to indicate that the dose rate is very high.

(14) Facility design requirements for therapeutic radiation machines capable of operating in the range of greater than 50 kV to 500 kV.

(i) In addition to shielding adequate to meet the requirements of §175.03(d), the treatment room shall provide:

(A) a system for continuous two-way aural communication between the patient and the operator at the control panel; and

(B) a system to permit continuous observation of the patient during irradiation by the operator from the control panel.

(ii) The therapeutic radiation machine shall not be used for patient irradiation unless both aural communication with and continuous observation of the patient are possible.

(15) **Additional requirements.** (i) Treatment rooms which contain a therapeutic radiation machine capable of operating above 150 kV shall meet the following additional requirements:

(A) all protective barriers shall be fixed except for entrance doors or beam interceptors;

(B) the control panel shall be located outside the treatment room, or in a totally enclosed and shielded booth which has a ceiling, inside the room;

(C) interlocks shall be provided such that all entrance doors, including doors to any interior booths, shall be closed before treatment can be initiated or continued; and

(D) if the radiation beam is interrupted by any door opening, it shall not be possible to restore the machine to operation without closing the door and reinitiating irradiation by manual action at the control panel.

(16) **Full calibration measurements.** (i) Full calibration of a therapeutic radiation machine subject to the requirements of §175.64(f) of this Code shall be performed by, or under the direct supervision of, a radiation therapy physicist:

(A) before the first medical use following installation or reinstallation of the therapeutic radiation machine;

(B) annually; and

(C) before medical use under the following conditions:

(a) whenever quality assurance check measurements indicate that the radiation output differs by more than 5 percent from the value obtained at the last full calibrations; or

(b) following any component replacement, major repair or modification of components that could affect the characteristics of the radiation beam.

(D) Notwithstanding the requirements of §175.64(f)(16)(i)(C):

(a) full calibration of therapeutic radiation machines with multi-energy capabilities is required only for those modes and/or energies that are not within their acceptable ranges; and

(b) if the repair, replacement or modification does not affect all energies, full calibration shall be performed at the affected energy that is in most frequent clinical use at the facility and the remaining energies may be validated by quality assurance check procedures using the criteria in §175.64(f)(16)(i)(C)(a).

(ii) Whenever a quality assurance check required by §175.64(f)(17) indicates a significant change in the operating characteristics of a system, as specified in the radiation therapy physicist's quality assurance manual, the system shall be recalibrated as specified herein.

(iii) To satisfy the requirement of §175.64(f)(16)(i), full calibration shall include all measurements recommended for annual calibration by the National Council on Radiation Measurement and Protection (NCRP) Report 69, "Dosimetry of X-Ray and Gamma Ray Beams for Radiation Therapy in the Energy Range 10 keV to 50 MeV" (1981), or any successor protocol, and be performed with a dosimetry system calibrated pursuant to §175.64(e)(6)(i).

(iv) The registrant shall maintain a record of each calibration for the duration of the registration. The record shall include the date of the calibration, the manufacturer's name, model and serial number or other unambiguous identification of both the therapeutic radiation machine and the x-ray tube, the model numbers and serial numbers or other unambiguous identification of the instruments used to calibrate the therapeutic radiation machine, and the signature of the radiation therapy physicist responsible for performing the calibration.

(17) **Periodic quality assurance checks.** (i) Periodic quality assurance checks shall be performed on therapeutic radiation machines subject to the requirements of §175.64(f) of this Code which are capable of operation at greater than 50 kV.

(ii) To satisfy the requirement of §175.64(f)(17)(i), quality assurance checks shall meet the following requirements:

(A) the registrant shall perform quality assurance checks in accordance with written procedures established by the radiation therapy physicist;

(B) the quality assurance check procedures shall specify that the quality assurance check shall be performed during the calibration specified in §175.64(f)(16)(i); and

(C) the quality assurance check procedures shall specify the frequency at which tests or measurements are to be performed and the acceptable tolerance for each parameter measured in the check, when compared to the value for that parameter determined in the full calibration specified in §175.64(f)(16)(i).

(iii) The cause for a parameter exceeding a tolerance set by the radiation therapy physicist shall be investigated and corrected before the system is used for patient irradiation.

(iv) The registrant shall use the dosimetry system specified in §175.64(e)(6)(ii) to make the periodic quality assurance check required in §175.64(f)(17)(i).

(v) The registrant shall have the radiation therapy physicist review and sign the results of each radiation output quality assurance check at intervals not to exceed one month.

(vi) Therapeutic radiation machines subject to the requirements of §175.64(f) of this Code shall have safety quality assurance checks of each external beam radiation therapy facility performed monthly. This requirement does not apply to facilities which have not been used for more than one month, except that such safety quality assurance checks shall be performed before the first clinical treatment when the facility is returned to use.

(vii) To satisfy the requirements of §175.64(f)(17)(vii), safety quality assurance checks shall ensure proper operation of:

(A) electrical interlocks at each external beam radiation therapy room entrance, including those at any interior control booths;

(B) proper operation of the "BEAM-ON" and termination switches;

(C) beam condition indicator lights on the access door(s), control console and in the radiation therapy room;

(D) viewing and aural communication systems; and

(E) electrically operated treatment room doors from inside and outside the treatment room.

(viii) The registrant shall promptly repair any system identified in §175.64(f)(17)(vii) that is not operating properly.

(ix) The registrant shall maintain a record of each quality assurance check required by §175.64(f)(17)(i) and §175.64(f)(17)(vi) for three (3) years. The record shall include the date of the quality assurance check, the manufacturer's name, model and serial number or other unambiguous identification of the therapeutic radiation machine and of the instrument(s) used to measure the radiation output of the therapeutic radiation machine, and the signature of the individual who performed the periodic quality assurance check.

(18) **Operating procedures.** (i) The therapeutic radiation machine shall not be used for irradiation of patients unless the requirements of §175.64(f)(16) and §175.64(f)(17) have been met.

(ii) Therapeutic radiation machines shall not be left unattended unless it is secured pursuant to §175.64(f)(9)(i)(E).

(iii) When a patient must be held in position for radiation therapy, mechanical supporting or restraining devices shall be used.

(iv) The tube housing assembly shall not be held by an individual during operation unless the assembly is designed to require such holding and the peak tube potential of the system does not exceed 50 kV. In such cases, the holder shall wear protective gloves and apron of not less than 0.5 mm lead equivalency at 100 kV.

(v) A copy of the current operating and emergency procedures shall be maintained at the therapeutic radiation machine control console.

(vi) No individual other than the patient shall be in the treatment room during exposures from therapeutic radiation machines operating above 150 kV. At energies less than or equal to 150 kV, an individual, other than the patient, in the treatment room shall be protected by a barrier sufficient to meet the requirements of §175.03 of this Code.

(19) **Possession of survey instrument(s).** (i) Each facility location authorized to use a therapeutic radiation machine in accordance with §175.64(f) of this Code shall possess appropriately calibrated portable monitoring equipment. At a minimum, such equipment shall include a portable radiation measurement survey instrument capable of measuring dose rates over the range of 10 mSv (1 mrem) per hour to 10 mSv (1000 mrem) per hour. The survey instruments shall be operable and calibrated in accordance with §175.64(h).

(g) **Therapeutic radiation machines: photon therapy systems capable of operating at 500 kV and above and/or electron therapy systems capable of operating at 500 keV and above.** (1) All therapeutic radiation machines installed after August 1, 1994 shall have an active (not withdrawn or terminated), approved Premarket Approval Application (PMA) issued by the U.S. Food and Drug Administration pursuant to 21 CFR Part 814, or any successor law or regulation.

(2) Leakage radiation outside the maximum useful beam.

(i) The absorbed dose rate due to leakage radiation (excluding neutrons) at any point outside the maximum sized useful beam, but within a circular plane of radius two (2) meters which is perpendicular to and centered on the central axis of the useful beam at the nominal treatment distance (i.e. patient plane), shall not exceed a maximum of 0.2 percent and an average of 0.1 percent of the absorbed dose rate on the center axis at the treatment distance. Measurements shall be averaged over an area not exceeding 100 cm^2 at a minimum of 8 points uniformly distributed in the plane.

(ii) The neutron absorbed dose rate outside the useful beam shall be kept as low as practicable. Measurements of the portion of the leakage radiation dose contributed by neutrons shall be averaged over an area not exceeding 800 cm^2.

(iii) For each therapeutic radiation machine, the registrant shall determine, or obtain from the manufacturer, the leakage radiation existing at the positions specified in §175.64(g)(1)(i) and (ii) for the specified operating conditions.

(iv) Records on leakage radiation measurements shall be maintained at the installation for inspection by the Department.

(3) **Filters and wedges.** (i) Each filter and/or wedge which is removable from the system shall be clearly marked with an identification number. For removable wedge filters, the nominal wedge angle shall appear on the wedge or wedge tray (if permanently mounted to the tray). If the wedge or wedge tray is damaged, the wedge transmission factor shall be redetermined.

(4) **Termination switches.** (i) It shall be possible to terminate irradiation and equipment movement or go from an interruption condition to termination condition at any time from the operator's position at the treatment control panel.

(5) **Facility design requirements for therapeutic radiation machines capable of operating above 500 kV or 500 keV.** (i) In addition to shielding adequate to meet the requirements of §175.03 of this Code, the following design requirements are made:

(A) All protective barriers shall be fixed, except for access doors to the treatment room or movable beam interceptors.

(B) In addition to other requirements specified in this section, the control panel shall: **(a)** be located outside the treatment room;

(b) provide an indication of whether electrical power is available at the control panel and if activation of the radiation source is possible;

(c) provide an indication of whether radiation is being produced; and

(d) include a locking access control device which will prevent unauthorized use of the therapeutic radiation machine.

(C) There shall be a system for continuous two-way aural communication between the patient and the operator at the control panel.

(D) There shall be a system to permit continuous observation of the patient following positioning and during irradiation by the operator from the control panel.

(E) Treatment room entrances shall be provided with warning lights in a readily observable position near the outside of all access doors which will indicate when the useful beam is "ON" and when it is "OFF."

(F) Interlocks shall be provided such that all entrance doors must be closed before treatment can be initiated or continued; if the radiation beam is interrupted by any door opening, it shall not be possible to restore the machine to operation without closing the door and reinitiating irradiation by manual action at the control panel.

(G) If the shielding material in any protective barrier requires the presence of a beam interceptor to ensure compliance with §175.03(d) of this Code, interlocks shall be provided to prevent the production of radiation, unless the beam interceptor is in place, whenever the useful beam is directed at the designated barrier(s).

(H) In addition to the termination switch required by §175.64(g)(4), at least one (1) emergency power cutoff switch or button (e.g. "scram button") shall be located in the radiation therapy treatment room and shall terminate all equipment electrical power including radiation and mechanical motion; all emergency power cutoff switches shall include a manual reset so that the therapeutic radiation machine cannot be restarted from the unit's control panel without

resetting the emergency cutoff switch.

(I) All safety interlocks shall be designed so that any defect or component failure in the safety interlock system prevents or terminates operation of the therapeutic radiation machine.

(J) Surveys for residual radioactivity shall be conducted on all therapeutic radiation machines capable of generating photon and electron energies above 10 MV or MeV prior to machining, removing or working on such machine's components which may have become activated due to photo-neutron production.

(6) **Radiation therapy physicist.** (i) The radiation therapy physicist named on the registrant's certified registration shall be responsible for:

(A) all full calibrations required by §175.64(g)(8) and protection surveys required by §175.64(e)(1);

(B) supervision and review of dosimetry as required by §175.07(c) of this Code;

(C) beam data acquisition and transfer for computerized dosimetry, and supervision of its use;

(D) quality assurance required by §175.07 of this Code and quality assurance check review required by §175.64(g)(9)(v);

(E) consultation with the authorized user(s) in treatment planning, as needed; and

(F) performance of calculations or other assessments regarding misadministrations.

(ii) If the radiation therapy physicist named on the registrant's certified registration is not a full-time employee of the registrant, the operating procedures required by §175.64(g)(7) shall specifically address how the radiation therapy physicist is to be contacted for problems or emergencies, as well as the specific actions to be taken until the radiation therapy physicist can be contacted.

(7) **Operating procedures.** (i) No individual, other than the patient, shall be in the treatment room during treatment.

(ii) The therapeutic radiation machine shall not be used for patient irradiation unless both aural and visual communication systems are operational and continuous observation of the patient is maintained.

(iii) No individual shall be in the treatment room during irradiation for testing or calibration purposes.

(iv) Therapeutic radiation machines shall not be used for medical use unless the requirements of §175.64(e)(1), §175.64(g)(8) and §175.64(g)(9) have been met.

(v) Therapeutic radiation machines, when not in operation, shall be secured to prevent unauthorized use.

(vi) If a patient must be held in position during treatment, mechanical supporting or restraining devices shall be used.

(vii) A copy of the current operating and emergency procedures shall be maintained at the therapeutic radiation machine control console.

(viii) Emergency procedures shall be posted in the treatment room.

(8) **Full calibration measurements.** (i) Full calibration of a therapeutic radiation machine subject to the requirements of §175.64(g) of this Code shall be performed by, or under the direct supervision of, the radiation therapy physicist named on the registrant's certified registration:

(A) before first medical use following installation or reinstallation of the therapeutic radiation machine;

(B) annually; and

(C) before medical use under the following conditions:

(a) whenever quality assurance check measurements indicate that the output differs by more than five (5) percent from the output obtained at the last full calibration; and

(b) following any component replacement, major repair, or modification of components that could affect the characteristics of the radiation beam; and

(D) Notwithstanding the requirements of §175.64(g)(8)(i)(C):

(a) full calibration of therapeutic radiation machines with multi-energy and/or multi-mode capabilities is required only for those modes and/or energies that are not within their acceptable ranges; and

(b) if the repair, replacement or modification does not affect all modes and/or energies, full calibration shall be performed on the affected mode/energy that is in most frequent clinical use for that machine at the facility and the remaining energies/modes may be validated with quality assurance check procedures pursuant to the criteria in §175.64(g)(8)(i)(C)(**a**).

(ii) To satisfy the requirement of §175.64(g)(8)(i), full calibration shall include all measurements required for annual calibration by "Comprehensive QA for Radiation Oncology: Report of AAPM Radiation Therapy Committee Task Group 40," Medical Physics 21(4):581-, 1994, or any successor protocol. Additionally, the facility shall conduct the output calibration for the therapeutic radiation machine's photon and electron beam modes according to the protocol as outlined in AAPM Report Task Group Report 21 ("A Protocol for the Determination of Absorbed Dose from High-Energy Photon and Electron Beams" Task Group 21 (TG21), Radiation Therapy Committee of American Association of Physicists in Medicine, published in Medical Physics, Volume 10(8), Nov/Dec 1983); or, AAPM Report Task Group Report 51(TG51) ("Protocol for Clinical Reference Dosimetry of High-Energy Photon and Electron Beams", Medical Physics, Volume 29(9), September 1999) or any successor to these documents.

(iii) The registrant shall use the dosimetry system described in §175.64(e)(6)(i) to measure the output at each discrete photon and electron energy (which the therapeutic radiation machine can produce) for one (1) set of exposure conditions. The remaining radiation measurements required in §175.64(g)(8)(ii) may then be made using a dosimetry system that indicates relative dose rates;

(iv) The registrant shall maintain a record of each calibration for the duration of the certified registration. The record shall include the date of the calibration, the manufacturer's name, model and serial number or other unambiguous identification of the therapeutic radiation machine along with the instrument's certificate of calibration, all measured beam output data collected during the calibration, the derivation for all the correction factors (as delineated in AAPM Reports TG 21 or TG 51 or any successor publication) applied to the `measured beam output data' in the calculation of the therapeutic radiation machine's beam output dose rate (the latter shall be conducted for each photon and electron beam clinically utilized at the facility), and the signature of the radiation therapy physicist named on the certified registration.

(9) **Periodic quality assurance checks.** (i) Periodic quality assurance checks shall be performed on each therapeutic radiation machine subject to the requirements of §175.64(g) of this Code.

(ii) To satisfy the requirement of §175.64(g)(9)(i), quality assurance checks shall include determination of all parameters for periodic quality assurance checks at the intervals contained in "Comprehensive QA for Radiation Oncology: Report of AAPM Radiation Therapy Committee Task Group 40," **Medical Physics 21(4):581-, 1994,** or any

successor protocol.

(iii) The registrant shall use a dosimetry system described in §175.64(e)(6)(ii) to make the periodic quality assurance checks required by §175.64(g)(9)(ii).

(iv) The registrant shall perform periodic quality assurance checks required by §175.64(g)(8)(i) in accordance with procedures established by the radiation therapy physicist named on the registrant's certified registration.

(v) The registrant shall review the results of each periodic radiation output check according to the following procedures:

(A) the authorized user and radiation therapy physicist shall be notified immediately if any parameter is not within its acceptable range as determined pursuant to §175.64(g)(9)(iv). The therapeutic radiation machine shall not be made available for subsequent medical use until the radiation therapy physicist has determined that all parameters are within their acceptable ranges;

(B) if all quality assurance check parameters appear to be within their acceptable ranges, the quality assurance check shall be reviewed and signed by either the authorized user or the radiation therapy physicist within ten (10) days; and

(C) the radiation therapy physicist shall review and sign the results of each radiation output quality assurance check at intervals not to exceed one (1) month.

(vi) Therapeutic radiation machines subject to the requirements of §175.64(g) of this Code shall have safety quality assurance checks of each external beam radiotherapy facility weekly.

(vii) To satisfy the requirement of §175.64(g)(9)(vi), safety quality assurance checks shall ensure proper operation of:

(A) electrical interlocks at each therapeutic radiation machine treatment room entrance;

(B) proper operation of "BEAM-ON", interrupt and termination switches;

(C) beam condition indicator lights on the access doors, control console, and in the radiation therapy treatment room;

(D) viewing and aural communication systems;

(E) electrically operated treatment room door(s) from inside and outside the treatment room;

(F) at least one (1) emergency power cutoff switch. If more than one (1) emergency power cutoff switch is installed and not all switches are tested at once, each switch shall be tested on a rotating basis.

(viii) The registrant shall lock the control console in the "off" position if any door interlock malfunctions. No registrant shall use the therapeutic radiation machine until the interlock system is repaired unless specifically authorized by the Department.

(ix) The registrant shall promptly repair any system identified in §175.64(g)(9)(vii) that is not operating properly.

(x) The registrant shall maintain a record of each quality assurance check required by §175.64(g)(9)(i) and (vii) for three (3) years. The record shall include the date of the quality assurance check, the manufacturer's name, model and serial number or other unambiguous identification of the therapeutic radiation machine of the instrument(s) used to measure the output of the therapeutic radiation machine, and the signature of the individual who performed the periodic

quality assurance check.

(10) **Reports of calibrations.** (i) The registrant shall furnish a copy of the initial full calibration report required by §175.64(g)(8)(i)(A) to the Bureau of Radiological Health within thirty (30) days following completion of the calibration.

(11) **Possession of survey instrument(s).** (i) Each facility location authorized to use a therapeutic radiation machine in accordance with §175.64(g) of this Code shall possess appropriately calibrated portable monitoring equipment. At a minimum, such equipment shall include a portable radiation measurement survey instrument capable of measuring dose rates over the range of 10 mSv (1 mrem) per hour to 10 mSv (1000 mrem) per hour. The survey instruments shall be operable and calibrated in accordance with §175.64(h).

(h) **Calibration and check of survey instruments.** (1) The registrant shall ensure that the survey instruments used to show compliance with the requirements of this section and other applicable parts of this Code have been calibrated before first use, at intervals not to exceed twelve (12) months and following repair.

(2) To satisfy the requirements of §175.64(h)(1), the registrant shall:

(i) calibrate all required scale readings up to 10 mSv (100 mrem) per hour with an appropriate radiation source;

(ii) calibrate at least two (2) points on each scale to be calibrated. These points should be at approximately $^1/_3$ and $^2/_3$ of the full scale.

(3) To satisfy the requirements of §175.64(h)(2), the registrant shall:

(i) consider a point as calibrated if the indicated dose rate differs from the calculated dose rate by not more than ten (10) percent; or

(ii) consider a point as calibrated if the indicated dose rate differs from the calculated dose rate by not more than twenty (20) percent if a correction factor or graph is conspicuously attached to the instrument.

(4) The registrant shall retain a record of each calibration required in §175.64(h)(1) for three (3) years and which shall include:

(i) a description of the calibration procedure;

(ii) the manufacturer, model and serial number of the instrument;

(iii) a description of the source used and the certified dose rates from the source (as evidenced by NIST traceability);

(iv) the rates indicated by the instrument being calibrated, the correction factors determined from the calibration data; and

(v) the signature of individual who performed the calibration and the date of calibration.

(5) Records of calibrations which contain information required by §175.64(h)(4) shall be maintained by the registrant at the facility.

HISTORICAL NOTE

Section repealed and added City Record June 27, 1994 eff. July 27, 1994.

Section in original publication July 1, 1991.

Subd. (g) par (8) subpars (ii), (iv) amended City Record Sept. 29, 2006, eff. Oct. 29, 2006. [See Vol. 9 Statements of Basis and Purpose No. 25]

Notes:

Paragraph (8) of subdivision (g) of §175.64 was amended on September 26, 2006, in order to specify the use of x-ray therapy protocols developed by the American Association of Physicists in Medicine to be followed by each licensed facility in conducting the annual radiation output measurement for each therapy unit, and to delineate the minimal content that should be contained in each annual calibration report by the facility for review by Department inspectors.

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 175 RADIATION CONTROL General Provisions

§175.65 Veterinary radiography and fluoroscopy.

(a) **Fixed radiographic installations.** (1) **Equipment.**

(i) Collimating devices capable of restricting the useful beam to the area of clinical interest shall be used.

(ii) The x-ray films used as the recording medium during the x-ray examination shall show substantial evidence of cut-off (beam delineation).

(iii) A device shall be provided which terminates the exposure after a preset time interval or exposure. The exposure switch shall be of the dead-man type and shall be so arranged that it cannot be operated outside a shielded area.

(2) **Conditions for operation of equipment.** (i) Only persons required for the x-ray procedure shall be in the x-ray room during exposures.

(ii) When an animal patient must be held in position during exposures, mechanical supporting or restraining devices shall be used.

(iii) Animal patients or films shall be held by an individual only under extreme conditions when clinically necessary. Such individuals shall wear protective gloves having at least 0.5 mm lead equivalent, a protective apron of at least 0.25 mm lead equivalent, and shall keep all parts of his/her body out of the useful beam.

(iv) The exposure of any individual used for holding animals shall be monitored.

(v) Pregnant women and individuals under 18 years of age shall not hold animal patients or films under any conditions.

(b) **Portable or mobile radiographic installations.** (1) **Equipment.**

(i) Collimating devices capable of restricting the useful beam to the area of clinical interest shall be used.

(ii) The x-ray film used as the recording medium during the x-ray examination shall show evidence of cut-off (beam delineation).

(iii) A device shall be provided which terminates the exposure after a preset time interval or exposure.

(iv) A dead-man type of exposure switch shall be provided with a cord of sufficient length so that the operator can stand at least two (2) m (6 ft) from the animal patient, the x-ray tube and out of the useful beam.

(2) **Conditions for operation of equipment.** (i) No person shall be regularly employed to support or hold animals or film during x-ray exposures.

(ii) When an animal patient must be held in position during exposures, mechanical supporting or restraining devices shall be used.

(iii) Animal patients or films shall be held by an individual only under extreme conditions when clinically necessary. Such individuals shall wear protective gloves having at least 0.5 mm lead equivalent, a protective apron of at least 0.25 mm lead equivalent, and shall keep all parts of his/her body out of the useful beam.

(iv) The exposure of any individual used for holding animals shall be monitored.

(v) Pregnant women and individuals under 18 years of age shall not hold animal patients or films under any conditions.

(c) **Fluoroscopic installations.** (1) **Equipment.**

(i) Equipment shall be so constructed that the entire cross-section of the useful beam is always intercepted by a primary protective barrier (usually a lead glass screen or image intensifier assembly) regardless of the panel-screen distance. For conventional fluoroscopes, this requirement may be assumed to have been met if, when the collimating system is opened to its fullest extent, an unilluminated margin is left on all edges of the fluorescent screen regardless of the position of the screen during use. Equipment with an image intensifier shall be so constructed that the useful beam cannot exceed the limits of the input phosphor.

(ii) The exposure shall automatically terminate when the barrier is removed from the useful beam.

(iii) With the fluoroscope operating at the highest potential employed and with the fluorescent screen 36 cm (14 in.) from the panel of the tabletop and in the useful beam without a patient, the exposure rate 5 cm (2 in.) beyond the viewing surface of the screen shall not exceed 7.74 E-6 $C\text{-}kg^{-1}\text{-}hr^{-1}$ (30 $mR\text{-}hr^{-1}$) for each 2.58 E-4 $C\text{-}kg^{-1}\text{-}\ min^{-1}$

($R\text{-}min^{-1}$) at the tabletop.

(iv) The fluoroscopic exposure switch shall be of the dead-man type.

(v) Provision shall be made to intercept the scattered x-rays from the undersurface of the tabletop and other structures under the table.

(vi) The source-panel or source-tabletop distance shall in no case be less than 30 cm (12 in.) and is recommended to be not less than 38 cm (15 in.).

(2) **Mobile fluoroscopic equipment is subject to the following additional requirements.** (i) In the absence of a tabletop, a cone or spacer frame shall limit the source-to-skin distance to not less than 30 cm (12 in.).

(ii) Image intensification shall always be provided.

(iii) It shall not be possible to operate a machine unless the useful beam is intercepted by the image intensifier.

(3) **Conditions for operation of equipment.** (i) Protective garments of at least 0.25 mm lead equivalent shall be available and shall be worn by the fluoroscopist during every examination.

(ii) Unless physical measurements indicate that they are not needed, protective garments of at least 0.25 mm lead equivalent each shall be worn by the physician, nurse, technician and all other persons within the fluoroscopy room.

(iii) Only persons needed in the fluoroscopic room shall be present during the exposure.

(iv) The fluoroscopic room shall be free of extraneous light that interferes with the examination.

§175.101 General requirements for radioactive materials licenses.

(a) **License required.** (1) Except for the removal of source material from its place of deposit in nature or as otherwise provided in this Code, no person shall transfer, receive, produce, possess or use any radioactive material except pursuant to a license issued by the Department.

(2) Fees for each license shall be paid pursuant to §5.07 of this Code.

(3) The requirements of this section are in addition to, and not in substitution for, other requirements of this Code. In any conflict between the requirements of this section and a specific requirement in another part of this Code, the specific requirement governs.

(b) **Exempt source material.** (1) Any person is exempt from the provisions of this code to the extent that such person receives, possesses, uses or transfers unrefined and unprocessed ore containing source material; provided that,

except as authorized in a specific license issued by the Department, the U.S. Nuclear Regulatory Commission or an agreement state, such person shall not refine or process such ore.

(2) Any person is exempt from the provisions of this Code to the extent that such person receives, possesses, uses or transfers source material in any chemical mixture, compound, solution or alloy in which the source material is by weight less than 1/20 of 1 percent (0.05%) of the mixture, compound, solution or alloy.

(3) Any person is exempt from the provisions of this Code to the extent that such person receives, possesses, uses or transfers:

(i) any quantities of thorium contained in:

(A) incandescent gas mantles;

(B) vacuum tubes;

(C) welding rods;

(D) electric lamps for illuminating purposes provided that each lamp does not contain more than 50 milligrams of thorium;

(E) germicidal lamps, sunlamps, and lamps for outdoor or industrial lighting provided that each lamp does not contain more than 2 grams of thorium;

(F) rare earth metals and compounds, mixtures, and products containing not more than 0.25 percent, by weight of thorium, uranium, or any combination of these; or

(G) personnel neutron dosimeters, provided that each dosimeter does not contain more than 50 milligrams of thorium;

(ii) any source material contained in the following products:

(A) glazed ceramic tableware, provided that the glaze contains not more than 20 percent by weight source material;

(B) glassware, containing not more than 10 percent by weight source material, but not including commercially manufactured glass brick, pane glass, ceramic tile or other glass, glass enamel or ceramic used in construction;

(C) glass enamel or glass enamel frit containing not more than 10 percent by weight of source material imported or ordered for importation into the United States, or initially distributed by manufacturers in the United States, before July 25, 1983; or

(D) piezoelectric ceramic, containing not more than 2 percent by weight source material;

(iii) photographic film, negatives, and prints containing uranium or thorium;

(iv) any finished or partly fabricated product of, or containing, tungsten- thorium or magnesium-thorium alloys, provided that the thorium content of the alloy does not exceed 4 percent by weight and that this exemption shall not be deemed to authorize the chemical, physical, or metallurgical treatment or processing of any such product or part;

(v) uranium contained in counterweights installed in aircraft, rockets, projectiles, and missiles, or stored or handled in connection with installation or removal of such counterweights, provided that:

(A) each counterweight is manufactured in accordance with a specific license issued by the U.S. Nuclear Regulatory Commission, authorizing distribution by the licensee pursuant to 10 CFR Part 40;

(B) each counterweight has been impressed with the following legend clearly legible through any plating or other covering: "DEPLETED URANIUM";

(C) each counterweight is durably and legibly labeled or marked with the identification of the manufacturer and the statement: "UNAUTHORIZED ALTERATIONS PROHIBITED"; and

(D) this exemption shall not be deemed to authorize the chemical, physical, or metallurgical treatment or processing of any such counterweights other than repair or restoration of any plating or other covering;

(vi) natural or depleted uranium metal used as shielding constituting part of any shipping container, provided that:

(A) the shipping container is conspicuously and legibly impressed with the legend "Caution-Radioactive Shielding-Uranium"; and

(B) the uranium metal is encased in mild steel or equally fire resistant metal or minimum wall thickness of one-eighth inch (3.2 mm);

(vii) thorium contained in finished optical lenses, provided that each lens does not contain more than 30 percent by weight of thorium, and that this exemption shall not be deemed to authorize either:

(A) the shaping, grinding, or polishing of such lens or manufacturing processes other than the assembly of such lens into optical systems and devices without any alteration of the lens; or

(B) the receipt, possession, use, or transfer of thorium contained in contact lenses, or in spectacles, or in eyepieces in binoculars or other optical instruments;

(viii) uranium contained in detector heads for use in fire detection units, provided that each detector head contains not more than 0.005 microcurie of uranium;

(ix) thorium contained in any finished aircraft engine part containing nickel-thoria alloy, provided that:

(A) the thorium is dispersed in the nickel-thoria alloy in the form of finely divided thoria (thorium dioxide); and

(B) the thorium content in the nickel-thoria alloy does not exceed 4 percent by weight.

(x) The exemptions contained in §175.101(b)(2) and (3)(i) through (ix) shall not authorize the manufacturer of any of the products described.

(c) **Exempt radioactive material other than source material.** (1) **Exempt concentrations.**

(i) Except as provided in §175.101(c)(1)(ii), any person is exempt from the provisions of this Code to the extent that such person receives, possesses, uses, transfers, owns or acquires products containing radioactive material introduced in concentrations not in excess of those listed in Appendix A of this section.

(ii) No person may introduce radioactive material into a product or material knowing or having reason to believe that it will be transferred to persons exempt under §175.101(c)(1)(i) or equivalent regulations of the U.S. Nuclear Regulatory Commission or an agreement state, except in accordance with a specific license issued pursuant to this Code or a general license provided for in this Code.

(2) **Exempt quantities.** (i) Except as provided in §175.101(c)(2)(ii) and (iii), any person is exempt from the provisions of this Code to the extent that such person receives, possesses, uses, transfers, owns or acquires radioactive material in individual quantities, each of which does not exceed the applicable quantity set forth in Appendix B of this section.

(ii) Section 175.101(c)(2)(i) does not authorize the production, packaging or repackaging of radioactive material for purposes of commercial distribution, or the incorporation of radioactive material into products intended for commercial distribution.

(iii) No person shall, for purposes of commercial distribution, transfer radioactive material in the individual quantities set forth in Appendix B of this section, knowing or having reason to believe that such quantities of radioactive material will be transferred to persons exempt under §175.101(c)(2)(i) or equivalent regulations of the U.S. Nuclear Regulatory Commission or an agreement state, except in accordance with a specific license issued by the U.S. Nuclear Regulatory Commission pursuant to §32.18 of 10 CFR Part 32, or by the Department, which license states that the radioactive material may be transferred by the licensee to persons exempt under §175.101(c)(2)(i) or the equivalent regulations of the U.S. Nuclear Regulatory Commission or any agreement state.

(3) **Exempt items.** Except for persons who apply radioactive material to, or persons who incorporate radioactive material into the following products, or persons who initially transfer such products for sale or distribution, any person is exempt from the provisions of this Code to the extent that such person receives, possesses, uses, transfers, owns or acquires the following products:

(i) Timepieces or timepiece hands or dials containing radium which were manufactured under a specific license issued by the Department or an agreement state and which meet the following or equivalent conditions:

(A) The timepiece or timepiece hands or dials contain no more than the following specified quantities of radium:

(a) 5.55 kBq (0.15 mCi) per watch;

(b) 1.11 kBq (0.03 mCi) per watch hand;

(c) 3.33 kBq (0.09 mCi) per watch dial;

(d) 7.4 kBq (0.2 mCi) per clock;

(e) 1.48 kBq (0.04 mCi) per clock hand; or

(f) 4.44 kBq (0.12 mCi) per clock dial.

(B) The timepiece is not a pocket watch.

(C) The timepiece is marked or coded to identify the date of manufacture and that it contains radium.

(D) The timepiece emits sufficient luminosity, omitting photoactivation, that its dial can be read in the dark during its entire design lifetime.

(ii) Timepieces or hands or dials containing not more than the following specified quantities of radioactive material and not exceeding the following specified radiation dose rates:

(A) 925 MBq (25 mCi) of hydrogen-3 per timepiece.

(B) 185 MBq (5 mCi) of hydrogen-3 per hand.

(C) 555 MBq (15 mCi) of hydrogen-3 per dial (bezels when used shall be considered as part of the dial).

(D) 3.7 MBq (100 mCi) of promethium-147 per watch or 7.4 MBq (200 mCi) of promethium-147 per any other timepiece.

(E) 0.74 MBq (20 mCi) of promethium-147 per watch hand or 1.48 MBq (40 mCi) of promethium-147 per other

timepiece hand.

(F) 2.22 MBq (60 mCi) of promethium-147 per watch dial or 4.44 MBq (120 mCi) of promethium-147 per other timepiece dial (bezels when used shall be considered as part of the dial).

(G) The radiation dose rate from hands and dials containing promethium-147 will not exceed, when measured through 50 milligrams per square centimeter of absorber:

(a) for wristwatches, 1 mGy (0.1 millirad) per hour at 10 centimeters from any surface; **(b)** for pocket watches, 1 mGy (0.1 millirad) per hour at 1 centimeter from any surface; **(c)** for any other timepiece, 2 mGy (0.2 millirad) per hour at 10 centimeters from any surface.

(H) 37 kBq (1 mCi) of radium-226 per timepiece in timepieces acquired prior to September 1, 1984.

(iii) Lock illuminators containing not more than 555 MBq (15 millicuries) of hydrogen-3 or not more than 74 MBq (2 millicuries) of promethium-147 installed in automobile locks. The radiation dose rate from each lock illuminator containing promethium-147 will not exceed 10 mGy (1 millirad) per hour at one centimeter from any surface when measured through 50 milligrams per square centimeter of absorber.

(iv) Precision balances containing not more than 37 MBq (1 millicurie) of hydrogen-3 per balance or not more than 18.5 MBq (0.5 millicurie) of hydrogen-3 per balance part.

(v) Automobile shift quadrants containing not more than 925 MBq (25 millicuries) of hydrogen-3.

(vi) Marine compasses containing not more than 27.8 GBq (750 millicuries) of hydrogen-3 gas and other marine navigational instruments containing not more than 9.25 GBq (250 millicuries) of hydrogen-3 gas.

(vii) Thermostat dials and pointers containing not more than 925 MBq (25 millicuries) of hydrogen-3 per thermostat.

(ix) Electron tubes, provided, that each tube does not contain more than one of the following specified qualities of radioactive material:

(A) 5.55 GBq (150 millicuries) of hydrogen-3 per microwave receiver detector tube or 370 MBq (10 millicuries) of hydrogen-3 per any other electron tube;

(B) 37 kBq (1 mCi) of cobalt-60;

(C) 185 kBq (5 mCi) of nickel-63;

(D) 1.11 MBq (30 mCi) of krypton-85;

(E) 185 kBq (5 mCi) of cesium-137;

(F) 1.11 MBq (30 mCi) of promethium-147;

and, provided further, that the radiation dose rate due to radioactive material contained in each electron tube does not exceed 10 mGy (1 millirad) per hour at one centimeter from any surface when measured through 7 milligrams per square centimeter of absorber.

(x) Ionizing radiation measuring instruments containing, for purposes of internal calibration or standardization, one or more sources of radioactive material, provided that:

(A) each source contains no more than one exempt quantity set forth in Appendix B of this section, and

(B) each instrument contains no more than 10 exempt quantities. For purposes of this requirement, an instrument's source(s) may contain either one or different types of radioactive materials and an individual exempt quantity may be composed of fractional parts of one or more of the exempt quantities in Appendix B of this section, provided that the sum of such fractions shall not exceed unity; and

(C) for the purposes of §175.101(c)(3)(x), 1.85 kBq (0.05 mCi) of americium-241 shall be considered one exempt quantity.

(xi) Spark gap irradiators containing not more than 37 kBq (1 mCi) of cobalt-60 per spark gap irradiator for use in electrically ignited fuel oil burners having a firing rate of at least 3 gallons (11.4 liter) per hour.

(xii) The exemptions contained in §175.101(c)(3)(i) through (xi) shall not authorize the application or incorporation of radioactive materials into the listed devices.

(4) Any person, except those who manufacture, process, or produce self-luminous products containing hydrogen-3, krypton-85, or promethium-147, is exempt from the provisions of this Code to the extent that such person receives, possesses, uses, transfers, owns, or acquires hydrogen-3, krypton-85 or promethium-147 in self-luminous products manufactured, processed, produced, imported, or transferred in accordance with a specific license issued by the U.S. Nuclear Regulatory Commission pursuant to 10 CFR §32.22, which license authorizes the transfer of the product to persons who are exempt from regulatory requirements. This exemption does not apply to hydrogen-3, krypton-85, or promethium-147 used in products for frivolous purposes or in toys or adorn- ments.

(5) Any person is exempt from the provisions of this Code to the extent that such person receives, possesses, uses, transfers, or owns articles containing less than 3.7 kBq (0.1 mCi) of radium-226 which were acquired prior to October 30, 1986.

(6) Any person, except those who manufacture, process, or produce gas and aerosol detectors containing radioactive material, is exempt from the provisions of this Code to the extent that such person receives, possesses, uses, transfers, owns or acquires radioactive material in gas and aerosol detectors designed to protect life or property from fires and airborne hazards provided that detectors containing radioactive material shall have been manufactured, imported, or transferred in accordance with a specific license issued by the U.S. Nuclear Regulatory Commission pursuant to 10 CFR §32.26, or by an agreement state pursuant to equivalent regulations.

(i) Gas and aerosol detectors previously manufactured and distributed to general licensees in accordance with a specific license issued by an agreement state shall be considered exempt, provided that the device is labeled in accordance with the specific license authorizing distribution of the generally licensed device, and provided further that they meet requirements equivalent to 10 CFR §32.26.

(d) **Licensees and contractors of the U.S. Department of Energy and U.S. Nuclear Regulatory Commission.** (1) The owner or the person in charge of any radiation installation licensed by the U.S. Department of Energy and/or the U.S. Nuclear Regulatory Commission is exempt from the requirements of this Code provided that such owner or person in charge shall:

(i) afford the Department access to all records which such person is required to maintain pursuant to the U.S. Department of Energy or U.S. Nuclear Regulatory Commission license or contract issued to such person;

(ii) afford the Department opportunity to sample effluents, and to conduct such surveys of levels of radiation and radioactive contamination, as will not substantially interfere with or interrupt for any substantial period of time any activity licensed by or contracted for by the U.S. Department of Energy or U.S. Nuclear Regulatory Commission; and

(iii) afford inspectors or officers of the Department access to any installation in which such radioactive materials are present to accomplish the foregoing review of records, sampling of effluents, and conduct of surveys.

(2) Any U.S. Department of Energy or U.S. Nuclear Regulatory Commission contractor or subcontractor of the following categories operating within the City is exempt from the requirements of this Code to the extent that such contractor, or subcontractor under such contractor, transfers, receives, possesses, uses or acquires sources of radiation:

(i) prime contractors performing work for the U.S. Department of Energy at United States government-owned or controlled sites including the transportation of sources of radiation to or from such sites and the performance of contract services during temporary interruptions of such transportation;

(ii) prime contractors of the U.S. Department of Energy performing research in, or development, manufacture, storage, testing, or transportation of, atomic weapons or components thereof;

(iii) prime contractors of the U.S. Department of Energy using or operating nuclear reactors or other nuclear devices in a United States-owned vehicle or vessel; and

(iv) any other prime contractor or subcontractor of the U.S. Department of Energy or of the U.S. Nuclear Regulatory Commission when the City and the U.S. Nuclear Regulatory Commission jointly determine:

(A) that the exemption of the prime contractor or subcontractor is authorized by law; and

(B) that under the terms of the contract or subcontract, there is adequate assurance that the work thereunder can be accomplished without undue risk to the public health and safety.

(e) **General requirements for issuing specific licenses.** (1) The Department will approve an application for, and issue in response thereto, a specific license to receive, produce, possess, use and transfer any radioactive material, if the Department determines that the following requirements have been met:

(i) the applicant's proposed use, equipment, facilities and procedures will protect health and safety and will minimize danger to life and property from radiation hazards; and

(ii) the applicant's radiation detection and measuring instrumentation is appropriate for the radioactive materials and uses thereof requested in the application; and

(iii) the applicant, or the applicant's personnel, if the applicant is not an individual, is qualified by training and experience to use such radioactive material for the purposes covered by the application so as to protect public health and safety and to minimize danger to life and property from radiation hazards; and

(iv) the applicant submits sufficient information to support a determination that the requirements of §175.101(e)(1)(i) through (iii) are satisfied.

(f) **Applications for specific licenses.** (1) A license application shall be made in writing on forms prescribed by the Department and shall contain completely and accurately the information required thereon. Such application shall be filed in duplicate (original plus one copy) and may incorporate, by clear specific reference, information contained in any previous application, supplementary statement, notification or report filed with the Department.

(2) Each application or supplementary statement shall be signed by either the applicant personally or a person duly authorized by the applicant to sign for and on the applicant's behalf.

(3) For those applicants or licensees who are required to establish and maintain a radiation safety committee pursuant to this Code, each application or supplementary statement shall be transmitted with a letter signed by the chairman of the radiation safety committee indicating the committee's approval of the requested licensing action.

(4) At any time subsequent to the filing of an application for a license, including amendments, and before the termination of a license issued in response thereto, the Department may require the applicant to submit one or more

supplementary statements containing additional information to enable the Department to determine whether such application should be approved or denied, or whether a previously issued license should be amended, suspended or revoked.

(5) A single application may apply for a license covering more than one radioactive material.

(6) Specific licenses issued by the Department shall be in the form of a written authorization permitting possession of certain specific radioactive materials in not more than certain specific quantities, and certain specific uses of these radioactive materials. Such possession and use of radioactive materials provided for in the foregoing shall be subject to the requirements of:

(i) all applicable provisions of this Code; and

(ii) all conditions as stated on the license issued by the Department.

(g) **Amendments.** (1) When a change affecting the licensed operation or facility is considered by a licensee, including but not limited to changes ordered pursuant to this Code, so that the information on file with the Department, either in the initial license application or subsequent requests for amendments, or in the initial license or amendment previously granted, will no longer be accurate, the licensee shall request and receive an amendment for such change prior to causing such change.

(2) Any application by a licensee for a license amendment to conform with the provisions of §175.101(g)(1) shall be filed in writing with the Department and shall set forth in detail the reasons for such requested amendment. In considering any such application for amendment, the Department shall apply the requirements set forth in §175.101(e).

(3) A corrective amendment of any license may be issued by the Department at any time upon its initiative.

(4) Any license may be amended or revoked by the Department by reason of the amendment of this Code, or any other applicable law.

(h) **Expiration, renewal and termination of licenses.** (1) Except as otherwise provided in this Code, each license shall expire at the end of the day on the expiration date stated in the license. If, not less than 30 days prior to such expiration date, a licensee duly files with the Department an application in proper form for license renewal, or for a new and superseding license, the existing license shall not be deemed to have expired until the Department has finally determined such application.

(2) Any application by a licensee for the renewal of such license, including amendments, shall be considered as an application for a license and shall be filed on, and shall contain completely and accurately all information called for by, a written form or other manner prescribed by the Department. In considering any such application for renewal, the Department shall apply the requirements set forth in §175.101(e).

(3) Each licensee shall notify the Department in writing and request termination of the license when the licensee decides to terminate all activities authorized under the license. This notification and request for termination shall include the reports and information specified in §175.101(h)(4)(v) and a plan for completion of decommissioning.

(4) If a licensee does not submit an application for renewal pursuant to §175.101(h)(1), the licensee shall on or before the expiration date stated in the license:

(i) terminate use of radioactive material;

(ii) dispose of all radioactive material in accordance with all applicable regulations in effect at the time of disposal;

(iii) submit a written certification of the disposition of all radioactive materials authorized by the license on forms

prescribed by the Department;

(iv) remove radioactive contamination to the extent practicable; and

(v) conduct a radiation survey of the premises where the licensed activities were carried out and submit a report of the results of this survey to the Department. Such survey shall be subject to confirmation by the Department and shall include:

(A) levels of radiation in units (or multiples) of $Gy\text{-}hr^{-1}$ ($millirads\text{-}hr^{-1}$) at one (1) cm for beta-gamma radiation or at one (1) m for gamma radiation;

(B) levels of removable and fixed contamination, including alpha, in units of disintegrations (transformations) per min (becquerels) per 100 cm^2 for surfaces;

(C) $becquerels\text{-}ml^{-1}$ ($mCi\text{-}ml^{-1}$) for water;

(D) $becquerels\text{-}g^{-1}$ ($pCi\text{-}ml^{-1}$) for solids such as soil or concrete; and

(E) a description of the survey or other measuring instrument(s) used, including manufacturer(s) and model number(s) and date of most recent calibration.

(vi) If the information submitted pursuant to §175.101(h)(4)(v) does not adequately demonstrate that the premises are suitable for unrestricted use, the Department shall inform the licensee of the appropriate further actions required for the termination of the license, including, but not limited to, decontamination of the licensed premises to such levels and within such time frames as the Department may prescribe.

(vii) Each specific license shall continue in effect, beyond the expiration date if necessary, with respect to possession of residual radioactive materials present as contamination until the Department issues an amendment terminating the license. During this time the licensee shall:

(A) limit activities involving radioactive material to those related to decommissioning; and

(B) continue to control entry to restricted areas until the Department determines they are suitable for release for unrestricted use and the Department issues an amendment terminating the license.

(viii) The Department will approve a request for termination of a specific license, and issue an amendment terminating such license, when the Department determines that:

(A) radioactive material has been properly disposed; and

(B) premises have been decontaminated to such levels that the total effective dose equivalent (TEDE) from residual radioactivity distinguishable from background radiation, to an average member of the public will not exceed 25 mrem (0.25 mSv) per year;

(C) a radiation survey has been performed which describes all radiation levels and levels of fixed and removable contamination; and

(D) the licensee submits sufficient information to support a determination that the requirements of §175.101(h)(4)(viii)(A) through (C) have been met.

(i) **Amendment, suspension or revocation of licenses.** (1) Specific and general licenses shall be subject to amendment, suspension or revocation by reason of amendment of the New York State Public Health Law, enactment or amendment of any other applicable law, amendment of the New York State Sanitary Code, amendment of this Code, or

amendment or promulgation of any other applicable rule, regulation or order.

(2) In addition to the provisions of §5.17 of this Code, the Department may amend, revoke or suspend any license, in whole or in part, for:

(i) Any material misstatement in the application therefor or in any supplementary statement thereto.

(ii) Any condition revealed by such application, supplementary statement, report, record, inspection or other means, which would warrant the Department's refusal to grant a license on an original application.

(iii) Any violation or failure to observe any condition of such license, this Code, or any other applicable rule, regulation or law now or hereafter in effect.

(iv) Failure to notify the Department of a change in ownership or address of a radiation installation.

(j) **Emergency response plan.** (1) Each application for a license to possess radioactive materials in unsealed form, on foils or plated sources, or sealed in glass and in excess of the quantities specified in Appendix C of this section shall include either:

(i) an evaluation showing that the maximum dose to a person offsite due to a release of radioactive materials would not exceed 10 mSv (1 rem) effective dose equivalent or 50 mSv (5 rem) to the thyroid; or

(ii) an emergency plan for responding to a release of radioactive material.

(2) One or more of the following factors may be used to support an evaluation submitted pursuant to §175.101(j)(1)(i):

(i) The radioactive material is physically separated so that only a portion could be involved in an accident.

(ii) All or part of the radioactive material is not subject to release during an accident because of the way it is stored or packaged.

(iii) The release fraction in the respirable size range would be lower than the release fraction shown in Appendix C of this section due to the chemical or physical form of the material.

(iv) The solubility of the radioactive material would reduce the dose received.

(v) Facility design or engineered safety features in the facility would cause the release fraction to be lower than that shown in Appendix C of this section.

(vi) Operating restrictions or procedures would prevent a release fraction as large as that shown in Appendix C of this section.

(vii) Other factors appropriate for the specific facility.

(3) An emergency plan for responding to a release of radioactive material submitted pursuant to §175.101(j)(1)(ii) shall include the following information:

(i) A brief description of the licensee's facility and area near the site.

(ii) An identification of each type of radioactive materials accident for which protective actions may be needed.

(iii) A classification system for classifying accidents as alerts or site area emergencies.

(iv) Identification of the means of detecting each type of accident in a timely manner.

(v) A brief description of the means and equipment for mitigating the consequences of each type of accident, including those provided to protect workers onsite, and a description of the program for maintaining the equipment.

(vi) A brief description of the methods and equipment to assess releases of radioactive materials.

(vii) A brief description of the responsibilities of licensee personnel should an accident occur, including identification of personnel responsible for promptly notifying offsite response organizations and the Department.

(viii) A brief description of the responsibilities for developing, maintaining and updating the plan.

(ix) A commitment to, and brief description of, the means to promptly notify offsite response organizations and to request offsite assistance, including medical assistance for the treatment of contaminated injured onsite workers when appropriate. A control point must be established. The notification and coordination must be planned so that unavailability of some personnel, parts of the facility, and some equipment will not prevent the notification and coordination. The licensee shall also commit to notify the Department immediately after notification of the appropriate offsite response organizations and not later than one (1) hour after the licensee declares an emergency.

(x) A brief description of the types of information on facility status, radioactive releases, and recommended protective actions, if necessary, to be given to offsite response organizations and the Department.

(xi) A brief description of the frequency, performance objectives and plans for the training that the licensee will provide workers on how to respond to an emergency including any special instructions and orientation tours the licensee would offer to fire, police, medical and other emergency personnel. The training shall familiarize personnel with site-specific emergency procedures. The training shall thoroughly prepare site personnel for their responsibilities in the event of accident scenarios postulated as most probable for the specific site, including the use of team training for such scenarios.

(xii) A brief description of the means of restoring the facility to a safe condition after an accident.

(xiii) Provisions for conducting quarterly communications checks with offsite response organizations and biennial onsite exercises to test response to simulated emergencies. Quarterly communications checks with offsite response organizations must include the check and update of all necessary telephone numbers. The licensee shall invite offsite response organizations to participate in the biennial exercises. Participation of offsite response organizations is recommended, but not required. Exercises must use accident scenarios postulated as most probable for the specific site and the scenarios shall not be known to most exercise participants. The licensee shall critique each exercise using individuals not having direct implementation responsibility for the plan. Critiques of exercises must evaluate the appropriateness of the plan, emergency procedures, facilities, equipment, training of personnel and overall effectiveness of the response. Plan deficiencies identified in the critiques shall be corrected.

(xiv) A certification that the applicant has met its responsibilities under the Emergency Planning and Community Right-to-Know Act of 1986 codified at 42 USCA 11001 **et seq.,** if applicable to the applicant's activities at the proposed place of use of the radioactive materials.

(4) The licensee shall allow the offsite response organizations expected to respond in case of an accident sixty (60) days to comment on the licensee's emergency response plan before submitting it to the Department. The licensee shall provide any comments received within the sixty (60) days to the Department with the plan.

(k) **Conditions of specific licenses.** (1) Each of the following is hereby made a condition of each specific license:

(i) The licensee thereunder shall comply with all applicable provisions of the New York State Public Health Law,

all applicable provisions of this Code, all other laws now or hereafter in effect, and with all applicable rules, regulations, codes and orders now or hereafter in effect of the Department and of all appropriate regulatory agencies.

(ii) Neither such license, nor any right, title or interest in, of or to such license, shall be disposed of by assignment, transfer or otherwise, either voluntarily or involuntarily, either directly or indirectly, unless the Department shall, after securing complete and accurate pertinent information, have approved in writing of such disposal.

(iii) The licensee shall confine the possession and use of radioactive material to such location or locations and for such purpose or purposes as the license may authorize; provided, however, that except as otherwise provided in such license or this Code, such license shall be deemed to authorize the licensee to transfer the material covered by such license to any other person authorized to receive it by the Department, the U.S. Nuclear Regulatory Commission or an agreement state.

(iv) No person, in any advertisement, expressly or by implication, shall refer to the fact that an installation is licensed by the Department, and no person shall state or imply that an installation or its activities have been approved by the Board of Health, the Department or the Commissioner.

(v) The licensee shall notify the Department, in writing, within thirty (30) days if an authorized user, radiation safety officer or radiation therapy physicist permanently discontinues performance of duties under the license.

(vi) Each licensee shall notify the Department, in writing, immediately following the filing of a voluntary or involuntary petition for bankruptcy under any chapter of Title 11 (Bankruptcy) of the United States Code by or against:

(A) the licensee;

(B) an entity (as that term is defined in 11 U.S.C. §101(14)) controlling the licensee or listing the license or licensee as property of the estate; or

(C) an affiliate (as that term is defined in 11 U.S.C. §101(2)) of the licensee.

This notification must indicate:

(A) the bankruptcy court in which the petition for bankruptcy was filed; and

(B) the date of the filing of the petition.

(vii) Any license covering the use of special nuclear material, in the course of which licensed use additional special nuclear material is produced, shall be deemed to cover any such special nuclear material so produced, provided however, that the total quantity of special nuclear material possessed by the licensee is not sufficient to form a critical mass.

(viii) A licensee, employee of a licensee, contractor, subcontractor, or employee of a contractor or subcontractor shall not:

(A) engage in a deliberate misconduct that causes or would have caused if not detected, a licensee or applicant to be in violation of any provision of this Code or license condition issued by the Department; or

(B) deliberately submit to the Department information that the person submitting the information knows to be incomplete or inaccurate in some respect to the Department.

(2) The Department may at any time set forth in any license or incorporate by reference therein, additional conditions, restrictions or requirements applicable to the licensee's receipt, production, possession, use or transfer of radioactive material covered by such license in order to protect the public health and safety and to minimize danger to

life and property from radiation hazards.

(3) All licensees subject to the criteria to implement Increased Controls pursuant to the U.S. Nuclear Regulatory Commission (NRC) Order EA 05-090, 70 FR 72128, dated December 1, 2005, shall have as part of their Increased Control Program, a Fingerprinting and Criminal History Records Check procedure established for all individuals whom the licensee wishes to allow unescorted access to radioactive material quantities of concern. Such Fingerprinting and Criminal History Records Check procedures shall adhere to the requirements in NRC Order EA-07-305, 72 FR 70901, or any successor order, law or regulation. The requirements of this provision shall apply to all affected licensees upon its effective date.

(l) **Transfer of radioactive materials.** (1) No licensee shall transfer radioactive material except as authorized pursuant to this subsection.

(2) Except as provided otherwise by the license, and subject to the provisions of §175.101(l)(3) and (4), a licensee may transfer radioactive material:

(i) to the Department, after receiving prior written approval of the Department;

(ii) to the U.S. Nuclear Regulatory Commission;

(iii) to any person exempt from the provisions of this Code to the extent permitted under such exemption;

(iv) to any person authorized to receive radioactive material under the terms of a general license or its equivalent, or a specific license or equivalent licensing document, issued by the Department, the U.S. Nuclear Regulatory Commission, or an agreement state, or to any person otherwise authorized to receive radioactive material by the federal government or any agency thereof, the department, or an agreement state; or

(v) as otherwise authorized by the Department in writing.

(3) Before transferring radioactive material to a specific licensee of the Department, the U.S. Nuclear Regulatory Commission or an agreement state, or to a general licensee who is required to register with the Department, the U.S. Nuclear Regulatory Commission or an agreement state prior to the receipt of the radioactive materials, the licensee transferring the radioactive material shall verify that the transferee's license or registration certificate authorizes the receipt of the type, form and quantity of radioactive material to be transferred.

(4) The following methods for the verification required by §175.101(l)(3) are acceptable:

(i) the transferor may have in his/her possession, and read, a current copy of the transferee's specific license or registration certificate; or

(ii) the transferor may have in his/her possession a written certification by the transferee that he/she is authorized by license or registration certificate to receive the type, form and quantity of radioactive material to be transferred, specifying the license or registration certificate number, issuing agency and expiration date; or

(iii) for emergency shipments the transferor may accept oral certification by the transferee that he is authorized by license or registration certificate to receive the type, form, and quantity of radioactive material to be transferred, specifying the license or registration certificate number, issuing agency and expiration date, provided that the oral certification is confirmed in writing within 10 days; or

(iv) the transferor may obtain other sources of information compiled by a reporting service from official records of the Department, the U.S. Nuclear Regulatory Commission or an agreement state as to the identity of licensees and the scope and expiration dates of licenses and registrations; or

(v) when none of the methods of verification described in §175.101(l)(4)(i) through (iv) are readily available, or when a transferor desires to verify that information received by one of such methods is correct or up-to-date, the transferor may obtain and record confirmation from the Department, the U.S. Nuclear Regulatory Commission, or an agreement state that the transferee is licensed to receive the radioactive material.

(5) Preparation for shipment and transport of radioactive material shall be in accordance with the provisions of §175.105 of this Code.

(m) **Reciprocity.** (1) The holder of a license issued by the New York State Department of Labor, the New York State Department of Health, the U.S. Nuclear Regulatory Commission or any agreement state, may bring, possess or use radioactive material covered by such license within the Department's jurisdiction for a period not in excess of 180 days in any twelve consecutive months without obtaining a license from the Department, provided that:

(i) such license does not limit the holder's possession or use of such material to a specific installation or installations;

(ii) such holder, prior to bringing such material into the city, files with the Department a notice indicating the period, type and location of proposed possession and use within the Department's jurisdiction, and a copy of the license;

(iii) such holder supplies such additional information as the Department may reasonably request;

(iv) such holder, during the period of this possession and use of such material within the city, complies with all applicable sections of this Code except §175.101(a)(1); and

(v) such holder, during such period, complies with all the terms and conditions of his license, except such terms or conditions which may be inconsistent with this Code.

(2) The holder of a license issued by the New York State Department of Labor, the New York State Department of Health, the New York City Department of Health and Mental Hygiene or an Agreement State must obtain reciprocity approval from the U.S. Nuclear Regulatory Commission to conduct licensed activity in areas of exclusive federal jurisdiction within New York City. At least three days before engaging in each activity for the first time in a calendar year, the licensee will provide the U.S. Nuclear Regulatory Commission with advanced notice of its proposed activity in areas under exclusive federal jurisdiction within New York City.

(n) **Financial assurance and recordkeeping for decommissioning.**

(1)(a) Each applicant for a specific license authorizing the possession and use of unsealed radioactive material of half-life greater than 120 days and in quantities exceeding 10^5 times the applicable quantities set forth in Appendix B to this section shall submit a decommissioning funding plan as described in §175.101(n)(5). The decommissioning funding plan must also be submitted when a combination of isotopes is involved if R divided by 10^5 is greater than one (1) (unity rule), where R is defined here as the sum of the ratios of the quantity of each isotope to the applicable value in Appendix B to this section.

(1)(b) Each holder of, or applicant for, any specific license authorizing the possession and use of sealed sources or plated foils of half-life greater than 120 days and in quantities exceeding 10 times the applicable quantities set forth in Appendix B to this section shall submit a decommissioning funding plan as described in §175.101(n)(5). The decommissioning funding plan must also be submitted when a combination of isotopes is involved if R, as defined in §175.101(n)(1)(a), divided by 10^{12} is greater than one (1) (unity rule). The decommissioning funding plan must be submitted to the Department within 2 years of the effective date of this provision.

(1)(c) Each applicant for a specific license authorizing the possession and use of more than 100 mCi of source material in a readily dispersible form shall submit a decommissioning funding plan as described in §175.101(n)(5).

(1)(d) Each applicant for a specific license authorizing possession and use of quantities of source material greater than 10 mCi but less than or equal to 100 mCi in a readily dispersible form shall either:

(i) Submit a decommissioning funding plan as described in §175.101(n)(5); or

(ii) Submit a certification that financial assurance for decommissioning has been provided in the amount of $225,000 within eighteen months of the effective date of this provision using one of the methods described in §175.101(n)(6). For an applicant, this certification may state that the appropriate assurance will be obtained after the application has been approved and the license issued but before the receipt of licensed material. If the applicant defers execution of the financial instrument until after the license has been issued, a signed original of the financial instrument obtained to satisfy the requirements of paragraph §175.101(n)(6) of this section must be submitted to the Department prior to receipt of licensed material. If the applicant does not defer execution of the financial instrument, the applicant shall submit to the Department as part of the certification, a signed original of the financial instrument obtained to satisfy the requirements of paragraph §175.101(n)(6) of this section.

(1)(e) Each applicant for a specific license authorizing the possession and use of unsealed special nuclear material in quantities exceeding 10^5 times the applicable quantities set forth in Appendix B to this section shall submit a decommissioning funding plan as described in §175.101(n)(5). A decommissioning funding plan must also be submitted when a combination of isotopes is involved if R, as defined in §175.101(n)(1)(a), divided by 10^5 is greater than one (1) (unity rule).

(2) Each applicant for a specific license authorizing possession and use of radioactive material of half-life greater than 120 days and in quantities specified in §175.101(n)(4) shall either:

(i) submit a decommissioning funding plan as described in §175.101(n)(4); or

(ii) submit a certification that financial assurance for decommissioning has been provided in the amount prescribed by §175.101(n)(4) using one of the methods described in §175.101(n)(6). For an applicant, this certification may state that the appropriate assurance will be obtained after the application has been approved and the license issued but before the receipt of licensed material. If the applicant defers execution of the financial instrument until after the license has been issued, a signed original of the financial instrument obtained to satisfy the requirements of paragraph §175.101(n)(6) of this section must be submitted to the Department prior to receipt of licensed material. If the applicant does not defer execution of the financial instrument, the applicant shall submit to the Department as part of the certification, a signed original of the financial instrument obtained to satisfy the requirements of paragraph §175.101(n)(6) of this section.

(3) (i) Each holder of a specific license issued on or after July 27, 1990, which is of a type described in §175.101(n)(1) or (2), shall provide financial assurance for decommissioning in accordance with the criteria set forth in this section.

(ii) Each holder of a specific license issued before July 27, 1990, and of a type described in §175.101(n)(1) or (2), shall submit a decommissioning funding plan as described in §175.101(n)(5) or a certification of financial assurance for decommissioning in an amount at least equal to $1,125,000 in accordance with the criteria set forth in this section. If the licensee submits the certification of financial assurance rather than a decommissioning funding plan, the licensee shall include a decommissioning funding plan in any application for license renewal.

(iii) Each holder of a specific license issued before July 27, 1990, and of a type described in §175.101(n)(2), shall submit a certification of financial assurance for decommissioning or a decommissioning funding plan in accordance with the criteria set forth in this section.

(4) Table of required amounts of financial assurance for decommissioning by quantity of material. Licensees required to submit the $1,125,000 amount must do so within 1 year of the effective date of this provision. Licensees

required to submit the $113,000 or $225,000 amount must do so within 18 months of the effective date of this provision. Licensees having possession limits exceeding the upper bounds of this table must base financial assurance on a decommissioning funding plan.

(i) Greater than 10^4 but less than or equal to 10^5 times the applicable quantities of Appendix B to this section in unsealed form (for a combination of isotopes, if R, as defined in §175.101(n)(1)(a), divided by 10^4 is greater than 1, but R divided by 10^5 is less than or equal to 1)-$1,125,000.

(ii) Greater than 10^3 but less than or equal to 10^4 times the applicable quantities of Appendix B to this section in unsealed form (for a combination of isotopes, if R, as defined in §175.101(n)(1)(a), divided by 10^3 is greater than 1, but R divided by 10^4 is less than or equal to 1)-$225,000.

(iii) Greater than 10^{10} but less than or equal to 10^{12} times the applicable quantities of Appendix B to this section in sealed sources or plated foils (for a combination of isotopes, if R, as defined in §175.101(n)(1)(a), divided by 10^{10} is greater than 1, but R divided by 10^{12} is less than or equal to 1)-$113.000.

(5) Each decommissioning funding plan must contain a cost estimate for decommissioning and a description of the method of assuring funds for decommissioning from §175.101(n)(6), including means of adjusting cost estimates and associated funding levels periodically over the life of the facility. Cost estimates must be adjusted at intervals not to exceed 3 years. The decommissioning funding plan must also contain a certification by the licensee that financial assurance for decommissioning has been provided in the amount of the cost estimate for decommissioning and a signed original of the financial instrument obtained to satisfy the requirements of §175.101(n)(6).

(6) Financial assurance for decommissioning must be provided by one or more of the following methods:

(i) **Prepayment.** Prepayment is the deposit prior to the start of operation into an account segregated from licensee assets and outside the licensee's administrative control of cash or liquid assets such that the amount of funds would be sufficient to pay decommissioning costs. Prepayment may be in the form of a trust, escrow account, government fund, certificate of deposit, or deposit of government securities.

(ii) **A surety method, insurance, or other guarantee method.** These methods guarantee that decommissioning costs will be paid. A surety method may be in the form of a surety bond, letter of credit, or line of credit. A parent company guarantee of funds for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in Appendix D. A parent company guarantee may not be used in combination with other financial methods to satisfy the requirements of this section. A guarantee of funds by the applicant or licensee for decommissioning costs based on a financial test may be used if the guarantee and test are as contained in Appendix E. A guarantee by the applicant or licensee may not be used in combination with any other financial methods to satisfy the requirements of this section or in any situation where the applicant or licensee has a parent company holding majority control of the voting stock of the company. Any surety method or insurance used to provide financial assurance for decommissioning must contain the following conditions:

(A) the surety method or insurance must be open-ended or, if written for a specified term, such as five years, must be renewed automatically unless 90 days or more prior to the renewal date, the issuer notifies the Department, the beneficiary, and the licensee of its intention not to renew. The surety method or insurance must also provide that the full face amount be paid to the beneficiary automatically prior to the expiration without proof of forfeiture if the licensee fails to provide a replacement acceptable to the Department within 30 days after receipt of notification of cancellation.

(B) The surety method or insurance must be payable to a trust established for decommissioning costs. The trustee and trust must be acceptable to the Department. An acceptable trustee includes an appropriate state or federal government agency or an entity which has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency.

(C) The surety method or insurance must remain in effect until the Department has terminated the license.

(iii) An external sinking fund in which deposits are made at least annually, coupled with a surety method or insurance, the value of which may decrease by the amount being accumulated in the sinking fund. An external sinking fund is a fund established and maintained by setting aside funds periodically in an account segregated from licensee assets and outside the licensee's administrative control in which the total amount of funds would be sufficient to pay decommissioning costs at the time termination of operation is expected. An external sinking fund may be in the form of a trust, escrow account, government fund, certificate of deposit, or depost of government securities. The surety or insurance provisions must be as stated in §175.101(n)(6)(ii).

(iv) In the case of federal, state or local government licensees, a statement of intent containing a cost estimate for decommissioning or an amount based on the Table in §175.101(n)(4), and indicating that funds for decommissioning will be obtained when necessary.

(7) Each licensed person shall keep records of information important to the safe and effective decommissioning of the facility in an identified location until the license is terminated by the Department and the site is released for unrestricted use. If records of relevant information are kept for other purposes, reference to these records and their location may be used. Information the Department considers important to decom- missioning consists of:

(i) Records of spills or other unusual occurrences involving the spread of contamination in and around the facility, equipment or site. These records may be limited to instances when contamination remains after any cleanup procedures or when there is reasonable likelihood that contaminants may have spread to inaccessible areas as in the case of possible seepage into porous materials such as concrete. These records must include any known information on identification of involved nuclides, quantities, forms and concentrations.

(ii) As-built drawings and modifications of structures and equipment in restricted areas where radioactive materials are used and/or stored, and of locations of possible inaccessible contamination such as buried pipes which may be subject to contamination. If required drawings are referenced, each relevant document need not be indexed individually. If drawings are not available, the licensee shall substitute appropriate records of available information concerning these areas and locations.

(iii) Except for areas containing only sealed sources (provided the sources have not leaked or no contamination remains after any leak) or radioactive materials having only half-lives of less than 65 days, a list contained in a single document and updated every two (2) years, of the following:

(A) All areas designated and formerly designated restricted areas as defined in §175.02(a)(194);

(B) all areas outside of restricted areas that require documentation under §175.101(n)(7)(i);

(C) all areas where current and/or previous wastes have been buried; and

(D) all areas outside of restricted areas which contain material such that, if the license expired, the licensee would be required to decontaminate the area to unrestricted release levels or to apply for approval for disposal under §175.104(b).

(iv) Records of the cost estimate performed for the decommissioning funding plan or of the amount certified for decommissioning, and records of the funding method used for assuring funds if either a funding plan or certification is used.

HISTORICAL NOTE

Notes:

On September 17, 2008, the Board of Health amended Health Code §175.101(k) pursuant to NRC Order EA-07-305 to incorporate a fingerprinting and criminal history records check requirement on licensees, who possess certain radioactive materials in quantities of concern. This requirement applies to those employees of affected licensees who are allowed unescorted access to certain radioactive materials in quantities of concern. Also, the Board amended several provisions of §175.101(n) of the Health Code, including the addition of new §175.101(n)(1) (c)-(e), in order to assure compatibility with applicable NRC regulations concerning financial assurance and decommissioning of a licensed facility. The NRC amended its regulations (e.g., 10 CFR §§30.35, 40.36, and 70.25) for financial assurance for certain materials licensees to bring the amount of financial assurance required more in line with current decommissioning costs. The objective of this action is to ensure that licensees maintain adequate financial assurance so that timely decommissioning can be carried out following shutdown of a licensed facility.

§175.101(m) in Article 175 of the NYC Health Code was amended on June 14, 2007 to provide reciprocity approval by the U.S. Nuclear Regulatory Commission (NRC). NRC required that the Department amend the NYC Health Code to include a 3-day advance notice requirement to NRC for prior approval to any initial activity by any Agreement State licensee/non-NRC licensee in areas under exclusive federal jurisdiction within NYC, as per 10 CFR §150.20.

Subparagraph (vi) of paragraph (4) of subsection (h) of §175.101 of the New York City Health Code was amended on March 10, 2005 to reflect 10 CFR §30.36 in assuring that licensees who wish to terminate licensed activities must perform decommissioning within timeframes prescribed by the Department.

Subparagraph (viii)(B) of paragraph (4) of subsection (h) of §175.101 of the New York City Health Code was amended on March 10, 2005 to reflect 10 CFR §20.1403, which provides specific dose limits to members of the public from sites released for unrestricted use.

Subparagraph (viii) of paragraph (1) of subsection (k) of §175.101 of the New York City Health Code was added on March 10, 2005 to reflect federal regulation 10 §30.10 which enables the Department to conduct enforcement actions against individuals who provide inaccurate information to the Department.

Paragraph (2) of subsection (m) of §175.101 of the New York City Health Code was added on March 10, 2005 to reflect 10 CFR §150.20 which clarifies that Agreement State licensees can seek reciprocal recognition of their license from the NRC when working within areas of exclusive Federal jurisdiction in New York City.

Paragraph (1)(b) of subsection (n) of §175.101 of the New York City Health Code was added on March 10, 2005 to reflect 10 CFR §30.35 which requires licensees that are authorized to possess sealed sources or plated foils of half-life greater than 120 days and in quantities exceeding 10 to the 12th times the applicable quantities set forth in Appendix B of the New York City Health Code to submit a decommissioning funding plan.

Paragraph (5) of subsection (n) of §175.101 of the New York City Health Code was amended on March 10, 2005 to reflect 10 CFR §30.35, which addresses adjusting cost estimates for decommissioning at intervals not to exceed 3 years.

Paragraph (7) of subsection (n) of §175.101 of the New York City Health Code was amended on March 10, 2005 to reflect 10 CFR §30.35.

APPENDIX A

EXEMPT CONCENTRATIONS

Element (atomic number)	Isotope	Column I Gas concentration mCi/ml1	Column II Liquid and solid concentration mCi/ml2
Antimony (51)	Sb 122		3E-4
	Sb 124		2E-4
	Sb 125		1E-3
Argon (18)	A 37	1E-3	
	A 41	4E-7	
Arsenic (33)	As 73		5E-3
	As 74		5E-4
	As 76		2E-4
	As 77		8E-4
Barium (56)	Ba 131		2E-3
	Ba 140		3E-4

Beta and/or gramma emitting radioactive material not listed above with half-life less than 3 years.		1E-10	1E-6

FOOTNOTES:

[1] Values are given only for those materials normally used as gases.

[2] $mCi\text{-}g^{-1}$ for solids.

NOTE 1: Many radioisotopes disintegrate into isotopes which are also radioactive. In expressing the concentrations in Appendix A, the activity stated is that of the parent isotope and takes into account the daughters.

NOTE 2: For purposes of §175.101(c)(1) where there is involved a combination of isotopes, the limit for the combination should be derived as follows:

Determine for each isotope in the product the ratio between the concentration present in the product and the exempt concentration present in the product and the exempt concentration established in Schedule A for the specific isotope when not in combination. The sum of such ratios may not exceed "1" (**i.e.,** unity).

Example:

Concentration of Isotope A in Product 1 / Exempt concentration of Isotope A	+	Concentration of Isotope B in Product 1 / Exempt concentration of Isotope B	# 1

HISTORICAL NOTE

Appendix A in original publication July 1, 1991.

Polonium (84) added City Record Apr. 3, 2001 eff. May 3, 2001.

Radium (88) added City Record Apr. 3, 2001 eff. May 3, 2001.

Notes:

Appendix A was amended on March 21, 2001 to be consistent with the New York State Sanitary Code, Appendix 16-A, Table 2.

Irradiated material, any form other than solid noncombustible	.01	1,000	
Irradiated material, solid noncombustible	.001	10,000	
Mixed radioactive waste, beta-gamma	.01	1,000	
Packaged mixed waste, beta-gamma3	.001	10,000	
Any other alpha emitter	.001	2	
Contaminated equipment, alpha	.0001	20	
Packaged waste, alpha3	.0001	20	
Combination of radioactive materials listed above1			

FOOTNOTES:

1 For combinations of radioactive materials, consideration of the need for an emergency plan is required if the sum of the ratios of the quantity of each radioactive material authorized to the quantity listed for that material in Appendix C exceeds one.

2 To convert curies (Ci) to gigabecquerels (GBq), multiply curies by 37.

3 Waste packaged in Type B containers does not require an emergency plan.

HISTORICAL NOTE

Appendix C in original publication July 1, 1991.

APPENDIX D

CRITERIA RELATING TO USE OF FINANCIAL TESTS AND

PARENT COMPANY GUARANTEES FOR PROVIDING REASONABLE

ASSURANCE OF FUNDS FOR DECOMMISSIONING

I. **Introduction.** An applicant or licensee may provide reasonable assurance of the availability of funds for decommissioning based on obtaining a parent company guarantee that funds will be available for decommissioning costs and on a demonstration that the parent company passes a financial test. This appendix established criteria for passing the financial test and for obtaining the parent company guarantee.

II. **Financial Test.** A. To pass the financial test, the parent company must meet the criteria of either paragraph A.1 or A.2 of this section:

1. The parent company must have:

i. Two of the following three ratios: A ratio of total liabilities to net worth less than 2.0; a ratio of the sum of net income plus depreciation, depletion, and amortization to total liabilities greater than 0.1; and a ratio of current assets to current liabilities greater than 1.5; and

ii. Net working capital and tangible net worth each at least six times the current decommissioning cost estimates (or prescribed amount if a certification is used); and

iii. tangible net worth of at least $10 million; and

iv. assets located in the United States amounting to at least 90 percent of total assets or at least six times the current decommissioning cost estimates (or prescribed amount if a certification is used).

2. The parent company must have:

i. A current rating for its most recent bond issuance of AAA, AA, A or BBB as issued by Standard and Poor's or Aaa, Aa, A or Baa as issued by Moody's; and

ii. tangible net worth of at least $10 million; and

iii. tangible net worth at least six times the current decommissioning cost estimate (or prescribed amount if a certification is used); and

iv. assets located in the United States amounting to at least 90 percent of total assets or at least six times the current decommissioning cost estimates (or prescribed amount if a certification is used).

B. The parent company's independent certified public accountant must have compacted the data used by the parent company in the financial test, which is derived from the independently audited, year end financial statements for the latest fiscal year, with the amounts in such financial statement. In connection with that procedure, the licensee shall inform the Department within 90 days of any matters coming to the auditor's attention which cause the auditor to believe that the data specified in the financial test should be adjusted and that the company no longer passes the test.

C. 1. After the initial financial test, the parent company must repeat the passage of the test within 90 days after the close of each succeeding fiscal year.

2. If the parent company no longer meets the requirements of paragraph A of this section, the license, the licensee

must send notice to the Department of intent to establish alternate financial assurance as specified in this Code. The notice must be sent by certified mail within 90 days after the end of the fiscal year for which the year end financial data show that the parent company no longer meets the financial test requirements. The licensee must provide alternate financial assurance within 120 days after the end of such fiscal year.

III. **Parent Company Guarantee.** The terms of a parent company guarantee which an applicant or licensee obtains must provide that:

A. The parent company guarantee will remain in force unless the guarantor sends notice of cancellation by certified mail to the licensee and the Department. Cancellation may not occur, however, during the 120 days beginning on the date of receipt of the notice of cancellation by both the licensee and the Department, as evidenced by the return receipts.

B. If the licensee fails to provide alternate financial assurance as specified by this Code within 90 days after receipt by the licensee and Department of a notice of cancellation of the parent company guarantee from the guarantor, the guarantor will provide such alternative financial assurance in the name of the licensee.

C. The parent company guarantee and financial test provisions must remain in effect until the Department has terminated the license.

D. If a trust is established for decommissioning costs, the trustee and trust must be acceptable to the Department. An acceptable trustee includes an appropriate state or federal government agency or an entity which has the authority to act as a trustee and whose trust operations are regulated and examined by a federal or state agency.

HISTORICAL NOTE

Appendix D in original publication July 1, 1991.

APPENDIX E

CRITERIA RELATING TO USE OF FINANCIAL TESTS AND

SELF GUARANTEES FOR PROVIDING REASONABLE

ASSURANCE OF FUNDS FOR DECOMMISSIONING

I. **Introduction.** An applicant or licensee may provide reasonable assurance of the availability of funds for decommissioning based on furnishing its own guarantee that funds will be available for decommissioning costs and on a demonstration that the company passes the financial test of section II of this appendix. The terms of the self-guarantee are in section III of this appendix. This appendix establishes criteria for passing the financial test for the self-guarantee and establishes the terms for a self-guarantee.

II. **Financial Test.** A. To pass the financial test, a company must meet all of the following criteria:

1. tangible net worth at least 10 times the total current decommissioning cost estimate (or the current amount required if certification is used) for all decommissioning activities for which the company is responsible as self-guaranteeing licensee and as parent-guarantor.

2. assets located in the United States amounting to at least 90 percent of total assets or at least 10 times the total current decommissioning cost estimate (or the current amount required if certification is used) for all decommissioning activities for which the company is responsible as self-guaranteeing licensee and as parent-guarantor.

3. A current rating for its most recent bond issuance of AAA, AA or A as issued by Standard and Poor's or Aaa, Aa

or A as issued by Moody's.

B. To pass the financial test, a company must meet all of the following additional requirements:

1. the company must have at least one class of equity securities registered under the Securities Exchange Act of 1934.

2. the company's independent certified public accountant must have compared the data used by the company in the financial test which is derived from the independently audited, year end financial statements for the latest fiscal year, with the amounts in such financial statement. In connection with that procedure, the licensee shall inform the Department within 90 days of any matters coming to the attention of the auditor that cause the auditor to believe that the data specified in the financial test should be adjusted and that the company no longer passes the test.

3. After the initial financial test, the company must repeat passage of the test within 90 days after the close of each succeeding fiscal year.

C. If the licensee no longer meets the requirements of Section II.A. of this appendix, the licensee must send immediate notice to the Department of its intent to establish alternate financial assurance as specified in this Code within 120 days of such notice.

III. **Company Self-Guarantee.** The terms of a self-guarantee which an applicant or licensee furnishes must provide that:

A. The guarantee will remain in force unless the licensee sends notice of cancellation by certified mail to the Department. Cancellation may not occur, however, during the 120 days beginning on the date of receipt of the notice of cancellation by the Department, as evidenced by the return receipt.

B. The licensee shall provide alternative financial assurance as specified in this Code within 90 days following receipt by the Department of a notice of cancellation of the guarantee.

C. The guarantee and financial test provisions must remain in effect until the Department has terminated the license or until another financial assurance method acceptable to the Department has been put into effect by the licensee.

D. The licensee will promptly forward to the Department and the licensee's independent auditor all reports covering the latest fiscal year filed by the licensee with the Securities and Exchange Commission pursuant to the requirements of Section 13 of the Securities and Exchange Act of 1934.

E. If, at any time, the licensee's most recent bond issuance ceases to be rated in any category of "A" or above by either Standard and Poor's or Moody's, the licensee will provide notice in writing of such fact to the Department within 20 days after publication of the change by the rating service. If the licensee's most recent bond issuance ceases to be rated in any category of "A" or above by both Standard and Poor's and Moody's, the licensee no longer meets the requirements of Section II.A. of this appendix.

F. The applicant or licensee must provide to the Department a written guarantee (a written commitment by a corporate officer) which states that the licensee will fund and carry out the required decommissioning activities or, upon issuance of an order by the Department, the licensee will set up and fund a trust in the amount of the current cost estimates for decommissioning.

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 175 RADIATION CONTROL General Provisions

§175.102 Requirements for specific types of radioactive materials licenses.

(a) **Types of license.** (1) For the purposes of §5.07(a) and §175.05 of this Code, the following special designations of radioactive materials licenses shall apply:

(i) A specific license of limited scope for teletherapy means a license that authorizes receipt, acquisition, ownership, possession, use and transfer of specified quantities and types of radioactive material for use in teletherapy programs.

(ii) A specific license of limited scope for medical use means a license that authorizes receipt, acquisition, ownership, possession, use and transfer of specified quantities and types of radioactive material for use in or on humans in a medical program, but does not include teletherapy.

(iii) A specific license of limited scope for other use means a license that authorizes receipt, production,

acquisition, ownership, possession, use and transfer of specified quantities and types of radioactive material for uses other than in or on humans.

(iv) A specific license of broad scope for medical use means a license that authorizes receipt, acquisition, ownership, possession, use and transfer of any chemical or physical form of the radioactive materials specified in the license, for use in or on humans in a medical program, but does not include teletherapy.

(v) A specific license of broad scope for research and development means a license that authorizes receipt, acquisition, ownership, possession, use and transfer of any chemical or physical form of radioactive materials specified in the license, in quantities not exceeding those specified in the license, for uses other than in or on humans.

(b) The requirements specified in this section are in addition to, and not in substitution for, others in this Code. In particular, the provisions of §175.101 apply to all license applications and all specific radioactive materials licenses.

(c) **Specific licenses for human use of radioactive materials in institutions.** (1) An application by an institution for a specific license for medical use of radioactive material will be approved if:

(i) the applicant satisfies the requirements specified in §175.101 and §175.103 of this Code; and

(ii) the applicant possesses adequate facilities for the clinical care of patients; and

(iii) the physician(s) designated on the application as the individual authorized user(s) has training and experience as specified in §175.103(j) in the proposed use, the handling and administration of radionuclides and the clinical management of radioactive patients. The physician shall furnish evidence of such experience with his/her application. A statement from his/her preceptor at the institution where he/she acquired such training and experience, indicating their amount and nature, may be submitted as evidence of such experience.

(iv) If the application is for a license to use unspecified quantities or multiple types of radioactive materials with atomic numbers 3 through 83 the applicant shall have had previous experience operating under a specific institutional license and have been engaged in the use of radioisotopes in medical research, as well as routine diagnosis and therapy.

(v) The license application is signed by the chairman of the radiation safety committee and an authorized representative of the institution.

(d) **Specific licenses to individual physicians for human use of radioactive materials.** (1) An application by an individual physician for a specific license for human use of radioactive material will be approved if:

(i) the applicant satisfies the requirements specified in §175.101 and §175.103 of this Code; and

(ii) the applicant has training and experience as specified in §175.103(j) in the proposed use, the handling and administration of radionuclides, and the clinical management of radioactive patients. The physician shall furnish evidence of such training and experience with his/her application. A statement from his/her preceptor at the institution where he/she acquired such training and experience, indicating their amount and nature, may be submitted as evidence of such experience.

(e) **Specific licenses of broad scope.** (1) A specific license of broad scope shall be issued only to medical institutions or institutions of higher education; such licenses shall not be issued to individuals.

(2) An application for a specific license of broad scope will be approved if:

(i) the applicant satisfies the general requirements specified in §175.101(e) of this Code; and

(ii) the applicant has engaged in a reasonable number of activities involving the use of radioactive material; and

(iii) the applicant has established administrative controls and provisions relating to organization and management, procedures, recordkeeping, material control, and accounting and management review that are necessary to assure safe operations, including:

(A) the establishment of a radiation safety committee pursuant to §175.03 of this Code; and

(B) the appointment of a full-time radiation safety officer pursuant to §175.03 of this Code; and

(C) the establishment of appropriate administrative procedures to assure:

(a) control of procurement and use of radioactive material; and

(b) completion of safety evaluations of proposed uses of radioactive material which take into consideration such matters as the adequacy of facilities and equipment, training and experience of the user, and the operating or handling procedures; and

(c) review, approval, and recording by the radiation safety committee of safety evaluations of proposed uses prepared in accordance with §175.102(e)(2)(iii)(C)(**b**) prior to the use of radioactive materials.

(3) The following are conditions of all specific licenses of broad scope:

(i) Unless specifically authorized pursuant to other provisions of this Code, broad scope licensees shall not:

(A) conduct tracer studies in the environment involving direct release of radioactive material;

(B) receive, acquire, own, possess, use, transfer, or import devices containing 3.7 E6 GBq (100,000 Ci) or more of radioactive material in sealed sources used for irradiation of materials;

(C) add, or cause the addition of, radioactive material to any food, beverage, cosmetic, drug or other product designed for ingestion by, or application to, a human being except as authorized in the license.

(f) **Specific licenses for non-human use.** (1) An application for a specific license authorizing non-human use of radioactive materials will be approved if:

(i) the applicant satisfies the general requirements specified in §175.101(e) of this Code; and

(ii) the applicant, or the applicant's personnel, has training and experience commensurate with the proposed amounts, types and uses of radioactive materials which shall include at a minimum:

(A) a college degree at the bachelor level in a physical, biological, environmental or engineering science; and

(B) at least forty (40) hours of training and experience in the safe handling of radioactive materials appropriate to the type and forms of such materials to be used, which shall include:

(a) characteristics of ionizing radiation;

(b) units of radiation dose and quantities;

(c) radiation detection instrumentation; and

(d) biological hazards of exposure to radiation.

(g) **General licenses.** (1) A general license is hereby issued to own radioactive material without regard to quantity. Notwithstanding any other provisions of this Code, this general license does not authorize the manufacture, production,

transfer, receipt, possession or use of radioactive material.

(2) **Source material.** (i) A general license is hereby issued authorizing use and transfer of not more than 6.8 kilograms (15 pounds) of source material at any one time by persons in the following categories:

(A) pharmacists using the source material solely for the compounding of medicinals; (B) physicians using the source material for medicinal purposes;

(C) persons receiving possession of source material from pharmacists and physicians in the form of medicinals or drugs;

(D) commercial and industrial firms, and research, educational, and medical institutions for research, development, educational or commercial purposes;

and provided, that no such person shall, pursuant to this general license, receive more than 68 kilograms (150 pounds) of source material in any one (1) calendar year.

(ii) Persons who transfer, receive, possess or use source material pursuant to the general license issued in §175.102(g)(2)(i) are exempt from the provisions of §175.03, §175.04, §175.06, §175.104 and §175.105 of this Code to the extent that such transfer, receipt, possession or use is within the terms of such general license, provided however, that this exemption shall not be deemed to apply to any such person who is also in possession of source material under a specific license issued pursuant to this Code.

(iii) A general license is hereby issued authorizing the receipt of title to source material without regard to quantity. This general license does not authorize any person to transfer, receive, possess or use source material.

(3) **Certain devices and equipment.** (i) A general license is hereby issued to transfer, receive, possess or use radioactive material incorporated in the following devices or equipment which have been manufactured, tested and labeled in accordance with a specific license issued by the Department, the U.S. Nuclear Regulatory Commission or an agreement state, authorizing distribution under this general license or its equivalent.

(A) Static elimination devices. Devices designed for use as static eliminators which contain, as a sealed source or sources, radioactive material consisting of a total of not more than 18.5 MBq (500 mCi) of polonium-210 per device.

(B) Ion generating tubes. Devices designed for ionization of air which contain, as a sealed source or sources, radioactive material consisting of a total of not more than 18.5 MBq (500 mCI) of polonium-210 per device or a total of not more than 1.85 GBq (50 mCi) per device.

(4) **Certain measuring, gauging or controlling devices.** (i) A general license is hereby issued to receive, possess or use radioactive material when contained in devices used at a fixed location and designed and manufactured for the purpose of detecting, measuring, gauging or controlling thickness, density, level, interface location, radiation leakage, or qualitative or quantitative chemical composition, or for producing light or an ionized atmosphere, when such devices are manufactured or imported in accordance with the specifications contained in a specific license issued to the supplier by the Department, the U.S. Nuclear Regulatory Commission or an agreement state, and authorizing distribution under this general license or its equivalent, provided that:

(A) such devices are labeled in accordance with the provisions of the specific license which authorizes the distribution of the devices;[1]5

(B) such devices bear a label containing the following or a substantially similar statement which contain the information called for in the following statement:

The transfer, receipt, possession or use of this device, Model[2]_____ , Serial6 number[2]

_____ , are subject to a general license or the equivalent and the regulations of the U.S. Nuclear Regulatory Commission or of a State with which the Nuclear Regulatory Commission has entered into an agreement for the exercise of regulatory authority. Removal of this label is prohibited.

CAUTION-RADIOACTIVE MATERIAL

_____

(Name of supplier[2])

(C) such devices are installed on the premises of the general licensee by a person authorized to install such devices under a specific license issued to the installer by the Department, the U.S. Nuclear Regulatory Commission or an agreement state, if a label affixed to the device at the time of receipt states that installation by a specific licensee is required. This requirement does not apply while devices are held in storage in the original shipping container pending installation by a specific licensee.

(ii) Persons who receive, possess or use a device pursuant to the general license of §175.102(g)(3)(i):

(A) shall, within ten (10) days after the receipt of the device, notify the Department of the type of device and the name and address of the supplier;

(B) shall not transfer, abandon, or dispose of the device except by transfer to a person duly authorized to receive such device by a specific license issued by the Department, the U.S. Nuclear Regulatory Commission or an agreement state, and shall furnish to the Department, within thirty (30) days after any such transfer, a report containing the name of the manufacturer of the device, the type of device, the manufacturer's serial number of the device, and the name and address of the person receiving the device;

(C) shall assure that all labels affixed to the device at the time of receipt and bearing the statement, "Removal of this label is prohibited" are maintained thereon and shall comply with all instructions contained in such labels;

(D) shall have the device tested for leakage of radioactive material and proper operation of the on-off mechanism and indicator, if any, at the time of installation of the device or replacement of the radioactive material on the premises of the general licensee and thereafter at no longer than six (6) month intervals or at such longer intervals not to exceed three (3) years as are specified in the label required by §175.102(g)(3)(i)(A), provided, that devices containing only krypton-85 need not be tested for leakage, and devices containing only hydrogen-3 need not be tested for any purpose;

(E) shall have all the tests required by §175.102(g)(3)(ii)(D) and all other services involving the radioactive material, its shielding and containment, performed by the supplier or other person duly authorized by a specific license issued by the Department, the U.S. Nuclear Regulatory Commission or an agreement state, to manufacture, install or service such devices;

(F) shall, within thirty (30) days after the occurrence of a failure or of damage to the shielding of the radioactive material or the on-off mechanism or indicator or upon the detection of 0.185 kBq (0.005 mCi) or more of removable radioactive material, furnish to the Department a report containing the name of the manufacturer of the device and a brief description of the event and the remedial action taken; and shall maintain records of all tests performed on the devices as required herein, including the dates and results of the tests and the names of the persons conducting the tests;

(G) shall, upon the occurrence of a failure of or damage to, or any indication of a possible failure of or damage to, the shielding or containment of the radioactive material or the on-off mechanism or indicator, immediately suspend operation of the device until it has been repaired by a person holding a specific license issued by the Department, the U.S. Nuclear Regulatory Commission or an agreement state, to manufacture, install or service such devices, or disposed of by transfer to a person holding a specific license issued by the Department, the U.S. Nuclear Regulatory Commission

or an agreement state to receive the radioactive material contained in the device;

(H) shall be exempt from the provisions of §175.03, §175.04, §175.06, §175.104 and §175.105 of this Code, except that such persons shall comply with the provisions of §175.03(l)(1).

(iii) Any holder of a license issued by the Department, the U.S. Nuclear Regulatory Commission or an agreement state which authorizes the holder to manufacture, install or service a device subject to the general license in §175.102(g)(3)(i), and which is not limited as to specific installation or installations, may install or service such devices without obtaining a license from the Department provided that:

(A) such person shall file a report with the Department within thirty (30) days after the end of each calendar quarter in which any device is transferred to or installed within the Department's jurisdiction. Each such report shall identify the name and address of each person receiving a device, the type of device transferred, and the quantity and type of radioactive material contained in the device;

(B) the device is manufactured, labeled, installed and serviced in accordance with terms and conditions of the license issued to such person;

(C) such person shall assure that any labels required to be affixed to the device bear a statement that "Removal of this label is prohibited"; and

(D) the person to whom such device is transferred, or on whose premises such device is installed or serviced, has a copy of the general license requirements or equivalent requirements specified in §175.102(g)(3)(ii).

(iv) The Department may withdraw, limit or qualify its acceptance of any specific license issued by another agency, or any product distributed pursuant to such licensing document, upon determining that such action is necessary to prevent undue hazard to public health and safety or property.

(4) **Luminous safety devices for aircraft.** (i) A general license is hereby issued to receive, possess or use hydrogen-3 or promethium-147 contained in luminous safety devices for use in aircraft, provided:

(A) each device contains not more than 370 GBq (10 Ci) of hydrogen-3 or 11.1 GBq (300 mCi) of promethium-147; and

(B) each device has been manufactured, assembled or imported in accordance with a specific license issued by the U.S. Nuclear Regulatory Commission, or each device has been manufactured, assembled or imported in accordance with the specifications contained in a specific license issued by the Department or an agreement state pursuant to licensing requirements equivalent to those in §32.53 of 10 CFR Part 32.

(ii) Persons who receive, possess or use luminous safety devices pursuant to the general license in §175.102(g)(4)(i) are exempt from the provisions of §175.03, §175.04, §175.06, §175.104 and §175.105 of this Code, except that such persons shall comply with the provisions of §175.03(l)(1).

(iii) This general license does not authorize the manufacture, assembly or repair of luminous safety devices containing hydrogen-3 or promethium-147.

(iv) This general license does not authorize the receipt, possession or use of promethium-147 contained in instrument dials.

(5) **Calibration and reference sources.** (i) A general license is hereby issued to those persons listed below to transfer, receive, possess or use, in accordance with the provisions of §175.102(g)(5)(iii) and (iv), americium-241 in the form of calibration or reference sources:

(A) any person who holds a specific license issued by the Department, the New York State Department of Health or the New York State Department of Labor which authorizes the transfer, receipt, possession or use of radioactive material; and

(B) any person who holds a specific license issued by the U.S. Nuclear Regulatory Commission which authorizes the transfer, receipt, possession or use of special nuclear material.

(ii) A general license is hereby issued to transfer, receive, possess or use plutonium in the form of calibration or reference sources in accordance with the provisions of §175.102(g)(5)(iv) and (v) to any person who holds a specific license issued by the Department, the New York State Department of Health or the New York State Department of Labor which authorizes the transfer, receipt, possession or use of radioactive material.

(iii) The general licenses in §175.102(g)(5)(i) and (ii) apply only to calibration or reference sources which have been manufactured in accordance with the specifications contained in a specific license issued to the manufacturer or importer of the sources by the U.S. Nuclear Regulatory Commission pursuant to §32.57 of 10 CFR Part 32 or §70.39 of 10 CFR Part 70 or which have been manufactured or imported in accordance with the specifications contained in a specific license issued by the Department or an agreement state pursuant to licensing requirements equivalent to those contained in §32.57 of 10 CFR Part 32 or §70.39 of 10 CFR Part 70.

(iv) Persons who transfer, receive, possess or use one or more calibration or reference sources pursuant to these general licenses:

(A) shall not possess at any one time, at any one location of storage or use, more than 185 kBq (5 mCi) of americium-241 and 185 kBq (5 mCi) of plutonium in such sources;

(B) shall not transfer, receive, possess or use such source unless the source, or the storage container, bears a label which includes the following statement or a substantially similar statement which contains the information called for in the following statement:

The transfer, receipt, possession or use of this device, Model_____ , Serial number _____ , are subject to a general license and the regulations of the U.S. Nuclear Regulatory Commission or of a State with which the Nuclear Regulatory Commission has entered into an agreement for the exercise of regulatory authority. Do not remove this label. CAUTION-RADIOACTIVE MATERIAL-THIS SOURCE CONTAINS (AMERICIUM-241) (PLUTONIUM)^{37}. DO NOT TOUCH RADIOACTIVE PORTION OF THIS SOURCE.

_____

(Name of manufacturer or importer);

(C) shall not transfer, abandon or dispose of such source except by transfer to a person authorized by a license from the Department, the U.S. Nuclear Regulatory Commission or an agreement state to receive the source;

(D) shall store such source, except when the source is being used, in a closed container adequately designed and constructed to contain americium-241 or plutonium which might otherwise escape during storage; and

(E) shall not use such source for any purpose other than the calibration of radiation detectors or the standardization of other sources.

(v) These general licenses do not authorize the manufacture of calibration or reference sources containing americium-241 or plutonium.

(vi) A general license is hereby issued to transfer, receive, possess or use sealed radioactive materials sources in individual quantities each of which does not exceed the applicable quantity set forth in Appendix B of §175.101 of this

Code, to any person who holds a specific license issued by the Department.

(vii) Persons who transfer, receive, possess or use sources pursuant to the general license in §175.102(g)(5)(vi):

(A) shall not transfer, abandon or dispose of such sources except by transfer to a person duly authorized to receive such sources by the Department, the U.S. Nuclear Regulatory Commission or an agreement state; and

(B) shall store such sources, except when being used, in a secure location.

(6) **Ice detection devices.** (i) A general license is hereby issued to transfer, receive, possess or use strontium-90 contained in ice detection devices, provided each device contains not more than 1.85 MBq (50 mCi) of strontium-90 and each device has been manufactured or imported in accordance with a specific license issued by the U.S. Nuclear Regulatory Commission pursuant to §32.61 of 10 CFR Part 32 or by the Department or an agreement state pursuant to licensing requirements equivalent to those contained in §32.61 of 10 CFR Part 32.

(ii) Persons who transfer, receive, possess or use strontium-90 contained in ice detection devices pursuant to this general license:

(A) shall, upon occurrence of visually observable damage, such as a bend or crack or discoloration from overheating, to the device, discontinue use of the device until it has been inspected, tested for leakage and repaired by a person holding a specific license from the U.S. Nuclear Regulatory Commission or an agreement state to manufacture or service such devices; or shall dispose of the device pursuant to §175.104 of this Code;

(B) shall assure that all labels affixed to the device at the time of receipt, and which bear a statement which prohibits removal of the labels, are maintained thereon; and

(C) are exempt from the provisions of §175.03, §175.04, §175.06 and §175.105 of this Code, except that such persons shall comply with the provisions of §175.03(l)(1).

(iii) This general license does not authorize the manufacture, assembly, disassembly or repair of strontium-90 sources in ice detection devices.

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 175 RADIATION CONTROL General Provisions

§175.103 Medical use of radioactive materials.

(a) **General information.** (1) **Purpose and scope.** This section establishes requirements and provisions for the use of radioactive material in the healing arts and for issuance of licenses authorizing the medical use of this material. These requirements and provisions provide for the protection of the public health and safety. The requirements and provisions of this section are in addition to, and not in substitution for, others in this Code. The requirements and provisions of this Code apply to applicants and licensees subject to this section unless specifically exempted.

(2) **License required.** (i) No person shall manufacture, produce, acquire, receive, possess, use, or transfer radioactive material for medical use except in accordance with a specific license issued pursuant to this section or as otherwise provided in this section.

(ii) Unless prohibited by license condition an individual may receive, possess, use, or transfer radioactive material in accordance with this Code under the supervision of an authorized user as provided in §175.103(b)(5).

(3) **Application for license, amendment or renewal.** (i) If the application is for medical use sited in a medical institution, only the institution's management may apply. If the application is for medical use not sited in a medical institution, any professional practitioner may apply.

(ii) An application for a license for medical use of radioactive material, or renewal thereof, must be made by filing an original and one copy on Form BRC-M100, "Application for Radioactive Materials License". A request for license amendment may be submitted as an original and one copy in letter format.

(4) **License amendments.** A licensee shall apply for and shall have received a license amendment before:

(i) receiving or using radioactive material for a method or type of medical use not permitted by the license;

(ii) permitting anyone, except a visiting authorized user as specified by license condition, to work as an authorized user under the license;

(iii) changing the radiation safety officer or radiation therapy physicist;

(iv) receiving radioactive material in excess of the amount, or radionuclide or form different from that authorized by the license;

(v) adding to or changing the area of use or mailing address identified on the license; and

(vi) changing statements, representations, and procedures which are incorporated by reference into the license.

(5) **Notifications.** A licensee shall notify the Department in writing within 30 days when an authorized user, radiation safety officer, or radiation therapy physicist, permanently discontinues performance of duties under the license. This requirement is not intended to relieve the licensee of the requirements of §175.103(a)(4).

(b) **General administrative requirements.** (1) **ALARA Program.**

(i) Each licensee shall develop and implement a written program to maintain radiation doses and releases of radioactive material in effluents to unrestricted areas as low as reasonably achievable in accordance with §175.03(b) of this Code.

(ii) To satisfy the requirement of §175.103(b)(1)(i):

(A) for licensees that are medical institutions, the management, radiation safety officer and all authorized users shall participate in the establishment, implementation, and operation of the program as required by this Code or required by the radiation safety committee; or

(B) for licensees that are not medical institutions, management and all authorized users shall participate in the program as requested by the radiation safety officer.

(iii) The ALARA program shall include notice to workers of the program's existence and workers' responsibility to help keep dose equivalents ALARA.

(iv) The ALARA program shall include an annual review by the radiation safety committee for licensees that are medical institutions, or management, all authorized users and the radiation safety officer for licensees that are not medical institutions, of summaries of the types and amounts of radioactive material used, occupational dose reports, and continuing education and training for all personnel who work with or in the vicinity of radioactive material.

(v) The purpose of the review required by §175.103(b)(1)(iv) is to ensure that individuals make every reasonable effort to maintain occupational doses, doses to the general public, and releases of radioactive material to unrestricted

areas as low as reasonably achievable, taking into account the state of technology, and the cost of improvements in relation to benefits.

(vi) The licensee shall retain a current written description of the ALARA program for the duration of the license. The written description must include:

(A) a commitment by management to keep occupational doses as low as reasonably achievable;

(B) a requirement that the radiation safety officer brief management once each year on the radiation safety program;

(C) personnel exposure investigational levels that, when exceeded, will initiate an investigation by the radiation safety officer of the cause of the exposure; and

(D) personnel exposure investigational levels that, when exceeded, will initiate a prompt investigation by the radiation safety officer of the cause of the exposure and a consideration of actions that might be taken to reduce the probability of recurrence.

(2) **Radiation safety officer.** (i) A licensee shall appoint a radiation safety officer responsible for implementing the radiation safety program. The licensee, through the radiation safety officer, shall ensure that radiation safety activities are being performed in accordance with approved procedures and regulatory requirements in the daily operation of the licensee's radioactive material program.

(ii) The radiation safety officer shall:

(A) investigate overexposures, misadministrations, accidents, spills, losses, thefts, unauthorized receipts, uses, transfers, and disposals, and other deviations from approved radiation safety practice and implement corrective actions as necessary;

(B) establish, implement and maintain written policy and procedures for:

(a) authorizing the purchase of radioactive material;

(b) receiving and opening packages of radioactive material;

(c) storing radioactive material;

(d) keeping an inventory record of radioactive material;

(e) using radioactive material safely;

(f) taking emergency action if control of radioactive material is lost;

(g) performing periodic radiation surveys;

(h) performing checks of survey instruments and other safety equipment;

(i) disposing of radioactive material;

(j) training personnel who work in or frequent areas where radioactive material is used or stored; and

(k) keeping copies of this Code, all records and reports required by this Code, each licensing request and license and amendments, and the written policies and procedures required by this Code;

(C) brief management at least once each year on the radioactive materials program; and

(D) for medical use sited at a medical institution, assist the radiation safety committee in the performance of its duties; or

(E) for medical use not sited at a medical institution, approve or disapprove radiation safety program changes with the advice and consent of management prior to submittal to the Department for licensing action.

(3) **Radiation safety committee.** Each medical institution licensee shall establish a radiation safety committee to oversee the use of radioactive material.

(i) The committee shall meet the following administrative requirements:

(A) Membership shall consist of at least three individuals and shall include an authorized user of each type of use permitted by the license, the radiation safety officer, a representative of the nursing service, and a representative of management who is neither an authorized user nor the radiation safety officer. Other members may be included as the licensee deems appropriate.

(B) The committee shall meet at least quarterly.

(C) To establish a quorum and to conduct business, at least one-half of the committee's membership shall be present, including the radiation safety officer and the management's representative.

(D) The minutes of each radiation safety committee meeting shall include:

(a) the date of the meeting;

(b) members present;

(c) members absent;

(d) summary of deliberations and discussions;

(e) recommended actions and the numerical results of all ballots; and

(f) document any reviews required in §175.103(b)(1)(iv) and (b)(3)(ii).

(E) The committee shall provide each member with a copy of the meeting minutes, and retain one copy for the duration of the license.

(ii) To oversee the use of licensed material, the committee shall:

(A) be responsible for monitoring the institutional program to maintain individual and collective doses as low as reasonably achievable;

(B) review, on the basis of safety and with regard to the training and experience standards of this Code, and approve or disapprove any individual who is to be listed as an authorized user, the radiation safety officer, or radiation therapy physicist before submitting a license application or request for amendment or renewal;

(C) review on the basis of safety and approve or disapprove each proposed method of use of radioactive material;

(D) review on the basis of safety, and approve or disapprove with the advice and consent of the radiation safety officer and the management representative, minor changes in radiation safety procedures that are not potentially important to safety and are permitted under §175.103(b)(3)(iii);

(E) review on the basis of safety, and approve or disapprove with the advice and consent of the radiation safety officer and the management representative, procedures and radiation safety program changes prior to submittal to the Bureau of Radiological Health for licensing action;

(F) review quarterly, with the assistance of the radiation safety officer, occupational radiation exposure records of all personnel working with radioactive material;

(G) review quarterly, with the assistance of the radiation safety officer, all incidents involving radioactive material with respect to cause and subsequent actions taken;

(H) review annually, with the assistance of the radiation safety officer, the radioactive materials program; and

(I) establish a table of investigational levels for occupational dose that, when exceeded, will initiate investigations and considerations of action by the radiation safety officer.

(iii) A licensee may make minor changes in radiation safety procedures that are not potentially important to safety (**e.g.** editing of procedures for clarity, updating names or telephone numbers, replacement of equipment or assignment of service contracts), except for changes in §175.103(a)(4) or §175.103(i)(3). A licensee is responsible for assuring that any change made is in compliance with the requirements of this Code and the license.

(iv) A licensee shall retain a record of each change made pursuant to §175.103 (b)(3)(iii) until the license has been renewed or terminated. The record must include the effective date of the change, a copy of the old and new radiation safety procedures, the reason for the change, a summary of radiation safety matters that were considered before making the change, the signature of the radiation safety officer, and the signatures of the affected authorized user and of management or, in a medical institution, the radiation safety committee's chairman and the management representative.

(4) **Statement of authorities and responsibilities.** (i) A licensee shall provide the radiation safety officer, and at a medical institution the radiation safety committee, sufficient authority and organizational freedom to:

(A) identify radiation safety problems;

(B) initiate, recommend, or provide corrective actions; and

(C) verify implementation of corrective actions.

(ii) A licensee shall establish in writing the authorities, duties, responsibilities, and radiation safety activities of the radiation safety officer, and at a medical institution the radiation safety committee, and retain the current edition of these statements for the duration of the license.

(5) **Supervision.** (i) A licensee who permits the receipt, possession, use, or transfer of radioactive material by an individual under the supervision of an authorized user as allowed by §175.103(a)(2) shall:

(A) instruct the supervised individual in the principles and practices of radiation protection, radioactivity measurement standardization and monitoring techniques and instruments, mathematics and calculations basic to the use and measurement of radioactivity, and biological effects of radiation which are appropriate to that individual's use of radioactive material;

(B) if the supervised individual is a professional practitioner, provide further instruction by the supervising authorized user which shall include that training stipulated in §175.103(j) which is appropriate for the uses in which the supervised individual is being trained. The licensee shall maintain records of such training for three years.

(C) require the supervising authorized user to periodically review the supervised individual's use of radioactive material, review records kept to reflect this use, and provide reinstruction as needed; and

(D) require that only those individuals specifically trained, and designated by the authorized user, shall be permitted to administer radionuclides or radiation to patients.

(ii) A licensee shall require the supervised individual receiving, possessing, using or transferring radioactive material under §175.103(a)(2) to:

(A) follow the instructions of the supervising authorized user;

(B) follow the procedures established by the radiation safety officer; and

(C) comply with this Code and the license conditions with respect to the use of radioactive material.

(iii) Personnel, other than physicians or registered professional nurses, at institutional licensees involved in the performance of diagnostic procedures utilizing radioactive material which includes performing parenteral administration of radioactive material by intravenous, intramuscular or subcutaneous methods shall:

(A) have satisfactorily completed an educational program in nuclear medicine technology accredited by the Committee on Allied Health Education and Accreditation or the accrediting agency of the state in which the program was completed, provided such state accreditation requires education and training in the above methods of parenteral administration; or

(B) possess certification as a nuclear medicine technologist by the American Registry of Radiologic Technologists or certification by the Nuclear Medicine Technology Board; and

(iv) prior to permitting parenteral administration by a nuclear medicine technologist, the medical board of a hospital, or the radiation safety committee of an institution who have no medical board, shall adopt with governing authority approval:

(A) procedures to assure that the nuclear medicine technologist possesses the education and training or certification set forth in §175.103(b)(5)(iii) and is proficient in the competent performance of parenteral administration; and

(B) requirements for authorized user physician which at a minimum shall require supervision by such a physician on the premises when parenteral administration of radioactive material for diagnostic testing is performed by a qualified nuclear medicine technologist.

(v) A licensee that supervises an individual is responsible for the acts and omissions of the supervised individual.

(6) **Suppliers.** (i) A licensee may use for medical use only:

(A) radioactive material manufactured, labeled, packaged, and distributed in accordance with a license issued for such activities by an Agreement State or the U.S. Nuclear Regulatory Commission; and

(B) reagent kits that have been manufactured, labeled, packaged, and distributed in accordance with an approval issued by the U.S. Department of Health and Human Services, Food and Drug Administration ("FDA"); and

(C) teletherapy sources manufactured and distributed in accordance with a license issued pursuant to 10 CFR Part 30 or the equivalent regulations of an Agreement State.

(c) **General technical requirements.** (1) **Possession, use, calibration, and check of dose calibrators.**

(i) A medical use licensee authorized to administer radioactive materials shall possess a dose calibrator and use it to measure the amount of activity administered to each patient.

(ii) A licensee shall:

(A) check each dose calibrator for constancy with a dedicated check source at the beginning of each day of use. To satisfy this requirement, the check must be done on a frequently used setting with a sealed source of not less than 370 kBq (10 mCi) of radium-226 or 1.85 MBq (50 mCi) of any other photon-emitting radionuclide with a half-life greater than 90 days; and

(B) test each dose calibrator for accuracy upon installation and at intervals not to exceed 12 months thereafter by assaying at least 2 sealed sources containing different radionuclides, the activity of which the manufacturer has determined by traceability to a national standard to be within 5 percent of the stated activity, with minimum activity of 370 kBq (10 mCi) for radium-226 and 1.85 MBq (50 mCi) for any other photon-emitting radionuclide, and at least one of which has a principal photon energy between 100 keV and 500 keV; and

(C) test each dose calibrator for linearity upon installation and at intervals not to exceed three months thereafter over the range of use between 370 kBq (10 mCi) and the highest dosage that will be administered; and

(D) test each dose calibrator for geometry dependence upon installation over the range of volumes and volume configurations for which it will be used. The licensee shall keep a record of this test for the duration of the use of the dose calibrator.

(iii) Notwithstanding the provisions of §175.103(c)(1)(ii), a licensee that must use a dose calibrator to measure the activity of beta-emitting radioactive materials to be administered to a patient shall perform additional checks specified in §175.103(c)(1)(ii)(A) and (B) using the same radionuclide to be administered and having an activity of at least 50 percent, but not more than 200 percent, of the prescribed activity or by equivalent procedures approved by the Department. Records shall be kept pursuant to §175.103(c)(1)(vi).

(iv) A licensee shall mathematically correct dosage readings for any geometry or linearity error that exceeds ± 10 percent if the dosage is greater than 370 kBq (10 mCi) and shall repair or replace the dose calibrator if the accuracy or constancy error exceeds ± 10 percent.

(v) A licensee shall also perform checks and tests required by §175.103(c)(1)(ii) following adjustment or repair of the dose calibrator.

(vi) A licensee shall retain a record of each check and test required by §175.103(c)(1)(ii), (iii), and (v) for 3 years. Such records shall include:

(A) for §175.103(c)(1)(ii)(A), the models and serial numbers of the dose calibrator and check source, the identity and calibrated activity of the radionuclide contained in the check source, the date of the check, the activity measured, the instrument settings, and the name of the individual who performed the check;

(B) for §175.103(c)(1)(ii)(B), the model and serial number of the dose calibrator, the model and serial number of each source used and the identity of the radionuclide contained in the source and its activity, proof of traceability to a national standard, the date of the test, the results of the test, the instrument settings, and the signature of the radiation safety officer;

(C) for §175.103(c)(1)(ii)(C), the model and serial number of the dose calibrator, the calculated activities, the measured activities, the date of the test, and the signature of the radiation safety officer; and

(D) for §175.103(c)(1)(ii)(D), the model and serial number of the dose calibrator, the configuration and calibrated activity of the source measured, the activity of the source, the activity measured and the instrument setting for each volume measured, the date of the test, and the signature of the radiation safety officer.

(2) **Calibration and check of survey instruments.** (i) A licensee shall ensure that the survey instruments used to show compliance with this Code have been calibrated before first use, annually, and following repair.

(ii) To satisfy the requirements of §175.103(c)(2)(i) the licensee shall:

(A) calibrate all scales with readings up to 10 mSv (1000 mrem) per hour with a radiation source, the intensity of which is determined to within 10 percent accuracy;

(B) for each scale that shall be calibrated, calibrate two readings at approximately one-third and two-thirds of the full scale reading; and

(C) conspicuously note on the instrument the apparent exposure rate from a dedicated check source as determined at the time of calibration, and the date of calibration.

(iii) To satisfy the requirements of §175.103(c)(2)(ii) the licensee shall:

(A) consider a point as calibrated if the indicated exposure rate differs from the calculated exposure rate by not more than 10 percent; and

(B) consider a point as calibrated if the indicated exposure rate differs from the calculated exposure rate by not more than 20 percent and if a correction chart or graph is conspicuously attached to the instrument.

(iv) A licensee shall check each survey instrument for proper operation with the dedicated check source before each use. The licensee shall not be not required to keep records of these checks.

(v) The licensee shall retain a record of each calibration required in §175.103(c)(2)(i) for 3 years. The record shall include:

(A) a description of the calibration procedure; and

(B) a description of the source used and the certified exposure rates from the source, and the rates indicated by the instrument being calibrated, the correction factors deduced from the calibration data, the signature of the individual who performed the calibration and the date of calibration.

(vi) To meet the requirements of §175.103(c)(2)(i), (ii) and (iii), the licensee shall perform such calibrations as authorized by specific license condition or shall obtain the services of persons licensed by the U.S. Nuclear Regulatory Commission or an agreement state to perform calibrations of survey instruments. Records of calibrations which contain information required by §175.103(c)(2)(v), shall be maintained by the licensee.

(3) **Assay of radiopharmaceutical dosages.** A licensee shall:

(i) assay, before medical use, the activity of each radiopharmaceutical dosage that contains more than 370 kBq (10 mCi) of any radionuclide;

(ii) assay, before medical use, the activity of each radiopharmaceutical dosage with a prescribed activity of 370 kBq (10 mCi) or less of a photon-emitting radionuclide to verify that the dosage does not exceed 370 kBq (10 mCi); and

(iii) Retain a record of the assays required by §175.103(c)(3)(i) and (ii) for 3 years. To satisfy this requirement, the record shall contain the:

(A) generic name, trade name, or abbreviation of the radiopharmaceutical, its lot number, and expiration dates and the radionuclide;

(B) patient's name, and identification number if one has been assigned;

(C) prescribed dosage and activity of the dosage at the time of assay, or a notation that the total activity is less than 370 kBq (10 mCi);

(D) date and time of the assay; and

(E) initials of the individual who performed the assay.

(4) **Authorization for calibration and reference sources.** Any person authorized by §175.103(a)(2) for medical use of radioactive material may receive, possess, and use the following radioactive material for check, calibration and reference use:

(i) Sealed sources manufactured and distributed by persons specifically licensed pursuant to regulations of the U.S. Nuclear Regulatory Commission or equivalent regulations of an agreement state and that do not exceed 555 MBq (15 mCi) each;

(ii) Any radioactive material listed in §175.103(d)(1) or (e)(1) with a half-life of 100 days or less in individual amounts not to exceed 555 MBq (15 mCi);

(iii) Any radioactive material listed in §175.103(d)(1) or (e)(1) with a half life greater than 100 days in individual amounts not to exceed 7.4 MBq (200 mCi) each; and

(iv) Technetium-99m in individual amounts not to exceed 1.85 GBq (50 mCi).

(5) **Requirements for possession of sealed sources and brachytherapy sources.** (i) A licensee in possession of any sealed source or brachytherapy source shall follow the radiation safety and handling instructions approved by the U.S. Nuclear Regulatory Commission or any agreement state and supplied by the manufacturer on the label attached to the source, device or permanent container thereof, or in the leaflet or brochure that accompanies the source or device, and shall maintain the instructions for the duration of source use in a legible form convenient to users.

(ii) A licensee in possession of a sealed source or brachytherapy source shall conduct a physical inventory of all such sources at intervals not to exceed 3 months. The licensee shall retain each inventory record for 5 years. The inventory records must contain the model number of each source, and serial number if one has been assigned, the identity of each source radionuclide and its estimated activity, the location of each source, date of the inventory and the signature of the radiation safety officer.

(iii) A licensee in possession of a sealed source or brachytherapy source shall survey with a radiation survey instrument at intervals not to exceed 3 months all areas where such sources are stored. This shall not apply to teletherapy sources in teletherapy units or sealed sources in diagnostic devices.

(iv) A licensee shall retain a record of each survey required in §175.103(c)(5)(iii) for 3 years. The record must include the date of the survey, a sketch of each area that was surveyed, the measured dose rate at several points in each area expressed in microsieverts (mrem) per hour, the model number and serial number of the survey instrument used to make the survey, and the signature of the radiation safety officer.

(6) **Syringe shields and labels.** (i) A licensee shall keep syringes that contain radioactive material to be administered in a radiation shield.

(ii) A licensee shall require each individual who prepares or administers radiopharmaceuticals/radiobiologics to use a syringe radiation shield unless the use of the shield is contraindicated for that patient.

(iii) A licensee shall conspicuously label each syringe, or syringe radiation shield that contains a syringe with

radioactive material, with the radiopharmaceutical/radiobiologic name or its abbreviation, the type of diagnostic study or therapy procedure to be performed, or the patient's name.

(7) **Vial shields and labels.** (i) A licensee shall require each individual preparing or handling a vial that contains radioactive material to keep the vial in a vial radiation shield.

(ii) A licensee shall conspicuously label each vial radiation shield that contains a vial of radioactive material with the radiopharmaceutical/radiobiologic name or its abbreviation.

(8) **Surveys for contamination and ambient radiation dose rate.** (i) A licensee shall survey with a radiation detection survey instrument at the end of each day of use all areas where radioactive materials are routinely prepared for use or administered.

(ii) A licensee shall survey with a radiation detection survey instrument at least once each week all areas where unsealed radioactive materials or radioactive wastes are stored.

(iii) A licensee shall conduct the surveys required by §175.103(c)(8)(i) and (ii) so as to be able to detect and measure dose rates as low as 1 mSv (0.1 mrem) per hour.

(iv) A licensee shall establish dose rate action levels for the surveys required by §175.103(c)(8)(i) and (ii) and shall require that the individual performing the survey immediately notify the radiation safety officer if a dose rate exceeds an action level.

(v) A licensee shall perform wipe tests for removable contamination once each week on all areas where radioactive materials are routinely prepared for use or administered and where unsealed sources of radioactive materials are stored.

(vi) A licensee shall perform the wipe tests required by §175.103(c)(8)(v) so as to be able to detect contamination on each wipe sample of 35 Bq (2000 disintegrations or transformations per minute).

(vii) A licensee shall establish removable contamination action levels for the surveys required by §175.103(c)(8)(v) and shall require that the individual performing the survey immediately notify the radiation safety officer if contamination exceeds action levels.

(viii) A licensee shall retain a record of each survey or wipe test required by §175.103(c)(8)(i), (ii) and (v) of this section for 3 years. The record must include the date of the survey, a sketch of each area surveyed, action levels established for each area, the measured dose rate at several points in each area expressed in mSv (mrem) per hour or the removable contamination in each area expressed in becquerels (disintegrations or transformations per minute) per 100 square centimeters, the serial number and the model number of the instrument used to make the survey or analyze the samples, and the initials of the individual who performed the survey.

(9) **Release of patients containing radioactive materials.** (i) Notwithstanding the provisions of §175.03(d)(1), a licensee shall not authorize release from confinement for medical care any patient administered radioactive material as either a radiopharmaceutical/radiobiologic or as a permanent source implant until the activity in the patient is such that the total effective dose equivalent for the individual (other than the patient) likely to receive the greatest dose is 5 mSv (500 mrem) or less.

(ii) When the total effective dose equivalent to any individual that could result from the release of a patient is likely to exceed 1 mSv (100 mrem), the licensee shall provide the patient, or the patient's competent representative, written information on risks of radiation and methods for reducing the exposure of individuals, and shall keep records of such patient releases for a period of five (5) years.

(iii) [Reserved]

(iv) **Radioactive cadavers.** (A) If any patient containing radioactive material administered/implanted for therapeutic purposes dies, it shall be the responsibility of the physician who pronounces such patient as dead to notify immediately the physician in charge of the case or such physician's designated representative.

(B) No person shall commence any autopsy on any cadaver that contains more than 185 MBq (5 mCi) of radioactive material administered/implanted for therapeutic purposes without first having consulted with, and having been advised by, the radiation safety officer of the hospital or the physician responsible for the administration/implantation of the radioactive material. If neither is available, a designated representative may serve.

(C) A radioactivity report on every cadaver containing more than 185 MBq (5 mCi) of radioactive material administered/implanted for therapeutic purposes shall be completed by the radiation safety officer or the physician responsible for the administration of the radioactive material or their designated representative. The report must include the name, address and radioactive materials license number of the hospital; the name of the deceased; the name, address and telephone number of the next of kin; the name, address and telephone number of the funeral home to which the deceased will be sent; the radionuclide involved; the approximate activity on the date of the report and the physical form; the location(s) of the radioactive materials within the body and the external dose rate at the body surface closest to the source; the precautions to be observed during autopsy or handling of the body by the funeral director; and the name of the person who prepared the form. This report shall accompany the body, whether autopsied or not, when it is surrendered to the funeral director. The Department shall be notified in person, by telephone, by mailgram or by facsimile within 24 hours of the death and a copy of the radioactivity report shall be sent to the Department within fifteen (15) days of the date of death.

(10) **Storage of volatiles and gases.** (i) A licensee shall store volatile radiopharma- ceuticals and radioactive gases in the shippers' radiation shield and container.

(ii) After drawing the first dosage, a licensee shall store and use a multidose container in a properly functioning fume hood.

(11) **Decay-in-storage.** (i) A licensee may hold radioactive material with a physical half-life of 65 days or less for decay-in-storage before disposal in ordinary trash and is exempt from the requirements of §175.104 of this Code if the licensee:

(A) holds radioactive material for decay a minimum of 10 half-lives;

(B) monitors radioactive material at the container surface before disposal as ordinary trash and determines that its radioactivity cannot be distinguished from natural background radiation levels with a radiation detection survey instrument set on its most sensitive scale and with no interposed shielding;

(C) removes or obliterates all radiation labels; and

(D) separates and monitors each generator column individually with all radiation shielding removed to ensure that its contents have decayed to natural background radiation levels before disposal.

(ii) For radioactive material disposed in accordance with §175.103 (c)(11)(i), the licensee shall retain a record of each disposal for 3 years. The record must include the date of the disposal, the date on which the radioactive material was placed in storage, the model and serial number of the survey instrument used, the background dose rate, the radiation dose rate measured at the surface of each waste container, and the name of the individual who performed the disposal.

(d) **Uptake, dilution and excretion.** (1) **Use of radiopharmaceuticals for uptake, dilution or excretion studies.**

(i) A licensee may use any radioactive material authorized in a license in any radiopharmaceutical or radiobiologic

for diagnostic studies involving the measurement of uptake, dilution or excretion.

(ii) A licensee shall prepare and use authorized radiopharmaceuticals or radiobiologics in accordance with the manufacturer's instructions for radiation safety.

(2) **Possession of a survey instrument.** A licensee authorized to use radioactive material for uptake, dilution, and excretion studies shall have in its possession a portable radiation detection survey instrument capable of detecting dose rates over the range 1.0 mSv (0.1 mrem) per hour to 1000 mSv (100 mrem) per hour. The instrument shall be operable and calibrated in accordance with §175.103(c)(2).

(e) **Imaging and localization.** (1) **Use of radiopharmaceuticals, generators, and reagent kits for imaging and localization studies.**

(i) A licensee may use any radioactive material authorized in a license in any diagnostic radiopharmaceutical, radiobiologic or reagent kit, except for aerosol or gaseous forms, for preparation and diagnostic use of a radiopharmaceutical or radiobiologic for studies involving imaging and localization.

(ii) A licensee may use generators upon approval of the Department.

(iii) Provided the conditions of §175.103(e)(3) are met, a licensee shall use radioactive aerosols or gases only if specific application is made to and approved by the Depart- ment.

(iv) A licensee shall prepare and use authorized radiopharmaceuticals or radiobiologics in accordance with the manufacturer's instructions for radiation safety.

(v) A licensee shall elute generators in compliance with §175.103(e)(2) and prepare radiopharmaceuticals from kits in accordance with the manufacturer's instructions for radiation safety.

(2) **Permissible molybdenum-99 concentration.** (i) A licensee shall not administer to humans a radiopharmaceutical containing more than 5.55 kBq (0.15 mCi) of molybdenum-99 per 37 MBq (1.0 mCi) of technetium-99m.

(ii) A licensee preparing technetium-99m radiopharmaceuticals from molybdenum-99/technetium-99m generators shall measure the molybdenum-99 concentration in each eluate or extract.

(iii) A licensee who must measure molybdenum concentration shall retain a record of each measurement for 3 years. The record shall include, for each elution or extraction of technetium-99m, the measured activity of the technetium-99m expressed in MBq (mCi), the measured activity of the molybdenum expressed in kBq (mCi), the ratio of the measures expressed as kBq (mCi) of molybdenum per MBq (mCi) of technetium-99m, the date of the test, and the initials of the individual who performed the test.

(iv) A licensee shall report immediately to the Bureau of Radiological Health each occurrence of molybdenum-99 concentration exceeding the limits specified in §175.103(e)(2)(1).

(3) **Control of aerosols and gases.** (i) A licensee who administers radioactive aerosols or gases shall do so with a system that will keep airborne concentrations within the limits prescribed by §175.03 of this Code.

(ii) The system shall provide for collection and decay or disposal of the aerosol or gas in a shielded container.

(iii) Before receiving, producing, using, or storing a radioactive gas, the licensee shall calculate the amount of time needed after a release to reduce the concentration in the area of use to the ALI listed in Table 1 of Appendix A of §175.03 of this Code. The calculation shall be based on the highest activity of gas handled in a single container and the measured available air exhaust rate.

(iv) A licensee shall post the time calculated in §175.103(e)(3)(iii) at the area of use, as well as safety measures to be instituted in case of a spill at the area of use.

(v) A licensee shall check the operation of collection systems monthly and measure the ventilation rates in areas of use at intervals not to exceed 6 months. Records of these checks and measurements shall be maintained for 3 years.

(vi) A copy of the calculations, including assumptions, measurements and calculations made, required in §175.103(e)(3)(iii) shall be recorded and retained for the duration of the license.

(4) **Possession of survey instruments.** A licensee authorized to use radioactive material for imaging and localization studies shall have in its possession a portable, radiation detection survey instrument capable of detecting dose rates over the range of 1.0 mSv (0.1 mrem) per hour to 1000 mSv (100 mrem) per hour, and a portable radiation measurement survey instrument capable of measuring dose rates over the range 10 mSv (1 mrem) per hour to 10 mSv (1000 mrem) per hour. The instruments shall be operable and calibrated in accordance with §175.103(c)(2).

(f) **Radiopharmaceuticals/radiobiologics for therapy.** (1) **Use of radiopharmaceuticals/radiobiologics for therapy.**

(i) A licensee may use any radioactive material authorized in a license in any radiopharmaceutical or radiobiologic for a therapeutic use.

(ii) The licensee shall prepare and use authorized radiopharmaceuticals or radiobiologics in accordance with the manufacturer's instructions for radiation safety.

(2) **Safety instruction.** (i) A licensee shall provide oral and written radiation safety instruction for all personnel caring for patients undergoing radiopharmaceutical therapy. Refresher training shall be provided at intervals not to exceed 1 year.

(ii) To satisfy §175.103(f)(2)(i), the instruction shall describe the licensee's procedures for: (A) patient control;

(B) visitor control;

(C) contamination control;

(D) waste control; and

(E) notification of the radiation safety officer or authorized user in case of the patient's death or medical emergency.

(iii) A licensee shall keep for 3 years a list of individuals receiving instruction required by §175.103(f)(2)(i), a description of the instruction, the date of instruction, and the name of the individual who gave the instruction.

(3) **Safety precautions.** (i) For each patient receiving radiopharmaceutical therapy and hospitalized for compliance with §175.103(c)(9), a licensee shall:

(A) provide a private room with a private sanitary facility;

(B) post the patient's door with a "Caution: Radioactive Material" sign and note on the door or on the patient's chart where and how long visitors may stay in the patient's room;

(C) authorize visits by individuals under age 18 only on a patient-by-patient basis with the approval of the authorized user after consultation with the radiation safety officer;

(D) promptly after administration of the dosage, measure the dose rates in contiguous restricted and unrestricted areas with a radiation measurement survey instrument to demonstrate compliance with the requirements of §175.03 of this Code and retain for 3 years a record of each survey that includes the time and date of the survey, a plan of the area or list of points surveyed, the measured dose rate at several points expressed in mSv (mrem) per hour, the instrument used to make the survey, and the initials of the individual who made the survey;

(E) either monitor material and items removed from the patient's room to determine that any contamination cannot be distinguished from the natural background radiation level with a radiation detection survey instrument set on its most sensitive scale and with no interposed shielding, or handle these materials and items as radioactive waste;

(F) provide the patient with radiation safety guidance that will help to keep radiation dose to household members and the public as low as reasonably achievable before authorizing release of the patient;

(G) survey the patient's room and private sanitary facility for removable contamination with a radiation detection survey instrument before assigning another patient to the room. The room must not be reassigned until removable contamination is less than 5 Bq (;sl200 disintegrations per minute) per 100 square centimeters; and

(H) measure the thyroid burden of each individual who helped prepare or administer a dosage of iodine-131 within 3 days after administering the dosage, and retain for the period required by §175.03(k) a record of each thyroid burden measurement, date of measurement, the name of the individual whose thyroid burden was measured, and the initials of the individual who made the measurements.

(ii) A licensee shall notify the radiation safety officer or the authorized user immediately if the patient dies or has a medical emergency.

(4) **Possession of survey instruments.** A licensee authorized to use radioactive material for radiopharmaceutical therapy shall have in its possession a portable radiation detection survey instrument capable of detecting dose rates over the range 1.0 mSv (0.1 mrem) per hour to 1000 mSv (100 mrem) per hour, and a portable radiation measurement survey instrument capable of measuring dose rates over the range 10 mSv (1 mrem) per hour to 10 mSv (1000 mrem) per hour. The instruments shall be operable and calibrated in accordance with §175.103(c)(2).

(g) **Sealed sources for diagnosis.** (1) Use of sealed sources for diagnosis. A licensee shall use the following sealed sources in accordance with the manufacturer's radiation safety, handling and maintenance instructions:

(i) Iodine-125 as a sealed source in a device for bone mineral analysis;

(ii) Americium-241 as a sealed source in a device for bone mineral analysis;

(iii) Gadolinium-153 as a sealed source in a device for bone mineral analysis; and

(iv) Iodine-125 as a sealed source in a portable device for imaging.

(2) **Availability of survey instrument.** A licensee authorized to use radioactive material as a sealed source for diagnostic purposes shall have available for use a portable radiation detection survey instrument capable of detecting dose rates over the range 1.0 mSv (0.1 mrem) per hour to 1000 mSv (100 mrem) per hour or a portable radiation measurement survey instrument capable of measuring dose rates over the range 10 mSv (1 mrem) per hour to 10 mSv (1000 mrem) per hour. The instrument shall be operable and calibrated in accordance with §175.103(c)(2).

(h) **Sealed sources for brachytherapy.** (1) Use of sealed sources for brachytherapy. A licensee shall use the following sources in accordance with the manufacturer's radiation safety, handling and maintenance instructions:

(i) Cesium-137 as a sealed source in needles and applicator cells for topical, interstitial, and intracavitary treatment of cancer;

(ii) Cobalt-60 as a sealed source in needles and applicator cells for topical, interstitial, and intracavitary treatment of cancer;

(iii) Gold-198 as a sealed source in seeds for interstitial treatment of cancer;

(iv) Iodine-125 as a sealed source in seeds for interstitial treatment of cancer as a permanent implant;

(v) Iridium-192 as seeds encased in nylon ribbon for interstitial treatment of cancer;

(vi) Palladium-103 as seeds for the interstitial treatment of cancer;

(vii) Strontium-90 as a sealed source in an applicator for treatment of superficial eye conditions; and

(viii) any other brachytherapy source authorized in the license.

(2) **Safety instruction.** (i) The licensee shall provide oral and written radiation safety instruction to all personnel caring for a patient receiving implant therapy. Refresher training shall be provided at intervals not to exceed 1 year.

(ii) To satisfy §175.103(h)(2)(i), the instruction shall describe:

(A) size and appearance of the brachytherapy sources;

(B) safe handling and shielding instructions in case of a dislodged source;

(C) procedures for patient control;

(D) procedures for visitor control; and

(E) procedures for notification of the radiation safety officer or authorized user if the patient dies or has a medical emergency.

(iii) A licensee shall retain for 3 years a record of individuals receiving instruction required by §175.103(h)(2)(i), a description of the instruction, the date of instruction, and the name of the individual who gave the instruction.

(3) **Safety precautions.** (i) For each patient receiving implant therapy a licensee shall:

(A) not place the patient in the same room with a patient who is not receiving radiation therapy unless the licensee can demonstrate compliance with the requirements of §175.03 of this Code at a distance of one meter from the implant;

(B) post the patient's door with a "Caution: Radioactive Materials" sign and note on the door or in the patient's chart where and how long visitors may stay in the patient's room;

(C) authorize visits by individuals under age 18 only on a case-by-case basis with the approval of the authorized user after consultation with the radiation safety officer;

(D) promptly after implanting the sources, survey the dose rates in contiguous restricted and unrestricted areas with a radiation measurement survey instrument to demonstrate compliance with §175.03 of this Code and retain for 3 years a record of each survey that includes the time and date of the survey, a sketch of the area or list of points surveyed, the measured dose rate at several points expressed in mSv (mrem) per hour, the instrument used to make the survey, and the initials of the individual who made the survey; and

(E) provide the patient with radiation safety guidance that will help to keep the radiation dose to household members and the public as low as reasonably achievable before releasing the patient if the patient was administered a permanent implant.

(ii) A licensee shall notify the radiation safety officer or authorized user immediately if the patient dies or has a medical emergency.

(4) **Brachytherapy sources inventory.** (i) A licensee shall promptly return brachytherapy sources to their place of storage after removal from the patient.

(ii) Each time brachytherapy sources are returned to an area of storage from an area of use, the licensee shall immediately count or otherwise verify the number returned to ensure that all sources taken from the storage area have been returned.

(iii) A licensee shall make a record of brachytherapy source use which includes:

(A) the names of the individuals permitted to handle the sources;

(B) the number and activity of sources removed from storage, the room number of use and patient's name, the time and date they were removed from storage, the number and activity of the sources in storage after the removal, and the initials of the individual who removed the sources from storage; and

(C) the number and activity of sources returned to storage, the room number of use and patient's name, the time and date they were returned to storage, the number and activity of sources in storage after the return, and the initials of the individual who returned the sources to storage.

(iv) Immediately after implanting sources in a patient and immediately after removal of sources from a patient, including those sources inserted and removed by remote after loading devices, the licensee shall make a radiation survey of the patient and the area of use to confirm that no sources have been misplaced, left in the patient, or otherwise not returned to the appropriate place of storage. The licensee shall make a record of each survey.

(v) A licensee shall retain the records required in §175.103(h)(4)(iii) and (iv) for 3 years.

(5) **Release of patients treated with temporary implants.** (i) Immediately after removing the last temporary implant source from a patient, the licensee shall make a radiation survey of the patient with a radiation detection survey instrument to confirm that all sources have been removed. The licensee shall not release from confinement for medical care a patient treated by temporary implant until all sources have been removed.

(ii) A licensee shall retain a record of patient surveys which demonstrate compliance with §175.103(h)(5)(i) for 3 years. Each record must include the date of the survey, the name of the patient, the dose rate from the patient expressed as mSv (mrem) per hour and measured within 1 meter from the patient, and the initials of the individual who made the survey.

(6) **Possession of survey instruments.** A licensee authorized to use radioactive material for implant therapy shall have in its possession a portable radiation detection survey instrument capable of detecting rates over the range 1.0 mSv (0.1 mrem) per hour to 1000 mSv (100 mrem) per hour, and a portable radiation measurement survey instrument capable of measuring dose rates over the range 10 mSv (1 mrem) per hour to 10 mSv (1000 mrem) per hour. The instruments shall be operable and calibrated in accordance with §175.103(c)(2).

(i) **Teletherapy.** (1) Use of a sealed source in a teletherapy unit. A licensee shall use cobalt-60 as a sealed source in a teletherapy unit for medical use in accordance with the manufacturer's radiation safety and operating instructions.

(2) **Maintenance, repair and inspection requirements.** (i) Routine maintenance of the teletherapy unit shall be performed according to the manufacturer's recommended schedule, including periodic replacement of parts. Replacement parts shall be those specified by the manufacturer of the teletherapy unit.

(ii) A licensee shall have each teletherapy unit fully inspected and serviced during teletherapy source replacement

or at intervals not to exceed 5 years, whichever comes first.

(iii) Repairs found to be needed shall be made promptly.

(iv) Only a person specifically licensed by the U.S. Nuclear Regulatory Commission or an agreement state to perform teletherapy unit inspections and servicing shall perform such functions, including, but not limited to installation, relocation, or removal of a teletherapy sealed source or a teletherapy unit that contains a sealed source or maintenance, adjustment, or repair of the source drawer, the shutter or other mechanism of a teletherapy unit that could expose the source, reduce the shielding around the source, result in increased radiation levels or compromise the safety of the unit.

(v) A licensee shall keep record of the inspections and servicing for the duration of the license. The record shall contain the name of the person performing the inspection or service, such person's license number, the date of inspection, the manufacturer's name and model number and serial number for both the teletherapy unit and source, a list of components inspected, the findings of the inspection, a list of components serviced and the type of service, a list of components replaced, and the signature of the licensed individual performing the service or inspection.

(3) **Amendments.** In addition to the requirements specified in §175.103(a)(4), a licensee shall apply for and shall have received a license amendment before:

(i) making any change in the treatment room shielding;

(ii) making any change in the location of the teletherapy unit within the treatment room;

(iii) using the teletherapy unit in a manner that could result in increased radiation levels in areas outside the teletherapy treatment room;

(iv) relocating the teletherapy unit; or

(v) allowing an individual not listed on the licensee's license to perform the duties of the radiation therapy physicist.

(4) **Safety instruction.** (i) A licensee shall post written instructions at the teletherapy unit console. To satisfy this requirement, these instructions shall inform the operator of: (A) the procedure to be followed to ensure that only the patient is in the treatment room before turning the primary beam of radiation on to begin a treatment or after a door interlock interruption; and

(B) the procedure to be followed if:

(a) the operator is unable to turn the primary beam of radiation off with controls outside the treatment room or any other abnormal operation occurs; and

(b) the names and telephone numbers of the authorized users and radiation safety officer to be immediately contacted if the teletherapy unit or console operates abnormally.

(ii) A licensee shall provide instruction in the topics identified in §175.103(i)(4)(i) of this section to all individuals who operate a teletherapy unit and shall provide appropriate refresher training to individuals at intervals not to exceed 1 year. Such instruction shall include "dry runs" of emergency procedures.

(iii) A licensee shall retain for 3 years a record of individuals receiving instruction required by §175.103(2)(4)(ii) of this section, a description of the instruction, the date of instruction, and the name of the individual who gave the instruction.

(5) **Doors, interlocks, and warning systems.** (i) A licensee shall control access to the teletherapy room by a door at each entrance.

(ii) A licensee shall equip each entrance to the teletherapy room with an electrical interlock system that shall:

(A) prevent the operator from turning the primary beam of radiation on unless each treatment room entrance door is closed;

(B) turn the primary beam of radiation off immediately when an entrance door is opened; and

(C) prevent the primary beam of radiation from being turned on following an interlock interruption until all treatment room entrance doors are closed and the beam on-off control is reset at the console.

(iii) A licensee shall equip each entrance to the teletherapy room with a beam condition indicator light.

(6) **Possession of survey instrument.** A licensee authorized to use radioactive material in a teletherapy unit shall have in its possession either a portable radiation detection survey instrument capable of detecting dose rates over the range 1.0 mSv (0.1 mrem) per hour to 1000 mSv (100 mrem) per hour, or a portable radiation measurement survey instrument capable of measuring dose rates over the range 10 mSv (1 mrem) per hour to 10 mSv (1000 mrem) per hour. The instruments shall be operable and calibrated in accordance with §175.103(c)(2).

(7) **Radiation monitoring device.** (i) A licensee shall have in each teletherapy room a permanent radiation monitor capable of continuously monitoring beam status.

(ii) Each radiation monitor shall be capable of providing visible notice of a teletherapy unit malfunction that results in an exposed or partially exposed source. The visible indicator of high radiation levels must be observable by an individual entering the teletherapy room.

(iii) Each radiation monitor shall be equipped with a backup power supply separate from the power supply to the teletherapy unit. This backup power supply may be a battery system.

(iv) A radiation monitor must be checked with a dedicated check source for proper operation each day before the teletherapy unit is used for treatment of patients.

(v) A licensee shall maintain a record of the check required by §175.103(i)(7)(iv) for 3 years. The record shall include the date of the check, notation that the monitor indicates when the source is exposed, and the initials of the individual who performed the check.

(vi) If a radiation monitor is inoperable, the licensee shall require any individual entering the teletherapy room to use a survey instrument or audible alarm personal dosimeter to monitor for any malfunction of the source exposure mechanism that may result in an exposed or partially exposed source. The instrument or dosimeter shall be checked with a dedicated check source for proper operation at the beginning of each day of use. The licensee shall keep a record as described in §175.103(i)(7)(v).

(vii) A licensee shall promptly repair or replace the radiation monitor if it is inoperable.

(8) **Viewing and communications system.** (i) A licensee shall construct or equip each teletherapy room to permit continuous observation of the patient by a licensed radiation therapy technician or physician from the teletherapy unit console during irradiation.

(ii) A licensee shall construct or equip each teletherapy room to provide a means of communication with the patient from the teletherapy unit console during irradiation.

(9) **Dosimetry equipment.** (i) A licensee shall have a calibrated dosimetry system available for use. The system shall have been calibrated for cobalt-60 by the National Institute of Standards and Technology (formerly the National Bureau of Standards) or by an American Association of Physicists in Medicine (AAPM) Accredited Dosimetry Calibration Laboratory (ADCL). The calibration shall have been performed within the previous two (2) years and after any servicing that may have affected system calibration.

(ii) The licensee shall have available for use a dosimetry system for spot check measurements. To meet this requirement, the system may be compared with a system that has been calibrated in accordance with §175.103(i)(9)(i). This comparison shall have been performed within the previous twelve (12) months (6 months if an ionization chamber) and after each servicing that may have affected system calibration. Alternatively, the spot check system may be the same system used to meet the requirement in §175.103(i)(9)(i).

(iii) The licensee shall retain a record of each calibration, intercomparison, and comparison for the duration of the license. For each calibration, intercomparison, or comparison, the record shall include the date, the model numbers and serial numbers of the instruments that were calibrated, intercompared, or compared as required by §175.103(i)(9)(i) and (ii), the correction factors that were deduced, the names of the individuals who performed the calibration, intercomparison, or comparison, and evidence that the intercomparison meeting was sanctioned by a calibration laboratory or radiologic physics center accredited by AAPM.

(10) **Full calibration measurements.** (i) A licensee authorized to use a teletherapy unit for medical use shall perform full calibration measurements on each teletherapy unit:

(A) before the first medical use of the unit; and

(B) before medical use under the following conditions:

(a) whenever spot check measurements indicate that the output differs by more than 5 percent from the output obtained at the last full calibration corrected mathematically for radioactive decay;

(b) following replacement of the source or following reinstallation of the teletherapy unit in a new location;

(c) following any repair of the teletherapy unit that includes removal of the source or major repair of the components associated with the source exposure assembly; and

(C) at intervals not exceeding 1 year.

(ii) To satisfy the requirement of §175.103(i)(10)(i), full calibration measurements shall include determination of:

(A) the output within ± 3 percent for the entire range of field sizes and for the distance or entire range of distances used for medical use;

(B) the coincidence of the radiation field and the field indicated by the light beam localizing device;

(C) the uniformity of the radiation field and its dependence on the orientation of the useful beam;

(D) timer constancy and linearity over the range of uses;

(E) on-off error; and

(F) the accuracy of all distance measuring and localization devices in medical use.

(iii) A licensee shall use the dosimetry system described in §175.103(i)(9) to measure the output for one set of exposure conditions. The remaining radiation measurements required in §175.103(i)(10)(ii)(A) of this section may then

be made using a dosimetry system that indicates relative dose rates.

(iv) A licensee shall make full calibration measurements required by §175.103(i)(10)(i) in accordance with either the procedures recommended by the Scientific Committee on Radiation Dosimetry of the AAPM that are described in **Physics in Medicine and Biology** Vol. 16, No. 3, 1971, pp. 379-396, or by Task Group 21 of the Radiation Therapy Committee of the American Association of Physicists in Medicine that are described in **Medical Physics** Vol. 10, No. 6, 1983, pp. 741-771, and Vol. 11, No. 2, 1984, p. 213, or any superseding protocol.

(v) A licensee shall correct mathematically the outputs determined in §175.103(i)(10)(ii)(A) for physical decay for intervals not exceeding one month for cobalt-60.

(vi) Full calibration measurements required by §175.103(i)(10)(i) and physical decay corrections required by §175.103(i)(10)(v) shall be performed by the radiation therapy physicist named on the license.

(vii) A licensee shall retain a record of each calibration for the duration of the license. The record shall include the date of the calibration, the manufacturer's name, model number, and serial number or other unambiguous identification of both the teletherapy unit and the source and of the instruments used to calibrate the teletherapy unit, tables that describe the output of the unit over the range of field sizes and for the range of distances used in radiation therapy, a determination of the coincidence of the radiation field and the field indicated by the light beam localizing device, the measured timer accuracy for a typical treatment time, the calculated on-off error, the estimated accuracy of each distance measuring or localization device, and the signature of the radiation therapy physicist.

(11) **Periodic spot checks.** (i) A licensee authorized to use teletherapy units for medical use shall perform output spot checks on each teletherapy unit once each calendar month.

(ii) To satisfy the requirement of §175.103(i)(11)(i), measurements shall include determination of:

(A) timer constancy and timer linearity over the range of use;

(B) on-off error;

(C) the coincidence of the radiation field and the field indicated by the light beam localizing device;

(D) the accuracy of all distance measuring and localization devices used for medical use;

(E) the output for one typical set of operating conditions; and

(F) the difference between the measurement made in §175.103 (i)(11)(ii)(E) and the anticipated output, expressed as a percentage of the anticipated value obtained at last full calibration corrected mathematically for physical decay.

(iii) A licensee shall use the dosimetry system described in §175.103(i)(9) to make the measurement required in §175.103(i)(11)(ii)(E).

(iv) A licensee shall perform measurements required by §175.103(i)(11)(i) in accordance with procedures established by the radiation therapy physicist. That individual does not need to actually perform the output spot check measurements.

(v) A licensee shall have the radiation therapy physicist review the results of each output spot check within 15 days. The radiation therapy physicist shall promptly notify the licensee in writing of the results of each output spot check. The licensee shall keep a copy of each written notification for 3 years.

(vi) A licensee authorized to use a teletherapy unit for medical use shall perform safety spot checks of each teletherapy facility once each calendar month.

(vii) To satisfy the requirement of §175.103(i)(11)(vi), checks shall ensure proper operation of:

(A) electrical interlocks at each teletherapy room entrance;

(B) electrical or mechanical stops installed for the purpose of limiting use of the primary beam of radiation, restriction of source housing angulation or elevation, carriage or stand travel and operation of the beam on-off mechanism;

(C) beam condition indicator lights on the teletherapy unit, on the control console, and in the facility;

(D) viewing systems;

(E) treatment room doors from inside and outside the treatment room; and

(F) electrically assisted treatment room doors with the teletherapy unit electrical power turned "off".

(viii) A licensee shall lock the control console in the "off" position if any door interlock malfunctions. No licensee shall use the unit until the interlock system is repaired unless specifically authorized by the Department.

(ix) A licensee shall promptly repair any system identified in §175.103(i)(11)(vii) that is not operating properly. The teletherapy unit shall not be used until all repairs are completed.

(x) A licensee shall retain a record of each spot check required by §175.103(i)(11)(i) and (vi) for 3 years. The record shall include the date of the spot check, the manufacturer's name, model number, and serial number for both the teletherapy unit and source, the manufacturer's name, model number and serial number of the instrument used to measure the output of the teletherapy unit, the measured timer accuracy, the calculated on-off error, a determination of the coincidence of the radiation field and the field indicated by the light beam localizing device, the measured timer accuracy for a typical treatment time, the calculated on-off error, the estimated accuracy of each distance measuring or localization device, the difference between the anticipated output and the measured output, notations indicating the operability of each entrance door electrical interlock, each electrical or mechanical stop, each beam condition indicator light, the viewing system and doors, and the signature of the individual who performed the periodic spot check.

(12) **Radiation surveys for teletherapy facilities.** (i) Before medical use, after each installation of a teletherapy source, and after making any change for which an amendment is required by §175.103(i)(3) the licensee shall perform radiation surveys with an operable radiation measurement survey instrument calibrated in accordance with §175.103(c)(2) to verify that:

(A) the maximum and average radiation levels at 1 meter from the teletherapy source with the source in the off position and the collimators set for a normal treatment field do not exceed 100 mSv (10 mrem) per hour and 20 mSv (2 mrem) per hour, respectively; and

(B) with the teletherapy source in the on position with the largest clinically available treatment field and with a scattering phantom in the primary beam of radiation, that:

(a) radiation levels in restricted areas are not likely to cause personnel exposures in excess of the limits specified in §175.03; and

(b) radiation levels in unrestricted areas do not exceed the limits specified in §175.03.

(ii) If the results of the surveys required in §175.103(i)(12)(i) indicate any radiation levels in excess of the respective limit specified in §175.103(i)(12)(i)(A) or (B), the licensee shall lock the control in the "off" position and not use the unit:

(A) except as may be necessary to repair, replace, or test the teletherapy unit, the teletherapy unit shielding or the treatment room shielding; or

(B) until the licensee has received a specific exemption from the Department.

(iii) A licensee shall retain a record of the radiation measurements made following installation of a source for the duration of the license. The record shall include the date of the measurements, the reason the survey is required, the manufacturer's name, model number and serial number of the teletherapy unit, the source, and the instrument used to measure radiation levels, each dose rate measured around the teletherapy source while in the off position and the average of all measurements, a plan of the areas surrounding the treatment room that were surveyed, the measured dose rate at several points in each area expressed in mSv (mrem) per hour, the calculated maximum level of radiation over a period of 1 week for each restricted and unrestricted area, and the signature of the radiation safety officer.

(13) **Safety checks for teletherapy facilities.** (i) A licensee shall promptly check all systems listed in §175.103(i)(11) for proper function after each installation of a teletherapy source and after making any change for which an amendment is required by §175.103(i)(3).

(ii) If the results of the checks required in §175.103(i)(12)(i) indicate the malfunction of any system specified in §175.103(i)(11), the licensee shall lock the control console in the "off" position and not use the unit except as may be necessary to repair, replace, or check the malfunctioning system.

(iii) A licensee shall retain for 3 years a record of the facility checks following installation of a source. The record shall include notations indicating the operability of each entrance door interlock, each electrical or mechanical stop, each beam condition indicator light, the viewing system, and doors, and the signature of the radiation safety officer.

(14) **Modification of a teletherapy unit or room before beginning a treatment program.** (i) If the survey required by §175.103(i)(l2) indicates that an individual in an unrestricted area may be exposed to levels of radiation greater than those permitted by §175.03, before beginning the treatment program the licensee shall:

(A) either equip the unit with stops or add additional radiation shielding to ensure compliance with §175.03;

(B) perform the survey required by §175.103(i)(12) again; and

(C) include in the report required by §175.103(i)(15) the results of the initial survey, a description of the modification made to comply with §175.103(i)(14)(i) and the results of the second survey; or

(D) request and receive a license amendment that authorizes radiation levels in unrestricted areas greater than those permitted by §175.03.

(15) **Reports of teletherapy surveys, checks, tests, and measurements.** A licensee shall furnish a copy of the records required in §175.103(i)(12), (13) and (14) and the output from the teletherapy source expressed as Sv (rem) per hour at one meter from the source and determined during the full calibration required in §175.103(i)(10) to the Bureau of Radiological Health within 30 days following completion of the action that initiated the record requirement.

(j) **Training and experience requirements.** (1) **Radiation safety officer.** Except as provided in §175.103(j)(2), an individual fulfilling the responsibilities of the radiation safety officer as provided in §175.103(b)(2) shall:

(i) be certified by the:

(A) American Board of Health Physics in Comprehensive Health Physics; or

(B) American Board of Radiology; or

(C) American Board of Nuclear Medicine; or

(D) American Board of Science in Nuclear Medicine; or

(E) American Board of Medical Physics; or

(F) Board of Pharmaceutical Specialties in Nuclear Pharmacy; or

(ii) have had 200 hours of classroom and laboratory training as follows:

(A) radiation physics and instrumentation;

(B) radiation protection;

(C) mathematics pertaining to the use and measurement of radioactivity;

(D) radiation biology;

(E) radiopharmaceutical chemistry; and

(F) 1 year of full time experience in radiation safety at a medical institution under the supervision of the individual identified as the radiation safety officer on a Department, agreement state, or U.S. Nuclear Regulatory Commission license that authorizes the medical use of radioactive material; or

(iii) be an authorized user for those radioactive material uses that come within the radiation safety officer's responsibilities.

(2) **Training for experienced radiation safety officer.** An individual identified as a radiation safety officer on a Department, agreement state or U.S. Nuclear Regulatory Commission license on August 15, 1990 who oversees only the use of radioactive material for which the licensee was authorized on that date need not comply with the training requirements of §175.103(j)(1).

(3) **Training for uptake, dilution, or excretion studies.** Except as provided in §175.103(j)(11), the licensee shall require the authorized user of radioactive material listed in §175.103(d)(1)(i) to be a physician who:

(i) is certified in:

(A) Nuclear medicine by the American Board of Nuclear Medicine; or

(B) Diagnostic radiology by the American Board of Radiology; or

(C) Diagnostic radiology or radiology by the American Osteopathic Board of Radiology; or

(ii) has completed 40 hours of instruction in basic radioisotope handling techniques applicable to the use of prepared radiopharmaceuticals, and 20 hours of supervised clinical experience:

(A) to satisfy the basic instruction requirement, 40 hours of classroom and laboratory instruction shall include:

(a) radiation physics and instrumentation;

(b) radiation protection;

(c) mathematics pertaining to the use and measurement of radioactivity;

(d) radiation biology; and

(e) radiopharmaceutical chemistry.

(B) to satisfy the requirement for 20 hours of supervised clinical experience, training must be under the supervision of an authorized user at a medical institution and shall include:

(a) examining patients and reviewing their case histories to determine their suitability for radioisotope diagnosis, limitations, or contraindications;

(b) selecting the suitable radiopharmaceuticals and calculating and measuring the dosages;

(c) administering dosages to patients and using syringe radiation shields;

(d) collaborating with the authorized user in the interpretation of radioisotope test results; and

(e) patient followup; or

(C) has successfully completed a 6 month training program in nuclear medicine as part of a training program that has been approved by the Accreditation Council for Graduate Medical Education and that included classroom and laboratory training, work experience, and supervised clinical experience in all the topics identified in §175.103(j)(3)(ii).

(4) **Training for imaging and localization studies.** Except as provided in §175.103(j)(11), the licensee shall require the authorized user of a radiopharmaceutical, radiobiologic, generator, or reagent kit specified in §175.103(e)(1) to be a physician who:

(i) is certified in:

(A) Nuclear medicine by the American Board of Nuclear Medicine; or

(B) Diagnostic radiology by the American Board of Radiology; or

(C) Diagnostic radiology or radiology by the American Osteopathic Board of Radiology; or

(ii) has completed 200 hours of instruction in basic radioisotope handling techniques applicable to the use of prepared radiopharmaceuticals, generators, and reagent kits, 500 hours of supervised work experience and 500 hours of supervised clinical experience:

(A) to satisfy the basic instruction requirement, 200 hours of classroom and laboratory training shall include:

(a) radiation physics and instrumentation;

(b) radiation protection;

(c) mathematics pertaining to the use and measurement of radioactivity;

(d) radiopharmaceutical chemistry; and

(e) radiation biology.

(B) to satisfy the requirement for 500 hours of supervised work experience, training shall be under the supervision of an authorized user at a medical institution and shall include:

(a) ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;

(b) calibrating dose calibrators and diagnostic instruments and performing checks for proper operation of survey meters;

(c) calculating and safely preparing patient dosages;

(d) using administrative controls to prevent the misadministration of radioactive material;

(e) using emergency procedures to contain spilled radioactive material safely and using proper decontamination procedures; and

(f) eluting technetium-99m from generator systems, assaying and testing the eluate for molybdenum-99 and alumina contamination, and processing the eluate with reagent kits to prepare technetium-99m labeled radiopharmaceuticals or radiobiologics.

(C) to satisfy the requirement for 500 hours of supervised clinical experience, training shall be under the supervision of an authorized user at a medical institution and shall include:

(a) examining patients and reviewing their case histories to determine their suitability for radioisotope diagnosis, limitations, or contraindications;

(b) selecting the suitable radiopharmaceuticals or radiobiologics and calculating and measuring the dosages;

(c) administering dosages to patients and using syringe radiation shields;

(d) collaborating with the authorized user in the interpretation of radioisotope test results; and

(e) patient followup; or

(iii) has successfully completed a 6 month training program in nuclear medicine that has been approved by the Accreditation Council for Graduate Medical Education and that included classroom and laboratory training, work experience, and supervised clinical experience in all the topics identified in §175.103(j)(d)(ii).

(5) **Training for therapeutic use of radiopharmaceuticals or radiobiologics.** Except as provided in §175.103(j)(11), the licensee shall require the authorized user of a radioactive material listed in §175.103(f)(1)(i) for therapy to be a physician who:

(i) is certified by the:

(A) American Board of Nuclear Medicine; or

(B) American Board of Radiology in radiology, therapeutic radiology, or radiation oncology; or

(ii) has completed 80 hours of instruction in basic radioisotope handling techniques applicable to the use of therapeutic radiopharmaceuticals, and has had supervised clinical experience:

(A) to satisfy the requirement for instruction, 80 hours of classroom and laboratory training shall include:

(a) radiation physics and instrumentation;

(b) radiation protection;

(c) mathematics pertaining to the use and measurement of radioactivity; and

(d) radiation biology;

(B) to satisfy the requirement for supervised clinical experience, training shall be under the supervision of an authorized user at a medical institution and shall include:

(a) use of iodine-131 for diagnosis of thyroid function and the treatment of hyperthyroidism or cardiac dysfunction in ten individuals;

(b) use of strontium-89 as strontium chloride for the treatment of bone pain in patients with painful bone metastases in three individuals; and

(c) use of soluble phosphorus-32 for the treatment of ascites polycythemia vera, leukemia, or bone metastases in three individuals; and

(d) use of iodine-131 for treatment of thyroid carcinoma in three individuals; and

(e) use of colloidal chromic phosphorus-32 or of colloidal gold-198 for intracavitary treatment of malignant effusions in three individuals.

(6) **Training for therapeutic use of brachytherapy sources.** Except as provided in §175.103(j)(11), the licensee shall require the authorized user using a brachytherapy source specified in §175.103(h)(1) for therapy to be a physician who:

(i) is certified in:

(A) Radiology, therapeutic radiology, or radiation oncology by the American Board of Radiology; or

(B) Radiation oncology by the American Osteopathic Board of Radiology; or

(C) Radiology, with a specialization in radiotherapy, as a British "Fellow of the Faculty of Radiology" or "Fellow of the Royal College of Radiology"; or

(D) Therapeutic radiology by the Canadian Royal College of Physicians and Surgeons; or

(ii) is in the active practice of therapeutic radiology, has completed 200 hours of instruction in basic radioisotope handling techniques applicable to the therapeutic use of brachytherapy sources and 500 hours of supervised work experience and a minimum of 3 years of supervised clinical experience:

(A) to satisfy the requirement for instruction, 200 hours of classroom and laboratory training shall include:

(a) radiation physics and instrumentation;

(b) radiation protection;

(c) mathematics pertaining to the use and measurement of radioactivity; and

(d) radiation biology.

(B) to satisfy the requirement for 500 hours of supervised work experience, training shall be under the supervision of an authorized user at an institution and shall include:

(a) ordering, receiving, and unpacking radioactive materials safely and performing the related radiation surveys;

(b) checking survey meters for proper operation;

(c) preparing, implanting, and removing sealed sources;

(d) maintaining running inventories of material on hand;

(e) using administrative controls to prevent the misadministration of radioactive material; and

(f) using emergency procedures to control radioactive material.

(C) to satisfy the requirement for a period of supervised clinical experience, training shall include 1 year in a formal training program approved by the Residency Review Committee for Radiology of the Accreditation Council for Graduate Medical Education or the Committee on Postdoctoral Training of the American Osteopathic Association, and an additional 2 years of clinical experience in therapeutic radiology under the supervision of an authorized user at a medical institution. The supervised clinical experience shall include:

(a) examining individuals and reviewing their case histories to determine their suitability for brachytherapy treatment, and any limitations or contraindications;

(b) selecting the proper brachytherapy sources and dose and method of administration;

(c) calculating the dose; and

(d) post-administration followup and review of case histories in collaboration with the authorized user.

(7) **Training for ophthalmic use of strontium-90.** Except as provided in §175.103(j)(11), the licensee shall require the authorized user using only strontium-90 for ophthalmic radiotherapy to be a physician who:

(i) Is certified in radiology, therapeutic radiology, or radiation oncology by the American Board of Radiology; or

(ii) Is in the active practice of therapeutic radiology or ophthalmology, and has completed 24 hours of instruction in basic radioisotope handling techniques applicable to the use of strontium-90 for ophthalmic radiotherapy, and a period of supervised clinical training in ophthalmic radiotherapy:

(A) to satisfy the requirement for instruction, the classroom and laboratory training shall include:

(a) radiation physics and instrumentation;

(b) radiation protection;

(c) mathematics pertaining to the use and measurement of radioactivity; and

(d) radiation biology.

(B) to satisfy the requirement for a period of supervised clinical training in ophthalmic radiotherapy, training must be under the supervision of an authorized user at a medical institution and must include the use of strontium-90 for the ophthalmic treatment of five individuals that includes:

(a) examination of each individual to be treated;

(b) calculation of the dose to be administered;

(c) administration of the dose; and

(d) followup and review of each individual's case history.

(8) **Training for use of sealed sources for diagnosis.** Except as provided in §175.103(j)(11), the licensee shall require the authorized user using a sealed source in a device specified in §175.103(g)(1) to be a physician, dentist, or

podiatrist who:

(i) is certified in:

(A) radiology, diagnostic radiology, therapeutic radiology, or radiation oncology by the American Board of Radiology; or

(B) nuclear medicine by the American Board of Nuclear Medicine; or

(C) diagnostic radiology or radiology by the American Osteopathic Board of Radiology; or

(ii) Has completed 8 hours of instruction in basic radioisotope handling techniques specifically applicable to the use of the device. To satisfy the requirement for instruction, the training shall include:

(A) radiation physics, mathematics pertaining to the use and measurement of radioactivity, and instrumentation;

(B) radiation biology; and

(C) radiation protection and training in the use of the device for the purposes authorized by the license.

(9) **Training for teletherapy.** Except as provided in §175.103(j)(11), the licensee shall require the authorized user of a sealed source specified in §175.103(i)(1) in a teletherapy unit to be a physician who:

(i) is certified in:

(A) radiology, therapeutic radiology or radiation oncology by the American Board of Radiology; or

(B) radiation oncology by the American Osteopathic Board of Radiology; or

(C) radiology, with specialization in radiotherapy, as a British "Fellow of the Faculty of Radiology" or "Fellow of the Royal College of Radiology"; or

(D) therapeutic radiology by the Canadian Royal College of Physicians and Surgeons; or

(ii) is in the active practice of therapeutic radiology, and has completed 200 hours of instruction in basic radioisotope techniques applicable to the use of a sealed source in a teletherapy unit, 500 hours of supervised work experience, and a minimum of 3 years of supervised clinical experience:

(A) to satisfy the requirement for instruction, the classroom and laboratory training shall include:

(a) radiation physics and instrumentation;

(b) radiation protection;

(c) mathematics pertaining to the use and measurement of radioactivity; and

(d) radiation biology.

(B) to satisfy the requirement for supervised work experience, training shall be under the supervision of an authorized user at an institution and shall include:

(a) review of the full calibration measurements and periodic spot checks;

(b) preparing treatment plans and calculating treatment times;

(c) using administrative controls to prevent misadministrations;

(d) implementing emergency procedures to be followed in the event of the abnormal operation of a teletherapy unit or console; and

(e) checking and using survey meters.

(C) to satisfy the requirement for a period of supervised clinical experience, training shall include 1 year in a formal training program approved by the Residency Review Committee for Radiology of the Accreditation Council for Graduate Medical Education or the Committee on Postdoctoral Training of the American Osteopathic Association and an additional 2 years of clinical experience in therapeutic radiology under the supervision of an authorized user at a medical institution. The supervised clinical experience shall include:

(a) examining individuals and reviewing their case histories to determine their suitability for teletherapy treatment, and any limitations or contraindications;

(b) selecting the proper dose and how it is to be administered;

(c) calculating the teletherapy doses and collaborating with the authorized user in the review of patients' progress and consideration of the need to modify originally prescribed doses as warranted by patients' reaction to radiation; and

(d) post-administration followup and review of case histories.

(10) **Training for radiation therapy physicist.** The licensee shall require the radiation therapy physicist to:

(i) be certified by the American Board of Radiology or the American Board of Medical Physics in a branch of medical physics which deals with the therapeutic application of roentgen rays, gamma rays, electrons or other charged particles beams, neutrons and radiation from sealed radionuclide sources and the equipment associated with the production and use of these radiations; or

(ii) hold a master's or doctor's degree in physics, biophysics, radiological physics, or health physics, and have completed 1 year of full time training in therapeutic radiological physics and an additional year of full time work experience under the supervision of a radiation therapy physicist at a medical institution. To meet this requirement, the individual shall have performed the tasks listed in §175.103(c)(5) and (i)(10), (11) and (12) under the supervision of a radiation therapy physicist during the year of work experience.

However, as of January 1, 2000 only individuals certified as in §175.103(j)(10)(i) shall be named as radiation therapy physicists.

(11) **Training for experienced authorized users.** Practitioners of the healing arts identified as authorized users for the human use of radioactive material on a Department, agreement state, or U.S. Nuclear Regulatory Commission license issued before August 15, 1990 who perform only those methods of use for which they were authorized on that date need not comply with the training requirements of §175.103(j)(1) through (9).

(12) **Recentness of training.** The training and experience specified in §175.103(j)(1) through (10) must have been obtained within the 5 years preceding the date of application or the individual shall have had continuing applicable experience since the required training and experience was completed.

Rules of the City of New York

***** Current through December 2009 ****

24 RCNY 175.104

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 175 RADIATION CONTROL General Provisions

§175.104 Waste disposal.

(a) **General requirements.** (1) A licensee shall dispose of licensed material only:

(i) by transfer to an authorized recipient as provided in §175.101 or §175.104(f) of this Code, or to the U.S. Department of Energy; or

(ii) by decay in storage; or

(iii) by release in effluents within the limits in §175.03(d); or

(iv) as authorized pursuant to §175.104(b), (c), (d) or (e).

(2) A person shall be specifically licensed to receive waste containing licensed material from other persons for:

(i) treatment prior to disposal; or

(ii) treatment or disposal by incineration; or

(iii) decay in storage; or

(iv) disposal at a land disposal facility licensed pursuant to 10 CFR Part 61 or the equivalent regulations of an agreement state; or

(v) storage until transferred to a storage or disposal facility authorized to receive the waste.

(3) A licensee or applicant for a license shall obtain any permits required by the New York State Department of Environmental Conservation pursuant to 6 NYCRR Part 380, or any successor law or regulation.

(4) A licensee or applicant for a license shall develop, document and implement a discharge minimization program required by the New York State Department of Environmental Conservation pursuant to 6 NYCRR Section 380-7, or any successor law or regulation.

(b) **Method for obtaining approval of proposed disposal procedures.** (1) A licensee or applicant for a license may apply to the Department for approval of proposed disposal procedures, not otherwise authorized in this Code, but which will conform to state and federal regulations, to dispose of licensed material generated in the licensee's operations. Each application shall include:

(i) a description of the waste containing licensed material to be disposed of, including the physical and chemical properties that have an impact on risk evaluation, and the proposed manner and conditions of waste disposal; and

(ii) an analysis and evaluation of pertinent information on the nature of the environment; and

(iii) the nature and location of other potentially affected facilities; and

(iv) analyses and procedures to ensure that doses are maintained ALARA and within the dose limits in §175.03.

(c) **Disposal by release into sanitary sewerage.** (1) A licensee may discharge licensed material into sanitary sewerage if each of the following conditions is satisfied:

(i) the material is readily soluble in water or is biological material that is readily dispersible in water; and

(ii) the quantity of licensed radioactive material that the licensee releases into the sewer in 1 month divided by the average monthly volume of water released into the sewer by the licensee does not exceed the concentration listed in Table 3 of Appendix B of §175.03; and

(iii) if more than one radionuclide is released, the following conditions must also be satisfied:

(A) the licensee shall determine the fraction of the limit in Table 3 of Appendix B of §175.03 represented by discharges into sanitary sewerage by dividing the actual monthly average concentration of each radionuclide released by the licensee into the sewer by the concentration of that radionuclide listed in Table 3 of Appendix B of §175.03; and

(B) the sum of the fractions for each radionuclide required by §175.104(c)(1)(iii)(A) does not exceed unity; and

(iv) the total quantity of licensed radioactive material that the licensee releases into the sanitary sewerage in a year does not exceed 37 GBq (1 Ci) of all radioactive materials combined.

(2) Excreta from individuals undergoing medical diagnosis or therapy with radioactive material are not subject to the limitations contained in §175.104(c)(1).

(d) **Treatment or disposal by incineration or burial.** (1) No person shall treat or dispose of licensed radioactive material by incineration except as specifically approved by the Department pursuant to §175.104(b).

(2) No person shall bury any licensed radioactive materials within this City.

(e) **Disposal of specific wastes.** (1) A licensee may ship for disposal outside of this City the following licensed material as if it were not radioactive, provided however, that the receiving jurisdiction regulates such materials as if they were not radioactive:

(i) 1.85 kBq (0.05 mCi), or less, of hydrogen-3 or carbon-14 per gram of medium used for liquid scintillation counting; and

(ii) 1.85 kBq (0.05 mCi), or less, of hydrogen-3 or carbon-14 per gram of animal tissue, averaged over the weight of the entire animal.

(2) A licensee shall not dispose of tissue pursuant to §175.104(e)(1)(ii) in a manner that would permit its use either as food for humans or as animal feed.

(3) The licensee shall maintain records in accordance with §175.03(k)(l0).

(f) **Transfer for disposal and manifests.** (1) The requirements of §175.104(f) and Appendix A of §175.104 are designed to control transfers of low-level radioactive waste intended for disposal at a licensed low-level radioactive waste disposal facility, establish a manifest tracking system, and supplement existing requirements concerning transfers and recordkeeping for those wastes.

(2) Each shipment of radioactive waste designated for disposal at a licensed low-level radioactive waste disposal facility shall be accompanied by a shipment manifest as specified in Section I of Appendix A of §175.104.

(3) Each shipment manifest shall include a certification by the waste generator as specified in Section II of Appendix A of §175.104.

(4) Each person involved in the transfer of waste for disposal or in the disposal of waste, including the waste generator, waste collector, waste processor, and disposal facility operator, shall comply with the requirements specified in Section III of Appendix A of §175.104.

(5) The licensee or applicant for a license shall comply with the requirements of the New York State Department of Environmental Conservation as codified in 6 NYCRR Part 381, or any successor law or regulation.

(g) **Compliance with environmental and health protection regulations.**

(1) Nothing in this section relieves the licensee from complying with other applicable Federal, State and local regulations governing any other toxic or hazardous properties of materials that may be disposed of pursuant to this section.

(h) **Records of waste disposal.** (1) The licensee shall maintain records of the disposal of licensed materials made under §175.104(b), (c), (d), (e) and 10 CFR Part 61 or the equivalent regulations of an agreement state.

(2) The licensee shall retain the records required by §175.104(h)(1) until the Department authorizes disposition.

HISTORICAL NOTE

Section repealed and added City Record June 27, 1994 eff. July 27, 1994.

Section in original publication July 1, 1991.

APPENDIX A

REQUIREMENTS FOR TRANSFER OF LOW-LEVEL

RADIOACTIVE WASTE FOR DISPOSAL AT LAND DISPOSAL

FACILITIES AND MANIFESTS

I. **Manifest.** The shipment manifest shall contain the name, address, and telephone number of the person generating the waste. The manifest shall also include the name, address, and telephone number or the name and U.S. Environmental Protection Agency hazardous waste identification number of the person transporting the waste to the land disposal facility. The manifest shall also indicate: a physical description of the waste, the volume, radionuclide identity and quantity, the total radioactivity, and the principal chemical form. The solidification agent shall be specified. Waste containing more than 0.1% chelating agents by weight shall be identified and the weight percentage of the chelating agent estimated. Wastes classified as Class A, Class B, or Class C in Section I of Appendix B shall be clearly identified as such in the manifest. The total quantity of the radionuclides hydrogen-3, carbon-14, technetium-99, and iodine-129 shall be shown. The manifest required by this paragraph may be shipping papers used to meet U.S. Department of Transportation or U.S. Environmental Protection Agency regulations or requirements of the receiver, provided all the required information is included. Copies of manifests required by this section may be legible carbon copies or legible photocopies.

II. **Certification.** The waste generator shall include in the shipment manifest a certification that the transported materials are properly classified, described, packaged, marked, and labeled and are in proper condition for transportation according to the applicable regulations of the U.S. Department of Transportation, the New York State Department of Environmental Protection and this Department. An authorized representative of the waste generator shall sign and date the manifest.

III. **Control and Tracking.** (a) Any radioactive waste generator who transfers radioactive waste to a land disposal facility or a licensed waste collector shall comply with the requirements in III. (a)(1) through (8). Any radioactive waste generator who transfers waste to a licensed waste processor who treats or repackages waste shall comply with the requirements of III. (a)(4) through (8). A licensee shall:

(1) Prepare all wastes so that the waste is classified according to Section I of Appendix B and meets the waste characteristics requirements in Section II of Appendix B;

(2) Label each package of waste to identify whether it is Class A waste, Class B waste, or Class C waste, in accordance with Section I of Appendix B;

(3) Conduct a quality control program to ensure compliance with Section I and II of Appendix B; the program shall include management evaluation of audits;

(4) Prepare shipping manifests to meet the requirements of Section I and II;

(5) Forward a copy of the manifest to the intended recipient, at the time of shipment, or deliver to a collector at the time the waste is collected, obtaining acknowledgment of receipt in the form of a signed copy of the manifest or equivalent documentation from the collector;

(6) Include one copy of the manifest with the shipment;

(7) Retain a copy of the manifest and documentation of acknowledgment of receipt as the record of transfer of licensed material as required by §175.101 of this Code; and

(8) For any shipments or any portion of a shipment for which acknowledgment of receipt has not been received within the times set forth in this section, conduct an investigation in accordance with Section III. (e).

(b) Any waste collector licensee who handles only prepackaged waste shall:

(1) Acknowledge receipt of the waste from the generator within 1 week of receipt by returning a signed copy of the manifest or equivalent documentation;

(2) Prepare a new manifest to reflect consolidated shipments; the new manifest shall serve as a listing or index for the detailed generator manifests. Copies of the generator manifests shall be a part of the new manifest. The waste collector may prepare a new manifest without attaching the generator manifests, provided the new manifest contains for each package the information specified in Section I of this appendix. The collector licensee shall certify that nothing has been done to the waste that would invalidate the generator's certification;

(3) Forward a copy of the new manifest to the land disposal facility operator at the time of shipment;

(4) Include the new manifest with the shipment to the disposal site;

(5) Retain a copy of the manifest and documentation of acknowledgment of receipt as the record of transfer of licensed material as required by §175.101 of this Code, and retain information from generator manifest until disposition is authorized by the Department; and

(6) For any shipments or any portion of a shipment for which acknowledgment of receipt is not received within the times set forth in this section, conduct an investigation in accordance with Section III. (e).

(c) Any licensed waste processor who treats or repackages wastes shall:

(1) Acknowledge receipt of the waste from the generator within 1 week of receipt by returning a signed copy of the manifest or equivalent documentation;

(2) Prepare a new manifest that meets the requirements of Sections I and II of this appendix. Preparation of the new manifest reflects that the processor is responsible for the waste;

(3) Prepare all wastes so that the waste is classified according to Section I of Appendix B and meets the waste characteristics requirements in Section II of Appendix B;

(4) Label each package of waste to identify whether it is Class A waste, Class B waste, or Class C waste, in accordance with Sections I and III of Appendix B;

(5) Conduct a quality control program to ensure compliance with Sections I and II of Appendix B. The program shall include management evaluation of audits;

(6) Forward a copy of the new manifest to the disposal site operator or waste collector at the time of shipment, or deliver to a collector at the time the waste is collected, obtaining acknowledgment of receipt in the form of a signed copy of the manifest or equivalent documentation by the collector;

(7) Include the new manifest with the shipment;

(8) Retain copies of original manifests and new manifests and documentation of acknowledgment of receipt as the record of transfer of licensed material required by §175.101 of this Code; and

(9) For any shipment or portion of a shipment for which acknowledgment is not received within the times set forth in this section, conduct an investigation in accordance with Section III. (e).

(d) The land disposal facility operator shall:

(1) Acknowledge receipt of the waste within 1 week of receipt by returning a signed copy of the manifest or equivalent documentation to the shipper. The shipper to be notified is the licensee who last possessed the waste and transferred the waste to the operator. The returned copy of the manifest or equivalent documentation shall indicate any discrepancies between materials listed on the manifest and materials received;

(2) Maintain copies of all completed manifests or equivalent documentation until the Agency authorizes their disposition; and

(3) Notify the shipper, that is, the generator, the collector, or processor, and the Agency when any shipment or portion of a shipment has not arrived within 60 days after the advance manifest was received.

(e) Any shipment or portion of a shipment for which acknowledgment is not received within the times set forth in this section shall:

(1) Be investigated by the shipper if the shipper has not received notification or receipt within 20 days after transfer.

(i) Such investigation shall include tracing the shipment and filing a report with the Department. Each licensee who conducts a trace investigation shall file a written report with the Department within 2 weeks of completion of the investigation.

APPENDIX B

CLASSIFICATION AND CHARACTERISTICS OF LOW-LEVEL

RADIOACTIVE WASTE

I. **Classification of Radioactive Waste for Land Disposal.** (a) **Considerations.** Determination of the classification of radioactive waste involves two considerations. First, consideration must be given to the concentration of long-lived radionuclides (and their shorter-lived precursors) whose potential hazard will persist long after such precautions as institutional controls, improved waste form, and deeper disposal have ceased to be effective. These precautions delay the time when long-lived radionuclides could cause exposures. In addition, the magnitude of the potential dose is limited by the concentration and availability of the radionuclide at the time of exposure. Second, consideration must be given to the concentration of shorter-lived radionuclides for which requirements on institutional controls, waste form, and disposal methods are effective.

(b) **Classes of waste.** (1) Class A waste is waste that is usually segregated from other waste classes at the disposal site. The physical form and characteristics of Class A waste must meet the minimum requirements set forth in Section II. (a). If Class A waste also meets the stability requirements set forth in Section II. (b), it is not necessary to segregate the waste for disposal.

(2) Class B waste is waste that must meet more rigorous requirements on waste form to ensure stability after disposal. The physical form and characteristics of Class B waste must meet both the minimum and stability requirements set forth in Section II.

(3) Class C waste is waste that not only must meet more rigorous requirements on waste form to ensure stability but also requires additional measures at the disposal facility to protect against inadvertent intrusion. The physical form and characteristics of Class C waste must meet both the minimum and stability requirements set forth in Section II.

(c) **Classification determined by long-lived radionuclides.** If the radioactive waste contains only radionuclides listed in Table I, classification shall be determined as follows:

(1) If the concentration does not exceed 0.1 times the value in Table I, the waste is Class A.

(2) If the concentration exceeds 0.1 times the value in Table I, but does not exceed the value in Table I, the waste is Class C.

(3) If the concentration exceeds the value in Table I, the waste is not generally acceptable for land disposal.

(4) For wastes containing mixtures of radionuclides listed in Table I, the total concentration shall be determined by the sum of fractions rule described in Section I. (g).

Table I

Radionuclide	Concentration curie/cubic metera	nanocurie/gramb
C-14		8
C-14 in activated metal		80
Ni-59 in activated metal		220
Nb-94 in activated metal		0.2
Tc-99		3
I-129		0.08
Alpha emitting transuranicradionuclides with half-life greater than five years		100
Pu-241		3,500
Cm-242		20,000
Ra-226		100

[a] To convert the Ci-m^{-3} values to gigabecquerels (GBq) per cubic meter, multiply the Ci-m^{-3} by 37.

[b] To convert the nCi/g values to becquerel (Bq) per gram, multiply the nCi/g value by 37.

(d) **Classification determined by short-lived radionuclides.** If the waste does not contain any of the radionuclides listed in Table I, classification shall be determined based on the concentrations shown in Table II. However, as specified in Section I. (f), if radioactive waste does not contain any nuclides listed in either Table I or II, it is Class A.

(1) If the concentration does not exceed the value in Column 1, the waste is Class A.

(2) If the concentration exceeds the value in Column 1 but does not exceed the value in Column 2, the waste is Class B.

(3) If the concentration exceeds the value in Column 2 but does not exceed the value in Column 3, the waste is Class C.

(4) If the concentration exceeds the value in Column 3, the waste is not generally acceptable for near-surface disposal.

(5) For wastes containing mixtures of the radionuclides listed in Table II, the total concentration shall be determined by the sum of fractions rule described in Section I. (g).

Table II

Radionuclide	Concentration, curie/cubic meter*		
	Column 1	Column 2	Column 3

Total of all radionuclides with less than 5-year half-life	700	*	*
H-3	40	*	*
Co-60	700	*	*
Ni-63	3.5	70	700
Ni-63 in activated metal	35	700	7000
Sr-90	0.04	150	7000
Cs-137	1	44	4600

* To convert the Ci/m^3 value to gigabecquerel (GBq) per cubic meter, multiply the Ci/m^3 value by 37. There are no limits established for these radionuclides in Class B or C wastes. Practical considerations such as the effects of external radiation and internal heat generation on transportation, handling, and disposal will limit the concentrations for these wastes. These wastes shall be Class B unless the concentrations of other radionuclides in Table II determine the waste to be Class C independent of these radionuclides.

(e) **Classification determined by both long- and short-lived radionuclides.** If the radioactive waste contains a mixture of radionuclides, some of which are listed in Table I and some of which are listed in Table II, classification shall be determined as follows:

(1) If the concentration of a radionuclide listed in Table I is less than 0.1 times the value listed in Table I, the class shall be that determined by the concentration of radionuclides listed in Table II.

(2) If the concentration of a radionuclide listed in Table I exceeds 0.1 times the value listed in Table I, but does not exceed the value in Table 1, the waste shall be Class C, provided the concentration of radionuclides listed in Table II does not exceed the value shown in Column 3 of Table II.

(f) **Classification of wastes with radionuclides other than those listed in Tables I and II.** If the waste does not contain any radionuclides listed in either Table I or II, it is Class A.

(g) **The sum of the fractions rule for mixtures of radionuclides.** For determining classification for waste that contains a mixture of radionuclides, it is necessary to determine the sum of fractions by dividing each radionuclide's concentration by the appropriate limit and adding the resulting values. The appropriate limits must all be taken from the same column of the same table. The sum of the fractions for the column must be less than 1.0 if the waste class is to be determined by that column. **Example:** A waste contains Sr-90 in a concentration of 1.85 TBq/m^3 (50 Ci/m^3) and Cs-137 in a concentration of 814 GBq/m^3 (22 Ci/m^3). Since the concentrations both exceed the values in Column 1, Table II, they must be compared to Column 2 values. For Sr-90 fraction, 50/150 = 0.33., for Cs-137 fraction, 22/44 = 0.5; the sum of the fractions = 0.83. Since the sum is less than 1.0, the waste is Class B.

(h) **Determination of concentrations in wastes.** The concentration of a radionuclide may be determined by indirect methods such as use of scaling factors which relate the inferred concentration of one radionuclide to another that is measured, or radionuclide material accountability, if there is reasonable assurance that the indirect methods can be correlated with actual measurements. The concentration of a radionuclide may be averaged over the volume of the waste, or weight of the waste if the units are expressed as becquerel (nanocurie) per gram.

II. **Radioactive Waste Characteristics.** (a) The following are minimum requirements for all classes of waste and are intended to facilitate handling and provide protection of health and safety of personnel at the disposal site.

(1) Wastes shall be packaged in conformance with the conditions of the license issued to the site operator to which the waste will be shipped. Where the conditions of the site license are more restrictive than the provisions of Part D, the site license conditions shall govern.

(2) Wastes shall not be packaged for disposal in cardboard or fiberboard boxes.

(3) Liquid waste shall be packaged in sufficient absorbent material to absorb twice the volume of the liquid.

(4) Solid waste containing liquid shall contain as little free-standing and non-corrosive liquid as is reasonably achievable, but in no case shall the liquid exceed 1% of the volume.

(5) Waste shall not be readily capable of detonation or of explosive decomposition or reaction at normal pressures and temperatures, or of explosive reaction with water.

(6) Waste shall not contain, or be capable of generating, quantities of toxic gases, vapors, or fumes harmful to persons transporting, handling, or disposing of the waste. This does not apply to radioactive gaseous waste packaged in accordance with Section II. (a)(8).

(7) Waste must not be pyrophoric. Pyrophoric materials contained in wastes shall be treated, prepared, and packaged to be nonflammable.*8

(8) Wastes in a gaseous form shall be packaged at an absolute pressure that does not exceed 1.5 atmospheres at 20°C. Total activity shall not exceed 3.7 TBq (100 Ci) per container.

(9) Wastes containing hazardous, biological, pathogenic, or infectious material shall be treated to reduce to the maximum extent practicable the potential hazard from the non-radiological materials.

(b) **The following requirements are intended to provide stability of the waste.** Stability is intended to ensure that the waste does not degrade and affect overall stability of the site through slumping, collapse, or other failure of the disposal unit and thereby lead to water infiltration. Stability is also a factor in limiting exposure to an inadvertent intruder, since it provides a recognizable and nondispersible waste.

(1) **Waste shall have structural stability.** A structurally stable waste form will generally maintain its physical dimensions and its form, under the expected disposal conditions such as weight of overburden and compaction equipment, the presence of moisture, and microbial activity, and internal factors such as radiation effects and chemical changes. Structural stability can be provided by the waste form itself, processing the waste to a stable form, or placing the waste in a disposal container or structure that provides stability after disposal.

(2) Notwithstanding the provisions in Sections II. (a)(3) and (4), liquid wastes, or wastes containing liquid, shall be converted into a form that contains as little free-standing and non-corrosive liquid as is reasonably achievable, but in no case shall the liquid exceed 1% of the volume of the waste when the waste is in a disposal container designed to ensure stability, or 0.5% of the volume of the waste for waste processed to a stable form.

(3) Void spaces within the waste and between the waste and its package shall be reduced to the extent practicable.

III. **Labeling.** Each package of waste shall be clearly labeled to identify whether it is Class A, Class B, or Class C waste, in accordance with Section I.

Table A-1-A_1 and A_2 Values for Radionuclides

Table A-2-General Values for A_1 and A_2

(a) **General Provisions.** (1) **Purpose and Scope.**

(i) This section establishes requirements for packaging, preparation for shipment, and transportation of licensed material. The packaging and transport of licensed material are also subject to other sections of this Code (e.g., §§175.03, 175.101) and to the regulations of other agencies (e.g., the U.S. Nuclear Regulatory Commission (NRC), the U.S. Department of Transportation (USDOT) and the U.S. Postal Service*)13 having jurisdiction over means of transport and other applicable state and local laws and regulations. The requirements of this section are in addition to, and not in substitution for, other requirements.

(ii) This section applies to any licensee authorized by specific or general license issued by the Department to receive, possess, use, or transfer licensed material, if the licensee delivers that material to a carrier for transport, transports the material outside the site of usage as specified in the Department license, or transports that material on public highways. No provision of this section authorizes possession of licensed material.

(iii) The requirements of this section apply to any person who has a license or who is required to obtain a license pursuant to this Code, if the person delivers radioactive material to a common or contract carrier for transport or transports the material outside the confines of the person's facility or other authorized place of use.

(2) **Records.** Each record required by this section must be legible throughout the retention period specified by this Code. The record may be the original or a reproduced copy or a microform provided that the copy or microform is authenticated by authorized personnel and that the microform is capable of producing a clear copy throughout the required retention period. The record may also be stored in electronic media with the capability for producing legible, accurate, and complete records during the required retention period. Records such as letters, drawings, specifications, must include all pertinent information such as stamps, initials, and signatures. The licensee shall maintain adequate

safeguards against tampering with and loss of records.

(3) **Completeness and accuracy of information.**

(i) Information provided to the Department by an applicant for a license, or by a licensee, or information required by applicable laws or regulations, or licensed conditions to be maintained by the applicant or the licensee must be complete and accurate in all material respects.

(ii) Each applicant or licensee shall notify the Department of information identified by the applicant or licensee as having, for the regulated activity, a significant implication for public health and safety or common defense and security. An applicant or licensee violates this requirement if the applicant or licensee fails to notify the Department of information that the applicant or licensee has identified as having a significant implication for public health and safety or common defense and security. Notification must be provided to the Department within two working days of identifying the information. This requirement is not applicable to information that is already required to be provided to the Department by other reporting or updating requirements.

(4) **Requirement for license.**

(i) Except as authorized in a general license or a specific license issued by the Department, or as exempted in this section, no person may-

(A) Deliver licensed material to a carrier for transport; or

(B) Transport licensed material.

(ii) Exemptions from the requirement for license in §175.105(a)(4) are specified in §175.105(b)(2). General licenses for which no NRC package approval is required are issued in §§175.105(c)(3) and 175.105(c)(4). The general license in §175.105(c)(1) requires that an NRC certificate of compliance or other package approval be issued for the package to be used under the general license. The transport of licensed material or delivery of licensed material to a carrier for transport is subject to the operating controls and procedures requirements of §175.105(d), to the quality assurance requirements of §175.105(e), and to the general provisions of §175.105(a), including USDOT regulations referenced in §175.105(a)(6).

(5) **Definitions.** The following terms are defined herein for the purpose of this section. These definitions are in addition to those in §175.02. To ensure compatibility with international transportation standards, all limits in this section are given in terms of dual units: The International System of Units (SI) followed or preceded by U.S. standard or customary units. The U.S. customary units are not exact equivalents, but are rounded to a convenient value, providing a functionally equivalent unit. For the purpose of this section, either unit may be used.

(i) "Certificate holder" means a person who has been issued a certificate of compliance or other package approval by the U.S. Nuclear Regulatory Commission.

(ii) "Certificate of Compliance (CoC)" means the certificate issued by the NRC which approves the design of a package for the transportation of radioactive material.

(iii) "Close reflection by water" means immediate contact by water of sufficient thickness for maximum reflection of neutrons.

(iv) "Containment system" means the assembly of components of the packaging intended to retain the radioactive material during transport.

(v) "Criticality Safety Index (CSI)" means the dimensionless number (rounded up to the next tenth) assigned to and placed on the label of a fissile material package, to designate the degree of control of accumulation of packages

containing fissile material during transportation. Determination of the criticality safety index is described in 10 CFR §§71.22, 71.23, and 71.59.

(vi) "Deuterium" means, for the purposes of 10 CFR §§71.15 and 71.22, deuterium and any deuterium compounds, including heavy water, in which the ratio of deuterium atoms to hydrogen atoms exceeds 1:5000.

(vii) "Graphite" means, for the purposes of 10 CFR §§71.15 and 71.22, graphite with a boron equivalent content less than 5 parts per million and density greater than 1.5 grams per cubic centimeter.

(viii) "Low toxicity alpha emitters" means natural uranium, depleted uranium, natural thorium; uranium-235, uranium-238, thorium-232, thorium-228 or thorium-230 when contained in ores or physical or chemical concentrates or tailings; or alpha emitters with a half-life of less than 10 days.

(ix) "Maximum normal operating pressure" means the maximum gauge pressure that would develop in the containment system in a period of 1 year under the heat condition specified in 10 CFR 71.71(c)(1), in the absence of venting, external cooling by an ancillary system, or operational controls during transport.

(x) "Natural thorium" means thorium with the naturally occurring distribution of thorium isotopes (essentially 100 weight percent thorium-232).

(xi) "Optimum interspersed hydrogenous moderation" means the presence of hydrogenous material between packages to such an extent that the maximum nuclear reactivity results.

(xii) "Spent nuclear fuel" means fuel that has been withdrawn from a nuclear reactor following irradiation, has undergone at least 1 year's decay since being used as a source of energy in a power reactor, and has not been chemically separated into its constituent elements by reprocessing. Spent fuel includes the special nuclear material, byproduct material, source material, and other radioactive materials associated with fuel assemblies.

(xiii) "Surface Contaminated Object (SCO)" means a solid object that is not itself classed as radioactive material, but which has radioactive material distributed on any of its surfaces. SCO must be in one of two groups with surface activity not exceeding the following limits:

(A) SCO-1: A solid object on which:

(a) The non-fixed contamination on the accessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed 4 Bq/cm^2 (10^{-4} $microcurie/cm^2$) for beta and gamma and low toxicity alpha emitters, or 0.4 Bq/cm^2 (10^{-5} $microcurie/cm^2$) for all other alpha emitters;

(b) The fixed contamination on the accessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed 4×10^4 Bq/cm^2 (1.0 $microcurie/cm^2$) for beta and gamma and low toxicity alpha emitters, or 4×10^3 Bq/cm^2 (0.1 $microcurie/cm^2$) for all other alpha emitters; and

(c) The non-fixed contamination plus the fixed contamination on the inaccessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed 4×10^4 Bq/cm^2 (1 $microcurie/cm^2$) for beta and gamma and low toxicity alpha emitters, or 4×10^3 Bq/cm^2 (0.1 $microcurie/cm^2$) for all other alpha emitters.

(B) SCO-II: A solid object on which the limits for SCO-I are exceeded and on which:

(a) The non-fixed contamination on the accessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed 400 Bq/cm^2 (10^{-2} $microcurie/cm^2$) for beta and gamma and low toxicity alpha emitters or 40 Bq/cm^2 (10^{-3} $microcurie/cm^2$) for all other alpha emitters;

(b) The fixed contamination on the accessible surface averaged over 300 cm^2 (or the area of the surface if less than

300 cm^2) does not exceed 8×10^5 Bq/cm^2 (20 microcuries/cm^2) for beta and gamma and low toxicity alpha emitters, or 8×10^4 Bq/cm^2 (2 microcuries/cm^2) for all other alpha emitters; and

(c) The non-fixed contamination plus the fixed contamination on the inaccessible surface averaged over 300 cm^2 (or the area of the surface if less than 300 cm^2) does not exceed 8×10^5 Bq/cm^2 (20 microcuries/cm^2) for beta and gamma and low toxicity alpha emitters, or 8×10^4 Bq/cm^2 (2 microcuries/cm^2) for all other alpha emitters.

(xiv) "Unirradiated uranium" means uranium containing not more than 2 x 103 Bq of plutonium per gram of uranium-235, not more than 9 x 106 Bq of fission products per gram of uranium-235, and not more than 5 x 10-3 g of uranium-236 per gram of uranium-235.

(xv) Uranium-natural, depleted, enriched

(A) "Natural uranium" means uranium with the naturally occurring distribution of uranium isotopes (approximately 0.711 weight percent uranium-235, and the remainder by weight essentially uranium-238).

(B) "Depleted uranium" means uranium containing less uranium-235 than the naturally occurring distribution of uranium isotopes.

(C) "Enriched uranium" means uranium containing more uranium-235 than the naturally occurring distribution of uranium isotopes.

(6) **Transportation of licensed material.**

(i) Each licensee who transports licensed material outside the site of usage, as specified in the license or where transport is on public highways, or who delivers licensed material to a carrier for transport, shall comply with the applicable requirements of the USDOT regulations in 49 CFR Parts 107, 171 through 180 and 390 through 397 appropriate to the mode of transport.

(A) The licensee shall particularly note USDOT regulations in the following areas:

(a) Packaging-49 CFR Part 173; Subparts A and B and I.

(b) Marking and labeling-49 CFR Part 172: Subpart D; and Sections 172.400 through 172.407 and Sections 172.436 through 172.441 of Subpart E.

(c) Placarding-49 CFR Part 172: Subpart F, especially Sections 172.500 through 172.519, 172.556, and Appendices B and C.

(d) Accident reporting-49 CFR Part 171: Sections 171.15 and 171.16.

(e) Shipping papers and emergency information-49 CFR Part 172: Subparts C and G.

(f) Hazardous material employee training-49 CFR Part 172: Subpart H.

(g) Security plans-49 CFR Part 172: subpart I.

(h) Hazardous material shipper/carrier registration-49 CFR Part 107: Subpart G.

(B) The licensee shall also note USDOT regulations pertaining to the following modes of transportation:

(a) Rail-49 CFR Part 174: Subparts A through D and K.

(b) Air-49 CFR Part 175.

(c) Vessel-49 CFR Part 176: Subparts A through F and M.

(d) Public Highway-49 CFR Part 177 and Parts 390 through 397.

(ii) If USDOT regulations are not applicable to a shipment of licensed material, the licensee shall conform to the standards and requirements of the USDOT specified in §175.105(a)(6)(i) to the same extent as if the shipment or transportation were subject to USDOT regulations. A request for modification, waiver, or exemption from those requirements, and any notification referred to in those requirements, must be filed with, or made to, the Director, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

(b) **Exemption.** (1) **Exemption of physicians.** Any physician licensed by a State to dispense drugs in the practice of medicine is exempt from §175.105(a)(6) with respect to transport by the physician of licensed material for use in the practice of medicine. However, any physician operating under this exemption must be licensed under applicable sections of this Code, 10 CFR Part 35 or the equivalent Agreement State regulations. Such transport must not be by public modes of transportation including, but not limited to, buses, subways, trams, taxicabs, car services, trains, ferries, or other means which would be returned immediately to public use after transporting licensed material.

(2) **Exemption for low-level materials.**

(i)A licensee is exempt from all requirements of this section with respect to shipment or carriage of the following low-level materials:

(A) Natural material and ores containing naturally occurring radionuclides that are not intended to be processed for use of these radionuclides, provided the activity concentration of the material does not exceed 10 times the values specified in Appendix A, Table A-2 of this section.

(B) Materials for which the activity concentration is not greater than the activity concentration values specified in Appendix A, Table A-2 of this section , or for which the consignment activity is not greater than the limit for an exempt consignment found in Appendix A, Table A-2 of this section.

(3) **Exemption from classification as fissile material.**

(i) Fissile material meeting the requirements of at least one of the paragraphs of this section are exempt from classification as fissile material and from the fissile material package standards of 10 CFR §§71.55 and 71.59, but are subject to all other requirements of this part, except as noted.

(ii) Individual package containing 2 grams or less of fissile material

(iii) Individual or bulk packaging containing 15 grams or less of fissile material provided the package has at least 200 grams of solid nonfissile material for every gram of fissile material. Lead, beryllium, graphite and hydrogenous material enriched in deuterium may be present in the package but must not be included in determining the required mass for solid nonfissile material.

(iv) Low concentrations of solid fissile material commingled with solid nonfissile material provided that:

(A) There is at least 2000 grams of solid nonfissile material for every gram of fissile material, and

(B) There is no more than 180 grams of fissile material distributed within 360 kg of contiguous nonfissile material.

(C) Lead, beryllium, graphite, and hydrogenous material may be present in the package but must not be included in determining the required mass of solid nonfissile material.

(v) Uranium enriched in uranium-235 to a maximum of 1 percent by weight, and with a total plutonium and

uranium-233 content of up to 1 percent of the mass of the uranium235, provided that the mass of any beryllium, graphite, and hydrogenous material enriched in deuterium constitutes less than 5 percent of the uranium mass.

(vi) Liquid solutions of uranyl nitrate enriched in uranium-235 to a maximum of 2 percent by mass, with a total plutonium and uranium-233 content not exceeding 0.002 percent of the mass of uranium, and with a minimum nitrogen to uranium atomic ratio (N/U) of 2. The material must be contained in at least a DOT Type A package.

(vii) Packages containing, individually, a total plutonium mass of not more than 1000 grams, of which not more than 20 percent by mass may consist of plutonium-239, plutonium-241, or any combination of these radionuclides.

(c) **General Licenses.** (1) **General license: NRC-approved package.**

(i) A general license is hereby issued to any licensee of the Department to transport, or to deliver to a carrier for transport, licensed material in a package for which a license, certificate of compliance, or other approval has been issued by the NRC.

(ii) This general license applies only to a licensee who-

(A) Has a quality assurance program approved by the Department as satisfying the provisions of §175.105(e) of this Code.

(B) Has a copy of the certificate of compliance, or other approval of the package, and has the drawings and other documents referenced in the approval relating to the use and maintenance of the packaging and to the actions to be taken before shipment;

(C) Complies with the terms and conditions of the license, certificate, or other approval, as applicable, and applicable provisions of the operating controls and procedures requirements of §175.105(d), the quality assurance requirements of §175.105(e), and the general provisions of §175.105(a); and

(D) Submits in writing to the Department, before the licensee's first use of the package, the licensee's name and license number and the package identification number specified in the package approval.

(iii) This general license applies only when the package approval authorizes use of the package under this general license.

(iv) For a Type B or fissile material package, the design of which was approved by NRC before April 1, 1996, the general license is subject to the additional restrictions contained in 10 CFR 71.13.

(2) **Previously approved package.**

(i) A Type B package previously approved by NRC but not designated as B(U) or B(M) in the identification number of the NRC Certificate of Compliance, may be used under the general license of §175.105(c)(1) with the following additional conditions:

(A) Fabrication of the packaging was satisfactorily completed by August 31, 1986, as demonstrated by application of its model number in accordance with §175.105(d)(2)(iii); (B) A package used for a shipment to a location outside the United States is subject to multilateral approval, as defined in USDOT regulations at 49 CFR 173.403; and

(C) A serial number that uniquely identifies each packaging which conforms to the approved design is assigned to, and legibly and durably marked on, the outside of each packaging.

(ii) A Type B(U) package, a Type B(M) package, a low specific activity (LSA) material package or a fissile material package, previously approved by the NRC but without the designation "-85" in the identification number of the

NRC Certificate of Compliance, may be used under the general license of §175.105(c)(1) with the following additional conditions:

(A) Fabrication of the package is satisfactorily completed by April 1, 1999 as demonstrated by application of its model number in accordance with §175.105(d)(2)(iii) of this Code;

(B) A package used for a shipment to a location outside the United States is subject to multilateral approval as defined in USDOT regulations at 49 CFR 173.403; and

(C) A serial number which uniquely identifies each packaging which conforms to the approved design is assigned to and legibly and durably marked on the outside of each packaging.

(3) **General license: U.S. Department of Transportation specification container.**

(i) A general license is issued to any licensee of the Department to transport, or to deliver to a carrier for transport, licensed material in a specification container for fissile material or for a Type B quantity of radioactive material as specified in USDOT regulations at 49 CFR Parts 173 and 178.

(ii) This general license applies only to a licensee who has a quality assurance program approved by the Department as satisfying the provisions of §175.105(e) of this Code.

(iii) This general license applies only to a licensee who-

(A) Has a copy of the specification; and

(B) Complies with the terms and conditions of the specification and the applicable provisions of the operating and procedures requirements in §175.105(d), the quality assurance requirements in §175.105(e) and the general provisions contained in §175.105(a).

(iv) This general license is subject to the limitation that the specification container may not be used for a shipment to a location outside the United States, except by multilateral approval, as defined in USDOT regulations at 49 CFR 173.403.

(v) The requirements of §175.105(c)(3) shall expire October 1, 2008.

(4) **General License: Use of foreign approved package.**

(i) A general license is issued to any licensee of the Department to transport, or to deliver to a carrier for transport, licensed material in a package the design of which has been approved in a foreign national competent authority certificate that has been revalidated by USDOT as meeting the applicable requirements of 49 CFR 171.12.

(ii) Except as otherwise provided herein, the general license applies only to a licensee who has a quality assurance program approved by the Department as satisfying the applicable provisions of §175.105(e) of this Code.

(iii) This general license applies only to shipments made to or from locations outside the United States.

(iv) This general license applies only to a licensee who-

(A) Has a copy of the applicable certificate, the revalidation, and the drawings and other documents referenced in the certificate, relating to the use and maintenance of the packaging and to the actions to be taken before shipment; and

(B) Complies with the terms and conditions of the certificate and revalidation, and with the applicable provisions of the operating and procedures requirements in §175.105(d), the quality assurance requirements in §175.105(e) and the

general provisions in §175.105(a). With respect to the quality assurance provisions of §175.105(e) of this Code, the licensee is exempt from design, construction, and fabrication consid- erations.

(5) **General License: Fissile Material.**

(i) A general license is issued to any licensee of the Department to transport fissile material, or to deliver fissile material to a carrier for transport, if the material is shipped in accordance with this section. The fissile material need not be contained in a package which meets the standards of-subparts E and F of 10 CFR 71.22; however the material must be contained in a Type A package. The Type A package must also meet the DOT requirements of 49 CFR 173.417(a).

(ii) The general license applies only to a licensee who has a quality assurance program approved by the Department as satisfying the provisions of §175.105(e) of this part

(iii) The general license applies only when a package's contents:

(A) Contain less than a Type A quantity of fissile material; and

(B) Contains less than 500 total grams of beryllium, graphite, or hydrogenous material enriched in deuterium.

(iv) The general license applies only to packages containing fissile material that are labeled with a CSI which:

(A) Has been determined in accordance with section (5) of this section

(B) Has a value less than or equal to 10; and

(C) For a shipment of multiple packages containing fissile material, the sum of the CSIs must be less than or equal to 50 (for shipment on a nonexclusive use conveyance) and less than or equal to 100 (for shipment on an exclusive use conveyance).

(v) (A) The value for the CSI must be greater than or equal to the number calculated by the following equation:

$$CSI = 10\left[\frac{\text{grams of } {}^{233}U}{X} + \frac{\text{grams of } {}^{233}U}{Y} + \frac{\text{grams of Pu}}{Z}\right];$$

(B) The calculated CSI must be rounded up to the first decimal place;

(C) The values of X, Y, and Z used in the CSI equation must be taken from Tables-71.1 or 71.2, as appropriate;

(D) If Table 71-2 is used to obtain the value of X, then the values of the terms in the equation for uranium-233 and plutonium must be assumed to be zero; and,

(E) Table 71-1 values for X, Y, and Z must be used to determine the CSI if:

(a) Uranium-233 is present in the package;

(b) The mass of plutonium exceeds 1 percent of the mass of uranium-235;

(c) The uranium is of unknown uranium-235 enrichment or greater than 24 weight percent enrichment; or

(d) Substances having a moderating effectiveness (i.e., an average hydrogen density greater than H2O) (e.g., certain

hydrocarbon oils or plastics) are present in any form, except as polyethylene used for packing or wrapping.

(6) **General license: Plutonium/Beryllium special form material.**

(i) A general license is issued to any licensee of the Department to transport fissile material in the form of plutonium-beryllium (Pu-Be) special form sealed sources, or to deliver Pu-Be sealed sources to a carrier for transport, if the material is shipped in accordance with this section. This material need not be contained in a package which meets the standards of subparts E and F of 10 CFR Part 71; however, the material must be contained in a Type A package. The Type A package must also meet the USDOT requirements of 49 CFR §173.417(a).

(ii) The general license applies only to a licensee who has a quality assurance program approved by the Department as satisfying §175.105(e)(1) of this section.

(iii) The general license applies only when a package's contents:

(A) Contain less than a Type A quantity of material; and

(B) Contain less than 1000 g of plutonium, provided that: plutonium-239, plutonium-241, or any combination of these radionuclides, constitute less than 240 g of the total quantity of plutonium in the package.

(iv) The general license applies only to packages labeled with a CSI which:

(A) Has been determined in accordance with part (v) of this section;

(B) Has a value less than or equal to 100;

(C) For a shipment of multiple packages containing Pu-Be sealed sources, the sum of the CSI must be less than or equal to 50 (for shipment on a nonexclusive use conveyance) and less than or equal to 100 (for shipment on an exclusive use conveyance).

(v) (A) The value for the CSI must be greater than or equal to the number calculated by the following equation:

$$\text{CSI} = 10\left[\frac{\text{grams of } {}^{239}\text{Pu} + \text{grams of } {}^{241}\text{Pu}}{24}\right]; \text{ and}$$

(B) The calculated CSI must be rounded up to the first decimal place.

(d) **Operating Controls and Procedures.** (1) **Applicability of operating controls and procedures.** A licensee subject to this section, who, under a general or specific license, transports licensed material or delivers licensed material to a carrier for transport, shall comply with the requirements of this subsection, with the quality assurance requirements of §175.105(e), and with the general provisions of §175.105(a) of this Code.

(2) **Preliminary determinations.** Before the first use of any packaging for the shipment of licensed material-

(i) The licensee shall ascertain that there are no cracks, pinholes, uncontrolled voids, or other defects that could significantly reduce the effectiveness of the packaging:

(ii) Where the maximum normal operating pressure will exceed 35 kPa (5 lbf/in^2) gauge, the licensee shall test the

containment system at an internal pressure at least 50 percent higher than the maximum normal operating pressure, to verify the capability of that system to maintain its structural integrity at that pressure; and

(iii) The licensee shall conspicuously and durably mark the packaging with its model number, serial number, gross weight, and a package identification number assigned by the NRC. Before applying the model number, the licensee shall determine that the packaging has been fabricated in accordance with the design approved by the NRC.

(3) **Routine determinations.** Before each shipment of licensed material, the licensee shall ensure that the package with its contents satisfies the applicable requirements of this section and of the license. The licensee shall determine that-

(i) The package is proper for the contents to be shipped;

(ii) The package is in unimpaired physical condition except for superficial defects such as marks or dents;

(iii) Each closure device of the packaging, including any required gasket, is properly installed and secured and free of defects;

(iv) Any system for containing liquid is adequately sealed and has adequate space or other specified provision for expansion of the liquid;

(v) Any pressure relief device is operable and set in accordance with written procedures;

(vi) The package has been loaded and closed in accordance with written procedures;

(vii) Any structural part of the package that could be used to lift or tie down the package during transport is rendered inoperable for that purpose, unless it satisfies the design requirements of 10 CFR 71.45;

(viii) The level of non-fixed (removable) radioactive contamination on the external surfaces of each package offered for shipment is as low as reasonably achievable, and within the limits specified in USDOT regulations in 49 CFR 173.443;

(ix) External radiation levels around the package and around the vehicle, if applicable, will not exceed the limits specified in 10 CFR 71.47 at any time during transportation;

(x) Accessible package surface temperatures will not exceed the limits specified in 10 CFR 71.43(g) at any time during transportation; and

(xi) For fissile material, any moderator or neutron absorber, if required, is present and in proper condition.

(xii) When the isotopic abundance, mass, concentration, degree of irradiation, degree of moderation, or other pertinent property of fissile material in any package is not known, the licensee shall package the fissile material as if the unknown properties have credible values that will cause the maximum neutron multiplication.

(4) **Air transport of plutonium.**

(i) Notwithstanding the provisions of any general licenses and notwithstanding any exemptions stated directly in this section or included indirectly by citation of 49 CFR chapter I, as may be applicable, the licensee shall assure that plutonium in any form, whether for import, export, or domestic shipment, is not transported by air or delivered to a carrier for air transport unless:

(A) The plutonium is contained in a medical device designed for individual human application; or

(B) The plutonium is contained in a material in which the specific activity is less than or equal to the activity concentration values for plutonium specified in Appendix A, Table A-2, of this section and in which the radioactivity is essentially uniformly distributed; or

(C) The plutonium is shipped in a single package containing no more than an A_2 quantity of plutonium in any isotope or form, and is shipped in accordance with §175.105(a)(6); or

(D) The plutonium is shipped in a package specifically authorized for the shipment of plutonium by air in the Certificate of Compliance for that package issued by the NRC.

(ii) Nothing in §175.105(d)(4)(i) is to be interpreted as removing or diminishing the requirements of 10 CFR 73.24

(iii) For a shipment of plutonium by air which is subject to §175.105(d)(4)(i)(D), the licensee shall, through special arrangement with the carrier, require compliance with 49 CFR 175.704, U.S. Department of Transportation regulations applicable to the air transport of plutonium.

(5) **Opening instructions.** Before delivery of a package to a carrier for transport, the licensee shall ensure that any special instructions needed to safely open the package have been sent to, or otherwise made available to, the consignee for the consignee's use in accordance with §175.03(j)(6) of this Code.

(6) **Records.**

(i) Each licensee shall maintain, for a period of 3 years after shipment, a record of each shipment of licensed material not exempt under §175.105(b)(2), showing where applicable-

(A) Identification of the packaging by model number and serial number;

(B) Verification that there are no significant defects in the packaging, as shipped;

(C) Volume and identification of coolant;

(D) Type and quantity of licensed material in each package, and the total quantity of each shipment;

(E) For each item of irradiated fissile material-

(a) Identification by model number and serial number;

(b) Irradiation and decay history to the extent appropriate to demonstrate that its nuclear and thermal characteristics comply with license conditions; and

(c) Any abnormal or unusual condition relevant to radiation safety;

(F) Date of the shipment;

(G) For fissile packages and for Type B packages, any special controls exercised;

(H) Name and address of the transferee;

(I) Address to which the shipment was made; and

(J) Results of the determinations required by §175.105(d)(3) and by the conditions of the package approval.

(ii) The licensee shall make available to the Department for inspection, upon reasonable notice, all records required by this section. Records are only valid if stamped, initialed, or signed and dated by authorized personnel or otherwise

authenticated.

(iii) The licensee shall maintain sufficient written records to furnish evidence of the quality of packaging. The records to be maintained include results of the determinations required by §175.105(d)(2); design, fabrication, and assembly records, results of reviews, inspections, tests, and audits; results of monitoring work performance and materials analyses; and results of maintenance, modification and repair activities. Inspection, test, and audit records must identify the inspector or data recorder, the type of observation, the results, the acceptability and the action taken in connection with any deficiencies noted. The records must be retained for 3 years after the life of the packaging to which they apply.

(7) **Inspection and tests.**

(i) The licensee or certificate holder shall permit the Department, at all reasonable times, to inspect the licensed material, packaging, premises, and facilities in which the licensed material or packaging is used, provided, constructed, fabricated, tested, stored, or shipped.

(ii) The licensee shall perform, and permit the Department to perform, any tests the Department deems necessary or appropriate for the administration of the requirements of this section.

(iii) The licensee shall notify the Department at least 45 days before fabrication of a package to be used for the shipment of licensed material having a decay heat load in excess of 5kW or with a maximum normal operating pressure in excess of 103kPa (15 lbf/in^2) gauge.

(8) **Reports.** The licensee shall report to the Department within 30 days-

(i) Any instance in which there is significant reduction in the effectiveness of any approved Type B, or fissile, packaging during use;

(ii) Details of any defects with safety significance in Type B, or fissile, packaging after first use, with the means employed to repair the defects and prevent their recurrence; or

(iii) Instances in which the conditions of approval in the certificate of compliance were not observed in making a shipment.

(9) **Advance notification of shipment of irradiated reactor fuel and nuclear waste.**

(i) As specified in §§175.105(d)(9)(ii), (iii) and (iv), each licensee shall provide advance notification to the governor of a State, or the governor's designee, and the Department, of the shipment of licensed material, through, or across the boundary of the State, before the transport, or delivery to a carrier, for transport, of licensed material outside the confines of the licensee's plant or other place of use or storage.

(ii) Advance notification is required under this subdivision for shipments of irradiated reactor fuel in quantities less than that subject to advance notification requirements of 10 CFR 73.37(f). Advance notification is also required under this subdivision for shipment of licensed material; other than irradiated fuel, meeting the following three conditions:

(A) The licensed material is required by this section to be in Type B packaging for transportation;

(B) The licensed material is being transported to or across a State boundary en route to a disposal facility or to a collection point for transport to a disposal facility; and

(C) The quantity of licensed material in a single package exceeds the least of the following:

(a) 3000 times the A_1 value of the radionuclides as specified in appendix A. Table A-1 for special form radioactive

material;

(b) 3000 times the A_2 value of the radionuclides as specified in appendix A. Table A-1 for normal form radioactive material; or

(c) 1000 TBq (27,000 Ci).

(iii) Procedures for submitting advance notification.

(A) The notification must be made in writing to the office of each appropriate governor or governor's designee and to the Department.

(B) A notification delivered by mail must be postmarked at least 7 days before the beginning of the 7-day period during which departure of the shipment is estimated to occur.

(C) A notification delivered by any means other than mail must reach the office of the governor or of the governor's designee and the Department at least 4 days before the beginning of the 7-day period during which departure of the shipment is estimated to occur.

(a) A list of the names and mailing addresses of the governors' designees receiving advance notification of transportation of nuclear waste was published in the Federal Register on June 30, 1995 (60 FR 34306).

(b) The list will be published annually in the Federal Register on or about June 30 to reflect any changes in information.

(c) A list of the names and mailing addresses of the governors' designees is available on request from the Director, Office of State Programs, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

(D) The licensee shall retain a copy of the notification as a record for 3 years.

(iv) Information to be furnished in advance notification of shipment. Each advance notification of shipment of irradiated reactor fuel or nuclear waste must contain the following information:

(A) The name, address, and telephone number of the shipper, carrier, and receiver of the irradiated reactor fuel or nuclear waste shipment;

(B) A description of the irradiated reactor fuel or nuclear waste contained in the shipment, as specified in the regulations of USDOT in 49 CFR 172.202 and 172.203(d);

(C) The point of origin of the shipment and the 7-day period during which departure of the shipment is estimated to occur;

(D) The 7-day period during which arrival of the shipment at State boundaries is estimated to occur;

(E) The destination of the shipment, and the 7-day period during which arrival of the shipment is estimated to occur; and

(F) A point of contact, with a telephone number, for current shipment information.

(v) **Revision notice.** A licensee who finds that schedule information previously furnished to a governor or governor's designee, or the Department, in accordance with this subdivision, will not be met, shall telephone a responsible individual in the office of the governor of the State or of the governor's designee, and the Department, and inform that individual of the extent of the delay beyond the schedule originally reported. The licensee shall maintain a

record of the name of the individual contacted for 3 years.

(vi) **Cancellation notice.**

(A) Each licensee who cancels an irradiated reactor fuel or nuclear waste shipment for which advance notification has been sent shall send a cancellation notice to the governor of each State or to the governor's designee previously notified, and to the Department.

(B) The licensee shall state in the notice that it is a cancellation and identify the advance notification that is being canceled. The licensee shall retain a copy of the notice as a record for 3 years.

(e) **Quality Assurance.** (1) **Quality assurance requirements.**

(i) **Purpose.** This subsection describes quality assurance requirements applying to design, purchase, fabrication, handling, shipping, storing, cleaning, assembly, inspection, testing, operation, maintenance, repair, and modification of components of packaging that are important to safety. As used in this subsection, "quality assurance" comprises all those planned and systematic actions necessary to provide adequate confidence that a system or component will perform satisfactorily in service. Quality assurance includes quality control, which comprises those quality assurance actions related to control of the physical characteristics and quality of the material or component to predetermined requirements.

(ii) **Establishment of program.** Each licensee shall establish, maintain, and execute a quality assurance program satisfying each of the applicable criteria of §§175.105(e)(1) through 175.105(e)(19) and satisfying any specific provisions that are applicable to the licensee's activities including procurement of packaging. The licensee shall apply each of the applicable criteria in a graded approach, i.e., to an extent that is consistent with its importance to safety.

(iii) **Approval of program.** Before the use of any package for the shipment of licensed material subject to this subsection each licensee shall obtain Department approval of its quality assurance program. Each licensee shall file a description of its quality assurance program, including a discussion of which requirements of this subsection are applicable and how they will be satisfied, with the Department.

(iv) Repealed.

(v) Repealed.

(vi) **Previously approved programs.** An NRC-approved quality assurance program that satisfies the applicable criteria of Appendix B of 10 CFR Part 50, and that is established, maintained, and executed with regard to transport packages, will be accepted as satisfying the requirements of §175.105(e)(1)(ii) of this Code. Before first use, the licensee shall notify the NRC and the Department of its intent to apply its previously approved Appendix B program to transportation activities. The licensee shall identify the program by date of submittal to the NRC and date of NRC approval.

(2) **Quality assurance organization.**

(i) The licensee shall be responsible for the establishment and execution of the quality assurance program. The licensee may delegate to others, such as contractors, agents, or consultants, the work of establishing and executing the quality assurance program, or any part of the quality assurance program, but shall retain responsibility for the program. The licensee shall clearly establish and delineate, in writing, the authority and duties of persons and organizations performing activities affecting the safety-related functions of structures, systems, and components. These activities include performing the functions associated with attaining quality objectives and the quality assurance functions.

(ii) The quality assurance functions are-

(A) Assuring that an appropriate quality assurance program is established and effectively executed; and

(B) Verifying, by procedures such as checking, auditing, and inspection, that activities affecting the safety-related functions have been performed correctly.

(iii) The persons and organizations performing quality assurance functions must have sufficient authority and organizational freedom to-

(A) Identify quality problems;

(B) Initiate, recommend, or provide solutions; and

(C) Verify implementation of solutions.

(iv) The persons and organizations performing quality assurance functions shall report to a management level that assures that the required authority and organizational freedom, including sufficient independence from cost and schedule, when opposed to safety considerations, are provided.

(v) Because of the many variables involved, such as the number of personnel, the type of activity being performed, and the location or locations where activities are performed, the organizational structure for executing the quality assurance program may take various forms, provided that the persons and organizations assigned the quality assurance functions have the required authority and organizational freedom.

(vi) Irrespective of the organizational structure, the individual(s) assigned the responsibility for assuring effective execution of any portion of the quality assurance program, at any location where activities subject to this subsection are being performed, must have direct access to the levels of management necessary to perform this function.

(3) **Quality assurance program.**

(i) The licensee shall establish, at the earliest practicable time consistent with the schedule for accomplishing the activities, a quality assurance program that complies with the requirements of §§175.105(e)(1) through 175.105(e)(19). The licensee shall document the quality assurance program by written procedures or instructions and shall carry out the program in accordance with those procedures throughout the period during which the packaging is used. The licensee shall identify the material and components to be covered by the quality assurance program, the major organizations participating in the program, and the designated functions of these organizations.

(ii) The licensee, through its quality assurance program, shall provide control over activities affecting the quality of the identified materials and components to an extent consistent with their importance to safety, and as necessary to assure conformance to the approved design of each individual package used for the shipment of radioactive material. The licensee shall assure that activities affecting quality are accomplished under suitably controlled conditions. Controlled conditions include the use of appropriate equipment; suitable environmental conditions for accomplishing the activity, such as adequate cleanliness; and assurance that all prerequisites for the given activity have been satisfied. The licensee shall take into account the need for special controls, processes, test equipment, tools, and skills to attain the required quality, and the need for verification of quality by inspection and test.

(iii) The licensee shall base the requirements and procedures of its quality assurance program on the following considerations concerning the complexity and proposed use of the package and its components:

(A) The impact of malfunction or failure of the item to safety;

(B) The design and fabrication complexity or uniqueness of the item;

(C) The need for special controls and surveillance over processes and equipment;

(D) The degree to which functional compliance can be demonstrated by inspection or test; and

(E) The quality history and degree of standardization of the item.

(iv) The licensee shall provide for indoctrination and training of personnel performing activities affecting quality, as necessary to assure that suitable proficiency is achieved and maintained. The licensee shall review the status and adequacy of the quality assurance program at established intervals. Management of other organizations participating in the quality assurance program shall review regularly the status and adequacy of that part of the quality assurance program which they are executing.

(4) **Package design control.**

(i) The licensee shall establish measures to assure that applicable requirements and the package design, as specified in the license for those materials and components to which this subdivision applies, are correctly translated into specifications, drawings, procedures, and instructions. These measures must include provisions to assure that appropriate quality standards are specified and included in design documents and that deviations from standards are controlled. Measures must be established for the selection and review for suitability of application of materials, parts, equipment, and processes that are essential to the safety-related functions of the materials, parts, and components of the packaging.

(ii) The licensee shall establish measures for the identification and control of design interfaces and for coordination among participating design organizations. These measures must include the establishment of written procedures, among participating design organizations, for the review, approval, release, distribution, and revision of documents involving design interfaces. The design control measures must provide for verifying or checking the adequacy of design, by methods such as design reviews, alternate or simplified calculational methods, or by a suitable testing program. For the verifying or checking process, the licensee shall designate individuals or groups other than those who were responsible for the original design, but who may be from the same organization. Where a test program is used to verify the adequacy of a specific design feature in lieu of other verifying or checking processes, the licensee shall include suitable qualification testing of a prototype or sample unit under the most adverse design conditions. The licensee shall apply design control measures to items such as the following:

(A) Criticality physics, radiation shielding, stress, thermal, hydraulic, and accident analyses;

(B) Compatibility of materials;

(C) Accessibility for inservice inspection, maintenance, and repair;

(D) Features to facilitate decontamination; and

(E) Delineation of acceptance criteria for inspections and tests.

(iii) The licensee shall subject design changes, including field changes, to design control measures commensurate with those applied to the original design. Changes in the conditions specified in the package approval require the Department's approval.

(5) **Procurement document control.** The licensee shall establish measures to assure that adequate quality is required in the documents for procurement of material, equipment, and services, whether purchased by the licensee or by its contractors or subcontractors. To the extent necessary, the licensee shall require contractors or subcontractors to provide a quality assurance program consistent with the applicable provisions of this section.

(6) **Instructions, procedures, and drawings.** The licensee shall prescribe activities affecting quality by documented instructions, procedures, or drawings of a type appropriate to the circumstances and shall require that these

instructions, procedures, and drawings be followed. The instructions, procedures, and drawings must include appropriate quantitative or qualitative acceptance criteria for determining that important activities have been satisfactorily accomplished.

(7) **Document control.** The licensee shall establish measures to control the issuance of documents such as instructions, procedures, and drawings, including changes, which prescribe all activities affecting quality. These measures must assure that documents, including changes, are reviewed for adequacy, approved for release by authorized personnel, and distributed and used at the location where the prescribed activity is performed. These measures must assure that changes to documents are reviewed and approved.

(8) **Control of purchased material, equipment, and services.**

(i) The licensee shall establish measures to assure that purchased material, equipment, and services, whether purchased directly or through contractors and subcontractors, conform to the procurement documents. These measures must include provisions, as appropriate, for source evaluation and selection, objective evidence of quality furnished by the contractor or subcontractor, inspection at the contractor or subcontractor source, and examination of products on delivery.

(ii) The licensee shall have available documentary evidence that material and equipment conform to the procurement specifications before installation or use of the material and equipment. The licensee shall retain, or have available, this documentary evidence for the life of the package to which it applies. The licensee shall assure that the evidence is sufficient to identify the specific requirements met by the purchased material and equipment.

(iii) The licensee shall assess the effectiveness of the control of quality by contractors and subcontractors at intervals consistent with the importance, complexity, and quantity of the product or services.

(9) **Identification and control of materials, parts, and components.** The licensee shall establish measures for the identification and control of materials, parts, and components. These measures must assure that identification of the item is maintained by heat number, part number, or other appropriate means, either on the item or on records traceable to the item, as required throughout fabrication, installation, and use of the item. These identification and control measures must be designed to prevent the use of incorrect or defective materials, parts, and components.

(10) **Control of special processes.** The licensee shall establish measures to assure that special processes, including welding, heat treating, and nondestructive testing, are controlled and accomplished by qualified personnel using qualified procedures in accordance with applicable codes, standards, specifications, criteria, and other special requirements.

(11) **Internal inspection.** The licensee shall establish and execute a program for inspection of activities affecting quality by or for the organization performing the activity, to verify conformance with the documented instructions, procedures, and drawings for accomplishing the activity. The inspection must be performed by individuals other than those who performed the activity being inspected. Examination, measurements, or tests of material or products processed must be performed for each work operation where necessary to assure quality. If direct inspection of processed material or products is not carried out, indirect control by monitoring processing methods, equipment, and personnel must be provided. Both inspection and process monitoring must be provided when quality control is inadequate without both. If mandatory inspection hold points, which require witnessing or inspecting by the licensee's designated representative and beyond which work should not proceed without the consent of its designated representative, are required, the specific hold points must be indicated in appropriate documents.

(12) **Test control.** The licensee shall establish a test program to assure that all testing required to demonstrate that the packaging components will perform satisfactorily in service is identified and performed in accordance with written test procedures that incorporate the requirements of this section and the requirements and acceptance limits contained in the package approval. The test procedures must include provisions for assuring that all prerequisites for the given test

are met, that adequate test instrumentation is available and used, and that the test is performed under suitable environmental conditions. The licensee shall document and evaluate the test results to assure that test requirements have been satisfied.

(13) **Control of measuring and test equipment.** The licensee shall establish measures to assure that tools, gauges, instruments, and other measuring and testing devices used in activities affecting quality are properly controlled, calibrated, and adjusted at specified times to maintain accuracy within necessary limits.

(14) **Handling, storage, and shipping control.** The licensee shall establish measures to control, in accordance with instructions, the handling, storage, shipping, cleaning, and preservation of materials and equipment to be used in packaging to prevent damage or deterioration. When necessary for particular products, special protective environments, such as inert gas atmosphere, and specific moisture content and temperature levels must be specified and provided.

(15) **Inspection, test, and operating status.** (i) The licensee shall establish measures to indicate, by the use of markings such as stamps, tags, labels, routing cards, or other suitable means, the status of inspections and tests performed upon individual items of the packaging. These measures must provide for the identification of items that have satisfactorily passed required inspections and tests, where necessary to preclude inadvertent bypassing of the inspections and tests.

(ii) The licensee shall establish measures to identify the operating status of components of the packaging, such as tagging valves and switches, to prevent inadvertent operation.

(16) **Nonconforming materials, parts, or components.** The licensee shall establish measures to control materials, parts, or components that do not conform to the licensee's requirements to prevent their inadvertent use or installation. These measures must include, as appropriate, procedures for identification, documentation, segregation, disposition, and notification to affected organizations. Nonconforming items must be reviewed and accepted, rejected, repaired, or reworked in accordance with documented procedures.

(17) **Corrective action.** The licensee shall establish measures to assure that conditions adverse to quality, such as deficiencies, deviations, defective material and equipment, and nonconformances, are promptly identified and corrected. In the case of a significant condition adverse to quality, the measures must assure that the cause of the condition is determined and corrective action taken to preclude repetition. The identification of the significant condition adverse to quality, the cause of the condition, and the corrective action taken must be documented and reported to appropriate levels of management.

(18) **Quality assurance records.** The licensee shall maintain sufficient written records to describe the activities affecting quality. The records must include the instructions, procedures, and drawings required by subdivision (6) of this subsection, to prescribe quality assurance activities and must include closely related specifications such as required qualifications of personnel, procedures, and equipment. The records must include the instructions or procedures which establish a records retention program that is consistent with applicable requirements and designates factors such as duration, location, and assigned responsibility. The licensee shall retain these records for 3 years beyond the date when the licensee last engages in the activity for which the quality assurance program was developed. If any portion of the written procedures or instructions is superseded, the licensee shall retain the superseded material for 3 years after it is superseded.

(19) **Audits.** The licensee shall carry out a comprehensive system of planned and periodic audits, to verify compliance with all aspects of the quality assurance program, and to determine the effectiveness of the program. The audits must be performed in accordance with written procedures or checklists by appropriately trained personnel not having direct responsibilities in the areas being audited. Audited results must be documented and reviewed by management having responsibility in the area audited. Follow-up action, including reaudit of deficient areas, must be taken where indicated.

HISTORICAL NOTE

Section repealed and added City Record June 30, 1999 eff. July 30, 1999. [See Vol. 9 Statements of

Basis and Purpose No. 13]

Section repealed and added City Record June 27, 1994 eff. July 27, 1994.

Section in original publication July 1, 1991.

Notes:

This section was repealed and reenacted on April 26, 1999 as a matter of compatibility to conform to NRC regulations found in 10 CFR Part 71 governing packaging and transportation of radioactive material.

APPENDIX A

DETERMINATION OF A_1 AND A_2

I. Values of A_1 and A_2 for individual radionuclides, which are the bases for many activity limits elsewhere in this Code, are given in Table A-1. The curie (Ci) values specified are obtained by converting from the Terabecquerel (TBq) value. The Terabecquerel values are the regulatory standard. The curie values are for information only and are not intended to be the regulatory standard. Where values of A_1 and A_2 are unlimited, it is for radiation control purposes only. For nuclear criticality safety, some materials are subject to controls placed on fissile material.

II. a. For individual radionuclides whose identities are known, but which are not listed in Table A-1, the A_1 and A2 values contained in Table A-3 may be used. Otherwise, the licensee shall obtain prior Department approval of the A1 and A_2 values for radionuclides not listed in Table A-1, before shipping the material.

b. For individual radionuclides whose identities are known, but which are not listed in Table A-2, the exempt material activity concentration and exempt consignment activity values contained in Table A-3 may be used. Otherwise, the licensee shall obtain prior Department approval of the exempt material activity concentration and exempt consignment activity values for radionuclides not listed in Table A-2, before shipping the material.

c. The licensee shall submit requests for prior approval, described under paragraphs II(a) and II(b) of this Appendix, to the Department.

III. In the calculations of A_1 and A_2 for a radionuclide not in Table A-1, a single radioactive decay chain, in which radionuclides are present in their naturally occurring proportions, and in which no daughter radionuclide has a half-life either longer than 10 days, or longer than that of the parent radionuclide, shall be considered as a single radionuclide, and the activity to be taken into account, and the A_1 or A_2 value to be applied, shall be those corresponding to the parent radionuclide of that chain. In the case of radioactive decay chains in which any daughter radionuclide has a half-life either longer than 10 days, or greater than that of the parent radionuclide, the parent and those daughter radionuclides shall be considered as mixtures of different radionuclides.

IV. For mixtures of radionuclides whose identities and respective activities are known, the following conditions apply:

a. For special form radioactive material, the maximum quantity transported in a Type A package is as follows:
S size="4">i B(i)A1(i) #1

where B(i) is the activity of radionuclide i, and A_1(i) is the A_1 value for radionuclide I.

b. For normal form radioactive material, the maximum quantity transported in a Type A package is as follows:

SB(i)/A2(i) < 1

where B(i) is the activity of radionuclide i, and A_2(i) is the A_2 value for radionuclide i.

c. Alternatively, the A_1 value for mixtures of special form material may be determined as follows:

A_1 for mixture = _____1
S size="4">i f(i)A1(i)

where f(i) is the fraction of activity for radionuclide I in the mixture, and A_1(i) is the appropriate A_1 value for radionuclide I.

d. Alternatively, the A_2 value for mixtures of normal form material may be determined as follows:

A_2 for mixture = _____1
S size="4">i f(i)A2(i)

where f(i) is the fraction of activity for radionuclide I in the mixture, and A_2(i) is the appropriate A_2 value for radionuclide I.

e. The exempt activity concentration for mixtures of nuclides may be determined as follows:

Exempt activity concentration for mixture = _____1
S size="4">i f(i) (i)

where f(i) is the fraction of activity concentration of radionuclide I in the mixture, and [A] is the activity concentration for exempt material containing radionuclide I.

f. The activity limit for an exempt consignment for mixtures of radionuclides may be determined as follows:

Exempt activity concentration for mixture = _____1
S size="4">i f(i)A(i)

where f(i) is the fraction of activity of radionuclide I in the mixture, and A is the activity limit for exempt consignments for radionuclide I.

V. When the identity of each radionuclide is known, but the individual activities of some of the radionuclides are not known, the radionuclides may be grouped, and the lowest A_1 or A_2 value, as appropriate, for the radionuclides in each group may be used in applying the formulas in paragraph IV. Groups may be based on the total alpha activity and the total beta/gamma activity when these are known, using the lowest A_1 or A_2 values for the alpha emitters and beta/gamma emitters.

Table A-1

A1 and A2 Values for Radionuclides

Symbol ofradio-nuclide	Element andatomic number	A1 (TBq)	A1 (Ci)	A2 (TBq)	A2 (Ci)	Specific activity (TB q/g) (Ci/g)

Ac-225 (a)	Actinium (89)	8.0X10-1	2.2X101	6.0X10-3	1.6X10-1	2.1X103	5.8X104

[a] A_1 and/or A_2 values include contributions from daughter nuclides with half-lives less than 10 days.

[b] The values of A_1 and A_2 in Curies (Ci) are approximate and for information only; the regulatory standard units are Terabecquerels (TBq), (see Appendix A to §175.105-Determination of A_1 and A_2, Section I.).

[c] The quantity may be determined from a measurement of the rate of decay or a measurement of the radiation level at a prescribed distance from the source.

[d] These values apply only to compounds of uranium that take the chemical form of UF_6, UO_2F_2 and $UO_2(NO_3)_2$ in both normal and accident conditions of transport.

[e] These values apply only to compounds of uranium that take the chemical form of UO_3, UF_4, UCl_4 and hexavalent compounds in both normal and accident conditions of transport.

[f] These values apply to all compounds of uranium other than those specified in notes (d) and (e) of this table.

[g] These values apply to unirradiated uranium only.

[h] A_1 = 0.1 TBq (2.7 Ci) and A_2 = 0.001 TBq (0.027 Ci) for Cf-252 for domestic use.

[i] A_2 = 0.74 TBq (20 Ci) for Mo-99 for domestic use.

[c] [Reserved]

[d] These values apply only to compounds of uranium that take the chemical form of UF_6, UO_2F_2 and $UO_2(NO_3)_2$ in both normal and accident conditions of transport.

[e] These values apply only to compounds of uranium that take the chemical form of UO_3, UF_4, UCl_4 and hexavalent compounds in both normal and accident conditions of transport.

[f] These values apply to all compounds of uranium other than those specified in notes (d) and (e) of this table.

[g] These values apply to unirradiated uranium only.

TABLE A-3

GENERAL VALUES FOR A1 AND A2

Contents	A1	A2	Activity concentration for exempt material (Bq/g)	Activity concentration for exempt material (Ci/g)	Activity limits for exempt consignments (Bq)	Activity limits for exempt consignments (Ci)
	(TBq)				(TBq)	(Ci)
Only beta or gamma emitting radionuclides	1 x	2.7 x	2 x	5.4 x	1 x	2.7	1 x	2.7

are known to be present	10-1	100	10 -2	10-1	101	x10-10	104	x10-7
Only alpha emittingradionuclides are knownto be present	2 x 10-1	5.4 x 100	9 x 10-5	2.4 x 10-3	1 x 10-1	2.7 x10-12	1 x 103	2.7 x10-8
No relevant data are available	1 x 10-3	2.7 x 10-2	9 x 10-5	2.4 x 10-3	1 x 10-1	2.7 x 10-12	1 x 103	2.7 x 10-8

TABLE A-4

ACTIVITY-MASS RELATIONSHIPS FOR URANIUM

Uranium Enrichment1 wt % U-235 present	Specific Activity	
	TBq/g	Ci/g
0.45	1.8 x 10-8	5.0 x 10-7
0.72	2.6 x 10-8	7.1 x 10-7
1	2.8 x 10-8	7.6 x 10-7

24 RCNY 175.201

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 175 RADIATION CONTROL General Provisions

§175.201 Microwave Ovens.

(a) **Applicability.** The provisions of this Code relating to microwave ovens shall apply to such ovens sold, offered for sale, repaired or altered for use in homes, restaurants or other food vending establishments, hospitals or other medical care facilities, schools, and other establishments in the City where the public may be exposed.

(b) **Definitions.** As used in the sections of this Code relating to microwave ovens, the following definitions shall apply:

(1) "Microwave oven" means a device designed to heat, cook or dry food through the application of electromagnetic energy at frequencies assigned by the Federal Communications Commission in the normal industrial, scientific and medical heating bands ranging from 890 megahertz to 6,000 megahertz.

(2) "Cavity" means that portion of the microwave oven in which food may be heated, cooked or dried.

(3) "Door" means the movable barrier which prevents access to the cavity during operation and whose function is to prevent emission of microwave energy from the passage or opening which provides access to the cavity.

(4) "Safety interlock" means a device or system of devices which is intended to prevent generation of microwave energy when access to the cavity is possible.

(5) "Service adjustments or service procedures" means those servicing methods prescribed by the manufacturer for a specific product model.

(6) "Stirrer" means that feature of a microwave oven which is intended to provide uniform heating of the load by constantly changing the standing wave pattern within the cavity or moving the load.

(7) "External surface" means the outside surface of the cabinet or enclosure provided by the manufacturer as part of the microwave oven, including doors, door handles, latches and control knobs.

(c) **Requirements for microwave ovens.** (1) **Power density limit.** The power density of the microwave radiation emitted by a microwave oven shall not exceed 5 milliwatts (mW) per cm^2 at any point 5 cm (2 in.) or more from the external surface of the oven except that a microwave oven offered for sale or sold by its manufacturer shall not have a power density exceeding 1 mW per cm^2 at any point 5 cm (2 in.) or more from the external surface of the oven.

(2) **Measurements and test conditions.** (i) Microwave ovens shall be in compliance with the power density limits if the maximum reading obtained at the location of greatest microwave radiation emission does not exceed the limits specified in this section when the emission is measured through at least one stirrer cycle.

(ii) The emission shall not exceed the requirements of §175.201(c)(1) when the microwave oven is operated at its maximum output and contains a load of 275 15 milliliters of tap water initially at 20.5 degrees Centigrade placed within the cavity at the center of the load-carrying surface provided by the manufacturer. The water container shall be a low form 600 milliliter beaker having an inside diameter of approximately 8.5 cm and made of an electrically non-conductive material such as glass or plastic.

(iii) Measurements shall be made with the door fully closed as well as with the door fixed in any other position which allows the oven to operate.

(3) **Door and safety interlocks.** (i) Microwave ovens manufactured prior to October 6, 1971 shall have one safety interlock.

(ii) Microwave ovens manufactured from October 6, 1971 through November 6, 1976: (A) shall have a minimum of two operative safety interlocks, one of which shall be concealed. A concealed safety interlock on a fully assembled microwave oven must not be operable by any part of the body, or a rod 3 mm or greater in diameter and with a useful length of 10 cm. A magnetically operated interlock is considered to be concealed only if a test magnet, held in place on the oven by gravity or its own attraction, cannot operate the safety interlock. The test magnet shall have a pull at zero air gap of at least 4.5 kg and a pull at 1 cm air gap of at least 450 g when the face of the magnet which is toward the interlock switch when the magnet is in the test position is pulling against one of the large faces of a mild steel armature having dimensions of 80 mm by 50 mm by 8 mm.

(B) The insertion of an object into the oven cavity through any opening while the door is closed shall not cause microwave radiation emission from the oven to exceed the applicable power density limits specified in §175.201(c)(1).

(iii) For microwave ovens manufactured on or after August 4, 1974:

(A) One (the primary) required safety interlock shall prevent micro-

wave radiation emission in excess of the requirement of §175.201(c)(1); the other (secondary) required safety

interlock shall prevent microwave radiation emission in excess of 5 mW per cm^2 at any point 5 cm (2 in.) or more from the external surface of the oven. The two required safety interlocks shall be designated as primary or secondary in the service instructions for the oven.

(B) A means of monitoring one or both of the required safety interlocks shall be provided which shall cause the oven to become inoperable and remain so until repaired if the required safety interlock(s) should fail to perform required functions as specified in this section. Interlock failures shall not disrupt the monitoring function.

(iv) Microwave ovens manufactured on and after November 7, 1976:

(A) shall have a minimum of two operative safety interlocks. At least

one operative safety interlock on a fully assembled microwave oven shall not be operable by any part of the human body, or any object with a straight insertable length of 10 centimeters. Such interlock must also be concealed, unless its actuation is prevented when access to the interlock is possible. Any visible actuator or device to prevent actuation of this safety interlock must not be removable without disassembly of the oven or its door. A magnetically operated interlock is considered to be concealed, or its actuation is considered to be prevented, only if a test magnet held in place on the oven by gravity or its own attraction cannot operate the safety interlock. The test magnet shall be capable of lifting vertically at zero air gap at least 4.5 kilograms, and at 1 centimeter air gap at least 450 grams when the face of the magnet, which is toward the interlock when the magnet is in test position, is pulling against one of the large faces of a mild steel armature having dimensions of 80 millimeters by 50 millimeters by 8 millimeters.

(B) Microwave radiation emission from such ovens in excess of the limits specified in §175.201(c)(1) shall not be caused by insertion of an insulated wire through any opening in the external surfaces of a fully assembled oven into the cavity, waveguide, or other microwave-energy-containing spaces while the door is closed, provided the wire, when inserted, could consist of two straight segments forming an obtuse angle of not less then 170 degrees.

(v) Failure of any single mechanical or electrical component of the microwave oven shall not cause all safety interlocks to be inoperative.

(vi) Service adjustments or service procedures on the microwave oven shall not cause the safety interlocks to become inoperative or the microwave radiation emission to exceed the power density limits of this section as a result of such service adjustments or procedures.

(4) **Enforcement by the department, notice of repair and installation.** (i) Any microwave oven found deficient in meeting the provisions of §175.201(c) after survey by a Department representative shall be immediately taken out of service until such deficiencies have been corrected. The Bureau of Radiological Health shall be notified within 48 hours of the completion of such repairs.

(ii) Within 48 hours of an installation of a microwave oven in any restaurant or other food vending establishment, hospital or other medical care facility, school, or other establishment in the City where the public may be exposed, a notification of such installation shall be made to the Bureau of Radiological Health.

(e) **User instructions.** (1) For microwave ovens manufactured prior to October 3, 1975 manufacturers thereof shall provide or cause to be provided, with each oven, adequate instructions for its safe use including clear warnings of precautions to be taken to avoid possible exposure to microwave radiation.

(2) For microwave ovens manufactured on or after October 3, 1975 manufacturers thereof shall provide or cause to be provided, with each oven, radiation safety instructions which:

(i) occupy a separate section and are an integral part of the regularly supplied user's manual and cookbook, if supplied separately, and are located so as to elicit the attention of the reader;

(ii) are as legible and durable as other instructions with the title emphasized to elicit the attention of the reader by such means as boldfaced type, contrasting color, a heavy-lined border, or similar means; and

(iii) contain the following wording:

"PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO

EXCESSIVE MICROWAVE ENERGY

(A) Do not attempt to operate this oven with the door open since open-door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.

(B) Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.

(C) Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:

(a) door (bent);

(b) hinges and latches (broken or loosened);

(c) door seals and sealing surfaces.

(D) The oven should not be adjusted or repaired by anyone except properly qualified service personnel."

(f) **Service instructions.** (1) For microwave ovens manufactured prior to October 3, 1975 manufacturers thereof shall provide or cause to be provided to servicing dealers and distributors and to others upon request, for each oven model, adequate instructions for service adjustment and service procedures including clear warnings of precautions to be taken to avoid possible exposure to microwave radiation.

(2) For microwave ovens manufactured on or after October 3, 1975 manufacturers thereof shall provide or cause to be provided to servicing dealers and distributors and to others upon request, for each oven model, adequate instruction for service adjustments and service procedures, and, in addition, radiation safety instructions which:

(i) occupy a separate section and are an integral part of the regularly supplied service manual and are located so as to elicit the attention of the reader;

(ii) are as legible and durable as other instructions with the title emphasized so as to elicit the attention of the reader by such means as boldfaced type, contrasting color, a heavy-lined border, or by similar means; and

(iii) contain the following wording:

"PRECAUTIONS TO BE OBSERVED BEFORE AND DURING

SERVICING TO AVOID POSSIBLE EXPOSURE TO

EXCESSIVE MICROWAVE ENERGY

(A) Do not operate or allow the oven to be operated with the door open.

(B) Make the following safety checks on all ovens to be serviced before activating the magnetron or other microwave source, and make repairs as necessary:

(a) interlock operation;

(b) proper door closing;

(c) seal and sealing surfaces (arcing, wear, and other damage);

(d) damage to or loosening of hinges and latches;

(e) evidence of dropping or abuse.

(C) Before turning on microwave power for any service test or inspection within the microwave generating compartments, check the magnetron, waveguide or transmission line, and cavity for proper alignment, integrity, and connections.

(D) Any defective or misadjusted components in the interlock monitor, door seal, and microwave generation and transmission systems shall be repaired, replaced, or adjusted before the oven is released to the owner.

(E) A microwave leakage check to verify compliance with the Federal performance standard should be performed on each oven prior to release to the owner."

(iv) Include additional radiation safety precautions or instructions which may be necessary for particular oven designs or models.

(g) **Warning labels on microwave ovens.** (1) Microwave ovens manufactured on or after October 3, 1975 shall have the following warning labels:

(i) A label, permanently attached to or inscribed on the oven, which shall be legible and readily viewable during normal oven use, which shall have the title emphasized and be so located as to elicit the attention of the user, and which shall bear the following warning statement:

"PRECAUTIONS FOR SAFE USE TO AVOID POSSIBLE

EXPOSURE TO EXCESSIVE MICROWAVE ENERGY

DO NOT Attempt to Operate This Oven With:

(A) Object Caught in Door

(B) Door That Does Not Close Properly

(C) Damaged Door, Hinge, Latch, Sealing Surface"

(ii) A label permanently attached to or inscribed on the external surface of the oven which shall be legible and readily viewable during servicing and which shall have the word "CAUTION" emphasized and so located thereon as to elicit the attention of service personnel, and which shall bear the following warning statement:

"CAUTION: This Device is to be Serviced Only by Properly Qualified Service Personnel. Consult the Service Manual for Proper Service Procedures to Assure Continued Compliance with the Federal Performance Standard for Microwave Ovens and for Precautions to be Taken to Avoid Possible Exposure to Excessive Microwave Energy".

(iii) The labels provided in accordance with §175.201(g)(1)(i) and (ii) shall bear only the statements specified therein, except for additional radiation safety warnings or instructions which may be necessary for particular oven designs or models.

(iv) A microwave oven model may be exempted from one or more of the radiation safety warnings specified in §175.201(g)(1)(I) based upon a determination pursuant to the federal Radiation Control for Health and Safety Act of 1968 and the regulations promulgated thereunder that such model would continue to comply with the standards contained in §175.201(c)(1), (2) and (3) under the adverse condition of use addressed by such precautionary statements.

§175.301 Television receivers and other electronic devices.

(a) No television receiver or other electronic device, whether used in the home or elsewhere, which emits radiation on application of high voltage, shall be offered, transferred or consigned for sale or use in the City of New York unless it is so constructed as to prevent radiation therefrom at a level greater than 1.29 E-7 C-kg^{-1} (0.5 milliroentgens per hour), measured five (5) cm (2 in.) from any accessible surface and averaged over an area of 10 cm^{2} (1.55 in.^{2}).

(b) No replacement part shall be offered, transferred or consigned for sale or use in the City of New York which on being installed could cause the assembled unit for which it is intended to exceed the radiation limit allowed under this section.

(c) No person shall alter or adjust any television receiver or other electronic device, whether used in the home or elsewhere, which can emit radiation in such manner as to increase the radiation emission level thereof, unless the level thereby achieved be within the emission limit allowed under this section.

§181.09 Manufacture and handling of cigars, cigarettes and tobacco.

(a) No person engaged in the preparation, manufacture, sorting or handling of cigars, cigarettes or tobacco intended for sale shall at any time:

(1) Touch such cigar, cigarette or tobacco with his lips, teeth or tongue; or,

(2) Moisten such cigar, cigarette or tobacco with saliva, directly or indirectly, by spitting or by use of the fingers or utensils or accessories of any kind; or,

(3) Spray or moisten such cigar, cigarette or tobacco with water or any other liquid emitted from the mouth; or,

(4) Permit such cigar, cigarette or tobacco to touch or be introduced into the nose of any person.

(b) A person engaged in the preparation, manufacture, sorting or handling of cigars, cigarettes or tobacco intended

for sale shall thoroughly wash his hands with soap and warm water before beginning work, immediately after each visit to the toilet, and at all other times when necessary during the course of the work.

(c) A copy of this section shall be posted conspicuously in every place where cigars, cigarettes or tobacco are prepared, manufactured, sorted or handled.

§181.11 Growing of poison ivy and ragweed prohibited.

No person who owns, occupies or is in charge of a lot or premises shall cause or allow poison ivy, ragweed, or other poisonous or allergenic weed to grow on such lot or premises.

HISTORICAL NOTE

Section in original publication July 1, 1991.

Notes:

This section is derived from S.C. §221. S.C. §221 prohibited the growth of poison ivy, ragweed, etc., in such a manner that it encroached on or its seed was carried into a public place; the instant section prohibits a person from growing or permitting these plants to grow on property he owns, occupies or of which he is in charge. Public Health Law §§1320 and 1321 deal with the powers and duties of local boards of health with respect to noxious weeds and

growths. Public Health Law §1321(4) also authorizes local legislative bodies, such as the Board of Health (see Charter §558), to enact additional legislation on the subject. In New York City eradication of these poisonous or deleterious growths is the method best calculated to protect the public from their harmful effects. This section aims at such eventual eradication.

§181.15 Tattooing prohibited. [Repealed]

HISTORICAL NOTE

Section repealed City Record Aug. 15, 1997 eff. Sept. 14, 1997.

Section in original publication July 1, 1991.

Notes:

The Section Heading and text of Section 181.15 were repealed on September 15, 1997 to remove the ban on tattooing since such ban is no longer appropriate.

This section was repealed and reenacted by resolution adopted on October 2, 1961. The original §181.15, which required tattooing establishments to comply with strict conditions including sterilization of instruments and dye

solutions, was enacted because of the occurrence of 15 cases of serum hepatitis resulting from tattooing in 1959. Despite the efforts of the Department to obtain compliance, tattooing establishments have been found repeatedly to fail to sterilize instruments and equipment. As a result of such failure the number of cases of serum hepatitis caused by tattooing rose from 4 in 1960 to 13 in 1961 up to September 30th. Since it is a practical impossibility for the Department to supervise each tattooing establishment at all times to insure proper sterilization, a complete ban on tattooing except for medical purposes is the only feasible means of safeguarding the public against disease from this source.

TITLE IV ENVIRONMENTAL SANITATION

PART B CONTROL OF ENVIRONMENT

ARTICLE 181 PROTECTION OF PUBLIC HEALTH GENERALLY

§181.17 Smoking prohibited in certain areas.

(a) It shall be unlawful for any person to smoke or carry a lighted cigar, cigarette or pipe in any elevator or in any retail food establishment commonly known as a supermarket.

(b) It shall be unlawful for any person to smoke or carry a lighted cigar, cigarette or pipe in any classroom or in any lecture hall, except that the owner or person in charge of such classroom or lecture hall may designate a special area or areas where smoking is permitted, unless otherwise prohibited by the Fire Department or by other law. The area or areas where smoking is permitted shall contain not more than 20% of the total seats of the classroom or lecture hall.

(c) It shall be unlawful, except as provided in subsection (e), for any person to smoke or carry a lighted cigar, cigarette or pipe in any theatre, motion picture theatre, opera house, concert hall, hospital, sanatorium, nursing home, convalescent home, home for the aged or chronically ill patients, museum or library.

(d) It shall be unlawful, except as provided in subsection (e), to smoke or carry a lighted cigar, cigarette or pipe in any enclosed public space in which 50 or more persons gather for religious, recreational, political or social purpose. This subsection shall not apply to:

(1) Any place in which social functions such as weddings, parties, testimonial dinners and similar functions are held and in which the seating arrangements are under the control of the sponsor of the function and not of the owner or person in charge of such place.

(2) Any establishment which sells admission tickets on a seasonal or other periodic basis.

(e) The owner or person in charge of any building, structure or place specified in subsections (c) and (d) may designate special areas therein where smoking is permitted unless otherwise prohibited by the Fire Department or by other law.

(f) Signs prohibiting or permitting smoking, as the case may be, shall be posted conspicuously by the owner or person in charge of each building, structure or place specified in subsections (a), (b), (c) and (d).

HISTORICAL NOTE

Section in original publication July 1, 1991.

Notes:

This section is new. It was added by resolution adopted on July 25, 1974. Smoking is already prohibited by various provisions of the New York City Administrative Code, e.g., §§C19-165.1, C19-165.2 and C19-165.4. It is apparent that those provisions are fire prevention measures, whereas the basis for this section is the protection of the health and comfort of non-smokers. This difference in objective accounts for any divergencies between those sections and this section. It should be noted that smoking may not be permitted in designated areas if prohibited by the Fire Department or by other law. (See §139.07 of this Code which prohibits smoking in public transportation facilities.)

PART B CONTROL OF ENVIRONMENT

ARTICLE 181 PROTECTION OF PUBLIC HEALTH GENERALLY

§181.19 Required Point-of-Sale Tobacco Health Warnings and Smoking Cessation Information.

(a) Any person in the business of selling tobacco products face-to-face to consumers in New York City shall prominently display tobacco health warning and smoking cessation signage produced by the Department.

(b) The signage required by subdivision (a) of this section shall be:

1. designed by the Department and may include:

a. information about tobacco products and the adverse health effects of tobacco use;

b. a pictorial image illustrating the effects of tobacco use; and

c. information about how to get help to quit using tobacco;

2. produced in two sizes:

a. one "small sign," not to exceed 144 square inches; and

b. one "large sign," not to exceed 576 square inches;

3. distributed by the Department or by the Department of Consumer Affairs, although additional signage may be ordered by calling 311.

(c) Persons who engage in face-to-face sales of tobacco products to consumers in New York City shall prominently display the signs required by subdivision (a) of this section by posting:

1. one "small sign" on or within 3 inches of each cash register or each place where payment may be made so that the sign(s) are unobstructed in their entirety and can be read easily by each consumer making a purchase; or

2. one "large sign" at each location where tobacco products are displayed so that:

a. the sign(s) are unobstructed in their entirety and can be read easily by each person considering a tobacco product purchase; and

b. in such a way that the distance between the bottom of the sign(s) and the floor shall be no less than four feet, and the distance between the top of such sign(s) and the floor shall be no more than seven feet.

(d) The Commissioner shall have the authority to modify periodically the text, images and content of signage produced by the Department pursuant to subdivision (a) of this section based on the Commissioner's determination that such modifications may contribute to the prevention or reduction of tobacco use and its harms, the prevention of tobacco sales to minors, or the correction of misinformation among consumers about the health effects of tobacco use. Persons required to post health warning and smoking cessation signage pursuant to subdivision (a) of this section shall display any modified signage upon receipt, as set forth in subdivision (c) of this section.

(e) The provisions of this section may be enforced by any authorized agent or employee of either the Department or the Department of Consumer Affairs, or successor agency. Any violation of this section issued by the Department of Consumer Affairs may be adjudicated at any tribunal authorized to hear such agency's violations.

(f) If any provision of this section, or its application to any person or circumstance, is held invalid by any court of competent jurisdiction, the remaining provisions or the application of the section to other persons or circumstances shall not be affected.

HISTORICAL NOTE

Section added City Record Sept. 28, 2009 eff. Oct. 28, 2009. [See Vol. 9 Statements of Basis and Purpose No. 41]

Notes:

The Department proposes that the Board of Health amend Article 181 of the Health Code to add a new §181.19 that would require the posting of tobacco health warnings and smoking cessation information in all places where tobacco is sold in New York City.

Rules of the City of New York

***** Current through December 2009 ****

24 RCNY Health Code Reg. TV

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

Health Code Reg. § TV INTRODUCTORY NOTES

Title V of the New York City Health Code contains provisions for the reporting of vital events, that is, births, fetal deaths and deaths in the City of New York. The title also contains the requirements for the disposal of human remains.

The provisions of this title are authorized by §567 of the City Charter:

The Board of Health shall prescribe the persons who shall be required to keep a registry of births, fetal deaths and deaths occurring in the City and file certificates thereof with the department and the form and manner in which such registry shall be kept and certificates filed. The Board of Health shall make rules for the recording of births which have not been recorded in accordance with law and for the change or alteration of any birth, fetal death or death certificate upon proof satisfactory to the commissioner.

The analysis of mortality and morbidity statistics is an important tool of modern public health administration. The study of reports of births, fetal deaths and deaths under this title, and of reports of disease under Title II of this Code, supply continuous information to measure the state of health of the people of the City of New York, to measure the effectiveness of the Department of Health, and to indicate the need for existing or new public health programs.

The reporting of vital events not only plays an important part in the regulation of public health, but also serves the need for the creation and preservation of personal records of births and deaths. There is a need for records of birth as a

means of proving such matters as identity or citizenship, and for records of death to determine such matters as rights to inheritance or succession.

Title V covers the subject matter of Article III of the Sanitary Code, Birth, Fetal Deaths and Deaths (S.C. §§31-36, 38-46); S.C. §350, Births and Deaths on Vessels and Aircrafts; Duty of Officers, Physicians and Others to Report; General Regulations of the Board of Health Relating to S.C. §§31 to 45; Rules of the Board of Health Governing the Change or Alteration of Any Birth, Stillbirth (Fetal Death) or Death Certificate; Rules of the Board of Health Governing the Recording of Births Which Have Not Been Recorded In Accordance With Law; and Rules of the Board of Health Governing the Charging of Fees for Searches and the Furnishing of Certifications of Birth Records, Certified Copies of Birth, Marriage and Death Records, Reports of Sanitary Violations, or Condemnation Certificates. The revision presents no major substantive changes but rather consolidates the many scattered code provisions, regulations, and Rules of the Board, in a unified code which reflects current practice in the administration of the vital statistics field; the revision also eliminates much obsolete detail. In addition, the revision extends the reporting period within which certain vital events must be reported, and clarifies the respective duties of those required to prepare reports and to file certificates. The revision also clarifies some of the provisions relating to the performance of autopsies. Provisions omitted in this revision include requirements contained in the Sanitary Code concerning notification to the office of the Chief Medical Examiner when unusual deaths or fetal deaths occur, which merely duplicated provisions of the Administrative Code, §§878-1.0 and 878-2.0. S.C. §36 relating to the making of false or misleading statements is omitted from this title but has been incorporated in §3.19. The resolution of the Board of Health relating to S.C. §31, concerning the reporting of births when the City is under enemy attack, has been included in the section providing for general emergency powers of the Commissioner of Health (§3.01 (c)). S.C. §42a relating to special requirements in disposing of the remains of a person who has died of smallpox has been omitted.

24 RCNY 201.01

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 201 BIRTHS*15

§201.01 Definitions.

When used in this title:

(a) "Live birth" or "birth" means the complete expulsion or extraction from its mother of a product of conception, regardless of the duration of pregnancy, which after expulsion or extraction shows evidence of life, such as breathing, beating of the heart, pulsation of the umbilical cord or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

(b) "Person in charge of a hospital" means the officer or employee who is responsible for the administration of a hospital or similar institution and includes but is not limited to a person holding the title of chief executive officer, administrator, superintendent, director or executive director.

(c) "Hospital" means a facility or institution licensed pursuant to Article 28 of the State Public Health Law and defined as such in §2801 of said law.

HISTORICAL NOTE

Section amended City Record June 30, 2009 eff. Jan. 1, 2010 per City Record notice. [See Vol. 9

Statements of Basis and Purpose No. 37]

Section in original publication July 1, 1991.

Notes:

Subsection (a), live birth or birth, is derived from S.C. §31(a). The definition follows the 1950 World Health Organization (WHO) definition of "live birth", as contained in International Recommendations on Definitions of Live Birth and Fetal Death. P.H.S. Pub. No. 39 (National Office of Vital Statistics, October, 1950, page 6). The WHO definition, except for its inclusion of "pulsation of the umbilical cord" as an additional sign of life, does not substantially differ from S.C. §31(a).

Subsection (b), person in charge of a hospital, is new. Since administrative heads of hospitals in New York City have various titles, the term "person in charge of a hospital" must be broadly defined. The term "superintendent" was previously used without definition in S.C. §§31(b)and (f).

Subdivision (b) was amended and subdivision (c) was added by resolution adopted on June 24, 2009. The definition of "hospital" is intended to capture the entire range of facilities that are licensed by the State Department of Health pursuant to Article 28 of the State Public Health Law, including in-patient hospitals and birthing centers that are so licensed.

24 RCNY 201.03

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 201 BIRTHS*15

§201.03 Reporting births.

(a) When a live birth occurs in the City, it shall be reported to the Department as follows:

(1) If the birth occurs in a hospital or route thereto, by the person in charge of such hospital or his or her designee; or,

(2) If the birth occurs elsewhere than in a hospital or en route thereto, by the physician, licensed midwife or registered physician assistant, in attendance at or after such birth; or,

(3) If a physician, licensed midwife or registered physician assistant attends at or after the birth elsewhere than in a hospital, or en route thereto, as an associate of a hospital, by the person in charge of the hospital with which he or she is associated or by the designee of such person in charge; or,

(4) If the birth occurs without the attendance of a physician, licensed midwife or registered physician assistant, by either of the parents of the child or, if no parent is alive, by the next of kin of the child or any person present at the birth.

(b) A person required to report a live birth pursuant to paragraphs (1), (2) or (3) of subdivision (a) of this section

shall file a certificate of birth and a confidential medical report, and a person required to report pursuant to paragraph (4) of subdivision (a) of this section shall file a certificate of birth only. Reports shall be filed within 5 business days after the birth with the office maintained and designated by the Department for such purposes.

(c) The person required to report a birth shall provide to the Department information that was required to be reported, but that was not so reported, within five business days of that person receiving the information.

(d) Upon a request by the Department for additional information that may be necessary to complete, clarify or verify the information required to be reported, the person required to report a birth shall provide such information to the Department within five business days of the request.

HISTORICAL NOTE

Section amended City Record June 30, 2009 eff. Jan. 1, 2010 per City Record notice. [See Vol. 9

Statements of Basis and Purpose No. 37]

Section in original publication July 1, 1991.

Notes:

This section is derived from S.C. §§31(b) (part) and (c)(part). Subdivision (3) is new and relates to article 43, Nurse Midwifery. This section deals only with the duty of filing the certificate of birth and the confidential medical report; their preparation is dealt with in §201.05. The reporting requirement of live births by midwives, other than nurse midwives, has here been omitted since S.C. §196 and Regulations continues to govern midwives holding a permit on the effective date of this Code. Reg. 26 of thereof specifies how a midwife is to report a birth (see Article 43). The term "confidential medical report" is used in lieu of "supplementary medical report", as more descriptive. (see §201.07). in the case of a birth occurring elsewhere than in a hospital and in the absence of a physician or nurse midwife, the next of kin or any person present at birth is required to file a certificate. Section l.03(k) defines "physician" as including a licensed practitioner of medicine and interns and other physicians authorized to practice medicine in a hospital or state institution pursuant to §6512(1)(b) of the Education Law.

Subsection (b) was amended by resolution adopted on September 15, 1977 to conform its provisions with the concept of centralized functions and the use of a more effective computerized birth record retrieval system by the Manhattan office of the Bureau of Vital Records.

Subsection (b) was amended by resolution adopted on October 23, 1986 to increase the time for reporting births from 48 hours to five business days.

This section was amended by resolution adopted on June 24, 2009. This section focuses on who is required to file a report of a live birth with the Department. Section 201.05 concerns who must prepare and certify such reports. Throughout this section and others in this Article, the phrase "or on its ambulance service" has been replaced by "en route thereto" to acknowledge the fact that ambulance services can be independent of hospitals and to encompass births that may occur en route to a hospital, such as in an automobile, taxicab or police car. This section also acknowledges the broader range of licensed health care professionals that can participate at or after a birth. Subdivisions (c) and (d) are new, and have been added to require reporters to submit additional information, and to clarify the Department's authority to require additional information.

FOOTNOTES

24 RCNY 201.05

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 201 BIRTHS*15

§201.05 Preparation and certification of certificate of birth and confidential medical report of birth.

(a) The certificate of birth and confidential medical report shall be prepared and certified by the person required to file the same pursuant to §201.03, but when the birth occurs in a hospital or en route thereto, the certificate and the confidential medical report shall be prepared and certified by the physician, licensed midwife or registered physician assistant in attendance or assisting, or by a certified nurse practitioner or registered professional nurse present at or after the birth, or by a designee of the person in charge of the hospital who is trained or approved by the Department. When a physician, licensed midwife or registered physician assistant attends at or after a birth elsewhere than in a hospital or en route thereto, he or she shall prepare and certify the certificate and confidential medical report. A person certifying a certificate and confidential medical report shall examine said documents for correctness of the information contained thereon and make any necessary changes.

(b) The certificate and confidential medical report shall be prepared on forms prescribed by the Board and furnished by the Department and shall contain no statement indicating the marital name or status of the mother or whether the child was born in or out of wedlock. The person preparing the certificate shall enter all information required by the form provided by the Department, except that in case of a child born out of wedlock such person shall not enter the name of the putative father unless there is submitted to the preparer a verified written consent of the putative father

pursuant to §17-166(d) of the Administrative Code or a voluntary acknowledgement of paternity pursuant to §4135-b of the State Public Health Law. When the birth occurs in a hospital or en route thereto, the information required by the forms shall be taken from the hospital records of the case. In a hospital, worksheets provided or otherwise approved by the Department shall be used in the preparation of the certificate and confidential medical report, and if such worksheets are used by individuals other than a physician, licensed midwife, registered professional nurse, certified nurse practitioner or registered physician assistant, then such individuals shall be trained or approved by the Department. Worksheets shall be retained by the hospital for a period of at least three years from the date of the birth, and shall, upon request, be made available to the Department for inspection.

(c) All live births occurring in the City at facilities reporting 100 or more live births per year shall be reported to the Department electronically by means of computer programs specified and provided or otherwise authorized for use by the Department. All facilities at which fewer than 100 live births are reported per year may, at their election and upon approval by the Department, implement an electronic birth certificate reporting system or continue to report births on approved paper forms.

(d) All facilities required to file birth certificates electronically and facilities reporting fewer than 100 births per year which elect to report electronically, shall apply to the Department prior to implementing any system and, upon approval by the Department, shall make electronic reports only in such manner and on computer programs prescribed and provided or otherwise authorized by the Department.

HISTORICAL NOTE

Section amended City Record June 30, 2009 eff. Jan. 1, 2010 per City Record notice. [See Vol. 9

Statements of Basis and Purpose No. 37]

Section amended City Record Mar. 23, 1995 eff. Apr. 22, 1995. [See Vol. 9 Statements of Basis and

Purpose No. 1]

Section in original publication July 1, 1991.

Notes:

Subsection (a) is derived without substantive change from S.C. §§3l(b)(part) and (c)(part). The provision regarding preparation of certificates and reports by nurse midwives is new (see Article 43).

Subsection (b) is derived from S.C. §§31(b)(part), (c)(part), (d) and (e)(part). The provision relating to the entering of the name of a putative father incorporates the gist of Administrative Code §567-1.0(d). The provisions of subdivisions (2) and (3) of S.C. §31(d) which described in detail the manner of certifying the certificate have been omitted. Certified copies of birth certificates and certifications of birth are given prima facie evidentiary value. Public Health Law §4103 and Administrative Code §567-4.0(c). The courts in private controversies have limited the evidentiary value of a birth record to the fact of birth and will not accept such a record as proof of parentage or other issues. Generally on this question, see "West Maine Inc." New York State Liquor Authority, 285 App. Div. 756, 141 N.Y.S. 2d 46 (4th Dept. 1955), commented on in 30 N.Y.U.L. Rev. 1670, 1680-1681 (1955) and 31 N.Y.U.L. Rev. 785, 800 (1956); In Re Meyer's Estate, 206 Misc. 368, 132 N.Y.S. 2d 825 (Surrogate's Court 1954); In Re Lang's Estate, 140 N.Y.S. 2d 566 (Surrogate's Court 1955); In Re Billing's Estate, 196 Misc. 141, 91 N.Y.S. 2d 665(Surrogate's Court 1949); In Re Strong's Estate, 168 Misc. 716, 6 N.Y.S. 2d 300 (Surrogate's Court 1938), affirmed 256 App. Div. 971, 11 N.Y.S. 2d 225 (1st Dept. 1939). On the evidentiary value of delayed birth registrations, see notes to §201.11.

Subsection (c), (d), (e) and (f) are new and were adopted by resolution on March 14, 1995 to authorize the Department to establish an electronic birth certificate reporting program in New York City, to be phased in commencing

on the effective date of these amendments and to be fully operational when electronic reporting becomes mandatory on January 1, 1997. The regulations require that births occurring at certain faciliites in New York City on or after January 1, 1997 be reported by electronic means. The amendments permit facilities reporting 100 or fewer births each year to institute an electronic reporting program with the permission of the Department. In adopting these amendments, the Board has also authorized the renumbering of references to old Administrative Code sections concerning birth certificates in subsection (b) Administrative Code §567-1.0(d), therefore, is renumbered §17-166(d), and includes a reference to Title I of Article 41 of the Public Health Law which, as amended effective July 1, 1993, specifies certain forms for and the periods of time within which voluntary acknowledgments of paternity may be filed. The references in the Notes to subsection (b) are, accordingly, also amended. The evidentiary value of birth certificates is prescribed in §567-4.0(c) of the Administrative Code which, as renumbered, is §17-169(c).

Subdivisions (a), (b) and (c) were amended, subdivisions (d) and (e) were repealed and subdivision (f) was amended and re-lettered as a new subdivision (d) by resolution adopted on June 24, 2009. This section governs who is required to prepare and certify a report of a live birth, including a range of licensed professionals. The section now mentions certification in addition to preparation in order to clarify what the long-standing practice and use of approved forms has been; namely that the reports must be signed, whether in hardcopy or electronically. For births occurring in or en route to a hospital, worksheets approved by the Department must be used and retained by the hospital for at least three years.

FOOTNOTES

15

Rules of the City of New York

***** Current through December 2009 ****

24 RCNY 201.07

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 201 BIRTHS*15

§201.07 Confidential medical report of birth; not subject to compelled disclosure subpoena or inspection.

(a) The confidential medical report of birth shall be confidential and not subject to compelled disclosure or to inspection by persons other than the Commissioner or authorized personnel of the Department, except in a criminal action or criminal proceeding, or for official purposes by a federal, state, county or municipal agency charged by law with the duty of detecting or prosecuting crime. The Commissioner may, however, approve the inspection of such medical reports for scientific purposes.

(b) Within the context of this section, scientific purposes shall mean epidemiologic surveillance and investigation by a governmental public health agency, research, or the compilation of statistics relating factors bearing on disease incidence, prevalence, mortality or treatment.

HISTORICAL NOTE

Section amended City Record June 30, 2009 eff. Jan. 1, 2010 per City Record notice. [See Vol. 9

Statements of Basis and Purpose No. 37]

Section in original publication July 1, 1991.

Notes:

This section is derived from S.C. §31(e)(part). The provision which states that the information in the supplementary medical report is not a part of the certificate of birth as well as the phrase which states that the report is regarded and treated as confidential and privileged communication have been omitted as unnecessary. See also §207.11. The exception for the use of the confidential medical report in criminal actions, or proceedings and for purposes of detecting or prosecuting crime is new. See also notes to §§203.07 and 205.07 governing confidential medical reports of fetal death and death.

Note that the certificate of birth itself is protected against indiscriminate disclosure by Administrative Code §567-4.0(a), which prescribes the persons or governmental agencies authorized to receive certified copies of record of birth, and the conditions under which a certification of birth may be issued. A certification of birth contains only the name, sex, date of birth and place of birth of the person to whom it relates and none of the other data in the record of birth. This provision is set forth in full in the Appendix to this edition of the Code.

Section 201.07 was amended by resolution adopted on June 24, 2009. The confidential medical report of birth is still not subject to disclosure except as specified in the section. The phraseology of subdivision (a) was changed to "confidential and not subject to compelled disclosure" in order to broaden the prohibition on disclosure and to conform to the language of other Articles in this Code. Epidemiologic surveillance and investigations by a governmental public health agency are now specified as within the meaning of "scientific purposes" so as to permit disclosure with the approval of the Commissioner.

TITLE V VITAL STATISTICS

ARTICLE 201 BIRTHS*15

§201.11 Delayed registration of birth.

(a) When a birth in the City is not recorded in the Department within one year following the birth, it may be recorded with the approval of the Commissioner or the Commissioner's designee. Application for such delayed registration shall be made on a form furnished by the Department by the parents or surviving parent, or by the guardian of the person whose birth is to be recorded, if such person is a minor, or by the person himself or herself if he or she is 18 years of age or over and his or her parents are dead. The application shall be accompanied by the following:

(1) A certified statement issued by the Department that a search was made for the record of birth in question and that such record was not found; and

(2) Such documentary and other evidence as will establish to the satisfaction of the Commissioner or the Commissioner's designee the facts and date of birth as alleged in the application. The burden of submitting convincing proof rests with the applicant.

(b) When an application for delayed registration has been granted and a certificate of birth on a delayed registration form is filed pursuant to this section, the Department shall issue to the applicant without further charge, in

exchange for the certified statement submitted pursuant to paragraph (1) of subdivision (a) of this section, a certified copy of the certificate of birth.

(c) No application for delayed registration shall be granted, and no delayed certificate of birth shall be registered or issued for a deceased person.

HISTORICAL NOTE

Section amended City Record June 30, 2009 eff. Jan. 1, 2010 per City Record notice. [See Vol. 9

Statements of Basis and Purpose No. 37]

Section in original publication July 1, 1991.

Subd. (a) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis and

Purpose No. 11]

Notes:

Subsection (a) is derived from the rules of the Board of Health on delayed registration of birth. When both parents are alive, both must join in the application for delayed registration; previously under Board Rules 1 and 5(a) only one parent applied and the other submitted a supporting affidavit. Submission of other supporting affidavits previously required under Rule 5(b) is no longer mandatory but may be required by the Commissioner or his designated representative under the provision that the facts alleged in the application be established to his satisfaction.

Subsection (a) was amended by resolution adopted on June 16, 1998 to require that unreported births are registered within one year of the date of birth. Subsection (a) was also amended to reflect the age of eighteen as the age of majority, thereby making the Health Code consistent with the New York State Public Health Law.

Paragraph (2) of subsection (a) was amended by resolution adopted on June 16, 1998 to change the definition of a minor from a person less than 21 years of age to a person less than 18 years of age, thereby making the Health Code consistent with the New York State Public Health Law.

Subsection (b) is new.

Subsection (c) is new and clarifies present practice in those rare instances where a report of the foundling is not filed within a reasonable period after the person is found.

On the evidentiary value of delayed registrations of birth, insofar as it affects proof of citizenship in immigration cases, see Mah Toi v. Brownell, 219 F. 2d 642, 644 (9th Cir. 1955); see also United States v. Casares Moreno, 122 F. Supp. 375 (S.D. Calif. 1954), affirmed, 226 F. 2d 873 (9th Cir. 1955). See also, Note, Evidentiary Effect of Delayed Birth Certificate, 55 Col. L. Rev. 565 (1955) for an analysis of the problem generally.

Subdivisions (a) and (b) were amended, paragraph (2) of subdivision (a) was deleted, and subdivision (c) was repealed and reenacted by resolution adopted on June 24, 2009. This section remains essentially the same, except that prior subdivision (c), relating to foundlings, was deleted in light of the new section 201.09. A new subdivision (c) was added to clarify that delayed registrations of birth cannot be issued for individuals who are already deceased.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Although an applicant for a birth certificate has the burden of proving that he or she was born in New York City, that proof need not be entirely documentary in nature. Thus, circumstantial evidence can be presented, such as

affidavits from siblings and other family members regarding the applicant's parentage. **Tucker v. New York City Dept. of Health,** 5 Misc.3d 716, 785 N.Y.S.2d 862 (Sup.Ct. New York Co. 2004).

24 RCNY Health Code Reg. 203.00

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 203 TERMINATION OF PREGNANCY*16

Health Code Reg. § 203.00 INTRODUCTORY NOTES

This Article was repealed and reenacted by resolution adopted on September 15, 1977 to combine the provisions of former Articles 203 and 204, which were repealed by the same resolution, into one new article to pertain to all events governed by such former articles and to define them as terminations of pregnancy, other than live births, on the basis of spontaneous terminations or as induced terminations. Fetal deaths as formerly defined, are included in the present definition for termination of pregnancy. The new definitions for spontaneous and induced terminations of pregnancy relate to antenatal losses in a pregnancy regardless of duration of pregnancy; delete references to the maximum 24 week period of gestation contained in subdivision 3 of §125.05 of the State Penal Law defining a justifiable abortion, since such legal limitation is implied where applicable in this article by operation of law; and refer to the signs of life in §201.01 (a) of this Code in lieu of repeating them, in the interests of brevity and clarity. This article also clarifies and simplifies its definitions and provisions to provide greater uniformity with related current Federal and State practice and requirements in the area of vital statistics.

This Article was amended by resolution of the Board on June 24, 2009 to mandate electronic reporting of spontaneous terminations of pregnancy for hospitals or other facilities, such as doctors' offices, reporting births electronically and for hospitals or other facilities reporting 100 or more induced terminations per year; update the

definition of induced termination to match that of the Centers for Disease Control and Prevention; broaden the class of individuals who are obligated to report, or who are authorized to prepare reports to licensed health care practitioners, defined as a physician or other person licensed or authorized pursuant to the New York State Education Law or other applicable law, to perform terminations of pregnancy; require departmental approval or training for any non-licensed health care practitioner designated to prepare reports; clarify that only physicians may sign or certify reports of spontaneous terminations and that licensed health care practitioners may also sign or certify reports of induced terminations; and allow the issuance of a disposition permit, upon request, for the disposal of a conceptus that has not completed 24 weeks of gestation.

On September 15, 1977, the Board of Health passed a resolution to repeal then-Articles 203 and 204 and to reenact them as a new Article 203 to pertain to all events governed by the former articles and to define them as terminations of pregnancy. Terminations of pregnancy were classified as either spontaneous or induced terminations.

Two U.S. Supreme Court cases have upheld vital statistics or public health reporting requirements for terminations of pregnancy. In Planned Parenthood of Central Missouri v. Danforth, 428 U.S. 52, 96 S.Ct. 2831, 49 L.Ed.2d 788 (1976), the Court unanimously upheld a Missouri law that required health facilities and physicians to report all abortions to the health department. The Court concluded that the keeping of such statistics and records is useful to the state's interest in protecting the health of its female citizens, and that record-keeping and reporting requirements "that are reasonably directed to the preservation of maternal health and that properly respect a patient's confidentiality and privacy are permissible." Id. at 80, 96 S.Ct. at 2846.

Subsequently, the Supreme Court reiterated its holding in Danforth when it considered the reporting requirements of the Pennsylvania Abortion Control Act in Planned Parenthood of Southeastern Pennsylvania v. Casey, 505 U.S. 833, 112 S.Ct. 2791, 120 L.Ed.2d 674 (1992). The Court held, "The collection of information with respect to actual patients is a vital element of medical research, and so it cannot be said that the requirements serve no purpose other than to make abortions more difficult." Id. at 900-01, 112 S.Ct. at 2832.

24 RCNY 203.01

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 203 TERMINATION OF PREGNANCY*16

§203.01 Definitions.

When used in this title:

(a) "Termination of pregnancy" means the expulsion or extraction of a conceptus, regardless of the duration of pregnancy, other than a live birth as defined in § 201.01(a), and includes fetal death.

(b) "Spontaneous termination of pregnancy" means the unplanned termination of a pregnancy, including but not limited to an ectopic pregnancy, or such a termination associated with a cesarean section, or an operative procedure unrelated to pregnancy resulting in an inadvertent termination.

(c) "Induced termination of pregnancy" means the purposeful interruption of an intrauterine pregnancy with the intention other than to produce a live-born infant and which does not result in a live birth. This definition excludes management or prolonged retention of products of conception following a spontaneous termination of pregnancy.

(d) "Conceptus" means the product of any termination of pregnancy, regardless of its duration, including a hydatidiform mole, fetal tissue or other evidence of pregnancy recovered by operative or other procedure, but not

including a live birth as defined in § 201.01(a).

(e) "Licensed health care practitioner" means a physician or other person licensed or authorized pursuant to the New York State Education Law, or other applicable law, to perform terminations of pregnancy.

HISTORICAL NOTE

Section amended City Record June 30, 2009 eff. Jan. 1, 2010 per City Record notice. [See Vol. 9

Statements of Basis and Purpose No. 36]

Section in original publication July 1, 1991.

Notes:

This section is new. It was added by resolution adopted on September 15, 1977.

This section was amended by resolution adopted on June 24, 2009.

Subdivision (a) was amended to remove the clause "as formerly defined," as there was no such previous reference.

Subdivision (c) was amended to reflect the definition recommended by the National Center for Health Statistics of the federal Centers for Disease Control and Prevention.

A new definition of "licensed health care practitioner" was added as subdivision (e). Which health care practitioners may perform which health care services is a function of state law, most importantly the New York State Education Law. The new definition simply refers to whichever health care practitioners are authorized to perform terminations of pregnancy pursuant to the state Education Law, or other applicable law. In turn, those health care practitioners are among those who are obligated or authorized to file or prepare reports, as specified in sections 203.03 and 203.05. The simplicity of this definition facilitates reporting, including electronic reporting, and avoids the need to delineate which health care practitioners are obligated or authorized to file termination of pregnancy reports or to prepare documents associated therewith.

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 203 TERMINATION OF PREGNANCY*16

§203.03 Reporting terminations of pregnancy.

(a) When a termination of pregnancy occurs in the City it shall be reported as follows:

(1) If the event occurs in a hospital or en route thereto, by the person in charge of such hospital or his or her designee; or

(2) If the event occurs elsewhere than in a hospital or en route thereto, by the licensed health care practitioner in attendance at or after such event; or

(3) If a licensed health care practitioner attends at or after the event elsewhere than in a hospital or en route thereto as an associate of a hospital, by the person in charge of the hospital with which the licensed health care practitioner is associated or by the designee of such person in charge; or

(4) If the event is investigated by the office of chief medical examiner, by a medical examiner within that office.

(b) The person required to report a termination of pregnancy pursuant to subdivision (a) of this section shall file:

(1) A certificate of induced termination of pregnancy for an induced termination of pregnancy; or

(2) A certificate of spontaneous termination of pregnancy, including a confidential medical report, for a spontaneous termination of pregnancy; provided that a medical examiner, when required to report pursuant to paragraph (a)(4) of this section, shall file a certificate of spontaneous termination of pregnancy only.

(c) A certificate of termination of pregnancy required by this section shall be filed within 24 hours after the event if a permit to dispose of the conceptus pursuant to Article 205 of this Code is required or requested, and in all other cases a certificate of termination of pregnancy shall be filed within five business days after the event with any office maintained and designated by the Department for such purposes.

(d) In circumstances where the issuance of a disposition permit pursuant to Article 205 of this Code is required or requested and a person required to report a termination of pregnancy pursuant to subdivision (a) of this section does not file a report thereof electronically, the requirement of filing a certificate and confidential medical report, if any, required by this section may be fulfilled by delivery of the same immediately upon demand and within the time prescribed by subdivision (c) of this section to a funeral director or undertaker authorized to take charge of the conceptus or to the person in charge of the City mortuary if the remains are to be buried in the City cemetery. Such funeral director, undertaker or person in charge of the City mortuary, or an agent of such funeral director or undertaker registered with the Department pursuant to Article 205 of this Code or a designee of the person in charge of the mortuary, shall then file the certificate within 48 hours following the receipt of the certificate of termination of pregnancy. Funeral directors, undertakers, City mortuary personnel, and their agents or designees, shall not divulge information in the confidential documents except to authorized personnel of the Department.

(e) All spontaneous terminations of pregnancy occurring at or en route to hospitals or other facilities that report births electronically to the Department pursuant to Article 201 of this Code, all induced terminations of pregnancy occurring at hospitals or other facilities reporting 100 or more induced terminations of pregnancy per year, and all terminations of pregnancy reported by the office of chief medical examiner, shall be reported to the Department electronically by means of computer programs specified and provided or otherwise authorized for use by the Department. In circumstances where the issuance of a disposition permit pursuant to Article 205 of this Code is required or requested, and a person required to report a termination of pregnancy pursuant to subdivision (a) of this section files a report thereof electronically, a funeral director or undertaker authorized to take charge of the remains, or the person in charge of the City mortuary when said mortuary files an application for a disposition permit, shall also file, within 72 hours following the termination of pregnancy, the application for such a permit electronically by means of computer programs specified and provided or otherwise authorized for use by the Department. All hospitals or other facilities that are not required to report terminations of pregnancy electronically pursuant to this subdivision may, at their election and upon approval by the Department, implement an electronic reporting system, or continue to report terminations of pregnancy on approved paper forms. However, once a hospital or facility has commenced reporting electronically, such hospital or facility may not report on paper forms unless otherwise authorized by the Department.

(f) All facilities required or electing to report electronically pursuant to subdivision (e) of this section shall apply to the Department prior to implementing any electronic reporting system and, upon approval by the Department, shall make electronic reports only in such manner and on computer programs prescribed and provided by or otherwise authorized by the Department. Written paper reports may be submitted for a limited period of time only in the case of extenuating circumstances, temporary equipment failure, or prolonged inability to access the electronic reporting system, and only with the specific approval of the Department. In addition, the Department may, on its own initiative, allow written, paper reports to be submitted if electronic reporting is not possible in a particular circumstance, as a result of a deficiency in the Department's electronic reporting system. The Department may, in addition, require summary, cumulative or periodic reports on such reporting schedule as it may deem necessary.

(g) The person required to report a termination of pregnancy or to file an application for a disposition permit shall provide to the Department information that was required to be reported, but that was not so reported, within five

business days of that person receiving the information.

(h) Upon a request by the Department for additional information that may be necessary to complete, clarify or verify the information required to be reported, the person required to report a termination of pregnancy or to file an application for a disposition permit shall provide such information to the Department within five business days of the request.

HISTORICAL NOTE

Section amended City Record June 30, 2009 eff. Jan. 1, 2010 per City Record notice. [See Vol. 9

Statements of Basis and Purpose No. 36]

Section in original publication July 1, 1991.

Subd. (d) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis and

Purpose No. 11]

Notes:

This section is new. It was added by resolution adopted on September 21, 1977 and is derived from former §§203.03 and 204.03.

Subsection (d) was amended by resolution adopted on June 16, 1998, to change the time required for the filing of the certificate of termination of pregnancy by funeral directors, undertakers and city mortuary personnel from 24 to 48 hours, thereby making the time frame consistent with the State requirements. The subsetion was also amended to allow for filing via authorized electronic means.

This section was amended by resolution adopted on June 24, 2009.

Subdivision (a) was amended to update terminology from physician or nurse-midwife to other licensed health care practitioners, in order to reflect the current practice of having medical practitioners other than physicians in attendance at terminations of pregnancy. Permitting a licensed health care practitioner who was in attendance, other than a physician, to report a termination of pregnancy facilitates reporting and does not affect medical care standards.

Subdivision (b) was modified to accommodate legal nomenclature and to reflect the change to paragraph (4) of subdivision (a) clarifying that when the office of chief medical examiner files a certificate of spontaneous termination of pregnancy, any medical examiner within that office may file the certificate without a confidential medical report.

Subdivision (c) was amended to change the 24 hour filing requirement for spontaneous terminations and 5 day filing requirement for induced terminations of pregnancy to a 24 hour reporting requirement for all terminations of pregnancy when a permit to dispose of the conceptus is required or requested. Certificates and confidential medical reports, if any, related to terminations not resulting in the issuance of a disposition permit must be filed within 5 business days after the event. As per amendments to section 203.09 (see below), such permit is required for all terminations occurring at 24 weeks gestation or later and may be requested for terminations occurring at less than 24 weeks. Subdivision (c) was also amended to remove the provision pertaining to filing within 15 days for the termination of pregnancy revealed by pathological examination. This provision is no longer applicable as pathological examination is no longer required for determining pregnancy status.

Subdivision (d) was amended to make proper reference to New York City, and to accommodate the fact that in some cases, but not necessarily all, a conceptus may be buried or otherwise disposed of pursuant to a permit issued by the Department. In such circumstances, the required documents may be filed by a funeral director, undertaker or person

in charge of the City mortuary, as the case may be, or a registered agent or designee of such persons. Such an alternative means of filing is only available, however, when the report is being filed in paper form. Reference to electronic filing was deleted and incorporated into the new subdivision (e).

Subdivision (e) was added to require all facilities reporting births electronically or reporting 100 or more induced terminations of pregnancy in any 1 year, and the office of chief medical examiner, to report terminations of pregnancy electronically. When a required reporter files electronically, a funeral director or undertaker authorized to take charge of the remains, or the person in charge of the City mortuary when filing an application for a disposition permit, must also file such application electronically. Facilities not required to report electronically may opt to do so with approval by the Department or may continue to report on paper. However, once a facility begins to file electronically, it may not revert to paper filing unless so authorized by the Department.

Subdivision (f) was added to require departmental approval of electronic reporting systems, in order to ensure the uniformity and quality of data collection. The subdivision also requires approval from the DOHMH prior to the electronic transfer of data from a facility to the Department to ensure the protection of the confidentiality of the information provided. The subdivision also provides for alternative arrangements, upon the Department's approval or initiative, in particular circumstances.

Subdivision (g) was added to provide for situations in which a reporter receives required information after reporting the termination of the pregnancy. The reporter must submit such information within 5 business days of receipt.

Subdivision (h) was added to require reporters to provide, within 5 business days of a request by the Department, additional information necessary to complete, clarify or verify the information required to be reported. Such information may include, for example, updated causes of death.

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 203 TERMINATION OF PREGNANCY*16

§203.05 Preparation and certification of certificates.

(a)(1) **Preparation.** Any certificate or confidential medical report required by this Article shall be prepared by the same person required to file the same pursuant to § 203.03 but when a termination of pregnancy occurs in a hospital or en route thereto, the certificate and confidential medical report, if any, shall be prepared by a licensed health care practitioner in attendance, assisting or present at or after the event, by the chief medical officer of the hospital, by the physician in charge of the service on which the woman was treated, or by a designee of the person in charge of the hospital who is trained or approved by the Department. When a licensed health care practitioner attends at or after a termination of pregnancy elsewhere than in a hospital or en route thereto, he or she, or a designee of such person who is trained or approved by the Department, shall prepare the required certificate and confidential medical report, if any.

(2) **Certification.** A certificate of spontaneous termination of pregnancy and the confidential medical report shall be certified by a physician in attendance or assisting at or after the event, by the chief medical officer of the hospital where the event occurred, or by the physician in charge of the service on which the woman was treated. A certificate of induced termination of pregnancy shall be certified by a licensed health care practitioner, who is licensed or authorized pursuant to the State Education Law or other applicable law to perform such a termination of pregnancy, in attendance or assisting at or after the event, by the chief medical officer of the hospital where the event occurred, or by the

physician in charge of the service on which the woman was treated. When a termination of pregnancy certificate is filed by the office of chief medical examiner, the certificate shall be certified by a medical examiner within that office. A person certifying a certificate and confidential medical report, if any, shall examine said documents for correctness of the information contained thereon and make necessary changes.

(b) The certificates specified in § 203.03(b), except for certificates filed electronically pursuant to § 203.03(e), shall be prepared on forms prescribed by the Board and furnished by the Department. Computer programs specified and provided or otherwise authorized for use by the Department for electronic filing shall be reflective of the forms prescribed by the Board except to the extent that differences may be necessary or warranted in order to accommodate electronic formatting. The person preparing the certificate shall enter all information required by the appropriate form. When a termination of pregnancy occurs in a hospital or en route thereto, the information shall be taken from the hospital record of the case. If worksheets are used to prepare certificates of termination of pregnancy and confidential medical reports, if any, the worksheets shall be ones provided by the Department or in a form approved by the Department. If individuals other than a physician, licensed midwife, registered professional nurse, certified nurse practitioner or registered physician assistant use such worksheets, then such individuals shall be trained or approved by the Department. The person preparing the certificate and confidential medical report, if any, or such person's employer, shall retain such worksheets for a period of three years from the date of the event, and shall, upon request, make such worksheets available to the Department for inspection.

HISTORICAL NOTE

Section amended City Record June 30, 2009 eff. Jan. 1, 2010 per City Record notice. [See Vol. 9

Statements of Basis and Purpose No. 36]

Section in original publication July 1, 1991.

Subd. (b) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis and

Purpose No. 11]

Notes:

This section is new. It was added by resolution adopted on September 15, 1977 and is derived from former §§203.05 and 204.05.

Subsection (b) was amended by resolution adopted on June 16, 1998 to allow for filing certificates via authorized electronic means on forms authorized by the Department.

This section was amended by resolution adopted on June 24, 2009.

The title of section 203.05 was amended to "Preparation and Certification of Certificates" and the paragraph titles "Preparation" and "Certification" were added to subdivision (a). These changes were made to indicate that separate rules apply to the preparation and certification of certificates.

Paragraph (1) of subdivision (a) was amended to include licensed health care practitioners, as defined in § 203.01, and to reflect gender neutrality. Besides physicians, licensed health care practitioners may also attend, assist or be present at terminations of pregnancy. Permitting a licensed health care practitioner in attendance, assisting or present at or after the event, other than a physician, to prepare reports facilitates the expeditious preparation of certificates and does not affect medical care standards. Accordingly, when a termination of pregnancy occurs in a hospital, reports may be prepared by a licensed health care practitioner who was in attendance, assisting or present at or after the event; the chief medical officer of the hospital; or the physician in charge of the treating hospital service. When a termination of

pregnancy occurs elsewhere than in a hospital and is attended by a licensed health care practitioner, the practitioner may prepare the report.

This paragraph was also amended to permit the designee of a person in charge of a hospital, or the designee of the attending licensed health care practitioner elsewhere than in a hospital, to prepare the required certificate and confidential medical report, if any. Such a designee must be trained or approved by the Department. This is particularly useful for electronic reporting and will enable the hospital, or, for example, a doctor attending a termination of pregnancy in his or her office, to delegate the task of preparing the certificate to a lower level employee. The training and approval requirement should improve data quality.

Paragraph (2) of subdivision (a) is substantially new and was amended to clarify that, regardless of which kind of licensed health care practitioner or other individual is authorized to file a report or to prepare a certificate, only a physician may certify a certificate of spontaneous termination of pregnancy or the associated confidential medical report. For induced termination of pregnancy certificates, a licensed health care practitioner, as well as the several physicians specified, may certify such reports. A certifying physician, or a medical examiner who is also a physician, is required to examine the documents being certified and make necessary changes. Accordingly, the requirement for a physician's countersignature has been deleted.

Subdivision (b) was amended to provide that if worksheets are used by anyone authorized to prepare certificates of termination of pregnancy and confidential medical reports, if any, the worksheets must be approved by the DOHMH. This will enable the Department to control the quality of data collection. In addition, the requirement to have the Board of Health approve the electronic form of certificates was deleted, because electronic forms are merely reflective of the paper forms prescribed by the Board pursuant to this subdivision, aside from incidental formatting differences.

ARTICLE 203 TERMINATION OF PREGNANCY*16

§203.07 Confidential medical report of spontaneous termination of pregnancy and certificate of induced termination of pregnancy; not subject to or compelled disclosure inspection.

(a) The confidential medical report of a spontaneous termination of pregnancy shall be confidential and not subject to compelled disclosure or to inspection by persons other than the Commissioner or authorized personnel of the Department, except in a criminal action or criminal proceeding, or for official purposes by a federal, State, county or municipal agency charged by law with the duty of detecting or prosecuting crime. The Commissioner may, however, approve the inspection of such medical reports for scientific purposes.

(b) Within the context of this section, scientific purposes shall mean epidemiologic surveillance and investigation by a governmental public health agency, research, or the compilation of statistics relating factors bearing on disease incidence, prevalence, mortality or treatment.

(c) The certificate of induced termination of pregnancy shall be confidential and not subject to compelled disclosure or to inspection by persons other than the Commissioner or authorized personnel of the Department.

Notes:

This section is new. It was added by resolution adopted on September 15, 1977 and is derived from former §§203.07 and 204.07.

This section was amended by resolution adopted on September 14, 1982 to allow the Commissioner to release confidential medical reports of spontaneous termination of pregnancy for scientific purposes, as defined.

Subsections (a) and (c) were amended by resolution adopted on December 12, 2002 to delete references to the Department of Health. Chapter 22 of the New York City Charter was amended by the electorate in the November 6, 2001 general election, merging the Departments of Health and Mental Health, Mental Retardation and Alcoholism Services, and Local Law of 2002 further amended the Charter and changed the name of the merged agency to Department of Health and Mental Hygiene.

This section was amended by resolution adopted on June 24, 2009.

Subdivision (a) was amended to provide that the disclosure of the confidential medical report of spontaneous termination of pregnancy shall not be compelled, in order to be consistent with the confidentiality provisions of Articles 3 and 11 of this Code.

Subdivision (b) was amended to include epidemiologic surveillance and investigation conducted by governmental public health agencies within the meaning of "scientific purposes."

Subdivision (c) was amended to provide that the certificate of induced termination of pregnancy is confidential and that disclosure shall not be compelled, in order to be consistent with the confidentiality provisions of Articles 3 and 11 of this Code.

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

Health Code Reg. § 205.00 INTRODUCTORY NOTES

This Article contains provisions for the reporting of deaths occurring in the City, for the maintenance of registries of deaths, and for the disposal of human remains. In following the traditional and administratively convenient pattern of incorporating both the requirements for reporting of deaths and sepulture, this Article serves two aims-to assure statistical accuracy as well as sound disposal of the dead. As part of a comprehensive review and revision of the Code, the amendments to this Article seek, in particular, to reflect modern standards and current programmatic practice while removing outdated provisions.

***** Current through December 2009 ****

24 RCNY 205.01

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.01 Definitions.

When used in this title:

(a) "Burial" means interment of human remains in the ground or in a tomb, vault, crypt, cell or mausoleum, and includes any other usual means of final disposal of human remains other than cremation.

(b) "Cremation" means the burning of human remains in a crematory.

(c) "Human remains" or "remains" means a conceptus which has completed 24 weeks or more of gestation or all or any part of the dead body of a human being but does not include human ashes recovered after cremation. For purposes of this Article a conceptus of less than 24 weeks gestation for which the issuance of a disposition permit pursuant to §205.21 has been requested shall be treated as human remains.

(d) "Hospice" means a program issued a certificate of approval pursuant to Article 40 of the Public Health Law and defined as such in §4002 of said law.

(e) "Person in control of disposition" means, in accordance with all of the provisions of §4201 of the Public Health

Law, the following persons who are eighteen years of age or older in descending order of priority:

(1) the person designated in a written instrument executed pursuant to the provisions of §4201 of the Public Health Law;

(2) the decedent's surviving spouse;

(2-a) the decedent's surviving domestic partner;

(3) any of the decedent's surviving children;

(4) either of the decedent's surviving parents;

(5) any of the decedent's surviving siblings;

(6) a guardian appointed pursuant to article seventeen or seventeen-a of the Surrogate's Court Procedure Act or article eighty-one of the Mental Hygiene Law;

(7) any person who would be entitled to share in the estate of the decedent as specified in §4-1.1 of the Estates, Powers and Trusts Law, with the person in closest relationship having the highest priority;

(8) a duly appointed fiduciary of the estate of the decedent;

(9) a close friend or relative who is reasonably familiar with the decedent's wishes, including the decedent's religious or moral beliefs, when no person higher on this list is reasonably available, willing, or competent to act, provided that such person has executed a written statement pursuant to subdivision seven of §4201 of the Public Health Law; or

(10) a chief fiscal officer of a county or a public administrator appointed pursuant to article twelve or thirteen of the surrogate's court procedure act, or any other person acting on behalf of the decedent, provided that such person has executed a written statement pursuant to subdivision seven of §4201 of the Public Health Law.

HISTORICAL NOTE

Section amended City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Subd. d par (1) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis

and Purpose No. 10] Subd. (d) became subd. (e).

Subd. d pars. (2), (3), (5), (7), (8) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9

Statements of Basis and Purpose No. 11] Subd. (d) became subd. (e).

Notes:

This section was amended by resolution adopted on September 22, 2009.

Subdivision (c) was amended to more fully define human remains, including a conceptus, to clarify when a permit for disposition is required. The 24 weeks or more of gestation is consistent with former §205.13, which required a

permit for disposition after 24 weeks.

Subdivision (d) was added to define "hospice," which under State Public Health Law includes hospice care programs as well as hospice facilities. Hospice is increasingly utilized as a form of end-of-life care, and consequently hospice providers are preparing a larger proportion of death certificates.

Subdivision (e) was deleted. It had defined "use for anatomical purposes", which was referred to in section 205.13 and has been deleted. New subdivision (e) was added to conform to the provisions of Public Health Law §4201, which applies in the City and establishes the persons in descending priority who shall have the right to control the disposition of the remains of a decedent. It replaces former subdivision (d), which defined "next of kin" and their order of priority for receiving communications and giving instructions regarding the disposal of a decedent's remains.

Subsection (a), burial, is new. It replaces a variety of terms employed in the Sanitary Code when referring to final disposals of bodies: S.C. §41 "buried, cremated, or otherwise disposed of"; §42 "interment, cremation or other disposition"; S.C. §§31-45 Reg. 2 "disposal"; S.C. §§31-45 Reg. 3 "burial, cremation or other final disposal"; S.C. §§31-45 Reg. 6 "Final disposition"; S.C. §§31-45 Reg. 11 "interred or cremated", and "burial or cremation". As herein defined, burial includes all final disposals of human remains other than cremation and bizarre types of disposals.

Subsection (b), cremation, is new and serves to distinguish between cremation as defined and incineration in a hospital.

Subsection (c), human remains or remains, is new and covers dead bodies and fetuses. The definition excludes an amputated part of a living person. Cremated remains are excluded from the definition since it is not the purpose of this article to control disposal of the ashes after cremation.

Subsection (d), next of kin, is new. It defines next of kin in accordance with the Decedent Estate Law, and adds as an element the availability to act, i.e., to make arrangement for burial or cremation, or to give necessary consents, as in the case of an autopsy. In the event that the closest relative is either unavailable or fails to act, the person or persons next in line of priority as next of kin may then act. This subsection is not intended as any limitation on the right of a person to control the disposal of his own body, Public Health Law §4201, nor does it determine the broader issue of who among conflicting claimants is authorized to dispose of human remains which is a matter for judicial determination in accordance with existing State law. The instant provision is aimed at the practical problem of availability of next of kin for the purpose of granting necessary consents or making other arrangements. On the question of who is authorized to act, see notes to §205.37.

Paragraphs (2), (3), (5), (7) and (8) of subsection (d) were amended by resolution dated June 16, 1998 to change the definition of a minor next of kin from persons less than 21 years of age to persons less than 18 years of age, thereby making the Health Code consistent with the New York State Public Health Law. Paragraph (8) of subsection (d) was also amended to reflect the codification of former §83 of the Decedent Estate Law into Estates, Powers and Trusts Law §4-1.1.

Subsection (e), use for anatomical purposes, is new. The phrase was previously used without definition in S.C. §§32(j) and 43.

CASE NOTES

¶ 1. Where a decedent died without a spouse, his children were under 18 years of age, and there was no indication that his parents were alive, a sibling was the next of kin qualified to receive his remains and to give instructions regarding burial. Caseres v. Ferrer, 6 A.D.3d 433, 774 N.Y.S.2d 372 (2d Dept. 2004).

24 RCNY 205.03

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.03 Reporting deaths.

(a) When a death occurs in the City, it shall be reported to the Department as follows:

(1) If the death is from natural causes and occurs in a hospital, or en route thereto, or while under the care of a hospice, by the person in charge of the hospital or hospice, or his or her designee; or,

(2) If the death is from natural causes and occurs elsewhere than in a hospital, or en route thereto, or while not under the care of a hospice, by the licensed physician in attendance or by such physician's duly authorized medical associate, provided such associate reviews the medical records of the decedent and certifies that he or she has found no evidence of suspicious or unusual circumstances; or,

(3) If the death is investigated by the Office of Chief Medical Examiner pursuant to Title 17, Chapter 2 of the Administrative Code, and jurisdiction over the remains is assumed by that office, by a medical examiner within the Office of Chief Medical Examiner.

(b) The person required to report a death pursuant to paragraphs (1) or (2) of subdivision (a) of this section shall

file a certificate of death and a confidential medical report, and the Office of Chief Medical Examiner, when required to report pursuant to paragraph (3) of subdivision (a) of this section, shall file a certificate of death only. Reports shall be filed within 24 hours after the death or the finding of the remains with any office maintained and designated by the Department for such purposes.

(c) In circumstances where the person required to report a death pursuant to subdivision (a) of this section does not file a report thereof electronically, the requirement of filing the certificate of death and the confidential medical report, if any, may be fulfilled by delivering the same immediately upon demand and within the time prescribed by subdivision (b) of this section, to a funeral director or undertaker authorized to take charge of the remains, or to the person in charge of the City mortuary if the remains are to be buried in the City cemetery. Such funeral director, undertaker or person in charge of the City mortuary, or an agent of such funeral director or undertaker registered with the department pursuant to this Article or a designee of the person in charge of the mortuary, shall file the certificate and confidential medical report with the Department within 72 hours following death or the finding of the remains. Funeral directors, undertakers, the person in charge of the City mortuary, and their agents or designees, shall not divulge information contained in the confidential medical report of death except to authorized personnel of the Department.

(d)* All18 hospitals and hospices that report 25 or more deaths to the Department per year, and the Office of Chief Medical Examiner, shall electronically prepare any death certificates and confidential medical reports, and shall, within 24 hours after the death or finding of the remains, file such documents electronically with the Department by means of computer programs specified and provided or otherwise authorized for use by the Department. In circumstances where a person required to report a death pursuant to subdivision (a) of this section files a report thereof electronically with the Department, and an authorized funeral director or undertaker has taken charge of the remains, such funeral director or undertaker shall, within 72 hours after the death or the finding of the remains, file such document with the Department electronically by means of computer programs specified and provided or otherwise authorized for use by the Department. If the remains are to be buried in the City cemetery, the person required to report a death pursuant to subdivision (a) of this section shall complete the process of electronically filing the entire certificate of death and confidential medical report, if any, within 72 hours after the death or finding of the remains. All persons required or authorized to report a death or to file a death certificate with the Department that are not required to report or file electronically pursuant to this subdivision may, at their election and upon approval by the Department, implement an electronic reporting system or continue to report deaths on approved paper forms. This subdivision shall take effect on April 1, 2010.

(e) All facilities, organizations or individuals required or electing to report electronically pursuant to subdivision (d) of this section shall apply to the Department prior to implementing any system and, upon approval by the Department, shall make electronic reports only in such manner and on computer programs prescribed and provided or otherwise authorized by the Department. All individuals utilizing the Department's electronic reporting system to prepare, certify, enter information onto or file death certificates or confidential medical reports, pursuant to §205.05, shall be trained or approved by the Department in the proper use of the system and completion of the electronic reporting forms. Written paper reports may be submitted for a limited period of time only in the case of extenuating circumstances, temporary equipment failure, or prolonged inability to access the electronic reporting system, and only with the specific approval of the Department. In addition, the Department may on its own initiative allow written, paper reports to be submitted if electronic reporting is not possible in a particular circumstance. The Department may, in addition, require summary, cumulative or periodic reports on such reporting schedule as it may deem necessary.

(f) The person required to report a death or to file a death certificate shall provide to the Department any information that was required to be reported, but that was not so reported, within five business days of that person receiving the information.

(g) Within five business days of receipt of any autopsy results or other information that would change the information in the cause of death section of the certificate or the confidential medical report, the person required to report the death shall file a supplemental report of the cause of death to amend the certificate or confidential medical

report, if any. Said supplemental report shall be certified by a person specified in paragraph (2) of subdivision (a) of §205.05 of this Article.

(h) Upon a request by the Department for additional information that may be necessary to complete, clarify or verify the information required to be reported, the person required to report a death or to file a death certificate shall provide such information to the Department within five business days of the request.

HISTORICAL NOTE

Section amended City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Subd. (a) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis and

Purpose No. 11]

Subd. (c) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis and

Purpose No. 11]

Notes:

This section was amended by resolution adopted on September 22, 2009.

Subdivision (a) has been amended to clarify the circumstances when a hospital or hospice must report a death and to broaden the situations in which institutions are required to report deaths to include deaths occurring en route to a hospital or while under the care of a hospice. This subdivision was also amended to permit the designee of a person in charge of a hospital or hospice to report a death to the DOHMH. This will enable the hospital or hospice to delegate the task of filing the report to a lower level employee. Subdivision (a) has also been amended to reflect the correct name of the Office of Chief Medical Examiner, and to reflect that a medical examiner within the Office of Chief Medical Examiner is the person responsible for reporting a death. The subdivision was further amended to reflect gender neutrality.

Subdivision (b) was amended to correct legal nomenclature distinguishing between a "subsection" and a "paragraph." The words "Office of" were added to Chief Medical Examiner to indicate that it is the office that is required to report.

Subdivision (c) was amended to remove a general description of electronic filing of death certificates, as it is described in greater detail in new subdivision 205.03 (d). This subdivision was also amended to add agents of funeral directors or undertakers and agents or designees of the person in charge of the City mortuary. Funeral directors or undertakers and the person in charge of the City mortuary use agents to file certificates and confidential medical reports with the Department, and now this subdivision will reflect that practice. The subdivision will now require that all such agents used by funeral directors or undertakers to be registered with the Department to ensure compliance with Departmental procedures. Subdivision (c) was also amended to correct legal nomenclature distinguishing between a "subdivision" and a "subsection."

Subdivision (d) was added to require all hospitals and hospices that report 25 or more deaths to the Department per year, and the Office of Chief Medical Examiner, to report deaths electronically. When a required reporter files electronically, a funeral director or undertaker authorized to take charge of the remains, or the person in charge of the City mortuary when filing an application for a disposition permit, must also file such application electronically. All

persons required or authorized to report a death or to file a death certificate with the Department that are not required to report or file electronically may, at their election and upon approval of the Department, implement an electronic reporting system or continue to report deaths on approved paper forms. This subdivision takes effect on April 1, 2010.

Subdivision (e) was added to require departmental approval of electronic reporting systems, in order to ensure the uniformity and quality of data collection. Toward that end, all individuals utilizing the electronic reporting system must be trained or approved by the Department in the proper use of the system and completion of electronic reporting forms. The subdivision also provides for alternative arrangements, upon the Department's approval or initiative, in particular circumstances.

Subdivision (f) was added to provide for situations in which a reporter receives required information after reporting the death. The reporter must submit such information within five business days of receipt.

Subdivision (g) was added to provide for situations in which a reporter receives autopsy results or other information that would change the information in the cause of death section of the certificate or the confidential medical report. The reporter must submit such information within five business days of receipt.

Subdivision (h) was added to require reporters to provide, within five business days of a request by the Department, additional information necessary to complete, clarify or verify the information required to be reported. Such information may include, for example, updated causes of death.

Subsections (a) and (b) are derived from S.C. §33(a) (part), (b) (part), (c) (part) and (e) (part). The provision dealing with telephone reports to the chief medical examiner in subsection (e) has been omitted since these telephone reports are a matter of crime detection and not of direct concern to the Department; the Administrative Code, §878-1.0, requires that both the chief medical examiner and police department officials be notified in the case of violent, unusual or suspicious deaths (defined in Charter §878) so that this omission will not affect crime detection procedures. The requirement in S.C. §33(e) that the chief medical examiner file a tentative certificate in case of incomplete information and replace it when the missing information becomes available or the case is closed, has also been omitted. Administrative Code §556-13.0 provides that the Department of Health may prescribe the manner in which the chief medical examiner is to report on deaths investigated by his office to the Department of Health.

Paragraph (2) of subsection (a) was amended by resolution adopted on December 26, 1961 which added the provision that a medical associate of an attending physician may sign a death certificate provided the associate views the body and certifies that there is no evidence of suspicious or unusual circumstances. This provision was added to permit the expeditious disposal of remains in cases where the attending physician is away on vacation or is out of the city for other reasons.

Paragraph (2) of subsection (a) was further amended by resolution adopted on June 15, 1967 which added the requirement that the physician in attendance or his medical associate visit the scene of death and view the body of the decedent before reporting the death to the Department.

Paragraph (2) of subsection (a) was further amended by resolution adopted on December 24, 1968 to restore its requirements to those previously adopted by resolution on December 26, 1961 which were found to provide more expeditious disposal of the remains for the benefit of the family of the deceased.

Paragraph (2) of subsection (a) was further amended by resolution adopted on June 16, 1998 to eliminate the requirement that a medical associate view the body of the decedent after death, but instead review the medical records of the decedent to determine whether evidence of suspicious or unusual circumstances exist in the cause of death. This amendment only applies to deaths due to natural causes and occurring elsewhere than in a hospital. Viewing the body of the decedent, in and of itself, is not sufficient to determine the cause of death or to discover evidence of suspicious or unusual circumstances. Any time there is doubt about the circumstances of the death, the case must be referred to the office of the Chief Medical Examiner.

Subsection (b) was amended by resolution adopted on September 3, 1977, to conform its provisions with the concept of centralization of functions of the Bureau of Vital Statistics. Subsection (c) was amended by resolution of the same date to delete the title of superintendent of City mortuaries eliminated by the Health and Hospitals Corporation of the City.

Subsection (c) is derived from S.C. §33(f) (part). The time within which the funeral director is to file the report is extended from 24 to 48 hours following death.

Subsection (c) was further amended by resolution adopted on June 16, 1998 to allow for filing certificates and reports via authorized electronic means. This subsection was also amended to allow a funeral director, undertaker or person in charge of the city mortuary to file the certificate of death and confidential medical report with the Department within 72 hours of death, thereby making the Health Code filing requirements consistent with the state Public Health Law.

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.05 Preparation and certification of certificate of death and confidential medical report of death.

(a) (1) Preparation. Except with regard to personal particulars as specified in subdivision (b) of this section, the certificate of death and confidential medical report, if any, shall be prepared by the person required to report the same pursuant to subdivision (a) of §205.03, but when a death occurs in a hospital or en route thereto, or while under the care of a hospice, the certificate and confidential medical report shall be prepared by the physician in attendance or assisting, by the chief medical officer of the hospital or hospice, by the physician in charge of the service on which the death occurs, or by a designee of the person in charge of the hospital or hospice who is trained or approved by the Department.

(2) Certification. A certificate of death and the confidential medical report, if any, shall be certified by a physician in attendance or such physician's duly authorized medical associate, by the chief medical officer of the hospital or hospice reporting the death, or by the physician in charge of the service on which the death occurred. When a death certificate is filed by the Office of Chief Medical Examiner, the certificate shall be certified by a medical examiner within that office. A person certifying a certificate and confidential medical report, if any, shall examine said documents for correctness of the information contained thereon and make necessary changes.

(b) The certificate of death and confidential medical report, if any, shall, except when such are filed electronically pursuant to §205.03(d), be prepared on forms prescribed by the Board and furnished by the Department. Computer programs specified and provided or otherwise authorized for use by the Department for electronic filing shall reflect the forms prescribed by the Board except to the extent that differences may be necessary or warranted in order to accommodate electronic formatting. The person preparing the certificate and confidential medical report, if any, pursuant to paragraph (1) of subdivision (a) of this section, shall enter the name of the deceased and all other information required by the form, but the information concerning the deceased characterized as "personal particulars" shall be entered by the funeral director or undertaker authorized to take charge of the remains except when the remains are to be buried in the City cemetery, in which case such personal particulars shall be entered by the person preparing the certificate pursuant to paragraph (1) of subdivision (a) of this section. The confidential medical report shall contain a statement of the cause of death which shall represent the physician's best opinion on the basis of all the evidence available to him or her. When the death is reported by a hospital or hospice, the information required by the forms shall be taken from the hospital or hospice records of the case. If, in a hospital or a hospice, worksheets are used in the preparation of certificates of death and confidential medical reports, they shall be provided or approved by the Department, and individuals using such worksheets shall be trained or approved by the Department. Worksheets shall be retained by the hospital or hospice for a period of three years from the date of the event, and shall, upon request, be made available to the Department for inspection.

HISTORICAL NOTE

Section amended City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Subd. (a) amended City Record July 16, 1993 eff. Aug. 15, 1993.

Subd. (b) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis and

Purpose No. 11]

Notes:

This section was amended by resolution adopted on September 22, 2009.

The title of section 205.05 was amended to "Preparation and certification of certificate of death and confidential medical report of death" and the paragraph titles "Preparation" and "Certification" were added to subdivision (a). These changes were made to indicate that separate rules apply to the preparation and certification of certificates.

Paragraph (1) of subdivision (a) was amended to permit the designee of a person in charge of a hospital or hospice to prepare the required certificate and confidential medical report, if any. Such a designee must be trained or approved by the Department. This is particularly useful for electronic reporting and will enable the hospital or hospice to delegate the task of preparing the certificate to a lower level employee. The training and approval requirement should improve data quality. It was further amended to clarify the circumstances when a hospital or hospice must report a death and to broaden the situations in which institutions are required to report deaths to include deaths occurring en route to a hospital or while under the care of a hospice. Paragraph (1) of subdivision (a) was also amended to delete the reference to that portion of the confidential medical report of death pertaining to race and ancestry to be completed by the funeral director or, in the case of city burial, by the physician. The Department is planning to modify the death certificate form so that the race and ancestry items will no longer be contained in the confidential medical report of death.

Paragraph (2) of subdivision (a) is substantially new and was amended to clarify which physicians may certify a

death, including the physician in attendance or such physician's duly authorized medical associate. A person certifying a certificate and confidential medical report, if any, shall examine the documents for correctness of the information contained thereon and make necessary changes.

Subdivision (b) was amended by deleting the requirement that the Board of Health approve the electronic form of certificates, because, aside from incidental formatting differences, electronic forms are merely reflective of the paper forms prescribed by the Board pursuant to this subdivision. Subdivision (b) was also amended to reflect changes made to subdivision (a) and to provide for improving the quality of data collection. Any worksheets used by anyone authorized to prepare certificates of death and confidential medical reports must be approved by the Department. Any individual who uses such worksheets shall be trained or approved by the Department. The worksheets shall be retained by the hospital or hospice for a period of three years from the date of event and shall, upon request, be made available to the Department for inspection. The subdivision also clarifies which person preparing the certificate and confidential medical report shall be responsible for completing its various sections.

This section is derived without substantive change from S.C. §33(a) (part), (b) (part), (e) (part), (f) (part) and Reg. 1 of the General Regulations relating to S.C. §§31-45. The requirement that the statement of cause of death "shall represent the physician's best opinion on the basis of all the evidence available to him" replaces the provision that "No certificate of death upon which the cause of death is indefinite shall be accepted" previously in Reg. 1. The Board of Health on June 12, 1950 approved a recommendation that local military installations be provided with the death certificate forms approved for use by the chief medical examiner's office. This form is to be used whenever deaths occur on government reservations as a result of external causes. The designations "Assistant Medical Examiner", "Chief Medical Examiner", and the space for the Medical Examiner case number are to be manually obliterated before use of the form by a military physician.

Certified copies of death certificates are given prima facie evidentiary value. Public Health Law §4103 and Administrative Code §5674.0(c). The courts have not, however, given full weight in private controversies to statements contained in death certificates, particularly in respect of the stated cause of death. Generally, the courts have ruled that such a certificate is proof only of the fact of death. The Court of Appeals in Begley v. Prudential Insurance Co. of America, 1 N.Y. 2d 530, 136 N.E. 2d 839 (1950) stated that the words `jumped or fell' appearing in the death certificate and report of the medical examiner may not be read as conclusively establishing death by suicide." See too Beglin v. Metropolitan Life Insurance Co., 173 N.Y. 374, 66 N.E. 102 (1903); Ursaner v. Metropolitan Life Ins. Co., 274 App. Div. 77, 79 N.Y.S. 2d 760 (1st Dept. 1948), motion for resettlement denied, 277 App. Div. 803, 89 N.Y.S. 2d 526 (1949), affirmed, 299 N.Y. 730, 87 N.E. 2d 452 (1949); Wolz v. Commercial Travelers Mut. Acc. Assn. of America, 266 App. Div. 688, 40 N.Y.S. 2d 128 (2d Dept. 1943); Greenberg v. Prudential Ins. Co. of America, 266 App. Div. 685, 40 N.Y.S. 2d 494 (2d Dept. 1943). Killip v. Rochester General Hospital, 1 Misc. 2d 349, 146 N.Y.S. 2d 164 (Supreme Court, Monroe County 1955); In Re Meyer's Estate, 206 Misc. 368, 132 N.Y.S. 2d 825 (Surrogate's Court 1954). There are two cases in New York which have stated that it is error to exclude a certificate of death as proof of cause of death when offered in evidence in a private controversy. In Re Monroe's Will, 270 App. Div. 1039, 63 N.Y.S. 2d 141 (2d Dept. 1946) and Duffy v. 42nd Street, M. & S.N. Av. Ry. Co., 266 App. Div. 865, 42 N.Y.S. 2d 534 (2d Dept. 1943). These cases constitute a minority holding in New York and appear to be confusing death certificates with hospital records which fall within the purview of Civil Practice Act §374-a; that provision permits records made in the regular course of business to be admitted in evidence. Note too that the "ancient documents" rule contained in Civil Practice Act §389 was not intended by the Legislature to change the rules of evidence on admissibility of death certificates. Robinson v. Supreme Commandery, 77 App. Div. 215, 79 N.Y.S. 13 (1st Dept. 1902) affirmed, 177 N.Y. 564, 69 N.E. 1130 (1904). In Re Rose's Estate, 201 Misc. 470, 106, N.Y.S. 2d 235 (Surrogate's Court 1951) raises, although it does not decide, the question whether a statement of time of death in a certificate of death is proof of such fact. See, in this connection, Decedent Estate Law §89, concerning disposition of property where there is no evidence that persons have died otherwise than simultaneously.

Subsection (a) was amended on June 29, 1993 to require the funeral director to complete that portion of the confidential medical report of death relating to race and ancestry.

Subsection (b) was amended by resolution adopted on June 16, 1998 to allow for filing certificates and reports via authorized electronic means.

Section in original publication July 1, 1991.

Notes:

This section is new. It has become apparent that there is a need for individuals to be able to prove the fact that a next of kin, for example, has died without needing to disclose other information of a personal nature found on a death certificate. In order to accommodate this need, this section authorizes the issuance of certifications of death which contain a limited amount of information.

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.07 Confidential medical report of death; not subject to compelled disclosure or inspection.

(a) The confidential medical report of death shall be confidential and not subject to compelled disclosure or to inspection by persons other than the Commissioner or authorized personnel of the Department, except in a criminal action or criminal proceeding, or for official purposes by a Federal, State, county or municipal agency charged by law with the duty of detecting or prosecuting crime, or by researchers authorized and approved by the National Death Index of the National Center for Health Statistics of the federal Centers for Disease Control and Prevention, or successor agency. The Commissioner may, however, approve the inspection of such confidential medical reports for scientific purposes and, for confidential medical reports of deaths occurring on or after January 1, 2010, by the spouse, domestic partner, parent or child of the deceased or by the individual identified on the death certificate filed with the Department as the person in control of disposition.

(b) Within the context of this section, scientific purposes shall mean epidemiologic surveillance and investigation by a governmental public health agency, research, and/or the compilation of statistics relating factors bearing on disease incidence, prevalence, mortality or treatment.

(c) Notwithstanding subsection (a), upon application of an individual licensed to practice medicine, the

Commissioner may release a certified copy of the confidential medical report of death, or, in his or her sole discretion, provide abstracts of such information, when, and to the extent that:

(1) a need for the family medical history has been demonstrated, to the satisfaction of the Commissioner, in order to counsel or to diagnose and/or treat an illness or condition in an individual; and

(2) the information contained in the confidential medical report of death has been demonstrated, to the satisfaction of the commissioner, to be otherwise unavailable.

(d) The information released pursuant to subsection (c) may be issued only to the licensed practitioner making the request.

HISTORICAL NOTE

Section amended City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Subds. (c), (d) added City Record July 16, 1993 eff. Aug. 15, 1993.

Notes:

This section was amended by resolution adopted on September 22, 2009.

Subdivision (a) was amended to provide that disclosure of the confidential medical report of death shall not be compelled, in order to be consistent with the confidentiality provisions of Articles 3 and 11 of this Code. It was further amended to provide for inspection by researchers authorized and approved by the National Death Index of the National Center for Health Statistics of the Centers for Disease Control and Prevention, or its successor agency. This is to facilitate scientific research of death data by researchers who apply through the federally-established National Death Index. Subdivision (a) was also amended to provide for inspection of confidential medical reports of death occurring on or after January 1, 2010 by the spouse, domestic partner, parent or child of the deceased, or by the individual identified on the death certificate as the person in charge of disposition. This change will make cause of death information available to the above list of individuals, which is consistent with the policies of some states.

Subdivision (b) was amended to include epidemiologic surveillance and investigation conducted by governmental public health agencies within the meaning of "scientific purposes".

This section is derived without substantive change from S.C. §33(c) (part). The former provision that the medical report "shall be deemed not a part of such certificate and shall be regarded and treated as a confidential and privileged communication" has been omitted as unnecessary. Note that Administrative Code §567-4.0(b) contains a restriction on the issuance of copies of the certificate itself. The words used in this section, "shall not be subject to subpoena", have been interpreted by the Court of Appeals in Re Baker's Mutual Insurance Co. of New York, 301 N.Y. 21, 92 N.E. 2d 49 (1950) as giving the medical report of death complete confidentiality. Note in this connection the notes to section 11.07(a), confidentiality of certain reportable disease reports and records. See also People ex. rel. Lemon v. Supreme Court, 245 N.Y. 24, 156 N.E. 84 (1927); People ex rel. Higgins v. Emerson, Comm. of Health, 102 Misc. 183, 169 N.Y.S. 297 (Sup. Ct. 1918).

This section was amended by resolution adopted on September 14, 1982 to allow the Commissioner to release confidential medical reports of death for scientific purposes, as defined.

Subsections (c) and (d) were added on June 29, 1993 to authorize the Commissioner to release, under specific

circumstances, a certified copy of the confidential medical report of death or provide abstracts of the information contained therein.

§205.09 Certifications of death.

(a) A party entitled to obtain a transcript of a record of death, or a certified copy of a certificate of death, may request a certification of death, and the Department may, at its discretion, thereupon issue such a certificate.

(b) A certification of death shall contain only the name, sex, date of death, date that the certificate was accepted for filing by the Department, manner of death and the place of death of the person to whom it relates, as well as the death record number from which said information is derived.

HISTORICAL NOTE

Section added City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

Notes:

This section was added by resolution adopted on September 22, 2009.

This section was essentially reenacted and renumbered from the former Section 205.06, which was deleted.

Subdivision (a) was amended to provide discretion to the Department in the issuance of certifications of deaths, which are abstracts of death certificates. The Department does not currently have the systems to prepare or issue such certifications.

Subdivision (b) was amended to update the minimum amount of information that would be useful on a certification of death by adding the date that the certificate was accepted for filing by the Department and the manner of death (accident, suicide, homicide or natural).

§205.11 Performance and reports of autopsies.

When, in the opinion of the Commissioner, the prevention of spread of disease or other public health consideration requires that an autopsy be performed, he or she may request the Office of Chief Medical Examiner of the City or arrange for a pathologist to perform the same and to file an autopsy report with and in the manner specified by the Department.

HISTORICAL NOTE

Section amended City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section was amended to reflect gender neutrality. Subdivision (b) was deleted and replaced with Section 205.03 (g), which provides for situations in which a reporter receives autopsy results or other information that would change the information in the cause of death section of the certificate or the confidential medical report.

Subsection (a) is derived from S.C. §35(a). The reference to persons dying in New York City has been deleted.

Subsection (b) is derived from S.C. §35(b). This section requires a report of all autopsies on infants other than autopsies performed by the office of the chief medical examiner; the Sanitary Code previously required autopsy reports of autopsies "following a death from natural causes" including those on remains of persons one year of age or over.

Generally, on the right to dissect or perform autopsies, see Public Health Law §§4210 and 4201, Administrative Code §§878-3.0 and 878-3.1 and County Law §939. The latter section applies to medical assistants who may be appointed by the district attorneys for New York County or Kings County and who, after appointment, are authorized, inter alia, to dissect, perform or attend an autopsy on the remains of a human being.

Subsection (b) was amended by resolution adopted on September 15, 1977, to conform its provisions with the concept of centralization of functions of the Bureau of Vital Statistics.

§205.15 Disposal of amputated parts; certificate of amputation. [Repealed]

HISTORICAL NOTE

Section repealed City Record Sept. 22, 2004 eff. Oct. 22, 2004. [See Vol. 9 Statements of Basis and Purpose No. 22]

Section in original publication July 1, 1991.

Notes:

This section is derived from S.C. §43. The period within which funeral directors are to file amputation certificates received by them has been extended from 48 to 72 hours following the operation. The right of the parent or guardian to act where the patient is a minor or is incompetent is stated explicitly. The section does not apply to the situation where, following the amputation, the patient dies. In such a case, the provisions of this article pertaining to disposals of human remains generally apply. Note in this connection that the definition of human remains (§205.01 (c)) does not include amputated parts of living persons.

This section was amended by resolution adopted on September 15, 1977 to delete the title of superintendent of city mortuaries eliminated by the Health and Hospitals Corporation of the City and to conform its provisions to the concept of centralization of functions of the Bureau of Vital Records.

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.13 Disposal of human remains; time limit.

(a) Except as set forth in subdivision (b) of this section, remains of persons dying in the City, or remains resulting from a termination of pregnancy occurring in the City, shall be buried, cremated or transported out of the City within four days following death or termination of pregnancy. Such remains may, however, within the four-day period, be placed in the general reception vault of a cemetery for a period not exceeding ten days from the placement therein. The Department may extend the time limitations contained in this subdivision and may, in granting an extension, specify conditions to be observed to prevent seepage or escape of offensive odors.

(b) Human remains may be temporarily held for more than the time periods specified in subdivision (a) of this section without being buried, cremated or transported out of the City only if an appropriate interim disposition permit has been issued pursuant to §205.21 of this Article.

HISTORICAL NOTE

Section renumbered and amended (former §205.17) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Notes:

This section was amended by resolution adopted on September 22, 2009.

Former section 205.13, concerning disposal of certain human remains after use for anatomical purposes, was deleted as an unnecessary requirement for public health purposes. Section 205.01, defining "human remains", and Section 205.21, concerning the issuance of disposition permits, now specify the circumstances when such a permit is required or authorized.

New section 205.13 is derived from the former section 205.17. Subdivision (a) was amended to add a reference to remains, as defined in section 205.01(c), resulting from a termination of pregnancy occurring in the City in order to be consistent with the rest of the section. This subdivision was also amended to correct legal nomenclature distinguishing between a "subdivision" and a "section."

Subdivision (b) was added to provide for the holding of human remains for more than the time periods specified in subdivision (a) of this section without being buried, cremated or transported out of the City if an appropriate interim disposition permit has been issued. This was to accommodate, among other circumstances, the interim holding of body parts (as occurred during the World Trade Center disaster), or the holding of human remains during mass mortality events or while being used for anatomical purposes.

This section is derived without substantive change from S.C. §41 and Reg. 12 of General Regulations relating to S.C. §§31 to 45. The power to grant extensions is vested in the Department rather than specifically in the Registrar of Records and Assistant Registrar of Records. This accords with the general policy of the revision to avoid referring to Department personnel by titles which change over the years.

In connection with the problems of disposal of remains which emit ionizing radiation, the provisions of Article 175 should be consulted.

The courts have upheld the conviction of an undertaker who failed to bury a body within a reasonable time after death as required by State law (now Public Health Law §4200(1). People ex rel. Travis v. Daniels, 269 App. Div. 599, 57 N.Y.S. 2d 457 (3d Dept. 1945); People v. Ackley, 270 App. Div. 958, 62 N.Y.S. 2d 771 (3d Dept. 1946), affirmed, 296 N.Y. 731, 70 N.E. 2d 544 (1946) motion to amend remittitur denied, 296 N.Y. 825, 72 N.E. 2d 16 (1947) certiorari denied, 330 U.S. 846, 67 Sup. Ct. 1081, 91 L. Ed. 1290 (1947). Generally, on this problem, see Finley v. Atlantic Transport Co., 220 N.Y. 249, 115 N.E. 715 (1917): In Re Tierneys Estate, 88 Misc. 347, 151 N.Y.S. 972 (Surrogate's Court 1914). Note also the annotations to §205.37.

Section 205.17 was amended by resolution adopted on September 15, 1977, to conform its provision with current related requirements.

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.15 Delivery of remains to funeral director or undertaker; unclaimed remains.

When a death or termination of pregnancy occurs in a hospital, hospice or other health care facility, the person in charge shall deliver the remains immediately upon demand and within the time for filing reports prescribed in §§203.03(c) and 205.03(b) to a funeral director or undertaker who presents a certification that he or she has been authorized to take charge of the remains by the person in control of disposition as defined in §205.01. If the remains are not claimed within 24 hours following death or termination of pregnancy, the person in charge of the hospital, hospice or other health care facility shall immediately notify the person in charge of the City mortuary. If, however, an autopsy is to be performed on unclaimed remains pursuant to §4214(1) of the Public Health Law, the person in charge of the hospital, hospice or other health care facility shall notify the person in charge of the City mortuary within 48 hours of death and prior to the autopsy. Under such circumstances the filing of the certificate of death and confidential medical report may be postponed until 72 hours after death. The requirement of filing may be fulfilled by delivery of the certificate and confidential medical report to the person in charge of the City mortuary when the remains are removed from the hospital or other health care facility.

HISTORICAL NOTE

Section renumbered and amended (former §205.19) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis and Purpose No. 11]

Section in original publication July 1, 1991.

Former §205.15 Disposal of amputated parts; certificate of amputation. [Repealed]

Section repealed City Record Sept. 22, 2004 eff. Oct. 22, 2004. [See Vol. 9 Statements of Basis and Purpose No. 22]

Section in original publication July 1, 1991.

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section is derived from former section 205.19. This section was amended to clarify that it applies to deaths or terminations of pregnancy that occur in hospice or other health care facilities, in addition to hospitals. The reference to "a permit issued pursuant to §205.25" was deleted because, in practice, disposition permits are not issued until after death certificates are prepared, certified and registered. The references to "next of kin" and the "Public Administrator" were deleted and replaced with the "person in control of disposition" as now defined in section 205.01. The section was further amended to clarify that the performance of an autopsy pursuant to §4214(1) of the State Public Health Law refers to unclaimed remains. The section was also amended to reflect gender neutrality.

This section is derived from S.C. §39. That section provided that the body of a person "who has died from natural causes" be turned over to the city mortuary if not claimed within 24 hours. The quoted phrase has been omitted; in cases involving death from other than natural causes, notification to the chief medical examiner must be given immediately pursuant to Administrative Code §878-1.0. A hospital may perform an autopsy on a body which is unclaimed after 48 hours, Public Health Law §4214(1); however, medical schools have a prior right to such bodies, Public Health Law §4214(2). See also Public Health Law §§4211 and 4212. In practice, medical schools notify the superintendent of city mortuaries of their needs. Under the instant section a hospital desiring to perform an autopsy on an unclaimed body must notify the Department by telephone within 24 hours after death. Within 48 hours after death and prior to the performance of the autopsy, the hospital is to notify the superintendent who will be able to advise the hospital whether any medical school has asserted a prior claim to the body. If not, the autopsy may be performed at the expiration of the 48 hour period and the body, together with the certificate of death and medical report, will be turned over to the superintendent of city mortuaries within 72 hours.

This section was amended by resolution adopted on September 15, 1977, to update its provisions in conformity with the presently required practice in the Bureau of Vital Records and to delete the title of superintendent of City mortuaries eliminated by the Health and Hospitals Corporation of the City.

This section was further amended by resolution adopted on June 16, 1998 to eliminate the requirement of reporting to the Department the need for an autopsy pursuant to §4124(1) of the Public Health Law when remains have not been claimed within 24 hours of death or termination of pregnancy.

FOOTNOTES

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.17 Claiming of human remains removed to the City mortuary.

When human remains which have been removed to the City mortuary are subsequently claimed, the person in charge of the City mortuary shall deliver the remains, on demand, to a funeral director or undertaker who submits a written statement that he or she, or the funeral establishment with which he or she is associated, has been employed by the person in control of disposition. Together with the remains, the person in charge of the City mortuary shall deliver the certificate of death or termination of pregnancy and confidential medical report, if any, or, if such documents have been filed with the Department, any permit issued by the Department authorizing burial in the City cemetery. When the funeral director or undertaker is required to notify the public administrator of a county in the City pursuant to §1113 of the Surrogate's Court Procedure Act, the statement of such funeral director's or undertaker's employment shall first be approved by the public administrator.

HISTORICAL NOTE

Section renumbered and amended (former §205.21) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section is derived from former section 205.21. This section was amended by replacing "next of kin, legal representative or, in the absence of arrangements by such next of kin or legal representative, by a friend of the deceased" with the "person in control of disposition". This is consistent with amendments to Section 205.01. The section was also amended to reflect gender neutrality.

This section is derived from Reg. 6 of General Regulations relating to S.C. §§31 to 45. The revision explicitly provides for the delivery of certificates and permits to funeral directors simultaneously with delivery of the remains. The requirement of approval by the Public Administrator has been conformed more closely to the applicable requirements of §136-o of the Surrogate's Court Act, which reads as follows:

Every undertaker shall also report to such public administrator, within twelve hours after receiving an order for the burial by him of any deceased person having no next of kin known to him to be entitled to administer, the name and residence of such deceased person.

This section was amended by resolution adopted on September 15, 1977, to delete the title of superintendent of city mortuaries which was eliminated by the Health and Hospitals Corporation of the City and to conform its provisions with current related requirements.

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.19 Removal of human remains from place of death or termination of preg- nancy.

(a) (1) Except as specified in this section, no person shall remove human remains from the place of death or termination of pregnancy unless a certificate of death or termination of pregnancy and a confidential medical report, if any, have been filed electronically with the Department by the person required to report a death or termination of pregnancy pursuant to subdivision (a) of §205.03 or subdivision (a) of §203.03, or unless such documents have been delivered to a funeral director, undertaker or to the person in charge of the City mortuary pursuant to §205.03 or §203.03, or unless a burial, cremation, interim or transportation permit has been issued pursuant to §205.21. Prior authorization of the Department shall not be required to remove human remains to a county in a State contiguous to the City. However, an appropriate permit shall be obtained prior to burial or cremation of human remains, temporary holding of remains pursuant to subdivision (b) of §205.13, or transportation to any other area, as required pursuant to this Article. When a death or termination of pregnancy occurs under circumstances which do not require notification to the Office of Chief Medical Examiner, the remains may be removed from the place of death, termination of pregnancy or autopsy to another place within the City or to a county within a State contiguous to the City by a licensed funeral director or undertaker if such person has in his or her possession a certificate of death or termination of pregnancy including any confidential medical report, or if such certificate and confidential medical report, if any, have been filed electronically with the Department by the person required to report the death or termination of pregnancy pursuant to

subdivision (a) of §205.03 or subdivision (a) of §203.03. If, however, the death or termination of pregnancy is required to be reported to the Department by the Office of Chief Medical Examiner pursuant to §205.03(a)(3) or §203.03(a)(4), the remains may be removed from the place of death, termination of pregnancy or autopsy by the funeral director or undertaker if either he or she has received a completed death or termination of pregnancy certificate from the medical examiner who had taken charge of the remains, or if a death or termination of pregnancy certificate has been electronically filed by the Office of Chief Medical Examiner.

(2) Notwithstanding the requirements of paragraph (1) of this subdivision, in the case of a death from natural causes occurring elsewhere than in a hospital or hospice, such remains may be removed only to a funeral establishment within the City or within a county of a State contiguous to the City if the funeral director, undertaker or person in charge of the mortuary has obtained authorization from the Office of Chief Medical Examiner to remove the remains, or has obtained authorization to remove the remains and assurance from the physician attending the death, or from his or her duly authorized medical associate pursuant to paragraph (2) of subdivision (a) of §205.03, that the death is from natural causes and that said physician or medical associate assumes responsibility for certifying to the cause of death.

(b) When a death occurs in a hospital, under circumstances which do not require notification to the Office of Chief Medical Examiner, the person in charge of the hospital may remove the remains to another hospital for purposes of autopsy, but such remains shall not be removed from the hospital in which the autopsy is performed unless the applicable provisions of subdivision (a) of this section have been complied with.

(c) When a death occurs under circumstances which do not require notification to the Office of Chief Medical Examiner and while the deceased was under the continued medical supervision of a staff physician of a voluntary or municipal hospital as part of the general care offered by such hospital to a patient who has been transferred from the hospital to his or her home, the person in charge of such hospital may remove the remains to the hospital for purposes of autopsy, but such remains shall not be removed from the hospital unless the applicable provisions of subdivision (a) of this section have been complied with.

(d) This section shall not prevent the transportation of human tissues for diagnostic purposes or pathological study, the removal of human remains by the person in charge of the City mortuary for burial in the City cemetery or the removal of human remains when ordered by an officer of the City police department or the Office of Chief Medical Examiner pending completion of an investigation by either agency or by both.

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section, relating to the removal of human remains, is derived from former section 205.23. Subdivision (a) was amended by separating it into paragraphs (1) and (2). Paragraph (1) was amended to update, clarify and conform to current practice the circumstances under which human remains may be removed from the place of death or termination of pregnancy. The paragraph now provides for electronic filing prior to removal. The paragraph was further amended to

clarify that the filing must be made by the person required to report a death or termination of pregnancy pursuant to subdivision (a) of §205.03 or subdivision (a) of §203.03, and was amended to reference interim disposition permits in accordance with changes to sections 205.13 and 205.21. Paragraph (1) was amended to delete the requirement that a licensed funeral director or undertaker must have in his or her possession a "completed" certificate of death or termination of pregnancy, as the personal particulars section may not yet have been completed by the funeral director or undertaker. The paragraph was further amended to clarify throughout that it applies to terminations of pregnancy as well as deaths.

Paragraph (2) of subdivision (a) is new. It provides for the removal of human remains from the place of death or termination of pregnancy in the case of a death from natural causes occurring elsewhere than in a hospital or hospice if the funeral director, undertaker or person in charge of the mortuary has obtained authorization from the Office of Chief Medical Examiner to remove the remains, or has obtained authorization to remove the remains and assurance from the physician attending the death, or from his or her duly authorized medical associate, that the death is from natural causes and that said physician or medical associate assumes responsibility for certifying to the cause of death. This is consistent with current practice.

Subdivision (b) was amended to correct legal nomenclature distinguishing between a "subdivision" and a "subsection" and to correct the title of the Office of Chief Medical Examiner.

Subdivision (c) was amended to correct the title of the Office of Chief Medical Examiner, reflect gender neutrality and correct legal nomenclature distinguishing between a "subdivision" and a "subsection."

Subdivision (d) was amended to clarify that the police department is of the City, and to correct the title of the Office of Chief Medical Examiner.

This section is derived from S.C. §38 and Reg. 3 of General Regulations relating to S.C. §§31 to 45.

Subsection (a) makes explicit the present practice that a burial, cremation or transportation permit includes permission to remove the remains from the place of death or fetal death. The provision relating to removal of remains under charge of the Chief Medical Examiner is new and is intended to insure that the Chief Medical Examiner will be notified in all cases under his jurisdiction. The section extends the purposes for which removal may be sought by omitting the qualification previously contained in S.C. §38(b) that such removal could only be "for the purpose of preparing the body for burial or other disposition." The holding of services thus is a proper purpose for removal. The requirement that the funeral director or undertaker be employed by the "nearest available relative, friend or personal representative of the deceased, or Public Administrator, or executor or executrix of the deceased" has been omitted in this section, and is consolidated with other provisions concerning a funeral director's or undertaker's authorization in §205.37.

The section heading and subsections (z) and (d) were amended by resolution adopted on September 15, 1977 to delete the title Superintendent of City Mortuaries eliminated by the Health and Hospitals Corporation of the City and to conform their provisions with current related requirements.

Subsection (a) was amended by resolution adopted on October 30, 1987 to refer to the removal of human remains out of the City to a contiguous county in the State after receiving telephone authorization from the Department. This procedure is authorized by §205.25.

Subsection (b) is new; it is intended to facilitate the performance of autopsies.

Subsection (c) is derived from S.C. §38(d) without substantive change except that the person in charge of the hospital rather than a "physician or intern registered with the department of health..."may remove the body of a patient who was under home care to the hospital for autopsy purposes.

Subsection (d) is derived from S.C. §38(c). The Police Department and Office of Chief Medical Examiner may order removal to the City mortuary of human remains pending completion of an investigation, whether or not the person "died suddenly in a public place," as was previously required. The provision that the Superintendent of City Mortuaries may also remove remains for burial in the city cemetery is new. This subsection, formerly numbered as subsection (e) was renumbered as subsection (d) by resolution adopted on January 15, 1970 and former subsection (d) was repealed by the same resolution which incorporated and reinforced its provisions by the amendments to subsections (a), (b) and (c).

This section was amended by resolution adopted on January 15, 1970 to delete the requirement for a permit or telephone authorization from the Department to remove the remains of a deceased person from the place of death and to reinforce the requirement for a death certificate from the office of the Chief Medical Examiner before removal of the remains of a person who died under circumstances requiring notification to the office of the Chief Medical Examiner.

This section was previously amended by resolution adopted on October 30, 1987 to refer to the procedure established pursuant to §205.25(a) whereby telephone authorization could be obtained to transport human remains from Bronx to Westchester or Queens to Nassau prior to issuance of a burial, cremation or transportation permit. It was further amended on June 10, 1996 with the amendment of §205.25(a) to eliminate the need for any prior authorization for removals in these counties only. The appropriate permit must still be obtained in accordance with this Article for burial, cremation and/or transportation of human remains to other areas.

CASE NOTES FROM FORMER §205.23

¶ 1. A complaint charging defendant with two counts of removal of human remains from the place of death, 24 RCNY §205.23, when he arranged for the removal of two dead women from his apartment without notifying the police is dismissed as facially insufficient because there is no corroboration to establish that defendant removed "remains" from his residence. People v. Pappas, 163 Misc. 2d 1029 [1994].

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.21 Burial, cremation, holding and transportation of human remains; disposition permit.

(a) When a death or termination of pregnancy occurs in the City, the remains shall not be buried, cremated, temporarily held as an interim disposition pursuant to subdivision (b) of §205.13 or transported out of the City unless an appropriate disposition permit has been issued by the Department. However, remains may be transported out of the city to a contiguous county in the State without obtaining prior authorization to transport from the Department. In such cases, an appropriate disposition permit must still be issued by the Department prior to burial, cremation, interim disposition or transportation to any other area. Such burial, cremation, interim disposition or transportation permit shall not be issued until a certificate of death or termination of pregnancy and, if required, a confidential medical report have been filed with the Department. A permit to bury, temporarily hold or cremate human remains or to transport them out of the City includes authorization to remove the remains from the place of death or termination of pregnancy pursuant to §205.19(a). If remains are to be transported out of the City by common carrier, they shall be prepared in such manner as to comply with the State Sanitary Code.

(b) (1) No person in charge of a cemetery or crematory in the City shall allow human remains to be buried or cremated in the cemetery or crematory until a permit issued pursuant to subsection (a) of this section is surrendered to him or her, and he or she shall not accept any permit which has been changed or altered unless the change or alteration

is countersigned by the Department. A permit for the burial or cremation of human remains issued by the authorized agency of any municipality or county within the United States, of any state, territory or possession of the United States, the District of Columbia, or of any foreign State within whose jurisdiction the death or termination of pregnancy occurred, which specifies the cemetery or crematory, may be accepted by the person in charge of the cemetery or crematory instead of a permit issued by the Department. If a permit issued in another jurisdiction does not specify the cemetery or crematory, or if the cemetery or crematory specified is not the actual place of intended burial or cremation, it shall not be accepted by the person in charge of a cemetery or crematory but shall be exchanged for a permit issued by the Department.

(2) The person in charge of a cemetery or crematory shall maintain a permanent record of each burial or cremation which shall include the permit number and permit issuing authority of all permits received pursuant to this subdivision and after making such permanent record, he or she may completely destroy such permits by incineration or other equally effective means.

(3) The person to whom an interim disposition permit has been issued in accordance with subdivision (b) of §205.13 shall maintain a permanent record of each of the human remains being temporarily held which shall include the permit number, and shall maintain the original interim disposition permit until such time it is surrendered to the Department in exchange for a final burial, cremation or transportation permit.

(c) A burial permit issued pursuant to this section includes authorization to place the remains in the general reception vault of the cemetery named in the permit prior to permanent burial in such cemetery.

(d) Application for a cremation permit shall be made by the person in control of disposition. The application shall be supported by an affidavit which establishes the authority of such person in control of disposition to request cremation. The affidavit shall contain the name of the funeral director or undertaker who is to arrange for cremation, the name of the crematory where cremation is to take place and a statement that the applicant assumes all responsibility for the cremation. Such affidavit shall be maintained by the funeral director or undertaker. No cremation permit shall be issued unless the application is approved by the office of the chief medical examiner pursuant to §17-204 of the Administrative Code.

HISTORICAL NOTE

Section renumbered and amended (former §205.25) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Subd. (a) amended City Record June 14, 1996 eff. July 14, 1996. [See Vol. 9 Statements of Basis

and Purpose No. 5]

Subd. (d) amended City Record Sept. 22, 2004 eff. Oct. 22, 2004. [See Vol. 9 Statements of Basis

and Purpose No. 22]

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section, regarding disposition permits, is derived from former section 205.25. Permits to bury, cremate or to transport human remains have long been required in New York City. In circumstances such as during mass mortality

events or when human remains are used for anatomical purposes, it may be necessary to temporarily hold human remains beyond the periods specified in section 205.13 without burial, cremation or transportation. Subdivision (b) of section 205.13 requires the issuance of an interim disposition permit by the Department to temporarily hold human remains for such periods. Accordingly, subdivision (a) of this section 205.21 has been amended to include reference to interim temporary holding permits, in addition to burial, cremation and transportation permits.

Subdivision (b) has been divided into three paragraphs. New paragraph (3) of subdivision (b) specifies the information required to be kept by a person to whom an interim holding permit has been issued. It also requires the surrender of the interim permit when a final disposition permit to bury, cremate or transport the human remains is issued.

Subdivision (d) has been revised to utilize the newly defined term "person in control of disposition".

This section is derived from S.C. §§42 and 44 and Regs. 5 and 11 of General Regulations relating to S.C. §§31 to 45. The section reflects current Department practice of requiring that the report or fetal death be filed prior to the issuance of a burial, cremation, or transportation permit.

Subsection (a) states explicitly that a burial, cremation or transportation permit includes permission to remove the remains from place of death or fetal death. A new provision has been added requiring compliance with State Sanitary Code provisions on shipment of remains out of the City by common carrier. It was amended by resolution adopted on June 24, 1971 which imposed the $2.50 fee for burial, cremation and transportation permits. The $2.50 fee for burial, cremation, and transportation permits was eliminated by resolution adopted on December 22, 1972.

Subsections (a) and (b) of Section 205.25 were amended by resolution adopted on September 15, 1977, to conform their provisions with current related requirements.

Subsection (a) was amended by resolution adopted on October 30, 1987 to allow removal of human remains out of the City to a contiguous county in the State after receiving telephone authorization from the Department. An appropriate Department permit would still need to be obtained prior to burial or cremation.

Subsection (a) which was previously amended by resolution adopted on October 30, 1987 to allow removal of human remains in certain circumstances from the City to a contiguous county in the State after receiving telephone authorization from the Department, was further amended on June 10, 1996 to eliminate the need to obtain any authorization from the Department prior to transportation of human remains from the City to either Westchester or Nassau County. The appropriate Department permit is still required prior to burial or cremation in these instances, and for transportation of human remains to any other location for burial or cremation. The incorrect reference to §205.03(a) in this section as printed was also changed to read, as corrected, §205.23(a).

Subsection (b) expands the list of jurisdictions outside New York City whose burial or cremation permits may be accepted by persons in charge of a cemetery or crematory; see Notes on section 205.27.

Subsection (b) was amended by resolution adopted on February 20, 1969 which amended the last sentence of such subsection to permit cemeteries and crematories to keep a permanent record of burials or cremations in lieu of a permanent file of burial permits.

Subsection (c) states that a burial permit includes authorization to place the remains in the cemetery's general reception vault. When remains are placed in the cemetery's vault and are subsequently buried in that cemetery, no additional permit is necessary.

Subsection (d) of §205.25 of the New York City Health Code is being amended on September 14, 2004 to recognize the expertise of licensed funeral directors and rely on their representations that cremations have been properly authorized. It will also facilitate electronic filing of death certificates.

Subsection (d) authorizes the "next of kin, legal representative or friend" to apply for a cremation permit rather than the "nearest relative of the deceased or other authorized person" as in Reg. 5 of the General Regulations relating to S.C. §§31 to 45.

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.23 Transportation of human remains into City.

Human remains shall not be brought into the City unless a permit for their transportation, burial or cremation has been issued by the authorized agency of a municipality or county within the United States, of a state, territory or possession of the United States, the District of Columbia or of any foreign state within whose jurisdiction death or termination of pregnancy occurred. When the jurisdiction in which the event occurred does not issue such permits, the Department may accept certified copies of certificates of death or termination of pregnancy in lieu of such permits. Remains brought into the City for burial or cremation shall be dealt with pursuant to §205.13 and §205.21. Remains brought into the City in the course of transit shall not be detained for any purpose other than transshipment unless a permit is first obtained from the Department specifying where, how long and under what conditions such remains may be held, but no such permit shall be required for the uninterrupted transit or for the direct transshipment of remains. This section does not apply to the transportation of human tissues to be used for diagnostic purposes or pathological study.

HISTORICAL NOTE

Section renumbered and amended (former §205.27) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section is derived from former section 205.27. It has been amended to clarify that when human remains are being transported into the City from a jurisdiction that does not issue disposition permits, the Department may accept certified copies of certificates of death or termination of pregnancy in lieu of a permit.

This section is derived from S.C. §40. The section regulates the transportation of human remains into the City from New York State, other states, United States territories and possessions, the District of Columbia and from foreign states. The revision accords recognition to permits issued by foreign states whereas S.C. §40 previously prohibited removal from the dock or terminal of bodies brought into the City from without the "boundaries of the United States", unless a permit had been obtained from the Department. The provisions providing for retention of remains solely for purposes of transshipment without a permit, as well as the provisions for a permit to allow retention for other purposes prior to transshipment, are new.

Section 205.27 was amended by resolution adopted on September 15, 1977, to conform its provisions with current related requirements.

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.25 Cemeteries, crematories, mausoleums, vaults and tombs.

(a) When human remains are buried in the ground, the top of the coffin or casket shall be at least three feet below the level of the ground, but if the coffin or casket is enclosed in a concrete or metal vault, the top of the vault shall be at least two feet below the level of the ground.

(b) General vaults in cemeteries used for the permanent burial of human remains shall be provided with crypts or cells which can be sealed, and every crypt or cell shall be sealed immediately after remains are placed in it unless the remains are enclosed in a hermetically-sealed metal or stone coffin or casket.

(c) General reception vaults in cemeteries shall be maintained in good sanitary condition.

HISTORICAL NOTE

Section renumbered and amended (former §205.31) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section is derived from former section 205.31. Subdivision (a) has been repealed as the regulation of new cemeteries and cemetery name changes is wholly within the jurisdiction of the New York State Department of Health and Department of State pursuant to the Public Health Law and Not-for-Profit Corporation Law and related regulations. The remaining subdivisions have been re-lettered accordingly.

This section is derived without substantive change from S.C. §45 (part) and Regs. (last part) and 13 of General Regulations relating to S.C. §§31 to 45. Note that §451 of the Real Property Law makes it unlawful "for any person to take by deed, devise or otherwise or set apart or use any land or ground in any of the counties of ... Kings, Queens, Richmond ... for cemetery purposes without the consent of the . . . Board of Aldermen of the City of New York . . . first had and obtained in like manner as provided for in the membership corporations law; and said . . . Board of Aldermen in granting such consent may annex thereto such conditions, regulations and restrictions as such board may deem the public health or the public good require." The City Charter §21 vests in the Council, which replaced the Board of Aldermen, "the legislative power of the city". See also Charter §§954 and 959 on continuity of powers and duties of agencies and offices.

The Administrative Code §200-3.0 contains a provision prohibiting acquisition of land for cemetery purposes, with stated exceptions, in the County of Queens.

A provision similar to Real Property Law §451 noted above, relating to the acquisition of land by cemetery corporations, is contained in Membership Corporations Law §73. It requires the consent of the Board of Aldermen for land acquisition in the counties of Kings and Queens (and other counties outside this City). Generally, see Membership Corporations Law Article IX-Cemetery Associations and General Municipal Law Article 8-Cemeteries. Section 160 thereof provides that the common council of any city may acquire land for burial purposes within or without the city concerned, with the provision that, "The provisions of this section shall not apply to the counties of New York, Kings, Queens and Westchester." See also Religious Corporations Law §7 et. seq.

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.27 Disinterment permits; opening of coffins or caskets.

(a) No person shall disinter a coffin or casket containing human remains or expose or disturb a mausoleum, vault, tomb, grave or other place of burial unless a disinterment permit has been issued by the Department, but this requirement does not apply during the course of a burial for which a burial permit has been obtained pursuant to §205.21. No disinterment permit is required when the disinterment is ordered by the Office of Chief Medical Examiner or the district attorney of a county within the City in the exercise of official duties. A disinterred coffin or casket containing human remains shall be prepared so as to comply with the State Sanitary Code.

(b) Disinterment permits may be issued only to funeral directors and undertakers of, if the remains are to be reburied in the same cemetery, to the person in charge of the cemetery. Application for a disinterment permit shall be made on a form furnished by the Department and submitted at any office maintained and designated by the Department for such purposes. The application shall be supported by an affidavit from the person in control of disposition or other authorized person requesting disinterment. Such affidavit shall be maintained by the funeral director or undertaker.

(c) No person, other than the chief medical examiner or the chief medical examiner's duly authorized representative, shall open a coffin or casket which has been disinterred unless the opening is ordered by a court of

competent jurisdiction.

HISTORICAL NOTE

Section renumbered and amended (former §205.33) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Subd. (b) amended City Record Sept. 22, 2004 eff. Oct. 22, 2004. [See Vol. 9 Statements of Basis

and Purpose No. 22]

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section, regarding disinterment permits, is derived from former section 205.33 and remains essentially unchanged. Modifications were made to reflect renumbering of sections, correcting the title of the Office of Chief Medical Examiner, the use of the new term "person in control of disposition" and gender neutrality.

This section is derived from S.C. §§42b and 45(part) and Regs. 8, 9 and 10 of General Regulations relating to S.C. §§31 to 45. There are no substantive changes other than the exemption from the requirement of obtaining disinterment permits of the chief medical examiner and of any district attorney of New York, Kings, Queens, the Bronx or Richmond County acting within official capacities. Note that if, during the burial of a coffin containing human remains, there must be a temporary disturbance of remains already interred, no disinterment permit is required. The prohibition against opening a coffin or casket without court order is, however, applicable to such officials.

The courts have stated their disposition to exercise a "benevolent discretion" when a question is presented involving disinterment of human remains. See, in this connection, Fromm v. Fromm, 280 App. Div. 1022, 117 N.Y.S. 2d 81 (3d Dept. 1952); Application of Shine, 208 Misc. 832, 143 N.Y.S. 2d 374 (Sup. Ct. 1955); In Re Harlam, 57 N.Y.S. 2d 103 (Sup. Ct. 1945); In Re Herskovitz, 48 N.Y.S. 2d 906 (Sup. Ct. 1945); Petition of Forrisi, 170 Misc. 649, 10 N.Y.S. 2d 888 (Sup. Ct. 1939).

Subsection (b) of §205.33 of the New York City Health Code is being amended on September 14, 2004 to recognize the expertise of licensed funeral directors and rely on their representation that disinterments have been properly authorized. It will also facilitate electronic filing of death certificates.

Subsection (b) of §205.33 was amended by resolution adopted on September 15, 1977, to conform its provisions with the concept of centralization of the Bureau of Vital Records.

Subsection (c) was amended by resolution adopted on June 19, 1975, which authorized the chief medical examiner or his representative to open a casket which has been disinterred without court order.

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.29 Registration of funeral directors and undertakers, and their agents.

(a) No permit or authorization pursuant to this article shall be issued or granted to a funeral director or undertaker who has not registered with the Department pursuant to subdivision (b) of this section. No certificate of death or confidential medical report shall be filed with the Department on behalf of a funeral director or undertaker except by an agent of such funeral director or undertaker who has registered with the Department pursuant to subdivision (c) of this section.

(b) A funeral director or undertaker who has a State certificate of registration pursuant to §3428 of the Public Health Law may register with the Department upon presentation of his or her State registration certificate and a government-issued picture identification of said funeral director or undertaker. The registration shall contain the registrant's name and address and the name and address of funeral establishments with which such registrant is associated, if any, and such registrant shall present evidence of such associations. The registrant shall subsequently register any change of name or address or association.

(c) An agent of a funeral director or undertaker may register with the Department upon presentation of (1) a letter of authorization in a form specified by the Department from the funeral director or undertaker who is the principal of

the agent, and (2) a government-issued picture identification of the agent.

HISTORICAL NOTE

Section renumbered and amended (former §205.35) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Former §205.29 Obtaining of permits.

Section amended City Record June 14, 1996 eff. July 14, 1996. [See Vol. 9 Statements of Basis and Purpose No. 5]

Section in original publication July 1, 1991.

Notes:

This section was amended by resolution adopted on September 22, 2009.

Former section 205.29, regarding when and where permits are obtained, has been deleted as unnecessary.

This new section 205.29 is derived from former section 205.35.

Subdivision (a) now requires that agents of funeral directors or undertakers who seek to file certificates with the Department must, in addition to the funeral directors or undertakers, register with the Department.

Subdivision (b) was amended to require presentation of a government issued picture identification, in addition to the State-issued certificate, in order for a funeral director or undertaker to register with the Department.

Subdivision (c) was added to specify the documentation that an agent must present in order to be registered with the Department. Such measures provide a greater level of security to the registration process.

Subsection (a) is derived from S.C. §46, and subsection (b) consolidates requirements in S.C. §§32(i), 33(f) and Regs. 4, 5, 6 and 9 of the General Regulations relating to S.C. §§31 to 45 that the funeral director or undertaker be registered with the Department pursuant to S.C. §46.

Subsection (b) permits any funeral director or undertaker who holds a New York State certificate to register with the Department. This conforms the Code to present practice; under previous S.C. §46 only a funeral director or undertaker "practicing" in New York City appeared to be covered. See §205.37 requiring funeral directors and undertakers to be properly employed or authorized to act.

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.31 Authority of funeral director or undertaker.

(a) No funeral director or undertaker shall apply for any permit required pursuant to this article unless he or she, or the funeral establishment with which he or she is associated, has been employed by the person in control of disposition. When applying for such permit, the funeral director or undertaker shall sign a statement on the certificate of death or fetal death which shall contain:

(1) His or her name and State license number;

(2) The name, business address and State business registration number of the funeral establishment with which he or she is associated;

(3) The name and the relationship to the decedent of the person who has employed the funeral establishment with which he or she is associated.

(b) When a funeral director or undertaker is required to notify the public administrator of a county in the City pursuant to §1113 of the Surrogate's Court Procedure Act, the employment of the funeral director or undertaker shall

first be approved by such public administrator before a burial, cremation or transportation permit may be issued.

HISTORICAL NOTE

Section renumbered and amended (former §205.37) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section, regarding the authority of funeral directors or undertakers to apply for departmental permits, is derived from former section 205.37. Subdivision (a) now uses the term "person in control of disposition" as it is newly defined in section 205.01. Paragraphs (1) and (2) were also amended to reflect gender neutrality.

Subsection (a) is derived from Reg. 4 of General Regulations relating to S.C. §§31 to 45. The class of persons who may employ a funeral director or undertaker is explicitly designated. Subsection (b) is new. See in this connection §205.21 and notes thereto.

Public Health Law §4201 gives a person "the right to direct the manner in which his body shall be disposed of after his death." For cases which indicate that such direction need not be contained in a testamentary document, see In Re Scheck's v, Estate, 172 Misc. 236, 14 N.Y.S. 2d 946 (Surrogate's Court 1939); and In Re Johnson's Estate, 169 Misc. 215, 7 N.Y.S. 2d 81, 83 (Surrogate's Court 1938). In the absence of effective directions of the deceased, the right to dispose of human remains is given to the spouse or next of kin. Generally, on this question, see Gostkowski v. Roman Catholic Church of the Sacred Heart of Jesus and Mary, 262 N.Y. 320, 186 N.E. 798 (1933); Beller v. City of New York, 269 App. Div. 642, 58 N.Y.S. 2d 112 (1st Dept. 1945); Feller et. al. v. University Funeral Chapel, Inc. et. al., 124 N.Y.S. 2d 546 (Sup. Ct. 1953); Enoch v. Ambrose, 112 N.Y.S. 2d 882 (Sup. Ct. 1952); Petition of Forrisi, 170 Misc. 649, 10 N.Y.S. 2d 888 (Sup. Ct. 1939).

Subsection (b) of §205.37 was amended by resolution adopted on September 15, 1977, to update its provisions with present law.

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 205 DEATHS AND DISPOSALS OF HUMAN REMAINS*17

§205.33 Authority of Department to withhold registration, permits and filing of certificates.

In addition to the forfeitures and penalties set forth in Articles 3 and 5 of this Code, when serious, repeated or persistent violations of any of the provisions of this Code are found, the Department may deny, suspend or revoke any registration and refuse to issue burial permits or other authorizations issued pursuant to this Article, or refuse to accept for filing certificates of death or confidential medical reports. Any funeral director, undertaker or funeral establishment, or registered agent of such director, undertaker or establishment, whose City registration is denied, suspended or revoked shall thereafter be provided with an opportunity to be heard pursuant to the rules of the Department.

HISTORICAL NOTE

Section renumbered and amended (former §205.39) City Record Sept. 28, 2009 eff. Jan. 1, 2010. [See Vol. 9 Statements of Basis and Purpose No. 40]

DERIVATION

Section in original publication July 1, 1991.

Notes:

This section was amended by resolution adopted on September 22, 2009.

This section replaced former section 205.39 and provides authority for the Department to withhold registration of funeral directors, undertakers or their agents, to refuse to issue permits or to accept certificates for filing such when serious or repeated violations of the Code are found to have been committed. When City registration is denied, suspended or revoked, an opportunity to be heard will be provided pursuant to the rules of the Department, currently found in Chapter 7 of Title 24 of the Rules of the City of New York. Such a strict enforcement mechanism will prevent abuses of the registration process.

This section is derived from Reg, 7 of General Regulations relating to S.C, §§31 to 45. Discretion to withhold issuance of a permit is vested in the Department generally rather than in the Commissioner and Registrar of Records. The last sentence of Reg. 7 which previously limited the right to withhold permits to 72 hours has been omitted.

TITLE V VITAL STATISTICS

ARTICLE 207 GENERAL VITAL STATISTICS PROVISIONS

Health Code Reg. § 207.00 INTRODUCTORY NOTES

This article supplements the three articles dealing with the reporting of vital events, ie., Articles 201,203 and 205. It provides for the correction of vital records, inspection of records, fees for searches and transcripts of records and other general matters. In addition, it contains a provision for the reporting of vital events occurring on carriers, such as ships and airplanes, which terminate their voyage in this City.

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 207 GENERAL VITAL STATISTICS PROVISIONS

§207.01 Correction of records; application and approval; accompanying docu- ments.

(a) The Commissioner or other personnel of the Department designated by him may approve the amendment of birth, termination of pregnancy or death certificate. Application shall be made on a form furnished by the Department. Application for amendment of a birth certificate shall be made by the parents or surviving parent, or by the guardian of the person whose birth certificate is to be corrected or by the person himself if he is 18 years of age or over and his parents are dead. Application for amendment of a death or termination of pregnancy certificate shall be made by the next of kin or, if there is no next of kin, by the persons authorized to arrange for burial or cremation of the remains.

(b) Every application shall be accompanied by supporting documentary evidence and by a certified copy of the certificate involved. An application for amendment of a birth certificate if made within one year of the reporting of the birth, may, however, be accompanied by a certificate of birth registration instead of a certified copy of the birth certificate.

(c) No application shall be approved unless the Commissioner or his designee is satisfied that the evidence submitted shows the true facts and that an error was made at the time of preparing and filing of the certificate, or that the name of a person named in a birth certificate has been changed pursuant to court order.

HISTORICAL NOTE

Section in original publication July 1, 1991.

Subd. (a) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis and Purpose No. 11]

Notes:

Subsection (a) is derived from Rules 1 and 5(part) of the Rules of the Board of Health on Correction of Records. The provision that an application for amendment of a death or fetal death certificate may be filed by the persons authorized to arrange for the burial or cremation of the remains, if there are no next of kin, is new. Approval may be granted by the Commissioner or his designated representative.

Subsection (a) of §207.01 was amended by resolution adopted on September 15, 1977, to conform its provisions with current related requirements.

Subsection (a) was further amended by resolution dated June 16, 1998 to reflect the age of eighteen as the age of majority, thereby making the Health Code consistent with the New York State Public Health Law.

Subsection (b), except for the last sentence which is new, is derived from Rule 3(part) and Rule 4(part) of the Rules on Correction of Records. The last sentence is designed to encourage corrections within a year.

Subsection (c) is derived without substantive change from Rules 2 and 5(part) of the Rules on Correction of Records.

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 207 GENERAL VITAL STATISTICS PROVISIONS

§207.03 Correction of records; method of amendment; adding missing information.

(a) Except as provided in §207.05, when an application for amendment is approved, a single line shall be drawn through the information subject to amendment, and the correct information shall be inserted immediately above it. The certificate shall be marked to show that it is amended, and the name of the person approving the amendment and the date thereof shall be noted on the certificate. When the name of a person is changed pursuant to court order, the new name shall be similarly inserted on the certificate together with a statement that the change of name is by court order and the date of the order. The Department may use an alternate method of recording corrections or other amendments to electronic records or forms. The history of these electronic corrections or amendments shall be clearly recorded within the electronic record or form by the Department.

(b) Within one year following the filing of a birth, termination of pregnancy or death certificate, any missing information may be added upon submission of the information on a form furnished by the Department by any person authorized to file an application for amendment pursuant to §207.01. After one year following the filing of a certificate, however, missing information shall be added only upon approval of an application for amendment in the manner specified in §207.01.

HISTORICAL NOTE

Section in original publication July 1, 1991.

Subd. (a) amended City Record July 1, 1998 eff. July 31, 1998. [See Vol. 9 Statements of Basis and Purpose No. 11]

Notes:

Subsection (a) is derived without substantive change from Rule 7(c), (d) and (e) of the Rules on Correction of Records.

Subsection (a) was amended by resolution adopted on June 16, 1998 to allow corrections to certificates or records filed via authorized electronic means to be recorded in a technologically feasible and accurate manner. The "strike-out" method of noting corrections and the history of amendments on paper forms could not be utilized for electronic forms. With the changes to subsection (a) the Department would be enabled to employ an alternative method for noting electronic changes and corrections, while ensuring that the history of these amendments is reflected in the electronic record or form.

Subsection (b) is derived without substantive change from Rule 6 of the Rules on Correction of Records.

Subsection (b) of §207.03 was amended by resolution adopted on September 15, 1977, to conform its provisions with current related requirements.

TITLE V VITAL STATISTICS

ARTICLE 207 GENERAL VITAL STATISTICS PROVISIONS

§207.05 Correction of records; filing of new birth certificates.

(a) A new birth certificate shall be filed when:

(1) Proof is submitted to the Department that the previously unmarried parents of a child have intermarried subsequent to the birth of such person; or,

(2) Notification is received by the Department from the clerk of a court of competent jurisdiction or proof is submitted of a judgment, order or decree relating to the parentage of the person; or,

(3) Notification is received by the Department from the clerk of a court of competent jurisdiction or proof is submitted of a judgment, order or decree relating to the adoption of the person. Every new birth certificate filed because of adoption shall bear a statement that it is filed pursuant to §567-2.0(a)(3) of the Administrative Code; or,

(4) A putative father of a child consents under oath to the filing of a new birth certificate bearing his name as the father of the child born out of wedlock; or,

(5) The name of the person has been changed pursuant to court order and proof satisfactory to the Department has

been submitted that such person has undergone convertive surgery.

(b) When a new birth certificate is filed pursuant to subsection (a) of this section, the original birth certificate, the application for a new birth certificate and supporting documents shall be placed under seal, and such seal shall not be broken except by order of a court of competent jurisdiction. Thereafter, when a certified copy is requested of the certificate of birth of the person for whom a new certificate has been filed pursuant to the provisions of this section, a copy of the new certificate of birth shall be issued, except when an order of a court of competent jurisdiction requires the issuance of a copy of the original certificate of birth.

(c) A new birth certificate may be filed when an application for amendment is submitted within three months after the report of birth, or when the Commissioner or other personnel of the Department designated by him finds it desirable by reason of the nature and extent of the amendments. In such a case, the original certificate shall be filed with the application for amendment.

HISTORICAL NOTE

Section in original publication July 1, 1991.

Notes:

Subsections (a) and (b) are derived without substantive change from Rule 7(a)(1) of the Rules on Correction of Records and are based on Administrative Code §567-2.0. The term "unmarried parents" as used in subsection (a)(1) of this section is interpreted as meaning "single parents"; to interpret the term otherwise would be contrary to the interpretation of an identical provision of the Public Health Law §4138(1)(a), 1944 Opinions of Attorney General 253 (1st case), and might result in jeopardizing possible rights of the child concerned. See, in this connection, Melis v. Department of Health, 260 App. Div. 772, 24 N.Y.S. 2d 51 (1st Dept. 1940) in which the court held that a finding of nonpaternity made by the Family Court in an action for support was not binding on the child, inasmuch as she was not a party to the proceedings. The court further held that in a declaratory action which is appropriate to determine legitimacy and parentage "the infant whose rights are paramount, should be made a party in the manner provided by law (§225 Civil Practice Act) and a guardian ad literm appointed to protect its interests." 260 App. Div. at 775, 24 N.Y.S. 2d at 55. In P.v. Department of Health, 200 Misc. 1090, 107 N.Y.S. 2d 586 (Sup. Ct. 1951) which involved an application by P for the issuance of a new certificate stating that P was the father of the infant, instead of H who was the husband of the infant's mother, the court required the appointment of a special guardian to represent the child. The court maintained that it is not warranted "in ignoring the child's right to be represented or heard in a proceeding which may have a lasting bearing on the child's parentage." Note too that it is well established that the presumption of legitimacy will be overcome only by clear and convincing evidence. In re Lentz, 247 App. Div. 31, 283 N.Y.S. 749 (2d Dept. 1935). Anonymous v. Anonymous, 208 Misc. 633, 143 N.Y.S. 2d 221 (Sup. Ct. 1955). It is equally well established that spouses may not testify to nonaccess during their marital union. Commissioner of Welfare v. Koehler, 284 N.Y. 260, 30 N.E. 2d 587 (1940).

Subsection (a) was amended by resolution adopted on December 16, 1971 which added subdivision (5).

Subsection (c) is derived without substantive change from Rule 7(a)(2) and 7(b) of the Rules on Correction of Records.

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 207 GENERAL VITAL STATISTICS PROVISIONS

§207.11 Inspection of records; transcripts.

Except as provided in §§201.07, 203.07 and 205.07, inspection of records filed with the Department may be made and transcripts of records may be obtained pursuant to the provisions of §3.27 of this Code and §17-169 of the Administrative Code, respectively. No paper, file, report, record or proceeding concerning a death shall, however, be open to inspection except to a person, or to his representative who shall be an agent or other person having a legal or fiduciary obligation to such person, who has a personal interest therein as a relative, next of kin, heir or beneficiary, of a deceased person to whom the records pertain, or to a person who has a vested right in property by reason of the death of the person to whom the records pertain, or who otherwise establishes that such inspection or transcript is necessary or required for a judicial or other proper purpose, or to prevent the misuse or misappropriation of City, state or federal governmental funds. Inspection of records for the collection of information for sale or release to the public, or for other commercial or speculative purposes shall not be deemed a proper purpose. The Department may impose reasonable conditions as to the use and redisclosure of information, and may limit access to the minimum necessary to fulfill the purpose for which information is requested.

HISTORICAL NOTE

Section in original publication July 1, 1991.

Notes:

This section is new except for the last sentence which is derived without substantive change from the Department Rules and Regulations as to Publicity, Time and Manner of Inspection of the Papers, Files, Reports, Records and Proceedings of the Department of Health (Adopted February 16, 1938).

This section was amended by resolution adopted on September 15, 1977, to conform and update its provisions with the presently required practice of the Bureau of Vital Records.

This section was last amended by resolution adopted on September 15, 1977 to eliminate reference to marriage records over which the Department no longer had jurisdiction.

The restriction concerning inspection of records of death to one "who otherwise establishes some personal right or interest therein" may be found in the Rules and Regulations of the Department adopted February 18, 1938.

This section was further amended by resolution adopted on May 12, 1988. The amendment is intended to incorporate the regulations of the New York State Department of Health, §35.4, relating to "judicial or other proper purposes," to clarify the meaning of the term "personal right or interest," and to allow appropriate disclosures to avert the misuse of governmental funds.

Rules of the City of New York

24 RCNY 207.13

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 207 GENERAL VITAL STATISTICS PROVISIONS

§207.13 Fees for searches and transcripts of records.

(a) The Department shall charge fees for searches and transcripts as follows: (1) For a search of two consecutive calendar years under one name and for issuance of a certified copy of a certificate of birth, death, or termination of pregnancy, or a certification of birth or death, or a certification that the record cannot be found, the fee is $5.00 for each copy.

(2) For each additional calendar year search, if applied for at the same time or within three months of the original request and if proof of payment for the basic search is submitted, the fee is $1;

(3) For a certified copy of the reverse side of a death certificate issued at the same time as a copy of the face of the certificate, the fee is $2;

(4) For a two calendar year search under one name for documents relating to transportation of human remains and the issuance of a certified copy of one side of a document, the fee is $3 and for each certified copy of an additional side, the fee is $1.50; and,

(5) For consulting indexes to vital statistics records, in accordance with the provisions of §3.27(e), the fee is $5 for each day or part thereof. The fee for consulting such indexes for one year is $100, which shall enable the applicant to designate not more than two representatives to consult such indexes on his behalf.

(b) When the Board permits inspection or disclosure of information contained in a confidential medical report of birth, termination of pregnancy or death, fees shall be charged as follows:

(1) For a search of two consecutive calendar years under one name and for issuance of an uncertified copy of the certificate and confidential medical report, if found, the fee is $2.50. For each additional year searched the fee is $1.

(2) When the certificate number is furnished or search is made by the person or a representative of the person to whom approval has been granted, the fee for an uncertified copy of the certificate and confidential medical report is $1.

(c) Upon proper application by an authorized person, the Department shall exchange a certified copy of a birth or death certificate or a certification that such a record cannot be found for a certification of birth or death, and a certification of birth or death or a certification that such a record cannot be found for a certified copy of a birth or death certificate, without charge, when application is made within three months of the issuance of the certification that a record cannot be found or of the certified copy or certification to be exchanged.

(d) When application for searches and issuance of transcripts is made by any agency of the government of the United States, a voucher for future payment of required fees may be accepted by the Department instead of immediate payment of fees.

(e) The Department shall make searches and issue certified copies or transcripts without charge when:

(1) Requested for official purposes by any agency of the City or State or of any other political subdivision of the State; or,

(2) Requested pursuant to §1384-n of the Civil Practice Act in connection with an application for benefits available from the Veterans Administration, if written proof of the application is first submitted; or,

(3) Requested in connection with applications for allowances for dependents of persons in the armed forces of the United States, in connection with an induction or enlistment into any armed force of the United States, or in connection with an application for a veterans' bonus pursuant to any law of the State, if written proof of the application, induction or enlistment is first submitted; or,

(4) Requested by an officer of the New York Society for the Prevention of Cruelty to Children for use in court cases; or,

(5) The Commissioner or the person in charge of the office of the Department designated to receive vital records, for good cause, so directs.

(f) The Department may issue without charge verifications of information contained on records filed with the Department when requested by an agency of the City, State, the government of the United States, any state, territory or possession of the United States or any political subdivision thereof, the government of the District of Columbia, or by charitable or social welfare organizations or agencies.

(g) The Department shall, effective January 1, 2010, charge an application fee of $40.00 to correct or amend birth or death certificates as follows:

(1) Adding a given name more than 60 days after birth

(2) Correcting birth and death certificate errors and omissions made by family members and informants

(3) Correcting hospital birth certificate errors and omissions after 12 months

(4) Correcting funeral home errors

(5) Correcting funeral home omissions filed after 12 months

(6) Amending a birth certificate for an adoption

(7) Amending a new birth certificate for a person who has undergone convertive surgery

(8) Re-submitting an application more than 1 year after rejection

(h) The Department shall, effective January 1, 2010, charge a fee of $40.00 for disposition permits issued pursuant to Article 205, except those for burials in the City cemetery.

HISTORICAL NOTE

Section heading amended City Record Sept. 28, 2009 eff. Oct. 28, 2009. [See Vol. 9 Statements of Basis and Purpose No. 42]

Section in original publication July 1, 1991.

Subd. (g) added City Record Sept. 28, 2009 eff. Oct. 28, 2009. [See Vol. 9 Statements of Basis and Purpose No. 42]

Notes:

This section was amended by resolution adopted on September 22, 2009. The section was re-titled as "Fees for vital statistics services" and new subdivisions (g) and (h) were added to include fees for corrections of birth and death certificates and for disposition permits issued pursuant to Article 205. The fees are based on cost analyses to partially recover the Department's costs in performing these functions.

This section is derived from the Rules of the Board on Fees for Searches and Transcripts.

Subsection (a) prescribes basic fees to be charged.

Subsection (a) was amended by resolution adopted on February 26, 1962 so as to increase the fee for a certified copy of a birth from $1.00 to $2.00, the fee for each additional calendar year search from 25 cents to 50 cents and for a two year calendar search for documents relating to transportation of human remains from $1.00 to $2.00.

Subdivision (1), except for the last clause, is derived from Rules 1 and 3, and adds provisions for searches for certificates of fetal death, for which Rules 1 and 3 did not provide. The term "record" has been changed to "certificate." The fee is set for a search covering two consecutive years, rather than one year, to conform to the long-standing Department practice in making such searches. The last clause providing that the hourly fee be charged unless all the required information is given on the application is new.

Subdivision (2) is derived from Rule 2; the period within which application must be made has been changed from "ninety (90) days" to "three months."

Subdivision (3) is derived from Rule 4; "record" has been changed to "certificate."

Subdivision (4) is derived without substantive change from Rule 5.

Subdivision (5) is derived from Rule 8. The hourly fee has been raised from $1.00 to $2.00. The rule applies to searches for all records, instead of death records only.

Subsection (a) was further amended by resolution adopted on November 19, 1963 which added subdivision (6). It was further amended by resolution adopted on May 21, 1970 so as to increase all of the fees prescribed by that subsection to the amounts now therein provided. Subdivision (1) of subsection (a) was further amended by resolution of December 22, 1972 which changed the fee for certified copies of a certificate of death from $2.50 for the first copy and $1.25 for each additional copy ordered at the same time to $2.25 for each copy.

Subsections (a) and (b) were further amended by resolution adopted on February 20, 1975 to increase all the fees prescribed by such subsections to the amount now therein provided to reflect, in part, the increased costs of providing the searches and transcripts of vital statistics records.

Subsections (a) and (b) were amended by resolution adopted September 15, 1977, to update their provisions and conform them to the presently required practice of the Bureau of Vital Records.

Paragraph (1) of subsection (a) was further amended by resolution adopted on May 29, 1980 to increase the fees for copies of birth and death certificates to reflect, in part, the increased cost of providing these copies, and in addition to help eliminate administrative problems and facilitate the processing and issuance of birth and death certificates.

Paragraph (1) of subsection (a) was amended by resolution adopted on June 16, 1986 to increase the fee for providing the documents specified in said paragraph to reflect the cost to the Department and deletes the reference to a fee for each hour, or part thereof, for a search based upon inadequate information because of its extremely limited use. In addition, the amendment provides conformity with new §205.06 adopted on the same date.

Subsection (b) is derived from Rule 19. No fee is to be charged for information furnished from confidential medical reports unless a fee is set by the Board resolution permitting the disclosure. Rule 19 required payment of a specified fee unless the Board resolution stated that no fee is to be charged.

It was amended by resolution adopted on June 25, 1962 which established the fees for searches and copies of certificates.

Subsection (c) is derived from Rule 6. The subsection provides for the issuance of a certified copy of a birth certificate or a certification of birth without charge whenever a "not found" statement, a certification of birth or a certified copy of a birth certificate is surrendered, respectively. The provision for "not found" statements applies when subsequent information is furnished and the record is in fact found. Rule 6 provided only for the issuance of the "certified copy of a birth certificate and a surrender of a certification of birth." A limitation of three months during which such application for exchange may be made has been added. The term "Upon a proper application" has been expanded by making specific reference to §567-4.0 of the Administrative Code.

Subsection (c) was amended by resolution adopted on June 16, 1986 to conform with §205.06 adopted on the same date.

Subsection (d) is derived from Rule 9. The provision has been simplified to provide that the Department may accept United States government vouchers instead of immediate payment of fees. The last sentence of Rule 9 relating to free orders for searches for investigations by the War and Navy Departments has been omitted.

Subsection (e) authorizes searches and issuances of certified copies or transcripts without fee, in appropriate cases.

Subdivision (1) is derived from Rule 10 and has been expanded to include any political subdivision of the State, such as other municipalities or county governments within New York State.

Subdivisions (2) and (3) are derived from Rule 11 with some deletion of unnecessary detail.

Subdivision (4) is derived without substantive change from Rule 13.

Subdivision (5) is derived from Rule 16. General discretionary authority to waive fees is vested in the Commissioner or the director of the Bureau of Records and Statistics (or the person holding the equivalent of that office). The phrase "for good cause" replaces "extreme poverty" previously used.

Subsection (f) is derived from Rule 15. The following clause of that rule has been omitted: "but the Registrar of Records in issuing a verification shall have in mind the purpose of Chapter 584 of the Laws of 1936, relative to disclosure of the names of the parents."

TITLE V VITAL STATISTICS

ARTICLE 207 GENERAL VITAL STATISTICS PROVISIONS

§207.17 Certificates and reports; legibility and correctness.

Every certificate of birth, termination of pregnancy and death, and every confidential medical report which is not filed electronically in accordance with other provisions of this Code shall be filled out legibly on typewriter or with permanent black ink and shall be properly signed. No certificate or report shall be accepted which is imperfectly filled out, or on which a felt-tipped type of pen has been used, or if it has been corrected, interlined or altered in any manner.

HISTORICAL NOTE

Section amended City Record Mar. 23, 1995 eff. Apr. 22, 1995. [See Vol. 9 Statements of Basis and Purpose No. 1]

Section in original publication July 1, 1991.

Notes:

This section is derived from the first sentence of Reg. 1 of the General Regulations relating to S.C. §§31-45. The

prohibition of ball point pens is new.

Section 207.17 was amended by resolution adopted on September 15, 1977, to conform its provisions with current related requirements.

This section was previously amended by resolution adopted on September 15, 1997 to conform its provisions to then-current requirements. It was further amended by resolution adopted on March 14, 1995 to refer to birth certificates required to be filed electronically pursuant to subsections (c), (d), (e) and (f) of §201.05.

24 RCNY 207.19

RULES OF THE CITY OF NEW YORK

Title 24 Department of Health and Mental Hygiene

Health Code of the City of New York

TITLE V VITAL STATISTICS

ARTICLE 207 GENERAL VITAL STATISTICS PROVISIONS

§207.19 Births, termination of pregnancy and deaths on buses, train, ships and airplanes.

When a birth, termination of pregnancy or death occurs on a bus, train, ship or airplane which terminates a voyage, trip or flight at a terminal in The City of New York, the person in charge or the owner of such bus, train, ship or airplane shall file with the Department a certificate of such birth, if the child is brought into the City, or a certificate of termination of pregnancy or death if the remains are brought into the City. A certificate of birth occurring on a ship or airplane during any voyage, trip or flight which terminates at a terminal in the Port of New York, but not in The City of New York, may be filed with the Department if the child is brought into the City. Certificates, on a form prescribed by the Board and furnished by the Department, shall be filed with the Manhattan office of the Department within 24 hours following the arrival of the bus, train, ship or airplane. Certificates shall contain such information as the Board may require, including the specific location or the latitude and longitude where such event took place and whether the event occurred on land, at sea, or in the air.

HISTORICAL NOTE

Section in original publication July 1, 1991.

Notes:

This section is derived from S.C. §350. The section expands the scope of S.C. §350 in that it is made applicable to vital events on buses and trains coming into the City. Fetal deaths are now covered in addition to births and deaths. Subsection (4) of S.C. §350 requiring the keeping of a special register has been omitted as a matter of intra-Departmental administration.

Section 207.19 was amended by resolution adopted on September 15, 1977, to conform its provisions with current related requirements.

TITLE V VITAL STATISTICS

ARTICLE 207 GENERAL VITAL STATISTICS PROVISIONS

APPENDICES

APPENDICES

(The following materials from the City Charter, Administrative Code and other law or regulation are included in this edition of the New York City Health Code for easy reference).

Rules Governing the Examination, License and Conduct of the Business of Master Plumber

Rules for the Examination, Licensing and Procedure Relating to Motion Picture Theater Matrons

Regulations Governing the Business of Supplying Inhalation Therapy Service and Additional Regulations Governing the Examination and Issuance of Certificates of Competency for Technicians and Supervising Technicians in Inhalation Therapy Service

RULES GOVERNING THE EXAMINATION, LICENSE

AND CONDUCT OF THE BUSINESS OF

MASTER PLUMBER

Regulations of the City Civil Service Commission and the

Commissioner of Health for the Examination,

Licensure and Conduct of the Business of Master Plumber.

Reg. L.M.P.1 Effective date and applicability.

L.M.P.1.1 These regulations shall be effective September 1, 1960. They shall be applicable to the examination, licensure and conduct of the business of Master Plumber and shall supersede all prior rules pertaining thereto.

Reg. L.M.P.2 Applications.

L.M.P.2.1 Any person desiring to obtain a license from the Commissioner of Health to engage in the business of Master Plumber shall file an application for examination with the City Civil Service Commission during the period fixed by such Commission. The signed application shall be in the handwriting of the applicant on the form prescribed by the Commissioner and shall give such information as to citizenship, character, education, previous employment, training and fitness as may be required. False or misleading statements may be cause for rejection and possible disqualification of the candidate from taking future license examinations and from holding any position or employment with the City of New York.

L.M.P.2.2 A defective application shall be suspended and the applicant notified of the particulars wherein it requires correction. Corrections must be made within five days after such notice.

L.M.P.2.3 The City Civil Service Commission shall fix the period of not less than two weeks during which applications shall be received. Notice that applications will be received shall be advertised by the Commission for at least two weeks prior to the final date for the receipt of the applications daily in the City Record and, in the discretion of the Commissioner of Health, in such other publications as he may designate.

Reg. L.M.P.3 Qualifications.

L.M.P.3.1 Every person applying for a Master Plumber's License shall

(a) be a citizen of the United States

(b) be thoroughly proficient in reading and writing the English language, and

(c) have not less than ten years' experience in the plumbing industry in the United States, or possess a technical degree in engineering from a college or university approved by the Regents of the University of the State of New York and three years of the specified experience.

Reg. L.M.P.4 Examinations.

L.M.P.4.1 Examinations shall be conducted at least one each year. They shall be under the direction of the director of examinations and be conducted, insofar as practicable, in conformity with the procedure of the Department of Personnel with respect to other license examinations conducted by it.

L.M.P.4.2 The examination shall be designed to determine the merit and fitness of applicants, and shall include a written test, a practical test, and such inquiry into the applicant's reputation, character, responsibility and past experience

as the City Civil Service Commission may require.

Reg. L.M.P.5 Examination fee.

L.M.P.5.1 An examination fee of $20 shall be paid by the applicant at the time of filing his application. This fee shall entitle the applicant to take one written test and if he attains a passing rating, to take one practical test. In the event that he fails such practical test, the applicant shall be permitted to take two additional practical tests provided the applications for these practical tests are filed not later than two years from the date of the written test. A separate application and a $10 fee must be filed for each of the subsequent practical tests.

Reg. L.M.P.6 Appeals.

L.M.P.6.1 Claims of manifest error in the rating of an examination must be made to the City Civil Service Commission in writing within two months after the date of the mailing of the failure notice to the candidate. They shall be considered in the manner prescribed for other license examinations.

Reg. L.M.P.7 Committee of plumbing industry.

L.M.P.7.1 Not later than the 15th day of December in each year the director of examinations, in the manner prescribed by law, shall select a committee of the plumbing industry to assist the Commission in the conduct of examinations for the ensuing calendar year.

L.M.P.7.2 To be eligible for recognition by the City Civil Service Commission and the Commissioner of Health as an established Master Plumber association in accordance with the provisions of Section 816-2.0 of the Administrative Code, such association, if not heretofore thus recognized, must (1) have been incorporated under the laws of the State of New York, (2) have a paid-up membership of not less than 100 members on the date of application, (3) have been an active organization for a period of not less than five years immediately preceding the date of application, (4) have not more than 10 percent of its membership affiliated with any other recognized Master Plumber association, and (5) have as its officers or directors persons who are not members of any other recognized Master Plumber association.

Reg. L.M.P.8 Issuance of licenses and metal plates-fees.

L.M.P.8.1 Upon the certification of the City Civil Service Commission that an applicant has qualified as a Master Plumber, the Commissioner of Health shall, except for good cause, issue to the applicant a Master Plumber's license upon payment of a fee of $5.

L.M.P.8.2 (a) In order to engage in the trade, business or calling of a duly registered and Licensed Master Plumber, the licensee shall, before registering with the Department of Buildings, apply to the Commissioner of Health for a "LICENSED PLUMBER" metal plate which shall be issued for the premises designated in the application upon payment of a fee of $5. All "LICENSED PLUMBER" metal plates shall be renewed annually by the Commissioner of Health during the month of January upon payment of a fee of $2.

(b) Where the metal plate has been lost, and an affidavit is submitted establishing such fact, a new metal plate shall be issued by the Commissioner of Health upon a new application and payment of a fee of $5.

Reg. L.M.P.9 Metal plates regulated.

L.M.P.9.1 (a) Not more than one "LICENSED PLUMBER" metal plate shall be issued to any Licensed Master Plumber.

(b) A metal plate shall not be issued for the conduct of business at any premises located in a residence district as provided for on the use district map and in the use district map designated rules accompanying the zoning resolution of the City of New York.

(c) The Commissioner of Health shall reserve the right to refuse to issue or renew a metal plate to any Licensed Master Plumber who fails to display prominently to the public on the window of the place of business, designated in his application or on a sign securely attached to the said premises, his full name with the words "Licensed Plumber" immediately thereunder and, if the business is conducted under a trade name or a co-partnership or corporation, such trade name or a co-partnership or a corporation name immediately above his full name. Any vehicle and/or stationery used in conjunction with such business shall have prominently lettered thereon, his full name, the words "Licensed Plumber," metal plate number and business address.

(d) The metal plate when issued shall be kept prominently displayed to the public at the place of business designated in the application. The metal plate shall not be transferred to another address nor shall it be transferred to or displayed in connection with any co-partnership or corporation of which the holder of such plate may become a partner or officer, without first notifying the Commissioner of Health in writing and receiving his written approval thereof. A Master Plumber wishing to engage in the plumbing business as a corporation or partnership or using a trade name shall file such documents as may be required with the Commissioner of Health, showing financial control and responsibility for the performance of plumbing work in accordance with the Administrative Code of the City.

L.M.P.9.2 A person retiring from business as a Master Plumber shall surrender to the Commissioner of Health his metal plate. In the event of the decease of a Master Plumber who was engaged in the plumbing business under a metal plate issued by the Commissioner of Health, his legal representative may, with the consent of the Commissioner of Buildings, carry on and complete all unfinished work of said Licensed Master Plumber for which plans have been filed and approved provided that such work is supervised by a duly Licensed Master Plumber and is completed within one year from the date of death. Such legal representative shall submit an affidavit to the Commissioner of Health, setting forth all the particulars, and if satisfactory, the Commissioner of Health may authorize the retention of the metal plate without any further fee for renewal or otherwise until the completion of said work but not for a greater period than one year as hereinbefore stated.

L.M.P.9.3 All plumbing work shall be installed in accordance with the rules and regulations of the Administrative Code and the Health Code of the City of New York and shall be performed by a licensed and registered Master Plumber or, under his supervision, by his employees or by the employees of the corporation or partnership with which such plumber is associated in conformity with L.M.P.9.1(d).

L.M.P.9.4 A licensed Master Plumber to whom a metal plate has been issued and any corporation or partnership with which he is associated shall not loan, rent, sell or transfer the privileges of such metal plate to any person for the performance of plumbing work.

Reg. L.M.P.10 Revocation, suspension or cancellation of license.

L.M.P.10.1 The Commissioner of Health may at any time revoke, suspend or cancel the license of a Master Plumber for cause, after notice and hearing to the licensee. A Licensed Master Plumber, upon receiving notice that his license and metal plate has been revoked or suspended, shall immediately surrender to the Commissioner of Health his license and metal plate.

Reg. L.M.P.11 Additional regulations.

L.M.P.11.1 The Commissioner of Health and the City Civil Service Commission may prescribe additional regulations governing the examination and conduct of the trade, business or calling of registered and Licensed Master Plumbers. Said regulations shall be separate and distinct from these regulations, but shall in no wise conflict therewith.

Reg. L.M.P.12 Enactment and amendment of regulations.

L.M.P. 12.1 These regulations and all amendments thereto shall not become effective until public notice thereof shall have been given in the City Record for not less than three days and a public hearing held thereon.

RULES FOR THE EXAMINATION, LICENSING AND

PROCEDURE RELATING TO MOTION PICTURE

THEATRE MATRONS

Rule 1 Application.

An applicant for examination for the license of a Motion Picture Theatre Matron shall, before being examined, file with the Commissioner of Health an application on such forms as may be prescribed and shall furnish such information as may be required. All applications shall be filled out in the handwriting of the applicant and must be accompanied by two photographs of the applicant, not to exceed 1 1/2 inches square.

Rule 2 Qualifications.

Every applicant for a license shall be at least 21 years old.

Rule 3 Examinations.

The examination of the applicant shall consist of an oral interview and/or written examination relating to the statements furnished in the application and shall include a tuberculin skin test. A chest X-ray examination to determine that the applicant is free from tuberculosis in a communicable form shall be required in cases of a positive skin test.

Rule 4 Licenses: Duration-Revocation.

Licenses shall be issued for a period of not more than three (3) years and shall be deemed revoked at the expiration date thereof unless renewed. Licenses may be revoked and/or shall be surrendered to the Commissioner of Health for cause or upon such other grounds as the Commissioner of Health may deem proper.

Rule 5 Fees.

The fee for the license of motion picture theatre matron together with identification badge shall be two ($2.00) dollars. The license shall at all times be displayed in the cashier's booth of the motion picture theatre where and while the matron is on duty.

Rule 6 Identification.

All matrons while on duty in a theatre shall wear a white uniform and shall display on the left breast thereof the licensed matron's identification badge issued by the Commissioner of Health.

Notes:

The rules for the examination, licensing and procedure relating to motion picture theatre matrons were adopted by resolution on March 8, 1943, filed with the City Clerk on March

10, 1943, pursuant to Administrative Code §B32-30.0 which provides as follows:

§B32-30. Licensed matrons, fee--a. Each theatre licensed under the provisions of this article shall provide at least one matron who shall be in attendance at all times when such unaccompanied children are present.

b. Each such matron shall be licensed by the Department of Health which shall furnish appropriate means of identification which shall be worn conspicuously while such matron is in attendance.

c. Each applicant for such license shall qualify by such physical or other examinations as the Commissioner of

Health shall prescribe, as relevant to the functions to be performed by such matron.

d. The fee for such license shall be two dollars and shall be paid to the Department of Health.

e. Any person qualified as a school teacher on any existing civil service list, or any registered nurse shall be entitled to such matron's license and no fee shall be required of her."

REGULATIONS GOVERNING THE BUSINESS OF

SUPPLYING INHALATION THERAPY SERVICE

Reg. 1 Application for a Purveyor's License.

(a) Application for a purveyor's license to conduct the business of supplying inhalation therapy service as provided in section 561-3.0 of the Administrative Code of the City of New York, shall be made by the owner on forms furnished by the Department of Health.

(b) In the application the purveyor shall state the address of the principal place of business and, if the purveyor conducts any branch office or place of business, the address or addresses thereof, together with the permit number and date of issuance to the purveyor of the Fire Department permit to store combustibles and dangerous materials at each of said premises where such materials are stored.

Reg. 2 License.

(a) The license shall be issued by the Commissioner of Health for a particular individual, firm or corporation and for the designated principal place of business and branch offices or places of business mentioned in the license and shall not be valid for use by any other person or at any place other than that for which issued, and any transfer as to person or place shall forthwith revoke and terminate such license.

(b) The license shall be conspicuously displayed on the premises designated therein as the principal place of business and a certification of such license, issued by the Department of Health shall be conspicuously displayed at each branch office designated on the license.

Reg. 3 Supervising Technicians.

(a) Every purveyor shall have at least one supervising technician at each place of business from which inhalation therapy equipment is supplied or distributed, who shall be available at all times.

(b) The supervising technician shall be the technical supervisor or director of the inhalation therapy service of such purveyor and he shall supervise the technicians who operate the inhalation therapy equipment of such purveyor or for such purveyor. The supervising technician shall be in charge of the proper operation and servicing of the inhalation therapy equipment.

(c) It shall be the duty of the purveyor to file with the Commissioner of Health within 48 hours after the employment of a supervising technician, a notice of such employment giving the full name and address of the supervising technician, his current certificate of competency number, and the date of commencement of employment. A similar notice of termination of employment shall likewise be filed by the purveyor within 48 hours after the termination of employment of a supervising technician.

Reg. 4 Technicians.

(a) Every purveyor shall employ as many technicians as may be necessary to properly operate the inhalation therapy equipment of such purveyor.

(b) No technician shall operate inhalation therapy equipment of a purveyor or for a purveyor except under the general supervision of a supervising technician of such purveyor.

Reg. 4A

Where purveyors' licenses or supervising technicians' or technicians' certificates of competency have been revoked for cause by the Commissioner of Health, such licenses, supervising technicians' or technicians' certificates of competency shall be surrendered forthwith to the Commissioner of Health by the holders thereof.

Reg. 5 Gas Cylinders and Storage Thereof.

(a) No cylinder containing gas shall be received or used for inhalation therapy service unless it complies with the following:

1. It conforms with the standards and specifications of the Interstate Commerce Commission applicable to such cylinders.

2. It shall be conspicuously marked with the chemical name of the gas in lettering having a height not less than one twenty-fifth (1/25) of the diameter of the cylinders and a minimum height of one-eighth (1/8) inch. Whenever practicable the name of the gas shall appear on the shoulder of the cylinder. It shall be legibly marked with the name and place of business of the manufacturer. All such markings shall be by means of stenciling, stamping or labeling, and of as permanent a nature as practical.

3. On and after January 1, 1945, the upper portion, preferably the shoulder of the cylinder, is painted with the distinguishing color to correspond with the gas contained as herein indicated:

[See tabular material in printed version]

4. (a) In the case of oxygen, it is of the high pressure type with a capacity of at least 220 cubic feet or 6,000 liters, at 2,000 pounds per square inch gauge pressure and 70 degrees Fahrenheit, or in the case of half size cylinders, 110 cubic feet at 2,000 pounds per square inch gauge pressure and 70 degrees, Fahrenheit. The provisions of this paragraph shall not become effective until January 1, 1947, but during the period until such effective date, no cylinder with less than 1,800 pounds per square inch gauge pressure shall be supplied. The limitations as to sizes of cylinders of oxygen permitted do not apply to the use of oxygen in cases of emergencies, or for first-aid resuscitation, or for use by ambulatory patients.

(b) The gas contained in a cylinder furnished or used for inhalation therapy shall contain not less than 20 percent of oxygen in the case of helium-oxygen mixtures and not less than 90 percent oxygen in the case of carbon dioxide-oxygen mixtures. Cylinders with mixtures of gases shall be labeled to show the proportion of each gas present in terms of percent by volume.

(c) Every cylinder of carbon dioxide or helium, kept, stored or used by a purveyor, shall comply with the requirements contained in subdivision (a) and on and after January 1, 1945, the upper portion, preferably the shoulder of such cylinders, shall be painted with the distinguished color grey in the case of carbon dioxide and brown in the case of helium gas.

(d) All gases furnished or used in inhalation therapy must comply with the United States Pharmacopoeia standards of purity where such standards exist and where a mixture of gases is used each component of such mixtures must comply with said standards.

(e) Adequate space, which shall be clean, dry and away from hot radiators, hot steam pipes, the sun and other sources of heat, shall be provided and used for the storage of cylinders.

(f) Cylinders shall be properly labeled giving the approximate gas contents, and empty cylinders shall be stored separately from full or partly full cylinders.

(g) The valve on every cylinder of a capacity over 50 cubic feet of gas, except when in use, shall be kept covered with a cylinder valve protective cap.

(h) A strict compliance with all fire laws, regulations and ordinances governing the storage of gases or combustible and dangerous materials shall be maintained at all times.

Reg. 6 Regulators.

(a) Every cylinder or group of cylinders of gas, when made ready for use for inhalation therapy service, shall have attached thereto an accurate pressure reducing and regulating mechanism, calibrated to measure flow of gas in liters per minute and shall be equipped with a high pressure gauge to show pressure in the cylinder or group of cylinders.

(b) Before use on each case the regulating mechanism shall be tested for accurate working conditions at the rates of 5 and 10 liters per minute by recognized methods for testing gas flow. The flow meter shall not have an error of more than 10 percent at any of said points and the indicator shall return to zero when the cylinder valve is completely closed.

(c) The flow meter shall be calibrated for the particular gas for which it is to be used.

(d) Regulators, when not in use, shall be protected against dust entering the intake and shall be stored in clean closed cabinets or a satisfactory dust protecting substitute.

(e) Tests for leaks in the regulator shall be made and any leaks found shall be repaired.

(f) A regulating mechanism that has been used on a cylinder of pure carbon dioxide or helium shall not be used on a cylinder containing pure oxygen or mixtures of oxygen with helium or carbon dioxide.

Reg. 7 Tents: Sanitary Condition and Testing.

(a) All tents, that is the cabinet (cooling unit) and the canopy, used for inhalation therapy service shall be maintained in a clean, sanitary condition and in good repair.

(b) No electrical apparatus or appliance used for supplying inhalation therapy service shall be employed unless they have been submitted for examination and a written approval has been obtained from the Commissioner of the Department of Water Supply, Gas and Electricity, as far as the electrical features are concerned.

(c) The cabinet of every motor driven tent, after each use and at least once a month while not in use, shall be checked for:

1. motor failure,

2. temperature control,

3. drainage, if ice is used,

4. leakage of gas by recognized tests, and

5. obstructions which inhibit the free passage of circulation of tent atmosphere.

(d) The cabinet of every thermal tent before being delivered for use shall be checked for drainage if ice is used, for leakage of gas and for any obstruction in the thermal circulating system.

(e) No equipment shall be used unless it is in good condition and capable of maintaining continuously in the closed canopy 45 percent oxygen concentration at a flow of 12 liters per minute.

(f) The equipment shall be tested at the place where it is being installed following installation and prior to the departure of the technician to determine whether it does maintain such oxygen concentration in the closed canopy as has been prescribed for the patient.

Reg. 8 Tents When in Use, Inspections and Charts.

(a) Every tent when in use shall be inspected and checked by a technician of the purveyor to determine the oxygen concentration, temperature and whether the tent is functioning properly, at least twice each day or more often, if necessary.

(b) A record shall be kept on a chart, attached to or near the patient's bed, upon which the technician on each visit or inspection shall enter the date and time of the visit or inspection, the temperature, the liter flow, the oxygen concentration, and such other information as may be necessary, and append thereto his signature or initials.

(c) Cylinders of gas must be securely strapped or supported so that they cannot be accidentally knocked over.

(d) Immediately before use, cylinder valves shall be opened slightly until gas escapes and then closed but this shall not be done in the patient's room.

(e) The ice used in a cooling cabinet shall be inserted in chunks of such size as to maintain proper temperature and circulation of atmosphere.

Reg. 9 Catheters and Masks in General.

(a) All catheters and masks shall be kept in a clean, sanitary condition and in good repair.

(b) When a catheter is used by a patient, the oxygen shall be required to pass or flow through an insufflation bottle or humidifier, unless otherwise ordered by the attending physician.

(c) Every catheter when in continuous use by a patient shall, after removal, be inspected, cleaned and checked by a technician or physician to determine proper functioning at least twice during each 24 hours.

(d) Every mask shall be inspected to determine proper functioning whenever a new cylinder of gas is attached.

(e) Cylinders of gas must be securely strapped or supported so that they cannot be accidentally knocked over.

Reg. 10 Warnings Against Fire Hazards.

(a) Every tent, catheter or mask for inhalation therapy service shall be equipped at the time of delivery with a set of instructions warning against possible fire hazards and the technician shall call attention to these instructions.

(b) Signs, warning against fire hazards, shall be conspicuously displayed in the patient's room and on the door leading to the patient's room. Such signs shall have a white background and shall clearly and legibly bear in red letters the following:

Caution

No Smoking No Matches No Sparks No Open Flames No Candles No Oil Grease No Other Inflammable Materials No Electric Pads, Electric Call Bells or Other Electrical Equipment

(c) In addition to the aforesaid, the technician shall verbally warn the patient, nurse, members of the household and

others attending the patient, against smoking and all other possible fire hazards.

Reg. 11 Cleaning and Sterilization of Equipment.

(a) Adequate space, preferably a separate room, shall be provided for the cleaning and sterilization of inhalation therapy equipment. The floor of such space or room shall be constructed of smooth cement or tile laid in cement or other hard non-absorbent water-tight material.

(b) After the termination of each case the tent, both cabinet and canopy, shall be washed with soap and water both inside and outside, and then the canopy either rubbed down with 70 percent alcohol or dipped in a solution of not less than 1:1,000 mercury bichloride for five minutes and washed with water or sterilized by any other satisfactory method.

(c) After the termination of each case the catheter used shall be cleaned and sterilized. The terminal inch of the catheter shall be examined as to whether any of the small holes are plugged. The catheter after such sterilization and examination shall be placed in a sealed container and delivered in such sealed container to the next patient.

(d) After the termination of each case the masks used shall be scrubbed thoroughly with soap and water and then either boiled in water, or immersed or washed in a 70 percent alcohol solution or other effective sterilizing agent.

Reg. 12 Maintenance of Premises and Equipment.

(a) The premises occupied by a purveyor shall be maintained in a clean, sanitary condition.

(b) All equipment used in inhalation therapy service shall be maintained in a clean, sanitary condition and in good working order.

(c) Equipment in usable condition shall be stored separately from unclean or defective equipment.

(d) All equipment returned to the premises, following each use, shall be thoroughly examined for leakage and other defects immediately after cleaning.

Reg. 13 Apprenticeship; Apprentice Certificate.

(a) No person employed by a purveyor, unless accompanied by a technician or supervising technician, shall install, operate or service or assist in installing, operating or servicing of inhalation therapy equipment for a patient.

(b) No person shall work and no employer shall engage, allow or permit to work as an apprentice to a supervising technician or technician unless he is the holder of an apprentice certificate. Before an apprentice is engaged an application for an apprentice certificate signed by the apprentice and countersigned by the employer must be filed by the employer with the Department of Health. Such apprentice certificate shall be valid for one (1) year from date of issuance unless employment is sooner terminated or the certificate is otherwise revoked by the Commissioner of Health.

Reg. 14 Records to be Kept by the Purveyor.

The purveyor shall keep a record of all gas purchased, giving dates, amounts, type of gas, cylinder numbers and person from whom purchased, and he shall also keep a record of each case in which inhalation therapy service was supplied, giving the name of the patient, the place where the service was rendered, the name and address of the physician prescribing the services, the type of equipment, the date and time when service commenced and when service terminated, the amount and type of gas used with the dates of the commencement of each cylinder of gas, and the name of the technician or supervising technician in direct charge of installation of equipment for each case. Such records shall be kept for a period of three years and shall be open to inspection by any authorized representative of the Department of Health.

ADDITIONAL REGULATIONS GOVERNING THE

EXAMINATION AND ISSUANCE OF CERTIFICATES OF

COMPETENCY FOR TECHNICIANS AND SUPERVISING

TECHNICIANS IN INHALATION THERAPY SERVICE

Reg. 20 Applications for Certificates of Competency.

(a) Persons desiring to obtain from the Commissioner of Health a certificate of competency as a technician or as a supervising technician in inhalation therapy service shall apply for the necessary examination by filing with the Department of Health, an application on such forms as may be prescribed, and furnishing such information as to character, education, previous employment, training and fitness as may be required. Applications shall be filled out in the handwriting of the applicant and shall be accompanied by two photographs of the applicant, not to exceed one and one-half inches square. No false or misleading statement shall be made in any application, affidavit or other paper filed with the Commissioner of Health.

(b) Applications shall be received during regular office hours at the office of the Department of Health, 125 Worth Street, Manhattan.

Reg. 21 Qualifications for Certificates of Competency.

(a) **Technicians.** Applicants for a certificate of competency as a technician shall be thoroughly proficient in reading and writing the English language and shall have had not less than two years attendance at a secondary school or its equivalent, one year of which shall have included instructions in physics, chemistry or general science, or the equivalent. In addition thereto, the applicant shall have had not less than three months experience as an apprentice or experience equivalent thereto.

(b) Supervising technicians. Applicants for a certificate of competency as a supervising technician shall have the same educational qualifications as required for a technician and in addition thereto, shall have had not less than two years' experience as a technician actually engaged in inhalation therapy service.

A person who has a current certification for respiratory therapy technician issued by the American Association for Respiratory Therapy or one who is registered as a respiratory therapist by the American Association for Respiratory Therapy shall be deemed qualified as a supervising technician and shall be issued a certificate of competency as a supervising technician upon filing the appropriate application without being required to take a written examination therefor.

Reg. 22 Examinations for Certificates of Competency.

(a) Examination for the issuance of certificates, or competency as technician or supervising technician, shall be designed to determine the merit and fitness of applicants and shall include a written test, a practical test and such inquiry into applicant's reputation, character, responsibility and past experience as the Commissioner of Health may require.

(b) Examinations shall be conducted on behalf of the Commissioner of Health by a departmental board consisting of at least three employees of the Department of Health designated by the Commissioner. Said Board shall be known as the "Board of Inhalation Therapy."

(c) Examination shall be conducted at least once each year.

Reg. 23 Waiver of Educational Qualifications and Examination.

Upon submission of satisfactory proof by an applicant that he has been engaged in inhalation therapy service prior to October 23, 1943, the educational qualifications hereinbefore mentioned and the examination may be waived (1) for a certificate of competency as a technician, if the applicant has had one year's experience as a technician in inhalation therapy service prior to said date, and (2) for a certificate of competency as a supervising technician, if the applicant has had five years' experience in inhalation therapy service prior to said date. Such proof must be submitted in an application for the respective certificate of competency not later than May 15, 1944, except that in a case of a person in the armed services of the United States such proof may be submitted in an application for the respective certificate of competency within one year following honorable discharge from such services.

Reg. 24 Certificate of Competency Regulated.

(a) The Commissioner of Health shall issue a certificate of competency as a technician or supervising technician in inhalation therapy service to those persons who have qualified following an examination for the respective certificate, and to those persons who have qualified under Regulation 23.

(b) A certificate of competency as a technician or supervising technician shall, except for good cause, be renewed each year without further examination. Where a person has failed to apply for renewal of his certificate of competency for two successive years his right to such certificate shall terminate and he shall be required to qualify again before a new certificate is issued.

(c) Each supervising technician and each technician, during the performance of his duties as such, shall carry his certificate or renewal certificate on his person and shall display same on demand.

Reg. 25 Effective Date.

These regulations shall take effect January 1, 1944, except as otherwise provided in paragraphs 3 and 4 of subdivision (a) of Regulation 5 and in subdivision (c) of Regulation 5.

Notes:

The regulations governing the business of supplying inhalation therapy service (Regs. 1-14) and the additional regulations governing the examination and issuance of certificates of competency for technicians and supervising technicians in inhalation therapy service (Regs. 20-25) were adopted by resolution on December 24, 1943, filed with the City Clerk on December 24, 1943, pursuant to Administrative Code §561-3.0(e). Regulation 23 was amended by resolution on April 5, 1944, filed with the City Clerk on April 6, 1944. Regulation 14 was amended by resolution on November 28, 1944, filed with the City Clerk on December 5, 1944. Regulation 4A was adopted by resolution on June 7, 1945, filed with the City Clerk on June 15, 1945. Regulation 5(a)(2) was amended by resolution on December 29, 1945, filed with the City Clerk on January 2, 1946. Regulation 5(a)(4) was amended by resolution on January 27, 1947, filed with the City Clerk on January 30, 1947.

Resolutions

Resolution Dated: July 5, 1962

Whereas, the Board of Health has taken and filed among its records numerous reports from the Department of Health that the water lines in the Ramblersville community in the Borough of Queens, bounded roughly by 160th Avenue, Hawtree Creek Basin, Russell Street, 99th Street, and the Transit Authority right-of-way, are in a deteriorated and rotted condition and that the same leak at main points, and

Whereas, such reports disclose that long sections of such deteriorated, leaky water lines are laid along the bottom of creeks whose waters are highly polluted and that such polluted waters are in direct contact with the aforesaid water lines at points of leakage, and

Whereas, such reports further indicate that such water lines are also in direct contact with sewage on the surface of the ground at points of leakage, and

Whereas, such reports further disclose that the drinking water in said community is grossly contaminated, and

Whereas, such reports further indicate that investigations conducted by the Department of Water Supply, Gas and Electricity and the Department of Health have revealed that from time-to-time that the pressure in such lines at times is negative, with the resultant strong possibility of widespread back-siphonage of the polluted water into the drinking water supply of the people residing in said community of Ramblersville, and

Whereas, the danger exists that because of the negative pressures in the aforesaid water lines in Ramblersville the water supply of Ramblersville and other communities adjacent to said community of Ramblersville may become contaminated and polluted, and

Whereas, the Board of Health regards the aforesaid reports as sufficient proof to authorize the declaration that the said private water lines by reason of the aforesaid defects and circumstances are in a condition and in effect dangerous to life and health of the Ramblersville community and communities adjacent thereto and a public nuisance, and

Whereas, personal service or service pursuant to subdivisions (a) or (b) of §564-21.0 [§17-148] of the Administrative Code of the City of New York of any orders requiring the abatement of such nuisance and such condition in effect dangerous to life and health upon each of the persons, who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York, has a duty or liability to abate such nuisance and condition, would result in delay prejudicial to the public health, welfare and safety, now, therefore, be it

Resolved, that the Board of Health is of the opinion that the said water lines are in a condition and in effect dangerous to life and health of the Ramblersville community and other communities adjacent thereto and the said water lines be and are hereby declared a public nuisance and in a condition in effect dangerous to life and health, and be it further

Resolved, that the Board of Health hereby declares that the aforesaid nuisance and condition is widespread throughout the area described above, and be it further

Resolved, that all persons who, pursuant to the provisions of Chapter 22 of the Administrative Code of the City of New York and such other chapters, sections, rules and laws are as applicable thereto, have a duty or a liability to abate said nuisance and condition in effect dangerous to life and health are hereby ordered forthwith to commence to abate said nuisance and condition by replacing and laying such water lines at such depth as will prevent freezing and other defects in the said water lines and by otherwise protecting the replaced water lines in such manner as to prevent damage thereto by freezing and other hazards, and be it further

Resolved, that in the event that such persons or any of them shall fail to comply with this order within three days after service thereof pursuant to subdivision (c) of §564-21.0 [§17-148] of the Administrative Code of The City of New York, the Department of Health be and it is hereby authorized and directed to take all necessary steps to secure the abatement of said nuisance and condition in effect dangerous to life and health.

George James, M.D., Acting Chairman, Board of Health

Resolution Dated: January 21, 1964

At a meeting of the Board of Health of the Department of Health held January 21, 1964, the following resolution

was adopted:

Whereas, the Board of Health has taken and filed among its records reports from the Department of Health indicating that there are some 43,000 residence buildings in New York City which are in such poor structural condition as to readily provide rat harborages throughout such buildings, and Whereas, such reports disclose that in addition to such structural condition many such buildings lack adequate facilities for handling and removing of garbage, refuse and waste material and as a result garbage, refuse and waste material does in fact accumulate therein, and

Whereas, such reports further indicate that such conditions are conducive to and result in rat infestation in such buildings, and

Whereas, rats are a menace to public health in that they cause the spread of disease, attack children and cause serious injury to them, start fires and create insanitary conditions, and

Whereas, such reports indicate that such buildings are; located and that such conditions exist throughout the City, and

Whereas, the Board of Health regards the aforesaid reports as sufficient proof to authorize the declaration that such rat-infested buildings by reason of the aforesaid circumstances are in a condition and in effect dangerous to life and health and constitute a public nuisance, and

Whereas, personal service or service pursuant to subdivisions (a) or (b) of §564-21.0 [§17-148] of the Administrative Code of The City of New York of orders requiring the abatement of such nuisance and conditions in effect dangerous to life and health upon each of the persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York, has a duty or liability to abate such nuisance and conditions, would result in delay prejudicial to the public health, welfare and safety, now, therefore, be it

Resolved, that the Board of Health is of the opinion that the said rat-infested buildings are in a condition in effect dangerous to life and health and constitute a public nuisance and such buildings be and they hereby are declared, in each instance, a public nuisance and in a condition in effect dangerous to life and health, and be it further

Resolved, that the Board of Health hereby declares that the aforesaid nuisance and conditions are widespread throughout the entire City, and be it further

Resolved, that all persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York and such other chapters, sections, laws and rules as are applicable thereto, have the duty or liability to abate such nuisance and conditions in effect dangerous to life and health, are hereby ordered forthwith to abate such nuisance and conditions by:

1. Applying rodenticides in those areas of the buildings which are rat harborages, in a manner which will effectively exterminate rats in such buildings, and

2. By promptly removing garbage, refuse and waste material from all public parts of the building and by keeping such building free from garbage, refuse and waste material at all times, and

3. By sealing all holes in floors, walls and ceilings throughout the entire building and keeping such floors, walls and ceilings free from holes which permit rat infestation, and be it further

Resolved, that in the event that such persons or any of them shall fail to comply with this order within five (5) days after service thereof pursuant to subdivision (c) of §564-21.0 [§17-148] of the Administrative Code of the City of New York, the Department of Health be and is hereby authorized and directed to take all necessary steps to secure the abatement of said nuisance and conditions in effect dangerous to life and health.

Resolution Dated: January 29, 1965

At a meeting of the Board of Health of the Department of Health held January 29, 1965, the following resolution was adopted:

Whereas, the Board of Health has taken and filed among its records reports that there are dwellings in New York City which are deteriorated and

1. Which (a) have been seriously neglected by the owner or (b) have a history of repeated violations of the New York City Health Code or the Multiple Dwelling Law and/or other laws, statutes, ordinances or regulations relating to housing maintenance, and

2. Which (a) have no running water or (b) have no effective sewage disposal facilities or (c) have no electricity or (d) have no heat following a history of repeated violations of the heating requirements of the New York City Health Code or of other applicable laws, statutes, ordinances or regulations or (e) which have no heat because the boiler, furnace or distribution facilities thereof are so defective as to render the heating system inoperative or (f) contain other conditions which, in the opinion of the Department of Health, present an immediate danger to the life and health and of the occupants thereof or the occupants of adjacent buildings, and

Whereas, such reports indicate that such dwellings are located in numerous areas throughout the City, and

Whereas, the Board of Health regards the aforesaid reports as sufficient proof to authorize the declaration that such dwellings by reason of any of the circumstances specified in paragraph "1" above or any combination thereof together with any of the conditions specified in paragraph "2" above or any combination thereof are in a condition and in effect dangerous to life and health and constitute a public nuisance, and

Whereas, personal service or service pursuant to subdivisions (a) or (b) of §564-21.0 [§17-148] of the Administrative Code of the City of New York of orders requiting the abatement of such nuisance and conditions in effect dangerous to life and health upon each of the persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York, has a duty or liability to abate such nuisance and conditions, would result in imminent peril and delay prejudicial to the public health, welfare and safety, now, therefore, be it

Resolved, that the Board of Health is of the opinion that such dwellings are in a condition and in effect dangerous to life and health and constitute a public nuisance and such dwellings be and they hereby are declared in each instance a public nuisance and in a condition and in effect dangerous to life and health, and be it further

Resolved, that all persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York and such other chapters, sections, laws or rules as are applicable thereto, have the duty or liability to abate such nuisance and conditions in effect dangerous to life and health, are hereby ordered to abate such nuisance and conditions forthwith by causing running water, electricity, adequate sewage disposal facilities or heat, as the case may be, to be supplied to such dwellings, and be it further

Resolved, that in the event that such persons or any of them shall fail to take all necessary steps to comply with this order immediately, the Department of Health be and it is hereby authorized to take forthwith all necessary measures to secure the abatement of said nuisance and conditions in effect dangerous to life and health.

Resolution Dated: March 19, 1965

At a meeting of the Board of Health of the Department of Health held March 19, 1965, the following resolution was adopted:

Whereas, the Board of Health has taken and filed among its records reports from the Department of Health that there are vacant lots in New York City in which rats are present, and

Whereas, such reports indicate further that such vacant lots when located between two buildings which are rat infested become passageways for rats traveling from one building to another or become places of refuge when rat-infested buildings are either demolished or subject to rat extermination activities and that such lots even when they are at a distance from a rat-infested area may serve as a breeding place and harborage for rats, and

Whereas, rats wander from such lots into nearby areas in search of food or invade buildings adjoining such lots, and

Whereas, rats are a menace to public health in that they cause the spread of disease, attack and cause serious injury to children, start fires and create insanitary conditions, and

Whereas, such reports indicate that such vacant lots are located in numerous areas throughout the City, and

Whereas, the Board of Health regards the aforesaid reports as sufficient proof to authorize the declaration that such vacant lots by reason of the aforesaid circumstances are in a condition and in effect dangerous to life and health and constitute a public nuisance, and

Whereas, personal service or service pursuant to subdivisions (a) or (b) of §564-21.0 [§17-148] of the Administrative Code of the City of New York of orders requiring the abatement of such nuisance and conditions in effect dangerous to life and health upon each of the persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York, has a duty or liability to abate such nuisance and conditions, would result in delay prejudicial to the public health, welfare and safety, now, therefore, be it

Resolved, that the Board of Health is of the opinion that the said vacant lots are in a condition in effect dangerous to life and health and constitute a public nuisance and such vacant lots be and they hereby are declared, in each instance, a public nuisance and in a condition in effect dangerous to life and health, and be it further

Resolved, that the Board of Health hereby declares that such vacant lots are located in numerous areas throughout the entire City, and be it further

Resolved, that all persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of The City of New York and such other chapters, sections, laws and rules as are applicable thereto, have the duty or liability to abate such nuisance and conditions in effect dangerous to life and health, are hereby ordered to abate such nuisance and conditions by:

1. Applying rodenticides in a manner which will effectively exterminate rats in such vacant lots, and

2. By promptly removing garbage, refuse and waste material therefrom and by keeping such vacant lots free from garbage, refuse and waste material at all times, and be it further

Resolved, that in the event that such persons or any of them shall fail to comply with this order within five days after service thereof pursuant to subdivision c of Section 564-21.0 [§17-148] of the Administrative Code of The City of New York, the Department of Health be and it is hereby authorized to take all necessary steps to secure the abatement

of said nuisance and conditions in effect dangerous to life and health.

William J. McCleary, Jr., Secretary

Resolution Dated: October 13, 1965

At a meeting of the Board of Health of the Department of Health held October 13, 1965, the following resolution was adopted:

Whereas, the Board of Health has taken and filed among its records reports that in numerous areas throughout the City there are private sewers which are defective or broken or in a state of disrepair and from which raw sewage escapes onto the surrounding ground surface, and

Whereas, there are families with children living in many of the aforementioned areas who, in the course of their play and other daily activity, come into direct contact with the exposed sewage, and

Whereas, raw sewage contains pathogenic organisms and intestinal bacteria, which are not in themselves pathogenic, but which by their presence in large numbers may cause illness, and

Whereas, exposed sewage emits noxious odors to the detriment and annoyance of persons in the vicinity thereof, and

Whereas, there is always present the danger that escaping raw sewage may contaminate the water supply in the vicinity of such sewage, and

Whereas, the aforementioned reports indicate further that the number of private sewers discharging raw sewage is increasing and will continue to increase, and

Whereas, the Board of Health regards the aforesaid reports as sufficient proof to authorize the declaration that said private sewers are in a condition and in effect dangerous to life and health and constitute a public nuisance, and

Whereas, personal service or service pursuant to subdivisions (a) or (b) of §564-21.0 [§17-148] of the Administrative Code of the City of New York of orders requiring the abatement of such nuisance and conditions in effect dangerous to life and health upon each of the persons, who pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York, has a duty or liability to abate such nuisance and conditions, would result in imminent peril and delay prejudicial to the public health, welfare, and safety, now, therefore, be it

Resolved, that the Board of Health is of the opinion that such private sewers are in a condition and in effect dangerous to life and health and constitute a public nuisance and such sewers be and they hereby are declared to be in each instance in a condition and in effect dangerous to life and health and a public nuisance, and be it further

Resolved, that all persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York and such other chapters, sections, laws or rules as are applicable thereto, have the duty or liability to abate such nuisance and conditions in effect dangerous to life and health, are hereby ordered to abate such nuisance and conditions in effect dangerous to life and health by repairing or replacing such sewers in a manner which will prevent the escape of raw sewage therefrom and which will permit the proper disposition of such sewage, and be it further

Resolved, that in the event that such persons or any of them shall fail to comply with this order within five days after service thereof pursuant to subdivision (c) of §564-21.0 [§17-148] of the Administrative Code of the City of New York, the Department of Health be and it is hereby authorized and directed to take all necessary steps to secure the

abatement of said nuisances and conditions in effect dangerous to life and health.

William J. McCleary, Jr., Secretary

Resolution Dated: April 16, 1970

At a meeting of the Board of Health of the Department of Health held April 16, 1970, the following resolution was adopted:

Whereas, the Board of Health has taken and filed among its records reports that there are dwellings in New York City whose interior walls, ceilings, doors, baseboards, window sills or window frames have paint containing more than one percent of metallic lead-based on the non-volatile content of the paint, and

Whereas, there are persons residing at such dwellings who have blood lead levels of 0.06 milligrams percent or higher, and

Whereas, such reports indicate that such dwellings are located in numerous areas throughout the Boroughs of Manhattan, The Bronx, Brooklyn and Queens, and

Whereas, the Board of Health regards the aforesaid reports as sufficient proof to authorize the declaration that such dwellings by reason of the aforesaid circumstances are in a condition and in effect dangerous to life and health and constitute a public nuisance, and

Whereas, the Board of Health by resolution adopted on January 15, 1970 amended subsection (d) of §173.13 of the New York City Health Code so as to require the Department of Health to order the removal of the paint or the covering of such surfaces with such materials and by such methods as the Department may direct to protect the life and health of the occupants of such dwellings, and

Whereas, such amendment further required said Department to request the Housing Development Administration to execute such order pursuant to the provisions of §564-20.0 [§17-145] of the Administrative Code in the event that the owner or other person having the duty or liability to comply with such order fails to comply therewith within five days after service thereof in accordance with the provisions of §564-21.0 [§17-148] of the Administrative Code, and

Whereas, personal service or service pursuant to subdivisions (a) or (b) of §564-21.0 [§17-148] of the Administrative Code of the City of New York of orders under subsection (d) of §173.13 of the New York City Health Code on each of the persons who has a duty or liability to comply with such order would result in imminent period and delay prejudicial to the public health, welfare and safety, now, therefore, be it

Resolved, that the Board of Health is of the opinion that such dwellings are in condition and in effect dangerous to life and health and constitute a public nuisance and such dwellings be and they hereby are declared in each instance a public nuisance and in a condition and in effect dangerous to life and health, and be it further

Resolved, that all persons who have the duty or liability to abate such nuisance and conditions in effect dangerous to life and health, are hereby ordered to abate such nuisance and conditions by removing such paint or recovering such surfaces with such materials and by such methods as shall be specified by the Department of Health in an order served on any such person through the mail, and be it further

Resolved, that in the event that such persons or any of them shall fail to take all necessary steps to comply with this order, the Department of Health be and it is hereby authorized to take all necessary measures under §173.13(d) of the New York City Health Code to secure the abatement of said nuisance and conditions in effect dangerous to life and health.

Lorance Hockert, Secretary

Resolution Dated: July 15, 1970

At a meeting of the Board of Health of the Department of Health held July 15, 1970, the following resolution was adopted:

Resolved, that the resolution adopted by the Board of Health on the ninth day of September, nineteen hundred forty-seven and filed with the City Clerk on the nineteenth day of September, nineteen hundred forty-seven be and the same hereby is amended, to read as follows:

Whereas, the Health Department has engaged in a program of having manufacturers design and construct food equipment in a sanitary manner, and

Whereas, equipment manufacturers have demonstrated their willingness to cooperate in this program, and

Whereas, the heavy food equipment manufacturers are not located in The City of New York and the inspection of their equipment would require considerable time of key inspectorial personnel, and

Whereas, manufacturers have consented to undertake any expense which may be involved in having Health Department representatives visit their plants to inspect the equipment for sanitary design and construction before it is placed on the market, therefore, be it

Resolved, that a fee of one hundred dollars ($100) for each day spent traveling to, inspecting at the applicant's plant, and returning to the Department of Health, by a representative of the Department of Health, be charged; plus the estimated travel and lodging expenses of such representative, the entire amount thereof to be deposited in advance with the Department of Health by the applicant for this service. The fee charged for such inspectorial service shall be credited by the Department of Health to the General Fund of the City of New York, and included in its semi-monthly transmission of revenue collections to the Treasurer of the City of New York. Any excess of the deposit for the inspector's actual travel and lodging expenses shall be returned to the applicant.

A true copy.

Lorance Hockert, Secretary

Resolution Dated: October 22, 1970

Whereas, the Board of Health has taken and filed among its records reports that there are buildings in New York City which have been vacated by all legal tenants, and

1. Which have been abandoned or deserted or seriously neglected by the owner, and

2. Which (a) have conditions of deterioration or accumulations of garbage, rubbish or other waste materials conducive to or resulting in rodent or insect infestations or fires or (b) are not sufficiently sewered or drained resulting in flooding conditions or accumulations of stagnant water or liquid wastes or (c) have conditions endangering the safety and health of persons in the vicinity who are attracted and gain access thereto or (d) contain other conditions which, in the opinion of the Department of Health, present an immediate danger to life and health, and

Whereas, such reports indicate that such vacant buildings are located in numerous areas throughout the City, and

Whereas, the Board of Health regards the aforesaid reports as sufficient proof to authorize the declaration that such

vacant buildings by reason of any of the circumstances specified in paragraph 1 above together with any of the conditions specified in paragraph 2 above or any combination thereof are in a condition and in effect dangerous to life and health and constitute a public nuisance, and

Whereas, personal service or service pursuant to subdivision (a) or (b) of §564-21.0 [§17-148] of the Administrative Code of the City of New York of orders requiring the abatement of such nuisance and conditions in effect dangerous to life and health upon each of the persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York, has a duty or liability to abate such nuisance and conditions, would result in imminent peril and delay prejudicial to the public health, welfare and safety; now, therefore, be it

Resolved, that the Board of Health is of the opinion that such vacant buildings are in a condition and in effect dangerous to life and health and constitute a public nuisance and such vacant buildings be and they hereby are declared in each instance a public nuisance and in a condition and in effect dangerous to life and health; and be it further

Resolved, that all persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York and such other chapters, sections, laws or rules as are applicable thereto, have the duty or liability to abate such nuisance and conditions in effect dangerous to life and health, are hereby ordered to abate such nuisance and conditions forthwith by: (1) causing all entrances and windows to such buildings to be sealed in accordance with appropriate regulations to effectively prevent unauthorized entry into such buildings; or (2) causing such buildings to be demolished to the ground, the lot leveled to grade and the excess debris resulting from such demolition removed, and be it further

Resolved, that in the event that such persons or any of them shall fail to take all necessary steps to comply with this order immediately, the Department of Health be and it is hereby authorized to take forthwith all necessary measures to secure the abatement of said nuisance and conditions in effect dangerous to life and health.

(As adopted by the Board of Health, October 22, 1970).

Lorance Hockert, Secretary

Resolution Dated: June 24, 1971

Sir-At a meeting of the Board of Health of the Department of Health held June 24, 1971, the following resolution was adopted:

Resolved, that the resolution adopted by the Board of Health on the thirteenth day of October, nineteen hundred sixty-five and filed with the City Clerk on the fourteenth day of October, nineteen hundred sixty-five, relating to private sewers which are defective or broken or in a state of disrepair, be and the same hereby is amended to read as follows:

Whereas, the Board of Health has taken and filed among its records reports that in numerous areas throughout the City there are private sewers which are defective or broken or in a state of disrepair and from which raw sewage escapes onto the surrounding ground surface, and

Whereas, there are families with children living in many of the aforementioned areas who, in the course of their play and other daily activity, come into direct contact with the exposed sewage, and

Whereas, raw sewage contains pathogenic organisms and intestinal bacteria, which are not in themselves pathogenic, but which by their presence in large numbers may cause illness, and

Whereas, exposed sewage emits noxious odors to the detriment and annoyance of persons in the vicinity thereof, and

Whereas, there is always present the danger that escaping raw sewage may contaminate the water supply in the vicinity of such sewage, and

Whereas, the aforementioned reports indicate further that the number of private sewers discharging raw sewage is increasing and will continue to increase, and

Whereas, the Board of Health regards the aforesaid reports as sufficient proof to authorize the declaration that said private sewers are in a condition and in effect dangerous to life and health and constitute a public nuisance, and

Whereas, personal service or service pursuant to subdivisions (a) or (b) of §564-21.0 [§17-148] of the Administrative Code of the City of New York of orders requiring the abatement of such nuisance and conditions in effect dangerous to life and health upon each of the persons, who pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City

of New York, has a duty or liability to abate such nuisance and conditions, would result in imminent peril and delay prejudicial to the public health, welfare, and safety; now, therefore, be it

Resolved, that the Board of Health is of the opinion that such private sewers are in a condition and in effect dangerous to life and health and constitute a public nuisance and such sewers be and they hereby are declared to be in each instance in a condition and in effect dangerous to life and health and a public nuisance, and be it further

Resolved, that all persons who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York and such other chapters, sections, laws or rules as are applicable thereto, have the duty or liability to abate such nuisance and conditions in effect dangerous to life and health, are hereby ordered to abate such nuisance and conditions in effect dangerous to life and health by repairing or replacing such sewers in a manner which will prevent the escape of raw sewage therefrom and which will permit the proper disposition of such sewage, and be it further

Resolved, that in the event that such persons or any of them shall fall to comply with this order within two days after service thereof pursuant to subdivision (c) of §564-21.0 [§17-148] of the Administrative Code of The City of New York, the Department of Health be and is hereby authorized and directed to take all necessary steps to secure the abatement of said nuisances and conditions in effect dangerous to life and health.

Resolved further, that this resolution shall take effect immediately.

jy6-8

Lorance Hockert, Secretary

Resolution Dated: April 29, 1972

Whereas, the Board of Health has taken and filed among its records reports from the Department of Health indicating that in numerous areas throughout the City, and especially in the Borough of Richmond, there are obstructed drainage conditions caused by (1) the blockage of water courses and drainage ditches, pipes or channels resulting from the failure to clean them by removing accumulations of garbage, debris, disused materials or other solid waste materials therefrom, or (2) the inadequacy of drainage provided by water courses, ditches, pipes or channels resulting from the failure to repair, reshape or replace them, and

Whereas, during and after periods of rain storm or heavy rainfall such conditions result in the flooding of streets and private residential areas causing physically dangerous and impassable areas for emergency vehicles and equipment,

and

Whereas, during and after periods of rain storm or heavy rainfall such conditions result in the flooding and surcharging of sanitary sewers and private sewage disposal systems causing the discharge and ponding of raw sewage mixed with storm water in the surrounding areas, and

Whereas, there are families with children living in the areas affected by such flooding, discharge of sewage and ponding who, in the course of their daily activity and play, come into direct contact with the exposed raw sewage and are in danger of drowning in the ponding of such storm water mixed with raw sewage, and

Whereas, raw sewage contains pathogenic microorganisms and intestinal bacteria which are not in themselves pathogenic but which by their presence in large numbers may cause illness, and

Whereas, there is always the present danger that the storm water mixed with raw sewage may contaminate the water supply in the vicinity thereof, and

Whereas, the Board of Health regards the aforesaid reports as sufficient proof to authorize the declaration that such obstructed drainage conditions are in effect dangerous to life and health and constitute a public nuisance, and

Whereas, personal service or service pursuant to subdivisions (a) or (b) of §564-21.0 [§17-148] of the Administrative Code of the City of New York, of orders requiring the abatement of such nuisance and conditions in effect dangerous to life and health upon each of the persons, who pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York, has a duty or liability to abate such nuisance and conditions, would result in imminent peril and delay prejudicial to the public health, welfare and safety, now, therefore, be it

Resolved, that the Board of Health is of the opinion that such obstructed and malfunctioning water courses, drainage ditches, pipes or channels are in a condition and in effect dangerous to life and health and constitute a public nuisance and they hereby are declared to be in each instance in a condition and in effect dangerous to life and health and a public nuisance, and be it further

Resolved, that each person who, pursuant to the provisions of Chapter 22 [Chapter 17] of the Administrative Code of the City of New York and such other chapters, sections, laws or rules as are applicable thereto, has the duty or liability to abate such nuisance and conditions in effect dangerous to life and health, is hereby ordered to abate such nuisance and conditions in effect dangerous to life and health by:

1. Cleaning and clearing away any accumulation of garbage, debris, disused material or other solid waste materials blocking or obstructing the flow of storm or other water in such part of such water courses, drainage ditches, pipes or channels as may exist on property owned by him or over which he has management and control, and

2. Repairing, reshaping or replacing such water courses, drainage ditches, pipes or channels which are eroded, corroded or otherwise defective, and be it further

Resolved, that in the event that such persons or any of them shall fail to comply with this order within two days after service thereof pursuant to subdivision (c) of §564-21.0 [§17-148] of the Administrative Code of the City of New York, the Department of Health be and it is hereby authorized and directed to take all necessary steps to secure the abatement of said nuisances and conditions in effect dangerous to life and health.

Resolved further, that this resolution shall take effect immediately.

(As adopted by the Board of Health April 29, 1972)

Joseph A. Cimino, M.D., M.P.H. Chairman, Board of Health

Marc Weinberger, Acting Secretary

Resolution Dated: October 29, 1981

At a meeting of the Board of Health of the Department of Health held October 29, 1981, the following resolution was adopted:

Whereas, the Board of Health has taken and filed among its records, reports that in numerous areas throughout the City, private property has been found on which is hazardous matter which is stored or disposed of in an unsafe or illegal manner, and

Whereas, there are residential dwellings, children who may come in contact with this matter in the course of their play, aquifers providing public drinking water, and private property in the immediate vicinity of this hazardous matter, and

Whereas, hazardous matter may be toxic, corrosive, easily ignitable, explosive or infectious, and

Whereas, hazardous matter can pose a safety hazard by leading to fire and explosion in the structures in which they are stored, and

Whereas, for the purpose of this resolution illegal storage or disposal of hazardous matter is considered to be that storage or disposal of hazardous matter which is in violation of any Federal, State or local ordinance.

Whereas, the aforementioned reports indicate that the number of incidents of such unsafe or illegal storage or disposal of hazardous matter is of significant proportions and dangerous to life and health, now, therefore be it

Resolved, for the purpose of this resolution, hazardous matter is considered to be all substances defined by §173.01 of the New York City Health Code and any waste or material whether or not in its waste state, listed in the Code of Federal Regulations, 40 CFR-Part 261 §§261.31, 261.32, 261.33(1) and 261.33(f), as presently constituted or as modified in the future, and all polychlorinated biphenyls, and be it further

Resolved, that the Board of Health is of the opinion that such hazardous matter, which in the opinion of the Department is stored or disposed of in an unsafe or illegal manner, is in a condition and in effect dangerous to life and health and constitute a public nuisance as defined by §564-15.0 [§17-142] of the Administrative Code of the City of New York and such hazardous matter be and it hereby is declared to be in each instance in a condition and in effect dangerous to life and health and a public nuisance; and be it further

Resolved, that all persons, who pursuant to Chapter 22 [Chapter 17] of the Administrative Code of the City of New York and such other chapters, sections, laws or rules as are applicable thereto, have the duty or liability to abate such nuisance and conditions in effect dangerous to life and health are hereby ordered to abate such nuisance and conditions in

effect dangerous to life and health, by safely and legally storing said hazardous matter or by safely and legally providing for the removal of such hazardous matter in a manner deemed appropriate by the Department within five days or in a shorter period of time if such nuisance and condition is determined by the Board of Health to constitute an imminent peril, and be it further

Resolved, that in the event that such persons or any of them shall fail to comply with this order after service thereof pursuant to Section 564-21.0 [§17-148] of the Administrative Code of the City of New York, the Department of Health be and it is hereby authorized and directed to take all necessary steps to secure the abatement of said nuisance and conditions in effect dangerous to life and health, and to assess such persons for the costs incurred in securing the

abatement of said nuisances and conditions pursuant to Section 564-22.0 [§17-149] of the Administrative Code of the City of New York.

Resolved further, that this resolution shall take effect immediately.

A true copy.

Patricia J. Caruso, Secretary

Filed with the City Clerk November 3, 1981.

VOLUME 9

STATEMENTS OF BASIS AND PURPOSE

1. Statement of Basis and Purpose in City Record Mar. 23, 1995:

These amendments to the New York City Health Code ("Health Code") are promulgated pursuant to Section 556(d) and 558(c) of the New York City Charter ("the Charter") empowering the Board of Health to prescribe in the Health Code the form and manner in which a registry of births occurring in the City of new York shall be kept and birth certificates filed. Section 17-168 of the Administrative Code of the City of New York ("the Administrative Code") requires the certificate of birth registration to be issued on forms furnished by the Department of health ("the Department").

The proposed amendments to sections 201.05; 207.15 and 207.17 of the Health Code will authorize the Department to implement an "Electronic Birth Certificate" system [EBC] in the City of New York.

New subsections of section 201.05 of the Health Code will require all births occurring at facilities which generally report more than 100 births annually to be reported electronically by computer. Persons responsible for reporting births at facilities with fewer than 100 births per year may apply to the Department for permission to report electronically, or continue to report on paper forms.

The amendments include corrections of references in section 201.05 of the Health Code to reflect present numbering of sections of the Administrative Code and to incorporate recent amendments to the Public Health Law regarding voluntary acknowledgment of paternity.

It is further proposed to amend section 207.15 of the Health Code to permit the Department to permanently preserve the confidential medical report filed with birth certificate records electronically, and to amend section 207.17 to require that vital records, including birth certificates, that are not filed electronically continue to be filed in a manner acceptable to the Department.

The State of New York has already completed large-scale implementation of EBC; development of EBC in New York City is a cooperative effort of the City and State Department of Health.

According to present estimates of cost-effectiveness, only hospitals generally reporting at least one hundred births per year will be required to participate in EBC, which will be fully implemented by January 1, 1997. Until that time, the Department will gradually phase in a few institutions at a time. After that date, all other persons and facilities required to report births pursuant to section 201.03 of the Health Code will either continue to report births on paper forms as they do now or, at their option, may apply to the Department for permission to participate in EBC.

Each EBC participating reporting source will be required to install and maintain specific personal computer hardware. The Department will provide the computer program. Before January 1, 1997, when electronic reporting will be required, the Department will encourage each reporting source implementing EBC to apply to the Department for

software and technical assistance, allowing sufficient time for staff training and addressing any problems which may arise.

EBC will require the hospital to enter by computer the same data, in the same "fields," that are now entered on paper forms. Except for minor changes for which board approval will be requested, there is no change contemplated in the form or content of the birth certificate or confidential medical report, only in the manner, i.e., the means by which persons required to report births shall transmit prescribed reports of births to the Department.

After entry of all data, a certificate will be printed at the facility reporting the birth (so that it may be signed by the physician or other birth attendant), and delivered with other certificates to the Department within the five days presently required by section 201.03 of the Health Code.

The entire certificate-certificate of birth (upper) portion and confidential medical report (lower) portion-will be transmitted on computer diskette to the Department during the initial implementation of EBC. At a later date, the Department plans to eliminate diskette transfers and will require the electronic file to be directly transmitted to the Department via modem over telephone lines. The Department will no longer require the confidential medical report to be printed at facilities participating in EBC.

In summary, printing of the certificate of birth but not the confidential medical report of birth should not disrupt any services provided to the people of this City. With EBC, contents and legal integrity of the certificate will be maintained, with the additional expectation that no information will be lost and processing time will be shortened, resulting in better service by the Department. Principal users of these data at the New York City Department of Health, the New York State Department of Health and the National Center for Health Statistics have been consulted and support a change to EBC. Approximately 12 other jurisdictions, including New York State, currently print only the upper "legal" portion of the birth certificate.

Advantages of an EBC System

1. **Increased productivity.** Both the participating reporting hospitals and the Department of Health will require fewer support resources, since data will be entered only once, by and at the hospital, not at the Department. EBC reporting will eliminate handwritten or manually typed certificates which are inefficient to produce and prone to error. The Department will greatly reduce the time andd resources devoted to manually coding birth certificate data since EBC software will incorporate coding options for hospital staff entering data.

2. **Improved data quality.** The EBC software will automatically check data as it is being entered for internal inconsistencies. Errors would be corrected before data are finally entered and before the birth certificate is printed, resulting in greater accuracy in the certificate itself (a legal record of birth registration) and the confidential medical report (used for public health purposes).

3. **Ease of use.** With only minimal training and support, reporters of births at hospitals will be able to generate birth certificates and facilitate internal data collection for analysis of outcomes or populations served or other purposes.

4. **Rapid processing and assignment of Social Security numbers.** Parents of newborns who have requested Social Security numbers as part of the birth registration process may currently experience delays of up to five months before receiving numbers, as a result of time consuming tasks involved in manual recording, coding and transmission. EBC will reduce the time required for processing numbers by at least two months.

5. **Security.** EBC will assure data confidentiality by means of audit control numbers, passwords for entry into the sytem, and encoding data transmitted by telephone or data lines.

This amendment was inadvertently omitted from the Department's Regulatory Agenda.

2. Statement of Basis and Purpose in City Record June 9, 1995:

This amendment to the New York City Health Code is promulgated pursuant to Sections 558(b) and (c) of the New York City Charter empowering the Board of Health to promulgate the Health Code. Section 556 concerning the Department's jurisdiction to regulate matters affecting health in the City of New York, and businesses and activities affecting public health within the City, and Section 1043 granting the Department of Health rulemaking authority.

The proposed amendment of the New York City Health Code would repeal Article 157 regulating solid waste transfer stations. Prior to 1990, the Department of Sanitation regulated non-putrescible solid waste transfer stations and the Department of Health regulated transfer stations handling putrescible waste. In 1990 it became clear that the growth of the solid waste disposal industry had created complex problems in New York City affecting public health and transport and disposal management.

In June of 1990 the Board of Health adopted a major revision of Article 157, accompanied by a finding of imminent threat to health which finding was approved by the Mayor. Simultaneously, the Departments of Health and Sanitation were working toward a regulatory approach that would invest Sanitation with day to day regulatory and permitting authority over putrescible waste transfer stations, and would incorporate the public health concerns articulated in the newly revised Article 157. As a result of this work, Local Law 40 of 1990 (adding Section 16-130 of the New York City Administrative Code) was enacted by the City Council investing the Department of Sanitation with regulatory and permitting authority. Comprehensive rules were adopted by the Department of Sanitation thereafter, which are at least as strict as the provisions of Article 157 (see, Rules of the City of New York, Title 16, Ch. 4).

Therefore, the Department of Health no longer routinely regulates or permits solid waste transfer stations, and Article 157 is no longer necessary. The Department of Health does retain its general powers to abate public health nuisances pursuant to existing law as well as Administrative Code Section 16-133(e).

3. Statement of Basis and Purpose in City Record June 9, 1995:

Article 163 of the New York City Health Code regulates both barber shops and beauty parlors and authorizes the issuance of permits by the Department to both types of establishment. Recently enacted state legislation, specifically a new Article 27 of the General Business Law, entitled **Licensing of Mail Specialty, Natural Hair Styling, Esthetics and Cosmetology,** which became effective July 5, 1994, pre-empts the New York City Department of Health from regulating and issuing permits to beauty parlors. The Department has issued permits to conduct beauty parlors pursuant to Sections 163.03 and 5.07(a) of the New York City Health Code.

The New York State Department of State has regulated and licensed beauty parlors, barber shops, hair dressers and cosmetologists since 1946, pursuant to former Article 27 of the General Business Law ("GBL"). However, Section 406 of the former Article 27 required that beauty parlors located in the City comply with the New York City Health Code. The new Article 27 of the "GBL", by deleeting Section 406, does not require this compliance.

Furthermore, the regulatory scheme established by the new Article 27 is sufficiently broad so as to pre-empt the regulations pertaining to beauty parlors found in Article 163 of the Health Code. The regulation of an "appearance enhancement business", which is defined as the business of providing any or all of the services of "nail specialty", "natural hair styling", "esthetics", and "cosmetology" at a fixed location is now wholly within the jurisdiction of the Department of State. Licenses for individuals to engage in the above specialties as well as licenses to operate an "appearance enhancement business" are to be issued by the state agency, pursuant to the new Article 27 of the "GBL".

Article 28 of the "GBL" governing the practice of barbering, despite some recent revision, does **not** preempt the New York City Health Department from regulating barber shops or issuing permits to these establishments, which it does pursuant to Sections 163.03 and 5.07(a) of the New York City Health Code. Section 436 of the "GBL", requires that barber shops be maintained and operated in accordance with the State Sanitary Code and the New York City Health Code, and therefore, the Department's regulatory obligation is continued in this area.

The proposed amendments to Article 163, by deleting Section 163.01(b) in its entirety and by removing the references to "beauty parlor" in the schedule of Article headings, the Article heading and Sections 163.03, 163.05, 163.09(d) and 163.11, would remove provisions that conflict with state law and are, therefore, no longer enforceable. For this same reason, Section 5.07(a) of the Health Code must be amended to remove beauty parlors from the listing of permits, licenses and certificates of qualification that are issued by the Department.

4. Statement of Basis and Purpose in City Record June 9, 1995:

Section 153.17 is substantially derived from Section 318 of the Sanitary Code of the City of New York, adopted by the Board of Health in 1938. In 1955, nearly identical language was incorporated into provisions of the Administrative Code prohibiting littering. [L.L. 1955, No. 99, formerly A.C. Section 755(3)-2.1]. When this provision was adopted, and until the United States Supreme Court rules otherwise, "commercial speech" was not considered to be constitutionally protected under the First Amendment. [**Valentine v. Christensen,** 316 U.S. 52, 62 S.Ct. 920 (1942); U.S. Const. amend. 1]. In 1976, the U.S. Supreme Court, overruling its earlier decisions, held that "commercial" speech was protected expression within the contemplation of the First Amendment. **Virginia State Board of Pharmacy v. Virginia Citizens Consumer Council,** 425 U.S. 748, 96 S.Ct. 1817 (1976). Following the reasoning of the Supreme Court, the New York Court of Appeals found that the Administrative Code prohibition was unconstitutional as an unreasonable regulation of constitutionally protected speech. **People v. Remeny,** 40 N.Y.2d 527, 387 N.Y.S.2d 415 (1976). Section 153.17 of the Health Code, therefore, is similarly unconstitutional and unenforceable.

This proposal did not appear in the Department's regulatory agenda because, although it continued to be printed in the Health Code, it has not been enforced since 1976. As a result of recent inquiries as to its viability, it has been decided that this provision should be repealed to avoid public confusion and to correct the Code.

5. Statement of Basis and Purpose in City Record June 14, 1996:

These amendments to the New York City Health Code ("Health Code") are promulgated pursuant to §§556(d) and 558(c) of the New York City Charter ("the Charter") empowering the Board of Health to prescribe in the Health Code the form and manner in which a registry of births, deaths and feetal deaths occurring in the city shall be kept. Section 17-166 of the Administrative Code of the City of New York ("the Administrative Code") requires the Department of Health ("the Department") to keep a record of the births, fetal deaths and deaths filed with the Department.

The proposed amendments to §§205.25, 205.23 and 205.29 of Article 205 of the New York City Health Code are intended to remove requirements that no longer serve any public health purpose and which, because of administrative changes in the Department of Health, place unnecessary burdens on the funeral industry and bereaved families by requiring prior Department permission for transport of human remains out of the city for burial or cremation in a county of the State contiguous to the City of New York.

Health Code §205.25 currently allows exceptions to the requirement that after normal business hours, on weekends, and on holidays, human remains may be transported out of the City to a contiguous county in the State when telephone authorization to transport has been given by the Department. An appropriate Department permit is required in all cases prior to burial or cremation.

This and a related provision was initially adopted (by resolution, on October 30, 1987) to ease the burden created by the nightly closing of borough burial desk offices. Those offices were then open weekdays 9:00 A.M. to 5:00 P.M., and issued appropriate permits for transport of human remains out of the city to a contiguous county in the State.

In May, 1994 all borough burial desk offices (except Manhattan) were permanently closed as a cost saving measure. As a result of these closings the Department needs to reevaluate and, if possible, to make more efficient the system by which peermits to bury, cremate or transport human remains are issued and to eliminate unnecessary emands upon the only remaining burial desk, which is in the Department's building in Manhattan at 125 Worth Street and which operates 24 hours a day.

At the present time, therefore, transport from the City to contiguous counties (i.e., Nassau and Westchester) within New York State is already permitted in certain circumstances after telephone authorization is obtained. The original reason for the after-hours telephone authorizations was to ease the burden on funeral directors who routinely obtained permits at the borough office burial desks. Since the elimination of these borough offices, the telephone authorizations are also irrelevant and requiring telephone or written authorization for transport of human remains to the two contiguous counties have become burdensome for funeral directors and some bereaved families (especially where religious observance requires burial without delay) and the Department. The Metropolitan Funeral Directors Association, Inc. has petitioned the Department for appropriate amendment of the health Code to eliminate telephone authorizations for transport out of the City to a contiguous county in the State and the Department agrees that such a change is indicated to eliminate a burdensome procedure, not otherwise justified for any public health reasons. In all instances, the appropriate Department permit will still be required for burial or cremation of human remains. Transport to contiguous counties in New York State will result in no danger to the public health.

Health Code §205.23(a) also requires amendment to conform with §205.25(a) as revised and §205.29 requires amendment to reflect the administrative elimination of the borough office burial desks.

The proposed changes, if approved, will have no effect on the Department's current procedure of not authorizing further disposition of human remains until a burial or cremation permit has been issued. Cremations within the City would still require approval of the New York City Office of Chief Medical Examiner, and the Department will not issue a peermit or a death certificate until the appropriate reports have been filed with the Department.

These amendments to Article 205 were not included in the Department's Regulatory Agenda for FY 1995, because they result from the Department's response to a petition from the Metropolitan Funeral Directors Association, Inc. dated August 22, 1995, which was received after the FY 1995 Regulatory Agenda was adopted. They are included in the Regulatory Agenda for FY 1996.

6. Statement of Basis and Purpose in City Record Oct. 2, 1996:

Deteriorating lead based paint in older housing continues to be the most significant source of childhood lead poisoning in New York City. Section 173.13 of the New York City Health Code authorizes the Department to issue orders to abate lead paint in dwellings. The amendments to Section 173.13 will make it consistent with Federal and State laws and regulations regarding the sale and usage of lead based paint and will clarify testing procedures and definitions for determining what constitutes a lead paint violation. It is also proposed, in a separate resolution, to amend Section 173.14 which describes and codifies acceptable, recognized safety techniques for abatement of lead based paint.

Pursuant to the changes proposed in Section 173.13, paint may only be offered for sale if it contains 0.06 percent of metallic lead or less. (Currently the standard in the Code is 0.5 percent). The applicability and exceptions to this maximum lead content standard will be defined by reference to Federal law and regulation, rather than by listing exceptions in the Health Code.

The proposed changes will also clarify the testing procedures for determining what constitutes a lead paint violation. The proposed amendment to Section 173.13(d) incorporates by reference the proposed definition of "lead based paint" in Section 173.14(b)(16). As proposed, "lead based paint" shall mean "paint or other similar surface-coating material containing 1.0 milligram of lead per square centimeter (mg/cm^2) or greater, as determined by laboratory analysis, or by an x-ray fluorescence (XRF) analyzer." According to the recently issued **Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing,** (United States Department of Housing and Urban Development, Washington D.C., 1995), an XRF reading of 1.0 milligram of lead per square centimeter or greater (as proposed in Section 173.14), is considered an indicator that the paint is lead based. Currently, Section 173.13 defines lead based paint as containing more than 0.5 percent of metallic lead by weight. Section 173.13 also currently permits measurement of lead based paint by an XRF analyzer to be 0.7 milligrams of lead per square centimeter or greater. Because the percent by weight method requires laboratory analysis of paint chips, so that results are not immediately

available upon inspection, the Health Code also allows for the alternative testing method which does provide immediate results, namely x-ray fluorescence (XRF) analyzers. The percent by weight standard is also problematic in New York City because added layers of non-lead paint result in a dilution of lead as a percent by weight. As a result, lead in chips can exceed the mass per area threshold, but fall below the percent by weight threshold. The new definition requires that XRF results be compared with lab analysis of samples for lead mass by surface area, so that measures are directly comparable.

It is also proposed that the Department order lead abatements in a dwelling when it finds that there is a child under 18 with a blood-lead level of 20 micrograms per deciliter or higher residing therein and also finds lead based paint, as defined in the proposed amendment to 173.14(b)(16), that is peeling, is on a window friction surface or is on any surface which is considered to be a lead hazard because of its condition, location or accessibility to children.

The term "person" as used in subsection (d), has been amended to "child" so as to be applicable to a person under 18 years of age. Generally, where adults are diagnosed as lead poisoned it is the result of occupational exposure rather than housing conditions.

7. Statement of Basis and Purpose in City Record Oct. 2, 1996:

Deteriorating lead based paint in older housing continues to be the single largest source of childhood lead poisoning in New York City. Abatement of lead based paint is frequently required pursuant to the New York City Health Code, Section 173.13 or by an Order of the Commissioner of the Department of Housing Preservation and Development (HPD).

Section 173.14 of the New York City Health Code describes and codifies acceptable, recognized safety techniques for abatement of lead based paint. Such safety precautions are essential to ensure that occupants of a dwelling subject to lead abatement are protected from exposure to lead dust and residue produced during abatement.

The amendments to Section 173.14 were designed to incorporate the philosophy and thinking underlying Federal guidelines andd State regulations, particularly with regard to the definition, assessment and control of lead based paint and lead based paint hazards. The proposed changes focus on three (3) areas: the definition of lead-based paint; the measurement of lead-based paint; and the control of lead-based paint hazards.

It is also proposed, in a separate resolution, to amend Section 173.13 which authorizes the Department to issue orders to abate lead paint in dwellings, and specifically to incorporate by reference the proposed definition of "lead based paint" in Section 173.14(b)(16).

In 1995, the **Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing** (U.S. Department of Housing and Urban Development, Washington, D.C., 1995) were issued pursuant to Title X of the Housing and Community Development Act of 1992. The HUD Guidelines provide detailed information on how to identify and control lead based paint in housing, based on the most current scientific research. The proposed amendments to Section 173.14 of the New York City Health Code were developed with guidance from these federal guidelines as well as Title 10, New York Codes, Rules and Regulations (N.Y.C.R.R.), Section 67-2.4(a)(1) and (a)(2). These State regulations outline the basis and extent of an environmental lead investigation and describe methods for abatement of lead paint conditions which result in lead poisoning.

Currently, Section 173.14, subsection (b)(16) defines "lead based paint" as "paint or other similar surface coating material having a reading of 0.7 milligrams of lead per square centimeter or greater on an xd-ray fluorescent analyzer or containing more than 0.5 percent of metallic lead, based on the non-volatile content of the paint or other similar surface coating material." This definition is inconsistent with HUD Guidelines. It is proposed that, for the purposes of the Health Code, 1.0 mg/cm^2 be the new standard in Section 173.14, whether lead content in paint is determined by XRF analysis or laboratory analysis of paint chips. The percent by weight standard is problematic in New York City because added layers of non-lead paint result in a dilution of lead as a percent by weight. As a result, lead in chips can exceed

the mass per area threshold, but fall below the percent by weight threshold. The new definition requires that XRF results be compared with lab analysis of samples for lead mass by surface area, so that measures are directly comparable. In the event that such readings cannot be obtained owing to the nature of the lead painted structure, the proposed definition in subsection (b)(16) will permit reporting of results in percentage lead by weight and in such case, 0.5 percent will be the standard.

At present, the primary method used to determine the presence of lead based paint is an x-ray fluorescent (XRF) analyzer. When using this instrument, the readings vary depending on such factors as the type of instrument and the type of surface being tested. Both the HUD Guidelines and State regulations recognize that XRF analyzers have inconclusive ranges, within which the presence or absence of lead cannot be accurately determined. For example, if an XRF analyzer has an inconclusive range of 0.8 to 1.3 mg/cm^2, a result of 0.3 mg/cm^2 would be considered negative, a result of 2.0 mg/cm^2 would be considered positive and a result of 1.1 mg/cm^2 would be considered inconclusive.

To account for the imprecision in XRF readings, it is proposed that the amended Section 173.14(b)(16) outline procedures for determining whether XRF results are positive, negative or inconclusive and that inconclusive results be confirmed by laboratory analysis of paint chips. Different brands and models of XRF analyzers have different inconclusive ranges. It is proposed that the Performance Characteristic Sheet (PCS) for the particular XRF instrument used be referenced to determine the inconclusive zone for that particular instrument, as is recommended by the HUD Guidelines. A PCS is a document produced by HUD and the United States Environmental Protection Agency for XRF instruments available for commercial use. In the event that a PCS is not available for a particular XRF instrument, it is proposed that the XRF readings be classified in the amended subsection (b)(16) as positive, negative or inconclusive in accordance with the procedures established in Title 10 N.Y.C.R.R., Section 67-2.4(a)(1) and (a)(2). This provision establishes a pre-determined inconclusive range of more than 0.4 but less than 1.6 mg/cm^2 for mean substrate corrected readings. "Mean substrate corrected readings" are required because XRF readings can be subject to bias caused by interference from the material underlying the paint (the "substrate"), and must therefore be taken into account in order to produce an accurate measurement of the amount of lead present in the paint. PCSs also contain information on substrate correction procedures for each instrument.

It is further proposed that the definition also recognize the different definitions of "lead based paint" used by the New York City Department of Housing Preservation and Development and the Department of Health. For purposes of violations of the Housing Maintenance Code, the proposed definition of "lead based paint" refers to Section 27-2013 of the New York City Administrative Code.

Currently, clean-up procedures for all lead-based paint abatement prior to repainting apply uniformly to all surface areas to be abated, regardless of the size. It is proposed that Section 173.14, subsection (e)(4) make certain distinctions in the procedures required based on the size of the area and the nature of the surface to be abated. Therefore, it is proposed that clean-up procedures for all abatements of surfaces not exceeding two square feet per room (except with regard to radiators, door frames, window frames and sills) be made less stringent by modifying the requirements to include daily clean-up, spray and sweep, HEPA vacuum, detergent wash, inspection for visual dust and debris, and after re-painting, if necessary, another visual inspection. The lead content in paint used on radiators, door frames, window frames and sills tends to be higher than the lead content in paint used on other surfaces. Therefore, it is proposed that these surfaces, regardless of their size, receive the unmodified clean-up procedure which, in addition to the procedures specified above, also include a second HEPA vacuum, surface dust testing and clearance for re-occupancy. It is also proposed that the unmodified procedure also be used for all abatements ordered by the Department in relation to a child under 18 years of age with a blood-lead level of 20 micrograms per deciliter or higher.

In keeping with recent scientific findings, it is proposed that the post-abatement clearance level for bare floors be lowered from 200 to 100 micrograms of lead dust per square foot. This proposed amendment is aimed at minimizing lead dust on floors as much as possible to protect young children.

8. Statement of Basis and Purpose in City Record July 15, 1997:

This amendment to the New York City Health Code ("Health Code") is promulgated pursuant to various provisions of law.

Section 556 of the New York City Charter ("the Charter") grants the Department of Health jurisdiction to regulate matters affecting health in the City of New York and to enforce all provisions of law applicable to the jurisdiction of the Department. Section 558(b) and (c) of the Charter empower the Board of Health to amend the Health Code and to include in the Health Code all matters to which the Department's authority extends. Section 556(s) of the Charter specifically empowers the Department to "supervise and regulate the public health aspects of ionizing radiation, the handling and disposal of radioactive wastes and the activities within the city affecting radioactive materials, excluding special nuclear materials in quantities sufficient to form a critical mass." Section 1043 of the Charter grants the Department of Health rulemaking authority.

The New York City Department of Health is authorized to enact laws provided they are not inconsistent with the New York State Sanitary Code. [Public Health Law Section 228(2)]. Laws which satisfy the minimum applicable requirements set forth in the State Sanitary Code are not considered inconsistent. [Public Health Law Section 228(3)]. State regulations pertaining to radiation are found in part 16 of the State Sanitary Code [10 N.Y.C.R.R. Part 16]. The qualifications for radiation safety officer are addressed in 10 N.Y.C.R.R. Section 16.2(a)(99).

This proposed amendment to the New York City Health Code concerns the qualifications of persons serving as radiation safety officers in facilities where radioactive materials or x-ray machines are used. Radiation safety officers are employees of these facilities who are responsible for conducting radiation safety activities to ensure compliance with the radiation safety standards set forth in Article 175 of the Health Code. In addition to Section 175.03(b)(2), qualifications for radiation safety officers are delineated in Section 175.103(j), governing the medical use of radioactive material. When Article 175 was repealed and reenacted in 1994, Section 175.03 inadvertently omitted the qualifications of individuals who were not board certified yet had the appropriate training and experience to serve as radiation safety officers, which option exists in Health Code Section 175.103(j), 10 N.Y.C.R.R. Section 16.2(a)(99) and federal regulations codified at 10 C.F.R. Section 35.900.

Therefore, it is proposed that the qualifications for radiation safety officers for human use radiation equipment as outlines in Section 175.03(b)(2)(i) also authorize the training and experience listed in Section 175.103(j) of the Health Code. It is also proposed that the qualifications for radiation safety officers for human use radiation equipment as outlines in Section 175.03(b)(2)(ii) also authorize the training and experience listed in Section 175.103(j) of the Health Code. For non-human use radiation equipment installations, as outlines in Section 175.03(b)(2)(iii), and for non-human use radioactive materials installations, as outlined in Section 175.03(b)(2)(iv), it is proposed that the Department of Health have the discretion to determine that persons with training and experience equivalent to the qualifications which are now accepted may also qualify for the position of radiation safety officer.

9. Statement of Basis and Purpose in City Record Dec. 30, 1997:

Pursuant to New York State Law it is unlawful to possess an unlicensed dog in the City of New York, (L. 1894, ch. 115 as amended). Further, Section 161.04 of the New York City Health Code prohibits a person who owns or is in control of a dog to allow it to be in a public place or in any unfenced area abutting a public place without a license tag affixed to its collar. When a dog is appropriately licensed and wears the license tag, its owner can be identified and located in the event that the dog is lost, is allowed by its owner to be in public without a leash or bites a human, or even another animal, while loose. Licensing is a basic indicator of responsible pet ownership. It is assumed that the owner of a licensed dog will act responsibly by keeping a dog under control and avoiding any situations which might result in a dog causing harm to humans or other animals. It is clear that licensing dogs establishes a significant measure of control in avoiding bites and transmission of disease, thereby affording greater protection to the public health. A license enables the Department to identify an owner who has failed to control a dog, and should increase compliance with other measures designed to control dogs in one of the largest cities in the world, e.g., rabies control and leash laws (New York City Health Code Sections 11.65 and 161.05).

An analysis of dog bite reports received by the Department demonstrates that unlicensed dogs are more likely to be associated with reports than those with licenses. From comparison of reports, the Department estimates that as many as 200,000 to 300,000 dogs (at least two-thirds of the resident population) are not licensed, and dog bites continue to be a serious public health problem.

The significant number of dog bites reported to the Department remains a major concern of the Department. During each of the past three fiscal years (1995 through 1997), there was an average of 9,800 dog bites reported to the Department. In analyzing the association between dog bites and licensing, it was noted that less than 10% of the 892 dogs seized because of biting incidents were licensed. Four breeds of dogs were associated with approximately 70% of these biting incidents: Pit Bulls (n=294); German Shepherds (n=191); Rottweilers (n=73) and Chow Chows (n-70). The Department was unable to verify licensing for approximately 90% of the Pit Bulls, German Shepherds and Rottweilers and 80% of the Chow Chows. Licensing would improve the Department's ability to track the owners of biting dogs and result in the return of greater numbers of lost or stolen animals to their owners.

The proposed amendment to the Health Code would require Section 161.09 permittees who sell or adopt out dogs to the public to require purchasers who will harbor the dogs within the City, to submit a completed license application, and for the Section 161.09 permittees to receive the license fee from the prospective owner, prior to turning a dog over to that prospective owner amending Health Code Section 161.15(b). It would be unlawful for these permittees (pet shop owners and animal shelters) to transfer possession, ownership or control of a dog to any person who does not complete a license application and tender the appropriate fee. The permittee will, in turn, transmit the completed applications and fees to the Department. These provisions are already authorized under section 8-b of the New York City Dog License Law enacted by the State legislature (L. 1894, ch. 115, as amended, which appears following State Agriculture and Markets Law, section 107). The Department will thereafter issue the license to the owner.

This provision is designed to increase compliance with existing City and State laws requiring licensing of dogs in the City of New York and increasing public health and safety through more responsible dog ownership.

The proposed rule was not included in the Health Department's regulatory agenda nor anticipated, because it is the result of recent analysis by the Department of dog bites and dog licensing.

10. Statement of Basis and Purpose in City Record July 1, 1998:

Mayoral Executive Orders spanning the past two administrations have established several rights and procedures relative to domestic partnerships, including a procedure for City residents to register their domestic partnerships in the office of the City Clerk. Such orders have further provided, among other things that (i) registered domestic partners are eligible for visitation rights in City hospitals and correction facilities; (ii) City employees with registered domestic partnerships are eligible for child care leave and bereavement leave on the same basis as those benefits are afforded to employees with regard to their spouses; and (iii) registered domestic partnership is evidence of the right to succession to tenancy rights in facilities operated by the New York City Housing Authority and the Department of Housing Preservation and Development. By the end of 1998, there were approximately 8,700 couples registered as domestic partners in New York City. More than 55 percent of those registered domestic partners who reported demographic information were heterosexual couples, and less than 45 peercent were same sex couples. Almost forty percent of registered domestic partnerships have accessed City health benefits available to partners of City employees and retirees.

Consistent with the intent of such orders, this proposal would extend to domestic partners the same authority applicable to spouses, to obtain, correct, or amend vital records and make decisions concerning the deceased domestic partner as specified in Title V of the New York City Health Code.

This rule is proposed at the request of the Administration, in conjunction with a citywide review of policies and practices relating to spouses and domestic partners. Therefore, it did not appear in the 1997 Regulatory Agenda.

11. Statement of Basis and Purpose in City Record July 1, 1998:

These amendments to the New York City Health Coe ("Health Code") are promulgated pursuant to Sections 556(d), 556(r), 558(b) and 558(c) of the New York City Charter ("the Charter") empowering the Board of Health to prescribe in the Health Code the form and manner in which a registry of fetal deaths and deaths occurring in the City of New York shall be kept and death certificates filed. Section 17-166 of the Administrative Code of the City of New York ("Administrative Code") requires the Department to maintain, produce and provide birth, fetal death and death records, as well as certificates of induced termination of pregnancy. Further, Section 17-169 of the Code mandates that the Department prescribe the form of certified birth records and of fetal death and death records, as well as the age requirements necessary for individuals to obtain the aforementioned records.

The proposed amendments to sections 203.03, 203.05, 205.03, 205.05 and 207.03 of the Health Code will authorize the Department to implement an "Electronic Death Registration System" ("EDRS") in the City of New York. Currently, terminations of pregnancy and deaths occurring in the City are reported on paper to the Department by those individuals and entities that are required to do so. For those that must comply with the Health Code reporting requirements, this process is labor and time intensive.

In collaboration with the New York State Department of Health, the Department is developing the EDRS, an automated electronic system that will ease the burden of filing, improve data quality, insure enhanced security, and greatly speed the flow of relevant information to and from those entities that are responsible for reporting deaths in New York City.

Although the fully rolled-out EDRS will not obligate all individuals to report via electronic devices, it is anticipated that a large number of individuals and organizations will utilize the system to report deaths in the City. An immediate benefit of EDRS will eliminate the need for funeral directors to travel to the Department's headquarters to file death certificates and obtain burial permits. Moreso, the system will be capable of accepting payment for certified copies by way of electronic funds transfer or other automated means. Additionally, certified copies of death certificates would then be available for pick-up, mail or overnight delivery, at the option of the requester. Finally, the EDRS will allow corrections to be made prior to filing without retyping the certificate. Ultimately, the relative ease and convenience of using the EDRS will prompt many to opt to file using the automated system.

Accordingly, the amendments to section 205.03 and 205.05 of the Health Code will allow an alternative electronic filing of information required for a certificate of death and confidential medical report by those entities specified in sections 205.03 and 205.05. Moreover, the amendment to be made to section 207.03 would allow corrections to be noted on electronic certificates and records in a different manner from paper documents. Currently, the Health Code requires that approved changes to certificates be clearly reflected on the certificate itself by requiring that a single line be drawn through the amended item, and the correct information inserted immediately above it. This method of recording approved changes on electronic certificates and records may be technologically infeasible and burdensome. As such, amending section 207.03 allows for a programmatic solution that would be technically practical, while still being functionally equivalent to the manner of noting changes on paper certificates and records.

Further, the proposed amendment to section 205.19 of the Health Code would no longer require that the Department be notified in cases where an autopsy is to be performed on unclaimed remains, pursuant to Section 4214(1) of the Public Halth Law. This notification is redundant with that which is currently made, and will continue to be made, to the City mortuary.

Sections 201.11, 205.01, and 207.01 are amended to change the definition of a minor to mean a person under 18 years of age, thereby bringing the Health Code in conformity with the New York State Public Health Law. Section 201.11 is also amended to more strictly define a delayed registration of birth.

12. Statement of Basis and Purpose in City Record Dec. 30, 1998:

Introduction

It is proposed that the Health Code be amended to repeal provisions relating to veterinary public health which are no longer applicable in the City; clarify a recent Health Code amendment regarding licensing of dogs; deregulate private horse stables; and reflect current considerations in control of animal diseases that may be transmitted to humans.

Section 11.65

Rabies remains epizootic in New York City, and the Department erxpends considerable resources monitoring dogs' vaccination status and investigating dog bite incidents to prevent or rules out any risk to the public or an individual's health. Section 11.65 of Article 11 ("Reportable Diseases and Conditions") of the New York City Health Code prescribes requirements for reporting, observation and control of animals affected with or suspected of having various diseases communicable to humans. Sections 11.65(e) through (g) currently specify measures for isolation and observation of animals subject to rabies that have bitten a person. Animals "subject to rabies" inclue any animals capable of contracting or transmitting the disease. Section 11.65(e)(1) specifies that a person owning, possessing or controlling a dog or other animal that is subject to rabies and has bitten a person must confine and observe the animal for 10 days. No change is proposed with respect to the periods of observation applicable to dogs and cats.

However, rather than prescribing specific observation and isolation periods in the Code, it is proposed that the applicable Code sections referring to the period of observation be amended to reflect current veterinary practice and national and state regulatory requirements, particularly those in the State Sanitary Code, recognizing that rabies virus may follow a different course or progression in different animals. This will afford the Department flexibility and permit it to exercise its discretion in prescribing appropriate, varying peeriods of confinement and observation for different animals, and clarifying the instructions for notification to the Department of events observed during and at the conclusion of the period of confinement and isolation.

Section 11.03

It is further proposed that section 11.03(a), which includes "animal bite" as a condition reportable to the Department, be amended to require reporting of any exposure to an animal subject to rabies, not only bites of these animals. The State Sanitary Code, 10 N.Y.C.R.R. 2.14, defines "exposure" as "introduction of the rabies virus into the body of a human or animal" and includes a bite within that definition. It is proposed that all references to animal bites in section 11.65 be amended accordingly.

Article 161

The Department proposes to repeal various provisions of Article 161 ("Animals") which are no longer applicable or which presently serve no public health purpose, and to clarify the applicability of these and other provisions.

Private Horse Stables. It is proposed that private horse stables maintained by a natural person or a family on its own property to house horses for their own exclusive recreational, non-commercial use be removed from Health Code regulation. That is, a permit would no longer be required for these non-commercial stables. While the Department would no longer inspect these facilities on a regular basis the Department would retain its inspectorial authority in cases of complaints for example. In addition the sanitary requirements of Section 161.23, as well as certain specified provisions of Article 135, would continue to apply to these types of private horse stables. There are currently only a very small number of private family-owned stables maintained for recreational use in the City. While these stables would, in effect, be deregulated by the Department, all stables would continue to be subject to public nuisance and humane laws and regulations.

Cows. As the Board anticipated (see Notes, Health Code section 161.25), there are no longer any dairies in the City, nor are there likely to be any new dairies opening, and no cows are kept in the City for the sale of milk. Section 161.25 regulating the provision and maintenance of stables for cows should be repealed. Section 161.09(f), which prohibits keeping cows for production and sale of milk without a permit and the provision for issuance of permits for keeping cows contained in section 5.07(a) of the Code should be repealed accordingly.

Dog Licensing. In 1990, the American Society for the Prevention of Cruelty to Animals (the "ASPCA") ceased issuing ddog licenses in the City of New York pursuant to the New York City Dog Licensing Law, L. 1894, c. 115, as amended, and the Department assumed the licensing authority pursuant to section 161.04 of the Health Code, adopted by Board resolution on June 26, 1990. This section as adopted retained a provision that ASPCA-issued licenses in effect on July 1, 1990 would remain in effect until their expiration date. Such licenses have long since expired. Inasmuch as their is no longer any need for any reference to the ASPCA's licensing authority, this section should be amended accordingly.

Dog licensing remains an indicator of responsible pet ownership. To increase the numbers of dogs licensed by the Department, section 161.15(b) of the Health Code was amended by Board resolution adopted in December, 1997, to require permittee pet shops and shelters to "transfer possession, title, ownership, control or custody of any dog to a prospective purchaser or adopter" only upon receipt of a license application and fees. State and City law clearly and explicitly require that every dog permanently owned, possessed or harbored in the City must be licensed. It is proposed that this subsection be further amended to include among such transfers those from a shelter to an owner reclaiming his/her unlicensed dog from the shelter.

Rabies Vaccination andd Parasite-Free Certification. In 1973, section 161.06 was adopted requiring "deworming" or providing veterinary certification that a dog or cat was free of intestinal helminths before the animal is offered for sale, sold, or given away to another person. It is proposed to expand this section to require treatment for, or certification that an animal tested free of any parasitic infection. It is also proposed that this section be amended to require that upon change of ownership of a dog or cat, certification of the animal's vaccination against rabies be provided to the new owner. This amendment would require no change in veterinary practice, or in the vaccination requirements of section 11.65 of the Code, but would require disclosure of vaccination status on transfer of ownership of dogs and cats.

Vicious or Dangerous Animals. It is proposed that section 161.07 ("Vicious or dangerous animals") be amended to correct a reference in the definition of a "vicious or dangerous animal" in section 161.07(a). This subsection presently excepts from the definition animals "properly registered under 161.09(a)" (trained guard or attack dog). The reference should be to section 161.09(k), as renumbered. A further amendment is proposed to section 161.07(d) which would subject dogs owned, kept, trained for, or engaging in dog fighting to the same control measures, i.e., examinations and seizures, and sanctions as other vicious or dangerous animals.

Individual Caging of Dogs and Cats. It is proposed that section 161.17 be amended to allow for the presence of more than one animal in a cage if a veterinarian determines that for medical or humane reasons it would benefit the animal(s) to be caged with one or more companions, or if the animals would be injured if separated from their companions. The original requirement for housing one animal in a cage was intended to be a rabies control measure. However, many animals, particularly those who have been raised and housed together for long periods of time, fail to thrive in such situations and if a veterinarian certifies that it is medically indicated for dogs to be caged together, determining the rabies vaccination status of each animal would be the responsibility of the veterinarian. It is further proposed that this section be amended to clearly state that nothing in the Health Code prohibits congregate "socialization" or play areas in permitted boarding facilities if all animals have been properly vaccinated against rabies, and certified as free of other illnesses which may be transmitted to humans or animals.

13. Statement of Basis and Purpose in City Record June 30, 1999:

The New York City Department of Health is one of the agencies that implements the Agreement between New York State and the U.S. Nuclear Regulatory Commission ("NRC") to regulate the use of radioactive materials under §274 of the Atomic Energy Act of 1954. The Agreement requires that the City's Radiation Control Program be compatible with the NRC's program for regulation of materials subject to the Agreement. Generally, states are allowed three years to enact compatible regulations.

In 1995, the U.S. Nuclear Regulatory Commission ("NRC") revised its regulations governing transportation of radioactive material found in 10 CFR Part 71, to bring the United States into compatibility with International Atomic Energy Agency ("IAEA") Safety Series 6 Revisions. (Regulations for the Safe Transport of Radioactive Material, 1985 Edition, Safety Series No. 6.) The revised NRC regulations, in combination with corresponding amendments by the U.S. Department of Transportation ("DOT") (codified at 49 C.F.R. Parts 171, **et seq.**) brought the United States into accord with the IAEA regulations. The NRC's and DOT's regulations became effective April 1, 1996.

Existing §175.105 of the Health Code regulates the packaging, preparation for shipment and transportation of radioactive materials in New York City, except those directly related to national defense. The Health Code requirements apply to all persons who transport, or offer for transport radioactive material within or through the City. The Bureau of Radiological Health proposes to repeal and reenact the current §175.105 to ensure compatibility with 10 CFR Part 71.

The proposed reenactment continues regulation of intra-city radioactive materials at the same levels of safety and security as all other shipments regardless of point of departure or destination (e.g., interstate, intercounty).

Section 175.02, the definition section of Article 175, is also amended to achieve compatibility with the NRC regulations governing transportation. Other actions in the resolution include amendment of §175.01(c) to update the current mailing address for the Bureau of Radiological Health, and amendment of §175.03(j)(6)(iv)(B) to delete references to specific provisions in the current version of §175.105 to reflect the proposed reenacted §175.105.

A. **Amendments to the Health Code Regarding Matters of Compatibility**

New York City, as one of the jurisdictions covered by the "Agreement State" program with the NRC, must comply with certain federal regulations, deemed "matters of compatibility", enacted into Title 10 of the CFR by adopting essentially equivalent regulations.

-It is proposed that certain definitions contained in §175.02 be amended to conform with 10 CFR Part 71 because such definitions have been deemed matters of compatibility by the NRC.

-It is proposed that existing §175.105 regulating the packaging and transportation of radioactive materials be repealed and reenacted. The proposed new §175.105 would require compliance with certain federal regulations when shipping radioactive materials, such regulations having been deemed matters of compatibility by the NRC. Incorporation of these amendments into the Health Code is critical in order for the City to be deemed compatible by the NRC.

-It is proposed to amend §175.03(j) to delete references contained therein to specific subsections in existing §175.105, to make that section consistent with the proposed reenactment of §175.105.

B. **Technical Amendments Made to Conform with Federal Regulations**

-It is proposed that Appendix A and accompanying Tables be repealed and reenacted and proposed Appendix A Determination of A_1 and A_2 values, Table A-1, A_1 and A_2 Values for Radionuclides and Table A-2 General Values for A_1 and A_2 be added in order to conform with 10 CFR Part 71, such Tables being deemed matters of compatibility by the NRC.

C. **Other Amendments to Article 175**

-It is proposed to amend §175.01 to update the address of the Bureau of Radiological Health provided therein to which communications regarding Article 175 should be addressed.

14. Statement of Basis and Purpose in City Record July 9, 1999:

It is proposed that Health Code §161.01 ("Wild animals prohibited") be amended to update regulations with

respect to prohibiting the sale or possession of a broad range of classifications (class, order, family, genus or species) of "wild" animals in New York City.

The Department has not heretofore promulgated a list of prohibited animals either in the Health Code or as Commissioner's regulations because of concerns that the list might not be sufficiently comprehensive so as to cover every species of wild animal and that omission of certain animals from such a list would be interpreted to mean that their possession was lawful. Moreover, different wildlife species have, from time to time, emerged as fashionable animals to own, potentially requiring frequent amendment of the Code. Absent a list, however, the Department has been required to litigate whether a specific animal or species is "wild, ferocious, fierce, dangerous or naturally inclined to do harm" pursuant to the current provisions of §161.01(a). It is therefore proposed that the public be placed on notice as to which wild animals the Department has historically prohibited because they are dangerous, i.e., capable of and inclined toward inflicting bodily harm upon a human being, and/or because their possession or sale is prohibited because they appear on federal or State endangered or protected species lists.

It is therefore proposed that §161.01 be amended to include a listing of classifications of animals which residents of the City would be prohibited from selling, keeping or harboring. To accommodate changes in pet ownership patterns which make it desirable to possess animals not initially prohibited, it is proposed that the Board authorize the Commissioner to promulgate additional regulations from time to time adding to the list as the Commissioner deems necessary. Such regulations would be promulgated, as are all other Commissioner's regulations, in accordance with §1043 of the New York City Charter (the City Administrative Procedure Act), allowing for public comment.

The proposed list of prohibited animals does not include domesticated dogs and cats, which have been bred over many generations to eliminate feral characteristics, thereby enabling most species and breeds to live compatibly with humans. Also not on the prohibited list are animals such as hamsters, guinea pigs, and rabbits which are not otherwise prohibited by applicable law.

Jurisdictions throughout the nation have developed such lists based on local conditions. The proposed list of prohibited animals to be included in the Health Code is based on the Department's past experience. During the past five years, for example, the Department has seized, or issued violations to persons who unlawfully possessed, such animals as caiman, alligator, monkey, monitor lizard, serval, wallaby, coatimundi, snapping turtle, wolf-hybrid, scorpion, tarantula, and venomous snakes. A common defense expressed to justify possession is ignorance that possession of a certain animal is unlawful. Where the owner defends such possession, the Department has the legal burden of proving that the animal is a wild animal within the current definition of §161.01.

Little guidance can be derived from either state or federal laws as to which animals should be prohibited locally. The New York Environmental Conservation Law regulating native to New York wildlife management, and federal laws regulating the importation, sale and keeping of endangered species do not identify all the many and varied "wild" animals which should be prohibited in a densely populated urban environment because they pose a potential public health and safety risk.

In all cases, the danger to the public from wild animals arises from natural reflexive adaptive mechanisms which enable these animals to survive in the wild and which have not and/or cannot be eliminated by multigenerational breeding, resulting in their being considered "naturally inclined to do harm." And although individual species members may appear to have been "tamed" to the extent that their behavior appears to be modified while held in captivity, the individual animal's behavior remains unpredictable and the animal continues to be capable of inflicting injury to human beings. It is therefore proposed that the list of prohibited animals in amended subsection (b) include all native (to New York) or exotic (not native) wildlife which are both naturally inclined to do harm and deemed capable of inflicting bodily harm.

The proposal would also amend subsection (a) of §161.01 to clarify which organizations, institutions and persons shall be exempt from these prohibitions and to authorize the Department to establish conditions and grant approval for

limited exhibition or use of prohibited animals.

Other provisions proposed to be added to §161.01 would authorize seizure of prohibited animals by officers, employees or agents of the Department or other City agencies; and authorize the Commissioner to determine disposition of a prohibited animal that has been seized, offering the owner an opportunity to be heard and present proof as to whether an animal is a prohibited animal and its disposition before the Commissioner or his or her designee makes a final determination. The amendment requires the Commissioner to grant the owner an opportunity to be heard as soon as practicable, but no later than 15 days of the request, and also allows the owner the opportunity of arranging to remove the animal from the City of New York to another jurisdiction where such animal may be lawfully possessed.

Further, it should be noted that the Department responded to a petition to recognize pet ferrets as lawful in New York City by stating its intention to bring the issue to the Board of Health to initiate rulemaking on the subject of the petition. This resolution complies with the stated intention by requesting the Board, for public safety reasons, to continue the prohibition on the sale and possession of ferrets in New York City. The Department's rationale on this issue follows.

The Department has historically regarded ferrets as wild animals and prohibited their possession because of a number of public health and safety concerns. These reasons are discussed at length in a federal court decision upholding the City's treatment of ferrets as wild animals. See, **New York City Friends of Ferrets v. The City of New York, et al.,** 876 F.Supp. 529 (S.D.N.Y. 1995), aff'd 71 F.3rd 405 (2d Cir. 1995). The public health concerns as they relate to disease prevention, particularly with respect to rabies, which were expressed by the City in the court documents submitted have largely been mooted: the viral shedding period for ferrets is now known and there exists an approved rabies vaccine for the domestic ferret. Other public safety issues, however, related to injury prevention, remain unresolved.

The primary public safety concern is that the ferret, despite any possible popularity as a household pet, remains prone to vicious, unpredictable attacks on humans, particularly very young children and infants. In the **New York City Friends of Ferrets** litigation, the Department relied upon a number of epidemiological studies and monographs, including a study in the state of California, completed during 1987-88, showing a pattern of such injuries. In considering whether the Health Code should be changed to allow ferrets to be sold and owned in New York City, the Department contacted California authorities and was advised that the state will continue to ban ferret ownership because of concerns about child safety and as well as the potential dangers posed by feral ferret populations to native wildlife.

Reports of injuries caused by ferrets continue to surface. Further, since there are no reliable data to indicate how many ferrets are currently owned, calculation of rates of injury inflicted by ferrets and comparison of such rates to rates of injury inflicted by other companion animal species (dogs and cats) is impossible.

In 1994 the National Association of State Public Health Veterinarians and the Council of State and Territorial Epidemiologists continued to express serious concerns about the safety of ferret ownership:

There are several characteristics of attacks by ferrets that are of particular public health concern. Many ferret attacks involve infants and small children who are sleeping or lying down. Ferrets have climbed into cribs and inflicted hundreds of disfiguring bites on defenseless infants. . . . There is anecdotal information that the propensity to be aggressive and bite varies with the family line of the ferret. Public health officials believe that more objective data are needed on the risk factors that lead to injuries from ferrets so that specific preventive strategies can be recommended. Until such data are available the safest approach is to restrict ferrets from households that have infants or small children.

National Association of State Public Health Veterinarians, Inc., Statement on ferrets issued jointly by the Council of State and Territorial Epidemiologists and the National Association of State Public Health Veterinarians, Minneapolis, MN; 1994. In response to a telephone inquiry in April 1999, the Department was advised that this warning would remain unchanged in any current recommendation, although other warnings about rabies were no longer applicable.

Similarly, in a 1998 statement, the American Veterinary Medical Association ("AVMA") recommended that "no ferret be left unattended with any individual incapable of removing himself or herself from the ferret." AVMA, Position on ferrets, approved by the AVMA House of Delegates, 1994; amended by the AVMA Executive Board, 1998.

Other recent discussions of ferret bites stress that, despite an acknowledged lack of voluminous public health bite reports and generally sparse documentation in medical literature, reported ferret attacks are "quite vicious" and pose a "great" health risk to infants and small children. See, e.g., Applegate JA, Walhout MF. Childhood risks from the ferret. J Emerg Med. 1998; 16:425-7.

At the public hearing, many comments were received from and on behalf of owners or advocates of ferret ownership, opposed to the proposed continued ban on pet ferrets. Some of these comments stated that while they do not regard ferrets as wild animals, and not naturally inclined to do harm, they do believe ferrets can inflict injury, although with no greater frequency than dogs or cats. Some also stated categorically that no ferret should be left alone with an infant, child or any helpless person, and that owners who allowed such contact were irresponsible, but no more irresponsible than owners of cats or dogs who left children or infants alone with these pets. One comment in support of the Department's continuing ban on ferrets was received from a New Hampshire veterinarian reporting serious facial injuries to a 9-month old child whose parents assumed their pet ferret was in an "escape-proof" cage. None of the persons commenting referred to the special housing conditions in New York City, where millions of people live in apartment buildings, where ferrets can escape and travel into other persons' apartments and public spaces. The resolution as adopted with respect to ferrets is unchanged from that originally proposed.

As a result of comments received from the New York Herpetological Society, the list of prohibited snakes and reptiles includes more specific classifications of venomous snakes and reptiles which may be dangerous even if temporarily devenomized; constrictor snakes which may be less than ten feet when purchased, but will be well over ten feet in adulthood; and other reptiles which will become larger, more aggressive and difficult to manage as they mature.

In response to another comment made at the public hearing, threatening action to enjoin promulgation and/or enforcement of these amendments because of the proposed continuing ban on ferrets, the resolution as adopted contains a severability clause providing that if any provision therein is struck down, the remainder of the resolution shall have full force and effect.

15. Statement of Basis and Purpose in City Record Dec. 17, 1999:

On July 15, 1999, the Mayor signed into law Local Law 38 of 1999 (hereafter referred to as "Local Law 38"), which repeals §27-2013(h) of the Administrative Code of the City of New York, also known as "Local Law 1" of 1982, and establishes a new law "in relation to childhood lead poisoning prevention." The new law, which was signed into law by the Mayor on July 15, 1999 and became effective on November 12, 1999, through a new Article 14 of Subchapter 2 of Chapter 2 of Title 27 of the Administrative Code, prescribes maintenance standards and duties of owners of multiple dwellings built before January 1, 1960, as well as duties of the City's Department of Housing Preservation and Development ("DHPD") with respect to lead based paint hazards. Local Law 38 also adds provisions to Title 17 (Health) of the Administrative Code which require the Department of Health to "refer to appropriate medical providers any person who requests assistance in blood lead screening, testing, diagnosis or treatment, and upon the request of a parent or guardian, arrange for blood lead screening of any child who requires screening and whose parent or guardian is unable to obtain a lead test because the child is uninsured or the child's insurance does not cover such screening"; and to develop a pamphlet explaining the hazards associated with lead based paint, describing the procedures to be used for correction of violations, and including a telephone number to which the public may report complaints of "unsafe lead-based paint work practices". Local Law 38 also adds a new §17-181 to Title 17 of the Administrative Code, prohibiting dry scraping as a means of removing lead based paint or paint of unknown origin.

Local Law 38 requires owners to inspect apartments where children under six reside and correct lead based paint hazards using either "exclusive interim controls" or the standards set forth in §173.14 of the Health Code ("Safety

standards for lead based paint abatement"). Section 173.14 was originally intended to apply to orders to abate lead hazards issued by the Commissioner of the Department of Health or by the Commissioner of DHPD. The Department believes it is necessary to amend §173.14 to distinguish when §173.14 is applicable to orders issued by the Commissioner of Health pursuant to §173.13(d), where there is a child with an elevated blood lead level, and when the safety standards of §173.14 are to be utilized pursuant to provisions of Title 27 of the Administrative Code. Although no changes are required for the Department to implement §17-179(a) of Title 17 of the Administrative Code, it is proposed that a new §173.15 of the Health Code incorporate provisions for addressing the complaints it may expect to receive of "unsafe work practices" in accordance with §17-179(b) of the Administrative Code.

In view of the new law, therefore, the Department recommends amendment of various provisions of the lead based paint abatement safety standards of §173.14 of the Health Code, and adoption of a new §173.15, as follows:

1. Amend the provisions on purpose, scope and applicability of subsection 173.14(a) to clearly state that §173.14 safety standards will apply to correction of lead based paint hazards when ordered by the Commissioner of Health pursuant to §173.13 of the Health Code and in circumstances authorized or required by Local Law 38.

2. Authorize approval of surface dust testing courses. The new Article 14 of Subchapter 2 of Chapter 2 of Title 27 of the Administrative Code also requires certain surface dust testing after correction of lead based paint hazards. Such testing determines if there has been adequate cleaning to reduce to acceptable levels the amount of lead in any remaining dust. A new subsection 27-2056.5(b)(12) of the Administrative Code requires that "surface dust tests shall be completed by an individual who has passed a course approved by the department of health on how to conduct a surface dust wipe test." The Department proposes to offer such courses at the Department's Lead Poisoning Prevention Program (LPPP), as well as to establish a list of courses currently approved by the United States Environmental Protection Agency and Department of Housing and Urban Development. It is therefore proposed that subdivision 173.14(c)(2)(cc) be amended accordingly to reflect such a requirement, and to enable the Department to charge an appropriate fee and to require refresher courses as needed.

3. Enforcement of abatement safety standards and responding to complaints of unsafe lead based paint work practices. It is proposed that a new §173.15 be adopted codifying the procedures employed by the Department in addressing complaints of "unsafe lead-based paint work practices" related to non-compliance with Local Law 38's "exclusive interim controls."

Currently, the Department and the City's Department of Environmental Protection and DHPD share responsibility for enforcement of §173.14 of the Health Code. However, even before the City Council amended Title 27 of the Administrative Code, the Department had plans to exercise exclusive enforcement of §173.14's lead based paint abatement safety standards, and now also proposes to respond to complaints of unsafe lead based paint work practices it receives pursuant to Administrative Code §17-179(b). The Department considers it to be more effective for LPPP sanitarians to inspect residences of children with elevated blood lead levels both for the presence of lead hazards and for owners' compliance with the safety standards, as well as on receipt of complaints of unsafe lead based paint work practices.

It should be noted that the Department currently responds to environmental complaints pursuant to the Department's general nuisance abatement duties and authority under the Public Health Law, the Health Code and Administrative Code. If a complaint is verified, and depending on the extent of the nuisance, the Commissioner may issue an order to stop work and safely remove the nuisance and not allow work to resume unless a plan is submitted for safe continuance. Department inspectors may also issue notices of violations for failure to comply with a Commissioner's order which will be returnable to the Department's Administrative Tribunal and punishable by fines of $100 to $2,000. It is proposed that subsection 173.14(c)(1)(cc) be amended to authorize the Department to stop work and require corrective action if a lead abatement is not being done pursuant to §173.14. It is further proposed that there be a new §173.15 which will place the public on notice that complaints of any other "unsafe lead based paint work practices" will be investigated by the Department and appropriate action taken. Upon adoption of the new §173.15, the

current §173.15 ("Lye intended for household use") would be renumbered as §173.16.

At the public hearing, many comments were submitted objecting to the proposal to "harmonize" the provisions of §173.14 with those of Local Law 38. These comments stated that the Board of Health should continue to require that the Health Code abatement safety standards apply to correction of lead based paint hazards whenever DHPD issues a violation, despite the explicit provisions in the amended Administrative Code referred to above which require that specific "exclusive interim controls" be utilized when such violations are timely corrected. These comments generally stated that the Health Code requirements do not have to be harmonized with provisions of the Administrative Code, that the Health Code abatement safety standards are "more stringent" and more protective of children's health than the interim controls.

Despite such comments, the Department believes that Local Law 38 is a vast improvement over the prior Local Law 1 of 1982, which was flawed and impractical and which was repealed by the new law. Local Law 38, if fully implemented in accord with the proposed changes in the Health Code, will result, the Department believes, in a greater level of lead safety for the population as a whole. The new law requires the use of these interim controls in many situations, such as pursuant to the now required annual notice and inspection, where DHPD has not issued a violation and which until now have not been subject to any safety standards. If implemented properly, the interim controls will result in the safe correction of hazards resulting from known or presumed lead based paint. The Department's new role in investigating complaints of unsafe work practices will substantially enhance the proper utilization of the interim controls. Within this housing maintenance regulatory scheme, the 21 day period in which owners may still utilize interim controls for correcting a DHPD violation (by the method of wet scraping to remove peeling paint and repainting) is the final incentive to owners to properly maintain their property, without requiring adherence to the Health Code abatement safety standards. For the Department to continue to enforce conflicting provisions of the Health Code in such cases would create regulatory confusion and encourage non-compliance with either law.

In response to a comment from DHPD concerning instances where §173.14 will continue to apply to correction of lead hazards, as defined in the Administrative Code and outlined above, the Department has amended the proposal to incorporate a requirement that, in abatement area preparation, painted windows and doors be adjusted so that they do not "bind," i.e., do not stick in a manner that causes abrasion or friction, a definition derived from DHPD's regulations. In a further attempt to harmonize the Department's procedures with the comprehensive scheme established by Local Law 38, proposed new §173.15 has been changed to provide that unsafe lead based paint work practices investigations will encompass disturbances of actual or presumed lead based paint. In addition, since the proposal was published, the Department has determined that the fee for its dust wipe training course will be $52.00 and has revised the applicable provision accordingly.

15-A. Statement of Basis and Purpose in City Record Apr. 3, 2001:

Although the number and severity of childhood lead poisoning cases continues to decline, lead poisoning remains a problem in New York City. The goal of eliminating lead poisoning in New York City can be further served by clarifying and updating certain reporting requirements of the Health Code, and providing direct access to individual blood lead test information about New York City children to the health care providers responsible for lead poisoning screening and treatment. Article 11 of the Health Code would be amended to clarify New York City's blood lead test reporting requirements and to establish a children's blood lead registry authorizing direct access by children's health care providers. It is further proposed that §173.14 (Safety standards for lead abatement) be amended to permit the Department to charge a fee for issuing certificates to persons who complete dust wipe sampling courses offered by non-Department of Health training programs, so that the Department may recoup the costs incurred in approving such courses and issuing the necessary certificates.

Blood lead testing is a critical measure for helping to protect children's health. The longer an elevated blood lead level in a child is undetected, the greater the risk to that child of adverse health consequences. Mandated timely reporting of all blood lead levels provides the Department with surveillance data necessary to monitor blood lead levels

of individual children, directing allocation of resources for prevention, environmental investigation and intervention and treatment in areas at greatest risk, and assisting in effective planning to improve screening rates. Although current New York State and City laws and regulations are designed to establish comprehensive requirements for reporting of children's blood lead test results, there are gaps in some reporting requirements.

1. **Amend Article 11 to include a new Health Code §11.06-Blood Lead Reporting and Children's Blood Lead Registry**

a. Reporting of blood lead levels below 10 micrograms/deciliter.

In accordance with §§11.03 and 11.05 of the New York City Health Code, physicians, administrators of health care facilities and clinical laboratories, must now report to the Department, in writing, within 24 hours, results of blood tests of 10 or more micrograms of lead per deciliter (mcg/dL) of whole blood. In addition, all clinical laboratories are required to report results of all blood lead tests to the New York State Department of Health (NYS DOH) and to the local health officer in whose jurisdiction the subject of the test resides pursuant to 10 N.Y.C.R.R. Subpart 67-3. If the laboratory reports electronically to NYS DOH, NYS DOH is required to notify the local health officer of the test results and the laboratory is deemed to have satisfied NYS DOH requirements. State regulations do not explicitly require health care providers to report test results to the local health officer unless the blood lead test result is equal to or greater than 45 mcg/dL. The City Department of Health tracks children's blood lead levels and performs environmental investigations in accordance with Health Code §173.13 when there is a receipt of a report of one blood lead level of 20 mcg/dL or greater, or two reports at levels of 15-19 mcg/dL for specimens taken three months apart. The Department also notifies parents and providers of the need to repeat tests when it receives reports of children's blood lead levels at 10 mcg/dL and greater.

Reports of blood lead test results below 10 mcg/dL are used by the Department for planning, educational, outreach and surveillance purposes. Also, when matched to children who are known "cases," test results below the environmental intervention threshold become a factor in a decision by the Department to discontinue case and/or environmental follow-up. There is, however, no urgent need to receive such reports within 24 hours.

The new provisions in §11.06(a) are intended to clarify reporting requirements, and to capture the results of blood lead test results which are less than 10 mcg/dL which are not reported electronically to the State by clinical laboratories. They are also intended to clarify the intent of the original proposal by requiring that providers who analyze blood lead specimens without submitting the specimen to a clinical laboratory for analysis must report to the Department results less than 10 mcg/dL. Reports are required within five (5) business days.

Section 11.03 is amended to cross reference the additional blood lead test reporting requirements in §11.06.

b. Establishing a Children's Blood Lead Registry

State law requires children's primary health care providers to assess children between the ages of six months and six years at every well child visit, or at least annually, for "high dose lead exposure" using a risk assessment instrument, and to screen or refer their patients for lead screening as necessary. Such providers are also required to screen or refer each child for blood lead screening at or around one and two years of age. Non-primary health care providers, e.g., emergency care providers, must inquire whether children who seek their care have been appropriately assessed and tested, and if not, test or refer these children for lead testing. In addition, as managed care programs increase and more children are enrolled in managed care, the Department has been receiving requests from health care providers associated with managed care organizations for information about children's lead screening history, to assist such providers in assessing children's risks and needs for new or further testing.

To facilitate the exchange of such information, the Department is adding a new §11.06 authorizing establishment of a children's blood lead level registry, modeled on the Department's Citywide Immunization Registry ("CIR"), which will allow access by health care providers to their patients' blood lead test results, enabling providers to track their

patients' blood lead testing history and provide appropriate follow-up blood lead tests and medical care as necessary.

Because many children in New York City may have no regular health care provider, it is imperative that individual health care providers have access to complete lead testing histories for their patients so that they may determine when testing is needed. The creation of a blood lead test registry that is accessible to health care providers, with appropriate security provisions, can help health care providers identify children who need lead testing, thereby increasing screening rates throughout the City. Direct access to lead test results will enable such health care providers to evaluate their patients' current lead testing status and order needed tests or provide appropriate medical care for their patients.

The Department originally proposed that the Board repeal provisions applicable to lead poisoning reporting in §11.03, incorporating provisions for reporting all blood lead test results in the new §11.06. The original proposal would have raised the blood lead level at which reporting within 24 hours is required from 10 mcg/dl to 15 mcg/dl. After the public hearing, review of the comments received, and a Board discussion at its meeting on December 13, 2000, the proposal was amended to retain the requirement that blood lead test results of 10 mcg/dl or higher be reported to the Department within 24 hours and to clarify the reporting requirements pertaining to blood lead test results less than 10 mcg/dl. The lead poisoning reporting provisions in §11.03 are amended only to the extent of cross-referencing additional reporting requirements in §11.06.

2. **Amend Health Code §11.07(d) to assure confidentiality of blood lead test registry records.**

Records of children's blood lead tests maintained by the Department would be subject to the same confidentiality requirements as that afforded the immunization registry pursuant to Health Code §11.07(d), and this section is amended accordingly to include reference to the children's blood lead registry.

3. Amend Health Code §173.14(c) to prescribe fees for issuing dust wipe sampling course certificates for completion of non-Department of Health training courses.

This amendment authorizes the Department to charge an administrative fee for the costs incurred by the Department for evaluating the training of persons who complete approved courses for dust wipe sampling and for providing a certificate.

In December, 1999, the Board adopted amendments to Health Code §173.14 which authorized the Department to administer such dust wipe training courses, charge a fee for attendance, and issue certificates to persons who complete its courses successfully. Since the Department is also authorized to approve courses given by other trainers, it is proposed that the Health Code be further amended to prescribe fees to cover costs of issuing certificates to individuals who complete dust wipe sampling courses conducted by Department-approved training organizations.

The Department is currently conducting this dust wipe course for a fee ($52.00), as authorized by Health Code §173.14(c)(2)(cc), to defray any costs incurred for course registration, materials, training, and certification. The Department has been approached by various organizations requesting approval to offer the course. The Department is developing procedures for approving these courses and proposes to issue certificates to individuals who pass approved courses. The Department will maintain records of all individuals who receive these certificates and provide such information to D.H.P.D. or other persons on request.

The Department will charge a fee of $15.00 either for issuing certificates to individuals who have taken and passed approved courses, or for issuing replacement certificates to individuals whose certificates were either lost or destroyed.

16. Statement of Basis and Purpose in City Record Apr. 3, 2001:

The New York City Department of Health's Office of Radiological Health supervises and regulates the public health aspects of ionizing radiation, including the handling and disposal of radioactive waste and responding to emergencies involving sources of ionizing radiation. The Office of Radiological Health carries out its mandate through

its registration, licensing, inspection, emergency response and public education programs.

The New York City Charter [§556(s)] empowers the Department to regulate all aspects of ionizing radiation within the five boroughs of New York City. The New York State Sanitary Code [10 N.Y.C.R.R., Part 16] delegates ionizing radiation material regulation and oversight to those municipalities having a population of more than 2,000,000. The Federal Atomic Energy Act of 1954 [§274(o)], as amended, authorizes State regulation of byproduct material, source material and special nuclear material in quantities not sufficient to form a critical mass pursuant to an Agreement with the U.S. Nuclear Regulatory Commission (formerly the Atomic Energy Commission). The New York City Department of Health, as part of the New York State Agreement, therefore exercises regulatory authority for radioactive material within the City.

Several amendments to Article 175 are adopted in order to achieve consistency with federal and state regulations. New regulations for mammography have been promulgated by the U.S. Food and Drug Administration (FDA) under the Mammography Quality Standards Act (MQSA). Further, the FDA has changed the exposure rate limits for fluoroscopic procedures to reduce the risk of skin injury to patients. The amendments for those sections of Article 175 dealing with mammography and fluoroscopy would be consistent with the new FDA requirements.

Article 175 is further amended with regard to quality assurance programs, radiation safety, and general requirements for radiation producing equipment.

Section 175.03(f)(2)(iii) [should be (vi) added] is amended to address the need for timely processing of personnel radiation monitoring devices in keeping with the manufacturer's guidelines. There is currently no language in the section requiring timely processing to assure prompt notification, investigation and correction of unusual exposure levels to radiation workers.

Section 175.07(b)(1) is amended to include additional quality assurance requirements for the processing of radiographic film after the x-ray film has been produced, and to insure the proper maintenance of records. Licensees or registrants would be required to maintain written records documenting quality assurance and audit activities for review by the Department. Section 175.07(e) of the Health Code deals with records and reports of misadministrations. Subparagraph (ii) of paragraph (1) is amended to remove the reference to iodine-123 to make the regulation consistent with the language of §16.25 of the New York State Sanitary Code and with §35.2 of Title 10 of the Code of Federal Regulations (C.F.R.) which have been amended owing to the lesser potency of iodine-123.

Section 175.56 of the Health Code outlines the general requirements for radiation equipment. Subsection (e)(1) is amended to prohibit the use of outdated x-ray film because outdated film jeopardizes the quality and stability of the radiographic image. Subsections (j) and (k) are added to include requirements for x-ray producing equipment. Currently, there is no language in this section which addresses defective or inoperable x-ray equipment which could compromise patient safety and/or radiographic image quality. New subsection (j) requires that x-ray equipment be maintained in proper working order and new subsection (k) requires that all x-ray producing equipment be provided with a visual indicator which functions whenever x-rays are produced.

Section 175.57 covers diagnostic radiography. Subsection (a) reads: "The provisions of this section apply to equipment for the recording of images, except equipment involving use of an image intensifier or computed tomography x-ray systems manufactured on or after November 28, 1984." The subsection is amended by changing it to read: "The provisions of this section apply to equipment for the recording of images." It is not intended that this section regulate image intensifiers or computed tomography systems. In addition, the 1984 date is no longer relevant.

Section 175.62 covers fluoroscopy. The reference to "manufactured on or after August 1, 1974" has been deleted. The section would apply to all fluoroscopic systems. New paragraph (3) was added to subsection (d) to include additional requirements for entrance exposure rate limits for fluoroscopic equipment in compliance with state and federal regulations. The new paragraph reads as follows: "When the high level control is activated, the maximum

exposure rate measured in air at a point where the center of the useful beam enters the patient shall not exceed 20 roentgens per minute." Routine fluoroscopy procedures are limited to five roentgens per minute for the average size patient with an upper limit of ten roentgens per minute for individual patients. However, a high level option on this equipment is provided to be used during special procedures such as angioplasty, and there is currently no upper limit on the exposure rate per minute. The amount of radiation exposure to patients during these fluoroscopically guided invasive procedures has become a concern because of the increased risk of injury to the patient. Equipment manufactured after May 19, 1995 is required by FDA rule to automatically limit the exposure rate to 20 roentgens per minute in the high level mode. This addition to the Health Code addresses the remaining equipment manufactured before that date. New York State has already amended Title 10 N.Y.C.R.R., §16.58 to address this potential hazard.

Section 175.63(e) of the Health Code outlines the regulations governing personnel involved in any aspect of mammography. The requirements for radiographic technologists amended to reflect MQSA regulations [21 C.F.R. §900.12(a)(2)]. The mammography quality assurance provisions [§175.63(f)(7)] are amended to include language reflecting the MQSA requirements regarding the minimum imaging quality of equipment prior to performing patient mammograms. The FDA seeks to establish a uniform standard for a breast phantom, which attempts to approximate the imaging conditions which are found during mammographic procedures.

Section 175.101 outlines the general requirements for radioactive materials licenses. Appendices A (Exempt Concentrations) and B (Exempt Quantities) of §175.101 are amended to be consistent with the New York State Sanitary Code.

Statement Pursuant to §1042-Regulatory Agenda

Parts of this resolution were not included in the Regulatory Agenda because recent analysis conducted by the Department on the standards for protection against radiation and radiation producing equipment, and the need to make Article 175 compatible with recently amended Federal and State regulations concerning mammography and fluoroscopy procedures disclosed a need to amend the Code after the Regulatory Agenda was published.

17. Statement of Basis and Purpose in City Record Apr. 3, 2001:

The New York City Department of Health is responsible for assuring that the bathing establishments in the City of New York are constructed and operated in compliance with the New York City Health Code for the purpose of protecting public health and safety. The Health Code must be consistent with, and at least as stringent in its requirements as the New York State Sanitary Code.

The Department has conducted a review of all applicable rules and regulations governing the design, maintenance, and operation of bathing establishments including the New York State Sanitary Code, (Title 10 N.Y.C.R.R. Subpart 6-1), Article 165 of the New York City Health Code (the Code), and other related Federal, State and local rules and regulations. After completing a comprehensive review of all applicable rules and regulations, Article 165 of the Code has been amended to clarify and simplify various complex engineering technical design, maintenance and operation requirements contained in both the Code and the State Sanitary Code. The intent of this amendment is to modernize and update this Article of the Health Code, establishing bathing establishment regulations that are consistent with the Sanitary Code and which include important material not presently covered in the Sanitary Code. These modifications are intended to result in a compendium of regulations that would stand alone and not require reference to the Sanitary Code in its application or use.

The essentials of the amendments are as follows:

GENERAL PROVISIONS

(a) Article 165 has been amended to include definitions such as Aquatic Supervisory Staff, Certified Pool Operator, Responsible Persons, Wading Pool, Spa Pool, White-Water Slide and Movable-Bottom Pool that are currently

regulated under the State Sanitary Code. Additionally, other terms and language are proposed to expand and clarify definitions, to improve readability and to express the intent of such terms as they are used in Article 165.

(b) Article 165 has been amended to exclude pools used for religious purposes (ritual immersion) and physical therapy (activities performed under prescribed medical supervision) purposes only. This amendment would be consistent with New York State rules.

(c) The term "Special Purpose Pool" has been deleted from Article 165 and replaced with the term "Physical Therapy Pool" to apply, where appropriate, to pools used for activities performed under medical or clinical supervision. Wave pools, movable bottom pools, and white-water slide pools will be dealt with separately without use of the term, "Special Purpose Pool".

(d) Article 165 has been amended to include specific requirements governing general procedures for permit application, permit approval criteria, and the process. This should make the application process simpler and less time consuming for both the public and the Department.

SAFETY, OPERATION AND MAINTENANCE REQUIREMENTS

(a) In the interest of protecting the public and promoting public health and safety, Article 165 has been amended to incorporate provisions of the State Sanitary Code that address safety, operation and maintenance, where such are not presently covered in Article 165. In addition, the following proposals would be incorporated:

(1) Amendment of the Article to include specification of ownership, level and certification of supervision requirements for various types of pools such as hotel pools which, under the existing Sanitary Code may be operated without basic CPR certified staff on premises, and condominium pools for which the Sanitary Code does not specify any supervision or staffing requirements. This amendment will significantly contribute to patron safety in the City of New York.

(2) Amendment of Article 165 to include chemical handling and storage requirements consistent with the Sanitary Code.

DESIGN AND CONSTRUCTION CODES

(a) Article 165 has been amended to simplify and consolidate all applicable rules and regulations that include or exceed requirements of the Sanitary Code. Further, the reenactment of Article 165 would reduce the complexity of various technical design and construction requirements. The ultimate goal of these amendments is to make the technical review process simpler and to reduce the risk of injuries to the users.

(b) To be consistent with Sanitary Code, Article 165 has been amended to require fifty square feet (50 sf) per patron of deck area (beyond the required walk way area) in the calculation of the maximum permissible number of bathers allowed on the pool deck at any time. This change represents a thirty-five square foot (35 sf) increase over the existing requirement.

(c) Article 165 has been amended to reflect Sanitary Code requirements for color coding of pool plumbing which are easier to understand and follow for these purposes than City Building Code standards, but will remain consistent with any Building Code requirements related to color coding.

(d) Article 165 has been amended to include installation of an emergency switch at spa pools for purposes of stopping motor(s) that provide power to the recirculation and jet systems. This change is consistent with Article 680 (Swimming Pools, Fountains and Similar Installations) of the National Electrical Code, 1999 Edition.

(e) Article 165 has been amended to include the following "shallow end" requirements:

(1) **Swimming Pool.** The entrance to the pool area shall be at a point adjacent to the shallow end of the pool.

(2) **Wading Pool.** Where there is a wading pool associated with a swimming or wave pool, the wading pool shall be at the shallow end of the adjacent pool.

(3) **Spa Pool.** When the spa pool is adjacent to another pool, the spa pool shall be located at the shallow end.

The remaining amendments would modernize the technical requirements of the existing Article 165 and would represent the current thinking of health and safety experts.

18. Statement of Basis and Purpose in City Record Sept. 24, 2001:

The Department proposes that the Board of Health amend §173.14 of the Health Code governing lead abatement safety standards to: 1) lower Health Code post-abatement re-occupancy clearance dust lead levels to reflect lower levels contained in regulations of the U.S. Environmental Protection Agency (EPA) which became effective March 6, 2001, and 2) require that abatement work areas be sealed off to further reduce occupant exposure from both floor and airborne lead dust.

1. The federal Residential Lead-Based Paint Hazard Reduction Act of 1992 (Public Law 102-550), codified at 42 U.S.C.A. §4851, et seq. directed several federal agencies, including the Department of Housing and Urban Development (HUD), Centers for Disease Control and Prevention (CDC) and EPA to develop lead poisoning prevention guidelines and regulations. In 1993, the Board adopted §173.14 of the Health Code to establish safety standards for lead based paint abatement in New York City. During the past eight years, the Board has amended the Health Code to reflect updated federal regulations and guidelines. The Health Code's current re-occupancy dust lead clearance levels reflect 1996 amendments by the Board based on HUD guidelines. (See **Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing,** U.S. HUD, June 1995.)

EPA has recently promulgated regulations for conducting certain lead-based paint activities. (See Lead; Identification of Dangerous Levels of Lead; Final Rule, 40 CFR Part 745, January 5, 2001.) EPA's regulations include more stringent post-abatement re-occupancy dust lead clearance levels than the above referenced HUD guidelines, and are intended to further minimize exposure to lead hazards. Accordingly, the Department requests the Board to lower the re-occupancy dust lead clearance levels found in Health Code §173.14(e)(4)(dd) in accordance with the more stringent provisions of the EPA regulations, codified at 40 CFR §745.227(e)(8)(viii), as follows:

Floors: 40 micrograms of lead per square foot

Window Sills: 250 micrograms of lead per square foot

Window Wells: 400 micrograms of lead per square foot

After publication of the proposal, the Department proposed amending the above referenced section, inserting the terms "dust lead levels" and "dust lead clearance levels" instead of "lead dust levels" or "dust levels" to more closely reference the federal regulation and emphasize that it is the amount of lead in dust, rather than the amount of dust alone which must be measured. Accordingly, these terms have been incorporated in the resolution adopted.

2. A further amendment is proposed to §173.14(e)(2)(bb)(iii) of the Health Code related to safe lead abatement work practices. This provision currently requires that abatement work areas be sealed off from other areas by taping two layers of polyethylene sheeting over the doorway entry to the work area, creating an "S-shaped" entry-way to prevent the dispersal of lead dust. The current Health Code provision is based on asbestos abatement work practices and is most appropriate where the potential hazards are primarily airborne. However, since most lead abatement work produces both airborne and floor lead dust hazards, the Department believes that it would be more effective to seal off work areas using a method that prevents both air and floor dispersion of lead dust. Accordingly, the Department proposes that the

Board amend this provision, accounting for the above cited HUD Guidelines (Chapter 8 of HUD Guidelines), to require that polyethylene sheeting be taped along all sides of the doorway and that a slit be cut down the middle of the sheeting, leaving intact at least six inches of sheeting attached to the top and six inches at the bottom of the doorway. A second sheet of polyethylene would then be attached to the top of the doorway in the room or area where abatement is being conducted, acting as a flap opening into the abatement area.

18-A. Statement of Basis and Purpose in City Record Jan. 14, 2003:

Chapter 22 of the New York City Charter, as amended by the electorate in the General Election on November 6, 2001 (Questions 5 and 4), merged the New York City Department of Health and the City Department of Mental Health, Mental Retardation and Alcoholism Services into a single agency, the Department of Public Health. On July 29, 2002, the Mayor signed Local Law 22 of 2002 which further amended Chapter 22 and various other provisions of the Charter and the Administrative Code of the City of New York, changing the name of the merged agency to the "Department of Health and Mental Hygiene," retroactive to July 1, 2002. The Charter amendment necessitates amendment of various Health Code provisions which currently specifically identify the "Department" and "Commissioner" as the "Department of Health" and "Commissioner of Health," respectively.

Wherever the term "Department" is defined as "Department of Health" or "Commissioner" is defined as "Commissioner of Health" or where there is a requirement that signs or warnings be posted referring to the Department or Commissioner of Health or another government agency is mentioned in the same Health Code provision referring to the "Department," the provision has been amended making a specific reference to the Department (or Commissioner) of Health and Mental Hygiene. In other provisions, where there is a reference to the "Department of Health" or "Commissioner of Health" the phrase has simply been shortened to the "Department" or "Commissioner" in accordance with the respective amended definitions in §1.03 of the Health Code.

In addition, where the change in Department name appears in a provision referring to another agency which no longer exists, or has been replaced by a successor agency, these references have been updated.

19. Statement of Basis and Purpose in City Record Dec. 17, 2003:

The New York City Department of Health and Mental Hygiene (the "Department") is authorized and required by law to promote and protect the health and safety of New York City residents and visitors by ensuring an environment free from animal-borne diseases and hazards, as well as those caused by other vectors. Article 161 contains various provisions related to issues of public health concern in ownership and management of animals in the City of New York.

The Department enforces provisions of the New York City Health Code (the "Health Code"), the Administrative Code of the City of New York and the New York State Sanitary Code related to investigating reports of animal bites and rabies; managing wild, vicious and/or dangerous animals; licensing and regulating working horses and dogs, and companion dogs; and issuing animal exhibition permits. The Department inspects and issues permits for facilities where animals are sold, adopted, held, groomed, trained, boarded and sheltered. The Department monitors the City's contract for animal care and control services, investigates animal nuisance complaints and cooperates with all government and voluntary agencies involved in the care and control of animals.

New York State and New York City animal control laws are intended to safeguard the health and safety of the public. In addition to having their dogs actively vaccinated against the disease of rabies, responsible dog owners must obtain a license (New York City Dog License Law, Ch. 115 of the laws of 1894, as amended); attach a dog license tag to the dog's collar when the animal is in a public place (see, Health Code §161.04); hold the dog on a leash no longer than six feet when the dog is in a public place (see, Health Code §161.05); and remove their dog's feces from any public areas (see, Health Code §161.03 and New York Public Health Law §1310).

Licensing companion dogs is increasingly seen as an important indicator of responsible dog ownership, reducing the numbers of strays, biting incidents and homeless, unwanted animal overpopulation. It enables owners of stray dogs

to be more easily identified so that lost dogs may be returned to their owners. It makes it possible for the Department to identify and control biting and dangerous dogs, and to control rabies. Information about ownership and rabies vaccination status of a biting dog may aid a victim's medical practitioner in the decision making process regarding the possible need to initiate rabies prophylaxis.

After a pack of dogs inflicted serious bite wounds on two people in the Rockaways in December, 2001, the Department joined with various government agencies and other organizations enforcing dog control and public safety laws, including the New York City Police Department (NYPD), Department of Parks and Recreation (DPR), Department of Sanitation (DOS), Housing Authority, Department of Housing Preservation and Development, Center for Animal Care and Control (CACC) and the American Society for the Prevention of Cruelty to Animals (ASPCA) to form a Dangerous Dog Task Force. The aim of the Task Force is to increase public safety by encouraging responsible dog ownership through the following activities: (a) animal information and ownership sessions, (b) spay/neuter and rabies vaccination clinics, (c) training for various agency units which enforce animal laws and regulations, (d) closing gaps and clarifying applicable laws, and (e) securing vacant properties that provide harborage for stray dogs.

Pursuant to current law, CACC employees who are special patrolmen and NYPD officers may issue notices of violation to owners whose dogs create a nuisance, have no dog license tags attached to their collars, or are unrestrained or improperly restrained. DOS, which is authorized to enforce the State "pooper scooper" law (Public Health Law §1310), and DPR, which currently enforces DPR's animal control regulations in park lands within DPR's jurisdiction, have expressed interest in obtaining authority for their enforcement employees to enforce certain animal control provisions of Article 161 of the Health Code which contribute to public health and safety. Accordingly, the Board of Health has amended applicable provisions of Article 161 of the Health Code to enable DPR and DOS enforcement agents to issue notices of violation of Health Code §161.03 ("Control of dogs and other animals to prevent nuisance"), §161.04 ("Dog Licenses") and §161.05 ("Dogs to be restrained") resulting in an expected improvement in the public's compliance with these provisions.

Except for a letter from the Commissioneer of DOS in support of the proposal, there were no written or oral comments submitted in response to the publication of the proposal in The City Record or at the public hearing.

20. Statement of Basis and Purpose in City Record Mar. 24, 2004:

The Department is responsible for protecting the health and safety of beach users by providing for the proper construction and operation of bathing beaches in New York City. Article 167 of the current Health Code sets forth standards for operation and maintenance of bathing beaches in New York City.

To help protect public health at the Nation's beaches, the Beaches Environmental Assessment and Coastal Health ("BEACH") Act was signed into law in October 2000. **See** Pub. L. No. 106-284, 114 Stat. 871 (2002) (codified at 33 U.S.C. §1313(i)). The BEACH Act required the U.S. Environmental Protection Agency ("EPA") to publish performance criteria for monitoring and assessing coastal recreation waters and for promptly notifying the public when those waters fail to meet applicable water quality standards. In June 2002, the EPA published its performance criteria, which included new public notification procedures, replacement of Coliform with Enterococci as the indicator organism, and revisions to standards and methods of bacteriological analysis. **See** EPA, National Beach Guidance and Required Performance Criteria for Grants (June 2002), **available at http://www.epa.gov/waterscience/beaches/grants/guidance/all.pdf** The BEACH Act further requires that, by April 2004, states implement a monitoring and public notification program that is consistent with performance criteria published by EPA. If a state fails to adopt a program that is consistent with EPA's performance criteria, the BEACH Act requires the EPA to propose a program for the state. Thus, in approximately four months, both New York State and New York City will be required to adopt or comply with EPA's performance criteria.

The Department proposes that Article 167 be repealed and reenacted to adopt the EPA's performance criteria pursuant to the BEACH Act, and to adopt beach safety, operation, and maintenance requirements set forth in the New

York State Sanitary Code (10 N.Y.C.R.R., Ch. 1, Subpart 6-2), which is applicable in New York City.

The key revisions to Article 167 of the Health Code are as follows:

GENERAL PROVISIONS

(1) Proposed section 167.01 ("Applicability") is new. It incorporates sections 6-2.3 and 6-2.8(a) of the State Sanitary Code, as well as existing Health Code §167.03(a).

(2) Proposed section 167.03 ("Definitions") amends existing section 167.01 by expanding and clarifying terms and by adding definitions such as Adequate, Approval, Aquatic Supervisory Staff, Bathing, City, Department, Escherichia coli, Enterococci, Fresh Water, Geometric Mean, Major Alteration, Renovation or Modification, Marine Water, Qualified Lifeguard and Standard Method.

(3) Proposed section 167.05 ("Permit Applications") amends existing section 167.03 by requiring, among other things, that permit applications be submitted 30 days before opening a bathing beach. **See** State Sanitary Code §6-2.5. Proposed subsection (c) is new and would require permits to be renewed before reopening a bathing beach for the season., **i.e.,** May though November. Further, proposed subsection (e) is new and would require bathing beach owners to file an application for change in ownership within 30 days of the sale or transfer.

(4) Proposed section 167.07 ("New Construction, Major Renovation or Modification") would amend existing section 167.05 by adding provisions from section 6.2.19 of the State Sanitary Code.

(5) Proposed section 167.09 ("Enforcement") sets forth new criteria for closing bathing beaches, and is modeled upon State Sanitary Code §§6-2.4(b) and (c).

WATER QUALITY STANDARDS AND CLASSIFICATIONS

To improve monitoring of bathing beaches and public health, the Department proposes to incorporate those provisions of the State Sanitary Code and EPA performance criteria that address water quality standards, monitoring requirements, and beach classifications. The specific amendments include:

(1) Proposed Health Code §167.13 ("Water Quality Standards") would replace the coliform standards in existing Health Code §167.13 with enterococci standards, in accordance with the EPA's proposed new standards for enterococci.

See EPA, Ambient Water Quality Criteria for Bacteria-1986, available at www.epa.gov/ost/pc/ambientwqc/bacteria1986.pdf. Proposed subsection (b) would add the City's Premptive Standards-New York City Wet Weather Advisory. The advisory would provide preemptive measures against swimming and bathing in possibly contaminated water and thus enhance protection of public health.

(2) A new section 167.15 ("Monitoring") has been added to comply with EPA's performance criteria and State Sanitary Code §6-2.15(b), and to incorporate the Department's existing monitoring procedures, which are based on potential pollution sources, storm water discharges, historical water quality data analysis, regional hydrodynamics, beach usage and beach length.

(3) Proposed section 167.17 ("Classifications") changes the beach classification terms in existing Health Code §167.13 (a)-(c) as follows:

(a) "Approved for Bathing" to "Class A: Open for Swimming and Bathing"

(b) "Not Recommended for Bathing" to "Class B: Under Advisory-Not Recommended for Swimming and Bathing" and

(c) "Temporarily Restricted for Bathing" to "Class C: Closed Temporarily Restricted for Swimming and Bathing."

SUPERVISION, SANITATION, SAFETY AND PUBLIC NOTIFICATION

(1) Proposed sections 167.19 ("Supervision and Certification") and 167.21 ("Lifesaving Safety Equipment") amend existing section 167.11 by incorporating those provisions of the State Sanitary Code that address supervision and sanitary safety. **See, e.g.,** State Sanitary Code §§6-2.17, 6-2.19, and 6-2.20.

(2) Proposed section 167.23 ("Beach Safety Plan") is new and reflects some of the Department's existing policies as well as various provisions of State Sanitary Code §6-2.17(c) ("Safety Plan").

(3) Proposed section 167.25 ("Sanitary and Safety Survey") is new, and reflects the Department's current policies.

(4) Proposed section 167.27 ("Public Notification") is new and must be added to comply with the EPA's performance criteria.

OPERATION AND MAINTENANCE REQUIREMENTS

(1) Proposed section 167.29 ("Control of Beach and Water Use") is new and incorporates those provisions of the State Sanitary Code that address operation and maintenance but are not covered in existing Article 167. **See** State Sanitary Code §§6-2.16(a)-(j) and 6-2.18(a).

(2) Proposed section 167.31 ("Facility Use and Maintenance") amends existing section 167.07 by adding various provisions from the State Sanitary Code, such as sections 6-2.11, 6-2.13(b) and (c), and 6-2.19.5.8.

(3) Proposed section 167.33 ("Drowning, Injury and Illness Incidents") amends existing section 167.15 by incorporating State Sanitary Code §6-2.7 in proposed subsection (a), and by adding new reporting requirements in proposed subsection (b).

(4) Proposed section 167.35 ("Record Keeping") is new and reflects the record keeping and reporting requirements set forth in State Sanitary Code §6-2.18.

BATHING BEACH DESIGN AND STANDARDS

In order to provide better guidance to new permit applicants and to current operators and owners who wish to build beach facilities, including bathhouses, it is proposed that a new section 167.37 ("General Requirements") be added to reflect State Sanitary Code §6-2.19, as follows:

(1) Proposed subsection (b) adds pre-qualification requirements for establishing a bathing beach, which consists of site assessment, water surface area, land area, bottom slope, bottom material, sewage discharge, water currents, and water quality. **See** State Sanitary Code §§6-2.19.4.0, 6-2.19.4.9, 4.10, and 4.11.

(2) To modernize the technical requirements of existing Article 167, proposed subsections (d) through (i) incorporate the State Sanitary Code requirements for diving, depth markers, safety and warning signs and electrical requirements, safety equipment, and emergency care/first aid room. **See** State Sanitary Code §6-2.19.4.7 and §6-2.19.4.8.

(3) Proposed subsection (c) would add a maximum bather capacity limitation of at least 25 square feet per bather in shallow water less than four feet deep and at least 75 square feet per bather in deeper water greater than four feet deep. **See** State Sanitary Code §6-2.19.4.3.

POST PUBLICATION CHANGES

After publication of the proposed rule, the Department made changes to the proposal in response to testimony presented at the public hearing held on January 22, 2004 and in response to comments submitted to the Department by the New York State Department of Health (NYSDOH). In response to comments received from the New York City Department of Environmental Protection and after a review of recent EPA publications by the Department, Section 167.13 [Water Quality Standards] of the proposal was changed in consultation with NYSDOH. The "single sample limit/upper percentile value" for both marine water and freshwater beaches was removed from the bacteriological water quality standards.

In response to written comments submitted to the Department by NYSDOH, the following changes were made to the proposal: Section 167.03(d): "water skiing" and "surfing" were deleted from the definition of "bathing". Section 167.03(n): the word "may" has been added to "pose a public health threat" in the definition of "preemptive standards-New York City Wet Weather Advisory". Section 167.05(d) was changed from "500 feet" to "750 feet" to conform with Section 6-2.19, Item 4.10 of the Sanitary Code, which requires a distance of 750 feet between any wastewater discharges and a bathing beach. Section 167.07(c)(1)(G) was revised to include a "water clarity" test as required by Section 6-2.19, Item 4.11.3 of the Sanitary Code. Section 167.13(a)(1): "E. coli" was added to the bacteriological water quality standard. Section 167.17(b)(2): the beach classification "Class B: Under Advisory-Not Recommended for Swimming and Bathing" was revised in that a beach may be assigned to this category when there is contamination on the beach or evidence of sewage and wastewater discharge "which may constitute a potential public health hazard". Section 167.21 was revised. A pocket face mask or face shield is now required at all beaches to avoid delays in the initiation of CPR. In addition to being required at all beaches, a rescue tube or torpedo buoy, a rescue board or lifeboat, a spine board and a first aid kit are also required "for each 500 yards of beachfront or fraction thereof". Section 167.25 was revised and now reads "if pollution which may potentially present a public health threat is observed, as described in Section 167.13(a)(2), the operator shall close the beach immediately and notify the Department for further instructions". Section 167.27(b)(2) was revised to require that "the operator must close the beach and beach closure signs must be posted" if adverse weather or environmental conditions pose a threat to the health and safety of the public. Section 167.37(d)(2) was revised to require that for a diving board three or less feet above the water, the 10-foot required depth at the end of the diving board should extend for 12 feet beyond the board as required in Section 6-2.19, Item 4.8.2 of the Sanitary Code.

20-A. Statement of Basis and Purpose in City Record July 30, 2004:

Introduction

The Board of Health has amended various provisions of the Health Code to harmonize current provisions of the Health Code, applicable to public and private lead poisoning prevention activities and safe lead-based paint work practices in child-occupied dwelling units and children's group day care and public kindergarten programs, with Local Law 1 of 2004 (Local Law 1) and current regulations of the U.S. Environmental Protection Agency ("EPA").

Over the past 30 years there has been a dramatic decline in childhood lead poisoning; however, childhood lead poisoning remains a significant public health concern. Elevated blood lead levels have been associated with intelligence deficiencies, reading and learning disabilities, reduced attention span, hyperactivity and behavior problems. The ingestion of household dust containing lead from deteriorating or abraded lead-based paint is believed to be a primary factor in lead poisoning occurring in children under six years of age.

In 1960, the Board of Health amended the Health Code to ban the use of lead-based paint on residential interior surfaces. In 1970, the Health Code was further amended to provide that the Department investigate a child's home for possible environmental lead hazards when there is a report of a child with an environmental intervention blood lead level ("EIBLL"). Local Law 1 of 1982, the City's first lead poisoning prevention law, amended the Housing Maintenance Code (Title 27 of the Administrative Code of the City of New York) to require owners to correct lead-based paint hazards in dwelling units in multiple dwellings where children under seven years of age resided, but was never fully implemented. Its provisions were interpreted as requiring abatement of all lead-based paint, not just

deteriorating lead-based paint, despite the nearly universal consensus that requiring abatement of intact lead-based paint could result in increasing children's risk of lead poisoning. In 1999, after many years of litigation relating to implementation of Local 1 of 1982, the City Council enacted Local Law 38, repealing Local Law 1, to create a more pragmatic and workable approach to housing maintenance than was possible under Local Law 1 of 1982. However, on July 1, 2003, New York's highest court invalidated Local Law 38 on the grounds of inadequate review under the State and City environmental quality review laws and on February 5, 2004, the City Council, overriding the Mayor's veto, enacted Local Law 1 of 2004, repealing Local Law 1 of 1982 and Local Law 38 of 1999.

In 1992 the U.S. Congress enacted Title X-the Residential Lead-Based Paint Hazard Reduction Act (Title X), to develop a national strategy to build the infrastructure necessary to elimate lead-based paint hazards in federally assisted housing. Throughout the 1990's, federal agencies sponsored studies and assessments to help determine how to best prevent lead poisoning in young children. The U.S. Department of Housing and Urban Development ("HUD") initially published guidelines for lead hazard assessment and remediation in 1995. Comprehensive HUD regulations did not become effective, however, until September 15, 2000, and are applicable to lead remediation in federally subsidized housing. It was not until March 1, 1999 that EPA's regulations for "abatement" of lead-based paint by certified workers and firms became effective in New York State.

Since 1993, Health Code §173.14 has specified procedures and methods for correcting lead-based paint hazards when ordered or directed by the Department, or, in some cases, when correcting violations placed by the City's Department of Housing Preservation and Development (HPD) pursuant to Title 27 of the Administrative Code of the City of New York (hereinafter "Administrative Code" or "Housing Maintenance Code"). Section 173.14 has been amended periodically by the Board to reflect prevailing safety standards and legal requirements. Methods and work practices for lead based paint abatement are specified in the Health Code and generally prohibited any person from performing an "abatement" if the person had not complied with applicable laws requiring training, licensing, certification, or other authorization. However, as noted, it is only since March 1, 1999 that EPA regulations have specified training, certification and work rules for firms and personnel performing various lead-based paint activities. See, e.g., EPA regulations at Title 40 Code of Federal Regulations Part 745 ("40 CFR 745").

EPA's rules now govern procedures and requirements for the certification of individuals and firms engaged in certain lead-based paint activities state-wide, and work practice standards for performing the activities defined in EPA's rules. These rules require certain changes in the Health Code. For example, EPA's rules define "abatement" as any measure or set of measures designed to permanently eliminate lead-based paint hazards, and any firm or individual performing abatement as defined by EPA must be EPA-trained and certified. EPA's definition of abatement excludes activities that are not designed to permanently correct lead-based paint hazards, such as renovation, remodeling, or repair activities that may incidentally result in a reduction or elimination of lead-based paint hazards or disturbing lead-based paint. Furthermore, EPA's certification requirements do not apply to interim controls or other operations and maintenance activities designed to temporarily, but not permanently, reduce lead-based paint hazards. EPA also does not regulate individuals or firms engaged in non-abatement activities.

Local Law 1 of 2004 requires owners of older multiple dwellings in which a child under seven resides to identify and remediate lead-based paint hazards. There is also a broad requirement for remediation of lead-based paint hazards whenever a tenant vacates a rental unit. Local Law 1 defines remediation as the "reduction or elimination of a lead-based paint hazard by wet scraping and repainting, removal, encapsulation, enclosure, or replacement . . . or other method approved by the commissioner of health and mental hygiene." Local Law 1 does not specify a preferred method to be utilized in remediation. Although the method of remediation is optional, Local Law 1 requires lead dust clearance testing after correction of HPD violations and after voluntary repairs by owners which disturb two or more square feet of lead-based paint per room in housing subject to the law. Local Law 1 also specifies minimum training and certification requirements for individuals and firms engaged in remediation and conducting final lead dust clearance testing.

Local Law 1 also provides that the work practices in HPD rules "shall be no less stringent than the safety standards

required by the commissioner of health and mental hygiene whenever such commissioner shall order the abatement of lead-based paint hazards pursuant to §173.13 of the health code or a successor rule. . . ." See, e.g., Administrative Code §27-2056.11(a)(1). This and other requirements in Local Law 1 have resulted in parallel, nearly identical, work practices rules in both the amended Health Code and HPD rules.

There are differences between HPD's final rules and the Health Code, particularly pertaining to the use of wet scraping and repainting. This method was considered an "exclusive interim control" in Local Law 38, but is only one of several methods of remediation in the new Local Law 1 and in the proposed amended Health Code. While the amended Health Code no longer allows this as a method of "abatement" its limited use will be allowed in certain circumstances. Although EPA rules do not define wet scraping and repainting as a method of abatement, this method of lead-based paint hazard reduction will continue to be an acceptable way to correct violations, both pursuant to HPD rules and when ordered by the Department in certain circumstances. In the Notice of Intention to amend published for public comment, the Department initially proposed that wherever the term "abatement" appears in the current Health Code with respect to lead-based paint and lead hazards, the term "remediation," a broader and more inclusive term, but used. In response to comments received objecting to this change in all cases, the final resolution retains the term "abatement" in §173.13(d)(2) with respect to children with environmental intervention blood lead levels. The work practices governing remediation of lead-based paint hazards incorporate the provisions of Local Law 1, EPA rules applicable to "abatements" and nearly all the current provisions of existing Health Code §173.14 are reorganized according to the magnitude and permanence of the remediation work. Local Law 1 adds a new Chapter 9 ("Lead-Based Paint in Day Care Facilities") to Title 17 of the Administrative Code, imposing some additional requirements are lead-based paint hazard remediation and inspections on group day care operators and the owners of the buildings in which day care is located, which will need to be have been harmonized with existing provisions in Article 47 of the Health Code. Although Local Law 1 imposes no new requirements for remediation of lead-based paint hazards in Department of Education-operated kindergartens, the Department has imposed in the past, and proposes that the Board continue to impose, the same requirements for preventing exposure of children under six in public kindergartens to lead-based paint hazards as may be applicable to day care, pre-kindergarten classes and non-public kindergartens. See, e.g., Health Code §§45.12 and 47.44.

Amend Health Code §173.13 ("Lead Paint")

1. Amend Health Code §173.13(a) by adding a provision to enhance enforcement of the prohibition in both Health Code §173.14 and Local Law 1 of dry sanding and scraping. This provision requires places of business selling paint or paint removal products to post a warning sign alerting consumers to the prohibition of this method in dwellings, day care centers and schools. This section is being further amended to authorize enforcement by the City's Department of Consumer Affairs, which currently inspects hardware and paint suppliers in the City to enforce laws restricting sales of box cutters and spray paints.

2. Amend Health Code §173.13(d)(1) to better reflect national recognition, federal guidelines, and the Department's experience in identifying and ordering remediation of lead hazards in housing, other buildings, and the areas surrounding such structures, in which children may reside or spend time, but which are not subject to the lead poisoning prevention provisions of the Housing Maintenance Code. Such premises include owner-occupied cooperative, condominium and one- and two-family homes, and commercial buildings in which children's institutions and programs are located, or to which children at risk may have access. While the Department has exercised its general nuisance abatement authority (see, e.g., Health Code §3.11), in ordering the abatement of lead hazards on building exteriors, from fire escapes or yard soil and even at a museum exhibition of soft lead tiles, Health Code §173.13(d)(1) is being amended to include a provision authorizing the Department to order the remediation of any leaded substances it finds which may present a hazard to children.

3. Amend §173.13(d)(1) to authorize the Department to order remediation of lead-contaminated dust in a dwelling unit where the source of the lead-contaminated dust is not a condition of the dwelling in which the unit is located.

4. Amend §173.13(d)(2) to change the mandatory environmental intervention action level for a lead poisoned child from a single 20 mcg/dL or greater blood lead level to a single 15 mcg/dL or greater. Local Law 1 amends Title 17 of the Administrative Code to provide for this intervention level.

5. Add a provision to §173.13 concerning the disposition of objections to Department orders to remediate lead hazards. From 1970 to 1997, the Department used X-ray fluorescent analysis (XRF) equipment for sampling lead-based paint. The particular model of the machine used became outdated in the early 1990's, because it was not able to adjust for composition of the substrate of building components in calculating the value of lead on surface paint. Because of these equipment limitations, the Department's orders to abate nuisance were subject to routine challenge by owners submitting contrary results of laboratory analysis of paint chip samples. The process of removing paint chips further damaged deteriorated lead painted surfaces and contestations delayed the correction of confirmed lead-based paint hazards in dwellings where children with an EIBLL resided. In 1997, the Department purchases XRF equipment that self-adjusts for substrate composition. At the same time, a new Health Code definition of lead-based paint was adopted which incorporated federal definitions and the availability of federal calibration standards for XRF equipment. This has resulted in the Department generally rejecting the challenges of owners who simply submitted results that differed from the Department's. This Department practice was challenged in two suits, but upheld by the courts. See, e.g., 601 **Realty Corp. v. City of New York Department of Health,** 269 AD2d 268, 703 NY2d 458 (AD 1st Dept. 2000). Processing such contestations unacceptably delays remediation of surfaces in the home of a lead poisoned child and promotes the taking of paint chips from deteriorating surfaces, further endangering such children. Currently, objections to Department orders are considered only if the objector presents evidence that the Department's XRF equipment is not functioning or was not calibrated properly, not merely because the onwer's XRF or laboratory sampling results are different than the Department's. Two comments objecting to this amendment were received, but for the reasons already stated, no change has been made in the resolution.

Repeal and re-enact Health Code §173.14

1. Add definitions to Health Code §173.14(b). Define "abatement" as a set of measures specifically designed to permanently correct lead-based paint hazards, consistent with the federal definitions [24 CFR 35.110 (1999) and 40 CFR 745.223 (1997)]; "remediation" as the reduction or elimination of a lead-based paint hazard (Local Law 1, Administrative Code §27-2056.2); and "disturbance" as any action taken which breaks down, alters or changes lead-based paint (15 RCNY Chapter 1). Other applicable definitions of terms in the rules generally adopt the same definitions in Local Law 1 or in EPA rules.

2. Add provisions to Health Code §173.14(c), tracking Local Law 1 and EPA rules, differentiating training and credentialing requirements for abatement, other remediation of lead-based paint hazards, and disturbance of lead-based paint in the course of conducting other non-ordered repair and maintenance activities.

3. Amend the administrative requirements of Health Code §173.14(c).

(i) Notification of commencement of work requirements. Local Law 1 [§27-2056.11(a)(2)(ii) of the Administrative Code] requires building owners or their representatives to notify the Department prior to performing work that will disturb greater than 100 square feet of paint per room or involve removing two or more windows. Comments received from owner and housing rehabilitation organizations indicated that such requirements would be excessively bureaucratic and burdensome and served no useful purpose. Comments supporting the notice requirement stated that the notice requirement was not "unreasonable." No change has been made in the resolution.

(ii) Recordkeeping. Currently, Health Code §173.14(c)(3) requires building owners to maintain records for seven years; Local Law 1 [§27-2056.17 of the Administrative Code] requires building owners to maintain records for ten years.

4. Amend training and certification requirements in Health Code §173.14(c)(2) to harmonize EPA, Local Law 1

and Department remediation requirements. EPA regulations (40 CFR Part 745, Subpart L) specify that firms, inspectors, risk assessors, supervisors, project designers and workers performing abatements be EPA certified. Local Law 1 specifies that only the **firms** engaged to perform work to remediate HPD violations, or non-violation work that disturbs greater than 100 square feet of paint per room or which involves the removal of two or more windows must be certified to perform lead abatements in accordance with 40 CFR Part 745, Subpart L. See, §27-2056.11(a)(2)(ii) of the Administrative Code. The amended Health Code requires that all **abatement** activities be performed only by firms and personnel who are EPA certified, but that only the firms require EPA-certification to conduct other lead-based paint remediation activities regulated by Local Law 1 or the Health Code, and that their workers be HUD trained. However, all work ordered by the Department pursuant to Health Code §173.13(d)(2) to correct interior lead-based paint hazards where there is a child with an environmental intervention blood lead level will be termed "abatements" and will require use of EPA-certified workers.

5. Workers performing work other than abatement. Local Law 1 specifies that persons performing work that disturbs from two to 100 square feet of paint per room or does not involve the removal of two or more windows must have successfully completed a course on lead safe work practices offered or approved by HUD or the Department. See, §27-2056.11(a)(2)(i) of the Administrative Code. HUD regulations specify training requirements for persons performing interim control work (including remediation by the method of wet scraping and repainting) as defined in federal regulations. See, 24 CFR §35.1330(a)(4). The amended Health Code requires workers performing such remediation pursuant to Local Law 1 [see, §27-2056.11(a)(2)(i) of the Administrative Code] to be trained in accordance with these HUD regulations. Local Law 1 exempts from its worker training requirements any worker performing work that disturbs lead-based paint surfaces consisting of less than (a) two square feet of peeling lead-based paint per room or (b) ten percent of the total surface area of peeling paint on a type of component with a small surface area, such as a window sill or door frame in a multiple dwelling unit or day care facility. See, §§27-2056.11(a)(2)(iii) and 17-912 of the Administrative Code.

6. The Department is conducting an ongoing public health education campaign to increase awareness of potential lead hazards to young children from exposure to leaded dust and debris resulting from even minimal home repairs and maintenance, and the Health Code requires that signs be posted at places where paints are sold and paint scrapers are sold or rented warning that dry scraping of lead-based paint is prohibited in the City in any building where children reside. The Health Code, Local Law 38, HPD rules and Local Law 1 contain provisions prohibiting dry scraping and sanding as a method of removal of lead-based paint, but the signage requirement is new and not mandated by any law. To enhance enforcement of this provision, Health Code §173.13(a) has been further amended to authorize enforcement by the City's Department of Consumer Affairs which already inspects hardware and paint stores to enforce laws restricting sales of box cutters and spray paints.

7. Workers remediating lead-based paint hazards violations pursuant to Department orders (other than when ordered to permanently abate lead-based paint), issued pursuant to Health Code §§45.12, 47.44 and 173.13(d)(1), HPD orders or violations issued under §27-2056.11(a)(1) of the Administrative Code, or where any work disturbs greater than 100 square feet of paint per room or involves the removal of two or more windows pursuant to §27-2056.11(a)(2)(ii) of the Administrative Code, will be required to be minimally trained in accordance with HUD regulations. See, 24 CFR §35.1330(a).

8. Add requirements in Health Code §173.14(c)(2)(bb) for qualifications of persons performing lead-contaminated clearance dust tests after the completion of non-abatement work that disturbs lead-based paint. Local Law 1 requires lead-contaminated dust clearance testing at the completion of all work performed in compliance with Department orders; to correct HPD violations pursuant to §27-2056.11(a)(1) of the Administrative Code; that disturbs areas consisting of (a) two or more square feet of peeling lead-based paint per room or (b) ten percent of the total surface area of peeling paint on a type of component with a small surface area, such as a window sill or door frame, pursuant to §27-2056.11(a)(2)(i) and (ii) of the Administrative Code; on turnover, pursuant to §27-2056.8 of the Administrative Code; and in day care facilities, pursuant to §17-912 of the Administrative Code. Health Code §45.12 requires that lead-based paint work performed in kindergartens operated by the City Department of Education must be performed in

accordance with Health Code §173.14, and dust wipe tests by similarly trained personnel will also be required after the completion of such work in these facilities.

9. As repealed and re-enacted, Health Code §173.14(e)(1)(I)(iii) specifies that no person shall perform a lead-contaminated dust clearance test unless such person is a third-party, who is independent of the owner and firm that performs the work. Section 27-2056.11(b) of the Administrative Code also specifies that no person shall perform a lead-contaminated dust clearance test unless such person has successfully completed a course approved or administered by the Department, EPA or HUD. HUD regulations specify training requirements and courses for persons performing clearance dust testing following work other than abatement. Health Code §173.14(c)(2)(A) requires all persons performing any abatement work, including dust test sampling, to be EPA certified. Health Code §173.14(c)(2)(B) specifies training of persons performing work disturbing lead-based paint, or paint of unknown lead content, in Department of Education kindergartens and work conducted in compliance with orders issued by the Department to remediate lead-based paint hazards, when such work would not be considered an "abatement." See, HUD regulations 24 CFR 35.1340(b)(1). Although one comment requested that the requirement for dust testing to be conducted by an independent third party be deleted as economically burdensome, the Department does not believe that such a change would benefit the public health.

10. Revise work methods and occupant protection standards in Health Code §173.14(d) and (e). Local Law 1 specifies that the rules for an owner correcting HPD violations, or doing any work that disturbs more than 100 square feet of lead-based paint per room without a violation, shall be no less stringent than those utilized in complying with an order issued pursuant to Health Code §173.13. The Health Code amendments accordingly specify work methods and occupant protection practices in buildings constructed before January 1, 1960, where children under 7 reside, for various types of lead-based paint activities. Required preparation of the work area is categorized in subdivision (e) as follows: (1) work to remediate lead-based paint hazards pursuant to a Department order, an HPD violation or non-ordered work that disturbs over 100 square feet of lead-based paint per room; (2) work performed that disturbs small or moderate amounts, i.e., two to 100 square feet per room, of lead-based paint, and the same amounts of non-ordered work performed in a day care facility or a Department of Education kindergarten; and (3) work performed in a dwelling unit upon turnover.

11. Remediation work to comply with a Department order or correct an HPD violation, or non-ordered work that disturbs more than 100 square feet of lead-painted surfaces per room, shall require that floors be cleaned before commencing work. In conducting work that disturbs lead-based paint in accordance with §17-911 (day care services), §27-2056.11(a)(2)(i) of the Administrative Code, or §45.12 (kindergartens) of the Health Code additional requirements would include using multiple layers of plastic or equivalent sheeting as needed to prevent dust from contaminating the floor; and, where applicable, turning off forced air systems in the work area and sealing off any vent openings in the work area with polyethylene.

12. Work to remediate lead-based paint hazards on turnover would require preparation of the work area using the procedures described above. However, since the dwelling unit will not be occupied while work is in progress, clean-up procedures are only specified at completion of all work, followed by lead-contaminated clearance dust testing.

13. In response to public comments, additional provisions have been added to §173.14(d) and (e), reflecting HPD's final rules, to clarify under what conditions occupants of units undergoing work that disturbs lead-based paint must be relocated; and under what conditions occupants who do not relocate may have temporary access to work areas which have been adequately cleaned, but have not been cleared for "permanent re-occupancy" because work has not been completed, or where work has been completed and lead-contaminated dust test results have not been received.

Additional changes in subdivisions (d) and (e) have been made, deleting as unnecessary a provision which required a one hour delay after final cleaning before collecting lead-contaminated dust clearance test samples, and clarifying that only objects in the work area required pre-work cleaning, and that only doors and cabinets covered with lead-based paint or paint of unknown lead content require re-hanging or other treatment to avoid binding.

Subdivision (h) of §173.14 has been further amended to add that the Commissioner or designee may also issue modifications of the application of provisions in §173.13, when compliance with orders issued pursuant to such provisions present practical difficulties or unusual hardships. Articles 45 and 47 already contain a similar provision and do not require further amendment.

To facilitate use of this complex section, a new table of contents has been added to §173.14.

Repeal §173.15 ("Unsafe lead based paint work practices")

This section authorized the Department to respond to complaints of unsafe lead-based paint work practices, and its substantive provisions have been incorporated within §173.14 of the Health Code. The provision was originally adopted to implement Local Law 38 of 1999, and was modeled on the procedures in the repealed Health Code §173.14(c)(1)(cc). Local Law 1 of 2004 includes such a provision in a new §17-185 of the Administrative Code, mandating that the Department respond to such complaints. It may be found in subdivision (f) of the Health Code §173.14, as re-enacted.

Amend §§47.44 and 45.12

Amend §47.44 ("Lead Based Paint Restricted") of Article 47 ("Day Care Services") to harmonize Health Code provisions for remediation of lead-based paint hazards in day care services with new provisions added to Title 17 of the Administrative Code (Chapter 9: "Lead-Based Paint in Day Care Facilities") and amend §45.12 ("Lead Based Paint Restricted: Kindergartens") to track §47.44. The amendments to §47.44 include a new declaration of nuisance, modeled on that in §173.14, which will enable the City to recover its costs in remediating lead-based paint hazards in day care services whenever the Department determines that the operator of the day care service or the owner of the building in which the service is located who was ordered to remediate lead hazards has failed to substantially comply with such order. The resolution as adopted contains a new provision, similar to the provision in HPD's rules, establishing a procedure for owners or operators of day care services to present evidence opposing Department orders to remediate peeling paint of unknown lead content, by demonstrating that such paint does not contain lead. Each of these sections has also been further amended by adding provisions referencing the definitions in §173.14 of the Code.

Statement of Need for Immediate Implementation

I hereby find, pursuant to §1043(e)(1)(c) of the New York City Charter, that there is a substantial need for the immediate implementation of amendments to Articles 45, 47 and 173 of the New York City Health Code ("amendments") adopted by the Board of Health (the "Board") harmonizing such provisions with Local Law 1 of 2004 ("New York City Childhood Lead Poisoning Prevention Act of 2003", hereinafter "LL 1") and with the rules of the New York City Department of Housing Preservation and Development ("HPD"), amending Chapter 11 of Title 28 of the Rules of the City of New York concerning lead-based paint, to enable such amendments to take effect on August 2, 2004, the day LL 1 and HPD's rules take effect.

The implementation of the amendments before the expiration of the thirty-day post-publication period required by Charter §1043(e)(1)(c) is necessary to avoid inconsistencies between the Health Code and LL 1 and the HPD rules for any period of time. Adoption of these amendments has required (a) an initial meeting of the Board on May 19, 2004 to approve the publication of the amendments in the City Register: (b) a public hearing held thirty days after the publication of the amendments; and (c) a second meeting of the Board to consider and adopt the amendments. The notice of intention to amend the Health Code was published in the City Record on May 21, 2004 and a public hearing held on June 23, 2004. The Board met to consider the public comments and adopted the final amendments on July 22, 2004. Adherence to the thirty-day post-publication requirements set forth in §1043 of the Charter would mean that these amendments would not take effect until some time in late August, after HPD's rules are in effect.

Local Law 1 and HPD's rules contain extensive and complex provisions for lead-based paint remediation in multiple dwellings occupied by children under seven years of age, and in day care services caring for children under six years of age. Local Law 1 requires that the work practices in HPD's rules be "no less stringent than the safety standards

required by the commissioner of health and mental hygiene whenever such commissioner shall order the abatement of lead-based paint hazards pursuant to §173.13 of the health code or a successor rule. . . ." See, Administrative Code §27-2056.11(a)(1). HPD's rules were published in the City Record July 2, 2004, and will take effect on August 2, 2004. Simultaneous implementation of the amendments to the Health Code, the HPD rules and Local Law 1 on the same day will help avoid potential public and regulatory confusion.

Thomas R. Frieden, M.D., M.P.H. Commissioner Department of Health and Mental Hygiene

Approved by Michael Bloomberg, Mayor

21. Statement of Basis and Purpose in City Record July 30, 2004:

The New York City Department of Health's Office of Radiological Health (ORH) supervises and regulates the public health aspects of ionizing radiation, including the handling and disposal of radioactive waste and responding to emergencies involving sources of ionizing radiation. The Office of Radiological Health carries out its mandate through its registration, licensing, inspection, emergency response and public education programs.

The Department is requesting the authority to use State Certified Radiation Safety Officers as part of its x-ray inspection program by amending §175.51(n) of the New York City Health Code. Section 175.51(n) covers inspections. It is proposed that a new paragraph (E) be added to paragraph 2 of subsection (n) of §175.51 to include language that would authorize the Department to utilize Certified Radiation Equipment Safety Officers (CRESO) for the inspections of dental and podiatric installations in lieu of or in addition to using the Department's ORH inspectors. This proposed amendment would allow the Department's ORH flexibility in assuring timely inspections for these types of installations during years when there are large numbers of these installations coming due for inspections.

22. Statement of Basis and Purpose in City Record Sept. 22, 2004:

The New York City Department of Health and Mental Hygiene is currently developing an Electronic Death Registration System (EDRS) and plans to begin implementation in October 2004. [See Local Law 2 of 2004]. EDRS will enable death certificates to be filed, processed and amended electronically. EDRS will provide many benefits, including, improved accuracy, data quality and timeliness; enhanced security provided by encryption and identity authentication and real-time error-detection, to name a few. To facilitate the implementation and use of EDRS, and to update the Department's procedures and bring them into conformance with those of many other jurisdictions, it is necessary to propose certain changes in the Health Code.

The Department repealed Section 205.15 of the Health Code in its entirety. The provision requires that when an amputated part of a living person is recovered during an operation, a certificate of amputation be delivered within 48 hours to a funeral director, who then shall file it with the Department within 72 hours following the operation. The Department believes that this requirement is outdated, does not serve a purpose and removing this requirement would also be consistent with other jurisdictions that have no such requirement.

Sections 205.25(d) and 205.33(b) are amended to eliminate the necessity of affidavits accompanying applications for permits for cremation and disinterment. The Department believes that there is no need for the affidavits to accompany the applications submitted to the Department but rather that the affidavits can be appropriately retained by the funeral director or undertaker in charge of the cremation or disinterment.

23. Statement of Basis and Purpose in City Record Mar. 16, 2005:

The New York City Department of Health's Office of Radiological Health supervises and regulates the public health aspects of ionizing radiation, including the handling and disposal of radioactive waste and responding to emergencies involving sources of ionizing radiation. The Office of Radiological Health carries out its mandate through its registration, licensing, inspection, emergency response and public education programs.

The New York City Charter [Section 556(c)(11)] empowers the Department to regulate all aspects of ionizing radiation within the five boroughs of New York City. The New York State Sanitary Code [10 N.Y.C.R.R. Part 16] delegates ionizing radiation material regulation and oversight to those municipalities having a population of more than 2,000,000. The Federal Atomic Energy Act of 1954 [Section 274(o)], as amended, authorizes State regulation of byproduct material, source material and special nuclear material in quantities not sufficient to form a critical mass pursuant to an Agreement with the U.S. Nuclear Regulatory Commission (NRC) (formerly the Atomic Energy Commission). The New York City Department of Health and Mental Hygiene, as part of the New York State Agreement, therefore exercises regulatory authority for radioactive material within the City.

Article 175 is amended in order to achieve consistency with federal regulations. Each Agreement State (there are currently 31) program is required to maintain compatibility with the NRC regulatory program. The NRC ensures an adequate level of compatibility through the Integrated Materials Performance Evaluation Program (IMPEP) and conducts a quadrennial review of Agreement State programs. The latest IMPEP review of the New York State program took place in July of 2002.

In the July 2002 IMPEP review, the NRC evaluated each of the four participants of the New York State Agreement, which consist of the New York State Department of Health, New York State Department of Labor, New York State Department of Environmental Conservation, and the New York City Department of Health and Mental Hygiene. NRC findings were presented in their Final Report dated November 12, 2002.

Article 175 of the New York City Health Code is amended in order to comply with the NRC IMPEP report and to be compatible with NRC regulations. Section 175.02 (141) and (161) are amended to add language to the definitions of "Occupational dose" and "Public dose" and to clarify that these doses do not include exposure to individuals administered radioactive material and released under §175.103(c)(9).

Section 175.101(h)(4)(vi) is amended to address the specific language found in 10 CFR Part 30 "Timeliness in Decommissioning Material Facilities". The language is amended to assure that licensees, who wish to terminate licensed activities, perform decommissioning within timeframes prescribed by the Department.

Section 175.101(h)(viii)(B) is amended to include the language found in 10 CFR Part 20 "Radiological Criteria for License Termination". This amendment deals with specific dose limits to members of the public from sites released for unrestricted use.

A new subparagraph (viii) is added to subsection (k) of §175.101 to reflect the language found in 10 CFR Part 30 "Deliberate Misconduct by Unlicensed Persons". This amendment will allow the Department to conduct enforcement actions against individuals who provide inaccurate or incomplete information to the Department.

Section 175.101(m) covers reciprocity. A new paragraph (2) is added to subsection (m) of §175.101 to address the specific language found in 10 CFR Part 150 "Recognition of Agreement State Licensees in Areas Under Exclusive Federal Jurisdiction Within an Agreement State". The amended language will clarify the fact that Agreement State Licensees can seek reciprocal recognition of their license from the Nuclear Regulatory Commission when working within areas of exclusive Federal jurisdiction in New York City.

Section 175.101(n)(1) is amended to remove a redundant "of the" in the first paragraph and to reflect the language found in 10 CFR §30.35 by adding a new paragraph to §175.101(n)(1), which will require licensees that are authorized to possess sealed sources or plated foils of half-life greater than 120 days and in quantities exceeding 10 to the 12th times the applicable quantities set forth in Appendix B, to submit a decommissioning funding plan as described in §175.03(n)(4) of this section.

Section 175.101(n)(5) is amended to add language found in 10 CFR §30.35 concerning adjusting cost estimates for decommissioning at intervals not to exceed 3 years; and

The first sentence of §175.101(n)(7) is amended to add language found in 10 CFR §30.35 which requires licensees to keep records of decommissioning until the site is released for unrestricted use.

Appendix B (Exempt Quantities) of §175.101 is amended to include americium, plutonium and any alpha radionuclide not listed above or mixtures of alpha emitters to be consistent with 10 CFR Part 30 Appendix B.

Statement Pursuant to §1042-Regulatory Agenda

This rule was not included in the Regulatory Agenda because it is the result of an analysis conducted by the Department to ensure consistency with the NRC requirements.

24. Statement of Basis and Purpose in City Record Mar. 20, 2006:

Background/Overview

This amendment, as outlined below, is intended to increase the effectiveness of the New York City Childhood Lead Poisoning Prevention Act of 2003, Local Law 1 of 2004, in preventing childhood lead poisoning. In accordance with provisions of Local Law 1 of 2004, it lowers the age of a "child of applicable age" which triggers Local Law 1 of 2004 actions from "under seven years of age" to "under six years of age" in order to better prioritize the invested private and public moneys and resources for lead-based paint hazard reduction in housing. Protecting younger children who are at greatest risk for lead poisoning is the most effective and efficient way of preventing childhood lead poisoning in New York City.

In 1960, the Board of Health amended the Health Code to ban the use of lead-based paint on residential interior surfaces. In 1970, the Health Code was further amended to provide for an investigation by the Department of possible environmental lead hazards in the home of a child with a reported Environmental Intervention Blood Lead Level ("EIBLL"). Local Law 1 of 1982, the New York City's first housing maintenance law aimed at the primary prevention of childhood lead poisoning, amended the Housing Maintenance Code (Title 27 of the Administrative Code of the City of New York) to require owners to correct lead-based paint hazards in dwelling units in multiple dwelling buildings where children under seven years of age resided. In 1999, the City Council enacted Local Law 38, repealing Local Law 1 of 1982, to create what it characterized as a more pragmatic and workable approach to housing maintenance than was possible under Local Law 1 of 1982. However, on July 1, 2003, New York's highest court invalidated Local Law 38 on the grounds of inadequate review under the State and City environmental quality laws. On February 5, 2004, the City Council voted to override the Mayor's veto and enacted Local Law 1 of 2004, repealing Local Law 1 of 1982 and Local Law 38 of 1999.

Local Law 1 of 2004 amended the Housing Maintenance Code and other provisions of the Administrative Code with respect to addressing lead hazards in units in multiple dwellings in which a child of "applicable age" resides. To maintain consistency with the Administrative Code, the Board of Health repealed and reenacted various Health Code provisions applicable to lead-based paint hazard control and remediation in the homes of children with EIBLL, as well as in day care facilities, kindergartens and residences of other children of applicable age. Effective August 2, 2004, Local Law 1 of 2004 included a provision defining a child of "applicable age" and also authorized the Board of Health to amend such definition, as follows:

§27-5056.18 Application of this article based on age of child. For the purposes of this article, the term "applicable age" shall mean "under seven years of age" for at least one calendar year from the effective date of this section. Upon the expiration of such one year period, in accordance with the procedures by which the health code is amended, the board of health may determine whether or not the provisions of this article should apply to children of age six, and based on this determination, may redefine "applicable age" for the purposes of some or all of the provisions of this article to mean "under six years of age," but not lower.

The Amendment

Over the past 35 years there has been a dramatic decline in childhood lead poisoning; however, childhood lead poisoning remains a significant public health concern. Elevated blood lead levels have been associated with reduced intelligence, reading and learning disabilities, reduced attention span, hyperactivity and behavior problems (Baghurst et al., 1992; Bellinger et al., 1994; Lanphear et al., 2000; Mendelsohn et al., 1998). Interior lead-based paint that is peeling, cracking or chipping and dust from peeling or damaged lead-based paint remain major sources of lead exposure for urban children including New York City (NYC) children (Bellinger et al., 1986; Clark et al., 1992; Lanphear et al., 1996; Lanphear and Roghmann, 1997; NYC Department of Health and Mental Hygiene, Childhood Lead Poisoning Prevention Program Annual Report, in press). The primary route of exposure to lead-based paint in children is ingestion of lead-contaminated household dust (CDC, 2002).

The Department believes that the reduction of lead-based paint hazards in housing is essential to prevent childhood lead poisoning. These efforts are most effective when targeted to the homes of young children who are at greatest risk for lead poisoning. In addressing lead-based paint hazards, as in so much of public health, prioritization is absolutely crucial. Reducing the applicable age from under seven years of age to under six years of age would increase the effectiveness of Local Law 1 of 2004 by focusing efforts and resources to children most in need of, and who will benefit most from, intervention and prevent more lead poisoning cases. Because the risk of lead poisoning for children under six years of age is almost twice the risk for six-year-old children, more childhood lead poisoning cases would be prevented if regulatory actions were focused on children under six years instead of children under seven years (NYC DOHMH surveillance data).

The Department has analyzed and reviewed available data on blood lead levels for NYC children and lead-based paint hazards in housing, and concludes the following:

1. Children under three years of age are at greatest risk for lead poisoning, particularly from exposures to lead-based paint hazards.

a. The rate of elevated blood lead levels (> =10 mg/dL) is highest for children under three years, both in NYC and nationwide (CDC, 1994; CDC, 1997; CDC, 2005; NYC Lead Poisoning Prevention Program Annual Report 2004, in press). The rate of NYC children newly identified with elevated blood lead levels in 2003 and 2004 was 1.4% for children under three tested for lead poisoning, as compared to 0.8% for children three to less than six and 0.6% for six-year-old children tested for lead poisoning.

b. Children under three years are more likely to crawl on the floor and engage in normal object-to-mouth and hand-to-mouth activities (mouthing), behaviors that increase their risk of ingesting household lead-based paint and dust (Moya et al., 2004).

c. Blood lead levels generally peak around two years of age and subsequently decrease as children grow older (Lanphear et al., 1996; Lanphear et al., 2002). This pattern in blood lead levels has been associated with changes in mobility and mouthing behavior, and consequent changes in exposure to lead-based paint and dust.

d. In the presence of actual or presumed lead-based paint hazards identified by the Department of Housing Preservation and Development (HPD) during housing inspections, NYC children under three years have the highest rate of elevated blood lead levels, with 3.0% for children under three years, 1.8% for children three to less than six years and 0.9% for six-year-old children. This means that for every 100 children with actual or presumed lead-based paint hazards who are tested, two more children aged less than three and one more child aged three to less than six years are identified with elevated blood lead levels as compared to six-year-old children.

e. The proportion of children with Environmental Intervention Blood Lead Levels ("EIBLL") (currently defined as > =15 mg/dL) for whom the Department identified lead-based paint hazards is highest among children under three years, with 75% of children less than three years having identified lead-based paint hazards, as compared to 66% of children three to less than six years, and 53% of six-year-old children.

f. Remediation of lead-based paint hazards in housing is more effective in preventing and reducing elevated blood lead levels for infants and toddlers than for older children. Thus, children under three years benefit the most from housing-based environmental interventions (CDC, 2004; Leighton et al., 2003).

2. In addition to covering the highest risk group of children (under three years), Local Law 1 of 2004 provides a sufficient margin of safety for preventing exposure of young children to lead-based paint hazards by applying to children aged three through five years.

a. Behaviors such as crawling and mouthing decline with age and children spend less time close to or on the floor. As a result, children three years and older are at reduced risk for ingesting lead-based paint and dust even when such hazards are present in their homes (see paragraphs 1(b) through (d), above).

b. Childhood lead poisoning may be increasingly associated with previous lead exposures experienced at younger ages and to sources other than current household lead-based paint hazards as children become older.

i. Elevated blood lead levels indicate both recent lead exposures as well as exposures in the past. When children are exposed to lead for a period of time, lead is stored in the bone and other tissues in the body. Blood lead levels can increase when the stored lead is remobilized from these storage sites in the body into the blood. Because the exchange between lead in the blood and other tissues can occur for some time, blood lead levels can remain elevated for an extended period of time even after sources of lead exposure have been removed (Auchincloss & Leighton, 2002; Roberts et al., 2001; Rust et al., 1999). Blood lead levels alone are therefore not an accurate means of determining the timing and total duration of lead exposure for children.

ii. Currently, many NYC children are not tested for lead poisoning at ages one and two, as required by New York State law. Only about 54% of children with elevated blood lead levels aged three to less than six, and 37% of six-year-old children had received a blood lead test before age three. Lead exposure in these children could have occurred earlier but was undetected due to lack of blood lead testing.

iii. As explained above in paragraphs 1 (d) and (e), older children with EIBLLs are less likely to have lead-based paint hazards identified at any of their addresses inspected by the Department. Similarly, in the presence of actual or presumed lead-based paint hazards identified by HPD during housing inspections, older children who are tested are less likely to have elevated blood lead levels.

iv. Older children with EIBLLs are also disproportionately foreign-born as compared to younger children with EIBLLs. Of children newly identified with EIBLLs in 2003 and 2004, 43% of six-year-old children are born in a foreign country, as compared to 13% of children aged three to less than six years and 9% of children aged less than three years. The most common foreign birth countries for children with EIBLLs are Mexico, Haiti, Pakistan, Bangladesh and the Dominican Republic. Lead poisoning among foreign-born children may be associated with exposures outside of the United States and/or to lead sources related to cultural practices of the child's birth country. These lead exposure sources include air pollution from leaded gasoline exhaust and industrial emissions, occupational exposures of children and their families, lead contaminated food and food containers, lead containing pottery used for cooking and storing foods, traditional herbal and mineral medicine products, and cosmetics (CEC, 2006; Fewtrell et al., 2003).

3. Reducing the applicable age from under seven to under six will not increase the rate of lead poisoning among six-year-old children as indicated by a review of housing and children's blood lead level data.

a. Despite changes to the applicable age in NYC lead poisoning primary prevention laws in the past decade (the applicable age for Local Law 38, effective from November 1999 through June 2003, was under six years), the number of lead poisoning cases for six-year-old children have continued to decline as for children in other age groups. Between 1995 and 2003, the number of children newly identified with elevated blood lead levels declined by 79% in children under three years, 86% in children three to less than six years, and 81% in six-year-old children.

Changing the applicable age to children under six years will also harmonize the New York City law with national and state policies, guidelines and regulations aimed at reducing childhood lead poisoning. These include Centers for Disease Control and Prevention (CDC) guidelines, New York State law, and policy statements of the American Academy of Pediatrics (AAP) regarding childhood blood lead screening and risk assessment for lead exposure. These guidelines and regulations reflect the overall direction of primary prevention efforts at national, state and local levels, which are aimed at eliminating childhood lead poisoning by year 2010.

In addition to adding a definition of "child of applicable age" the Board has also amended the definition of "chewable surface" in Health Code §173.14(b) to apply to children under six years of age residing in multiple dwelling units. Currently this definition is applicable to children under seven years of age residing in multiple dwelling units in New York City, and to children under six years of age who attend day care and kindergarten.

25. Statement of Basis and Purpose in City Record Sept. 29, 2006:

In order to maintain compatibility with applicable New York State Sanitary Code and federal regulations, the NYC Health Code is being amended concerning both Radioactive Materials and Radiation Equipment. The Health Code is also being amended to comply with a NYS Comptroller's Audit Report (2001-N-9) recommendation that all new x-ray facilities be inspected and approved by the Department prior to initiating clinical x-ray exams. Finally, the Health Code is being amended to delineate the specific protocols to be followed in calibration of x-ray therapy units, and to specify the content of the x-ray therapy calibration reports to be reviewed by the Department.

Radioactive Materials

The Department's Office of Radiological Health (ORH) licenses and inspects radioactive materials facilities for compliance with Article 175 of the New York City Health Code to protect the health and safety of patients, operators and the general public. There are about 375 licensed sites in New York City possessing radioactive material for medical, academic and research purposes. ORH inspects these facilities at frequencies of once every one, two or three years depending on the type of usage.

As noted above, New York State is an "Agreement State", which means that NYS and the United States Nuclear Regulatory Commission (NRC) have entered into an agreement under the Atomic Energy Act, which delegates authority to NYS to regulate radioactive material at non-reactor sites within its jurisdiction. The New York State Agreement is comprised of four regulatory programs-New York State Department of Health, New York State Department of Labor, New York State Department of Environmental Conservation, and the New York City Department of Health and Mental Hygiene. The Department, through its Office of Radiological Health, regulates radioactive material for medical, academic and research purposes within the 5 boroughs of New York City.

Each Agreement State program is required to maintain compatibility with the NRC regulatory program.[1]1 The NRC ensures an adequate level of compatibility through the Integrated Materials Performance Evaluation Program (IMPEP) and conducts a quadrennial review of Agreement State programs. The latest IMPEP review of the NYS program took place in July of 2002.

In the July 2002 IMPEP review, the NRC evaluated each of the four components of the New York State Agreement. NRC findings were presented in its Final Report, dated November 12, 2002. The NRC IMPEP report concluded that certain regulations needed to be incorporated into Article 175 of the New York City Health Code in order to ensure compatibility with NRC regulations. Those regulations that remained to be incorporated were:

· "Revision of the Skin Dose Limit", 10 CFR Part 20 amendment (67 FR 16298) that became effective April 5, 2002 (amending 10 CFR §§20.1003; 20.1201).

· "Respiratory Protection and Controls to Restrict Internal Exposures", 10 CFR Part 20 amendment (64 FR 54543; 55524) that became effective February 2, 2000 (amending 10 CFR §§20.1003; 20.1701-20.1704; adding 20.1705 and

amending Appendix A to Part 20).

Radiation Equipment

The Office of Radiological Health (ORH) inspects x-ray facilities for compliance with Article 175 of the New York City Health Code for the protection of the health and welfare of the patient, operator and general public. There are approximately 7000 registered sites in New York City possessing x-ray units for patient diagnosis and treatment.

The NYC Health Code is being amended to assure compatibility with the NYS Sanitary Code regulations on x-ray equipment and the federal regulations as to equipment performance standards. To achieve this compatibility, the amendments to Article 175 incorporate the language or intent of the following regulations:

· NYS Sanitary Code regulations for x-ray equipment as contained in 10 NYCRR §16.58 (effective 2/4/2004); and

· Food and Drug Administration (FDA) regulations as to the x-ray equipment performance standards as contained in 21 CFR Part 1020 (and as so stated in the NYS Sanitary Code §16.58).

In addition, Article 175 of the Health Code is being amended to:

· Comply with a NYS Comptroller Audit Report (2001-N-9) recommendation that all new x-ray facilities be inspected by ORH prior to initiating clinical x-ray exams; and,

· Delineate the specific protocols to be followed in calibration of x-ray therapy units, and specify the content of the x-ray therapy calibration reports to be reviewed by ORH.

AMENDMENTS TO THE HEALTH CODE

I. Radioactive Materials

Sections 175.02 and 175.03 of the NYC Health Code are being amended to address the NRC rule, "Revision of the Skin Dose Limit," 10 CFR Part 20 amendment (67 FR 16298) that became effective April 5, 2002 (amending 10 CFR §§20.1003; 20.1201). The definition of "shallow dose equivalent" is being revised (§175.02) and the method for calculation (§175.03) is being updated.

The definition of "Shallow dose equivalent" in §175.02 is being changed to read as follows: **"Shallow dose equivalent" (H_S)**, which applies to the external exposure of the skin of the whole body or the skin of an extremity, means the dose equivalent at a tissue depth of 0.007 centimeter (7 mg/cm2). This amendment is required to achieve compatibility with the 2002 revised NRC definition found in 10 CFR §20.1003. For purposes of external exposure, "whole body" means head, trunk (including male gonads), arms above the elbow, or legs above the knee. "Extremity" means hand, elbow, arm below the elbow, foot, knee, and leg below the knee.

The method for calculating shallow-dose equivalent is being updated in §175.03 to state that the assigned shallow-dose equivalent must be the dose averaged over the contiguous 10 square centimeters of skin receiving the highest exposure. This change achieves compatibility with the revised NRC occupational dose limits for adults found in 10 CFR §20.1201.

Also, §175.03 of the NYC Health Code is being amended to address the NRC rule: "Respiratory Protection and Controls to Restrict Internal Exposures" 10 CFR Part 20 amendment (64 FR 54543; 55524) that became effective February 2, 2000 (amending 10 CFR §§20.1003; 20.1701-20.1704; adding 20.1705 and amending Appendix A to Part 20).

The NYC Health Code previously did not specify conditions under which licensees should use respirators. Revisions to §175.03 incorporate revised NRC language concerning ANSI standards, and the summing of internal and

external radiation doses for ALARA (As Low As Reasonably Achievable) purposes. A statement is being added to §175.03 that an individual user who participates in a respiratory protection program is to be determined medically fit periodically at a frequency determined by a physician. (See also, "Frequency of Medical Examinations for Use of Respiratory Protection Equipment" (60 FR 7900) that became effective March 13, 1995 (amending 10 CFR §20.1703), which is incorporated within the "Respiratory Protection and Controls to Restrict Internal Exposures" 10 CFR Part 20 amendment). A provision for licensees to consider the impact on workers' industrial health and safety is being added to address OSHA requirements with respect to use of appropriate respiratory protective equipment. Additional requirements are being added to §175.03 regarding breathing air quality and procedures for respirator selection, repair, and quality assurance.

In addition, a large body of definitions relevant to Respiratory Protection and Controls is being added to §175.03 APPENDIX A-Protection Factors For Respirators.

II. Radiation Equipment

Section 175.51(d)(1), (2) of the NYC Health Code is being amended to implement a NYS Comptroller Audit Report (2001-N-9) recommendation that all new x-ray facilities be inspected by the ORH prior to initiating clinical x-ray exams.

To accomplish this, the Health Code is being amended with language to authorize ORH to enforce this new registration policy. ORH registers two types of x-ray facilities in New York City:

1) Facilities such as dental offices, podiatrist offices and veterinary offices, all of which are not legally mandated to have a Quality Control (QC) program in effect for their facility; and

2) Facilities such as medical offices, radiologist offices, chiropractic offices, and other large facilities that must have a functioning and on-going QC program at their facility.

At the time of a new registration, facilities not mandated to have a QC program (i.e., dental, podiatrist, and veterinary facilities) shall not be allowed to initiate clinical patient x-rays until they have passed an ORH inspection and corrected all violations (if any) so noted. At the time of a new registration, facilities required to have a QC program (i.e., large facilities, radiologist's offices, medical doctor's offices, and chiropractor's offices) will be mandated to submit all initial acceptance testing to ORH for review and approval prior to conducting clinical studies.

Section 175.62(d) of the NYC Health Code is being amended to implement the NYS Sanitary Code regulations (i.e., NYS Sanitary Code §16.58(a)(7), (8) and (9)) pertaining to fluoroscopic x-ray equipment as to the utilization of a new patient equivalent phantom composition^{2},2 the maximum radiation output rate, and the measurements to be conducted by each facility to determine patient Entrance Skin Exposure (ESE). Also, as per these amendments, fluoroscopic exposure rates for the most frequently performed procedures are now to be conspicuously posted.

Section 175.62(d) of the NYC Health Code is being amended to reflect the utilization of a new patient equivalent phantom. Per NYS Sanitary Code §16.58(a)(7), the new phantom adds 0.2 mm copper sheets to the existing $1^{1}/_{2}$ inches Type 1100 aluminum phantom thickness to more realistically match the x-ray attenuation properties of the human abdomen. Manufacturers of x-ray fluoroscopic units have hardened the x-ray beam quality (i.e., made the x-ray beam penetrate to deeper depths in matter) over the last several years. The existing $1^{1}/_{2}$ thick aluminum phantom due to the hardened x-ray beams does not simulate the attenuation properties of the human abdomen, hence, necessitating the addition of material to the $1^{1}/_{2}$ inches of aluminum.

Section 175.62(d) of the NYC Health Code is being further amended to implement the language adopted in the NYS Sanitary Code §16.58(a)(8) that conforms to the FDA fluoroscopic performance standards as reflected in 21 CFR §1020.32(d), (e)(1), (2) (59 FR 26402, effective May 19, 1995). The NYS Department of Health has succinctly codified the FDA changes, and ORH is adopting the same language in its amendments. These performance standards mandate

the maximum radiation output rate that the fluoroscopic equipment is not to exceed, determined by: 1) date of manufacture of the fluoroscopic equipment, and 2) whether a high-level boost mode is present on the equipment. The NYC Health Code is amended to reflect these more restrictive regulations as outlined in §16.58(a)(8) of the NYS Sanitary Code.

Also, per NYS Sanitary Code §16.58(a)(9), the State requires that patient ESE values be measured for each fluoroscopic unit and be posted. This requirement to post is to make the fluoroscopic operators aware of the typical exposures for different body sizes. Accordingly, §175.62(d) of the NYC Health Code is being updated to reflect this NYS Sanitary Code change in posting requirements.

Section 175.62(h)(1)-(2) of the NYC Health Code is being amended to implement the language adopted in NYS Sanitary Code §16.58(a)(12), (13) as to:

1) The new methodology for conducting compliance measurements for the high and low contrast resolution for fluoroscopic equipment; and,

2) The utilization of new high contrast test tool, measuring high contrast resolution in line pairs per millimeter (lp/mm).

Reflecting the medical physicist's testing methods in determining high and low contrast resolution for fluoroscopic units, the State changed the testing methodology as to the fluoroscopic operating parameters (for example, determining resolution in the magnification mode of operation) and changed the test tool used to determine high contract resolution. The NYC Health Code is being updated to reflect this more professional method in measuring the resolution performance of fluoroscopic units.

Finally, §175.64(g)(8)(ii), (iv) of the NYC Health Code is being amended to specify the use of x-ray therapy protocols developed by the American Association of Physicists in Medicine (AAPM) to be followed by each facility in conducting the annual radiation output measurement for each therapy unit, and to delineate the minimal content that should be contained in each annual calibration report by the facility for review by ORH inspectors. These provisions of the Health Code are also being modified to be more comprehensive as to the content of x-ray therapy output calibration reports and more specific as to the methodology employed in the actual output calibration measurements.

Each facility utilizing the specialized x-ray units for patient cancer treatment (denoted as LINACs) must make annual output calibrations for each unit and save these reports for review by ORH. The AAPM has published professional guidance for therapy calibration protocols that should be utilized when calibrating LINACs. If followed, the AAPM protocols result in the validity of the actual numerical value for radiation output to have an uncertainty of +/- 5%. The AAPM protocols are published in peer-reviewed journals and so represent the best collective reasoning and knowledge of the top medical physicists working in radiation therapy. Prior to this amendment, Article 175 (specifically, §175.64(g)(8)(ii)) did not delineate specific protocols to be followed during calibration of the LINACs. The amended section is now specific as to the AAPM protocols that may be followed by facilities during calibration of their LINAC units. Also, there is confusion as to the exact content of each calibration report that is to be generated and reviewed by ORH. By amending §175.64(g)(8)(iv), the section now accurately reflects the content of the calibration report to be retained by the facility for inspection purposes. Both changes were more in the form of clarification of existing ORH inspection standards.

26. Statement of Basis and Purpose in City Record Dec. 11, 2006:

The New York City Department of Health and Mental Hygiene (the Department) is authorized and required by law to promote and protect the health and safety of New York City residents and visitors by promoting an environment free from animal-borne diseases and hazards, as well as those caused by other vectors. The Department enforces Article 161 and Article 11 of the New York City Health Code ("Health Code") and provisions of other applicable law related to ownership and management of animals in the City of New York.

State and City laws and regulations require that dogs (a) be actively vaccinated against the disease of rabies (Health Code §11.66), (b) be licensed (Ch. 115, laws of 1894, as amended), (c) have a dog license tag attached to the dog's collar when the animal is in a public place (Health Code §161.04), and be restrained by a leash or chain not more than six feet in length when the animal is in a public place (Health Code §161.05).

In addition to the Department, special patrolmen employed by Animal Care and Control of New York City, Inc., New York City Department of Sanitation (DSNY) K-9 enforcement agents, and Police Department (NYPD) officers issue violations to the owners of dogs in a public place that do not have a dog license tag attached to their collars and for unrestrained dogs. Department of Parks and Recreation (DOPR) enforcement agents enforce Health Code §§161.03, 161.04 and 161.05 in DOPR facilities.

In 1942, restraining a dog in New York City public areas by a leash or chain, replaced a Board of Health requirement that dogs in public areas be muzzled. DOPR's current rules generally require that dogs be leashed in DOPR facilities, except as permitted by the DOPR commissioner. See DOPR rules, 56 RCNY §§1-04(i) ("Failure to control animals") and 1-05(s)(3) ("Dog runs"). In the 1990's DOPR initiated a policy of Courtesy Hours to accommodate dog owners in certain areas of some parks that did not have dog runs, enabling them to exercise their dogs off leash during the hours of 9:00 P.M. and 9:00 A.M. DOPR has informed the Department that this policy was implemented at the request of dog owners who had no alternative place to exercise their dogs. DOPR has requested that the Board of Health amend §161.05 of the Health Code to provide explicit authorization for the DOPR "off the leash" policy in the areas and facilities within DOPR's jurisdiction.

The Department, like DOPR, realizes that alternative space for dogs to exercise is not generally available in our urban environment. The Department recommends adoption of an amendment to §161.05 of the Health Code to allow dog owners who comply with formal DOPR rules to exercise their dogs off leash, in specific areas of specified park facilities during specified times. Department data for 2004 show that 93 (2.3%) of 4,082 dog bites reported Citywide occurred in DOPR facilities, and that about the same proportion, 86 (2.2%) of the 3,956 dog bites reported citywide, occurred in DOPR facilities in 2005. These bite reports do not indicate whether the biting dog was restrained or off leash. The Department supports codification of DOPR's policy of "Courtesy Hours", which has existed for more than 15 years, whereby DOPR will adopt specific rules concerning where and when dogs may be off the leash in City parks areas and facdilities. In addition, rabies remains endemic in New York City and the numbers of cases of rabies in wildlife appears to be increasing: from six positive cases in 2003, to 14 in 2004, doubling to 28 cases in 2005. Wild animals, many subject to rabies, reside in City parks, and also enter New York City from suburban habitats, seeking open spaces in the City, including those in parks. While rabies remains endemic in the City, all dogs must be vaccinated against rabies, in accordance with Health Code §§11.65 and 11.66. However, when dogs are off the leash in park areas and facilities and not under their owners' constant observation, the dogs are at greater risk of exposure to rabid animals than leashed dogs. Accordingly, this Health Code amendment will require DOPR to adopt rules providing that owners of dogs off the leash maintain and present proof that their dogs have current rabies vaccinations. Finally, the proposed amendment requires the DOPR to provide the public with appropriate information concerning dog licensing and rabies vaccination requirements, as well as times when, and places where, in DOPR areas and facilities, dogs will be allowed off the leash.

Changes made in Response to Public Comments

As noted, publication of this proposal generated substantial public comment. Approximately 13,200 individuals and groups expressed support for the proposal, and 202 individuals and groups expressed opposition to any amendment that would allow dogs to be off the leash under any circumstances stating that this would adversely affect public health. After review of the public comments, and for the same reasons stated in the original Statement of Basis and Purpose, and because the off leash policy has been in effect for approximately 20 years, the Department has no reason to believe that there will be any increased risk to public health as a result of the Health Code change at this time. However, the amendment as originally proposed has been changed to require that DOPR adopt rules allowing dogs to be off the leash in unenclosed DOPR areas and facilities only from 9:00 P.M. to 9:00 A.M. To facilitate enforcement by DOPR and

identification of dog owners, the rule requires that persons controlling off leash dogs present proof of current dog licensure, as well as of current rabies vaccination, as originally proposed. Many comments of persons opposed to the amendment alleged that persons in control of off leash dogs do not comply with the current unofficial policies. DOPR, after reviewing such comments, has assured the Department that complaints should be made promptly through 311 if there are persons who let dogs run on or off the leash in areas off limits to dogs, or allow dogs to be off leash at impermissible times; or create any nuisance; or menace people, or otherwise behave in any manner that compromises public health, or threatens public safety. DOPR has represented that it will direct its enforcement officers to investigate and address such complaints. In addition, the rule has been further amended to authorize the Department's Commissioner to limit or eliminate off-leash privileges in specific DOPR areas and facilities if the Department determines, based on epidemiological evidence, that there is an increase in preventable off leash dog bites or a risk of zoonotic disease transmission in such areas or facilities.

In other changes, subdivision (a) of §161.05 has been amended to substitute the term "other restraint" for the term "chain" and there has been a minor, non-substantive, change in subdivision (c) with respect to identifying officers of the Department of Sanitation and the DOPR as authorized to enforce this section.

27. Statement of Basis and Purpose in City Record Dec. 11, 2006:

The Department is reponsible for protecting the health and safety of the public who use permitted bathing beaches by providing for the proper construction, operation and maintenance of these facilities within New York City. Article 167 of the New York City Health Code sets forth standards for the operation and maintenance of bathing beaches under permit by the Department.

In order to maintain consistency with relevant New York State Department of Health requirements and to provide greater clarity to bathing beach operators and the public, it is proposed that certain changes be made to various provisions of Article 167, as stated below. Specifically, and for example, the current definition of "public health hazard" in the Health Code consists merely of a list of items that constitute a "public health hazard." The Department wishes to expand that list to include additional items that rise to the seriousness of a "public health hazard." Also, in order to provide greater clarity and guidance to both bathing beach operators and the public, the Department wishes to add a general definition of "public health hazard" applicable to this Article.

Amendments to the Health Code

Section 167.03 is being amended such that the following definition of "public health hazard" is to be added to the list of definitions, and is to read as follows: **" 'Public Health Hazard' is any condition which poses an imminent threat to the health or safety of the public."** This definition is derived from the New York State Department of Health's Environmental Health Manual, Technical Reference, Item No. ADM2, dated 3/3/03. Therefore, the Department requests that §167.03 of the Health Code be amended to include the above definition of "public health hazard." Also, §167.17(c)(4) is being amended such that the word "defined" is replaced by the word "illustrated" and to read as follows: "Presence of public health hazards as **illustrated** in §167.09."

Section 167.09(a) is being amended such that the requirements found in the sections below are to be added so as to reflect that violations of these requirements constitute a "public health hazard":

· §167.05(a), (c) (operating without a valid permit issued by the Department);

· §167.23(a) (operating without a Department-approved Beach Safety Plan);

· §167.29(b)(4), (5) (failure to provide depth markings, safety lines and diving requirements);

· §167.37(f)(1), (f)(2)(B), (C) (failure to provide appropriate safety and warning signs, e.g., when diving/swimming/bathing is allowed).

Additionally, the list of existing "public health hazards" in §167.09(a) is being amended to include citations to the applicable Health Code sections where none are currently cited.

Finally, §167.21(b) is being amended to correct a technical unit error from "yards" to "feet", in order to be consistent with the intent of the relevant New York State Sanitary Code provision [i.e., 10 NYCRR §6-2.17(b)(1)], which provides that, "Lifesaving equipment shall be readily accessible at all bathing beaches." The Department is further amending this subdivision to alternatively allow provision of safety equipment per an approved Beach Safety Plan. The Department believes this change is consistent with the NYS Sanitary Code, and will continue to promote public safety, while properly accounting for each individual beach's water conditions, topography, crowd size, deportment and infrastructure. Accordingly, the amended §167.21(b) reads: **"At least one set of the items listed in (2), (3) and (4) above shall be provided for each 500 feet of beachfront or fraction thereof, or as specified in the approved Beach Safety Plan, and shall be readily accessible to the lifeguards therein."**

28. Statement of Basis and Purpose in City Record June 20, 2007:

The Office of Radiological Health (ORH) licenses and inspects radioactive materials facilities for compliance with Article 175 of the New York City Health Code for the protection of the health and safety of patients, radiation program employees and the general public. There are about 375 licensed sites in New York City possessing radioactive material for medical, academic and research purposes. ORH inspects these facilities at frequencies of once every one, two or three years depending on the type of usage.

New York State is an "Agreement State", which means that the State and the United States Nuclear Regulatory Commission (NRC) have entered into an agreement under the Atomic Energy Act, which delegates authority to NYS to regulate radioactive material at non-reactor sites within its jurisdiction. The New York State Agreement is comprised of three regulatory programs-New York State Department of Health (DOH), New York State Department of Environmental Conservation (DEC), and the New York City Department of Health and Mental Hygiene (DOHMH). Formerly, the radiation protection division of the New York State Department of Labor (DOL) was a fourth agency, which regulated commercial and industrial sources of radiation. This division of DOL has recently been subsumed under DOH. Under this Agreement State structure, the New York City Department of Health and Mental Hygiene, through ORH, regulates radioactive material for medical, academic and research purposes within the five boroughs of New York City.

Each Agreement State program (there are currently 33) is required to maintain compatibility with NRC regulatory program requirements. To ensure compatibility with applicable federal regulations on radioactive materials, the NYC Health Code must be amended.

Changes to Health Code

In May 2006, the NRC reviewed portions of Article 175 submitted to it by ORH. This NRC review resulted in 8 (eight) comments, which were transmitted to DOHMH by letter dated June 12, 2006. Based on these NRC comments, the following eight amendments to Article 175 are being adopted to address NRC's compatibility concerns:

· Radiation Protection Requirements: Amended Definitions and Criteria

· 1. Amend the §175.02(a) definition "Member of the Public".

· 2. Amend the §175.02(a) definition "Occupational Dose".

· Recognition of Agreement State Licenses in Areas Under Exclusive Federal Jurisdiction Within An Agreement State

· 3. Amend §175.101(m) to indicate that non-NRC licensees are to provide 3 days advance notice to NRC of

activity in areas under exclusive federal jurisdiction within NYC.

· Radiological Criteria for License Termination

· 4. Amend §175.02(a) definition "Background Radiation".

· 5. Amend §175.02(a) by adding the definition "Critical Group".

· 6. Amend §175.02(a) by adding the definition "Decommission".

· 7. Amend §175.02(a) by adding the definition "Distinguishable from background".

· 8. Amend §175.02(a) by adding the definition "Residual radioactivity".

1. Amend the §175.02(a) definition of "Member of the Public" to include the reference to 'occupational dose' as contained in the NRC's definition of 10 CFR §20.1003.

The definition of "Member of the Public", located at §175.02(a)(132), is being changed by inserting the following **italic text** and deleting the [bracketed text] as indicated below:

"Member of the public" means any individual, except [an] **when that** individual [who is performing assigned duties for the licensee or registrant involving exposure to sources of radiation] **is receiving an occupational dose.**

This amendment is to satisfy the following NRC Comment: "NYCDH needs to include the phrase "occupational dose" to 175.02(132) [sic] to meet the Compatibility Category A designation assigned to this definition in §10 CFR 20.1003." The amended definition is now identical to the NRC definition of "Member of the Public".

2. Amend the §175.02(a) definition of "Occupational Dose" to differentiate between licensed and unlicensed sources of radiation consistent with NRC's definition.

The definition of "Occupational Dose", located at §175.02(a)(141), is being changed by inserting the following **italic text** and deleting the [bracketed text] as indicated below.

"Occupational dose" means the dose received by an individual in the course of employment in which the individual's assigned duties involve exposure to [sources of] radiation[,] **or to radioactive material from licensed and unlicensed sources of radiation,** whether in the possession of the licensee, registrant, or other person. Occupational dose does not include doses received[:] from background radiation, **from any medical administration the individual has received, from exposure to individuals administered radioactive material and released under §175.103(c)(9)** [as a patient from medical practices], from voluntary participation in medical research programs, or as a member of the public.

This amendment is to satisfy the following NRC Comment: "NYCDH needs to revise the definition of "occupational dose" to include both licensed and unlicensed sources of radiation add the phrase to 175.02(141) [sic] to meet the Compatibility Category A designation assigned to this definition in §10 CFR 20.1003." The amended definition is now essentially identical to the NRC definition of "Occupational Dose".

3. Amendment of §175.101(m) concerns reciprocity approval by NRC. NRC is requiring three-day advance notice to it for approval prior to any initial activity by any Agreement State licensee/non-NRC licensee in areas under exclusive federal jurisdiction within NYC.

§175.101(m)(2) is being changed by inserting the **italic text** as indicated below:

The holder of a license issued by the New York State Department of Labor, the New York State Department of

Health, the New York City Department of Health and Mental Hygiene or an Agreement State must obtain reciprocity approval from the U.S. Nuclear Regulatory Commission to conduct licensed activity in areas of exclusive federal jurisdiction within New York City. **At least three days before engaging in each activity for the first time in a calendar year, the licensee will provide the U.S. Nuclear Regulatory Commission with advanced notice of its proposed activity in areas under exclusive federal jurisdiction within New York City, as indicated in 10 CFR §150.20, or its successor regulation.**

This amendment is to satisfy the following NRC Comment: "NYCDH needs to include a reference to advance notification in 175.101(m) to meet Compatibility Category C designation assigned to §10 CFR 150.20." The amended provision now captures the essential objectives of the NRC requirement.

4. Amend the §175.02(a) definition of "Background radiation" to include the phrase "or from past nuclear accidents such as Chernobyl that contribute to background radiation and are not under control of the licensee" compared to NRC's definition.

The definition of "Background radiation", located at §175.02(a)(20), is being changed by inserting the following **italic text** and deleting the [bracketed text] as indicated below:

"Background radiation" means radiation from cosmic sources; naturally occurring radioactive material[s], including radon[,] **(**except as a decay product of source or special nuclear material[,]**);** and [including] global fallout as it exists in the environment from the testing of nuclear explosive devices **or from past nuclear accidents such as Chernobyl that contribute to background radiation and are not under the control of the licensee**. "Background radiation" does not include radiation from any regulated sources of radiation.

This amendment is to satisfy the NCR Comment: "NYCDH needs to add the phrase "or from past nuclear accidents such as Chernobyl that contribute to background radiation and are not under control of the licensee" to 175.01(20) (sic) to meet the Compatibility Category A designation assigned to this definition in §10 CFR 20.1003." The amended definition is now essentially identical to the NRC definition of "Background radiation".

5. Amend §175.02(a) by adding the definition "Critical Group" from 10 CFR §20.1003. The definition "Critical Group" as shown in the **italic text** below, is being inserted in §175.02(a) in alphanumeric order, and all subsequent subdivisions are being re-numbered accordingly.

"Critical Group" means the group of individuals reasonably expected to receive the greatest exposure to residual radioactivity for any applicable set of circumstances.

This amendment is to satisfy the following NRC Comment: "NYCDH omitted a definition for "critical group" compared to NRC's regulations. NYCDH needs to add the definition to 175.02 to meet the Compatibility Category B designation assigned to this portion of §10 CFR 20.1003." The definition is identical to the NRC definition of "Critical Group".

6. Amend §175.02(a) by adding the definition "Decommission" from 10 CFR §20.1003. The definition "Decommission" as shown in the **italic text** below, is being inserted in §175.02(a) in alphanumeric order and all subsequent subdivisions are being re-numbered accordingly.

"Decommission" means to remove a facility or site safely from service and reduce residual radioactivity to a level that permits-

(i) Release of the property for unrestricted use and termination of the license; or

(ii) Release of the property under restricted conditions and the termination of the license.

This amendment is to satisfy the following NRC Comment: "NYCDH omitted a definition for "decommission" compared to NRC's regulations. NYCDH needs to add the definition to 175.02 to meet the Compatibility Category designations assigned to these portions 10 CFR 20.1003, 30.4, 40.4 and 70.4." The definition is identical to the NRC definition of "Decommission".

7. Amend §175.02(a) by adding the definition "Distinguishable from background" from 10 CFR §20.1003. The definition "Distinguishable from background" as shown in the **italic text** below, is being inserted in §175.02(a) in alphanumeric order and all subsequent subdivisions are being re-numbered accordingly.

"Distinguishable from background" means that the detectable concentration of a radionuclide is statistically different from the background concentration of that radionuclide in the vicinity of the site or, in the case of structures, in similar materials using adequate measurement technology, survey, and statistical techniques.

This amendment is to satisfy the following NRC Comment: "NYCDH omitted a definition for "distinuishable from background" compared to NRC's regulations. NYCDH needs to add the definition to 175.02 to meet the Compatibility Category B designation assigned to this portion of §10 CFR 20.1003." The definition is identical to the NRC definition of "Distinguishable from background".

8. Amend §175.02(a) by adding the definition "Residual radioactivity" from 10 CFR §20.1003. The definition "Residual radioactivity" as shown in the **italic text** below, is being inserted in §175.02(a) in alphanumeric order and all subsequent subdivisions are being re-numbered accordingly.

"Residual radioactivity" means radioactivity in structures, materials, soils, groundwater, and other media at a site resulting from activities under the licensee's control. This includes radioactivity from all licensed and unlicensed sources used by the licensee, but excludes background radiation. It also includes radioactive materials remaining at the site as a result of routine or accidental releases of radioactive material at the site and previous burials at the site, even if those burials were made in accordance with the provisions of 10 CFR Part 20.

This amendment is to satisfy the following NRC Comment: "NYCDH omitted a definition for "residual radioactivity" compared to NRC's regulations. NYCDH needs to add the definition to §175.02 to meet the Compatibility Category B designation assigned to this portion of §10 CFR 20.1003." The definition is identical to the NRC definition of "Residual radioactivity".

29. Statement of Basis and Purpose in City Record Oct. 30, 2007:

The Department's Division of Environmental Health, Bureau of Food Safety and Community Sanitation ("BFSCS") has proposed that the Board of Health amend Article 131 of the Health Code to authorize HPD to issue Commissioner's Orders to Abate a Nuisance ("COTA") on behalf of the Commissioner for missing or improperly installed window guards in units and public areas in multiple dwellings where children 10 years of age and younger reside.

Since the adoption of Health Code §131.15 ("Window guards") in 1976, window guards have been required on windows in multiple dwelling units and public areas in multiple dwellings in the City where children 10 years of age and younger reside except for windows giving access to fire escapes. This provision has been effective in preventing many falls. From 1973-1976 there were approximately 200 preventable falls annually, and an average of 25 fatalities per year.[1]3 In calendar year 1977, the first year after §131.15 went into effect, there were 151 preventable falls, resulting in the deaths of 26 children. In more recent years, e.g., from 1996-2006, there has been an average of 12.5 preventable falls annually, with no more than two preventable fatalities occurring in any year.[2]4 In 2006, there were six preventable falls and no fatalities.

Health Code §131.15(d) provides that failure to install or maintain window guards constitutes a public nuisance and a condition dangerous to life and health, in accordance with §17-145 of the New York City Administrative Code

("Administrative Code"). Health Code §131.15(d)(3) further provides that whenever a window guard nuisance or condition, such as an improperly installed guard is observed, the Department may order the landlord to provide, maintain and/or install window guards within five days, and that when such order is not complied with within five days after service, the Department may request that an agency of the City execute the order pursuant to §17-147 of the Administrative Code to install or repair the window guards. The owner of the building is responsible for payment of any expenses incurred by the City. Currently, the HPD executes these orders when owners fail to do so. Although Housing Maintenance Code ("HMC") §27-2125 authorizes HPD "to cause or order corrections of violations" in multiple dwellings if such violations are dangerous to human life and safety or detrimental to health, there is no specific HMC provision authorizing HPD to issue violations or orders relating to absent or improperly installed window guards. At present, HPD has reported that it observes lack of window guards or improperly installed guards in approximately 950 to 1,000 units per month when its inspectors are in a unit to inspect other housing-related complaints. Enabling HPD to issue COTAs on behalf of the Commissioner of Health for window guard violations would enhance and expedite enforcement, providing an owner with the earliest possible notice of the condition and an opportunity to correct it before HPD does so, further promoting children's safety.

The original proposal published for public comment would have authorized HPD to issue orders to abate window guard nuisances to landlords for the repair and installation of window guards. The final resolution has been clarified to indicate that HPD will be issuing such orders on behalf of the Commissioner.

30. Statement of Basis and Purpose in City Record Sept. 25, 2008:

New York State is an Agreement State, which means that this State and the United States Nuclear Regulatory Commission (NRC) have entered into an agreement under the Atomic Energy Act, which delegates authority to New York State to regulate radioactive material at non-reactor sites within its jurisdiction. The New York State Agreement is comprised of three regulatory programs - 1. the New York State Department of Health, 2. the New York State Department of Environmental Conservation, and 3. the New York City Department of Health and Mental Hygiene. Under this Agreement State structure, the New York City Department of Health and Mental Hygiene, through the Office of Radiological Health (ORH), regulates radioactive material for medical, research and academic purposes within the five boroughs of New York City.

ORH licenses and inspects radioactive materials facilities for compliance with Article 175 of the New York City Health Code for the protection of the health and safety of patients, radiation program employees and the general public. There are about 375 licensed sites in New York City possessing radioactive material for medical, academic and research purposes. ORH inspects these facilities at frequencies of once every one, two or three years depending on the type of usage.

Each Agreement State program is required to maintain compatibility with the NRC regulatory program. The NRC ensures an adequate level of compatibility through its Integrated Materials Performance Evaluation Program (IMPEP) and conducts a quadrennial review of Agreement State programs. The latest IMPEP review of the NYS program took place in November of 2006.

In their November 2006 IMPEP review, the NRC evaluated each of the three components of the New York State Agreement State structure. NRC findings were presented in their Final Report, dated January 31, 2007.

The NRC IMPEP Final Report concluded that NRC requirements (Items 1 and 2 below) needed to be incorporated into Article 175 of the New York City Health Code in order to maintain appropriate compatibility with applicable federal regulations. Item 3 below is an NRC requirement that must be incorporated into the Health Code pursuant to NRC Order EA-07-305 (72 FR 70901).

1. "Financial Assurance for Materials Licensees," (published in 68 FR 57327) that became effective on December 3, 2003 and was due for Agreement State adoption by December 3, 2006.

The NRC amended its regulations (located at 10 CFR Parts 30, 40, and 70) in 2003 for financial assurance for certain materials licensees, including all waste brokers, to bring the amount of financial assurance required more in line with current decommissioning costs. The objective of this action was to ensure that licensees maintain adequate financial assurance so that timely decommissioning can be carried out following shutdown of a licensed facility. Therefore, language in Health Code §175.101(n) is now being modified accordingly.

2. "Compatibility with IAEA Transportation Safety Standards and other Transportation Safety Amendments," (published in 69 FR 3698) that became effective on October 1, 2004 and was due for Agreement State adoption by October 1, 2007.

The NRC amended its regulations (located at 10 CFR Part 71) in 2004 on packaging and transporting radioactive material. This rulemaking was designed to ensure that federal regulations would be compatible with the latest version of the International Atomic Energy Agency (IAEA) standards and to codify other applicable requirements. Therefore, language in Health Code §§175.02,175.105 and 175.105 Appendix A is now being modified accordingly.

3. NRC Order EA-07-305 (published in 72 FR 70901) imposing fingerprinting and criminal history records check requirements for unescorted access to certain radioactive materials that became effective for Agreement States on December 5, 2007.

Pursuant to its Order EA-07-305, the NRC has determined that a fingerprinting and criminal history records check requirement shall be imposed on all licensees, including Agreement State licensees, who are subject to Increased Controls (see NRC Order EA 05-090). Agreement States are charged with issuing their equivalent fingerprinting and criminal history records check requirements by June 5, 2008. Section 652 of the Energy Policy Act of 2005 (EPAct), which became law on August 8, 2005, amended Section 149 of the Atomic Energy Act (AEA) to require fingerprinting and a Federal Bureau of Investigation (FBI) identification and criminal history records check for "any individual who is permitted unescorted access to radioactive materials or other property subject to regulation by the Commission that the Commission determines to be of such significance to the public health and safety or the common defense and security as to warrant fingerprinting and background checks." Section 149 of the AEA also requires that "all fingerprints obtained by a licensee or applicant * * * shall be submitted to the Attorney General of the United States through the Commission for identification and a criminal history records check." NRC has decided to implement this requirement, prior to the completion of a future rulemaking, which will implement these provisions of the EPAct, because a deliberate malevolent act by an individual with unescorted access to these radioactive materials has the potential to result in significant adverse impacts to the public health and safety.

Pursuant to a previous NRC Order EA 05-090 (located at 70 FR 72128, December 1, 2005), the NRC ordered all licensees who, at any given time, possess certain radioactive sources in certain quantities to comply with certain Increased Controls (ICs). The purpose of the ICs Order for radioactive sources was to enhance control of radioactive material in order to reduce the risk of unauthorized use of radioactive materials, through access controls to aid prevention, and prompt detection, assessment, and response to mitigate potentially high consequences that would be detrimental to public health and safety. These ICs for radioactive sources and quantities were established to delineate licensee responsibility to maintain control of said licensed material and secure it from unauthorized removal or access.

This NRC Order EA-07-305 (72 FR 70901), imposing fingerprinting and criminal history records check requirements for unescorted access to certain radioactive materials, extends its security requirements applicable to those same IC licensees and became effective on December 5, 2007. Licensees will now be required to submit fingerprints of each individual who the licensee wishes to permit unescorted access to certain licensed materials. The fingerprints would be submitted to the NRC which would then forward them to the FBI. Results of the FBI criminal history record check would be sent to NRC which would then forward them to the licensee. Each licensee shall be responsible for determining whether to allow an individual unescorted access to radioactive materials in quantities of concern. Therefore, Health Code §175.101 is now being modified to add these NRC security requirements.

31. Statement of Basis and Purpose in City Record Dec. 23, 2008:

Introduction

As part of a comprehensive review of the Health Code to assess its efficacy in protecting the public health, the DOHMH proposed that the Board of Health amend Article 173, Hazardous Substances, to better reflect practice and the regulatory environment, provide adequate legal tools to effectively address the health and safety needs of the public and to harmonize its provisions with related provisions of federal and state law. Pursuant to this review and assessment of the Health Code, the Department proposed that the Board amend certain of the provisions of current Article 173 as described below.

§173.01 (Definitions) has been repealed and reenacted. It changes or amends definitions for the terms "hazardous substance," "toxic," "highly toxic," "flammable," "combustible," "corrosive," "irritant," "label," "electrical hazard," "mechanical hazard," "thermal hazard" and "art material." These changes modernize the terms used in the Article, incorporating corresponding definitions from the Federal Hazardous Substances Act (15 USCA §1261 et seq.), and related regulations (16 CFR Part 1500).

§173.05 (Labeling).

Subdivision (a) has been amended to delete exceptions for Articles 71, 75 and 77.

Subdivision (b) has been amended to harmonize with corresponding provisions in the Federal Hazardous Substances Act (15 USCA §1261 et seq.) and its related regulations (16 CFR Part 1500), and regulations that may be adopted by the United States Consumer Product Safety Commission.

Subdivision (c) has been amended to delete paragraphs (1) through (3) and refers to highly toxic substances as defined in this Article. Elimination of paragraphs (1) through (3) obviates the need for subdivision (d), which has accordingly been deleted.

New subdivision (d) requires labeling of art materials in accordance with the Federal Hazardous Substances Act and related federal regulations to protect the health and safety of persons using art materials.

New subdivision (e) is a general provision requiring labeling not otherwise required under federal, state or local law. The remaining subdivisions have been relettered accordingly.

Current subdivision (g) on changing labeling requirements pursuant to the discretion of the Commissioner is deleted, and former subdivision (f) is relettered as (g). Deference will be given to labeling requirements as set forth in the Federal Hazardous Substances Act and its related federal regulations.

Current subdivision (i) has been amended to add the term "conspicuous" to characterize required labeling, reflecting the language in the Federal Hazardous Substances Act and related regulations.

§173.051 (Exemptions) has been repealed, as an exemption for pressurized products is no longer necessary with the repeal of §173.06.

§173.06 (Pressurized Products) has been repealed as unnecessary because pressurized products are currently subject to New York City Fire Department regulations. See, 3 RCNY §32-01.

§173.07 (False or misleading advertising or labeling) has been amended to delete references to pressurized products.

§173.08 (Carbon tetrachloride; prohibited for household use and in fire extinguishers) has been repealed as the use of carbon tetrachloride, as noted, is prohibited by Fire Department rules for use in pressurized containers, and for at

least the past 30 years, the FDA has banned carbon tetrachloride in any product to be used in the home. See, 3 RCNY §32-01 and 16 CFR §1500.17.

§173.09 (Rodenticides and insecticides) has been repealed, as pesticide use is comprehensively regulated by both the New York Environmental Conservation Law and the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), 7 U.S.C. §136.

§173.11 (Fire extinguishers containing methyl bromide) has been repealed as neither the Fire Department nor National Fire Protection Association Standard 10 consider a fire extinguisher containing methyl bromide acceptable. See, 3 RCNY §15-02.

§173.13 (Lead Paint) has been amended to specify that orders for remediation of lead hazards in soil, authorized in paragraph (1) of subdivision (d) may be issued when a child under six years of age resides in or uses the premises appurtenant to the leaded soil.

§173.14 (Safety standards for lead-based paint abatement and remediation, and work that disturbs lead-based paint) has been amended to delete references to §45.12, now §43.23, and §47.44, now §47.63. Amendments have been incorporated in the Table of Contents and subdivisions (a), (b), (c) and (e). Subdivision (a) was amended after the public comment period to correct a technical omission in the proposal published.

§173.16 (Lye intended for household use) has been repealed as §173.05 has been amended to provide for and address the labeling provisions as set forth in this section.

32. Statement of Basis and Purpose in City Record Dec. 23, 2008:

Introduction

As part of a comprehensive review of the Health Code to assess the efficacy of the Code in protecting the public health, the Board of Health has repealed and reenacted Article 151, Rodents, Insects and Other Pests, changing its title to Pest Prevention and Management, to better reflect practice, the regulatory environment, and to assure that the revised provisions provide adequate legal tools to effectively address the health and safety needs of the public concerning prevention and control of rodent, insect and other pest infestations. The main intent of this revised article is to prevent the infestation of rodent, insect or other pests and to prohibit the existence on any premises of conditions conducive to pest infestations through continuous pest management efforts, elimination of harborages and requiring property maintenance practices to eliminate or severely limit the presence of pest populations. Because the regulation of pesticide use is preempted by state law, this article attempts to promote prevention of pests and pest infestations without directly addressing the use of pesticides. The focus on pest management incorporates a hierarchy of actions to prevent and eliminate pests, including structural alterations and repairs, and the elimination of conditions conducive to pest infestations. In addition, for the reasons stated below, the Board has also repealed Article 171 (Fumigation and Extermination).

1. Repeal and reenact Article 151.

Section 151.01 Definitions defines terms used in the article.

The term "conditions conducive to pests" has been added and refers to conditions that attract and contribute to the presence of pests, and require correction.

The term "harborage" remains unchanged from the current Article 151.

The term "person in control" is retained and now refers to responsibility over a "premises" or "property."

The term "pest" replaces the term "insects and other pests" in current Article 151, and refers to unwanted insects,

rodents or other pests as determined by the Department.

The term "pest management" has been added, and replaces the term "eradication." Pest management consists of prevention, monitoring and control of pests, and is required to maintain a pest free environment. Eradication, the prior term, referred only to the elimination of pests through extermination, too narrow a practice for effective management of pests. Eradication should be interpreted as only one component of "pest management."

The term "pesticide" has been added to refer to substances or mixtures of substances used to prevent, destroy, repel or mitigate against pests, consistent with the term as defined in the New York Environmental Conservation Law.

The terms "premises" and "property" have been defined to mean building structures, rooms and units of a building, and public parts of buildings, as well as yards, building lots, vacant lots, parks, streets, and vehicles.

Section 151.02 Prevention and pest management measures represents a change from the former Article's emphasis on eradication methods and extermination and reflects several needs.

First, New York Environmental Conservation Law preempts localities from regulating the use or application of pesticides, and as such, mandating eradication as previously defined to include the use of poisons or pesticides, is no longer permitted. Additionally, effective pest management requires a hierarchy of strategies that prioritize prevention and monitoring, and address the management of pests as a proactive ongoing set of tasks and responsibilities, not just a reaction to the undesired presence of pests.

Subdivision (a), "Properties shall be free of pests," requires that premises must be kept free from pests and conditions conducive to their presence. This section requires persons in control to take measures that may be necessary to prevent and control these conditions.

Subdivision (b), "Waste shall be managed to prevent pests," is necessary because improperly handled waste is a significant source of food and harborage for many pests. This subdivision mandates that solid and liquid garbage be stored in containers that prevent the entry of pests, until garbage is ready to be picked up, at which time garbage may be placed in suitable bags or other containers acceptable to the City's Department of Sanitation and other agencies regulating garbage pickup.

Subdivision (c), "Pest management plans," defines components of a written management plan, when the Department determines that such a plan is required, including a description of pest management strategies to be employed, a schedule of routine inspections, a list of actions taken when pests are present, instructions to occupants and other users of the premises as to how to report the presence of pests, and the name and contact information for the pest management business or professionals retained by the persons in control. In response to a comment asking who is responsible for routine inspections, paragraph (2) has been amended to read: "A schedule for routine inspections, determined by the person incontrol, for conditions conducive to pests and the presence of pests; . . .". In response to another comment indicating that requiring a person in control of a building to duplicate record keeping practices that State law mandates for pesticide applicators is burdensome and not feasible, paragraph (6) has been further amended so that the person in control of a building is required only to maintain a record of the names, not the quantities, of pesticides applied in the premises.

Subdivision (d), "Elimination of conditions conducive to pests and the presence of pests," describes the pest management actions that may be ordered by the Department to control pests. These actions include the physical removal of pest nests, waste and other debris, the elimination of pest entry and travel via the sealing and closure of openings, the elimination of harborage, the elimination of harborages and the elimination of pest food sources.

Subdivision (e) prohibits the use of pesticides alone to substitute for pest management measures required by this section. Pesticide use should not be the first and only line of defense against pests.

Section 151.03 Elimination of standing water authorizes the Department, with the exception of protected wetlands, to order the correction of standing water problems in areas other than protected wetlands lots, excavations or other places to prevent the breeding and harborage of mosquitoes and other pests.

Section 151.04 Enforcement by the Department and other City agencies authorizes the Department to issue orders to enforce this Article and conveys the same authority to the City's Departments of Buildings and Housing Preservation and Development.

2. Repeal Article 171

The Board of Health has repealed Article 171 (Fumigation and Extermination), as no longer necessary. The U.S. Environmental Protection Agency comprehensively regulates substances used as pesticides, and the New York State Department of Environmental Conservation currently comprehensively regulates all aspects of pesticide use in New York State. See, e.g., Environmental Conservation Law Article 33 and the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), 7 U.S.C. §136.

33. Statement of Basis and Purpose in City Record Mar. 27, 2009:

The Department is responsible for the protection of the health and safety of the public using permitted bathing establishments by assuring the proper construction, operation and maintenance of regulated facilities within New York City. Article 165 of the Health Code sets forth standards for the operation and maintenance of bathing establishments operating under permit issued by the Department.

Effective March 28, 2007, the New York State Department of Health adopted regulations regarding Recreational Aquatic Spray Grounds located at 10 New York Code, Rules and Regulations, Subpart 6-3. The purpose of these State Sanitary Code regulations is to establish standards for the safe and sanitary operation of recreational spray grounds that re-circulate water. These regulations were promulgated in response to multiple outbreaks associated with gastrointestinal illness caused by contaminated recycled spray ground water at spray parks. See New York State Register, December 27, 2006. Therefore, the Board of Health adopted the State Sanitary Code spray ground requirements in order to maintain consistency between Subpart 6-3 regulations of the State Sanitary Code and relevant provisions of Article 165 of the Health Code.

Also, effective November 7, 2007, the New York State Department of Health amended §6-1.23 of the State Sanitary Code, which contains bather supervision and training requirements relating to lifeguard surveillance during instructional swimming activities. Accordingly, the Board of Health adopted the State Sanitary Code amendment requirements found in Section 6-1.23(a)(6) in order to maintain consistency between the State Sanitary Code and §165.15 of Article 165 of the Health Code, which concerns bathing establishment supervision and surveillance requirements.

CHANGES TO THE HEALTH CODE

The following are the changes to Article 165:

· §165.01 (applicability of Article extended to include certain spray grounds)

· §165.03 (spray ground-related definitions added)

· §165.05 (spray ground requirements added to permit applications)

· §165.09 (spray ground requirements added related to permit approvals)

· §165.11 (spray ground requirements added related to enforcement)

· §165.15 (spray ground and lifeguard surveillance requirements added related to supervision)

· §165.17 (spray ground requirements added related to lifesaving and safety equipment)

· §165.19 (all bathing establishments, including spray grounds, required to have a safety plan)

· §165.23 (spray ground requirements added related to water chemistry and testing)

· §165.25 (spray ground requirements added related to water quality standards)

· §165.27 (spray ground requirements added related to sanitation and safety)

· §165.29 (spray ground requirements added related to maintenance of mechanical equipment)

· §165.31 (spray ground requirements added related to chemical handling and storage)

· §165.39 (spray ground requirements added related to recordkeeping)

· §165.42 (new section created adding general requirements for spray grounds)

· §165.43 (spray ground requirements added related to water supply and cross-connections)

· §165.45 (spray ground and pool requirements added related to water treatment systems)

· §165.47 (spray ground requirements added related to lighting, electrical and ventilation)

· §165.49 (spray ground and pool requirements added related to location and facilities)

34. Statement of Basis and Purpose in City Record Mar. 27, 2009:

The Department is responsible for protecting the health and safety of the public who use permitted bathing beaches by providing for the proper construction, operation and maintenance of these facilities within New York City. Article 167 of the Health Code sets forth standards for the operation and maintenance of bathing beaches operating under permit by the Department.

The boundary restricting bathing currently defined under §167.05(d) is inconsistent with the surface water classifications (usage designations) contained in New York State Department of Environmental Conservation (NYSDEC) regulations (see 6 NYCRR Parts 700, 701, 890, 891; see also, http://www.dec.ny.gov/chemical/23853.html). Successful improvements of pollution control programs and continued comprehensive upgrades to wastewater treatment infrastructure have resulted in a significant improvement in water quality, therefore, providing for the possibility for additional permitted bathing facilities in previously restricted areas. Accordingly, some of the previously restricted areas for bathing under §167.05(d) are now classified by NYSDEC to allow bathing (SB-primary contact). Pursuant to 6 NYCRR 700.1, "primary contact recreation" means recreational activities where the human body may come in direct contact with raw water to the point of complete body submergence. Primary contact recreation includes, but is not limited to, swimming, diving, water skiing, skin diving and surfing.

In order to maintain consistency with the surface water classification as defined under NYSDEC regulations, the defined boundary lines restricted for bathing under §167.05(d) are replaced with boundary lines of water classification used for primary contact as defined by the NYSDEC.

Changes to the Health Code

The list of restricted boundaries in §167.05(d)(1)-(6) is deleted. Also, §167.05(d) is amended to allow boundaries delineated for primary contact as defined by applicable surface water classification regulations of the NYSDEC.

35. Statement of Basis and Purpose in City Record June 30, 2009:

Introduction

As part of a comprehensive review of the Health Code to assess the efficacy of its Articles in protecting the public health, the Board repealed and reenacted Article 141, Drinking Water, to better reflect current practice and the regulatory environment, to assure that the revised provisions provide adequate legal tools to effectively address the public health aspects of public and private water supplies and to harmonize such provisions with related provisions of the New York State Sanitary Code, 10 NYCRR, Subparts 5-1, 5-2 and 5-6. As part of the revision effort, antiquated and obsolete provisions have been omitted and the standards set forth in the revised Article 141 have been modernized to reflect current industry practice and standard requirements as set forth in the New York State Sanitary Code, the Rules of the City of New York, the Administrative Code of the City of New York, the New York State Public Health Law and standards as established by industry associations, such as the American National Standards Institute (ANSI), American Water Works Association (AWWA), and National Sanitation Foundation (NSF). The revised Article supplements rather than duplicates the regulations of other governmental agencies concerned with water supply such as the New York City Department of Environmental Protection, the New York City Department of Buildings, and the New York State Department of Health. Pursuant to this review and assessment of the Health Code, the Board repealed and reenacted Article 141 as provided below.

The key revisions to Article 141 are noted below:

The prior title to the Article, "Drinking Water," has been amended to reflect the regulatory scheme of the Article and is now titled, "Water Supply Safety Standards."

Section 141.01

This section "Definitions" is derived from prior section 141.01 and provides updated definitions and adds to the list of terms in the current definitions section. The existing terms, "device" and "potable water" have been updated to reflect modern usage, and the following terms and their definitions have been added: "ANSI," "APHP," "AWWA," "Bottled Water," "Building," "Bulk Water," "Contamination," "Department," "Disinfection," "Drinking Water," "Fluoridation," "Ground Water," "Licensed Master Plumber," "Municipal Water Supply," "Non-potable Water," "NSF," "ppm," "State," "State Sanitary Code," "Water Supply Tank," "WEF," "Well" and "Well Water." The addition of these terms and their definitions brings the Article into greater conformity with its regulatory scope and has been updated to compare with the corresponding and applicable definitions in the Rules of the City of New York and the New York State Sanitary Code.

Section 141.03

This section, "Drinking Water Supply Source" is derived from prior section 141.02.

Section 141.05

This section, "Fluoridation of Municipal Water Supply" is derived from prior section 141.08.

Section 141.07

This section, "Building Drinking Water Storage Tanks" is derived from prior section 141.03, which currently contains provisions on drinking water tank inspections, cleaning and painting requirements. The title of this section has been changed to better reflect the subject of Drinking Water Storage Tanks in buildings and the subdivisions have been reorganized to better clarify the requirements related to annual inspections, such as record keeping, public notice and for corrective actions.

Section 141.09

This section, "Building Water Tank Cleaning, Painting and Coating" is derived from prior sections 141.03 and 141.05, which both previously contained provisions on water tank inspection, cleaning, coating and painting. The changes to this section reflect and incorporate current Department practices and standards prescribed by the New York City Building Code, AWWA, and NSF concerning the maintenance, cleaning and disinfection of building water tanks and any part of the building drinking water systems. In particular, the amendments provide more stringent standards for maintenance, cleaning and disinfection to ensure that tanks are cleaned properly and regularly. Updated and more stringent provisions for permitting of individuals who engage in cleaning or painting water tanks have been added, as have requirements for sampling and record keeping.

Section 141.11

The prior section 141.11 "Drinking Water on Vessels" has been removed from the Health Code to reflect applicable federal regulations (see, 21 CFR Parts 1240, 1250) and Department practice. The Department will no longer regulate water on vessels, but will respond to and assist Federal agencies when requested.

This section, "Chemical Treatment of Drinking Water" includes and amends provisions from prior section 141.07. The title of this section has been changed to better reflect the substance of the section and the subdivisions have been reorganized to better reflect the regulatory effort. The changes to the existing provisions reflect current Department practices, and incorporate references to industry organizations, such as AWWA and NSF as well as the requirements of the New York State Sanitary Code, Subpart 5-2. AWWA and NSF provide modern standards and technical guidance on matters related to current, approved chemicals for use in drinking water supplies, devices used to add chemicals to water supplies, and methods for water sampling and analysis.

Section 141.13

This section, "Bottled Water" includes and amends provisions derived from prior section 141.04 on bottled drinking water. The requirement for filing for a permit with the Department has been removed since it duplicates the New York State Department of Health requirement for permitting of bottled water in the State of New York. The provisions have been updated to reflect and conform to the bottled drinking water standards and procedures for distribution as prescribed by Subpart 5-6 of the State Sanitary Code and current Department enforcement practices.

Section 141.15

This section, "Hauling Bulk Water", includes and amends provisions from prior sections 141.021 and 141.11. The requirement for filing for a permit with the Department has been removed since it duplicates the New York State Department of Health requirement for permitting of bulk water in the State of New York. The provisions have been updated to reflect and conform to the bulk water standards and procedures for distribution as prescribed by Subpart 5-6 of the State Sanitary Code and current Department enforcement practice.

Section 141.17

This section, "Groundwater Wells," incorporates provisions from prior sections 141.09 and 141.10. These provisions have been amended to reflect and include references to newer standards as set forth in the New York State Sanitary Code, Subpart 5-1. New provisions have also been added concerning permit applications for well water use. Groundwater quality standards and well construction standards make reference to and reflect the standards set forth in Part 5 of the State Sanitary Code, and the rules and regulations of the New York State Department of Environmental Conservation and the New York City Department of Environmental Protection and applicable provisions promulgated by the New York City Council contained in the Administrative Code of the City of New York, as these entities have jurisdiction related to the construction, operation and maintenance of groundwater wells.

Section 141.19

This section, "Modification," is derived from prior section 141.13 and has been amended to reflect gender neutrality.

36. Statement of Basis and Purpose in City Record June 30, 2009:

Introduction

As part of a comprehensive review of the Health Code to assess the efficacy of the Code in protecting public health, the Department proposes that current Article 203, Termination of Pregnancy, be amended, effective January 1, 2010, to assure that the Code provides adequate legal tools to effectively address general public health matters. As part of the revision effort, obsolete provisions have been omitted and the standards and references set forth in revised Article 203 have been modernized to reflect current Department and public health practice.

Pursuant to this review and assessment of the Health Code, the DOHMH proposes that the Board amend Article 203 as provided for below.

Section 203.01

Subdivision (a) was amended to remove the clause "as formerly defined," as there was no such previous reference.

Subdivision (c) was amended to reflect the definition recommended by the National Center for Health Statistics of the federal Centers for Disease Control and Prevention.

A new definition of "licensed health care practitioner" was added as subdivision (e). Which health care practitioners may perform which health care services is a function of state law, most importantly the New York State Education Law. The new definition simply refers to whichever health care practitioners are authorized to perform terminations of pregnancy pursuant to the state Education Law or other applicable law. In turn, those health care practitioners are among those who are obligated or authorized to file or prepare reports, as specified in sections 203.03 and 203.05. The simplicity of this definition facilitates reporting, including electronic reporting, and avoids the need to delineate which health care practitioners are obligated or authorized to file termination of pregnancy reports or to prepare documents associated therewith.

Section 203.03

Subdivision (a) was amended to update terminology from physician or nurse-midwife to other licensed health care practitioners, in order to reflect the current practice of having medical practitioners other than physicians in attendance at terminations of pregnancy. Permitting a licensed health care practitioner who was in attendance, other than a physician, to report a termination of pregnancy facilitates reporting and does not affect medical care standards.

Subdivision (b) was modified to accommodate legal nomenclature and to reflect the change to paragraph (4) of subdivision (a) clarifying that when the office of chief medical examiner files a certificate of spontaneous termination of pregnancy, any medical examiner within that office may file the certificate without a confidential medical report.

Subdivision (c) was amended to change the 24 hour filing requirement for spontaneous terminations and 5 day filing requirement for induced terminations of pregnancy to a 24 hour reporting requirement for **all** terminations of pregnancy when a permit to dispose of the conceptus is required or requested. Certificates and confidential medical reports, if any, related to terminations not resulting in the issuance of a disposition permit must be filed within 5 business days after the event. As per amendments to section 203.09 (see below), such permit is required for all terminations occurring at 24 weeks gestation or later and may be requested for terminations occurring at less than 24 weeks. Subdivision (c) was also amended to remove the provision pertaining to filing within 15 days for the termination of pregnancy revealed by pathological examination. This provision is no longer applicable as pathological examination is no longer required for determining pregnancy status.

Subdivision (d) was amended to make proper reference to New York City, and to accommodate the fact that in some cases, but not necessarily all, a conceptus may be buried or otherwise disposed of pursuant to a permit issued by the Department. In such circumstances, the required documents may be filed by a funeral director, undertaker or person in charge of the City mortuary, as the case may be, or a registered agent or designee of such persons. Such an alternative means of filing is only available, however, when the report is being filed in paper form. Reference to electronic filing was deleted and incorporated into the new subdivision (e).

Subdivision (e) was added to require all facilities reporting births electronically or reporting 100 or more induced terminations of pregnancy in any 1 year, and the office of chief medical examiner, to report terminations of pregnancy electronically. When a required reporter files electronically, a funeral director or undertaker authorized to take charge of the remains, or the person in charge of the City mortuary when filing an application for a disposition permit, must also file such application electronically. Facilities not required to report electronically may opt to do so with approval by the Department or may continue to report on paper. However, once a facility begins to report electronically, it may not revert to paper filing unless so authorized by the Department.

Subdivision (f) was added to require departmental approval of electronic reporting systems, in order to ensure the uniformity and quality of data collection. The subdivision also requires approval from the DOHMH prior to the electronic transfer of data from a facility to the Department to ensure the protection of the confidentiality of the information provided. The subdivision also provides for alternative arrangements, upon the Department's approval or initiative, in particular circumstances.

Subdivision (g) was added to provide for situations in which a reporter receives required information after reporting the termination of the pregnancy. The reporter must submit such information within 5 business days of receipt.

Subdivision (h) was added to require reporters to provide, within 5 business days of a request by the Department, additional information necessary to complete, clarify or verify the information required to be reported. Such information may include, for example, updated causes of death.

Section 203.05

The title of section 203.05 was amended to "Preparation and Certification of Certificates" and the paragraph titles **"Preparation"** and **"Certification"** were added to subdivision (a). These changes were made to indicate that separate rules apply to the preparation and certification of certificates.

Paragraph (1) of subdivision (a) was amended to include licensed health care practitioners, as defined in section 203.01, and to reflect gender neutrality. Besides physicians, licensed health care practitioners may also attend, assist or be present at terminations of pregnancy. Permitting a licensed health care practitioner in attendance, assisting or present at or after the event, other than a physician, to prepare reports facilitates the expeditious preparation of certificates and does not affect medical care standards. Accordingly, when a termination of pregnancy occurs in a hospital, reports may be prepared by a licensed health care practitioner who was in attendance, assisting or present at or after the event; the chief medical officer of the hospital; or the physician in charge of the treating hospital service. When a termination of pregnancy occurs elsewhere than in a hospital and is attended by a licensed health care practitioner, the practitioner may prepare the report.

This paragraph was also amended to permit the designee of a person in charge of a hospital, or the designee of the attending licensed health care practitioner elsewhere than in a hospital, to prepare the required certificate and confidential medical report, if any. Such a designee must be trained or approved by the Department. This is particularly useful for electronic reporting and will enable the hospital, or, for example, a doctor attending a termination of pregnancy in his or her office, to delegate the task of preparing the certificate to a lower level employee. The training and approval requirement should improve data quality.

Paragraph (2) of subdivision (a) is substantially new and was amended to clarify that, regardless of which kind of licensed health care practitioner or other individual is authorized to file a report or to prepare a certificate, only a physician may certify a certificate of spontaneous termination of pregnancy or the associated confidential medical report. For induced termination of pregnancy certificates, a licensed health care practitioner, as well as the several physicians specified, may certify such reports. A certifying physician, or a medical examiner who is also a physician, is required to examine the documents being certified and make necessary changes. Accordingly, the requirement for a physician's countersignature has been deleted.

Subdivision (b) was amended to provide that if worksheets are used by anyone authorized to prepare certificates of termination of pregnancy and confidential medical reports, if any, the worksheets must be approved by the DOHMH in order to control the quality of data collection. In addition, the requirement to have the Board of Health approve the electronic form of certificates has been deleted, because electronic forms are merely reflective of the paper forms prescribed by the Board pursuant to this subdivision, aside from incidental formatting differences.

Section 203.07

Subdivision (a) was amended to provide that the disclosure of the confidential medical report of a spontaneous termination of pregnancy shall not be compelled, in order to be consistent with the confidentiality provisions of Articles 3 and 11 of this Code.

Subdivision (b) was amended to include epidemiologic surveillance and investigation conducted by governmental public health agencies within the meaning of "scientific purposes."

Subdivision (c) was amended to provide that the certificate of induced termination of pregnancy is confidential and that disclosure shall not be compelled, in order to be consistent with the confidentiality provisions of Articles 3 and 11 of this Code.

Section 203.09

This section was amended to clarify that a disposition permit may be issued, upon request, for the disposal of a conceptus of less than 24 weeks gestation. It should be noted that the original proposal to amend this section proposed to change the gestational age at which a disposition permit would be required from the current 24 weeks to 20 weeks in order to be consistent with the Public Health Law applicable in the rest of the state, but not in New York City. Upon further reflection, the Department is withdrawing that particular proposed change. Section 4162 of the Public Health Law, specifying 20 weeks, does not apply in New York City. Furthermore, the 20-week requirement in section 4162 dates back to the 1960's, whereas the Health Code's current 24-week standard was adopted in 1977 and is consistent with the timeframe set forth in a 1970 amendment to subdivision (3) of section 125.05 of the Penal Law defining a justifiable abortion. Therefore, the Department has concluded that the gestational age at which a disposition permit is required in New York City should remain at 24 weeks.

37. Statement of Basis and Purpose in City Record June 30, 2009:

Introduction

As part of a comprehensive review of the Health Code, the Department proposes that current Article 201, Births, be amended to assure that the revised provisions provide adequate legal tools to effectively address general public health matters and to reflect modern public health thinking and practice.

Pursuant to this review and assessment of the Health Code, the DOHMH proposes that the Board amend Article 201, effective January 1, 2010, as set forth below.

Section 201.01

The definition of the term "person in charge of a hospital" has been amended to include the title of chief executive officer as an example of a person in charge of a hospital. Such amendment provides additional guidance on which individuals the DOHMH will consider a person in charge.

A new subdivision (c) has been added to define the term "hospital" in a manner consistent with Article 28 of the State Public Health Law to include not only in-patient hospitals, but also, for example, diagnostic and treatment centers.

Section 201.03

Subdivision (a) has been amended to delete reference to a hospital's ambulance service as the only forum for a birth en route to a hospital, and to add the broader concept of a birth occurring en route to the hospital. This subdivision was also amended to permit the designee of a person in charge of a hospital to report a live birth to the DOHMH. This will enable the hospital to delegate the task of filing the report to a lower level employee. Reference to a "maternity clinic" has been deleted as such facilities are subsumed within the term "hospital" as now defined.

Subdivision (a) has also been amended to permit a licensed midwife and a registered physician assistant, in addition to a physician, in attendance at a birth outside a hospital to report such birth. Permitting such licensed health care professionals to report the birth reflects the practice of having medical personnel other than physicians participate in live births. In addition, permitting reporting by such licensed health care professionals in attendance at the live birth other than a physician does not affect medical care standards; rather, it facilitates reporting requirements.

Subdivision (b) was amended to correct legal nomenclature distinguishing between a "subsection" and a "paragraph".

Subdivision (c) has been added to require reporters to provide additional required information upon receipt of new information by the reporter. The new subdivision provides for submission of such information within five business days of receipt by the reporter.

Subdivision (d) has been added to require reporters to provide, within five business days of a request by the Department, additional information necessary to complete, clarify or verify the information required to be reported.

Section 201.05

Subdivision (a) has been amended to permit a licensed midwife or registered physician assistant, in addition to a physician, certified nurse practitioner or a registered professional nurse, to prepare a birth certificate and a confidential medical report of birth, and to further specify that such documents must be certified. This subdivision now permits individuals other than the licensed health care professionals who attended or assisted, or who were present at or after the birth to prepare and certify the certificates and confidential medical reports, relying on their review of medical records. This change recognizes current practice in hospitals, especially in the context of electronic filing. However, the amendment requires that such individuals be designated by the person in charge of the hospital and that they be trained or approved by the Department. If a birth occurs elsewhere than in a hospital or en route thereto, and is attended by a physician, licensed midwife, certified nurse practitioner or a registered physician assistant, then only they can prepare and certify the documents. Furthermore, this subdivision was amended to make clear that the act of certifying involves an examination of the record being certified for correctness of the information.

Subdivision (b) has been amended to reflect gender neutrality and to correct a reference to a particular section of the State Public Health Law. In order to control the quality of data collection, a provision has been added to require that DOHMH approved worksheets be used in a hospital, and that individuals using them, other than the specified licensed professionals, be trained or approved by the Department. Such worksheets must be retained by the hospital for three years, and must be made available for inspection by the Department upon request.

Subdivision (c) and subdivision (f) (now renumbered as subdivision (d)) have been amended to remove now

unnecessary language concerning requirements that were effective January 1997. Renumbered subdivision (d) has been amended to emphasize that electronic reporting can only occur upon approval by the Department.

Subdivisions (d) and (e) have been deleted as no longer necessary because currently both the birth certificate and the confidential medical report of birth are required to be filed electronically.

Section 201.07

Subdivision (a) was amended to indicate that the disclosure of confidential medical reports of birth shall not be compelled, in order to be consistent with the confidentiality provisions of Articles 3 and 11 of this Code.

Subdivision (b) was amended to include epidemiologic surveillance and investigation conducted by governmental public health agencies within the meaning of "scientific purposes".

Section 201.09

A new §201.09 has been added to specify how, in a manner consistent with §4131 of the State Public Health Law, reports of foundlings filed by the City's Commissioner of Children's Services are to treated and processed by the Department.

Section 201.11

Subdivision (a) has been amended to reflect gender neutrality. Paragraph (2) has been deleted as the submission of a certificate of birth on an application for a delayed registration of birth no longer reflects the Department's application process.

Subdivision (b) was amended to correct legal nomenclature distinguishing a "subsection" and a "paragraph".

Subdivision (c) was deleted as no longer necessary given that the new §201.09 comprehensively covers the handling of foundling reports. A new subdivision (c) has been added to clarify that an application for a delayed registration of birth will not be granted for a person who is already deceased.

38. Statement of Basis and Purpose in City Record Sept. 28, 2009:

As part of a comprehensive review of the Health Code to assess its efficacy in protecting the public health, the Board of Health has updated various provisions of the Health Code to provide adequate legal tools for the Board and the DOHMH to effectively address the City's current and future public health needs. One aspect of this revision is the repeal of Article 131 (Buildings Generally) and Article 135 (Commercial Premises), and the incorporation of surviving provisions of both articles into a new Article 131 (Buildings). The new Article 131 eliminates outdated and obsolete provisions of both articles, revises the provisions that have been retained, and adds new provisions consistent with the Department's current priorities and concerns. The comments received are addressed in the individual section discussions that follow.

§131.01 Scope. This section is new and clarifies the purpose and applicability of this Article. As indicated in the introductory notes, the provisions of this Article are not intended to duplicate authority exercised by other City agencies.

§131.03 Definitions. This section is new and defines terms used in the Article.

§131.05 Duty; responsibility for violations. This section is derived in part from both former §131.01 (Violations; responsibility) and §135.13 (Responsibility for compliance).

§131.07 Heating. The provisions of former §131.03 have been modified and updated, and are incorporated into this

section. The 1968 Building Code, Administrative Code §§27-740ff, and the 2008 New York City Building Code §1204 specify minimum heating system capacities for various building use categories but do not require that minimum temperatures be maintained during times buildings are occupied. The New York City Department of Housing Preservation and Development ("HPD") enforces Housing Maintenance Code §27-2029, which establishes minimum heating requirements for dwellings. The Health Code temperature requirements are therefore currently only enforced in buildings not subject to Housing Maintenance Code requirements

Minimum seasonal (between October 1 and May 31) temperatures maintained for occupied buildings not used as dwellings (with the exception of those buildings otherwise regulated, such as child day care, school, or health care facilities, buildings housing non-regulated educational, social or health services or buildings whose heating arrangements are subject to lease or contract) have been lowered from 68 degrees F (20 degrees C) to 65 degrees F (18.33 degrees C). The change in minimum temperature is based on city-wide sustainability and energy saving efforts and is consistent with PlaNYC of 2007, as well as World Health Organization (WHO) recommendations for indoor temperatures of 64.4 to 69.8 degrees F (18 to 21 degrees C) for the general population, which was issued in 1985. WHO reviewed these recommendations again in 2007 and determined that there is little scientific evidence correlating indoor air temperatures with public health and that more research is needed in this subject area. A comment received in favor of the proposed reduction in commercial building temperatures also recommended reducing the minimum temperature to be maintained in dwellings. However, as previously noted, dwelling temperatures are established in the Housing Maintenance Code, are the subject of legislation and cannot be amended by rule.

In addition, as noted above, the Statement of Basis and Purpose as originally published indicated an intention that buildings housing educational, social or health services and programs be exempt from the lowered minimum temperature, but the text of the resolution itself omitted such a provision. The resolution adopted by the Board corrects this omission and includes a provision explicitly exempting buildings in which such services are located from the reduced minimum temperature.

§131.09 Commercial buildings. This section retains provisions of former Article 135 that remain applicable to such buildings with respect to lighting (former §135.05); ventilation (§135.07); plumbing (§135.09); water, wash basins and utility sinks (§135.11); floors (§135.13); walls and ceilings (§135.15); and cleanliness and repair (§135.17). Provisions of former §135.19 (control of offensive or annoying conditions) have been incorporated in a new §131.13, as noted below.

§131.11 Posting signs. This section removes provisions of former §131.09, which requires posting of ownership information at certain residential buildings, because it largely duplicates rules of HPD. Current HPD rules require that owners of multiple dwellings consisting of six or more apartments, or those who are otherwise required to post certificates of inspections in these buildings, maintain on those certificates "complete and correct information . . . as the premises' address, registration number, name and address of owner or managing agent registered with the [HPD] Office of Code Enforcement, and a telephone number which tenants may call for service and repairs." See 28 RCNY §25-241(i). Because such information is important to persons residing in other rental properties who may not otherwise have access to ownership information, this section preserves the requirement that minimum ownership information be posted in rental residential buildings not subject to HPD's rules.

The proposal published for public comment required additional signage that would alert occupants of multiple dwellings to the need to return notices to their landlords regarding lead paint and window guard inspections, and would warn about dry scraping of lead paint. Comments were received both objecting to and favoring such changes in signage requirements, from groups representing owners and occupants, respectively. In consideration of the comments received, the proposal to require building owners to post information about lead paint and window guards has been withdrawn. Signage requirements alerting building occupants to these particular health and safety responsibilities of building owners will be further considered in a future proposal so that Department requirements can be consistent with those of other agencies. They will be more concise and therefore less burdensome than the requirements originally proposed, and also be better able to effectively convey public health messages.

§131.13 Control of unsafe conditions. This section is derived from former §135.19 (Control of offensive or annoying conditions) and has been updated to reflect current regulatory practice. A comment was received from the DOS that "§131.041 Refrigerators, discarded; removal of locking devices," originally proposed for repeal, does not duplicate any provision in DOS rules, and remains an important safeguard against children accidentally locking themselves in discarded refrigerators. Accordingly, this provision has been restored to the resolution and incorporated as subdivision (c) in this section.

§131.15 Window guards. This section retains all the provisions of former §131.15, but has been amended to incorporate references to the rules of the Department set forth in 24 RCNY Chapter 12, containing specifications for window guards and their installation, and for notices to tenants.

§131.17 Dry cleaning facilities. This section is new and prohibits contamination of residential and child occupied buildings by perchloroethylene (PERC) vapors from dry cleaning facilities located in the same or adjacent buildings. The City Department of Environmental Protection regulates and issues permits to dry cleaners using PERC in the City pursuant to 15 RCNY Chapter 12. The State Environmental Conservation Law regulates the equipment used in such facilities. However, no law currently establishes permissible limits for emissions from dry cleaning facilities into child-occupied or residential facilities. This section codifies current Department regulatory practice, and requires operators of dry cleaning facilities to provide for proper operation and exhaust ventilation of equipment using PERC. The standard for residential PERC contamination is based on research and guidelines issued by the New York State Department of Health (NYSDOH).

The Department received comments from dry cleaner and solvent industry associations objecting to the establishment of the current intervention level of 100 micrograms per cubic meter (mg/m^3) of PERC as excessive, and expressing their concern that the Department would "automatically" issue notices of violation to dry cleaning establishments that exceed this threshold. The Department does not agree that the standard is excessive. NYSDOH established the level of 100 micrograms per cubic meter (mg/m^3) as guidance for emissions into residences in 1991. The level was again formally reviewed by NYSDOH in 1997. NYSDOH has also used the toxicity value, which forms the basis for the guidance level, in a more recent (2004-2006) effort to establish related health-based guidance values for PERC.

The Department's intention, with the promulgation of this rule, has been to codify and provide public notice of its practice. The Department's current practice does not require that a notice of violation ("NOV") be automatically issued upon receipt of laboratory results showing elevated levels of PERC in residential premises. Professional judgment is always exercised when evaluating environmental sampling in environmental investigations.

Although no change has been made to the intervention level, in response to a comment regarding potentially duplicative requirements (see, e.g., City Department of Environmental Protection rules in Chapter 12 Title 15 of the Rules of the City of New York), the Department has amended §131.17 (c) by replacing the term "install and maintain mechanical ventilating systems or other devices for control of vapors" with "evaluate and correct problems associated with vapor control."

§131.19 Modification by Commissioner. This section contains the provisions of former §131.17.

The following provisions of former Articles 131 and 135 have been repealed because they are either obsolete or are duplicative of laws and regulations covering matters comprehensively regulated by other City agencies:

Obsolete provisions repealed:

§131.04 Gas fired refrigerators; certain prohibited; sealing of defective.

§131.042 Approved space and water heaters to be provided in certain one- and two-family residential buildings.

§131.05 Self inspection of gas appliances.

§131.07 Cellar and basement occupancy.

§131.13 Flexible gas tubing.

§135.21 Location of certain trades.

§135.23 Cooperation with other governmental and private agencies.

Provisions repealed because of duplicative enforcement authority:

§131.042 (l) Rules for venting of gas appliances are enforced by the Department of Buildings ("DOB") (1 RCNY §§41 and 40-39) and, in multiple dwellings, are enforced by HPD (28 RCNY §25-29).

§131.11 Receptacles for removal of waste materials duplicates Administrative Code §16-120.

39. Statement of Basis and Purpose in City Record Sept. 28, 2009:

1. Amend Article 143.

As part of a comprehensive review of the Health Code to assess its efficacy in protecting the public health, the Board of Health is amending Article 143, covering the disposal of sewage, repealing provisions for construction of private sewage disposal systems, and the issuance of permits for site and sub-soil evaluation related to such construction, in order to better reflect practice and the current regulatory environment. In addition, for the reasons stated below, the Board is repealing Article 145 (Water Pollution Control).

Article 143 broadly addresses disposal of wastes within the City, in particular, the disposal of human, household, and commercial liquid wastes which are not directly discharged into City waters. Article 145 complements Article 143 by regulating wastes directly entering City waters.

Under Health Code §§143.03 and 143.05, the Department regulates private sewage disposal systems, such as septic tanks and privies that are not connected to the City's sewage disposal system and that discharge into a local site and underlying sub-soil.

Health Code §143.07 requires proof of proper maintenance of private sewage disposal systems. Health Code §143.09 regulates private sewage disposal systems for one and two family dwellings. Health Code §143.13 provides that private sewage disposal systems are subject to Department inspection and be operated so as not to create a nuisance.

When Local Law 50/1991 was enacted, amending Charter §1403, the New York City Department of Environmental Protection was granted jurisdiction over the "location, construction, alteration, repair, maintenance and operation of all sewers" including the "authority to supervise and adopt rules regarding private sewage disposal systems . . . and to prescribe civil penalties for the violation of such rules . . . and to issue permits pursuant to such rules for the construction and maintenance of such private sewage disposal systems . . ."

Local Law 65/1996 amended New York City Building Code §27-157(4) to remove a reference requiring that a site and sub-soil evaluation be obtained from the Department prior to the construction of a private sewage disposal system. Also, under Charter §643(5), the Buildings "[C]ommissioner may approve the installation of and issue a permit for the construction of an individual on site private sewage disposal system for premises. Such permit shall be issued in accordance with the commissioner, in consultation with the commissioner of environmental protection, for the installation of an individual on site private sewage disposal system."

Therefore, based on the above, Health Code §§143.03, 143.05, 143.07, 143.09 and 143.13 are no longer necessary as the Department is no longer responsible for regulating private sewage disposal facilities. Under New York City charter provisions §643 and §1403, the Department of Buildings issues permits for individual private sewage disposal systems and the Department of Environmental Protection has enforcement authority regarding these systems.

The current definitions set forth in §143.01 are being kept and subdivision (c) is being amended to make clear that the Health Department does not regulate portable toilets such as those found on street locations or at construction sites; and a new subdivision (e) defining "community private sewage disposal systems" is being added to §143.01 as this term is not defined in the Health Code, although the Health Department currently regulates such sewage disposal systems under §143.11.

2. Repeal Article 145

Article 145 ("Water Pollution Control") requires a permit from the Department for discharge of sewage into City waters. The Board hereby repeals Article 145 as no longer necessary. The discharge of waste into City waters is comprehensively regulated by the U.S. Environmental Protection Agency pursuant to the Clean Water Act, 22 U.S.C.A. §1251 et seq., and by the New York State Department of Environmental Conservation under 6 NYCRR Part 750 (State Pollutant Discharge Elimination System).

40. Statement of Basis and Purpose in City Record Sept. 28, 2009:

Introduction

As part of a comprehensive review of the Health Code to assess the efficacy of the articles in protecting the public's health, the Department proposed that Article 205, Deaths and Disposals of Human Remains, be amended, effective January 1, 2010, to assure that the revised provisions provide adequate legal tools to effectively address public health matters and to reflect modern standards and current programmatic practice while removing outdated provisions.

Pursuant to this review and assessment of the Health Code, the Board amended Article 205 as provided for below.

Section 205.01

Subdivision (c) was amended to more fully define human remains, including a conceptus, to clarify when a permit for disposition is required. The 24 weeks or more of gestation is consistent with former §205.13, which required a permit for disposition after 24 weeks.

Subdivision (d) was added to define "hospice," which under State Public Health Law includes hospice care programs as well as hospice facilities. Hospice is increasingly utilized as a form of end-of-life care, and consequently hospice providers are preparing a larger proportion of death certificates.

Subdivision (e) was deleted. It had defined "use for anatomical purposes", which was referred to in section 205.13 and has been deleted. New subdivision (e) was added to conform to the provisions of State Public Health Law §4201, which applies in the City and establishes the persons in descending priority who shall have the right to control the disposition of the remains of a decedent. It replaces former subdivision (d), which defined "next of kin" and their order of priority to receive communications and to give instructions regarding the disposal of a decedent's remains.

Section 205.03

Subdivision (a) has been amended to clarify the circumstances when a hospital or hospice must report a death and to broaden the situations in which institutions are required to report deaths to include deaths occurring en route to a hospital or while under the care of a hospice. This subdivision was also amended to permit the designee of a person in charge of a hospital or hospice to report a death to the DOHMH. This will enable the hospital or hospice to delegate the

task of filing the report to a lower level employee. Subdivision (a) has also been amended to reflect the correct name of the office of chief medical examiner, and to reflect that a medical examiner within the Office of Chief Medical Examiner is the person responsible for reporting a death. The subdivision was further amended to reflect gender neutrality.

Subdivision (b) was amended to correct legal nomenclature distinguishing between a "subsection" and a "paragraph." The words "office of" were added to chief medical examiner to indicate that it is the office that is required to report.

Subdivision (c) was amended to remove a general description of electronic filing of death certificates, as it is described in greater detail in new subdivision 205.03 (d). This subdivision was also amended to add agents of funeral directors or undertakers and agents or designees of the person in charge of the City mortuary. Funeral directors or undertakers and the person in charge of the City mortuary may use agents to file paper certificates and confidential medical reports with the Department, and now this subdivision will reflect this practice. The subdivision will now require that if funeral directors or undertakers use such agents they must be registered with the Department to ensure compliance with Departmental procedures. Subdivision (c) was also amended to correct legal nomenclature distinguishing between a "subdivision" and a "subsection."

Subdivision (d) was added to require all hospitals and hospices that report 25 or more deaths to the Department per year, and the office of chief medical examiner, to report deaths electronically. When a required reporter files electronically, a funeral director or undertaker authorized to take charge of the remains, or the person in charge of the City mortuary when filing an application for a disposition permit, must also file such application electronically. All persons required or authorized to report a death or to file a death certificate with the Department that are not required to report or file electronically may, at their election and upon approval of the Department, implement an electronic reporting system or continue to report deaths on approved paper forms. This subdivision takes effect on April 1, 2010.

Subdivision (e) was added to require departmental approval of electronic reporting systems, in order to ensure the uniformity and quality of data collection. Toward that end, all individuals utilizing the electronic reporting system must be trained or approved by the Department in the proper use of the system and completion of electronic reporting forms. The subdivision also provides for alternative arrangements, upon the Department's approval or initiative, in particular circumstances.

Subdivision (f) was added to provide for situations in which a reporter receives required information after reporting the death. The reporter must submit such information within five business days of receipt.

Subdivision (g) was added to provide for situations in which a reporter receives autopsy results or other information that would change the information in the cause of death section of the certificate or the confidential medical report. The reporter must submit such information within five business days of receipt.

Subdivision (h) was added to require reporters to provide, within five business days of a request by the Department, additional information necessary to complete, clarify or verify the information required to be reported. Such information may include, for example, updated causes of death.

Section 205.05

The title of section 205.05 was amended to "Preparation and certification of certificate of death and confidential medical report of death" and the paragraph titles "Preparation" and "Certification" were added to subdivision (a). These changes were made to indicate that separate rules apply to the preparation and certification of certificates.

Paragraph (1) of subdivision (a) was amended to permit the designee of a person in charge of a hospital or hospice to prepare the required certificate and confidential medical report, if any. Such a designee must be trained or approved by the Department. This is particularly useful for electronic reporting and will enable the hospital or hospice to delegate

the task of preparing the certificate to a lower level employee. The training and approval requirement should improve data quality. It was further amended to clarify the circumstances when a hospital or hospice must report a death and to broaden the situations in which institutions are required to report deaths to include deaths occurring en route to a hospital or while under the care of a hospice. Paragraph (1) of subdivision (a) was also amended to delete the reference to that portion of the confidential medical report of death pertaining to race and ancestry to be completed by the funeral director or, in the case of city burial, by the physician. The Department is planning to modify the death certificate form so that the race and ancestry items will no longer be contained in the confidential medical report of death.

Paragraph (2) of subdivision (a) is substantially new and was amended to clarify which physicians may certify a death, including the physician in attendance or such physician's duly authorized medical associate. A person certifying a certificate and confidential medical report, if any, shall examine the documents for correctness of the information contained thereon and make necessary changes.

Subdivision (b) was amended by deleting the requirement that the Board of Health approve the electronic form of certificates, because, aside from incidental formatting differences, electronic forms are merely reflective of the paper forms prescribed by the Board pursuant to this subdivision. Subdivision (b) was also amended to reflect changes made to subdivision (a) and to provide for improving the quality of data collection. Any worksheets used by anyone authorized to prepare certificates of death and confidential medical reports must be approved by the Department. Any individual who uses such worksheets shall be trained or approved by the Department. The worksheets shall be retained by the hospital or hospice for a period of three years from the date of event and shall, upon request, be made available to the Department for inspection. The subdivision also clarifies which person preparing the certificate and confidential medical report shall be responsible for completing its various sections.

Section 205.07

Subdivision (a) was amended to provide that disclosure of the confidential medical report of death shall not be compelled, in order to be consistent with the confidentiality provisions of Articles 3 and 11 of this Code. It was further amended to provide for inspection by researchers authorized and approved by the National Death Index of the National Center for Health Statistics of the federal Centers for Disease Control and Prevention, or its successor agency. This is to facilitate scientific research of death data by researchers who apply through the federally established National Death Index. Subdivision (a) was also amended to provide for inspection of confidential medical reports of death occurring on or after January 1, 2010 by the spouse, domestic partner, parent or child of the deceased, or by the individual who is identified on the death certificate as the person in control of disposition. This change will make cause of death information available to the above list of individuals, which is consistent with the policies of some states. The addition of the person in control of disposition was made in response to a public comment.

Subdivision (b) was amended to include epidemiologic surveillance and investigation conducted by governmental public health agencies within the meaning of "scientific purposes".

Section 205.09

This section was essentially reenacted and renumbered from the former Section 205.06, which was deleted.

Subdivision (a) was amended to provide discretion to the Department in the issuance of certifications of deaths, which are abstracts of death certificates. The Department does not currently have the systems to prepare or issue such certifications.

Subdivision (b) was amended to update the minimum amount of information that would be useful on a certification of death by adding the date that the certificate was accepted for filing by the Department and the manner of death (accident, suicide, homicide or natural).

Section 205.11

This section was amended to reflect gender neutrality. Subdivision (b) was deleted and replaced with Section 205.03 (g), which provides for situations in which a reporter receives autopsy results or other information that would change the information in the cause of death section of the certificate or the confidential medical report.

Section 205.13

Former section 205.13, concerning disposal of certain human remains after use for anatomical purposes, was deleted as an unnecessary requirement for public health purposes. Section 205.01, defining "human remains", and Section 205.21, concerning the issuance of disposition permits, now specify the circumstances when such a permit is required or authorized.

New section 205.13 is derived from the former section 205.17. Subdivision (a) was amended to add a reference to remains, as defined in section 205.01(c), resulting from a termination of pregnancy occurring in the City in order to be consistent with the rest of the section. This subdivision was also amended to correct legal nomenclature distinguishing between a "subdivision" and a "section."

Subdivision (b) was added to provide for the holding of human remains for more than the time periods specified in subdivision (a) of this section without being buried, cremated or transported out of the City if an appropriate interim disposition permit has been issued. This was to accommodate, among other circumstances, the interim holding of body parts (as occurred during the World Trade Center disaster), or the holding of human remains during mass mortality events or while being used for anatomical purposes.

Section 205.15

This section is derived from former section 205.19. This section was amended to clarify that it applies to deaths or terminations of pregnancy that occur in hospice or other health care facilities, in addition to hospitals. The reference to "a permit issued pursuant to §205.25" was deleted because, in practice, disposition permits are not issued until after death certificates are prepared, certified and registered. The references to "next of kin" and the "Public Administrator" were deleted and replaced with the "person in control of disposition" as now defined in section 205.01. The section was further amended to clarify that the performance of an autopsy pursuant to §4214(1) of the State Public Health Law refers to unclaimed remains. The section was also amended to reflect gender neutrality.

Section 205.17

This section is derived from former section 205.21. This section was amended by replacing "next of kin, legal representative or, in the absence of arrangements by such next of kin or legal representative, by a friend of the deceased" with the "person in control of disposition". This is consistent with amendments to Section 205.01. The section was also amended to reflect gender neutrality.

Section 205.19

This section, relating to the removal of human remains, is derived from former section 205.23. Subdivision (a) was amended by separating it into paragraphs (1) and (2). Paragraph (1) was amended to update, clarify and conform to current practice the circumstances under which human remains may be removed from the place of death or termination of pregnancy. The paragraph now provides for electronic filing prior to removal. The paragraph was further amended to clarify that the filing must be made by the person required to report a death or termination of pregnancy pursuant to subdivision (a) of §205.03 or subdivision (a) of §203.03, and was amended to reference interim disposition permits in accordance with changes to sections 205.13 and 205.21. Paragraph (1) was amended to delete the requirement that a licensed funeral director or undertaker must have in his or her possession a "completed" certificate of death or termination of pregnancy, as the personal particulars section may not yet have been completed by the funeral director or undertaker. The paragraph was further amended to clarify throughout that it applies to terminations of pregnancy as well as deaths.

Paragraph (2) of subdivision (a) is new. It provides for the removal of human remains from the place of death or termination of pregnancy in the case of a death from natural causes occurring elsewhere than in a hospital or hospice if the funeral director, undertaker or person in charge of the mortuary has obtained authorization from the office of chief medical examiner to remove the remains, or has obtained authorization to remove the remains and assurance from the physician attending the death, or from his or her duly authorized medical associate, that the death is from natural causes and that said physician or medical associate assumes responsibility for certifying to the cause of death. This is consistent with current practice.

Subdivision (b) was amended to correct legal nomenclature distinguishing between a "subdivision" and a "subsection" and to correct the title of the office of chief medical examiner.

Subdivision (c) was amended to correct the title of the office of chief medical examiner, reflect gender neutrality and correct legal nomenclature distinguishing between a "subdivision" and a "subsection."

Subdivision (d) was amended to clarify that the police department is of the City, and to correct the title of the office of chief medical examiner.

Section 205.21

This section, regarding disposition permits, is derived from former section 205.25. Permits to bury, cremate or to transport human remains have long been required in New York City. In circumstances such as during mass mortality events or when human remains are used for anatomical purposes, it may be necessary to temporarily hold human remains beyond the periods specified in section 205.13 without burial, cremation or transportation. Subdivision (b) of section 205.13 requires the issuance of an interim disposition permit by the Department to temporarily hold human remains for such periods. Accordingly, subdivision (a) of this section 205.21 has been amended to include reference to interim temporary holding permits, in addition to burial, cremation and transportation permits.

Subdivision (b) has been divided into three paragraphs. New paragraph (3) of subdivision (b) specifies the information required to be kept by a person to whom an interim holding permit has been issued. It also requires the surrender of the interim permit when a final disposition permit to bury, cremate or transport the human remains is issued.

Subdivision (d) has been revised to utilize the newly defined term "person in control of disposition".

Section 205.23

This section is derived from former section 205.27. It has been amended to clarify that when human remains are being transported into the City from a jurisdiction that does not issue disposition permits, the Department may accept certified copies of certificates of death or termination of pregnancy in lieu of a permit.

Section 205.25

This section is derived from former section 205.31. Subdivision (a) has been repealed as the regulation of new cemeteries and cemetery name changes is wholly within the jurisdiction of the New York State Department of Health and Department of State pursuant to the Public Health Law and Not-for-Profit Corporation Law and related regulations. The remaining subdivisions have been re-lettered accordingly.

Section 205.27

This section, regarding disinterment permits, is derived from former section 205 33 and remains essentially unchanged. Modifications were made to reflect renumbering of sections, correcting the title of the Office of Chief Medical Examiner, the use of the new term "person in control of disposition" and gender neutrality.

Section 205.29

Former section 205.29, regarding when and where permits are obtained, has been deleted as unnecessary.

This new section 205.29 is derived from former section 205.35.

Subdivision (a) now requires that agents of funeral directors or undertakers who seek to file certificates with the Department must, in addition to the funeral directors or undertakers, register with the Department.

Subdivision (b) was amended to require presentation of a government issued picture identification, in addition to the State-issued certificate, in order for a funeral director or undertaker to register with the Department.

Subdivision (c) was added to specify the documentation that an agent must present in order to be registered with the Department. Such measures provide a greater level of security to the registration process.

Section 205.31

This section, regarding the authority of funeral directors or undertakers to apply for departmental permits, is derived from former section 205.37. Subdivision (a) now uses the term "person in control of disposition" as it is newly defined in section 205.01. Paragraphs (1) and (2) were also amended to reflect gender neutrality.

Section 205.33

This section replaced former section 205.39 and provides authority for the Department to withhold registration of funeral directors, undertakers or their agents, to refuse to issue permits or to accept certificates for filing such when serious or repeated violations of the Code are found to have been committed. When City registration is denied, suspended or revoked, an opportunity to be heard will be provided pursuant to the rules of the Department, currently found in Chapter 7 of Title 24 of the Rules of the City of New York. Such a strict enforcement mechanism will prevent abuses of the registration process.

41. Statement of Basis and Purpose in City Record Sept. 28, 2009:

I. Background

Reducing the burden of tobacco use is a core function of DOHMH. In 2002, the Department launched a comprehensive tobacco control program to reduce and prevent smoking in New York City. By implementing multiple, intensive interventions-taxation, legislation, public education, and cessation strategies-and rigorously evaluating these efforts, the Department has taken a pioneering approach to tobacco control that has yielded unprecedented results.

Despite the Department's tobacco control successes, more than 950,000 adults and 20,000 public high school students still smoke in New York City.[1,2]1112 Continued tobacco use among these smokers may reflect a lack of awareness and comprehension of the negative health outcomes associated with tobacco use, as well as a lack of knowledge about the availability of smoking cessation assistance.

The Department proposes that the Board of Health enact the proposed amendment to require that locations that sell tobacco products post signs describing the health harms associated with tobacco use and the smoking cessation resources available to New Yorkers. This amendment will promote further reductions in smoking prevalence in New York City.

II. Tobacco use is the leading cause of preventable death.

Smoking is the leading cause of preventable death in the United States and in New York City. Up to one half of life-long smokers, depending on age, are expected to die of tobacco-related diseases.[3]13 Smokers who die of

tobacco-related diseases lose an average of 14 years of life.[4]14 In New York City, nearly one in seven deaths are smoking-related; smoking kills about 7,400 people a year, a third of them before age 65.[5]15 Despite a 27% reduction in adult smoking prevalence since 2002, nearly one million New Yorkers still smoke.

There are numerous health risks associated with smoking. Research has linked tobacco use with chronic diseases including lung cancer, heart disease, stroke, blindness, asthma, chronic obstructive pulmonary disorder and emphysema. Bladder, larynx, esophagus, cervix, kidney, lung, pancreas, and stomach cancers have also been shown to be associated with tobacco. Smoking also has numerous reproductive effects including infertility, pre-term delivery and low birth weight.[6]16

III. Tobacco users' behaviors are influenced by their awareness and understanding of the health risks associated with tobacco use

Since the first Surgeon General's report was published in 1964, much information has been made public about the health risks associated with smoking. Despite this, there remain significant gaps in smokers' understanding of these risks.[7,8,9]171819 These gaps in risk awareness are widest among lower socioeconomic groups.[10]20

Smokers' health behaviors are strongly influenced by their understanding of the health risks of smoking. Smokers who perceive greater smoking-related health hazards are more likely to consider quitting and to quit smoking successfully. Health warnings are strongly associated with health knowledge.[11,12]2122 Research has shown that health warnings which communicate the adverse health effects of tobacco use are among the most effective at prompting smokers to quit.[13]23 In addition, research has shown that smokers find pictorial warnings more effective and engaging than text-only warnings.[14,15]2425 Pictorial warnings appear to be especially effective among youth: 78% of Canadian youth agree that pictorial warnings on Canadian packages have been effective in informing them about the effects of cigarette smoking, and 46% report that the pictorial warnings have been effective in getting them to try to quit smoking.1626

IV. Smoking cessation information will increase the likelihood that smoking cessation aids are utilized and contribute to reductions in smoking prevalence.

In 2007, nearly 70% of all adult smokers in New York City tried to quit smoking at least once.[17]27 But without assistance, fewer than 10% of smokers who try to quit achieve permanent abstinence.[18]28 Studies have consistently shown that smokers can double their chances of quitting smoking successfully by getting counseling and using nicotine replacement therapy or other appropriate drug treatments.[19]29 Free cessation counseling and nicotine replacement therapy are available to New York residents who call the New York State Smokers' Quitline, but New Yorkers must first be made aware of the availability of that service.

Research has shown that utilization of cessation services increases when smokers are made aware of their availability.[20,21,22]303132 Displaying this information where cigarettes are sold will ensure that smokers are informed about resources that are available to help them quit smoking for good, and increase utilization of these resources to further decrease smoking prevalence in New York City.

V. Point-of-sale tobacco information will contribute to reductions in youth tobacco sales.

The majority of adult smokers begin smoking during adolescence; two-thirds of them are daily smokers by the age of 19.[23]33 Despite existing New York State and New York City laws prohibiting tobacco sales to people under the age of 18, minors are able to purchase cigarettes illegally at some licensed retail establishments.[24]34

Requiring health warning signs at the point-of-sale in places where cigarettes are sold will reinforce compliance with existing laws prohibiting tobacco sales to minors. By highlighting the undesirability and unacceptability of tobacco use, health warning signs will be consistent with other Department efforts to prevent youth smoking initiation and will further de-normalize smoking.

VI. Proposed changes to Health Code to require that health warnings and smoking cessation information be posted at all tobacco retail locations.

Accordingly, the Department requests that the Board amend Article 181 of the Health Code to add a provision that would require the posting of tobacco health warnings and smoking cessation information in all places where tobacco is sold in New York City.

VII. Response to comments

The Department received 46 comments from individuals on behalf of themselves or organizations. Of those comments, 33 were in support of the proposed amendment to Article 181 and 13 were in opposition. The proposal has been amended in response to comments and for clarity. Several comments expressed concern that the size of the required health warning signage was too large to be accommodated by many New York City retailers. Accordingly, the proposal has been amended to reduce the maximum size of the required signage from 1,296 square inches to 576 square inches, and to give retailers the option of posting smaller signage at each place of payment, or larger signage near tobacco displays. In addition, the proposal has been amended to authorize the New York City Department of Consumer Affairs (DCA) to distribute the health warning signage, to enforce Section 181.19, and to adjudicate at its Administrative Tribunal violations of Section 181.19 that are issued by DCA.

42. Statement of Basis and Purpose in City Record Sept. 28, 2009:

The Board of Health hereby approves revisions to Sections 207.07 and 207.13 of the Health Code to establish fees, effective January 1, 2010, for certain vital records corrections and permits. The effective date of the fees is being added to the resolution to reflect the Department's intent.

Background

The Department does not currently charge fees for correcting or amending birth and death certificates, or for issuing disposition permits to funeral directors, which are required for burial, cremation or transport outside the City. The Department is proposing to charge fees based on cost analyses to partially recover the Department's costs in performing these functions.

Cost calculations

Fees for each service were calculated through a user cost analysis, conducted by the Department's Division of Finance and Planning in cooperation with the City's Office of Management and Budget. A user cost analysis assesses costs of current operations involved in providing a specific service to the public. A fee, no greater than the cost, is then determined on a per unit basis. The costs that are factored into the calculation include direct costs (PS-personal services, including fringe and OTPS-other than personal services) and indirect costs (executive management overhead, including fringe; administrative services overhead, including fringe; space and utilities; and cost of other agency services).

The new disposition permit fee matches the Department's cost. The correction fee will recover roughly two-thirds of the Department's costs and will be comparable to fees charged by other jurisdictions.

Corrections and amendments application fee

The Department's Office of Vital Records receives and processes requests for corrections and amendments to birth and death certificates. Approximately 45,000 corrections applications are processed annually. Currently, Health Code §207.07 requires the Department to issue amended certificates "without further charge" when amendments are approved. In order to avoid confusion and potentially conflicting provisions, the Department is deleting these words from §207.07. The Department is further adding a subdivision (g) to §207.13, effective January 1, 2010, to charge a $40.00 fee, to be paid upon application, for about two-thirds of the corrections applications for the following:

· Adding a given name more than 60 days after birth

· Correcting birth and death certificate errors and omissions made by family members and informants

· Correcting hospital birth certificate errors and omissions filed after 12 months

· Correcting funeral home errors

· Correcting funeral home omissions filed after 12 months

· Amending a birth certificate for an adoption

· Amending a new birth certificate for a person who has undergone convertive surgery

· Re-submitting an application more than 1 year after rejection

No fee will be charged for the following:

· Acknowledgments of paternity

· Orders of filiation (parentage)

· Medical Examiner amendments

· Recording delayed registrations of births

· Reports of foundlings

· Correcting Department errors

· Birth certificate amendments filed within 12 months of the birth when filed by hospitals or licensed midwives

· Adding missing information within 12 months of filing a death certificate by a medical certifier or funeral director

Disposition permit fee (burial, cremation, transport permits)

Health Code §205.25(a) requires, in part, that, "When a death or termination of pregnancy occurs in the City, the remains shall not be buried, cremated or transported out of the City unless an appropriate permit has been issued by the Department." Furthermore, the Department is considering amending the Code to reflect the issuance of an interim disposition permit. If such a proposal is adopted, the Department will charge a fee for the interim permit, but will not charge when that permit is surrendered in exchange for a final disposition permit. In 2007, there were 54,073 deaths and several hundred terminations over 24-weeks gestation. Each of these requires a disposition permit. The Department is adding a subdivision (h) to section 207.13, effective January 1, 2010, to charge a $40.00 fee for each disposition permit, to be paid upon application, except for those burials in the City cemetery (about 3,000 per year). A reference to Article 205 of the Code is being added to the resolution in order to clarify that the fee will be imposed for disposition permits issued pursuant to that Article.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 1-02

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-02 Definitions.

As used in this chapter, the following terms shall mean:

Agency. The term "Agency" shall mean the Department of Housing Preservation and Development of the City of New York or the office or department charged with the administration of the program.

Cost of acquisition. The term "cost of acquisition" shall mean the sum of

(1) cash payments made to acquire the property to be rehabilitated or improved and

(2) the net cost of satisfying the bona fide mortgages, liens (including real estate taxes due and owing to the City of New York) and other encumbrances on the property. The cost of acquisition shall in no event exceed the appraised value of the property prior to rehabilitation.

Development cost. The term "development cost" shall comprehend those items included under such heading in §1-05 (Allowable Rehabilitation and Improvement Cost) of these Rules and Regulations.

Maximum mortgage amount. The term "maximum mortgage amount" shall mean the lesser of the following:

(1) An amount which, together with all prior liens permitted under §1-08(c) of this chapter, shall not exceed 90 percent of the value of the property after completion of rehabilitation;

(2) Where the property is owned free and clear and was acquired more than one year before submission of the loan

application, development cost;

(3) Where the property was acquired more than one year before submission of the loan application and is encumbered, an amount necessary to satisfy such encumbrances (not to exceed the appraised value of the property prior to rehabilitation) plus development cost, provided that the loan shall not exceed two times the development cost;

(4) Where the property is to be acquired or was acquired less than one year before submission of the loan application, the cost of acquisition plus development cost. Persons or families of low income. The term "persons or families of low income" shall mean and include, pursuant to §401 subdivision 3 of Article VIII of the Private Housing Finance Law, owner-occupants, persons and families in occupancy immediately prior to the date the loan is granted, and persons or families whose probable aggregate annual income during the period of occupancy does not exceed six times the rental (including the value or cost to them of heat, light, water and cooking fuel) of the apartment occupied by such persons or families except in the case of persons or families with three or more dependents, where such ratio shall not exceed seven to one, as this definition may be further expanded or limited by §1-12 (Management Supervisory Requirements) of this chapter.

Value of the property after completion of rehabilitation. The term "value of the property after completion of rehabilitation" shall mean appraised value prior to rehabilitation plus development cost, provided that the estimated revenues, including any subsidies, will be sufficient to support the estimated debt service and operating expenses.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-03 Eligibility and General Conditions.

(a) Applicants for loans and any prior lienors must covenant in writing, that so long as any part of such loan remains unpaid, or any tax exemption-tax abatement granted as a result of the installations, alterations, improvements or rehabilitation remains in effect, or for a period of at least ten years from the occupancy date, whichever is the later, the following conditions will govern:

(1) Apartments in such multiple dwelling shall be available solely for persons or families of low income as herein defined and as set forth below in subdivision (c) and in §1-12 (Management Supervisory Requirements) of this chapter.

(2) Apartments shall be available strictly in the order of priority set forth in §l-12(d) of this chapter.

(3) No charge or rental for apartments in such multiple dwelling shall be made or charged in excess of the maximum rentals prescribed by the Department of Housing Preservation and Development in accordance with the New York City Rent and Rehabilitation Law and the regulations promulgated thereunder.

(4) At all times during the life of the mortgage, the owner shall keep and maintain the rehabilitated building and all fixtures and articles of personal property now or hereafter used in the building in good condition, order and repair. Failure on the part of the owner to comply with this provision or make repairs when requested by the Agency shall result in the Agency, at its option, employing workmen to make such repairs at the owner's expense or declaring the unpaid principal balance of the mortgage, with interest, immediately due and payable.

(5) Any persons owning, operating or managing such multiple dwelling, during or after rehabilitation, shall comply

with the laws under which a loan is made and the Rules and Regulations now or hereafter adopted by the Agency, including Equal Opportunity Regulations.

(6) Any persons owning, operating or managing such multiple dwelling shall permit the authorized officers, employees, agents or inspectors of the Agency to enter in or upon the mortgaged premises and inspect same at all reasonable hours.

(7) The Agency, its officers, employees, agents or inspectors shall have full power to investigate and order the owner of said multiple dwelling or his agents to furnish such reports and information as it may require concerning the planning and construction of the installation, rehabilitation or improvement and the management of said multiple dwelling and shall also have full power to audit the books and records of such owner with respect to such matters. Owners of buildings rehabilitated under this program must submit reports as specified in §1-12 (Management Supervisory Requirements) of this chapter.

(8) The foregoing covenants shall run with the land.

(9) The applicant shall comply with applicable laws and regulations of the Department of Buildings, particularly §26-235 of the Administrative Code referring to the sealing of vacant buildings, and make the buildings safe. It must be clearly understood that the filing of an application does not relieve the applicant of any liability for violation of such rules.

(b) Any individual, partnership, organization or corporation may qualify for a loan if the holder of a fee title to the property, or of an option or contract to purchase with a conveyance of title to be made prior to, simultaneous with, the execution of the loan documents.

(c) Loan applicants must be prepared to certify when the loan is granted that at least eighty percent of the tenants occupying the building on such date are persons or families of low income whose probable aggregate annual income will not exceed six times the rental (or seven times, where there are three or more dependents) (including the value or cost to them of heat, light, water and cooking fuel), based on the rents projected to be charged upon completion of the rehabilitation.

CHAPTER 1 RULES AND REGULATIONS

§1-04 Preliminary Site Submission.

The applicant, prior to the filing of a formal application, shall submit to the Agency, for preliminary consideration, a description of the proposed installation, alteration, improvement or rehabilitation which shall include the following information:

(a) A plot plan of the project site which will include the section, block and lot, metes and bounds description with specific designation of the building or buildings to be improved under the proposed loan or loans. This may be waived by the Agency for loans less than $4,200 per unit;

(b) A statement of the general character and physical condition of buildings within the immediate environs of the project site, and of the applicable zoning;

(c) A statement outlining plans for the installations, alterations and rehabilitation to each building, the approximate period of time necessary for the completion of such and the estimated cost to each building;

(d) A statement setting forth the names and addresses and telephone numbers of the proposed developers, architect and general contractor, attorney and accountants with a resume of the experience of each;

(e) A statement as to the source of the equity contribution for such work;

(f) A statement setting forth the results of a survey of the housing needs of site occupants and a plan for meeting those needs;

(g) A statement setting forth a plan for the management of the building during the alteration, improvement or rehabilitation where tenants remain in occupancy during the work and after such work is completed;

(h) Where the property is located within an Urban Renewal, Model Cities, Code Enforcement or any certified area of governmentally sponsored improvements, a letter from the Project Director in charge of such area certifying that rehabilitation of such property is in conformity with plans for the area. Upon receipt of such information, the agency shall advise the applicant whether a formal application may be filed within the time period specified by the agency.

Rules of the City of New York

28 RCNY 1-05

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-05 Allowable Rehabilitation and Improvement Costs.

Loans may, at the discretion of the Agency, include the following items of cost incurred in the process of rehabilitation or improvement of multiple dwellings:

(a) **Development cost.** (1) Construction costs.

(2) Relocation stipends paid in accordance with applicable laws and regulations to tenants in occupancy of the building to be rehabilitated on the date of execution of the loan, or on such prior date as may be approved by the Agency, but not earlier than the date of filing the loan application.

(3) Architectural and legal fees and contractor's overhead and profit as set forth in the schedules herein, and reasonable fees for accounting and appraisals.

(4) The cost of a "Payment and Performance Bond" or an amount in lieu thereof, as provided in §1-09 (Fee Requirements) of this chapter.

(5) Real estate taxes, assessments, frontage and meter charges and sewer rents accruing during the period of construction, commencing on the date of execution of the loan, where income is inadequate during the period of construction to pay such costs.

(6) Monthly interest on the amounts advanced under the loan during the period of construction.

(7) A supervision fee as provided in §1-09 of this chapter.

(8) Fees due and payable to an approved title company for the title insurance policy, recording of loan documents and mortgage recording taxes.

(9) Net cost, if any, related to the rehabilitation or improvement including, but not limited to, maintaining the property pending rehabilitation or improvement, or where actions are taken in aid of the rehabilitation or improvement prior to the closing, such net costs commencing no earlier than the date of the loan application as may be approved by the Agency. Net cost represents the extent to which, due to the rehabilitation or improvement, operating expenses for repairs, janitorial services, real estate taxes, utilities and management contract and expenses related to the rehabilitation or improvement including cost of initial renting as such are approved by the Agency exceeds the rents collected from the property.

(10) Premiums for insurance during construction.

(11) An amount approved by the Agency for contingencies, to provide for approved change orders and other approved increases in development cost.

(b) **Cost of acquisition.** (1) The sum of cash payments made to acquire the property to be rehabilitated or improved, and

(2) The net cost of satisfying bona fide mortgages, liens (including real estate taxes due and owing to the City of New York) and other encumbrances on the property. The cost of acquisition shall in no event exceed the appraised value of the property prior to rehabilitation. The sum of (1) and (2) shall not exceed the appraised value of the property prior to rehabilitation.

(c) **Cost of refinancing.** Actual cost to applicant or to any one with whom applicant has an identity of interest, of satisfying or refinancing existing mortgages, liens, including real estate taxes due and owing to the City of New York and other encumbrances.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 1-06

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-06 Application Submission.

Applicants who receive approval after review of the preliminary site submission may obtain application forms from the Department of Housing Preservation and Development, Office of Rehabilitation Financing, 100 Gold Street, New York, N.Y. 10033. Application forms may also be obtained from the Department of Housing Preservation and Development, Office of Special Improvements, 2 Lafayette Street, New York, N.Y. 10007, when a loan is sought for less than $4,200 per unit. Submission must include the following:

(a) An original and four (4) copies of the application (typewritten or legibly printed) shall be submitted. If the applicant is a corporation, the corporate seal must be affixed to the application. The application shall set forth the name, address and telephone number of the owner of record of the property, the holders of existing liens and of the proposed architect, contractor and attorney.

(b) Three (3) copies of preliminary plans shall be submitted. Such plans are to show existing and proposed room or apartment layouts of all the floors; also a plot plan showing the land and building with dimensions and an apartment distribution schedule. Preliminary drawings must be prepared by a registered architect or professional engineer. (Information on rehabilitation design standards promulgated by the Agency may be obtained from the Agency). Where because of the nature of the rehabilitation, plans are not required by the Department of Buildings, this requirement for three copies of preliminary plans may be waived in the discretion of the Deputy Commissioner.

(c) For all types of rehabilitation work, the applicant must file an original and three (3) copies of an outline specification and cost estimate for all work to be performed, giving a description of the work and an estimate of the cost and trade cost breakdown of each item. Quality of workmanship and materials shall conform to the rehabilitation design

standards promulgated by the Agency.

(d) A copy of the document through which the applicant claims title or option.

(e) Where applicant is a corporation, a copy of the following additional documents will be required: New York State Certificate of Incorporation or authorization to do business in the state with proof of payment of current franchise taxes and New York City General Corporation Tax.

(f) Where applicant is a partnership, copies of its partnership agreement and certificate, a list of all its partners and the information specified in subdivision (g) of this section with regard to each.

(g) A list of the assets of the applicant with particular reference to any real estate holdings within the City of New York and where applicant is a corporation, a list of such assets of all officers, directors and of all stockholders having more than ten percent interest; and a statement of the direct or indirect interest of any such parties in other government programs providing loans or other public assistance.

(h) Applicant must file on the form provided by the Agency a sworn Certificate of Interest disclosing the identity of all parties involved or to be involved in the purchase, ownership and rehabilitation of the premises in question, and where applicable, the details of the transaction by which one or more of the parties acquired title and full particulars regarding all mortgages and other liens on the premises and all payments made or to be made in connection therewith. If any portion of the loan is to be used to satisfy a mortgage, the applicant will be required to certify as to the origin of each mortgage; if a purchase money mortgage to state the total purchase price of the property, the amount secured by the mortgage and the balance due thereon; if not a purchase money mortgage, to state the actual cash advanced to the mortgagor and the balance due thereon; to state the amount to be paid to the mortgage holder at the date of loan closing to satisfy the mortgage; to certify that payment made to the holder of the mortgage is and will be a bona fide arms length transaction, and disclose whether there is any relationship by family ties or otherwise among any of the parties, their officers or principals; and finally, to certify that the mortgagee of the satisfied mortgage neither has nor will have any financial relationship to the rehabilitation project. Applicant is also required to disclose promptly during the processing of the application, by an amended certificate, any changes which occur during such processing and to verify the continued accuracy of the certificate at the loan closing.

(i) Applicant must file a detailed plan for the management of the building during the period of alteration, improvement or rehabilitation when tenants remain in occupancy and after such work is completed. The plan should detail his experience in management of residential property, plans for tenant involvement in the upkeep and maintenance of the building and for community group involvement, if any.

(j) A filing fee shall be paid as provided in §1-09.

(k) Investigatory reports required by the Agency shall be charged to the applicant.

(l) Such additional information in such form as the Agency may require. Upon receipt of such application, the Agency will determine whether the loan shall be made based on a recommendation by a Municipal Loan Committee, consisting of the Commissioner of Development, the Deputy Commissioner of the Office of Rehabilitation Financing, the Assistant Administrator for Programs and Policies, the Comptroller, and the General Counsel; and in the case of loans processed by the Office of Special Improvements consisting also of the Office of Rent and Housing Maintenance and the Deputy Commissioner of such Office.

28 RCNY 1-07

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-07 Insurance Requirements.

The applicant is required to submit to the Agency, for its approval in a form satisfactory to the Agency including but not limited to, an endorsement that fifteen days prior notice by registered mail, return receipt requested, of cancellation shall be given to the City of New York as the Agency shall prescribe, the following evidence of insurance prior to loan closing or commencement of construction or installation, whichever is first: (a) An original policy of fire insurance with extended coverage, for a term of three (3) years, in an amount at least equal to the amount of the loan. During the construction period coverage may be for less than the amount of the loan. Such policy must contain a loss payable clause, naming the City of New York, c/o Department of Housing Preservation and Development as mortgagee and further provide that "buildings in course of renovation with permission granted to complete and occupy" or a similar description to this effect. When the improvements are completed, such proviso is to be deleted from the policy.

(b) An original policy of owners protective liability and property damage insurance issued to the contractor, with the owner and "The City of New York Department of Housing Preservation and Development" as additional insured, to protect the owner and the City against claims for property damage and for personal injuries, including accidental death caused by the operations of the contractor or his sub-contractors during the performance of work at the building or adjacent thereto, in at least the sum of $100,000-$300,000 bodily injury and $25,000-$50,000 property damage, or in such larger amounts as may be determined by the Agency. When improvements are completed, this coverage may be discontinued.

(c) Evidence of the contractor's coverage for public liability and property damage insurance, or by the comprehensive general liability insurance to protect him and his subcontractors, the owner and the City against claims for property damage and for personal injuries including accidental death in at least the sum of $100,000-$300,000

bodily injury and $25,000-$50,000 property damage.

(d) An original policy of boiler insurance (broad form) in the amount of not less than $50,000 providing coverage in the event of explosion, collapse, or rupture of boilers during installation or operation, where applicable.

(e) The contractor and each sub-contractor shall provide adequate Worker's Compensation Insurance for all employees engaged in the work on a building who may come within the protection of the Workers' Compensation Law, and where practicable, Employer's General Liability Insurance for employees not so protected.

(f) A payment and performance bond guaranteeing performance by the contractor and payment for all services and material. Where satisfactory proof has been presented that after a diligent effort such bond cannot be obtained, the Agency may accept in lieu thereof

(1) a guarantee of completion executed by the owner and where the owner is a corporation, by the principal stock-holder(s) or officer(s) thereof,

(2) a financial statement by each party executing such a guarantee, showing sufficient net assets and net worth to give reasonable certainty of financial ability to fulfill such commitment, and

(3) an amount equal to two (2%) percent of the construction cost as a non-refundable fee. The Agency may in its discretion, where satisfactory proof has been presented that after a diligent effort such bond cannot be obtained, accept in lieu thereof bonds furnished by subcontractors covering at least fifty (50%) percent of the construction cost, in which case the balance of the construction cost shall be covered by guarantees of completion and fees as described above. Following completion of the rehabilitation the owner shall maintain public liability insurance against claims for personal injury or death and for damage to property suffered by others, occurring upon, in or about the building in at least the sum of $100,000-$300,000 bodily injury and $25,000-$50,000 property damage in a form satisfactory to the Agency. Modification of those insurance requirements as to term, amount, or coverage may be made only with the approval of the Deputy Commissioner of the Agency charged with the administration of this pro- gram.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 1-08

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-08 Mortgage Conditions.

(a) No loan may exceed the maximum mortgage amount.

(b) Each loan made under this program shall be secured by a bond or note and mortgage upon the multiple dwelling to be improved and the land upon which it is situated to be repaid over or within a period of thirty years in such manner as may be provided therein.

(c) The Agency may take a junior lien on the property as security for the loan or may, in accordance with the provisions of the Private Housing Finance Law, participate in a rehabilitation loan with a private lender, provided that the total indebtedness will not exceed the maximum mortgage amount after completion of rehabilitation. In determining whether to take a junior lien the Agency shall give favorable consideration to the following, if present: that the interest rate on the prior lien is more favorable than the Agency can offer the mortgagor; that the holder of the prior lien is an institutional lender of recognized standing; and that the principal amounts due under the prior lien or liens are being amortized on a basis which would not jeopardize the City's lien. A subordination agreement may be required from the holder of any prior lien where the Agency deems it desirable.

(d) The mortgagor shall be required at the closing to execute a construction contract for the performance of the work with a general contractor or tradesman. Both the contract and the general contractor or tradesman must be approved by the Agency and the Agency reserves unto itself the right to approve or reject a contractor. The mortgagor shall be required to submit a resume of the experiences of the proposed contractor and all proposed subcontractors, financial statements of the contractor and for all firms in which the contractor has a controlling interest for the last three years, references from at least three major clients of each contractor, and a statement of the ethnic breakdown of the

employees of each such contractor and subcontractor in advance of such closing.

(e) At the closing of the loan, the owner shall advise the Agency by a sworn statement of changes, if any, that have occurred since the date of application for the loan with respect to condition of the building, mortgage balances, acquisition cost, taxes, liens, discounts and assignments, and any change in relationship of parties in interest, and if there have been no changes, shall so state. If any portion of the loan is used to satisfy a mortgage, the mortgagor will be required at the closing to provide a certificate from the holder of the mortgage as to the amount paid by such mortgagee for the mortgage, where applicable, and the balance due thereon.

(f) Interest and amortization payments shall be due and payable commencing on the first day of the third month after a certificate of occupancy, temporary or permanent, has been obtained, where applicable. This period may be extended upon due notice by the Agency to the City Comptroller where occupancy is dependent on conditions beyond the owner's control such as the availability of Federal rent supplements.

(g) A mortgagor may not, at any time, further encumber, mortgage or permit any encumbrance or lien of any kind upon the mortgaged premises without the prior written consent of the Agency, nor may the premises or any part thereof be conveyed, assigned or transferred without the prior written consent of the Agency. Failure to comply with this subdivision (g) at the option of the Agency, shall result in the Agency's declaring the entire unpaid principal balance and interest immediately due and payable.

(h) The mortgage may provide that with the consent of the Agency a mortgagor may prepay the principal amount of the loan together with interest then due. However, the apartments in the premises shall remain subject to the conditions set forth in §1-03 (Eligibility and General Conditions) of this chapter.

(i) The Agency shall establish first rentals or adjust maximum rents, whichever is applicable, for all buildings rehabilitated with a municipal loan and certify same to the Division of Housing and Community Renewal. In arriving at such rent levels, the Agency shall consider the total of the projected operating costs, including water and sewer taxes, fuel, insurance, utilities, painting and repairs, and vacancy allowance, a reasonable return on the owner's equity and interest and amortization payments on the mortgage.

HISTORICAL NOTE

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 1-09

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-09 Fee Requirements.

(a) Simultaneously with the filing of the application the applicant shall deliver to the Department of Housing Preservation and Development, Office of Rehabilitation Financing, a certified or cashier's check payable to the "Municipal Loan Program Application Account" in the sum of one hundred fifty dollars ($150), or such larger amount as may be required by the Agency to defray the costs of appraisal, credit reports and other expenses of processing the application. Applications filed with the Office of Special Improvements must be accompanied by such a check payable to "Small Loan Program Application Account" in the amount of one hundred dollars ($100) for such purposes.

(b) All mortgage loans are subject to a supervision fee in the amount of two (2%) percent of the total loan, payable to the City of New York. Such fee may be waived by the Agency in whole or in part in the case of loans under $4,200 per unit.

(c) A fee in lieu of payment and performance bond, where applicable, shall be requested equal to two (2%) percent of the estimated construction cost, which sum shall be deposited by the Agency in its Rehabilitation Loan Reserve Fund.

(d) A management fee in the amount of 1/4 percent of the original principal amount of the loan shall be charged and payable per annum to meet costs of supervision during the life of the loan. The Agency may in its discretion deposit such sum in its Rehabilitation Loan Fund or use such sum in whole or in part to pay a bank or the New York City Housing Development Corporation for the performance of such services as are generally performed by a banking institution which itself owns and holds a mortgage.

(e) Where a monthly installment of principal and interest on a mortgage has become overdue for a period in excess of fifteen (15) days a "late charge" of one (1) cent per month for every dollar of such installment so overdue may be charged the mortgagor by the Agency and deposited in its Rehabilitation Loan Reserve Fund.

(f) The Agency may determine in its sole discretion to submit the loan application to the New York City Housing Corporation. In the event that such corporation is or shall become the mortgagee, all fees required by this section shall be paid to the corporation rather than to the City of New York, except as the Agency may otherwise prescribe.

(g) None of the fees provided for by this section are refundable.

HISTORICAL NOTE

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 1-10

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-10 Construction Requirements: Payments.

(a) The plans, specifications, work write-ups or any description of work to be performed on a building subject to a loan under this program must be approved by the applicable office of the Agency prior to the commencement of any rehabilitation work or the closing of a mortgage loan for same. Such plans, specifications, work write-ups or other description of work must conform to the rehabilitation design standards of the Agency and must have been approved by the Department of Buildings, where applicable, or any other necessary governmental bureau or department.

(b) During the rehabilitation process the Agency's architects, engineers, rehabilitation specialists or officers and others designated by the Agency may conduct periodic inspections of the work. Copies of all plans, specifications, work write-ups or other description of work, with the Agency's approval stamped thereon, must be kept on the job site for the use of such Agency personnel.

(c) Requests for change-orders shall be in writing. Change-orders must be fully documented, showing original and revised cost estimates and reasons for such change-orders. Upon approval thereof, which shall also be in writing, the change shall be reflected in a revised trade payment breakdown.

(d) The Agency may require the deposit of loan advances in a separate escrow account, in a bank designated by the Agency, subject to withdrawal only upon the joint signatures of the borrower and a representative of the Agency. The Agency may further require that the owner deposit all or a designated portion of the rents collected from the multiple dwellings during the period of construction in such escrow account, or in a separate trust account under such terms and provisions as the Agency shall prescribe.

(e) Progress payments on work completed shall be made on the basis of sworn statements as herein provided, subject to review and approval by the Agency. At the time of each progress payment, the contractor, mortgagor or owner shall execute for the Agency a sworn statement that all bills due for labor, services rendered, and materials furnished in connection with the work to the date of payment are paid and that no liens have been filed, or if not paid, submit list itemizing the amounts due to creditors so as to insure a proper allocation of the payment to satisfy in full such unpaid items. Such statement shall reconcile requisitions with the trade payment breakdown previously submitted. The Agency reserves unto itself the right, at its discretion, to take proceeds of the loan and pay all verified delinquent claims for labor, materials or other services rendered. The Agency shall further withhold an amount equal to no less than ten percent of the total amount of each progress payment as a retention fund under the mortgage to assure satisfactory progress of the work. Such retention, or a portion thereof, may be released prior to the completion of the work upon written request by the owner or mortgagor with the approval of the Deputy Commissioner of the Agency; the retention on completed work may thus be reduced to five percent upon completion of fifty percent of the work. All of the retention remaining shall be released upon the completion of the work to the entire satisfaction of the Agency and other necessary state or municipal bureaus or departments, the presentation to the Agency of a permanent certificate of occupancy, where applicable, proof of payment for all labor and materials, a cost certification prepared and certified by an independent public accountant licensed by New York State, and also a sworn certificate disclosing any changes from the applicant's filing in accordance with §1-06(g) (Application Submission) of this chapter.

(f) The portion of the loan representing interest on advances during construction shall be adjusted upon completion of the rehabilitation as follows: If such portion shall be more than the amount required for interest on advances, the excess shall be credited to the mortgagor in reduction of the principal of the loan; if less than the amount required for such interest, the difference shall be deducted from the final payment of loan proceeds and paid over to the City of New York.

(g) Any income derived during any period of occupancy prior to commencement of debt service may be credited against the construction loan.

(h) Books and records of the contractor and of subcontractors relative to the rehabilitation shall be subject to audit by the Agency. All subcontracts shall be submitted to the Agency when executed and any interest between the mortgagor and the subcontractor shall be disclosed at that time.

(i) The aforementioned cost certification shall be provided on a form approved by the Agency and must include the following:

(1) A certified list of the actual costs paid by the general contractor for materials and sub-contract work under the general contract.

(2) A certified list of the actual costs for non-construction items as were approved by the Agency.

(3) Proof that all labor and materials included in the rehabilitation have been paid for.

(4) An opinion certifying as to the accuracy of the owner's costs statements by an independent certified public accountant.

HISTORICAL NOTE

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 1-11

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-11 Labor Compliance Conditions.

Each mortgagor or contractor performing rehabilitation work with proceeds of a mortgage loan under this program must agree that the following standards and requirements will be strictly complied with:

(a) The contractor will not discriminate against any employee or applicant for employment because of race, creed, color, national origin or sexual orientation. The contractor will take affirmative action to insure that applicants are employed, and that employees are treated during employment without regard to their race, creed, color, national origin or sexual orientation. Such action will include, but not be limited to the following: employment, up-grading, demotion, transfer, recruitment or recruitment advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the Agency setting forth the provisions of this non-discrimination clause.

(b) The contractor will participate in an on-the-job training program in accordance with the Mayor's Executive Order No. 50 of 1980 as amended and the agreement dated December 10, 1970 with the New York Building and Construction Industry, Board of Urban Affairs Fund, and will enter into a contract with the Agency to implement such training program.

(c) To the extent that such preference is not inconsistent with the Executive Orders and the agreements referred to in subdivision (b) above, the contractor, including sub-contractors within model cities, urban renewal and code enforcement areas will give a priority in hiring to persons living within the geographic neighborhood in which the work is being performed.

(d) The contractor will not sub-contract any part of the work without prior written approval of the Agency. The Agency will not approve any sub-contractor for work who is at the time ineligible because of violations of this §1-11 (Labor Compliance Conditions) of this chapter, inefficiency, abandonment of duties, or disregard for creditors on prior jobs performed under this program. Failure to comply with the provisions of this §1-11 will result in the Agency's withholding from the contractor any progress payments, in addition to exercising such other rights as may be reserved to the Agency in the loan documents, and forfeiture by the contractor of consideration for future work under this program.

(e) With every requisition for a progress payment or at such times as the Agency shall prescribe, the contractor shall submit to the Agency copies of his payroll report and of each of the sub-contractors (it being understood that the contractor will be responsible for the submission of records of sub-contractors). Such payroll report shall contain such items as prescribed by the Agency including, but not limited to, the name and address of each employee, his classification or trade, ethnic/racial origin, hourly rate of pay, deductions made, number of hours worked and actual wages paid for the work week.

(f) In order to assure strict compliance with this section and these rules and regulations, the books and records of the general contractor or tradesman and all sub-contractors shall at all times be available to the agents or representatives of this Agency and the Agency reserves the right to interview or confer with any employee on a construction job or in the office of general contractor or tradesman or sub-contractor, at any time, in order to determine such strict compliance. Failure to comply with this chapter shall be considered a breach of construction contract and may result, at the discretion of the Agency, in the removal of the general contractor, tradesman or sub-contractor from the construction job and other penalties as the Agency might deem necessary to impose.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-12 Management Supervisory Requirements.

(a) Neither an owner, nor anyone acting in his behalf, shall make a charge or demand a fee of any kind for processing a tenant's application.

(b) The owner shall receive no more than one month's rent as security and one month's rent in advance at the time the tenant takes occupancy of premises rented after the loan is granted. Upon direction by the Agency, such security deposits when received by the owner shall be immediately submitted to the Agency to be held in escrow by the Agency for the benefit of the tenant. The Agency will deposit all such funds in a separate interest bearing account with a banking institution of the Agency's choice. The records of such account shall be available at all times to an owner or tenant for the purposes of audit, inspection or examination, and interest accruing from such account shall enure to the benefit of the tenant-depositor. The principal amount of such deposit together with interest thereon shall be returned to the tenant by the Agency upon the written request of the owner certifying that the tenant's occupancy has been terminated and that all the terms and conditions of such occupancy have been complied with.

(c) The apartments in a rehabilitation building are available to persons or families of low income as defined in §1-02 (Definitions) of this chapter.

(1) Probable aggregate annual income includes the annual income of the chief wage earner of the family, plus all other income of other members of the family in excess of $1,500 per annum for each such member. The income of a working minor who is a full-time student shall not be included in the computation of such annual income. Social Security or other pension plan payments received by females aged sixty-two years and over, or males sixty-five or over shall be excluded from computation of annual income up to a total maximum amount of $75 a month per individual.

(2) If at the time a loan is granted, the tenant's probable annual income exceeds, or later increases so as to exceed, the prescribed income limits by more than fifty percent, he can be removed, with the Agency's consent, from the building either the expiration of a two-(2) year period from the time the loan was granted.

(3) A tenant who moves into the building after the loan has been granted is subject to removal, with the Agency's consent, when his yearly income exceeds the income limits by more than fifty percent.

(4) If, after the expiration of a two-year period from the time the loan was granted, more than twenty percent of the tenants in the building are over-income, the Agency may require the owner to remove over-income tenants.

(5) When the owner of the building occupies one of the units, he will be liable for rent surcharges the same as any tenant.

(6) Any person or family in occupancy whose income exceeds the maximum prescribed shall pay a rent surcharge in accordance with the following schedule:

(Percentage of Maximum Permitted Income)	
Up to 100 percent	Basic rent only
In excess of 100 to 105 percent	Basic rent only
In excess of 105 to 110 percent	Basic rent plus 5 percent
In excess of 110 to 115 percent	Basic rent plus 10 percent
In excess of 115 to 120 percent	Basic rent plus 15 percent
In excess of 120 to 125 percent	Basic rent plus 20 percent
In excess of 125 to 130 percent	Basic rent plus 25 percent

Table **(Continued)**

In excess of 130 to 135 percent	Basic rent plus 30 percent
In excess of 135 to 140 percent	Basic rent plus 35 percent
In excess of 140 to 145 percent	Basic rent plus 40 percent
In excess of 145 to 150 percent	Basic rent plus 45 percent
In excess of 150 percent	Basic rent plus 50 percent

The owner of the dwelling must, subject to the approval of the Agency, take the action necessary to assure compliance with these provisions. Rental surcharges collected by the owner are paid to the Agency by check made out to the order of the City of New York and are used to reimburse the City for any tax exemption or abatement granted to the owner. If such benefits have not been granted, or if a sum equal to the amount of tax exemption and abatement granted has already been paid to the City, the surcharge shall be paid to the City in reduction of the loan in accordance with §403 Subdivision 4 of Article VIII of the Private Housing Finance Law.

(d) Tenants for initial occupancy of such rehabilitated buildings, and for the filing of vacancies as they occur, shall be selected by the Owner in the following order of priority: (1) Site occupants, that is, tenants occupying the building on the date of preliminary site submission or such later date approved by the Agency. "Building" in this paragraph shall include parcels subject to a consolidated loan. Where the Housing Authority has entered into a leasing program regarding the rehabilitated building, all tenants eligible for public housing must apply to the Housing Authority to recognize their priority.

(2) Tenants in occupancy shall have the first priority for internal transfer.

(3) If the site is within an urban renewal area or other redevelopment area, residents of sites acquired to effectuate the plans for such area; families in emergency need of housing, including families who are homeless, under warrant of eviction, living in buildings condemned as unfit for human habitation, or facing displacement from sites, buildings or dwelling units being cleared or vacated by governmental action. Within this class preference shall be given to residents

of the same community planning district.

(4) Persons listed on the outside waiting list in strict chronological order.

(5) Others, subject to Agency approval. Notwithstanding the foregoing, where a federal subsidy is involved, federal standards of priority are controlling as to the affected apartments.

(e) The Agency may direct that a certain number of apartments be held vacant until the building is at least 70 percent occupied by relocatees having priorities (1) through (3) of subdivision (d) above, but not beyond the date when debt service commences. Implementation of the priority system described above shall be accomplished as follows:

(1) The owner shall submit to the Agency, prior to renting, a Tenant Selection Review Form prescribed by the Agency.

(2) The owner shall fully complete such form and state whether he wishes to reject or accept the tenant applicant.

(3) The Agency shall render a decision on acceptability of the tenant within three working days of receipt of the Tenant Selection Review Form.

(4) The Agency reserves the right to approve or reject any tenant applicant and the owner agrees to be bound by its decision. It shall be the owner's responsibility to contact the Agency to obtain such decision. If the applicant is rejected, the owner will follow the same procedure for any other applicant he considers.

(5) The owner shall accept referrals from whatever governmental source the Agency may designate. Where the Agency determines that an owner has rejected a tenant applicant, it reserves the right to order him to submit another applicant for that housing unit. The fact that an applicant is on welfare shall not be grounds for rejection. Failure to submit a Tenant Selection Review Form to the Agency, failure to obtain Agency approval prior to renting, or renting an apartment to a tenant applicant who has not been approved by the Agency, shall, at the option of the Agency, make the owner liable for the expense of finding a comparable housing unit for another applicant who is eligible under renting priorities set forth above and for any unusual cost in relocating such applicant in such comparable unit.

(f) At the discretion of the Agency, the owner may be required to enter into a regulatory agreement with regard to the management and operation of the building and the rents, profits, dividends or distribution of its property and as otherwise prescribed by the Agency.

(g) The owner shall maintain separate and accurate books and records of all managerial and financial data, including assets, liabilities, equity, income and expense, relative to the rehabilitated property or properties for which a separate loan has been made. Such books and records must be made available to the representatives of the Agency for audit, examination or review upon demand. Unless this requirement is modified or waived in the case of a loan under $4,200 per unit, financial reports as prescribed by the Agency relative to a rehabilitated property or properties for which such a separate loan has been made are required to be filed in duplicate, with the Agency for the six-month period ended December 31, and the twelve-month (annual) period ended each June 30. The reports are due within 90 days after the close of each respective period. The indicated filing requirements are to be met with respect to the initial operating periods although these may not be full six- or twelve- month periods. Such reports are to be based on audit examination, in accordance with generally accepted auditing standards, by an independent public accountant licensed in New York State. The annual report, for the fiscal year ended each June 30, is to be certified by such accountant relative to the financial statements and other data required to be contained therein. The foregoing reports are to include the following:

(1) Accountant's certification.

(2) Financial statements (accrual basis).

(i) Balance Sheet, with such supporting schedules as required to be fully informative.

(ii) Statement of Operations, with detailed income and expense subclassifications. The annual statement shall also show separately the operating figures for the last six months of the fiscal year, January l-June 30.

(iii) Statement of Sources and Application of Funds (Change in net working capital). There shall also be filed such other financial reports or data as the Agency may require.

(h) The Agency reserves the right to make periodic inspection on each apartment in the rehabilitated building. Such inspections shall be for the purpose of inspecting the condition and maintenance of the building, the condition of utilities, fixture and equipment. Periodic visits may also be made to the building by representatives of the Agency for the purpose of conferring with tenants, advising on consumer practices, frauds and products, education regarding maintenance of dwellings and where necessary serving as a liaison or intermediary on landlord-tenant problems. Copies of reports of such inspections shall be made available to the owner with recommendations for corrective measures where necessary.

(i) Re-renting or eviction proceedings may only take place with the approval of the Agency. No new tenants may be moved into a building without the owner's following the same procedures as hereinabove set forth.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 1 RULES AND REGULATIONS

§1-14 Fee Schedules.

Allowable architectural and legal fees and contractor's overhead and profit shall not exceed the fee schedules below:

(a) **Architectural fees.** Five and a half percent of construction cost up to $400,000; above that, four and a half percent but not less than $22,000. The fee, which includes mechanical engineers fees will be paid directly to the architect in three parts. Upon closing the municipal loan with plans and specifications approved by the Department of Buildings and this Agency, the architect will receive sixty percent of his fee, an additional twenty percent at closing of the walls and the final twenty percent at completion thereof and upon receipt of a statement of compliance accompanied by a Certificate of Occupancy.

(1) Any work beyond the scope of the contract requirements requested by the Department of Housing Preservation and Development in writing, shall be paid to the architect at the rate of two and a half times the reasonable salaries of technicians engaged in such changes.

(2) When the basic plans are repeated for identical buildings (within twenty percent of design is reused) then such fee shall be reduced by thirty-three and a third percent of original design fee.

(3) Architect shall supply all required services, plans, specifications and filing with the Department of Buildings.

(4) If buildings are contiguous, and only one set of mechanical drawings is used for all buildings, then the fee for each duplicate building shall be 50 percent of the original building construction cost.

(b) **Contractor's overhead and profit.**

Construction Cost	Fee as Percent of Constuction Cost
Less than $100,000	10.0
100,000	9.7
200,000	9.4
300,000	9.1
400,000	8.8
500,000	8.5
600,000	8.2
700,000	7.9
800,000	7.6
900,000	7.3
1,000,000	7.0
1,500,000	5.5
2,000,000	4.0

The amount allowed shall not be less than that for the preceding construction cost.

(c) **Legal fees.** One percent of construction cost up to $50,000, plus three tenths of one percent on amounts in excess of $50,000. The legal fee shall be paid in two parts as follows: Seventy-five percent on closing and twenty-five percent at final payment.

CHAPTER 1 RULES AND REGULATIONS

§1-15 Rent Adjustments.

(a) Upon completion of the rehabilitation or improvement, maximum rents shall be adjusted pursuant to §33.9 of the Rent and Eviction Regulations and the rules and regulations adopted pursuant to those provisions.

(b) Such rentals may thereafter be increased upon application made by the owner to the office or department charged with administration of the Program in the manner set forth herein and as set forth in §33.9 of the Rent and Eviction Regulations and the rules and regulations adopted pursuant thereto. If such office or department determines that a rent increase is required based upon operating and maintenance expenses, real estate taxes, debt service requirements, vacancy and other rent collection losses, and a return on equity computed at 8 percent, the director of that office or department shall so certify to the Office of Rent Control and inform the Office of Rent Control of the amount of the increases which are requested. The Office of Rent Control shall issue written notice to the tenants of the rent increases requested by the owner. Upon expiration of the time allowed for the tenants to answer as set forth in such notice, the Office of Rent Control shall forward any responses to the administering office or department. Such office or department shall review the responses and the record and may then request that the Office of Rent Control issue orders adjusting the rents as finally determined by that office or department. The Office of Rent Control will issue such orders within fifteen days after receipt of such request.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 2 RULES AND REGULATIONS PURSUANT TO ARTICLE VIII-A OF THE PRIVATE HOUSING FINANCE LAW OF NEW YORK AND TITLE I OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

§2-01 General Provisions.

(a) **Purpose.** This chapter (and any applicable regulations promulgated by the governmental authority providing funds for the rehabilitation or improvement) shall govern the making of loans for rehabilitation and improvement pursuant to Article VIII-A of the Private Housing Finance Law of the State of New York.

(b) **Definitions.** As used in these rules and regulations, the following terms shall have the meanings set forth below:

Administrative Code. "Administrative Code" shall mean the Administrative Code of the City of New York.

City. "City" shall mean the City of New York.

Commissioner. "Commissioner" shall mean the Commissioner (or Acting Commissioner) of the Department or the chief executive officer (or acting chief executive officer) of any successor to the Department.

Department or Dept. "Department" or "Dept." shall mean the Department of Housing Preservation and Development of the City or any successor thereto.

Dwelling unit. "Dwelling unit" shall mean any residential accommodation in a multiple dwelling.

Housing Maintenance Code. "Housing Maintenance Code" shall mean the Housing Maintenance Code of the City

constituting Chapter 2 of Title 27 of the Administrative Code.

Multiple Dwelling Law. "Multiple Dwelling Law" shall mean the Multiple Dwelling Law of the State of New York.

Multiple dwelling or building. "Multiple dwelling" or "building" shall mean an existing dwelling within the City which is rented or leased to be occupied, or is occupied, as the residence of three or more families living independently of each other, and for which a loan application is made under the program.

Occupancy by persons or families of low income. "Occupancy by persons or families of low income" shall mean occupancy by persons or families paying rentals or carrying charges not in excess of the average rentals or carrying charges prevailing in local projects of municipally-aided limited-profit housing companies aided under Article II of the Private Housing Finance Law of the State of New York, the occupancy of which commenced on or after May 18, 1970. The rental or carrying charge for any such projects assisted under §236 of the United States Housing Act of 1937 shall mean the fair market rental or carrying charge determined from time to time in accordance with the provisions of the agreement with the housing company pursuant to said section.

Notwithstanding the foregoing, "occupancy by persons or families of low income" in single room occupancy housing shall mean occupancy by persons paying rentals not in excess of seventy-five (75) percent of the Moderate Rehabilitation Fair Market Rents for 0-bedroom units. "Moderate Rehabilitation Fair Market Rent" shall mean one hundred twenty (120) percent of the amount, less tenant utility allowance where applicable, which is indicated for 0-bedroom units on the then current Existing Housing Fair Market Rent Schedule for the §8 Existing Housing Assistance Payments Program under the administration of the Department. Where the Department determines on the basis of a market survey or other acceptable and documented evidence that the market rents for dwelling units in the immediate neighborhood where the building is located exceeds the applicable Existing Housing Fair Market Rents, the Department may increase said rents by an amount not to exceed ten (10%) percent.

Owner. "Owner" shall mean an individual, partnership, corporation or other entity, including a non-profit company, a mutual company, or a housing development fund company, which holds record title in fee simple to the premises or is the lessee thereof under a lease having an unexpired term of not less than fifteen years.

Premises. "Premises" shall mean the multiple dwelling or the building and includes the land upon which it is situated.

Program. "Program" shall mean the program for the making of loans pursuant to Article VIII-A of the Private Housing Finance Law of the State of New York and this chapter.

Rehabilitation. "Rehabilitation" or "rehabilitation or improvement" shall mean the curing of any substandard or insanitary condition or conditions, or the replacement, repair or upgrading of heating, plumbing, electrical and related systems.

Rent or rental. "Rent" or "rental" shall also mean carrying charge whenever the multiple dwelling is cooperatively owned. This definition shall not apply to §2-04(a)(2) of this chapter.

Single room occupancy housing. "Single room occupancy housing" shall mean dwelling units which:

(1) may be lawfully occupied as the residence of single individuals capable of living independently of each other and do not contain either food preparation facilities or sanitary facilities or both, or

(2) are otherwise used and maintained for such occupancy in full compliance with the building's certificate of occupancy and the provisions of the New York State Multiple Dwelling Law.

Useful life of the dwelling. "Useful life of the dwelling" shall mean the period of time, as determined by the Dept., that the multiple dwelling is expected to be habitable at a level of comfort, safety and sanitation compatible with current requirements of state and city statutes, ordinances and administrative regulations, where there is regular maintenance and care of the major building systems by competent mechanics.

Useful life of the rehabilitation or improvement. "Useful life of the rehabilitation or improvement" shall mean the period of time as determined by the Department that the improvement is expected to function in good condition, with routine maintenance and repair.

HISTORICAL NOTE

Section in original publication July 1, 1991.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 2-02

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 2 RULES AND REGULATIONS PURSUANT TO ARTICLE VIII-A OF THE PRIVATE HOUSING FINANCE LAW OF NEW YORK AND TITLE I OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

§2-02 Eligibility and General Conditions.

(a) **Eligible buildings.** (1) Loans may be made to an owner of a multiple dwelling located within the City to enable or assist such owner to eliminate a substandard or insanitary condition or conditions in violation of the Multiple Dwelling Law or the Housing Maintenance Code of the City of New York or to provide for the replacement and rehabilitation of the heating, plumbing, electrical and related systems or other improvements as shall be reasonably necessary to prolong the useful life of such dwelling.

(2) No loan shall be made unless the average rent for dwelling units in the building is not in excess of the average rent prevailing in local projects of municipally-aided limited-profit housing companies aided under Article II of the Private Housing Finance Law of the State of New York, the occupancy of which commenced on or after May 18, 1970, except for loans made to rehabilitate single room occupancy housing, in which cases the average rent for such units in the building shall not exceed seventy-five (75%) percent of the Moderate Rehabilitation Fair Market Rent as defined in §2-01(b) "Occupancy by persons or families of low income" of these Regulations, for 0-bedroom units.

(b) **Allowable costs.** At the discretion of the Dept., loan proceeds may be advanced to finance the following items of cost incurred in connection with the rehabilitation or improvement:

(1) Construction costs and filing fees required by the Department of Buildings and other governmental agencies having jurisdiction.

(2) Interim interest on the loan proceeds.

(3) Recording and filing fees and mortgage taxes.

(4) Payment and Performance Bond(s).

(5) Fees or charges attributable to the examination and insurance of title.

(6) Real estate taxes, assessments, water and meter charges and sewer rents.

(7) Fire insurance premiums.

(c) **Maximum amount.** The loan amount shall not exceed an average of ten thousand ($10,000) dollars per dwelling unit or the actual cost of the rehabilitation or improvement, whichever is less.

(d) **Term.** The term of a loan shall not exceed twenty years, except that the term of a loan whose amount exceeds an average of five thousand ($5,000) dollars per dwelling unit shall not exceed thirty (30) years. In no event shall the term of any loan exceed the useful life of the rehabilitation or improvement.

(e) **Interest rate.** The interest rate shall be three (3%) percent per annum, except where otherwise determined by the Department.

(f) **Protection of mortgage lien.** Subsequent to the loan closing, the Department at its discretion may pay any liens and charges the priority of which are superior to its mortgage and may pay such other expenses as may be appropriate to protect its loan or to protect the lien of the mortgage relating thereto, provided that such expenditures shall not exceed one-half of the total amount of the loan.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 2 RULES AND REGULATIONS PURSUANT TO ARTICLE VIII-A OF THE PRIVATE HOUSING FINANCE LAW OF NEW YORK AND TITLE I OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

§2-03 Application Procedure.

(a) **Application forms.** Application forms may be obtained from the Department, 100 Gold Street, New York, N.Y. 10038, Attention: Article VIII-A Loan Program. All applications shall be submitted to the Department for review and approval.

(b) **Eligible applicants.** Loan applications may be submitted by an owner or his duly authorized agent or by a contract vendee who becomes an owner prior to or simultaneously with the loan closing.

(c) **Application submission.** The application, in form specified by the Department, shall include the following:

(1) A description of the rehabilitation or improvement and the estimated cost thereof.

(2) The name, address and telephone number of the applicant, the owner, the managing agent and the holders of existing mortgages and other liens against the multiple dwelling.

(3) A statement of income and expenses for a period of time to be determined by the Department.

(4) A statement of the current monthly rent or carrying charges of each residential and commercial unit, the name of each residential tenant, the number of rooms in each residential unit, and the rent controlled or rent stabilized status of each residential unit.

(5) A statement of the current non-publicly assisted, rent stabilized market rents of residential units in the building and, if known, a similar statement for comparable apartments in adjacent buildings or buildings in the immediate vicinity.

(6) Such additional information as the Department may require.

(d) **Consultation.** The staff of the Department will be available for preapplication consultation.

(e) **Certification of inability to obtain financing.** With the application, the owner shall submit an affidavit certifying that within the prior six months attempts to obtain financing for the rehabilitation or improvement at prevailing interest rates with the premises as security, from at least two (2) lending institutions which normally provide this type of financing were not successful, and, if known, the reasons for such failure or other factors indicating an inability of the private sector to provide unaided financing. If the multiple dwelling is encumbered by a mortgage held by a lending institution whose deposits are insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation, or their successors, such mortgagee shall be one of the lending institutions to which the applicant made an attempt to obtain such financing.

(f) **Application fee.** The owner shall pay an application fee in the amount of seventy-five ($75) dollars for each building for which application is made. Payment shall be made no later than the date of the Department's loan closing. The fee shall not be refundable and shall be used to help defray the expenses of the City in administering the Program. In the case of applications covering two or more adjacent buildings the application fee shall be seventy-five ($75) dollars for the first building and fifty ($50) for each additional building.

(g) **Loan commitment.** No commitment for a loan shall be deemed to have been made unless and until a written letter of commitment shall have been issued by the Department. Any commitment issued shall be conditioned upon full and timely compliance with the requirements of these Rules and Regulations, the availability of funds to make the loan and such other terms and conditions as the Department may require. The acceptance or processing of a loan application by the Department may not be construed to be a commitment for a loan. A commitment may only be issued in writing and no owner, applicant or other party may rely upon any statement or representation made by any official, employee or agent of the Department regarding the loan application.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 2-04

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 2 RULES AND REGULATIONS PURSUANT TO ARTICLE VIII-A OF THE PRIVATE HOUSING FINANCE LAW OF NEW YORK AND TITLE I OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

§2-04 Determination of Feasibility and Conditions Precedent to Making a Loan.

(a) **Low income tenancy and rent increases.** (1) **Covenant on low income tenancy.** No loan shall be made unless the owner covenants in writing that so long as any part of the loan shall remain unpaid:

(i) Upon vacancy, each dwelling unit in the multiple dwelling shall be available solely for occupancy by persons or families of low income; and

(ii) No person living in the multiple dwelling at the time the loan is made shall be required to move because of the rehabilitation or improvement financed by the loan, other than temporarily during the course of construction.

(2) **Rent increases.** (i) The Department, in its sole discretion, shall have the option to adjust the rent for each rental unit within the multiple dwelling pursuant to authority granted by subdivision 7 of §452 of the Private Housing Finance Law of the State of New York. The total rental adjustment shall be in an amount not in excess of the debt service (both principal and interest) calculated on that portion of the loan which the Department attributes to the financing of the rehabilitation of the rental units as if such loan were to be repaid over a self-amortizing term to be determined by HPD which shall be not less than ten (10) years for loans averaging five thousand ($5,000) dollars or less per dwelling unit, and not less than fifteen (15) years for loans exceeding five thousand ($5,000) dollars per dwelling unit. The initial rental adjustment for each rental dwelling unit will be calculated by dividing the total rental adjustment by the total number of rental rooms. Such adjustment shall be applied equally on a per room per month basis, except that a greater adjustment may be allowed for vacant units. For loans which closed prior to the effective date of these regulations,

unequal adjustments may be allowed if HPD sends notification of such rent adjustment to the tenants prior to the closing of the loan.

For rents to be adjusted under the provisions of this subparagraph, the owner(s) of the premises must agree to waive any and all increases which are attributable to the completed rehabilitation work financed by the 8A loan or required pursuant to the Housing Repair and Maintenance Agreement to which he might be entitled under the Administrative Code Chapters 4 and/or 5 of Title 26.

Rental adjustments under this subparagraph shall have no effect upon the status of

(A) rent stabilized units which will remain stabilized with the rental adjustment added to the then current rent and subject to continuing lease increases granted by the appropriate governmental authority, or

(B) rent controlled units which will remain controlled with the rental adjustment added to the then current maximum base rent and maximum collectible rent and subject to continuing increases in the maximum base rent and maximum collectible rent granted by the appropriate governmental authority.

Nothing contained in this subparagraph (2)(i) shall affect the time period for the repayment of the loan as determined by the Department under §2-02(d).

(ii) As an alternative to the rental adjustment provided under the preceding sub- paragraph (2)(i) the Department may in appropriate circumstances restructure the rents under §33.9 of the New York City Rent and Eviction Regulations provided the rents as restructured do not exceed the average rent prevailing in local projects of municipally-aided limited- profit housing companies aided under Article II of the Private Housing Finance Law of the State of New York, the occupancy of which commenced on or after May 18, 1970, or in the case of a single room occupancy housing, seventy-five (75%) percent of the Moderate Rehabilitation Fair Market Rent, as defined in these regulations, for 0-bedroom units.

(3) **Status of apartments.** Loans may be made irrespective of the current status of control, stabilization or decontrol of dwelling units and shall not have any effect upon such present or future status of the units.

(4) **Tenant notification.** Prior to final approval of the loan, the owner shall be required to give tenants residing in the multiple dwelling written notification of the proposed rehabilitation or improvement and the possibility of rent increases, in form specified or approved by the Department. The owner shall submit an affidavit to the Department certifying that such written notification has been given to the tenants. The Department shall notify the tenants in writing no later than twenty-eight (28) calendar days prior to the loan closing of the nature of the proposed rehabilitation or improvement and any projected rent increases. The tenants may forward their comments or objections regarding the proposed loan to the Department for consideration of all relevant issues. The Department, in its discretion, may hold or require the owner to hold at least one public meeting with the tenants or their representatives to discuss the proposed rehabilitation or improvement and any projected rent increases. The Department may, as an alternative to its twenty-eight day notification, hold a tenant meeting if at least three (3) business days before the meeting a copy of the Department's notification letter is sent by ordinary mail to all tenants. If rents are to be adjusted pursuant to §2-4(a)(2)(i), the Department shall send by ordinary mail a written notice of the approximate expected rent increase after the completion of the rehabilitation or improvement and prior to the establishment of the rental adjustments. After this notification, tenants may again forward their comments or objections to the Department for consideration. The Department shall consider any comments or objections that it considers to be relevant to the rent increases and which are received within ten (10) days after the date of mailing (by deposit in a general or branch post office or other official depository of the United States Postal Service) of the Department's notification.

(b) **Real estate taxes, assessments, water and meter charges and sewer rents.** The owner shall make full and timely payment of current real estate taxes, assessments, water and meter charges and sewer rents during the term of the loan. At the time of the loan closing real estate taxes, assessments, water and meter charges or sewer rents may, with the

consent of the Department, be in arrears, provided all such arrears, including any interest and penalties thereon, shall be discharged by the owner subsequent to the loan closing pursuant to arrangements satisfactory to the Department. The Department may require under terms and provisions as it shall prescribe, that the owner place money in escrow on a monthly basis to cover any outstanding real estate taxes, assessments, water and meter charges and sewer rents, accrued interest and penalties, or payments of principal and interest on the loan and one-twelfth of the prospective annual real estate taxes, assessments, water and meter charges, sewer rents and premiums for insurance. Unless otherwise required by the Department as a condition precedent to the loan and subject to all provisions of this chapter, the owner may apply for any rent adjustment or other benefits, including tax exemption and/or tax abatement, to which he, as a result of the rehabilitation or improvement, may become entitled under the provisions of the Administrative Code and all regulations promulgated thereunder.

(c) **Relationship of loan to other mortgages.** (1) **Existing mortgages.** Loans may be made with respect to a multiple dwelling encumbered by mortgages provided no mortgage is in default, except by reason of the deteriorated physical condition of the building, if such condition and default shall be remedied by the proposed rehabilitation or improvement.

(2) **Modification agreement.** A mortgage modification or extension agreement may be required from the holder of a prior mortgage against the building where such mortgage secures a loan which is not self-liquidating and matures prior to the final payment date of the proposed loan.

(3) **Subordination of existing liens.** (i) An existing mortgage or other lien held by the owner or a relative of the owner, or an officer, director, stockholder or partner of the owner, or a relative of such persons, or a party which is associated or affiliated with or a subsidiary of the owner shall be subordinated to the lien of the mortgage given to secure the City loan.

(ii) A secured loan made by a private non-institutional lender, if made in conjunction with a loan made by the City for the partial financing of the rehabilitation, shall be subordinated to the lien of the mortgage given to secure the City loan.

(d) **Removal of violations and management.** (1) **Removal of violations.** All multiple dwellings assisted under this Program shall be brought into substantial compliance with the Multiple Dwelling Law and the Housing Maintenance Code within a period of time to be determined by the Department but in no event later than one (1) year from the date set forth in the loan documents for the commencement of the payment of principal and interest on the loan.

(2) **Additional work.** The Department may require that the owner correct conditions and perform work in the premises in addition to that set forth in the Building Improvement Loan Agreement.

(3) **Management.** No loan shall be made unless the Department shall have determined that the owner has evidenced an ability to manage the building in accordance with good real estate industry practice. In appropriate cases, the Department may require a written management plan, acceptable to the Department, to ensure proper procedures for management of the property, including rent collection, supervision of building employees, payment of bills for maintenance and operation and handling tenant complaints.

(e) **Agency determination of feasibility.** (1) **Code compliance.** No loan shall be made unless the rehabilitation or improvement will result in the elimination of a substandard or unsanitary condition(s) existing in the multiple dwelling in violation of the Multiple Dwelling Law or the Housing Maintenance Code, or will provide for the replacement and rehabilitation of the heating, plumbing, electrical and related systems or other improvements if reasonably necessary to prolong the useful life of the dwelling. In either case, the estimated useful life of the multiple dwelling after rehabilitation shall not be less than the term of the loan.

(2) **Economic viability.** No loan shall be approved unless after the rehabilitation or improvement and any

restructuring of rents as set forth in §2-4(a) hereof, or any rent adjustment or other benefits to which the owner may otherwise become entitled under the provisions of the Administrative Code, or otherwise, as a result of the rehabilitation or improvement, the building's projected revenues are sufficient to meet all maintenance and operating expenses, real estate taxes, water rates, sewer rents, vacancy and collection losses, debt service and return on equity.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 2 RULES AND REGULATIONS PURSUANT TO ARTICLE VIII-A OF THE PRIVATE HOUSING FINANCE LAW OF NEW YORK AND TITLE I OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

§2-05 Contract Terms and Insurance Requirements.

(a) **Loan documents.** Each loan shall be evidenced by a promissory note executed by the owner of the multiple dwelling in form specified by the Department. The Department in its discretion may require that one or more of the shareholders, officers or directors of a corporate owner co-sign the note or otherwise guarantee or pledge security or provide an acceptable surety for the repayment of the loan. The following additional documents may be required:

(1) **Building Loan Contract.** A Building Loan Contract between the owner and the City in form specified by the Department.

(2) **Mortgage or financing statement.** A mortgage executed by the owner in form specified by the Department, shall be required as security for all loans, except that, if the loan is for thirty-five thousand ($35,000) dollars or less, or for a term of seven (7) years or less, the Department may, in its discretion, accept a financing statement as security.

(3) **Disclosure statement.** A sworn disclosure statement, in form specified by the Department, executed by the owner or his duly authorized agent disclosing the identity of all parties involved or to be involved in the ownership, financing and rehabilitation or improvement of the building.

(4) Such other documents executed by the owner as the City or the Department and its attorneys deem necessary or desirable.

(b) **Repayment of the loan by the borrower.** (1) **Method of repayment.** Debt service consisting of payments of interest on the unpaid principal balance and repayment of the principal amount shall be paid in equal monthly installments so as to be fully amortized by the maturity date of the loan. At its discretion, the Department may require an alternative schedule of loan payments provided the loan is fully paid by its maturity date.

(2) **Prepayment privileges.** The loan may be prepaid only in accordance with the terms specified in the loan documents.

(3) **Refinancing.** Any debt in existence prior to the time of the closing of the City loan and secured by a lien against the premises may, without the consent of the Department be refinanced after such closing provided:

(i) the principal amount of the refinanced debt shall not exceed the unpaid principal balance of the debt at the time of the refinancing, except that if such lien is subordinate to that of the mortgage given to secure the City loan, the principal amount shall not exceed the unpaid balance of the debt at the time of the closing of the City loan;

(ii) the rate of interest on the refinanced debt shall not exceed the rate prevailing in the private market at the time of the refinancing;

(iii) after refinancing debt service on the refinanced debt shall be paid in equal and constant periodic installments; and

(iv) at the time of the refinancing the mortgage given to secure the City loan shall not be in default with respect to any payment of principal or interest or any other payment required under the terms of said mortgage or the note secured thereby.

(4) **Further encumbrances.** Except as otherwise provided in §2-5(b)(3), an owner shall not at any time further encumber, mortgage or permit any encumbrance or lien of any kind or nature upon the premises without the prior written consent of the Department nor, shall the premises or any part thereof be conveyed without the prior written consent of the Department. On failure to comply with this paragraph (4), the Department, at its option, may declare the entire loan immediately due and payable.

(c) **Insurance requirements.** (1) **Fire insurance.** Ten days before loan closing the owner shall deliver to the Department prepaid insurance policies issued by companies in form and amounts satisfactory to the Department, insuring the premises against loss or damage by fire, with the usual extended coverage endorsement, and such other hazards as may reasonably be required by the Department. Such policies shall name the City as a mortgagee and provide that losses thereunder shall be payable to the City as its interest may appear.

(2) **Workmen's compensation.** Each contractor and sub-contractor, pursuant to the Workmen's Compensation Law, shall provide adequate Workmen's Compensation Insurance for all employees engaged in work on a building who may come within the protection of said law.

(3) The Department may require the owner or contractor to provide Public Liability, Property Damage and Employer's General Liability insurance.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 2-06

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 2 RULES AND REGULATIONS PURSUANT TO ARTICLE VIII-A OF THE PRIVATE HOUSING FINANCE LAW OF NEW YORK AND TITLE I OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

§2-06 Construction Requirements and Payment of Loan Proceeds.

(a) **Cost estimates, construction contract and contractors.** (1) **Scope of work and cost estimates.** Applicants shall be required to submit estimates showing the nature and cost of each item of the rehabilitation or improvement. The Department may require the applicant to submit more than one estimate per trade and may prescribe forms on which such estimates shall be prepared or summarized. The plans, specifications, work write-ups or any other description of work to be performed must be approved by the Department prior to the commencement of any rehabilitation work or the making of a loan for same. The technical specifications shall conform to the standards established by the Department and where applicable, shall be subject to the approval of the Department of Buildings or other governmental agencies having jurisdiction.

(2) **Approval of construction contract.** The specifications approved by the Department shall be made part of the written construction contract between the owner and the general contractor, and such construction contract shall be subject to the written approval of the Department. If a general contractor is not engaged, the owner shall enter into a written construction contract with each subcontractor. The pertinent specifications approved by the Department shall be made a part of each such contract and each such contract shall be subject to the written approval of the Department.

(3) **Contractors.** The Department reserves the right to disapprove any contractor or subcontractor because of previous violation of statutes, rules or regulations relating to discrimination, standards of employment or labor standards, or because of inefficiency, abandonment of duties, or disregard for creditors on prior jobs performed under this Program or other programs of the City.

(b) **Payment of loan proceeds.** (1) **Periodic inspections.** While rehabilitation is in progress the Department's personnel may conduct periodic inspections of the work and ma- terials.

(2) **Progress payments.** Progress payments for work completed shall be made on the basis of sworn statements as hereinafter provided, subject to review, inspection and approval by the Department. At the time of each progress payment, the borrower and the general contractor, if a general contractor has been engaged, or other contractor, shall execute and submit to the Department a sworn statement, in form specified by the Department, certifying that there has been compliance with all labor standards pursuant to §2-6(d) hereof, that payment has been made or will be made from the proceeds of such progress payments for all labor and services rendered and materials furnished in connection with the work to the date of payment and that any liens placed against the premises subsequent to the closing of the loan have been paid, bonded or otherwise discharged. In the sole discretion of the Department, progress payments shall be made payable directly to the owner, directly to the contractor, or jointly to the owner and contractor.

(3) **Retention.** The Department shall withhold an amount equal to ten percent (10%) of the total amount of each approved progress payment to create a retention fund to assure satisfactory progress and completion of the work. Up to fifty percent (50%) of such retention may be released upon the completion of at least fifty per cent (50%) of the work upon written request by the borrower and approval by the Department. The remainder of the retention funds shall be released upon:

(i) completion of the work to the full satisfaction of the Department;

(ii) issuance of approvals by governmental agencies having jurisdiction, including, where applicable, a certificate of occupancy or of completion by the Department of Buildings; and

(iii) proof of payment for all labor and materials provided in connection with the rehabilitation or improvement. In lieu of subparagraph (ii) above, the Department in its discretion may accept from an architect registered with the State of New York or a professional engineer licensed by the State of New York, a certification that the completed work complies with the requirements of the particular governmental agencies having jurisdiction thereof and that applications seeking the approval of certification of such agencies have been properly filed with or submitted to such agencies.

(4) **Escrow provisions.** The Department may require the deposit of loan advances in a separate escrow account, in a bank designated by the Department, subject to withdrawal only upon the joint signatures of the borrower and a representative of the Department. The Department may further require that the owner deposit in such escrow account, or in a separate trust account in such bank under such provisions as the Department shall prescribe, all or a designated portion of the rents collected from the multiple dwelling during the period of construction.

(5) **Failure to complete work.** If the borrower for any reason fails to diligently pursue or timely complete the rehabilitation to the full satisfaction of the Department, the Department may, after written notice to the borrower, enter upon the premises, effect the completion of the rehabilitation and charge the cost thereof to the borrower.

(6) **Adjustments for interim interest.** Any portion of the loan representing interest on advances during construction shall be adjusted upon completion of the rehabilitation as follows. If such portion shall be more than the amount required for interest on advances, the excess shall be credited to the borrower in reduction of the principal of the loan; if less than the amount required for such interest, the difference shall be deducted from the final advance of loan proceeds due borrower and paid to the City.

(c) **Non-discrimination and affirmative action.** (1) **Compliance.** The owner and any contractor or subcontractor engaged in connection with the rehabilitation or improvement must agree as a condition of such engagement to comply with all applicable federal, state and local statutes, rules and regulations relating to discrimination and standards of employment. The owner shall not exclude any person, including prospective tenants, from participation in, deny any person the benefits of, or subject any person to discrimination under this Program on the grounds of race, color, national origin, creed, age, sex, or sexual orientation.

If an owner, contractor or subcontractor fails to comply with the provisions of this paragraph (1), the Department, in its discretion, may, in addition to or as an alternative to any other remedies reserved to the City or the Department in the loan documents, withhold progress payments to the owner or disapprove the contractor or subcontractor for future work under this Program or other programs of the Department.

(2) **Books, records and inspections.** In order to assure strict compliance with this subdivision (c), all contractors and subcontractors will be required to sign an agreement, in form specified by the Department, to make their books and records available for inspection by representatives or agents of the Department. In order to determine such compliance the Department reserves the right to interview or confer with any employee at any time, on a rehabilitation site or in the office of the contractor or subcontractor.

(d) **Labor standards.** (1) **Compliance with labor standards.** The owner and any contractor or subcontractor engaged in connection with the rehabilitation or improvement must agree as a condition of such engagement to comply with all applicable federal, state and local statutes, rules and regulations relating to labor standards, including the payment of prevailing wage rates.

(2) **Enforcement.** Each contractor and subcontractor shall be required to submit to the Department for review, copies of their weekly payrolls and such other documentation and reports as may be required by the Department. If the contractor engages a subcontractor, the contractor shall be obligated to obtain such required documentation and reports from the subcontractor. All books and records of the owner, contractors, subcontractors, laborers and materialmen involved in the rehabilitation shall be made available to representatives or agents of the Department and other governmental agencies having jurisdiction, for review or audit. The above parties may be required to submit to oral examination under oath. Such examination may include, but is not limited to, the performance and quality of the work, any and all matters pertaining to the loan and compliance with applicable statutes, rules and regulations.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 2 RULES AND REGULATIONS PURSUANT TO ARTICLE VIII-A OF THE PRIVATE HOUSING FINANCE LAW OF NEW YORK AND TITLE I OF THE HOUSING AND COMMUNITY DEVELOPMENT ACT OF 1974

§2-07 Supervision by the Department.

(a) **Power to inspect and investigate.** (1) **Covenant on inspection and investigation.** No loan shall be made unless the owner covenants in writing that so long as any part of the loan shall remain unpaid:

(i) All persons operating or managing the multiple dwelling will permit the duly authorized officers, employees, agents or inspectors of the Department to enter in or upon and inspect such multiple dwelling at all reasonable hours; and

(ii) The Department by its duly authorized representatives shall have full power to investigate into and order the owner of the multiple dwelling to furnish such reports and information as the Department may require concerning the rehabilitation or improvement and the management of the multiple dwelling, and shall have full power to audit the books of the owner with respect to such matters.

(2) **Nature of inspection.** In addition to any other inspections authorized by law, the Department may make periodic inspections of the building so long as any monies remain unpaid on the loan. Such inspections shall be for the purpose of inspecting the condition and maintenance of the building, including its utilities, fixtures and equipment. Copies of any inspection reports shall be made available to the owner with recommendations for corrective measures where necessary. Representatives of the Department may periodically visit the building for the purpose of conferring with tenants and, where necessary, serving as a liaison or intermediary on landlord-tenant problems.

(b) **Annual statement of income and expenses.** (1) No loan shall be made unless the owner covenants in writing that so long as any part of the loan shall remain unpaid the owner shall submit to the Department annually, in such form as shall be approved by the Department, a statement of the income and expenses of such multiple dwelling. The statement of income shall include, but is not limited to, the monthly rent of each residential apartment and the rent controlled or rent stabilized status of each unit.

(2) The annual statement shall cover the twelve month period ending June 30th or such other period approved by the Department, and shall be submitted within ninety days after the close of such period. The Department, in its discretion, may require submission of statements of income and expenses on a more frequent basis.

(3) On five days' notice, the books and records of the owner relative to the premises shall be made available to representatives or agents of the Department for review, examination or audit.

(c) **Failure to comply with regulations.** Upon failure or refusal of an applicant, owner or mortgagor to comply with this chapter (and all applicable rules and regulations promulgated by the governmental authority providing funds for the rehabilitation or improvement), such applicant, owner or mortgagor in addition to the imposition of any civil or criminal penalties provided by law, may be disqualified by the Department from applying for or receiving a loan under this Program or other programs of the Department for up to three (3) years following the date of any such refusal or failure. These rules and regulations shall be enforceable by the governmental authority providing funds for the rehabilitation or improvement as well as by the City.

(d) **Waiver.** The Department may waive any of this chapter where the nature of the rehabilitation or improvement or other circumstances warrant such exception. Any waiver to be effective shall require the written approval of the Commissioner or his designee and shall include a specific statement of the reason(s) for such waiver.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-01 Sponsors and Publicity.

(a) **Sponsorship of development.** Applicants for sponsorship of a limited-profit housing company development shall furnish to the Department of Housing Preservation and Development, hereinafter referred to as "HPD",

(1) an application for approval of the site and sponsors,

(2) evidence of financial ability and other qualifications, and

(3) such other data or information as HPD shall require. Applications, financial data and information with respect to qualifications shall be in such form and substance as HPD shall, from time to time, require. All references herein to "housing company" shall be deemed to mean limited-profit housing company.

(b) **Eligibility-letter of intent.** In addition to other requirements, a person or organization shall be ineligible for final approval as a sponsor of a housing company development unless such person or organization complies with all of the policies of the HPD Office of Community Partnerships.

(c) **Publicity by sponsor.** No public announcements of any kind with respect to the housing company development shall be made by the sponsor without prior written formal approval of HPD.

Subd. (b) amended City Record Jan. 2, 2003 §2, eff. Feb. 1, 2003. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Jan. 2, 2003:

Sections 32(3) and 32-a of the Private Housing Finance Law authorizes HPD to issue rules governing Article II limited-profit housing company developments (more commonly known as "Mitchell-Lama Developments"). The proposed amendments to chapter two of title 28 of the Rules of the City of New York (a) reflect statutory changes since the last time the rules were revised, (b) reflect changes in HPD's practices since the last revision, and (c) clarify instances where HPD has found issues or problems resulting from the current wording of such rules.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-02

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-02 Rental or Sale of Space and Solicitation of Deposits.

(a) **Priority of applicants for dwelling units-initial rent up period.** All inquiries and applications for the purchase of shares or rental of dwelling units received within 10 days of the public announcement about the development by HPD shall be treated on a par with each other regardless of the actual date of receipt of inquiry, application or deposit. In order to receive consideration, all inquiries shall be in writing and directed to the housing company, which shall note the date of receipt thereon. All correspondence addressed to the housing company or sponsor relating to the proposed development shall be acknowledged within ten (10) days of its receipt.

(b) **Offer to rent or sell during initial rent up period.** No housing company shall advertise or offer to rent any space or sell any cooperative shares without prior written approval of HPD. Advertisements shall include language as follows: "Equal Housing Opportunity" and "supervised by N.Y.C. Department of Housing Preservation and Development." Advertisements shall also include language as follows: "Only one request for an application per person shall be permitted."

(c) **Rental schedule and charges.** No housing company shall rent or lease any dwelling units or other rental space or equipment until the schedule of rentals or of carrying charges and equity payments for the entire housing development company has been approved in writing by HPD. No change in the schedule or in the accommodations in the development shall be made without prior written approval of HPD.

(d) **Prerequisites to rental or sales.** The rental or leasing of space shall not be commenced by a housing company until:

(1) In the case of a cooperative housing company (hereinafter referred to as a "mutual housing company"), the Information Bulletin shall be accepted for filing by the Department of Law of the State of New York pursuant to §352-e of the General Business Law.

(2) The sponsoring agreement, restricted bank account, and required insurance coverage have been provided by the housing company and approved, in writing, by HPD.

(3) The sales or rental agreement, blanket position bond, and resolution of the Board of Directors of the housing company authorizing the agreement have been approved by HPD.

(4) All application forms, subscription agreements, occupancy agreements, receipts, and all other forms proposed to be used by the housing company must be approved in writing by HPD before they are used.

(e) **Solicitation of deposits.** Deposits from applicants for dwelling units shall not be solicited or accepted by the housing company until after the development has been approved by the State Division of Housing and Community Renewal, the housing company has been duly organized, and the development has been approved by the Board of Estimate or its successor.

(f) **Procedure for deposits.** Deposits shall not exceed $100 per dwelling unit, nor shall deposits be solicited or accepted until HPD has approved in writing:

(1) The form of receipt, and

(2) The opening of a trust account in which all deposits are required to be promptly deposited in the name of the housing company (or such other person or organization designated by HPD), and

(3) **The proposed selling agent.** Deposits shall be accepted by the housing company by check or money order only, payable to the housing company. In the case of a mutual housing company, all funds so received shall be deposited in said account and shall bear the title "Capital Trust Account" after the name of the housing company. Funds on deposit in said trust account shall be restricted and subject to withdrawal only upon the filing of a written authorization signed by a designee of HPD.

(4) All other criteria set forth in this section governing rental of dwelling units or sale of shares.

(g) **Form of receipt.** The receipt for the deposit shall clearly state that no monies in addition to the deposit may be collected as a further or final payment until HPD has (1) authorized the receipt by the housing company of further payments, and (2) approved the provisions of the subscription and occupancy agreement in the case of a mutual housing company development or of the lease agreement in the case of a rental development.

(h) **Filing of applications, eligibility, investigation of applicants, waiting lists.**

(1) Every housing company shall have adequate supplies of applications on hand at all times at its business and sales office.

(2) Any bona fide resident of the State of New York who has reached his/her majority under the laws of the State of New York may file an application for the lease of a dwelling unit in a rental housing company or the purchase of shares in a mutual housing company, provided, however, that in developments assisted by a project-based Section 8 contract under the United States Housing Act of 1937, as amended, or assisted by a contract under Section 236 of the National Housing Act, as amended, any legal resident of the United States who has reached his/her majority under the laws of New York may file an application for such lease or such purchase of shares. No condition or limitation shall be imposed upon an applicant in connection with the filing or execution of an application other than:

(i) an application fee;

(ii) non-returnable fees to cover the cost of credit investigation, home visit or administrative costs; and

(iii) conditions set forth in applicable governmental authorizations, Land Disposition Agreements or other documents of such public nature. The application and non-returnable fees shall be in amounts approved by HPD. No applicant can be refused a place on an external waiting list for reason of financial ineligibility. Financial eligibility shall be determined at the time an apartment is offered. However, applicants shall be advised of the financial eligibility requirements at the time of applying.

(3) Applications shall be consecutively numbered and dated upon receipt by the housing company or shall be numbered pursuant to order of selection by lottery, as applicable. The housing company or its managing agent shall provide an applicant with a dated receipt or other form of documentation setting forth the date and/or waiting list number of the application. Applicants must meet the occupancy standards at the time of application. No applicant may be placed on more than one waiting list by bedroom size in a particular housing company development.

(4) Each application, together with income and occupancy information and other data as hereinafter specified, shall be investigated by the housing company at the time an apartment is offered to determine the eligibility of the applicant. The data received by any housing company relative to tenant income shall be regarded as confidential in nature and protected accordingly to the extent permitted by law. In the case of a mutual housing company development, applicants approved by the mutual housing company shall upon notification of such approval be required to pay the balance of the purchase price of the shares allocated to the apartment. Thereafter, such application, together with supporting data, including a satisfactory credit history, and, in the case of a mutual housing company development, one copy of the contract for sale of shares approved by the housing company, shall be forwarded to HPD for its approval. Home visits conducted in connection with a credit check are permitted.

(5) Except for developments governed by §3-21 of these rules, no applicant shall be given possession of an apartment until his or her application has been approved by HPD and he or she has executed an occupancy agreement or lease.

(6) Applications which are rejected by a housing company without being submitted to HPD shall have clearly marked thereon the reason for disapproval and shall be kept for a period of time as HPD may direct, and shall be available for examination by HPD. The applicant shall be advised in writing of the reason for his or her rejection.

(7) The housing company may adopt a policy permitting or prohibiting guarantors that must be applied uniformly to all applicants. Where an applicant requires a guarantor to guarantee payment of rent/carrying charges to a housing company that has adopted a policy permitting guarantors, the managing agent shall conduct a credit check and income review of the guarantor to assure that guarantor is financially responsible.

(8) (i) All housing companies, whether mutual or rental, shall maintain waiting lists on forms approved by HPD for all tenant/cooperator applications for apartments, listed in chronological order, by apartment size, by date of receipt or by order of selection by lottery, as applicable. All eligibility requirements for age, residency and family composition must be met by the cut-off date for the lottery. As used in this chapter, the term "tenant/cooperator" shall mean a tenant residing in an apartment in a rental development and/or a shareholder/proprietary lessee residing in an apartment in a mutual housing company development, as the case may be. These master waiting lists shall be kept in the management office. A conformed copy of the master waiting lists by apartment size shall be sent to HPD. Thereafter, on a semi-annual basis, or more frequently if requested by HPD, updated waiting lists shall be submitted to HPD. The waiting lists must reflect the status of each application, i.e. who received an apartment, who declined an apartment, who withdrew, or any other circumstances, including dates the actions were taken.

(ii) The opening and closing of all waiting lists shall be subject to prior written approval of HPD. A housing company wishing to open a waiting list shall present HPD with a written proposal of its contemplated publicity efforts. The proposal shall require plans for the outreach to members of minority groups who would otherwise be unlikely to

learn of these available housing opportunities. The plan shall include advertisement in at least two daily newspapers of general circulation and two publications known to have high readership amongst minorities, and shall contain language as set forth in subdivision (b) of this section. The plan shall be presented to HPD thirty days in advance of the projected date for commencement of advertising. A housing company opening a closed waiting list shall select applicants by a lottery to be approved by HPD. When a list has sufficient names on it to last for three years, the list may be closed by HPD. Waiting lists for various size apartments may be closed at different times as the particular apartment-size list attains sufficient names.

(iii) No application shall be taken or deposit accepted for a position on the waiting list subsequent to the official closing of such waiting list. Any application added to the waiting list after the official closing date shall be rejected by HPD.

(9) Each applicant and members of his or her household shall furnish an affidavit attesting to the gross household income for the preceding year and the anticipated gross household income for the current year. Each applicant and members of his or her household shall also be required to furnish to the housing company or HPD certified copies of tax returns filed by them with the Internal Revenue Service ("IRS") and the New York State Department of Taxation and Finance for the preceding or subsequent years for admission purposes as well as during their occupancy of a dwelling unit of the development. Applicant and members of his or her household shall assume the cost of obtaining certified copies for these purposes. Failure to provide certified tax returns when requested for admission purposes shall result in rejection of the application; failure to provide certified copies during occupancy shall result in imposition of maximum surcharges upon the tenant/cooperator.

(10) The waiting list shall be printed in a legible manner and shall be available for inspection by members of the Board of Directors, members of the Tenants Association, residents of the development, city officials and applicants.

(11) If, at any time, an applicant's name has been omitted from a waiting list in error, and said applicant can present adequate documentation satisfactory to the housing company or its managing agent to substantiate an earlier date of application for an apartment, applicant's name shall be inserted into the waiting list in the corrected date order. Insertions to the waiting list shall be submitted to HPD for prior written approval.

(12) Except for the priorities mentioned below, the waiting list by apartment size in chronological order by date of receipt of application or order of selection by lottery, as applicable, shall be maintained in the following manner:

Type Apartment Desired

(Example: 1 Bedroom)

Date of Request	Name	Address	Business Telephone	Residence Telephone	Veteran's Date of Discharge
1/1/69	J. Doe	XXX Ave. Y	123-4567	765-5432	5/6/68

Selections of tenants or cooperators must be made from this list in chronological order or order of selection by lottery, as applicable.

(13) Notwithstanding anything to the contrary contained in this subdivision, an applicant on a waiting list for the lease of a dwelling unit in a rental housing company development or the purchase of shares in a mutual housing company development who, while he or she is on such waiting list, occupies a dwelling unit in such development in violation of this chapter, shall be removed from such waiting list.

(i) **Occupancy priorities.** The following occupancy priorities shall apply to all housing companies:

(1) **First priority.** Tenant/cooperators currently residing in a development whose household composition renders

them eligible for a larger or smaller apartment shall be given first priority for an internal transfer. First preference shall be given to tenant/cooperators who are moving to a smaller apartment. No priority shall be given to residents seeking additional apartments for members of their household, or for non-resident family members or any other parties. The housing company shall maintain an internal transfer list by apartment size, listed in chronological order by date of receipt of transfer request. If, at any time, a tenant/cooperator's name has been omitted from the internal transfer list in error, and said tenant/cooperator can present adequate documentation satisfactory to the housing company or its managing agent to substantiate an earlier request for a transfer, said tenant/cooperator's name shall be inserted into the internal list in the corrected date order. Insertions to the internal transfer list shall be submitted to HPD for prior written approval.

A tenant/cooperator on an internal transfer list, whose household composition so changes as to render him or her ineligible for the apartment size requested, shall be placed on the appropriate size apartment list as of the date when the change occurred or the date the original request is made, whichever is later; provided, however, that, except for enlargement of a household due to birth or adoption, the change to a larger household composition must have occurred at least one year prior to placement on the internal transfer list. If a tenant/cooperator is offered an apartment as an internal transfer and he or she is no longer eligible for that size apartment due to a change in household composition, his or her name shall then be placed on the appropriate size apartment list as of the date when the change occurred which made him or her ineligible.

The tenant/cooperator must meet the occupancy standards for the size apartment requested at the time that he or she places his or her name on the internal transfer list and must have been in residence for a period of no less than one year before he or she may request a transfer to a larger apartment. The income affidavit submitted by the tenant/cooperator on file with the housing company or its managing agent must reflect a sufficient number of occupants to warrant a transfer at the time of his or her request, as well as when an apartment is offered. The housing company or its managing agent shall deny a transfer to the tenant/cooperator if he or she fails to satisfy these requirements. No transfer request will be accepted based on pregnancy. No transfer of apartments shall be effected if the tenant/cooperator seeking the transfer is in arrears in rent/carrying charges, surcharges, capital assessments, submetering charges or any other fees or charges. The housing company shall advise the tenant/cooperator in writing of its denial of a request for transfer.

A tenant/cooperator who transfers to a smaller apartment, whether at his or her request or at the mandate of the housing company, shall not be considered over income for purposes of eviction if his or her income exceeds the maximum allowable for the new apartment.

The tenant/cooperator shall be required to pay a surcharge effective the first day of the month following his or her residency in the new apartment if his or her income exceeds the maximum allowable for that apartment.

(2) **Second priority.** Pursuant to §31(7) of the Private Housing Finance Law, honorably discharged veterans (or their surviving spouse or domestic partner) who:

(i) have served in the armed forces of the United States for a period of at least six months (or any shorter period which terminated due to death or injury incurred in such service), provided some portion of the period of service was between December 22, 1961 and May 7, 1975, and

(ii) have been thereafter discharged or released therefrom under conditions other than dishonorable, or died in such service, not more than five years prior to the time of application for admission to such project. The preference granted under this law applies to all veterans (or their surviving spouse or domestic partner) regardless of whether they served in Vietnam, the United States or in any other country, provided the veteran meets the conditions outlined above.

(2-a) **Third priority.** Pursuant to §31(7-a) of the Private Housing Finance Law, preference in admission to a project with an open waiting list, as determined by HPD, shall be given to disabled veterans as such term is defined

pursuant to §85 of the Civil Service Law, and for projects with a closed list, as determined by HPD, preference shall be given upon the opening of the waiting list to such disabled veterans.

(3) **Fourth priority.** Persons listed on the external waiting lists by apartment size in strict chronological order by date of receipt of application or order of selection by lottery, as applicable. Family members of a tenant/cooperator, whether or not members of the tenant/cooperator's household, shall not receive preferential treatment on the waiting lists.

(4) The above priorities shall not be applicable to staff or student housing or to housing for the elderly or disabled except as such priorities apply within each special category. Preference in admission to any development or to such portion of any development which has been specifically designed for occupancy by elderly or disabled persons, as the case may be, shall be given to such persons.

(j) **Application fee for rentals and mutual housing companies.** A rental or mutual housing company development may require an application fee of up to $200 at the time of submission of an application for an apartment. Any deviation from this subdivision (j) requires prior written approval from HPD. Said application fee is to be returned in full without interest if the housing company rejects the application. The housing company may retain a reasonable portion of the application fee, not to exceed fifty dollars, for administrative costs if an applicant withdraws his or her application. If an apartment is offered to an applicant and the applicant does not accept the apartment, the housing company may remove the applicant from the waiting list and retain part or all of the application fee for a processing fee. A housing company may elect to offer an applicant an apartment for a second or third time, but such additional offers are not mandatory.

(k) **Security deposit for purchase of cooperative shares.** A mutual housing company may, at its option, require an applicant for a mutual housing company apartment to submit, along with his/her written acceptance of said apartment, a security deposit of up to one month's carrying charges which may be retained by the housing company and apportioned between the housing company and the outgoing cooperator to reimburse them respectively for their losses in the event the applicant withdraws his or her acceptance of the apartment.

(l) **Verification of income at time of admission and during occupancy.** (1) **Admission income verification.** The housing company or its managing agent shall verify the aggregate income of each applicant and members of his or her household prior to admission to the development in the following manner:

(i) Each applicant shall furnish an affidavit attesting to the gross household income of his or her household for the preceding year and the anticipated gross household income for the current year. All members of the household must be listed on the income affidavit whether or not income was earned.

(ii) Each applicant and each member of the household having any income shall furnish proof of income by supplying copies of W-2 forms filed by them for the preceding year, or a statement from their employer setting forth their current rate of income and their total earned income for the immediately preceding year and a copy of their IRS or New York State income tax returns for the immediately preceding year. HPD or the housing company may require submission of certified income tax returns for admission purposes. Each self-employed applicant and self-employed member of the household who will reside with the applicant shall furnish a certified copy of his or her IRS and New York State income tax returns for the immediately preceding year. Applicants and members of the applicant's household shall pay the cost of obtaining certified copies of their income tax returns.

(iii) A copy of amendments to any tax returns, or of tax assessments shall be furnished to the housing company within 30 days after filing the amendment or receipt of notice of the assessment.

(iv) Additional proof of eligibility may be requested by the housing company or HPD.

(2) **Income verification during occupancy.** During occupancy, a tenant/cooperator and members of his or her

household shall submit when requested by the housing company, its managing agent or HPD certified copies of their IRS and/or New York State income tax returns for audit or verification purposes with regard to continued eligibility, surcharges or any other valid purpose. The tenant/cooperator and members of his or her household shall assume the cost of obtaining such certified copies.

(3) Failure to provide certified income tax returns or other documentation. Failure to provide certified copies of income tax returns or other required documentation shall result in denial of admission to new applicants and imposition of the maximum surcharge to those already in occupancy.

(m) **Occupancy standards.** (1) Apartments shall be offered for occupancy as they become vacant in accordance with the standards set forth below (occupancy standards shall be applied without regard to the pending birth or pending adoption of a child):

(i) Efficiency apartments (no bedrooms). One (1) or two (2) persons.

(ii) One (1) bedroom apartments. Two (2) or three (3) persons shall occupy a one-bedroom apartment. A single person may occupy a one-bedroom apartment if the development has less than ten percent (10%) efficiency apartments.

(iii) Two (2) bedroom apartments. No fewer than three persons, a brother and a sister who are both adults, or a parent or guardian with at least one child.

(iv) Three (3) bedroom apartments. No fewer than (A) five (5) persons, (B) parent(s) or guardian(s) with two children of the opposite sex, (C) a household of three adults with one child where at least one adult is the parent or guardian of such child, or (D) a household of one parent or guardian and his or her three children shall occupy a three-bedroom apartment.

(v) Four (4) bedroom apartments. No fewer than (6) persons.

(vi) All apartments. In all cases the tenant/cooperator named on the lease must be at least eighteen years of age and must actually occupy the apartment as his or her primary residence.

(vii) HPD may grant waivers of occupancy standards for medical reasons.

(2) Priority shall be given to internal transfers in the offering of all vacant apartments.

(n) **Lease and occupancy agreements.** (1) No tenant/cooperator shall be permitted to occupy an apartment until an executed lease or occupancy agreement has been approved by HPD. The minimum term of such lease or occupancy agreement shall be one year.

(2) No tenant/cooperator shall have the right to sublet without prior written approval of HPD and the housing company, which only shall be given in exceptional circumstances, including, but not limited to, military service. No tenant/cooperator shall have the right to assign his or her lease/occupancy agreement.

(3) No tenant/cooperator may accept any consideration or thing of value from a guest, invitee or other occupant in exchange for occupancy, whether temporary or permanent, unless such person is listed on the application, income affidavit or recertification of the tenant/cooperator and the tenant/cooperator continues to maintain the apartment as his or her primary residence.

(4) It is required that the apartment of the tenant/cooperator be at initial occupancy and continue to be his or her primary place of residence. The facts and circumstances to be considered in determining whether a tenant/cooperator occupies a dwelling unit as his or her primary residence include, but are not limited to, whether such tenant/cooperator

(i) specifies an address other than such dwelling unit as his or her place of residence or domicile in any tax return,

motor vehicle registration, driver's license or other document filed with a public agency,

(ii) gives an address other than such dwelling unit as his or her voting address,

(iii) sublets or permits unauthorized persons to occupy the dwelling unit without written approval by HPD and the housing company or attempts to assign such dwelling unit, or

(iv) spent less than an aggregate of one hundred eighty-three days in the preceding calendar year in the City at such dwelling unit (unless such individual is in active service in the armed forces of the United States or took occupancy at such dwelling unit during the preceding calendar year). However, no dwelling unit may be considered the primary residence of the tenant/cooperator unless the tenant/cooperator provides proof that he or she either filed a New York City Resident Income Tax return at the claimed primary residence for the most recent preceding taxable year for which such return should have been filed or that the tenant/cooperator was not legally obligated to file such tax return pursuant to §1705(b)(1)(A) and §1751(a) of the Administrative Code due to residency in a foreign country or pursuant to §11-1751(a) of the Administrative Code and §6-01 of the Tax Law because the tenant/cooperator's income for such year was below that required for the filing of a return or pursuant to §893 or 894 of the Internal Revenue Code due to employment by a foreign government or international organization or due to any treaty obligation of the United States which applies to such taxpayer. The tenant/cooperator whose residency is being questioned will be obligated to provide proof that his or her apartment is his or her primary place of residence, including, but not limited to, certified New York State income tax returns, utility bills, and voter registration data.

(5) The terms and conditions of all tenancies, including tenancies of commercial and professional space, shall be subject to HPD written approval.

(o) **Applicability of Section 235-F of the Real Property Law.** (1) **Definition of terms.** Section 235-f of the Real Property Law of the State of New York shall apply to all housing companies, subject to the restrictions set forth in this section. As used in this subdivision (o), the term "occupant" shall mean a person, other than a tenant/cooperator, residing together with the tenant/cooperator in an apartment in a rental or mutual housing company development subject to these rules, who is not a party to the lease or occupancy agreement, including, but not limited to, a member of a tenant/cooperator's immediate family, whose occupancy has been approved by the housing company and HPD.

(2) **Admission and eligibility requirements for occupants.**

(i) No tenant/cooperator shall permit a person to "co-occupy" the tenant/cooperator's apartment without first obtaining the written approval of the housing company and/or HPD, except as specified in subdivision (p) of this section. Such approval shall be sought by the tenant/cooperator and the proposed occupant, submitting to the housing company through its managing agent the same financial information as is required to be submitted by any tenant/cooperator.

(ii) The housing company and/or HPD may reject any proposed occupant:

(A) For the same reasons that the housing company and/or HPD would reject the application of a person who applies to become a tenant/cooperator of a vacant apartment, provided that no rejection shall be based on the financial ability of a proposed occupant to pay the rent/carrying charge for the apartment if the tenant/cooperator has adequate financial ability to pay such rent/carrying charge; or

(B) when the acceptance of a proposed occupant would result in the apartment being occupied contrary to the occupancy standards for apartments set forth in subdivision (m) of this section; or

(C) when the acceptance of a proposed occupant would result in the apartment being occupied in violation of the income eligibility requirements of the Private Housing Finance Law or these rules, or

(D) when the acceptance of a proposed occupant would violate the income eligibility or other occupancy standards or requirements of any other federal, state or city program applicable to such apartment.

(3) **Status of occupant.**

(i) No occupant, except as otherwise set forth in subdivision (p) of this section, shall have any rights under the lease/occupancy agreement for the apartment or to succeed to the rights of the tenant/cooperator, if the tenancy of the tenant/cooperator terminates. Acceptance by the housing company of full or partial payment of rent/carrying charges from an occupant, by check or otherwise, shall not give the occupant any rights of tenancy under the lease/occupancy agreement or otherwise.

(ii) Each occupant shall be required to furnish to the housing company such financial and other information, on an annual or more frequent basis, that the tenant/cooperator is required to furnish to the housing company, in the form that the tenant/cooperator is required to furnish such information, including by affidavit. Where the rental or carrying charge for an apartment, or a rental surcharge, is based on the income of persons residing in the apartment, the income of the occupant shall be included in such com- putation.

(iii) The tenant/cooperator and the occupant shall occupy the apartment as their primary residence, and the occupant shall represent his or her intention to do so prior to commencing occupancy.

(p) **Occupancy rights of family members.** (1) The rights of family members of a tenant/cooperator who have requested to remain as the lawful tenant/cooperator are governed by policies and procedures set forth in this subdivision, except in those instances where this subdivision is preempted by the rules or regulations of other federal, state or city programs.

(2) As used in this subdivision the following definitions shall apply:

(i) "Tenant/Cooperator" shall mean any person named on a lease as a lessee or who is a party to a rental agreement or proprietary lease and obligated to pay rent or carrying charges for the use or occupancy of an apartment.

(ii) "Family member" shall mean:

(A) A husband, wife, son, daughter, stepson, stepdaughter, including any adopted children father, mother, stepfather, stepmother, brother, sister, nephew, niece, uncle, aunt, grandfather, grandmother, grandson, grandaughter, father-in-law, mother-in-law, son-in-law, or daughter-in-law of the tenant/cooperator.

(B) Any other person residing with the tenant/cooperator in the apartment as a primary residence who can prove emotional and financial commitment and interdependence between such person and the tenant/cooperator. Although no single factor shall be determinative, evidence which is to be considered in determining whether such emotional and financial commitment and interdependence existed shall be the income affidavit filed by the tenant/cooperator for the apartment and other evidence which may include, without limitation, the following factors:

(a) longevity of the relationship;

(b) sharing of or relying upon each other for payment of household or family expenses, and/or other common necessities of life;

(c) intermingling of finances as evidenced by, among other things, joint ownership of bank accounts, person and real property, credit cards, loan obligations, sharing a household budget for purposes of receiving government benefits, etc.;

(d) engaging in family activities by jointly attending family functions, holidays and celebrations, social and recreational activities, etc.;

(e) formalizing of legal obligations, intentions, and responsibilities to each other by such means as executing wills naming each other as executor and/or beneficiary, granting each other a power of attorney and/or conferring upon each other authority to make health care decisions each for the other, entering into a personal relationship contract, registering a domestic partnership pursuant to Executive Order No. 48, dated January 7, 1993 or Local Law No. 27 of 1998, serving as a representative payee for purposes of public benefits, or other such formalizations;

(f) holding themselves out as family members to other family members, friends, members of the community or religious institutions, or society in general, through their words or actions;

(g) regularly performing family functions, such as caring for each other or each other's extended family members, and/or relying upon each other for daily family services;

(h) engaging in other patterns of behavior, or other action which evidences the intention of creating a long-term, emotionally committed relationship.

In no event shall evidence of a sexual relationship between such persons be required or considered.

(iii) "Disabled person" shall mean a person who has an impairment which results from anatomical, physiological or psychological conditions, other than addiction to alcohol, gambling, or any controlled substance, which is demonstrable by medically acceptable clinical and laboratory diagnostic techniques and which is expected to be permanent and to substantially limit one or more of such person's major life activities.

(iv) "Senior citizen" shall mean a person who is sixty-two (62) years of age or older.

(3) Unless otherwise prohibited by occupancy restrictions based upon income limitations pursuant to federal, state or local law, regulations or other requirements of governmental agencies, if the tenant/cooperator has permanently vacated the apartment, any member of such tenant/cooperator's family, who has resided with the tenant/cooperator in the apartment as a primary residence, as determined by §3-02(n)(4) of these rules, for a period of not less than two years immediately prior to the tenant/cooperator's permanent vacating of the apartment, and has appeared on the income affidavits for at least the two consecutive annual reporting periods prior to the tenant/cooperator's permanent vacating of the apartment, or where such person seeking succession rights is a senior citizen or disabled person, for a period of not less than one year immediately prior to the tenant/cooperator's permanent vacating of the apartment, and has appeared on the income affidavit for at least the reporting period immediately prior to the permanent vacating of the apartment by the tenant/cooperator, or from the inception of the tenancy or commencement of the relationship if for less than such periods, may request to be named as a tenant/cooperator on the lease and where applicable on the stock certificate. In the event that HPD has authorized the housing company not to collect surcharges based on income affidavits, the family member shall be asked to provide other evidence of occupancy for the required period of time. The burden of proof is on said family member to show use of the apartment as his or her primary residence during the required period to be eligible to succeed to possession.

(4) Family members do not have the right to succeed the tenant/cooperator in occupancy if the housing company terminates the tenancy of a tenant/cooperator for cause.

(5) The minimum periods of required residency set forth in this section shall not be deemed to be interrupted by any period during which the family member who is seeking succession rights temporarily relocates because he or she:

(i) is engaged in military duty;

(ii) is enrolled as a full-time student;

(iii) is not in residence at the apartment pursuant to a court order not involving any terms or provisions of the lease/occupancy agreement, and not involving any grounds specified in the Real Property Actions and Proceedings

Law;

(iv) is engaged in employment requiring temporary relocation from the apartment;

(v) is hospitalized temporarily for medical treatment; or

(vi) has other reasonable grounds that shall be determined by HPD upon application by such person.

(6) The housing company shall secure credible evidence of the tenant/cooperator's permanent removal from the apartment and the surrender of the apartment or the tenant/cooperator's written declaration to vacate the apartment prior to the consideration of reletting or succession to the apartment by a family member.

(i) Where a tenant/cooperator has died, the lease and shares of stock for such decedent's apartment shall be surrendered by the decedent's estate or survivors for redemption. The housing company, upon written request received from any member of such deceased tenant/cooperator's family who has resided with the deceased tenant/cooperator in the apartment as a primary residence as set forth in paragraph (3) of this subdivision, shall sell or transfer the shares and/or the lease to said family member.

(ii) In the event that that is a legal dispute or claim involving the rightful ownership of the stock assigned to an apartment in a mutual housing company, pending a determination thereof by an appropriate tribunal or court of law, such family members as set forth in paragraph (3) of this subdivision shall continue to be permitted to reside in the apartment.

(iii) If the appropriate tribunal or court of law shall determine that someone other than such family members as set forth in paragraph (3) of this subdivision is entitled to the ownership of the stock then, upon presentation of a court order or other valid evidence, such new owner shall be permitted solely to surrender the stock to the housing company for redemption pursuant to the applicable provisions of the Private Housing Finance Law. In such event, such family members in occupancy as set forth in paragraph (3) of this subdivision shall be afforded a reasonable opportunity to purchase the stock from the housing company for the price authorized pursuant to the Private Housing Finance Law and §3-06 of this chapter.

(7) The housing company and/or HPD shall have the option of requiring any proposed successor to move to a smaller apartment in the development, in the event the apartment in question is or would become underoccupied according to occupancy standards set forth in subdivision (m) of this section.

(8) Where a family member applies to the housing company for permission to remain in occupancy as a tenant/cooperator, the housing company shall act on the application within thirty (30) days of receipt by either requesting that HPD approve the application or by denying the application and notifying the applicant family members in writing of its determination.

(i) In the event the housing company denies such application, the notice to the applicant shall set forth in writing the reasons why the evidence submitted was deemed inadequate and resulted in such denial and inform the applicant of the right to appeal and the method of appeal.

(ii) A family member whose application to succeed to a lease or an occupancy agreement has been denied by a housing company may, within thirty (30) calendar days of receipt of the written denial, appeal to the Commissioner of HPD (hereinafter "Commissioner") or his or her designee. Such appeal shall include proof of service of a copy of such appeal upon the housing company. The appeal shall briefly set forth the reasons why the family member believes he or she is entitled to occupy the apartment and any errors or erroneous findings he or she believes are contained in the housing company's determination. The Commissioner or his or her designee shall review the housing company's determination and any additional information submitted by the applicant and shall issue the final agency decision with regard to the applicant's application. The only review of this determination is pursuant to Article 78 of the Civil Practice

Law and Rules.

(iii) Pending the agency's determination, the applicant may continue in occupancy and shall be required to pay for the use and occupancy of the apartment in an amount equal to the monthly rental/carrying charge paid by the vacating tenant/cooperator.

(iv) In the event the agency determines that the applicant is ineligible to remain in occupancy then such applicant shall vacate the apartment or the housing company may seek to terminate the occupancy without any further approval by HPD.

(9) This subdivision shall not apply to staff housing where employment at the institution is a primary requirement for residency. It shall also not apply to housing designated for senior citizens or the disabled, unless such succeeding family member would have qualified for an apartment as an original tenant.

(q) **Payment of rent and deposit of security.** (1) A rental housing company may require all new tenants to deposit as security an amount equal to a maximum of two months' rent, or such amount as may be approved by HPD at the time of signing the lease except where federal law or regulations prohibit. Commercial or professional tenants may be required to deposit as much rent as security as the housing company requires.

(2) Each rental housing company is required to open an interest bearing bank account in accordance with §7-103 of the General Obligations Law.

(r) **Unauthorized payments.** No company, associate, director, officer, employee, agent or other person shall solicit or receive, directly or indirectly, any commission, bonus, gratuity, fee or any other payment not expressly authorized by HPD from any person interested directly or indirectly, in the filing of an application or in obtaining a lease or occupancy agreement.

Violation, in whole or in part, of Penal Law, §180.55 by any agent, sub-agent, or employee of the agent is a crime and may be grounds for the cancellation of a sales or rental agreement or managing agent's agreement by HPD.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 17, 2003:

Supplemental notice is hereby given pursuant to the authority vested in the Commissioner of the Department of

Housing Preservation and Development by §1802 of the New York City Charter and Sections 32(3) and 32-a of the Private Housing Finance Law, and in accordance with the requirements of §1043 of the New York City Charter that the Department of Housing Preservation and Development adopted amended rules for City-Aided Limited-Profit Housing Companies that were originally published in the City Record on January 2, 2003 and that will take effect on February 1, 2003. This supplemental notice is being given to correct certain typographical errors of a technical nature that appeared in the original City Record publication on January 2, 2003 and only includes those provisions in which such typographical errors appeared. The effective date of the amended rules remains February 1, 2003.

2. Statement of Basis and Purpose in City Record Nov. 12, 2003: Sections 32(3) and 32-a of the Private Housing Finance Law authorize HPD to issue rules governing Article II limited-profit housing company developments (more commonly known as "Mitchell-Lama developments"). The proposed amendment to 28 RCNY §3-02(h) provides that a waiting list applicant who occupies a Mitchell-Lama apartment in that development in violation of the rules while he or she is on such waiting list shall be removed from such waiting list. Mitchell-Lama apartments are highly desirable and in scarce supply. Persons who illegally occupy such units should not be able to "legalize" their occupancy by thereafter assuming their places on the waiting list. This is tantamount to rewarding such persons for violating the program's restrictions. The proposed amendments to 28 RCNY §3-14(d) and §3-17(a) require members or officers of a Tenants Association or Board of Directors to reside in the relevant limited-profit housing company development as his or her primary place of residence. A duly constituted Tenants Association of a rental housing company or Board of Directors of a mutual housing company represents the interests of the tenant body in such developments, and the members and officers thereof need to be in residence in order to truly provide effective representation.

3. Statement of Basis and Purpose in City Record July 14, 2006: The first amendment clarifies the timing of the co-residency requirement for succession to a Mitchell-Lama apartment. The other amendments to the Mitchell-Lama rules primarily address the issue of surcharges. Courts do not allow housing companies to bring summary dispossess proceedings against tenant/cooperators who have failed to pay their surcharges. This is because the housing companies do not list surcharges as a component of rent on their leases and occupancy agreements. To conform our rules to the case law, the amendments require housing companies to obtain a certificate of eviction following an administrative hearing by an HPD designated hearing officer pursuant to 28 RCNY §3-18. The last amendment conforms HPD's Mitchell-Lama rules to the federal government's rules regarding surcharges.

4. Statement of Basis and Purpose in City Record Oct. 31, 2007: The rule amendments implement two State laws enacted this year. Chapter 420 of the Laws of 2007 grants a preference to disabled veterans who have served in the armed forces of the United States for the purposes of occupancy in Mitchell-Lama projects. Chapter 597 of the Laws of 2007 allows a mutual housing company, with HPD's approval, to require a standard form and procedure for shareholders to cast proxies and absentee ballots.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Linville Housing Co., Inc. v. McGann, New York Law Journal June 24, 1996, page 29, col. 6 (App.Term 1st Dept.). The Housing Court lacks subject matter jurisdiction to determine tenant succession rights to Mitchell-Lama apartments. Original jurisdiction over such claims is vested with the New York City Department of Housing Preservation and Development.

¶ 2. A person does not have succession rights under the Mitchell-Lama law unless he or she is a family member and resided with the former tenant for at least two years prior to the tenant's departure. Alfred v. Barrios-Paoli, 251 A.D.2d 659, 676 N.Y.S.2d 185 (App.Div. 2d Dept. 1998).

¶ 3. The New York City Department of Housing Preservation and Development has exclusive jurisdiction to determine succession claims of remaining family members, and its issuance of a certificate of eviction cannot be collaterally attacked in a subsequent summary proceeding. Lindsay Park Housing Corp. v. Grant, 190 Misc.2d 777, 740 N.Y.S.2d 552 (App.Term 2nd Dept. 2001).

¶ 4. A Mitchell-Lama cooperative served a shareholder with a preliminary notice of grounds for eviction seeking to terminate the tenancy on the ground that she violated the terms of her occupancy agreement and New York City regulation in that her application and her tenancy were not approved by the New York City Department of Housing Preservation and Development (HPD), her name was not on the mandated waiting list and she did not meet the eligibility requirements for the apartment (the latter is covered by 28 RCNY 3-03). The notice alleged that the tenant obtained the apartment by fraudulent means, including payments to certain persons at rates in excess of the HPD mandated resale price. The notice also stated that if plaintiff failed to cure the defaults within 10 days from it service upon her, the cooperative would apply to HPD for a certificate of eviction. The tenant's response was to commence an action for a declaratory judgment that her tenancy was valid. She applied to the Supreme Court for a Yellowstone injunction tolling the time to cure and prohibiting the cooperative from taking steps to terminate the lease. The court, however, denied the injunction, holding that HPD had primary jurisdiction to determine whether the tenant's alleged violations of the Mitchell-Lama rules warranted termination of the tenancy. Thus, the tenant had to proceed by means of a hearing before HPD and then, if necessary, bring an Article 78 from HPD's determination. Wong v. Gouverneur Gardens Housing Corp., 308 A.D.2d 301, 764 N.Y.S.2d 53 (1st Dept. 2003).

¶ 5. Under 28 RCNY § 3-02(i), a tenant who resides with his or her family will be eligible for an internal apartment transfer list only if the entire family, and not the individual tenant, is seeking the apartment. A tenant who is mistakenly given an internal transfer in violation of the rules, is subject to eviction. It does not matter whether the tenant intentionally violated any rules. If the tenant was not in fact eligible for the apartment, he or she cannot remain there. Matter of Verdell v. Lincoln Amsterdam House, Inc., 27 A.D.3d 388, 813 N.Y.S.2d 68 (2nd Dept. 2006).

¶ 6. In Matter of Nole v. N.Y.C. Dept. of Housing Preservation and Development, 26 A.D.3d 163, 808 N.Y.S.2d 678 (1st Dept. 2006), leave to appeal dism'd, 6 N.Y.3d 890, 817 N.Y.S.2d 624, 850 N.E.2d 671(2006), a tenant brought an Article 78 proceeding seeking to annul an administrative determination that granted a certificate of eviction on the ground of non-primary residence. In upholding the certificate of eviction, the court held that 28 RCNY 3-02(n)(4)(iv), which provides that a dwelling unit cannot be considered the primary residence of a tenant or cooperator unless a New York City tax return was filed for the most recent tax year or the tenant was not legally obligated to file a return, does not create an unconstitutional irrebuttable presumption.

¶ 7. Where a daughter admitted that she moved into her mother's apartment two months before her mother's death, the daughter did not meet the length-of-residence test for succession rights. Mayfield v. Esplanade Gardens, 30 A.D.3d 296, 817 N.Y.S.2d 275 (1st Dept. 2006), appeal dismissed, 7 N.Y.3d 864, 824 N.Y.S.2d 607, 857 N.E.2d 1138 (2006).

¶ 8. There was substantial evidence to support a finding that a tenant did not reside at the subject apartment as a primary residence, where the tenant owned a home in New Jersey at which his wife and children resided, where he received mail at the New Jersey house, which was listed by the Social Security Administration, where he had a New Jersey driver's license, and where the phone in the subject apartment was listed in the name of someone else. Shi Yi Tang v. New York City Dept. of Housing Preservation and Development, 29 A.D.3d 470, 816 N.Y.S.2d 423 (1st Dept. 2006).

¶ 9. The procedures governing succession rights in State-assisted Mitchell-Lama housing are substantially similar to those set forth in 28 RCNY § 3-02(p), governing City-assisted Mitchell-Lama housing. Rochdale Village, Inc. v. Goode, 16 Misc.3d 49, 842 N.Y.S.2d 142 (App.Term, 2d & 11th Judic. Dists. 2007).

¶ 10. Where an occupant does not meet the requirements for succession rights under the Mitchell-Lama rules, the occupant cannot acquire rights merely because the housing company had acquiesced in petitioner's occupancy for a time after petitioner's parents (the named tenants) had vacated the apartment. Schorr v. NYC Dept. of Housing Preservation and Dev. 2008 NY Slip Op. 2083, 10 NY3d 776, 857 N.Y.S.2d, 2008 NY Lexis 540 (Ct. App. NY).

¶ 11. In one case, plaintiff sought succession rights to Michell-Lama apartment based upon his alleged co-occupancy of the apartment along with his daughter. The fact that petitioner included income affidavits submitted by

his daughter and son-in-law did not establish his entitlement to the subject apartment as a matter of law. HPD was entitled to consider the fact that there was no objective documentary evidence in support of petitioner's claim. Further, there were inconsistencies in plaintiff's application. Petitioner provided an address other than the subject apartment as his place or residence on a tax return filed during the relevant time period. HPD did not act illegally or irrationally in declining petitioner's request that his appeal be reopened to consider additional documents, or in concluding that such documents, if considered, would not have warranted a different determination. Moreover, due process rights had been satisfied and an evidentiary hearing was not needed. (28 RCNY 3-02(p)(8)(ii). In re Hochhauser/Lurie v. NYC Dept. of HPD, 48 AD3d 288, 853 NYS2d 22, 2008 NY App. Div. Lexis 1231 (App. Div. 1st Dept.)

¶ 12. In another case, a tenant (Bonfante) claimed succession rights to his apartment, alleging that he co-resided in the apartment with his grandfather, the sole shareholder of record, for two years prior to the grandfather's death, as required under 28 RCNY 3-02(p)(3). The respondent, Franklin Plaza, is subject to regulations created by Housing Preservation Development (HPD). Franklin Plaza denied petitioner's claim based on the fact that Bonfante moved into the apartment with his girl friend only after his grandfather left for a nursing care facility. Moreover, Bonfante failed to notify Franklin Plaza of his intentions, and his name did not appear on his grandfather's income documents for the three prior calendar years. The petitioner's father, who resides in another apartment, listed petitioner as a member of his household on his income affidavits for the three prior calendar years. The Dept. of Housing Preservation and Development agreed that Bonfante was not entitled to succession rights, and, in an Article 78 proceeding, the court upheld that determination. Petitioner clearly failed to meet the elements needed for succession rights, in that he did not live in the apartment at the same time as his grandfather, and was not listed on the income affidavits for at least the two reporting periods prior to the tenant's permanent vacating of the apartment. The fact that petitioner's name was not on the income affidavits created a presumption that he did not reside in the apartment as a primary residence. Although that presumption is rebuttable, the tenant failed to provide the necessary proof. The court further held that HPD was not compelled to conduct a hearing in a succession rights case where, as here, petitioner was not listed on the certification forms. IMO Application of Franklin R. Bonfante v. Donovan 2008 NY Slip Op. 50416U, 2008 NY Misc. Lexis 899 (Sup. Ct. NY County).

¶ 13. A great-grandparent is not one of the relatives listed in the statute. Thus, a great-granddaughter, who sought succession rights to her great-grandmother's apartment, was required to prove that tenant and petitioner shared a financial and emotional commitment and had financial interdependence. Matter of Williams, 2007 NY Slip Op. 52188U, 17 Misc. 3d 1129A, 851 N.Y.S.2d 75 (Sup.Ct. New York Co.).

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-03

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-03 Tenant Income Limitations, Surcharges and Applicability of Federal §8 Subsidy to Tenant/Cooperators in Residence.

(a) **Income limitations.** (1) The dwellings in a rental development shall be available for persons or families whose probable aggregate annual income at the time of admission and during the period of occupancy does not exceed the greater of (i) the median income for such persons or families for the New York City metropolitan statistical area or (ii) seven times the annual rental, including the value or cost of heat, light, water and cooking fuel, except that in the case of families with three or more dependents, such ratio shall not exceed eight times the annual rental.

(2) "Probable aggregate annual income" shall mean the total income of the chief wage earner as reported in the New York State income tax return, plus the total income, in excess of $15,000 or such amount as determined by State law, of each other member of the household, less such personal exemptions and deductions for medical expenses as are actually taken by each tax paying occupant on the New York State tax return. However, the income of a household member, under 21 years of age, who is a full time student shall not be included in the computation of such annual income.

(3) Subject to the conditions contained in paragraphs (1) and (2) supra, in determining the eligibility of tenant/cooperators in a mutual housing company development, there may be added to the total annual carrying charges an amount equal to six per cent of the original investment of a person or family in the equity obligations of such mutual housing company and where same is not included in the carrying charges payable to the mutual housing company, the value or cost to the tenant/cooperator of:

(i) heat, light, water and cooking fuel

(ii) the cost of repainting, upon the basis of $45 per room per year and

(iii) the cost of replacement of fixtures and appliances upon the basis of $10 per room per year.

(4) Notwithstanding other applicable provisions, families with two or more dependents whose probable aggregate annual income does not exceed one hundred twenty-five percent of the limitations as to income as determined pursuant to paragraphs (1) and (2) of this subdivision (a), shall also be eligible for admission to the dwelling of a project provided that any family becoming eligible for admission by reason hereof shall pay, from the time of admission, a rental surcharge as provided for in subdivision (b) of this section, computed on the basis of the income limitations applicable to such family in the absence of this provision.

(b) **Surcharges.** In the event that the aggregate annual income of all occupants of a dwelling unit shall exceed the maximum above set forth, the tenant or cooperator shall be required to pay a surcharge based upon the following schedule:

Schedule of Surcharges

Income	Percent of Basic Rent Constituting Surcharge
Up to 100 percent of maximum income limit	None
From 100 percent and up to 105 percent of maximum income limit	None
From 105 percent and up to 110 percent of maximum income limit	5
From 110 percent and up to 115 percent of maximum income limit	10
From 115 percent and up to 120 percent of maximum income limit	15
From 120 percent and up to 125 percent of maximum income limit	20
From 125 percent and up to 130 percent of maximum income limit	25
From 130 percent and up to 135 percent of maximum income limit	30
From 135 percent and up to 140 percent of maximum income limit	35
From 140 percent and up to 145 percent of maximum income limit	40
From 145 percent and up to 150 percent of maximum income limit	45
From 150 percent and over	50

(c) **Surcharge procedures.** (1) Surcharges shall be payable monthly on a current basis by tenant/cooperators in occupancy based upon income realized during the prior calendar year and such income shall be reported on income affidavits to be furnished by tenant/cooperators.

(2) On February 15th of each year during occupancy, or at such other date as determined by HPD, the housing company shall distribute to each tenant/cooperator an affidavit to be executed by all occupants residing in the apartment as to the income realized by each of such occupants during the preceding calendar year. The information requested shall be set forth in a form of affidavit prescribed by HPD.

(3) The tenant/cooperator shall return to the housing company or its managing agent the income affidavit supplied by the housing company duly executed and notarized by April 30th of each year.

(4) The surcharges shall be computed by the housing company or its managing agent in sufficient time so that surcharge billings shall commence no later than July 1st of each year. The income affidavits will be subject to verification at any time, pursuant to such method as may be determined by HPD, including, but not limited to, spot check audits of certified income tax forms and verification by the New York State Department of Taxation and Finance as set forth in §60(9) of the Private Housing Finance Law. Tenant/cooperators and other occupants selected for audit shall be required to provide a certified copy of the IRS or New York State income tax return for the audited year(s). The tenant/cooperators shall assume the cost of obtaining said certified copies. If HPD establishes a verification system with the New York State Department of Taxation and Finance, those tenant/cooperators found to have reporting

discrepancies shall be obligated to furnish certified copies of IRS or New York State income tax returns. The housing company may, upon HPD's approval, implement a policy imposing a penalty fee when additional income is found that would have resulted in an additional surcharge.

(5) A housing company or its designee is required to collect all surcharges computed on the basis of income received by all individuals in occupancy.

(d) **General requirements.** (1) In the event that a tenant/cooperator shall fail to return a fully completed affidavit by April 30th of each year, the income of such tenant/cooperator shall be presumed to have exceeded the maximum allowable income by 150 percent or more. Written notice shall thereupon be given, informing such tenant/cooperator that the maximum surcharge will be imposed effective July 1st. In the event completed income affidavits are submitted after April 30th but prior to June 30th, the maximum surcharge will not be imposed. However a non-refundable administrative fee, payable to the housing company, shall be charged. This fee shall not exceed $50.00. The housing company may remit half of any such fee collected to the managing agent to compensate for the additional administrative work.

In the event completed income affidavits are submitted after June 30th, a correction to the maximum surcharge billing shall be made effective the first day of the month following the submission of such income affidavit. However, a non-refundable administrative fee, payable to the housing company, shall be charged. This fee shall not exceed $150.00. The housing company may remit half of any such fee collected to the managing agent to compensate for the additional administrative work. HPD may permit reimbursement of excess surcharge to the tenant/cooperator in extenuating circumstances.

(2) Reserved.

(3) Whenever changes occur in rentals or carrying charges or any component thereof used in the computation of surcharges, surcharges shall be recalculated by the housing company or its managing agent.

(4) A housing company cannot bring an eviction proceeding against any tenant/cooperator who fails or refuses to pay surcharges without the issuance of a certificate of eviction by HPD following an administrative hearing by an HPD designated hearing officer in accordance with §3-18 of this chapter.

(5) Housing companies or their managing agents shall submit a copy of the surcharge information tabulation sheets, and all changes thereto, together with copies of the income affidavits for HPD review and evaluation. Surcharge records shall be kept available by the housing company or its managing agent for inspection by HPD.

(6) Tenant/cooperators and other occupants shall be required by HPD to furnish certified copies of their IRS and New York State income tax returns. The cost for the certified report is to be borne by the tenant/cooperator.

(e) **Removal.** (1) In the event that the income of a household in occupancy shall increase and exceed the maximum prescribed by these rules by more than twenty-five percent based on the latest existing rent/carrying charges, such household shall be subject to removal from the dwelling unit occupied by them. However, such household may be permitted to remain in occupancy until such income exceeds the maximum prescribed by these rules by more than fifty percent, if the housing company with the approval of HPD shall determine that removal would cause hardship to such household.

(2) Households living in a development under a lease for ninety-nine years renewable, or in perpetuity, or by reason of ownership of stock in a housing company may, with the approval of HPD, be permitted to remain in occupancy for not more than three years after such increase in income exceeds the maximum prescribed by these rules by more than fifty percent unless such occupancy is extended by the housing company with the approval of HPD. Any such household required to vacate an apartment because of excessive income as herein provided shall be discharged from liability on any note, bond, or other evidence of indebtedness relating thereto and shall be reimbursed by the

housing company for all sums paid by such household to the housing company on account of the purchase of stock or income debentures as a condition of such occupancy.

(f) **Interim changes in income.** (1) Where a tenant/cooperator anticipates a long-term reduction in income, resulting from death of a wage earner, retirement, or other such circumstances, said tenant/cooperator must submit documentation of such interim change in income to the managing agent. The managing agent shall verify the documentation submitted, and if a change in income is so determined, shall remove the surcharge and inform HPD of such action. HPD reserves the right to disapprove the action of the housing company.

(2) Where a tenant/cooperator anticipates a temporary reduction in income, such as job loss, temporary illness, or other such circumstances, said tenant/cooperator must submit documentation of such temporary reduction in income to the managing agent. The managing agent shall verify the documentation submitted, and if the interim change in income is so determined, shall reduce, eliminate or defer collection of surcharges for a reasonable period of time or shall arrange for an extended payment plan.

(3) The managing agent must maintain supporting documentation for all agreements which shall be available for review by HPD. Any tenant/cooperator shall have the right to appeal any determination under this subdivision (f) to HPD.

(g) **Applicability of federal §8 subsidy to tenant/cooperators in residence.** Pursuant to §31, subdivision 10 of the Private Housing Finance Law, a housing company shall accept federal reimbursement under §8 of the Housing and Community Development Act of 1974, as amended, in lieu of such amount of rent/carrying charge payment for a person qualifying under such act. A housing company shall not reject an applicant for an apartment solely on the basis that all or part of the rent/carrying charges shall be paid under §8 of the Housing and Community Development Act of 1974, as amended.

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-04 Housing Company Funds and Bonds.

(a) **Bank accounts.** All funds of the housing company shall be deposited in banks or savings and loan associations maintaining an office in the State of New York in accounts which are insured by the Federal Deposit Insurance Corporation or Federal Savings and Loan Insurance Corporation. All bank accounts shall be maintained in the name of the housing company and in a manner and form prescribed by HPD.

(b) **Trust funds.** All funds received by housing companies shall be held by such companies as trust funds to be applied and used for the purpose of carrying out their obligations under the law.

(c) **Fidelity bonds general.** Each housing company shall obtain and keep in full force and effect a fidelity bond or bonds covering its signatory officers and such other persons as are authorized to receive or disburse monies on behalf of the company. These bonds shall be in such amounts as HPD may require, shall be drawn in form and substance satisfactory to it and shall have as surety thereunder such company or companies authorized to do business within the State of New York as are approved by HPD.

(d) **Fidelity bonds for rental, sales and managing agent.** All rentals, sales and managing agents shall be required to deliver to the housing company and to HPD before their employment shall become effective, a fidelity bond covering all officers and employees handling funds of the housing company. The amount, form and substance of such bond shall be subject to approval by both the housing company and HPD.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-05 Rent Collection.

(a) **Rent collection.** (1) Rent/carrying charges of tenant/cooperators is payable on the first day of each month.

(2) It is the responsibility of the managing agent to collect rent/carrying charges and take the necessary actions to collect past due rent/carrying charges.

(3) A charge for late payment of rent/carrying charges may be implemented by each housing company. In order to implement a late charge, a written request must be submitted to HPD setting forth the dollar amount of the proposed charge and the date of the month it is to be billed. In the case of a mutual housing company, a Board of Directors Resolution certified and acknowledged by the Secretary of the Corporation setting forth the adoption of the late charge by the Corporation shall be submitted to HPD. HPD shall respond in writing. Late charges shall be considered additional rent.

(4) Where a tenant has vacated, whether voluntarily or involuntarily, it is still the responsibility of the managing agent and counsel to locate such tenant and to collect all sums due the housing company. In achieving this end, consideration should be given to utilizing the services of a credit bureau to locate a vacated tenant, ascertain his or her current employment and discover available assets, if any. Judgments should be secured, and garnishments placed, if feasible.

(b) **Write-offs of uncollectible accounts.**(l) Where collection efforts on the part of the housing company, managing agent and counsel have not been successful, the housing company may turn over uncollected accounts to a collection agency licensed by the New York City Department of Consumer Affairs.

(2) Where all efforts as outlined above prove to be unsuccessful and an account appears to be uncollectible, write-offs should be handled as follows:

(i) Accounts receivable not in excess of three months' rent may be written off at discretion of the housing company.

(ii) Accounts receivable equal to or in excess of three months' rent may be written off only after approval by HPD. Requests for such approval must be supported by a detailed description of collection efforts and such other material as may be required by HPD.

(iii) Except for cases of fraud and misrepresentation, counsel to the housing company may be permitted to compromise and settle all accounts of vacated tenants turned over to him or her regardless of the amount involved when such compromise and settlement are of an urgent nature and are approved by the housing company. HPD must be advised of such settlements in cases where indebtedness equaled or exceeded three months' rent.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-06

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-06 Resale of Cooperative Shares.

(a) **Procedures.** (1) A shareholder desiring to sell his or her shares in a mutual housing company shall notify the housing company in writing no later than 90 days in advance of his or her intention to sell his or her shares to the housing company or its designee, pursuant to the provisions of the housing company by-laws and occupancy agreement.

(2) The shareholder shall transfer his or her shares to the housing company and shall thereafter surrender possession of the apartment at the agreed upon time pursuant to arrangements made with the housing company. After the shareholder has surrendered possession of the apartment, the housing company will inspect the apartment to determine necessary repairs. Any surcharge or any other fees and charges owing to the housing company shall be deducted from the equity due the cooperator.

(3) The housing company shall enter the transfer of shares on its books.

(4) The shareholder shall be responsible for carrying charges and submetered electrical charges for up to 90 days after surrendering possession of the apartment or until the housing company transfers the shares to the new owner, whichever occurs earlier.

(5) (i) If a tenant/cooperator seeks to withdraw his or her offer of sale of shares, and no commitment has been made to a purchaser, the housing company at its option, may permit the tenant/cooperator to withdraw his or her offer, and may charge the tenant/cooperator a reasonable fee for this service.

(ii) If, within an 18 month period, shares for the same apartment are re-offered for sale after a previous withdrawal

pursuant to subparagraph (i) of this paragraph, the tenant/cooperator must post security for administrative costs in the amount of two months' carrying charges. If the shares for the apartment are sold, the security shall be refunded. If the shares for the apartment are withdrawn again, the security shall be forfeited.

(6) The occupancy agreement for each mutual housing company shall set forth the obligations of each shareholder with respect to the condition of the unit at the time that such shareholder vacates the unit.

(7) In the case of National Housing Act of 1937, as amended, §223(f) refinanced mutual housing companies, where the appliances were included as security for the insured mortgage, the outgoing shareholder shall be required to leave behind the appliances which were in place at the time of refinancing or to replace them with appliances of equal size and amenities. In the case of non-refinanced mutual housing companies, a board of directors may adopt a uniform policy whereby either the incoming or outgoing cooperator shall be responsible for providing a stove and refrigerator for his or her apartment.

A board may adopt a policy which apportions the cost of appliances between the incoming and outgoing shareholders as follows: As appliances require replacement, the cooperator in residence would be required to purchase the new appliance(s). A life-expectancy schedule would be established for each type of appliance and the appliance would be depreciated over that pre-determined time period. If the cooperator in residence vacated the apartment any time during the depreciation period, he or she would be reimbursed for the remainder of the period by the incoming cooperator. If the depreciation period were over when the cooperator vacated, the incoming cooperator would be obligated to purchase new appliances and the process would commence again. The depreciated appliances would become the property of the housing company. Any policy adopted must be applied uniformly to all apartments.

(8) The mutual housing company shall follow the chronological order of its waiting list in the sale of shares. In the event a mutual housing company has substantially depleted its waiting list, the mutual housing company shall seek potential applicants. A mutual housing company and its managing agent shall only open a closed waiting list in accordance with the requirements of §3-02 of these rules.

(b) **Resale price of shares.** (1) The resale price of shares in a mutual housing company shall be fixed by the mutual housing company, subject to the approval of HPD and shall be equal to

(i) the consideration the selling tenant/cooperator paid for such shares and

(ii) any capital assessments and voluntary capital contributions approved by HPD and paid by the selling tenant/cooperator to the mutual housing company, to the extent not already included in the consideration paid for such shares, and,

(iii) if established by the mutual housing company, a proportionate share of the actual aggregate amortization paid on all existing and prior mortgages on the project in reduction of total outstanding principal indebtedness during such period as shall be fixed by the board of directors of the mutual housing company, to the extent not already included in the consideration paid for such shares, and

(iv) reasonable non-refundable administrative charges, not to exceed $150. Said administrative charge is to be retained by the mutual housing company.

(2) The aggregate amount to be paid to the selling tenant/cooperator with respect to the sale of the selling tenant/cooperator's shares shall be fixed by the board of directors of the mutual housing company, subject to the approval of HPD, and shall be equal to

(i) the consideration the selling tenant/cooperator paid for such shares,

(ii) any capital assessments and voluntary capital contributions approved by HPD and paid by the selling

tenant/cooperator to the mutual housing company, to the extent not already included in the consideration paid for such shares, and

(iii) a proportionate share of the actual aggregate amortization paid by the selling tenant/cooperator on all existing and prior mortgages on the project in reduction of total outstanding principal indebtedness during such period as shall be fixed by the board of directors pursuant to subparagraph (iii) of paragraph (1) of this subdivision (b), to the extent not already included in the consideration paid for such shares. To the extent that a selling tenant/cooperator may be entitled to an amount less than the resale price of his or her shares, the difference shall be retained by the mutual housing company.

(3) The Board of Directors may, subject to the approval of HPD, establish a general policy pursuant to which a selling tenant/cooperator who had occupied more than one dwelling unit is paid an amount measured by his or her proportionate share of the actual aggregate amortization paid during his or her period of occupancy on all existing or prior mortgages on the project.

To the extent that a selling tenant/cooperator may be entitled to an amount greater than the resale price of shares, the difference may be paid to the selling tenant/cooperator by the mutual housing company.

(4) The "proportionate share of the actual aggregate amortization paid on all existing and prior mortgages on the project" referred to in paragraph (1) of subdivision (b) of this section shall be in the same ratio to such actual aggregate amortization as the number of shares held by the selling tenant/cooperator at the time of sale bears to the total number of shares of issued and outstanding capital stock of the mutual housing company during such period.

(5) Nothing contained in this section shall prohibit the continued use of any method of calculating resale price adopted by a mutual housing company and approved by HPD prior to July 26, 1983.

(6) Participation in the full amortization provisions of this section is voluntary and not mandatory.

(7) A mutual housing company electing to amend its by-laws pursuant to this subdivision (b) shall submit to HPD for its approval, a Board of Directors Resolution certified and acknowledged by the Secretary of the Corporation setting forth the adoption of this provision and a fully executed copy of a by-law amendment certified by the Secretary of the Corporation.

(c) **Joint ownership of cooperative shares.** A mutual housing company shall, upon request of the shareholder, permit members of his or her immediate family in occupancy to become co-owners of shares and co-signatories on the occupancy agreement provided that the mutual housing company receives evidence satisfactory to it that: Such individual has been included on the two most recent income affidavits filed by the shareholder; has been a bona fide resident of the apartment for at least two years during which time the apartment has been his or her primary residence; and that such individual and the shareholder intend to continue in good faith to remain in joint occupancy. A mutual housing company Board of Directors and its managing agent shall not unreasonably withhold permission to add a co-owner or co-signatory as set forth above. The financial status of the proposed party shall not be a factor as long as the prime tenant/cooperator meets the minimum eligibility requirements at the time of request. A mutual housing company may limit the number of persons permitted to be added to the stock certificate. The same criteria shall be utilized for all residents. For purposes of this section, the definition of family member contained in §3-02(p) of these rules shall apply. Co-ownership of shares does not guarantee the right to succession to an apartment in a mutual housing company development. Successor cooperators must qualify under §3-02(p) of these rules.

(d) **Bequeathing of apartments.** In no event may the right of occupancy in a Mitchell-Lama mutual housing company development be bequeathed to another. Upon the death of the tenant/cooperator, the shares must be returned to the mutual housing company which will arrange for a sale pursuant to subdivision (a) of this section. Notwithstanding the foregoing, eligible members of the tenant/cooperator's immediate family in occupancy may acquire such shares if they meet the requirements of §3-02(p) of these rules.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-07

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-07 Management and Operations.

(a) **Special services.** A housing company may furnish tenant/cooperators with special services not provided for in the lease or occupancy agreement such as bus, laundry, television antenna or other services upon such terms as HPD shall approve in writing. These services and all facilities used in connection therewith, shall be made available to all tenant/cooperators on equal terms. Discontinuance of special services at the request of a tenant/cooperator shall not entitle the tenant/cooperator to a reduction in rent or carrying charges unless HPD shall otherwise direct.

(b) **Services, repairs, replacements and improvements.** (1) Each housing company shall maintain its structures, grounds, elevators, boilers and other equipment, either by contract or by qualified employees in such a manner as to preserve the property, to protect the health and safety of the residents and employees, and to provide economical operation of the development.

(2) Contracts for building services, repairs, replacements, redecorating or improvements and supplies shall be let on the basis of lowest cost compatible with quality of performance, material and workmanship, on the basis of no less than three competitive bids, according to the following schedule:

In housing companies with fewer than five hundred (500) dwelling units, contracts over $15,000 shall be submitted for HPD written approval.

In housing companies with five hundred (500) dwelling units or greater, contracts over $30,000 shall be submitted for HPD written approval. The housing company's submission shall include the three bids plus a contract executed by the successful bidder as well as the other documents as set forth below.

Notwithstanding the foregoing, HPD reserves the right to require any individual housing company to submit for approval any or all contracts over $5,000.

In the case of a mutual housing company, the submission shall be accompanied by

(i) a certified copy of resolution of the housing company's Board of Directors acknowledged by the Secretary of the Corporation, approving the contract, bearing the housing company's corporate seal and

(ii) the housing company's attorney's certification that the proposed contract is in compliance with the rules of HPD.

In the case of a rental development, the president or managing general partner of the housing company or his or her duly authorized designee must sign the contract.

The following language shall be included in all contracts for building services, repairs, replacements, redecorating and improvements: "Material, equipment and workmanship shall be subject to the inspection and approval of HPD or its duly authorized agent at the discretion of HPD during the progress of the work and before final payment is made on the contract."

Every contract subject to HPD approval shall contain the following language: "This agreement is subject to written approval by HPD. No work shall commence until this agreement is approved by HPD."

(3) The housing company or its managing agent shall require that all firms performing work on the housing company's behalf, supply evidence in the form of a certificate of insurance for workers' compensation and commercial general liability, naming the housing company and HPD as additional insured parties. For contracts subject to HPD approval, such certificates must be submitted to HPD for its written approval before any such contract is executed by the housing company.

The liability limits for workers' compensation shall be statutory, and the commercial general liability insurance shall be in standard comprehensive general liability form, naming the housing company and HPD as additional insureds, against all claims for bodily injury, death or property damage in an amount not less than $1,000,000 per occurrence, $2,000,000 annual aggregate for bodily injury and property damages.

(4) On all contracts over $100,000, the successful bidder shall, not later than the time of its delivery of the executed contract, deliver to the housing company and HPD an executed Performance Bond for 100 percent of the accepted bid as surety for the faithful performance of the contract and an executed Payment Bond for 100 percent of the accepted bid as surety for the payment of all persons performing labor or furnishing materials in connection therewith. Alternatively, the contractor may submit an unconditional, irrevocable letter of credit from a New York Clearing House bank equal to at least 10 percent (10%) of the dollar amount of the contract which shall provide that the full amount may be drawn down by the housing company upon delivery of a letter certifying default of the contractor. Request for waiver of a bond or letter of credit shall be submitted in writing to HPD by the housing company.

(5) The following language shall be included in all contracts that are subject to HPD approval for building services, repairs, replacements, redecorating and improvements: "Contractor shall not assign any monies due or to become due hereunder without the written consent of the Owner and HPD, nor shall Contractor subcontract or assign any of the work without prior written approval by the Owner and HPD of such sub-contractor or assignee." In addition, such contracts shall contain the following language: "This agreement is subject to written approval by HPD."

(6) In the case of emergencies, where immediate employment of a contractor is deemed necessary by the housing company to prevent damage to property or prevent injury to persons, submission to HPD of the data required by paragraph (2) above may be made after execution of a contract or performance of the work, provided that such submission is made promptly following the date on which such emergency arose. However, if the emergency occurs

during working hours, notification of emergency should be made by telephone to HPD and verbal approval obtained prior to commencement of repairs.

(7) All contracts for building services or maintenance of buildings equipment on an annual or time basis that require HPD approval pursuant to paragraph two of this subdivision shall be submitted to HPD for written approval before execution by the housing company, and prior to expiration of the previous contract, if any. Where such a contract does not provide for automatic renewal, a new contract must be submitted for approval to HPD at least thirty (30) days prior to expiration of the existing contract. All such contracts for building services or maintenance of buildings equipment shall provide that they are subject to termination without cause upon thirty (30) days written notice by the housing company or upon ten (10) days written notice by HPD, and immediately upon notification by the housing company or HPD that the contractor has materially breached his contract. After termination, no amounts shall be owed except for work actually completed.

(8) In the event that any director, officer, shareholder, employee or agent of any housing company shall be directly or indirectly connected with any person, firm or corporation which may submit any bid, or to whom any contract is proposed or awarded, pursuant to the provisions of paragraph (2) or (5) hereof, a statement setting forth the nature of such connection shall be included in the submission to HPD and shall be made a part of the minutes of the meeting wherein the contract was approved.

(c) **Contracts and retainers.** (1) All contracts and retainer agreements with attorneys and accountants shall be subject to termination without cause by HPD or the housing company upon thirty (30) days written notice and immediately by written notice by the housing company or HPD if there has been a material breach of contract. After termination, no amounts shall be owed except for work actually completed. Managing agent contracts are subject to §3-16 of these rules.

(2) An accountant retained by a housing company shall be an independent C.P.A. licensed to practice under the laws of the State of New York.

(3) No company, association, director, officer, employee, agent or other person shall solicit or receive, directly or indirectly any commission, bonus, gratuity, fee or any other payment not expressly authorized by HPD from any individual, firm or corporation which may submit any bid, or to whom any contract is proposed to be awarded.

(4) Violation of this subdivision (c) by any company, association, director, officer, employee, agent or other person shall be cause for discharge and any other appropriate action; and a provision to such effect shall be incorporated in all employment agreements entered into by the company.

(d) **Cancellation by HPD.** Any contract, agreement or retainer, entered into by the housing company or its managing agent in violation of the provisions of this section shall be subject to immediate cancellation by HPD.

(e) **Employees, wages and living quarters.** (1) The number, types, qualifications and rate of pay of the employees required for the proper maintenance and operation of the housing company's properties shall be subject to review by HPD and the housing company shall submit staffing plans to HPD for its review and approval, if required by HPD.

(2) The rental of an apartment in a development by an employee of the housing company shall be subject to the same rules and procedures as are applicable to all other tenants, except that income limitations, occupancy standards, and surcharges shall not apply when the employee is living at the development for the furtherance of the housing company's interests. However, the number of apartments, if any, which may be set aside for such employees shall be subject to the approval of HPD. The agreement shall provide for the termination of occupancy by the employee when his or her services are discontinued. Such resident employees shall not be shareholders, if such company is a mutual housing company.

(f) **Certification of superintendents and boiler technicians.** The housing company or managing agent shall

require the building superintendent and one boiler room technician from each housing company to obtain a certificate of completion of a course offered by an accredited institution on the maintenance of a vacuum steam system, where applicable. Such accreditation must be furnished to the Division of Housing Supervision of HPD if requested by HPD.

(g) **Examination of operations.** The administration and operation of a development shall be subject to examination at the discretion of HPD. The housing company shall make all data, records, information and areas of the physical property available for such examination.

(1) **Physical inspection.** All developments are subject to physical inspection. HPD may retain a third party to make inspections or may rely on inspections made by others. The inspector shall carry out his or her inspection together with a representative of the housing company. In the case of a rental development, a representative of the duly constituted Tenants Association may join in the inspection.

The Tenants Association may make a list of complaints available to HPD in advance of the inspection date; the inspector shall notify the representative in advance of the date and time of the inspection. All inspections shall be made in the course of normal business hours.

HPD or its designee shall issue a written inspection report which shall be sent to the owner or President of the Board of Directors, the managing agent and, in the case of a rental development, the Tenants Association. The managing agent, with the knowledge and approval of the housing company, shall cause all emergency repairs to be made immediately and will comply expeditiously with the requirements of the inspection report. The managing agent will advise HPD in writing of actions taken to comply with recommendations in the inspection report.

To facilitate the physical inspection of a development, the following records shall be maintained:

(i) Apartment painting, maintenance and repair files.

(ii) A log of repairs or improvements to plant, structures and grounds.

(iii) A log of service interruptions, such as heat, hot water, elevator and utilities.

(iv)A log of contracts, including, but not limited to, name of contractor, fee and expiration date.

(v) A log of general supplies, tools and equipment.

(vi) An oil consumption log setting forth delivery date, gallonage and price per gallon; or a steam or gas consumption log, where applicable.

(vii) Electricity usage log (monthly kwh consumed).

(2) **Fiscal examination of operations.** HPD shall at its discretion conduct audits and reviews of housing company financial operations. The housing company shall cooperate in making all books and records available for such audit and review. To facilitate the examination of data, the following records shall be maintained and (where indicated) sent to HPD:

(i) Permanent individual tenant/cooperator files which shall include the initial application forms, credit checks, home visit reports where applicable, and other supporting documentation. In addition, the file should contain all income affidavits, tenant/cooperator leases and occupancy agreements and any special forms, riders, documents and information which may pertain to the eligibility of said tenant/cooperator for his or her apartment and any and all subsidies which may be applicable.

(ii) A quarterly vacancy report to be sent to HPD within thirty days of its preparation.

(iii) Current tenant/cooperator rent roll to be sent to HPD every twelve months.

(iv) A monthly operating statement showing rent/carrying charges and other receipts, disbursements, aged accounts payable and aged rent/carrying charge arrears, including the name of occupant in arrears, his or her apartment number and dollar amount of arrears to be sent to HPD no later than thirty days after the end of the month for which such monthly operating statement was prepared.

(v) An annual audited financial statement which shall be prepared for and submitted to HPD no later than one hundred twenty (120) days from the end of the audited fiscal period.

(3) In the event the income and reserves of the housing company shall be insufficient, as determined by HPD, to complete all required repairs, HPD, in conjunction with the housing company, shall establish priorities.

CASE AND ADMINISTRATIVE NOTES

¶ 1. In one case, the operator of coin-metered laundry facilities brought an action against a Mitchell-Lama cooperative, seeking specific performance of a laundry lease agreement. Although the regulation, at the time in question, required the approval of the Department of Housing Preservation and Development (HPD) on any contract over $10,000 (the figure has since been raised to $30,000), the contract did not contain any condition regarding HPD's approval, and the lessor's agent represented that he was authorized to enter into the lease. The court held that even though HPD's approval for the lease was never obtained, the lessee had a viable action against the lessee for breach, if the lessor could show that it was never given actual notice of the HPD regulation. If the lessee had been dealing directly with a government agency, it would have been chargeable with any regulations applicable to the proposed contract. In this case, however, the lessor was dealing with a private cooperative, and was not chargeable with knowledge of the applicable regulations. Although the lessee could not operate the machines in the absence of HPD approval, it nevertheless had the right to maintain an action against the cooperative for damages. Cointech, Inc. v. Masaryk Towers Corp., 777 N.Y.S.2d 76 (App.Div. 1st Dept. 2004).

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-08

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-08 Reserves and Escrow Accounts.

(a) **Reserves.** Each housing company shall be required to maintain a reserve fund comprised of three components, each of which shall be funded as follows:

(1) **Mutual housing companies:**

(i) Reserve for replacements. Ten dollars ($10) per rental room per year, plus interest earned on all reserve fund investments.

(ii) Reserve for painting and decorating. Twenty-five dollars ($25) per dwelling unit per year.

(iii) Reserve for vacancy and collection losses and contingencies. Three percent (3%) of the rent roll until the accumulation in this reserve is equal to twenty-five percent (25%) of the rent roll; and thereafter, such deposits as are necessary to maintain the reserve at the stated level.

It should be understood that the reserve component for vacancy and collection losses and contingencies is primarily set aside for the funding of "contingencies" which are defined as unexpected occurrences or emergencies.

(2) **Rental Housing Companies.**

(i) Reserve for replacements. Stoves and refrigerators-fifteen dollars ($15) per rental room per year. Dishwashers-forty dollars and fifty cents ($40.50) per apartment per year. Air conditioners-seventy-five ($75) per air conditioner per year; plus interest earned on all reserve fund investments, where applicable.

(ii) Reserve for painting and decorating. Thirty-five dollars ($35) per rental room per year.

(iii) Reserve for vacancy and collection losses and contingencies. Three percent (3%) of the rent roll, until the accumulation in this reserve is equal to twenty-five percent (25%) of the rent roll; and thereafter, such deposits as are necessary to maintain the reserve at the stated level.

It should be understood that the reserve component for replacements in a rental development applies to replacement of appliances primarily, rather than replacement of systems. The "contingency" reserve component is set aside for unexpected occurrences or emergencies.

(b) **Bank resolutions.** The resolution filed with the bank shall contain, in addition to the clauses required by the bank, the following clauses: Further resolved, that withdrawals from such account be accompanied by "Authorization for Expenditure of Funds" signed by a designated HPD official, and that duplicate copies of monthly bank statements shall be forwarded to HPD's Division of Housing Supervision, upon HPD's request; that when an investment in securities is contemplated, withdrawal shall be made upon presentation of "Authorization for Expenditure of Funds;" that the bank shall make the investment, shall hold the securities in safekeeping and shall deposit to such account the proceeds realized on either liquidation or redemption.

Further resolved, that this resolution shall remain in full force and effect unless and until revoked with HPD's written consent. A certified copy of the housing company's resolution opening the bank account and a photocopy of the housing company's signature card filed with the bank shall be submitted to HPD's Division of Housing Supervision.

(c) **Administration of accounts.** (1) **Deposits.** There shall be deposited into the reserve account monthly an amount equal to one-twelfth (1/12) of all the annual reserves.

(2) **Disbursements.** No disbursements from the reserve account shall be made without prior written authorization by HPD.

(3) **Investments.** All funds not currently required shall be invested. Such investments shall be limited to Federally insured interest-bearing bank accounts and Federal obligations.

(i) If interest-bearing bank accounts are utilized, passbooks and bank records shall be annotated as follows:

Withdrawals from this account are limited to checks payable to (Housing Company), Reserve Fund Account, (Name of bank in which reserve fund is maintained).

(ii) If Federal obligations are purchased, a custodial agreement for the bank in which the "Reserve Fund Account" is maintained. This agreement shall require that all interest and proceeds from liquidation or redemption of securities be re-deposited to the "Reserve Fund Account." A photocopy of the custodial agreement shall be submitted to HPD's Division of Housing Supervision.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-09

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-09 Insurance.

(a) **General.** The following is intended to serve as minimum requirements for housing companies in arranging an insurance program to provide protection against the usual hazards experienced during the course of operation. Since the same conditions may not prevail in all developments, separate studies should be made as to the actual exposures and hazards and the insurance coverage necessary to meet them.

It is incumbent upon all housing companies to see that proper insurance coverage is maintained at all times and that coverages are modified or changed to meet changing conditions. Copies of all insurance policies and renewals shall be transmitted promptly to HPD. Furthermore, all insurance coverage that is maintained by housing companies must be issued by an insurance company in good standing licensed to issue insurance in New York State.

(b) **Minimum required coverage.**

(1) **Upon opening a corporate or sales office.**

(i) **Public liability (Comprehensive General Liability Form)** Minimum limits of $1,000,000 per occurrence, $2,000,000 annual aggregate for bodily injury and property damage.

(ii) **Workers' compensation.** As required by statute.

(iii) **Disability benefits.** As required by statute.

(iv) **Blanket fidelity bond.** Appropriate limits as determined by HPD.

(v) **Hold up. Inside and outside.** Money and securities. (Broad Form if possible where safe is located on premises.)

(2) **Upon acquisition of site.**

(i) **Liability coverage.** To be endorsed to include site and any buildings thereon.

(ii) **Fire insurance.** Housing company should obtain this coverage on its buildings and/or personal property.

(3) **Upon commencement of construction of the limited-profit housing company development.** The following coverages are generally supplied by the General Contractor pursuant to the terms of the construction contract. Contractors shall be required to submit the required policies delineated in this section to HPD before the commencement of any construction work and operations shall not be allowed to commence until coverage required has been approved by HPD.

(i) **Contractor's public and protective liability and property damage.** Contractor shall provide such coverage to protect him and his subcontractors against claims for property damage and personal injury, including accidental death, in the sum of $1,000,000 per occurrence, $2,000,000 annual aggregate bodily injury and property damage.

(ii) **Owner's protective liability and property damage.** Contractor shall provide such coverage to protect the housing company against claims for property damage and personal injury including accidental death caused by the operation of the contractor or his subcontractors during the performance of the work in the sum of $1,000,000 per occurrence, $2,000,000 annual aggregate bodily injury and property damage.

(iii) **Workers' compensation.** As required by statute.

(iv) **Disability benefits.** As required by statute.

(v) **Fire and extended coverage insurance.** Pursuant to the terms of the Construction Contract. It is recommended that a builder's risk "Completed Value" form of policy be used. Adequate coverage shall be maintained for any materials which are stored away for the development site. It is recommended that the housing company rather than the contractor obtain this coverage.

(vi) **Boiler.** Minimum of $1,000,000 pursuant to the terms of the Construction Contract. It is recommended that the housing company rather than the contractor obtain this coverage.

(vii) **Payment and performance bond.** Pursuant to the terms of the Construction Contract.

(4) **Upon occupancy of buildings.** Policies carried during the initial or construction periods of a housing development for which there is a continuing exposure thereafter may remain in force and the policies adjusted in accordance with requirements during later conditions.

(i) **Comprehensive general liability.** Minimum limits of $1,000,000 per occurrence, $2,000,000 annual aggregate for bodily injury including accidental death and property damage. This policy should include coverage for the maintenance or use of the premises as well as for all elevators which are located in the development.

(ii) **All Risk Property Policy.** Policy should be written in an amount equal to at least 90 percent of the insurable value of the development. The prior approval of HPD shall be obtained for a deductible clause in excess of $5,000. Fire policies shall contain a provision that the settlement of all fire losses shall be subject to the approval of HPD. Policies shall be endorsed to cover the interest of The City of New York, as first mortgagee.

(iii) **Rents.** The rental income of the development should be written on a 100 percent co-insurance basis.

(iv) **Workers' compensation.** As required by statute.

(v) **Disability benefits.** As required by statute.

(vi) **Fidelity Bond.** 3D Comprehensive form of policy is recommended for this coverage. The amount of the coverage shall be two and one-half times the value of the monthly rent roll plus any other fluid assets. However, in certain cases using the two and one-half times factor may make the amount of coverage unrealistic and the cost prohibitive for the risk involved. Therefore, HPD reserves the right to determine, on a case by case basis, what amount is sufficient. A rider should include coverage for a managing agent. Furthermore, for mutual housing companies, a rider can also be added to include the interest of all non-compensated officers, directors and committee members.

(vii) **Boiler and machinery.** HPD recommends a "Comprehensive" form of coverage be used or a rider be added to the "Broad" form to cover "Miscellaneous Electrical Equipment". The amount of insurance to be carried shall be sufficient to cover the maximum probable damage to the property of the development and property of others that may arise out of any accident occurring through the operation of such equipment, but in any event not less than $1,000,000. Policies shall be endorsed to cover the interest of the City of New York, as first mortgagee.

(viii) **Directors and officers.** For mutual housing companies. Minimum limit of $1,000,000.

(ix) **Umbrella liability.** The minimum requirement for under 150 units $1,000,000; 151 to 500 units $5,000,000; 501 to 1,000 units $10,000,000; over 1,001 units $15,000,000.

(x) **Miscellaneous risks.**

(A) **Automobiles.** Any vehicle owned by the housing company shall be covered by automobile liability insurance with minimum limits of $250,000/500,000 for bodily injury, including accidental death, and at least $100,000 for property damage. For damage to the vehicle itself, comprehensive fire and theft shall be obtained. For automobiles owned by employees and officers of the housing company, used on behalf of the company, proper liability coverage shall be obtained with limits of $250,000/500,000 for bodily injury including accidental death and $100,000 for property damage.

(B) **Sales and management companies.** Where the housing company employs independent sales or managing agents, these agents or their employees who are responsible for the handling of housing company monies shall, without expense to the company, be bonded by a Blanket Position Bond, in favor of the housing company and a copy of such Blanket Position Bond shall be submitted to HPD.

(C) **Contractors, concessionaires, and similar professionals.** In the event that repair, alterations, exterminating or any other work or services shall be performed by the housing company, the housing company shall require that all firms performing such operations, supply evidence that workers' compensation and public liability insurance are in force. The limits for liability shall be at least $500,000 for bodily injury and property damage, combined single limit. It may be that certain contractors and concessionaires, by the nature of the liability factor for the work being done, and the cost of the contract, would have a higher risk factor. In that event we reserve the right to require, on a case by case basis, a higher amount for bodily injury. The housing company and HPD shall be named as an Additional Insured.

(D) **Commercial tenants.** Must carry a minimum of $500,000 for bodily injury and property damage, combined single limit. It may be that certain commercial tenants, by the nature of their business, would have a higher bodily injury risk factor. In that event we reserve the right to require, on a case by case basis, a higher amount for bodily injury. The housing company and HPD shall be named as an Additional Insured.

(E) **Architects and engineers.** Must furnish evidence of their liability coverage.

(F) For subparagraphs (x)(C) and (x)(D) above, the housing company and HPD shall be named as an Additional

Insured.

(G) Insurance coverage shall be reviewed prior to the anniversary date of each policy with respect to the adequacy of coverage. HPD may direct a housing company to increase the amount of its coverage to reflect current replacement value where appro- priate.

(c) **Notice of loss.** (1) The housing company shall give immediate notice to HPD of the occurrence of any damage to its property caused by fire or any other hazards, whether or not covered under any of the above insurance coverages.

(2) If damage to housing company property is sustained at other than normal business hours, the loss must be reported to HPD on the first regular business day following the occurrence.

(3) Personal injury or fatality as a result of a fire or other than natural causes must be reported to HPD immediately.

(4) In the event that a housing company decides to employ a Public Adjuster for the purpose of negotiating a settlement with its insurance company, the housing company must request approval from HPD in writing. Approval by HPD must be confirmed in writing to the housing company.

(5) Unless HPD exercises its rights under the mortgage to apply insurance proceeds to the mortgage, all checks in payment of losses shall clear through HPD Insurance Unit. HPD representatives will inspect to see that the damaged property has been restored to satisfactory condition, after which time the checks shall be released to the housing company.

(d) **Cancellation.**

All policies shall provide for a minimum of thirty (30) days notification to HPD in the event of cancellation, amendment or alteration of a policy.

(e) **Capital grant insurance requirements.**

(1) The housing company shall cause to be placed and kept in force all forms of insurance needed to protect the company adequately or required by law, including but not limited to workers' compensation insurance, disability insurance, public liability, boiler insurance, and all risk property insurance. All of the various types of insurance coverage required for the benefit of the housing company shall be placed with such companies, in such amounts, and with such beneficial interest appearing therein as shall be acceptable to the housing company and the New York State Division of Housing and Community Renewal, and otherwise be in conformity with the requirements of the mortgage.

(2) The housing company shall provide or make provision for a managing agent's bond naming the New York State Housing Finance Agency as obligee with an amount and an insurance company acceptable to the housing company, the New York State Housing Finance Agency, the New York State Division of Housing and Community Renewal and HPD.

***** Current through December 2009 ****

28 RCNY 3-10

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-10 Rent and Carrying Charge Increases.

(a) **Procedure for request of increase.** (1) The housing company shall prepare the requisite petition, application, or motion for an increase in the maximum rental or carrying charges per room and submit same to HPD for approval as to form and authorization for hearing procedures.

(2) In the event the housing company fails to submit said petition, application or motion as set forth in paragraph (1) above, HPD may, upon its determination of the need for an increase in rents or carrying charges, promulgate a petition preparatory to effectuating the hearing, which petition need not be in the same form as delineated in §3-10(b).

(b) **Public hearing requirement.** (1) Before acting upon any application or motion for an increase in the maximum rental/carrying charges per room to be charged tenant/cooperators of dwellings where HPD is the supervising agency under the provisions of the Private Housing Finance Law, a public hearing shall be held. Said hearing shall be held upon not less than thirty (30) days notice to the tenant/cooperators. Such notice shall have annexed thereto a copy of the application or motion for increase in rental/carrying charges and shall set forth the facts upon which the application or motion is based. A development assisted by a Federal Section 236 contract must also comply with Federal rent/carrying charge increase requirements.

(2) No applications or motion for an increase in the maximum rental/carrying charges per room shall be entertained or acted upon hereunder for a period of two years from the date of any previous order of the supervising agency for the increase of maximum rental/carrying charges affecting the same dwelling.

(3) In the event that a hearing having been scheduled is adjourned for any reason whatsoever, then notice of such

adjourned date shall be posted near the elevators, on bulletin boards or in any other conspicuous places on the lobby floor; such notice shall constitute compliance with these regulations.

(c) **Contents of application.** (1) An application for rental/carrying charge increases shall be submitted to HPD, together with a copy of the notice proposed to be delivered to the tenant/cooperators. (For the purpose of this subdivision (c) the term "rental" shall mean and be interchangeable with the term "carrying charges" as used for a mutual company and the term "tenant" shall mean and be interchangeable with the term "cooperator").

(2) The notice to be delivered to the tenants shall first be submitted to HPD for its approval and shall contain:

(i) In bold print, at the top,

TO ALL TENANTS OF (Name of Development)
NOTICE OF APPLICATION (Housing Company)
FOR RENTAL INCREASE

(ii) In the body of the notice:

PLEASE TAKE NOTICE, that upon the annexed application of (Housing Company) the Department of Housing Preservation and Development of the City of New York will be requested to approve an increase in the maximum average monthly room rental in the housing development of (Housing Company) from (present maximum) to (requested maximum); and
PLEASE TAKE NOTICE FURTHER that a public hearing will be held at the time and place designated by HPD in the attached cover letter from HPD, and at that time evidence will be introduced in support of said application by the undersigned. Interested parties may appear in person to comment or may provide written comments to HPD.
YOU MAY APPEAR IN PERSON OR BY ATTORNEY
(Place) _____
Date (Date of Notice) _____
Date (Date of Notice) Housing Company
_____ (Attorneys)

(3) Applications for rent increases shall be verified and submitted in quadruplicate. They shall contain:

(i) Name of housing company, location of development, date of organization and number of rental rooms.

(ii) Dates of completion and of occupancy.

(iii) Status with respect to tax exemption.

(iv) Present average room rent.

(v) Present income from non-dwelling spaces.

(vi) Capitalization, authorized and actual.

(vii) Status of dividend and debenture interest payments accruing from date of initial occupancy.

(viii) Assessed valuation. Land and land improvements.

(ix) Such other information and data as may be pertinent.

(x) Request for a specific rent increase.

(4) The application shall have annexed the following exhibits and schedules:

Exhibit I. A three year projection of operations on a cash flow basis as per a format available from HPD, complete with applicable schedules. In addition to the three years an actual base year should be used as a starting point reflecting the information in the latest certified statement of financial condition as prepared by a certified public accountant. **Exhibit II.** A calculation of the increase required on an average per room per month rate in a format available from HPD. This calculation will commence with beginning working capital or deficit working capital as of the beginning of the projection. Include total deficits projected for the length of the projection and one month's working capital to be left at the end of the period. This deficit then divided by the number of months between expected day of increase and the end of projections and that amount divided by the number of rental rooms in the development will produce the required per room per month dollar increase. **Exhibit III.** A three year projection of operations on a cash flow basis after reflecting the increase calculated in Exhibit II above. All applicable schedules will be provided as required in Exhibit I. **Exhibit IV.** The most recent annual audited financial statement for the housing company. It should be noted that working capital or negative working capital resulting from prior years' operations, as well as required reserves not funded, must be considered in the calculation of required increase in the petition. The format for these exhibits and schedules is available from HPD. HPD may require further information on any of the matters listed above or on any other matters and may request an amended or superseding application. Such additional information shall be verified and filed in quadruplicate within the time stated by HPD.

(d) **The hearing.** (1) If the papers submitted to HPD are in form sufficient to warrant consideration by such agency, the applicant shall be notified in writing. Such notification shall include the date and place established by HPD for the public hearing on the application. The hearing shall be held within sixty (60) days of the date of such notification.

(2) Thereafter, the applicant shall notify each tenant in writing by notice approved by HPD of the pending application and the date and place set for the hearing. Such notification shall be sent to the tenants by ordinary mail or distributed under each apartment door and a copy shall be posted in a conspicuous public place on the lobby floor of each building affected. Additional copies of the notice to tenants shall be kept by the applicant for inspection by tenants requesting same. Satisfactory proof of notification to tenants must be supplied to HPD not less than ten (10) days prior to the date set for hearing.

(3) All books, records and financial data pertinent to the requested increase shall be made available to representatives of the Tenants Association in a rental development.

(4) The hearing shall be presided over by such hearing officer as may be designated by HPD for such purpose. The applicants and those opposing the application, in person or by duly authorized representatives, shall each be given a reasonable opportunity to be heard.

(5) A record of the proceedings shall be kept, which shall include, among other things, the application, the notice to tenants, the written and documentary material received, including comments received by HPD. A verbatim transcript of the hearing shall be made and kept as a record of the public hearing. The cost of such transcript shall be borne by the housing company.

(6) HPD shall make its decision with respect to the application, and if it is determined that an increase shall be granted, the Commissioner shall issue an Order specifying the amount of the increase and the date(s) of implementation. Said Commissioner's Order may be structured to provide for a single or multiple-stage increase.

(7) Prior to the issuance of the Commissioner's order, HPD shall make available the results of a preliminary financial analysis of the application. In the case of a rental development, such analysis shall be provided to both the owner and the Tenants Association or their respective representatives or designees. If either party in the case of a rental

development requests a meeting to review the preliminary financial analysis, HPD's Assistant Commissioner of Housing Supervision shall call a meeting with both parties present prior to making a recommendation to the Commissioner. In the case of a mutual housing company, such analysis shall be provided to the President of the Board of Directors or his or her designee. If the Board of Directors requests a meeting to review such analysis, the Assistant Commissioner of Housing Supervision shall call a meeting prior to making a recommendation to the Commissioner.

(e) **Implementation of rent or carrying charge increase.** A rent increase shall become effective on the first day of the month specified in the Commissioner's Order. The housing company or managing agent shall notify the tenants of such increase by ordinary mail or distribution under each apartment door at least fifteen (15) days in advance thereof or thirty (30) days in advance in the case of a development assisted by a Federal 236 contract, and by posting a copy of the order granting said increase in a conspicuous public place on the lobby floor of each building affected; if such notice is not given in sufficient time then the rent increase shall become effective on the first day of the following month. Proof of such notification shall also be furnished prior to the institution of any rent increase.

(f) **Failure to maintain essential services.** No increase will be granted where in the discretion of HPD the owner of a rental development is not substantially maintaining essential services. Any tenant or his or her representative who wishes to raise this objection must do so by filing a verified statement with HPD a minimum of ten (10) days prior to the date set for the hearing, setting forth in separate allegations each claimed instance of failure to substantially maintain essential services.

(g) **Service fees and charges.** A housing company may, with the prior written approval of HPD, impose or increase fees for services including, but not limited to parking, air- conditioning, master antenna, appliances and storage.

(h) **Reimbursement of professional fees to Tenants Associations.** (1) A Tenants Association that is constituted pursuant to §3-17 of this chapter shall be eligible for reimbursement of professional fees incurred when such Tenants Association retains an accountant, architect or engineer to review a rent increase application which has been submitted by a housing company to HPD and approved as to form by HPD. Only one accountant and/or one architect or engineer may be retained by a Tenants Association pursuant to this subdivision to review a particular rent increase application submitted by a housing company pursuant to this section.

(2) On the date upon which a housing company submits a rent increase application to HPD pursuant to paragraph one of subdivision (a) of this section, such housing company shall notify the Tenants Association in writing that it has submitted such application and that the Tenants Association may retain an accountant and/or an engineer or architect to review the rent increase application upon approval as to form of such application by HPD.

(3) A Tenants Association may retain a professional or professionals to review a rent increase application that has been approved as to form by HPD provided, however, that such professional or professionals shall be retained within ten days after receipt of the notice required pursuant to paragraph two of this subdivision. Said notice shall be deemed to have been received on the business day immediately following the day of mailing. Such Tenants Association shall provide a copy of the retainer agreement or agreements to the housing company and to HPD prior to submission of the professional report or reports pursuant to paragraph four of this subdivision.

(4) A Tenants Association which has retained a professional or professionals to review a rent increase application that has been approved as to form by HPD shall submit a copy of the report and the bill for services of such professional or professionals to the housing company and to HPD at least seven days prior to the scheduled date of the hearing on such application.

(5) The total fees charged by a professional or professionals retained by a Tenants Association pursuant to this subdivision shall be the fair and reasonable cost of the services rendered by such professional or professionals, but shall not exceed in total the amounts specified in the following schedule:

Size of Housing Development Maximum Total Fee(s)

Under 500 units $3,250

500 or more units $4,000

(6) The housing company shall remit payment for services to a professional or professionals who is retained by a Tenants Association pursuant to this subdivision within a reasonable time after receipt of the bill for services, and not later than thirty days after the hearing on the rent increase application.

(7) This subdivision shall not apply in the case of a rent increase application exclusively subject to the approval of HUD.

CASE AND ADMINISTRATIVE NOTES

¶ 1. The regulation contemplates a two step review process for review of an application for a rent increase. After the housing company submits an application for a rent increase, the City Department of Housing Preservation and Development is required to hold a public hearing. After the hearing, the hearing officer is required to make written findings and recommendations, which must be submitted for review to the Assistant Commissioner of the Division of Housing Supervision. The Assistant Commissioner is supposed to conduct an independent review of the case before submitting recommendations to the Commissioner. It is improper for the agency to permit the hearing officer to function as the Assistant Commissioner on the same case. Waterside Tenants Association v. Waterside Redevelopment Co., N.Y.L.J., Aug. 22, 1997, page 23, col. 3 (Sup.Ct. New York Co.).

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-11

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-11 Utility Pass-Through, Submetering, Direct Metering.

(a) **Utility pass-through.** (1) **Procedure for request of increase.**

(i) A housing company which desires to implement an increase in that portion of the rent/carrying charges attributable to utilities must make a request in writing to HPD for permission to do so. Accompanying said request must be photocopies of utility bills for the period of two years prior to the date of request in order to compare current costs with prior costs.

(ii) The housing company must indicate the total annual amount of the increase requested and, in addition, indicate the amount of the increase on a per room per month basis.

(iii) In the case of a mutual housing company, the utility increase request must be accompanied by a board of director's resolution approving same.

(iv) The housing company's accountant shall verify in writing that the supporting figures submitted are correct.

(v) The housing company, upon submission of a request to HPD, shall post the request in a conspicuous public place on the lobby floor of each building. In the case of a rental development, a copy of the request with the back-up data shall be mailed to the President of the Tenants Association for review and comment. Additional copies of the request with back-up data shall be kept by the housing company for inspection by tenant/cooperators requesting same.

(2) **Procedure for processing increase.** The above data will be analyzed by the Division of Housing Supervision

of HPD to determine the validity of the request for a utility pass-through. Tenant/cooperators shall be allowed thirty (30) days from the date of notification to the shareholders or Tenants Association to comment on the request. Upon determination by HPD that a pass-through of increased utility costs is warranted, based on an increase in utility rates, an increase in utility consumption or any combination thereof, HPD shall approve implementation of said utility pass-through and shall notify the housing company in writing of such approval and of the duration of said utility pass-through. In a rental development, a copy of the approval letter shall be sent to the President of the Tenants Association. HPD may deny the request if the housing company has sufficient resources to absorb the increases.

(3) **Implementation by housing company.**

(i) A utility pass-through shall become effective on the first day of the month following the approval of same. The housing company shall notify the tenant/cooperators of such utility pass-through at least fifteen (15) days in advance thereof by either ordinary mail or distribution under each apartment door, and by posting a copy of the approval letter in a conspicuous public place on the lobby floor of each building affected; if such notice is not given in sufficient time, then the pass-through shall become effective on the first day of the next following month after such notice is given.

(ii) A utility pass-through may be requested at any time that an increase in rates or usage occurs; however, no more than one (1) pass-through for the housing company will be approved by HPD for implementation within any six (6) month period.

(b) **Submetering of electricity.** Wherever allowable as determined by the Public Service Commission, a housing company which is master metered for electricity may, pursuant to HPD approval, install equipment for the submetering of electrical charges within dwelling units and bill tenant/cooperators for their individual consumption, plus administrative costs and amortization of equipment. A housing company seeking to convert to submetering must comply with all requirements of the Public Service Commission with respect to such conversion. Rent/carrying charges shall continue to reflect the cost of electricity for public areas and usages.

(1) **Submission of plans.** The housing company shall submit to HPD for review and approval plans and specifications for the installation of submetering equipment.

(2) **Bidding requirements.**

(i) All contracts for the sub-metering of electricity shall be bid in accordance with §3-07 of these rules.

(ii) In the event that any director, officer, stockholder, employee or agent of any housing company shall be directly or indirectly connected with any person, firm, or corporation which may submit any bid, or to whom any contract is proposed or awarded, a statement setting forth the nature of such connection shall be included in the submission to HPD. In the case of a mutual housing company, it shall be made a part of the minutes.

(3) **Testing of submetering equipment.**

(i) The housing company shall be responsible for maintaining accurate meters. Periodic inspections shall be conducted for this purpose.

(ii) If a tenant/cooperator requests an inspection of a meter at a time other than the periodic inspection, the cost of said inspection will be borne by the housing company if the meter is found to be defective, or by the tenant/cooperator if the accuracy of the meter is found to be within prescribed parameters.

(4) **Grievance procedures.** Grievance procedures prepared by the housing company relating to the submetering of electrical charges shall be submitted to HPD for review and approval before such procedures are implemented by the housing company.

(c) **Direct metering of electricity.** (1) A housing company whose project obtains electricity through a master meter may, pursuant to HPD approval, install equipment for the purpose of having electricity directly metered to each tenant/cooperator.

(2) The housing company shall submit to HPD for review, plans and specifications for installation of direct metering equipment. The bidding requirement set forth in §3-07 of these rules shall be complied with.

(3) At the time of request by the housing company for permission to direct meter a development, a copy of the request shall be sent by ordinary mail to all tenant/cooperators.

(4) Prior to any determination being made by HPD regarding the conversion to direct metering, HPD will solicit tenant/cooperator comments regarding said conversion.

(5) A determination will be made by HPD after analysis of existing utility charges as to whether rents or carrying charges at the development require adjustment as a result of the conversion.

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-13 Sanctions.

(a) **Written notice and opportunity to appear.** In the event of a violation by a housing company which could result in removal of any or all of a Board of Directors pursuant to §32(6) of the Private Housing Finance Law, the Board of Directors shall be provided with written notice and affected directors shall be given an opportunity to appear and be heard before HPD with respect to any alleged violations.

(b) **Representation by counsel.** The respective parties may be represented by counsel before HPD.

(c) **Appointment of replacement board of directors.** Pursuant to §32(6) of the Private Housing Finance Law, HPD may replace any or all members of a Board of Directors by appointing persons who HPD in its sole discretion deems advisable, including officers or employees of HPD, as new directors to serve in the places of those removed. Directors so appointed need not be shareholders or meet other qualifications which may be prescribed by the housing company's Certificate of Incorporation or by-laws.

(d) **Term of appointment.** Directors appointed under this section shall serve only for a period coexistent with the duration of the violation, or until HPD is assured against commitment of violations of a similar nature, and shall serve in such capacity without compensation.

(e) **Debarment.** Any person or entity may be debarred for a period not to exceed ten years from contracting with or managing any housing companies supervised by HPD upon a finding by a hearing officer designated by the Commissioner that there has been a material violation of these rules or the provisions of Article II of the Private Housing Finance Law by such person or entity or their agent or agents or upon a finding by a hearing officer designated

by the Commissioner that they have engaged in activity which would constitute a violation of the Penal Law. Any person or entity so debarred may appeal in writing to the Commissioner within ninety days of written notification of the debarment.

(f) **Control of admissions and transfers.** Upon a finding that any housing company is in violation of these rules with respect to admissions and transfers, HPD may take over control of all internal and external waiting lists and have sole responsibility for the selection and approval of admissions and transfers.

(g) **Compulsory training.** HPD may at its discretion require managing agent employees and members of the board of directors to attend housing education courses at the respective expense of the managing agent and the housing company.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-14

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-14 Corporate Action.

(a) **Certificates of incorporation, by-laws, rules and regulations.** Each housing company shall file with HPD, for its approval, a certified and acknowledged copy of its proposed by-laws. Each housing company shall also file with HPD, for its approval, a certified and acknowledged copy of all proposed amendments to its certificate of incorporation or by-laws. The housing company shall forward to HPD for its files two copies of the by-laws or amendments to the certificate of incorporation or by-laws subsequent to HPD approval. Failure to seek HPD approval or rejection by HPD of the by-laws or amendments to the certificate of incorporation or by-laws will render the by-laws or such amendments null and void. Certificates of incorporation, by-laws, rules and regulations established by a housing company shall be in conformity with state laws and HPD rules. Housing company certificates of incorporation, by-laws, rules and regulations to the contrary shall be deemed null and void.

(b) **Disposition of housing company property.** No personal property, books, financial or other records of a housing company shall be destroyed or disposed of without the written consent of HPD.

(c) **Salaries, fees or other compensation to officers or directors.** No housing company shall pay any salaries, fees or any other form of compensation to any officer or director for services rendered in his or her capacity as corporate officer.

(d) **Responsibilities of Board of Directors.**

(1) Members of the Board of Directors of a housing company, whether rental or mutual housing company, bear a high public responsibility, since they have elected to operate under a City-aided program to effectuate public policy by

encouraging the building and operating of housing developments for families of moderate income.

(2) Board members have a fiduciary responsibility to the shareholders of the corporation. Each board member must ensure that buildings, grounds and other assets are kept up to high standards so that their value is not impaired and that the annual operating revenue is spent effectively and economically.

(3) Board members must exercise judicious control of the premises entrusted in their care, including community rooms and public spaces.

(4) Members of the Board of Directors have an obligation to provide to tenant/cooperators the most economical operation of the development without endangering the long term interest of the project.

(5) Board members should be aware of and responsive to tenant/cooperator grievances.

(6) Upon HPD's request, the housing company shall submit to HPD a copy of the minutes from the relevant meeting, certified as to correctness by the housing company's secretary.

(7) No board member shall receive any preferential treatment or thing of value as a result of his or her board membership.

(8) Members or officers of the Board of Directors must occupy a dwelling unit at the mutual housing company development represented by such Board of Directors as his or her primary place of residence.

(e) **Duties and powers.** The Board of Directors has the responsibility for establishing policy covering administration of property, interests, business and transactions of the corporation and may delegate to officers such authority as it deems necessary. Sound organizational policy dictates that individual members of the Board should not interfere with day-to-day management and operation of the project or with its employees or intrude upon management functions. Failure to adhere to this policy reduces the efficiency of the operating staff by creating conflicts in control and in the chain of command. However, the Board as a whole is obligated to ensure that the day-to-day operations of the housing company are handled in the most efficient and expeditious manner and nothing herein should be construed to reduce that responsibility.

(f) **Capital assessments by a mutual housing company.**

(1) **Capital assessments.** A mutual housing company may, by vote of its directors followed by a vote of the shareholders, assess all shareholders on an equitable basis in order to undertake a program of major capital improvements or major repairs approved by HPD. A mutual housing company must obtain a majority of votes at a meeting of shareholders for this purpose and obtain HPD's approval for the assessment.

(2) **Proceeds of capital assessments.** The proceeds of capital assessments shall be deposited in a blocked bank account and all withdrawals from such account shall be subject to the written approval of HPD. Any surplus remaining in the account upon completion of HPD approved repairs or improvements shall be added to the reserve fund.

(3) **Approval process.** A request for approval of a capital assessment shall be submitted in writing to HPD, and shall specifically indicate the type of capital improvements or repairs required, along with an estimate of probable cost and the timetable for completion of the proposed program. Contracts for completion of the program shall be subject to the appropriate provisions of HPD rules [and regulations], and shall include a provision that the acceptance of all work is subject to the approval of HPD.

(g) **Conflicts of interest prohibited in mutual housing companies.** No officer or member of the Board of Directors or their immediate family:

(1) shall be or become interested directly or indirectly in any manner whatsoever in any business dealing with the

mutual housing company except for resale of shares of their own apartments.

(2) shall act as attorney, accountant, managing agent, broker or employee for any person, firm or corporation interested directly or indirectly in any manner whatsoever in business dealings with the mutual housing company;

(3) shall accept any valuable gift, whether in the form of service, loan, thing or promise, or any other form from any person, firm or corporation which to his or her knowledge, is interested directly or indirectly, in any manner whatsoever, in business dealings with the mutual housing company.

(4) Any deviation from the above requires prior written approval of HPD.

(h) **Annual meetings and elections.**

(1) The Board of Directors of a mutual housing company shall hold regular meetings for the conduct of business. In addition, an annual meeting for the election of directors shall be held at a time and place, and in the manner prescribed by the mutual housing company's by-laws.

(2) (i) All elections of directors for a mutual housing company that has not been refinanced under §223(f) of the National Housing Act must be supervised by an independent election company or the mutual housing company's attorney and/or accountant. Prior to conducting the election, the mutual housing company must notify HPD in writing of the name of the independent election company, or the alternate supervisor of the election, and of the intended election procedures.

(ii) A mutual housing company may request a waiver from the requirements of subparagraph (i) of paragraph two of this subdivision by making a written submission at least sixty days prior to the election of directors to the Assistant Commissioner of Housing Supervision.

(iii) When the cost of an independent election company meets the dollar threshold, the contract between the independent election company and the mutual housing company will require HPD's approval in accordance with §3-07 of this chapter.

(i) **Voluntary dissolution.**

(1) Subdivisions two and three of section 35 of the Private Housing Finance Law, with respect to City-aided limited-profit housing companies, provides as follows:

"A company aided by a loan made after [May 1, 1959] may voluntarily be dissolved, without the consent of [HPD], not less than twenty [(20)] years after the occupancy date upon payment in full of the remaining balance of principal and interest due and unpaid upon the mortgage or mortgages and of any and all expenses incurred in effecting such voluntary dissolution. Upon such dissolution, title to the project may be conveyed in fee to the owner or owners of its capital stock or to any corporation designated by it or them for the purpose, or the company may be reconstituted pursuant to appropriate laws relating to the formation and conduct of corporations, provided, however, that prior to any such dissolution and conveyance or reconstitution, payment shall be made of all current operating expenses, taxes, indebtedness and all accrued interest thereon and the par value of and accrued dividends on the outstanding stock of such company. If after making such payments, and after conveyance of the project, a surplus remains in the treasury of the company, such surplus . . . shall upon dissolution, be paid into the general fund of the [City of New York]. After such dissolution and conveyance, or such reconstitution, the provisions of [Article II of the Private Housing Finance Law] shall become and be inapplicable to any such project and its owner or owners and any tax exemption granted with respect to such project pursuant to [§33 of the Private Housing Finance Law] shall cease and terminate."

(2) **Notice of Intent for Rental Companies.** A rental housing company intending to dissolve and/or reconstitute pursuant to §35, shall submit to HPD no later than 365 days prior to the anticipated date of dissolution and/or

reconstitution, a notice of such intention ("Notice of Intent") which shall contain the following information and supporting documents:

(i) Name and address of the housing development;

(ii) Name and business address of the beneficial and legal owner(s) other than limited partners and stockholders;

(iii) Name and address of proposed transferee, if property is being sold or transferred and the proposed date of any such transfer;

(iv) A current rent roll reflecting rents last ordered by HPD and/or by HUD including surcharges, subsidy and other special charge data;

(v) A list of tenants who are presently receiving rent subsidies which may be discontinued as a result of dissolution and the proposed rents to be charged such subsidy recipients after dissolution;

(vi) A copy of any applicable documents relating to the rental development, including, but not limited to, the urban renewal plan, the plan and project, the deed or lease, the land disposition agreement, any applicable Board of Estimate or City Council resolution and the temporary certificate of occupancy and permanent certificate of occupancy, or any other documents requested by HPD; and

(vii) A list of all State, municipal and/or federal financial assistance or subsidies received by the housing development (such as low income housing tax credits, tax exempt bond financing, interest reduction subsidy under Section 236 of the National Housing Act, as amended, project-based Section 8 under the United States Housing Act of 1937, as amended, housing choice vouchers, rent supplement, J-51 or other tax exemption and/or abatement benefits, and flexible subsidy grants) and the amount thereof.

All such documents shall also be given to the Tenants Association as well as to a management office on site (or, if there is no management office on site, to a management office located within the city of New York). At such management office, such documents shall be made available to any tenant of such rental housing company and/or his or her representative upon request.

The owner shall notify all tenants by ordinary mail or distribution at or under each apartment door and by posting a copy in a conspicuous place on the lobby floor of each building affected of its intent to dissolve or reconstitute at or about the same time as the delivery of the notice of intent to HPD.

(3) **Public information notice for rental companies.** At least sixty (60) days prior to the proposed date of dissolution and/or reconstitution, a rental housing company intending to dissolve and/or reconstitute shall serve a Notice of a Public Meeting by distribution under each apartment door; shall post such notice in three (3) conspicuous locations within the lobby and elevator areas of each building; and shall send such notice by certified or registered mail to each of the following:

(i) Commissioner and the Assistant Commissioner of Housing Supervision, and

(ii) The president or chairperson of the Tenants Association.

Such notice shall specify the day, date, time and location of a public information meeting which shall be held to inform tenants of the proposed dissolution and/or reconstitution of the housing company. If the public information meeting is outside the community district in which the housing company is located, the owner must provide transportation for tenants. Such public information meeting shall be held not less than 10 nor more than 20 days after service of the Notice upon the parties set forth above.

(4) Public information meeting for Rental Companies. Pursuant to the Notice as specified above, the rental housing

company shall conduct at least one public information meeting with the tenants. At such meeting representatives of the rental housing company shall inform the tenants of the rental housing company's intention to dissolve and/or reconstitute; the rental housing company's removal from HPD's jurisdiction and, if applicable, its subsequent registration with the New York State Division of Housing and Community Renewal (DHCR) for the purpose of rent stabilization pursuant to the applicable DHCR rules and regulations; whether rent stabilization will be applicable; prospective changes in ownership and any other relevant information regarding future plans for the rental housing company affecting the tenants. A question and answer period shall be conducted. The Tenants Association may invite local elected officials or other representatives to participate.

(5) Where applicable, the rental housing company shall provide evidence that it has appropriately preregistered all apartments with DHCR, indicating current rents for each apartment and services provided to the tenants as of the date of dissolution and/or reconstitution.

(6) **Mutual housing companies-special meeting.** A board of directors of a mutual housing company intending to dissolve and/or reconstitute pursuant to §35 shall call a special meeting in conformance with the mutual housing company by-law requirements for the purpose of ascertaining shareholder interest in dissolution. The secretary of the board of directors shall submit to HPD a certified resolution stating that not less than a majority of the dwelling units represented at such special meeting approved an expenditure of funds in a specified amount for the purpose of preliminary exploration of dissolution and/or reconstitution, unless the by-laws of the company mandate a greater affirmative vote. Each dwelling unit shall be entitled to one vote regardless of the number of shares allocated to such dwelling unit, the number of shareholders holding such shares, or the provisions regarding voting in such mutual housing company's certificate of incorporation or by-laws. Said resolution shall include language as follows:

"This resolution authorizes the board of directors to take steps necessary to ascertain the desirability of dissolution and/or reconstitution. This resolution authorizes the expenditure of $_____ for such investigation, and notifies the shareholders that there are Private Housing Finance Law requirements for dissolution. This resolution also advises the shareholders that the New York State Department of Law requirements must be met prior to actual dissolution and/or reconstitution."

A certified copy of the resolution shall be submitted to HPD within seven (7) business days after such vote. Expenditure of funds authorized above shall require prior written approval of HPD, if the dollar amount for any one retainer, agreement, or contract exceeds $15,000 for mutual housing companies with fewer than five hundred (500) dwelling units and $30,000 for those with five hundred (500) or greater.

(6-a) **Special meeting to authorize preparation of an offering plan and filing of Notice of Intent.**

(i) Pursuant to the applicable notice period in the mutual housing company's by-laws, a special meeting shall be convened by the board of directors of the mutual housing company to authorize the (A) preparation and submission to the office of the Attorney General of the State of New York of a private cooperative or condominium offering plan for the housing project, and (B) submission to HPD of the mutual housing company's notice of its intention to dissolve and/or reconstitute ("Notice of Intent"). Eligible voters for purposes of a quorum and for a vote on preparation and submission of such plan and such Notice of Intent shall be persons named on the stock certificate. Preparation and submission of such plan and such Notice of Intent requires approval of two-thirds (2/3) of the dwelling units in such mutual housing company. Each such dwelling unit shall be entitled to one vote regardless of the number of shares allocated to such dwelling unit, the number of shareholders holding such shares, or the provisions regarding voting in such mutual housing company's certificate of incorporation or by-laws.

(ii) The Notice of Intent shall be submitted to HPD no later than 365 days prior to the anticipated date of dissolution and/or reconstitution. It shall be accompanied by evidence of the appropriate shareholder vote and resolution authorizing the preparation and submission of the offering plan and such Notice of Intent in accordance with subparagraph (i) of this paragraph and shall contain the following information and supporting documents:

(A) Name and address of the housing development;

(B) Name and address of proposed transferee, if property is being sold or transferred and the proposed date of any such transfer;

(C) A current rent roll reflecting carrying charges last ordered by HPD and/or by HUD including surcharges, subsidy and other special charge data;

(D) A list of cooperators who are presently receiving subsidies which may be discontinued as a result of dissolution and the proposed carrying charges to be charged such subsidy recipients after dissolution;

(E) A copy of any applicable documents relating to the mutual development, including, but not limited to, the urban renewal plan, the plan and project, the deed or lease, the land disposition agreement, any applicable Board of Estimate or City Council resolution and the temporary certificate of occupancy and permanent certificate of occupancy, or any other documents requested by HPD. Such documents shall also be given to a management office on site (or, if there is no management office on site, to a management office located within the city of New York). At such management office, such documents shall be made available to any cooperator of such mutual housing company and/or his or her representative upon request; and

(F) A list of all State, municipal and/or federal financial assistance or subsidies received by the housing development (such as low income housing tax credits, tax exempt bond financing, interest reduction subsidy under Section 236 of the National Housing Act, as amended, project-based Section 8 under the United States Housing Act of 1937, as amended, housing choice vouchers, rent supplement, J-51 or other tax exemption and/or abatement benefits, and flexible subsidy grants) and the amount thereof;

All such documents shall also be given to a management office on site (or, if there is no management office on site, to a management office located within the city of New York). At such management office, such documents shall be made available to any cooperator of such mutual housing company and/or his or her representative upon request.

Such mutual housing company shall notify all cooperators by ordinary mail or distribution at or under each apartment door and by posting a copy in a conspicuous place on the lobby floor of each building affected of its intent to dissolve or reconstitute at or about the same time as the delivery of the Notice of Intent to HPD.

(7) **Special meeting to authorize dissolution and/or reconstitution of mutual housing companies.** Pursuant to the applicable notice period in the mutual housing company's by-laws, a special meeting to authorize dissolution and/or reconstitution shall be convened by the board of directors of the mutual housing company after the acceptance by the office of the Attorney General of the State of New York of the filing of the offering plan pertaining to the proposed transfer from the mutual company to a private cooperative or condominium corporation. Eligible voters for purposes of a quorum and for the vote on dissolution and/or reconstitution shall be persons named on the stock certificate. Dissolution and/or reconstitution of the mutual housing company requires approval of two-thirds (2/3) of the dwelling units in such mutual housing company. Each such dwelling unit shall be entitled to one vote regardless of the number of shares allocated to such dwelling unit, the number of shareholders holding such shares, or the provisions regarding voting in such mutual housing company's certificate of incorporation or by-laws.

(7-a) **Conduct of special meetings.**

(i) Special meetings required pursuant to paragraphs six, six-a and seven of this subdivision shall be conducted no more frequently than once every twelve months.

(ii) Special meetings required pursuant to paragraphs six-a and seven of this subdivision shall be conducted by an independent election company. At least sixty days prior to conducting such special meetings, the mutual housing company must notify HPD in writing of the name of the independent election company, and of the intended special

meeting procedures, and HPD must issue its approval in writing of such independent election company and of the intended special meeting procedures before such special meeting can take place.

(iii) If the cost of any special meeting required pursuant to paragraphs six, six-a and seven of this subdivision exceeds $15,000 in housing companies with fewer than five hundred (500) dwelling units or $30,000 in housing companies with at least five hundred (500) dwelling units, the contracts will require HPD's prior written approval. With respect to special meetings required pursuant to paragraphs six-a and seven, the independent election company must submit proof to HPD that the requirements of this subparagraph have been met.

(8) **Operating Documents of Mutual Housing Companies.** Each mutual housing company shall provide in any voting provisions in its certificate of incorporation and by-laws that in the shareholder votes required pursuant to paragraphs six, six-a and seven of this subdivision, each dwelling unit shall be entitled to one vote regardless of the number of shares allocated to such dwelling unit, the number of shareholders holding such shares, or any other provisions regarding voting in such mutual housing company's certificate of incorporation or by-laws.

(9) **Waiting list notifications.** Both rental and mutual housing companies shall submit an affidavit certifying that each applicant on such housing company's apartment waiting list has been advised in writing of the proposed dissolution and/or reconstitution and that fees have been returned to said applicants prior to dissolution and/or reconstitution. Further, the affidavit shall state that any funds unreturned for lack of proper address or other technicality shall be escrowed and returned upon applicant's request.

(10) **Payment of mortgage(s) and other indebtedness by rental and mutual housing companies.** On the date set for dissolution and/or reconstitution and mortgage prepayment, the housing company shall submit to HPD payment in a form approved by HPD for all principal, interest, supervisory fees, surcharges, amounts payable pursuant to residual receipt notes and any other amounts which may be owing to the City of New York, including any surplus due to be paid into the general fund of the City pursuant to Private Housing Finance Law Article II, §35(3).

(i) At least sixty (60) days prior to the date set for dissolution and/or reconstitution and mortgage prepayment, a schedule of all accounts payable, taxes due and any other indebtedness, including the par value and accrued dividends on outstanding stock (or, in the case of a partnership, accrued distributions) shall be submitted to HPD for its review and written approval; said schedule to be prepared and certified to HPD by an independent certified public accountant acceptable to HPD. Such schedule shall contain a listing of all items of indebtedness, the amount thereof, the source of payment thereof and the anticipated date of payment, plus the amount of money anticipated to be paid to the City from the remaining surplus. At the time of dissolution and/or reconstitution, such certified schedule shall be amended to reflect the current status of all accounts, and the exact amount, if any, owed to the City. Housing company funds may not be used for the purpose of prepayment of the mortgage debt.

(ii) Accounts payable may include monies owed on executed contracts for repairs or capital improvements, subject to HPD approval. Any contract for capital improvement or repair work in an amount in excess of $15,000 executed within ninety (90) days prior to submission of a Notice of Intent to dissolve and/or reconstitute other than contracts for projects subject to HUD supervision must have a statement attached to the contract submission, sent to HPD for approval, advising HPD that the housing company is contemplating dissolution and/or reconstitution at the time of said submission of the contract. Failure to submit such contracts may result in exclusion of their cost in calculating surplus.

(iii) No legal and accounting fees or other costs in a rental development associated with dissolution and/or reconstitution shall be charged to the housing company.

(iv) Where applicable, the housing company shall submit evidence of payment of any relevant mortgages.

(11) **Issuance of letter of no objection to rental and mutual housing companies.** Upon payment by certified check or checks from a New York clearing house bank of all amounts owing to the City and/or other mortgagee and certification of compliance with all applicable rules and provisions of law relating to dissolution and/or reconstitution,

HPD shall issue a Letter of No Objection to the housing company's dissolution and/or reconstitution.

(12) **Notification to New York City Department of Finance.** On the date of dissolution and/or reconstitution, both rental and mutual housing companies shall send written notification to the Department of Finance that the property owned by the housing company is to be restored to a full taxpaying position effective the date of dissolution and/or reconstitution. A copy of such notice shall be sent to the HPD Division of Housing Supervision.

(13) **Notification to senior citizen rent increase exemption (SCRIE) program.** No later than ten days after the date of dissolution and/or reconstitution, both rental and mutual housing companies shall send written notification to the HPD Division of Housing Supervision's SCRIE unit of said dissolution and/or reconstitution and to all SCRIE recipients advising them of their status after dissolution and/or reconstitution.

(14) **Terminology Used by Mutual Housing Company.** Whenever a mutual housing company uses the term "dissolution," it shall include reconstitution where such housing company elects to reconstitute upon dissolution of such housing company. Furthermore, where the mutual housing company's board or the sponsor of a cooperative conversion of a mutual housing company represents in its cooperative offering plan or other documents that such mutual housing company is amending and/or restating its certificate of incorporation and/or that the shareholders will be voting on a voluntary reconstitution and conversion from a limited-profit mutual housing company to a private cooperative, section 35 of the Private Housing Finance Law designates these actions as a dissolution and reconstitution of the former limited-profit housing company cooperative.

(j) **Proxies, Direct Mail Ballots and Absentee Ballots.**

(1) With HPD's approval, a mutual housing company may require a standard form and procedure for the casting of proxies or absentee ballots in any matter requiring a shareholder vote.

(2) Notwithstanding anything to the contrary contained herein, in any vote conducted pursuant to paragraphs six-a or seven of subdivision (i) of this section, voting by proxy shall not be permitted. However, HPD may approve, in writing, a standard form direct mail ballot for transmission to the independent election company engaged to conduct any votes pursuant to paragraphs six-a and seven of subdivision (i) of this section. Such standard form of direct mail ballot shall be invalidated by the shareholder executing such ballot if such shareholder appears to vote in person in any vote conducted pursuant to paragraphs six-a or seven of subdivision (i) of this section.

NOTE

1. Statement of Basis and Purpose in City Record July 14, 2006:

The rule amendments clarify certain dissolution procedures for City-aided limited-profit housing companies. First, the requirement that dissolution documents submitted by a limited-profit housing company also be submitted to the Tenants Association has been enhanced by also requiring that such documents be given to either a management office on site, or, if there is no management office on site, to a management office in New York City. This amendment is to ensure that such documents are still accessible to tenants at large, as well as to their representatives in developments with a Tenants Association. Finally, it allows for distribution at or under each door of a dwelling unit in case certain doors do not have space beneath them to slip documentation. The second amendment makes the dollar thresholds for HPD approval of the funding of the feasibility study the same as they are currently for contracts in general. The third amendment requiring that two of the special meetings (first to authorize preparation of an offering plan and filing of a Notice of Intent, and second to authorize withdrawal from the Mitchell-Lama Program after the acceptance by the Attorney General's Office of the offering plan) relating to the dissolution of a mutual housing company be conducted by an independent election company ensures that these meetings are conducted in a fair and professional manner. Since the votes taken at such meetings are often contentious and have a huge impact on the cooperators, it is critical that they be supervised and regulated by a fair and impartial party.

2. Statement of Basis and Purpose in City Record July 14, 2006: The amendments are intended to clarify the dissolution procedures for mutual housing companies. The proposed amendments provide that the special meeting for shareholders to vote to authorize the dissolution or reconstitution of such housing companies cannot occur until after the

acceptance by the Attorney General's Office of the filing of the offering plan for the proposed conversion to a private cooperative or condominium corporation. The Attorney General's Office has informed HPD that under the Martin Act, it must accept a comprehensive offering plan before a final vote is taken by shareholders to dissolve and reconstitute a Mitchell-Lama cooperative into a private cooperative. The rule change ensures that HPD's Mitchell-Lama rules are in conformity with this requirement.

3. Statement of Basis and Purpose in City Record Aug. 10, 2009: The first seven amendments and the ninth amendment correct technical matters in the current rules as well as conform the appeals process for succession cases to current practices. The eighth amendment provides that a mutual housing company's certificate of incorporation must be in conformity with State law and HPD rules and that any provision thereof that doesn't meet this requirement will be deemed null and void. The HPD rules already contain a similar provision regarding a mutual housing company's by-laws, rules and regulations and it logically follows that the certificates of incorporation should be subject to the same limitations. The eighth amendment also reiterates the statutory requirement that HPD must approve amendments to a mutual housing company's certificate of incorporation. The tenth and fourteenth amendments require both rental and mutual housing development companies to provide information regarding tax exemptions and other governmental subsidies along with a notice of intent to leave the Mitchell-Lama program. The rest of the rule amendments address voting procedures for buyouts from the Mitchell-Lama Program. First, they would limit the simple majority feasibility study vote, the 2/3 majority vote for preparation and submission of the offering plan and notice of intent, and the final 2/3 majority vote for dissolution and/or reconstitution, to one vote per dwelling unit regardless of the number of shares allocated to such dwelling unit, the number of shareholders holding such shares or the provisions regarding voting in such mutual housing company's certificate of incorporation or by-laws. This is similar to what the New York State Division of Housing and Community Renewal already requires for State-aided Mitchell-Lama mutual housing company developments. It also would eliminate any ambiguity created by the wording of the current rule since the Business Corporation Law otherwise allows a cooperative to specify in its operating documents the proportion of shares or votes of shares that can authorize dissolution. The amendments also would limit the frequency of any one of these votes to once every twelve months and clarify the fact that HPD must approve the intended special meeting procedures and the proposed independent election company before the special meeting can be held. They also require mutual housing companies to submit these procedures and their proposed independent election company at least sixty days prior to the special meeting date so that HPD has time to conduct the requisite review. The next amendment mandates that a mutual housing company's operating documents be amended to reflect that these dissolution votes must be conducted on a per dwelling unit basis. The final amendment prohibits the use of proxies in the votes for preparation and submission of the offering plan and notice of intent, and the final 2/3 majority vote for dissolution and/or reconstitution, unless HPD has approved, in writing, a standard form direct mail ballot for transmission to the independent election company engaged to conduct any votes pursuant to paragraphs six-a and seven of subdivision (i) of this section. Since the dissolution or reconstitution of a Mitchell-Lama mutual housing company has an enormous impact on the future of each of its residents, it is important that each dwelling unit get an equal say in the matter, particularly because the allocation of shares in a Mitchell-Lama mutual housing company does not have the same financial implication as it does for unregulated cooperatives. Furthermore, these votes should be limited in frequency so that they do not create a continuously stressful environment for shareholders who reside in such developments or excessively burden the finances of the housing companies. Finally, the prohibition against the use of proxies in certain votes, except as such standard form direct mail ballots might be authorized by the supervising agency, ensures that such votes will be fair and equitable and that shareholders are not unduly pressured to vote in a certain manner.

CASE AND ADMINISTRATIVE NOTES

¶ 1. A landlord may leave the Mitchell Lama program after a 20 year period, by paying the balance due on its mortgage and certain expenses of dissolution. The landlord must also apply to DHCR for permission to dissolve the rental housing company. Tenants, whose rents would be greatly affected by such dissolution, are entitled to notice of the application. Where such an application is pending before DHCR, the proper course of action for aggrieved tenants is to oppose that action, and then, if necessary, bring an Article 78 proceeding challenging the administrative determination.

In other words, the tenants may not bring a plenary proceeding which, in effect, would be an end run around the administrative proceeding. Davis v. Waterside Housing Co., N.Y.L.J. Mar. 19, 2001, page 25, col. 2 (Sup.Ct. New York Co.).

Rules of the City of New York

28 RCNY 3-15

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-15 Partnerships.

(a) **Partnership agreements.** Certain housing companies are permitted to become partners of partnerships formed pursuant to Section 16 of the Private Housing Finance Law. Partnership Agreements and amendments thereto are subject to prior approval in writing by HPD. Admission, withdrawal or retirement of general partners is [also] subject to the prior written approval of HPD.

(b) **Partnership distributions.** All distributions of any partnership organized pursuant to §16 of the Private Housing Finance Law are subject to the written approval of HPD. All such distributions must be in accordance with the rules of HPD and with the requirements of the Private Housing Finance Law.

(c) **Related party transactions.** In the event that a housing company employs or contracts with any person or entity in which any partner of such a partnership is directly or indirectly an interested party, the partnership shall disclose such fact to HPD.

(d) **Financial records.** A partnership formed pursuant to §16 of the Private Housing Finance Law shall furnish to HPD all financial and other reports required by HPD.

(e) **Removal of directors.** In the event that HPD exercises its right to remove the directors of a housing company, the housing company as a general partner shall have the right to terminate the exercise of all rights and powers by any other general partner and to exclusively exercise all rights and powers in connection with the project so long as HPD-appointed directors continue to serve.

(f) **Transfers of interests.** All transfers of general partnership interests are subject to the prior written approval of HPD. HPD may require, as a condition of admission or substitution of general partners all such information regarding any proposed new general partner as it deems necessary.

28 RCNY 3-16

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-16 Managing Agents Agreements.

(a) **Managing agents agreement required.** All housing companies are required to enter into written agreements for management services which must be approved in writing by HPD. This subdivision (a) applies to all agents, corporate or individual. Managing agent agreements are subject to the provisions of subdivision (e) of §3-13 of this chapter regarding debarment.

(b) **Criteria for selection of managing agent.**

(1) The prospective agent, corporate or individual, must be a real estate broker in good standing duly licensed by the State of New York. Site managers employed by the prospective agent must be certified, by an organization acceptable to HPD, within twelve (12) months after assignment to an HPD-supervised housing development. The certification requirement cannot be waived by transferring the site manager to an alternate HPD-supervised site prior to the end of the twelve month period.

If a housing company elects to undertake self-management of its housing development, it must seek written approval from HPD. The person being employed to perform the role of manager must be approved in writing by HPD. If the manager is an employee of the housing company, he or she is not obligated to have a real estate broker's license. However, the employee-manager must be certified, by an organization acceptable to HPD, within twelve (12) months after his or her initial employment date.

(2) The agent must provide a fidelity bond in an amount and form and with a surety approved by HPD.

(3) The agent shall provide evidence of experience and capability commensurate with the responsibility it seeks to undertake.

(4) The agent may be required to submit a management plan proposing a program conducive to proper maintenance and economic viability of the project, and to harmonious relations among tenant/cooperators, management and the community. The plan shall include, but shall not be limited to, policy regarding deployment of personnel, tenant/cooperator-management relations, tenant/cooperator selection, rent/carrying charge collection procedures, agency reporting procedures, fiscal accountability, physical plant maintenance, equal opportunity measures and security measures. The plan shall take into account the characteristics of the development, its neighborhood and type of tenancy (e.g., senior citizen or handicapped). The plan and its implementation will be considered in determining the agent's employment, renewal and compensation, and will be subject to HPD review and written approval.

(5) The agent must maintain an office or place of business in the metropolitan area at no cost to the housing company where it will keep all books, records, bills and other documents pertaining to the housing company. These records will be available for inspection and review by the owner, HPD or other interested parties as permitted by statute or rules of HPD.

(c) **Term of managing agent's agreement.** (1) Any managing agent's agreement shall be in a form approved by HPD and shall be of no force or effect until the contract has been approved in writing by HPD.

(2) All new managing agent's agreements shall have a term of one (1) year commencing July 1st and terminating on June 30th of the following year. All renewals shall have a similar one (1) year term; provided, however that if a new managing agent agreement commences after July 1st, it still shall terminate on the June 30th following the commencement of such agreement.

(3) Managing agent agreement renewals must be submitted to HPD for written approval.

(4) Any managing agent's agreement shall provide that it is subject to termination without cause upon thirty (30) days written notice by the housing company or HPD. HPD or the housing company shall have the right to immediately terminate any managing agent for cause.

(5) Promptly upon any termination, the managing agent shall turn over to the housing company, all project records, rent rolls, bills, cancelled checks, bank statements, bank books, waiting lists, correspondence, ledgers and all other documents related to or owned by the housing company.

(6) HPD may review the performance of a managing agent at any time and may solicit comments from owners, tenants, and others relating to the performance of the managing agent.

(d) **Managing agent's fee.**

(1) The managing agent's fee will be negotiated by the housing company and will be subject to approval by HPD.

(2) The fee may be further adjusted on a compound basis by a percentage to be established annually by HPD, said percentage may be subject to negotiation by the housing company, but may not exceed the maximum percentage authorized by HPD.

(3) If a new managing agent enters into an agreement with a housing company to replace an existing agent at a development, the maximum fee which can be paid to the new agent will be the fee established for the prior agent, plus any cumulative percentages adjustments which have been approved by HPD, regardless of whether the prior agent was given said increases. The new agreement is subject to negotiation by the housing company within the maximum established above.

(4) If, upon evaluation by HPD, it is determined that an agent's performance has not been satisfactory during the prior year, the agent shall not be entitled to the annual increase in its fee. In its evaluation, HPD will consider comments from the housing company and the Tenants Association but will make the final determination regarding the increase. HPD will advise the housing company in writing at least 30 days prior to the agreement renewal date each year if approval of the annual increase is being withheld and the reasons therefor.

(5) An approved annual increase in the managing agent's fee will become effective on July 1st of each year.

(6) In the event a newly constructed development goes into occupancy, the managing agent's fee shall be negotiated by the housing company, but in no event shall it exceed the highest fee plus cumulative increases for a development of comparable size and nature already in existence within the program. Comparability will be determined solely by HPD.

(7) If HPD disapproves an annual increase for a managing agent, HPD may within a reasonable period of time meet with the representatives of the housing company and the managing agent to discuss the reasons for HPD's dissatisfaction. The managing agent shall take such steps as deemed necessary by HPD to satisfy HPD requirements. If the agent's performance remains unsatisfactory, HPD may, upon notice to the housing company, terminate the managing agent's agreement.

(e) **Duties and responsibilities of managing agent.** The principals of the managing agent shall devote a reasonable percentage of their time in supervising management duties of their subordinate staff. Said management duties shall include, but shall not be limited to, the following:

(1) investigate, hire, pay, supervise and discharge all personnel necessary to be employed in order to properly maintain and operate the development in accordance with an operating schedule, job standards and reasonable and necessary wage rates approved by the housing company. Such personnel shall be considered employees of the housing company and compensation for the services of such employees shall be considered an operating expense of the company, provided, however, that in each development the managing agent shall employ and shall compensate out of its fee one or more responsible individuals as approved by HPD and the housing company whose job it shall be to carry out the responsibilities of the managing agent at the premises;

(2) prepare tax records, including withholding and social security records for the employees of the development, and shall administer required programs of workers' compensation and other employee liability insurance programs;

(3) collect all monthly rents, carrying charges and all other charges due from tenant/cooperators both residential and commercial, and from other users or concessionaires; and take such action with respect thereto as the owner may authorize;

(4) cause the buildings and grounds of the development, and all equipment appurtenant thereto to be maintained according to standards acceptable to the housing company and to HPD;

(5) subject to the approval of the owner and in accordance with HPD rules, contract for water, electricity, gas, fuel oil, extermination and other necessary services;

(6) submit tenant/cooperator applications to HPD for approval; maintain waiting lists in accordance with HPD rules and utilize such lists in the re-rental of vacated apartments or resale of shares in a mutual housing company; perform all services in connection with the processing of applications resulting from such reletting or resale;

(7) diligently undertake the renting of any parking spaces, commercial and non-dwelling space in the project, arranging for the execution of such leases or permits as may be required;

(8) undertake recertification of tenant/cooperator income as required by HPD or by federal regulations;

(9) prepare and submit annual operating budgets, monthly operating reports, rent rolls, vacancy reports, rent arrears reports, surcharge tabulation sheets, equal opportunity reports, HUD excess income reports, where applicable, and any other documents required by the housing company or HPD;

(10) maintain books and records relating to the development;

(11) establish operating bank accounts and make deposits and withdrawals in such account as directed by the housing company; maintain a blocked reserve account as required by HPD and invest the funds of such account in accordance with HPD rules to attain the maximum return on investment;

(12) advise the housing company and HPD of projected needs for repairs and replacements at least once each year; review physical inspection reports and effect compliance;

(13) submit contracts and retainers for HPD approval in accordance with HPD rules; (14) process tax matters in a timely manner;

(15) conduct an annual inspection of all apartments for the purpose of identifying unreported electrical or other equipment (air conditioners, freezers, washing machines and dryers), observing the physical condition of the apartments, and ascertaining compliance with the rules and regulations of the project, HPD and HUD, where applicable, and report its findings in writing to the Owner and HPD;

(16) receive, record and respond to all service requests made by tenants in a timely manner; and

(17) carry out such other duties and responsibilities as may be stipulated by the housing company or HPD and as may be included in the management agreement.

(f) **Allocation of management expenses.** In order to establish a uniform allocation of management expenses between the managing agent and the housing company, the below listed charges are allocated as follows:

[See tabular material in printed version]

(g) **Leasing of commercial space, commissions.** In the leasing of commercial space, payment of real estate brokerage commission shall be solely in accordance with the following rules:

(1) No brokerage commissions shall be permitted for that part of a lease term in excess of 20 years.

(2) No brokerage commissions shall be permitted for:

(i) tax payments deemed to be additional rent and paid by the tenant,

(ii) options to renew for an additional term of years, unless such option shall have been duly exercised in accordance with the terms of the lease or

(iii) payments for items not included in basic rent, including, but not limited to, utilities and costs of improvements made by the owner.

(3) Maximum brokerage commissions shall be permitted in accordance with the following schedule, based on the rentals charged the tenant:

[See tabular material in printed version]

(4) Brokerage commissions earned and due the broker, shall be paid by the housing company in an amount not to exceed the dollar amount of the non-refundable security held by the housing company at the time the lease is approved

by HPD. The balance due, if any, shall be paid when the tenant takes possession of the premises in accordance with the terms of the lease.

(5) Brokerage commissions earned and due the broker, where the tenant is a bank, supermarket chain or where the tenant's latest published credit rating is "A" or better and no security deposit is required under the lease, shall be paid by the housing company when the lease is approved by HPD.

(6) When requested by HPD, the broker shall submit trade references, financial statements and any other credit information which shall be properly authenticated in order to determine the credit-worthiness of the tenant.

(7) The brokerage agreement shall constitute the complete understanding between the housing company and the broker. There shall be no payments to the broker beyond those authorized by such agreement.

CASE AND ADMINISTRATIVE NOTES

¶ 1. A tenant's persistent and continuous refusal to grant the management company periodic access to his apartment, as required by the statute, can be grounds for eviction. The court upheld HPD's determination that the tenant was not entitled to cure the violation. Fitzgerald v. New York City Dept. of Housing Preservation and Development, 1 A.D.3d 285, 767 N.Y.S.2d 589 (1st Dept. 2003).

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-17

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-17 Housing Company Responsibilities to Tenant/Cooperators.

(a) **Tenants Association.** (1) All rental housing companies shall recognize a duly constituted Tenants Association that will be representative of the tenant body as a whole.

(2) A Tenants Association shall be duly constituted when a petition is signed by tenants representing no less than forty (40%) percent of the dwelling units. A group seeking recognition on the basis of such petition must submit the original petition to HPD and a copy to the housing company, and must arrange for the posting of a notice in each building of the development advising the other tenants of their intention to seek recognition.

If HPD determines that the proposed group has been duly constituted, it will advise the housing company in writing of its decision to recognize the group. In the event other tenants representing no less than forty (40%) percent of the dwelling units in the development seek recognition of an alternative group, the housing company shall provide for an election to determine which shall be the duly constituted Tenants Association. In such an election each dwelling unit in the development shall be accorded one vote.

(3) Upon recognition of a Tenants Association, an election of officers must be held and the names of the officers of said association shall be furnished to HPD.

(4) HPD reserves the right to review and approve the by-laws and constitution of a Tenants Association.

(5) Members or officers of the Tenants Association must occupy a dwelling unit at the rental housing company development represented by such Tenants Association as his or her primary place of residence.

(b) **Availability of housing company records.** (1) The rental housing company shall provide the Tenants Association with copies of operating budgets and financial statements of the housing company within 30 days after said documents are filed with HPD.

(2) In a rental development which does not have a duly constituted and recognized Tenants Association, the rental housing company shall maintain copies of the operating budget and financial reports in the management office on site. If there is no office on site, the documents shall be made available upon request.

(3) Any tenant/cooperator or any Tenants Association's duly authorized representative may audit the books of the housing company during normal business hours and shall have access to the financial records upon which such financial statement is based.

(4) In a mutual housing company, the operating budget and financial statements shall be supplied to all shareholders.

(c) **Consultation.** The housing company or its duly authorized representative shall meet on a regular basis with representatives of a Tenants Association to discuss matters relating to the development. Such meeting shall take place at the development at a time mutually convenient to the Tenants Association and the housing company, and shall be held on a monthly basis unless the Tenants Association chooses to meet on a less frequent basis.

(d) **Availability of community space.** The housing company or its managing agent shall not unreasonably withhold permission for use of the development's community space from its residents. A reasonable charge may be made for janitorial or related services. A deposit may be required for the use of the space which is refundable if the premises is free of acts of vandalism.

The housing company shall, in consultation with the Tenants Association, establish priorities for the use of the community space.

If other organizations of tenants exist within a housing development, such as, for example, a senior citizen's club or garden club, the housing company through its managing agent, should make every effort to accommodate the needs of these organizations by providing an opportunity for use of the community space available. While the Tenants Association has first priority with regard to meeting space, it should not be to the exclusion of all other tenant organizations in the development.

There is no obligation for the housing company to make community space available for fund-raising events or for organizations whose membership consists primarily of non-tenants. The use of the community room for these purposes should be at the discretion of the housing company in consultation with the Tenants Association.

28 RCNY 3-18

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-18 Lease Termination and Renewals.

(a) **Preliminary notice of grounds of eviction, administrative hearing and certificate of eviction.** Except as otherwise provided in this subdivision, no eviction proceeding based upon a holdover or a breach of the terms of the lease or occupancy agreement shall be initiated by a housing company against a residential tenant/cooperator without the issuance of a certificate of eviction by HPD following an administrative hearing by an HPD designated hearing officer. The hearing officer's decision shall be final without recourse to an administrative appeal. Notwithstanding the foregoing, such hearing and certificate of eviction shall not be required for any eviction proceeding based upon non-payment of rent/carrying charges or any sum which constitutes rent or additional rent pursuant to the applicable lease or occupancy agreement. Furthermore, at HPD's sole discretion, such hearing and certificate of eviction may be waived in accordance with subdivision (e) of this section.

To set an eviction hearing the housing company shall notify HPD in writing of the facts which it contends justify eviction, together with an affidavit stating that a preliminary notice of grounds for eviction has been served upon the tenant/cooperator as follows:

(1) The notice shall be sent to the tenant/cooperator by regular first class mail, and by certified or registered mail, return receipt requested; and

(2) A copy of the notice shall also be served by personal delivery to the tenant/cooperator; or by delivery to a person of suitable age and discretion occupying the apartment in question; or if admittance cannot be obtained and such person cannot be found, by affixing a copy upon the door or placing a copy under the door of the apartment.

(3) The notice may be served simultaneously with any notice to cure which may be required by the tenant/cooperator's lease/occupancy agreement, and shall advise the tenant/cooperator of the following:

(i) The specific charges against him or her;

(ii) that he or she has the opportunity to appear before an HPD hearing officer to deny or explain the charges against him or her;

(iii) that he or she may retain counsel to represent him or her at a hearing;

(iv) that the findings of the HPD hearing officer, should a hearing take place, may be determinative as to the factual issues.

(b) **Administrative hearing.** If, after ten days from the date of service of the preliminary notice of grounds for eviction, the tenant/cooperator has not cured the breach of his or her lease/occupancy agreement, the housing company may request HPD to proceed to schedule a hearing at which the housing company shall present to the hearing officer its charges against the tenant/cooperator. The housing company shall advise the tenant/cooperator of the date and place of the hearing in the same manner prescribed for the service of the preliminary notice of grounds for eviction as specified in paragraphs one and two of subdivision (a) of this section.

If the tenant/cooperator fails to appear at the designated hearing, he/she shall be advised by the hearing officer, by regular first class mail, that unless a request to reopen the matter is received by the hearing officer within a designated period of time, a decision shall be rendered by the hearing officer based upon the information provided by the housing company and that such decision shall be final.

All witnesses at the hearing shall be sworn to tell the truth. Witnesses may be examined and cross-examined by either party and by the hearing officer. The hearing officer may accept any evidence which he or she deems to be relevant and material. A tape recording of the hearing shall be made by the hearing officer, and the hearing officer shall arrange for a transcript of the tape upon the written request of either party, at the expense of the party requesting said transcript.

In the event the hearing officer finds grounds for the eviction, he or she shall issue a certificate authorizing the housing company to commence summary proceedings for such eviction of the tenant/cooperator, stating the reasons for his or her decision. At the soll discretion of the hearing officer, such decision may also contain a probationary period or opportunity to cure. A copy of said certificate shall be sent to the tenant/cooperator and to his or her attorney, if any, by regular first class mail. Service of process for summary proceedings may be made simultaneously with or subsequent to the service of such certificate.

Acceptance of rent/carrying charges after the commencement of eviction proceedings, pursuant to the administrative hearing process, shall be without prejudice.

Notwithstanding anything to the contrary contained in this subdivision (b), a breach of lease or occupancy agreement involving hazardous conditions, violent or disruptive behavior, fraud or illegality shall not be subject to any opportunity to cure by the tenant/cooperator.

(c) **Appeals.** There is no administrative appeal from the determination of the hearing officer. The decision of the hearing officer is subject only to review by commencing an action pursuant to Article 78 of the Civil Practice Law and Rules.

(d) **Summary proceedings.** The above procedures do not apply to summary proceedings for non-payment of rent, carrying charges and any other monetary obligations of the tenant/cooperator to the housing company pursuant to his or her lease or occupancy agreement or any other agreement between the tenant/cooperator and the housing company with

respect to ancillary services, except as specified in subdivision (a) of this section.

(e) **Emergency evictions.** The above procedures may be waived at the sole discretion of HPD in any case in which HPD determines that the health or safety of the tenant/cooperators of a development is jeopardized by another tenant/cooperator or his or her family, members of his or her household or visitors to his or her premises.

(f) **Applicability.** The above procedures shall be the sole requirements to commencement of eviction proceedings and it is the express intention of HPD that no other section of these rules is applicable.

(g) **Lease/occupancy agreement renewals.** The housing company shall offer a renewal of a tenant/cooperator's lease/occupancy agreement between ninety (90) and one hundred twenty (120) days prior to the expiration of his or her existing lease/occupancy agreement, unless the tenant/cooperator shall have materially breached the lease/occupancy agreement, shall be ineligible for continued occupancy of his or her apartment, or shall otherwise be found to be a nuisance. Such renewal lease/occupancy agreement shall be for a minimum of a one-year term.

If a housing company wishes to refuse to renew a tenant/cooperator's lease/occupancy agreement, it shall notify the tenant/cooperator with respect to its reason for refusing to renew in a notice to be served upon the tenant/cooperator in the same manner prescribed with respect to the preliminary notice of grounds for eviction between ninety (90) days and one hundred twenty (120) days prior to the expiration of his or her existing lease/occupancy agreement. A copy of said notice shall be sent to HPD. If the tenant/cooperator holds over subsequent to the expiration date of his or her lease, the housing company shall commence eviction proceedings against the tenant/cooperator in accordance with the administrative hearing process set forth in this section, unless the material breach of lease relates to non-payment of rent/carrying charges or additional rent/carrying charges as set forth in subdivision (a) of this section.

(h) **Illegal occupancy.** A housing company having knowledge of occupancy of an apartment in conflict with the requirements of the Private Housing Finance Law, HPD rules or the requirements applicable to the apartment by reason of any federal, state or city benefit or subsidy, lease or occupancy agreement, or by reason of any other applicable law or regulation, shall notify HPD in writing of said illegal occupancy. The housing company shall, as soon as practicable, commence eviction proceedings against the last-authorized tenant/cooperator of the apartment in accordance with the administrative hearing process set forth in this section.

An illegal occupant of an apartment shall not be entitled to any protections pursuant to this section. A housing company shall not knowingly accept rent from an illegal occupant, and shall seek to recover from such occupant the full market value of the apartment.

The acceptance of rent/carrying charges from or on behalf of an illegal occupant shall not be deemed to create any right of tenancy or any obligation on the part of the housing company to afford such person the protection which these rules afford to authorized tenant/cooperators.

Subd. (d) amended City Record July 14, 2006 §3, eff. Aug. 13, 2006. [See T28 §3-02 Note 3]

CASE AND ADMINISTRATIVE NOTES

¶ 1. Where a tenant subleased the apartment without permission, made a profit on the sublease over and above the rent, and failed to list the occupant on the required income affidavits, these breaches were non-curable and the tenant

could be evicted. Waterside Redevelopment Co. v. Dept. of HPD, 270 A.D.2d 87, leave to appeal denied, 95 N.Y.2d 765, 716 N.Y.S.2d 39 (2000).

¶ 2. A persistent and continuous refusal to pay maintenance, in order to force changes in management, constitutes a nuisance which justifies eviction, and the tenant was not entitled to cure the violation. Fitzgerald v. New York City Dept. of Housing Preservation and Development, 1 A.D.3d 285, 767 N.Y.S.2d 589 (1st Dept. 2003).

¶ 3. In Matter of Nole v. N.Y.C. Dept. of Housing Preservation and Development, 26 A.D.3d 163, 808 N.Y.S.2d 678 (1st Dept. 2006), leave to appeal dism'd, 6 N.Y.3d 890, 817 N.Y.S.2d 624, 850 N.E.2d 671(2006), the court held that the form of notice of preliminary grounds for eviction complied with 28 RCNY § 3-18(a), and was sufficiently specific. Although the notice gave the wrong date for the lease, it was properly served, and the tenant was not prejudiced by the defect. The manner of service was reasonably calculated to make the tenant aware of the proceeding so as to afford her an opportunity to be heard.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 3-19

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-19 Senior Citizen Rent Increase Exemption Program ("SCRIE").

(a) **Background and applicability.** Local Law No. 40 of 1976 (§§26-601 et seq.) amended the Administrative Code of the City of New York in order to establish an exemption from rent increases for senior citizens who meet the eligibility requirements specified therein, and who reside in a dwelling unit whose rent is regulated or established pursuant to the provisions of Articles II, IV, V or XI of the Private Housing Finance Law. Amendments to the law in 1977 and 1978 made dwelling units in a dwelling subject to or initially subject to a mortgage insured by the federal government pursuant to §213 of the National Housing Act (12 USCA §1715e) eligible for the exemption. The Administrative Code was subsequently further amended to include increases in charges due to capital assessments and voluntary capital contributions within the definition of "increase in maximum rent," and to require that rent increase exemptions and tax abatements granted for such assessments and contributions be paid back by the tenant/shareholder to the housing company, and by the housing company to the City, upon transfer of shares. The amendment regarding capital assessments specifically excluded any dwelling unit subject to a mortgage insured or initially insured by the federal government pursuant to §213 of the National Housing Act, as amended (12 USCA §1715e). Subdivision (g) of §3-19 implements the amendment to the Administrative Code. The rules set forth in this section implement Administrative Code §§26-601 et seq., and are applicable as provided therein. In addition, an amendment was passed on September 6, 1977 to allow portability for senior citizens receiving a subsidy under the rent and rehabilitation law, the rent stabilization law and Local Law 40 of 1976. Portability means that a senior citizen with a valid SCRIE subsidy may move within a development, and in addition, certificates issued by the Department for the Aging and HPD are interchangeable under conditions set forth in the law.

(b) **Eligibility requirements.**

(1) The head of household or spouse is 62 years of age or older.

(2) The total disposable income of all members of the household when combined does not exceed the amount provided for in RPTL §467-c(1)(d).

(3) The increase in maximum rent or carrying charges resulted in the maximum rent or carrying charge equalling or exceeding one-third of the combined disposable income of all members of the household. That portion of a rent or carrying charge increase attributable to gas or electrical utility charges or an increase in dwelling space, services or equipment is excluded from exemption.

(4) The head of household is not receiving any other rent subsidies other than public assistance.

(c) **Procedures.**

(1) A head of household may apply to HPD for a SCRIE subsidy on a form prescribed and made available by HPD. In addition to the application, he or she must submit any other documentation necessary to assist HPD in its review.

(2) HPD shall review the application and shall notify the applicant of its determi- nation.

(3) When HPD determines that an applicant is eligible, HPD shall advise both the eligible senior citizen and the housing company of the established base rent which the housing company is to charge the senior citizen. The established base rent shall remain the same until a change in circumstance occurs.

(4) Senior citizens receiving benefits under this program must complete an annual recertification form prescribed and made available by HPD.

(5) The effective date of the SCRIE subsidy for applications received by HPD not more than 120 days from the date of the increase shall be the effective date of the increase. The effective date of the SCRIE subsidy for all other applications shall be the first day of the month following the receipt of the application and shall be based only upon the most recent increase in maximum rent.

(6) It shall be illegal for a housing company to collect any amount for which a SCRIE subsidy provides credit or to withhold benefits from a tenant/cooperator entitled to a SCRIE subsidy and collection or retention of any such amount for a dwelling unit occupied by such eligible head of household shall be deemed a rent overcharge. Upon conviction therefor, the housing company and its directors and any employee responsible therefor, shall be guilty of a misdemeanor, punishable by a fine not to exceed one thousand dollars or imprisonment not to exceed six months, or both.

(d) **Reimbursement to housing companies.**

(1) On a quarterly basis, HPD will issue Tax Abatement Certificates to all housing companies which have extended benefits to senior citizens deemed eligible by HPD. The certificates will be in an amount equal to the difference between the approved rent/carrying charges for the dwelling units and the amount of the established base rents charged to the eligible senior citizens.

(2) The housing company, upon receipt of the Tax Abatement Certificate, shall submit the certificate with the next quarterly real estate tax bill to the Department of Finance, paying the amount of the bill less the credit for the amount on the Tax Abatement Certificate. In those instances, where the taxes to be paid are less than the amount to be abated, HPD shall issue a voucher to the housing company for the balance.

(3) The housing company shall provide HPD with a revised rent roll upon implementation of each new rent/carrying charge increase.

(4) HPD, at its discretion, may electronically notify the Department of Finance of the abatement amount in lieu of the issuance of a Tax Abatement Certificate. If HPD electronically notifies the Department of Finance of the abatement amount, such electronic notification shall be deemed to be the equivalent of a Tax Abatement Certificate.

(e) **Termination of or change of benefits.**

(1) Any change in the status of the head of household or members of household which renders such persons ineligible shall result in the cancellation of benefits.

(2) Any change in income may result in a change in base rent/carrying charges.

(3) It is the obligation of both the recipient of benefits under this program and the housing company to notify HPD of any change in status or income which may affect eligibility.

(4) Failure of a senior citizen receiving benefits to recertify on an annual basis will result in termination of benefits.

(5) If an audit or other means of verification discloses that an exemption is excessive, the amount of tax payable by reason of such disclosure and the statutory penalty thereon, shall be a lien upon the property as of the due date of the tax for which the excessive exemption was claimed. In the event the excessive exemption was not due to any willful fault of the housing company, the amount of tax payable by reason of the disclosure shall be a lien upon the property as of the date for payment of taxes next following certification of such corrected order by HPD.

(f) **Portability of benefits.**

(1) When a head of household receiving a SCRIE subsidy moves his or her principal residence to another dwelling unit eligible under this program, the head of household may apply to HPD for a SCRIE subsidy relating to the subsequent dwelling unit which shall provide that the head of household shall be exempt from paying that portion of the maximum rent for the subsequent dwelling unit which is the least of the following:

(i) The amount by which the rent for the subsequent dwelling unit exceeds the established base rent actually required to be paid in the original dwelling unit;

(ii) the amount of rent abated in the most recent month in the original dwelling unit; or

(iii) the amount by which the maximum rent of the subsequent dwelling unit exceeds one-third of the continued income of all members of the household.

(2) A senior citizen seeking to transfer his or her rent exemption must complete and submit a SCRIE application and portability request prescribed and made available by HPD. In addition to submission of the application form and portability request, proof of income and proof of previous rent and subsidy are required.

(g) **Procedures for applications for SCRIE subsidies for charges attributable to capital assessments and voluntary capital contributions.**

(1) This subdivision implements the provisions of §§26-605 and 26-615 of the Administrative Code regarding SCRIE subsidies for charges attributable to capital assessments and project-wide voluntary capital contributions, which are approved by HPD, where applicable.

(2)(i) A head of household who receives an increase in carrying charges based upon a charge attributable to capital assessments or voluntary capital contributions shall make an application for such certificate to HPD on a form prescribed and made available by HPD.

(ii) In addition to the application, a head of household must submit any other documentation necessary to assist HPD in its review.

(3) HPD shall review the application and any supporting documentation to determine the eligibility of the head of household. HPD shall approve or disapprove applications, and, if it approves, shall issue a written notification to such head of household and to the affected housing company indicating the total amount of SCRIE subsidy available pursuant to this subdivision. If the application is disapproved, HPD shall issue a written notification of disapproval to such head of household indicating the reasons for the disapproval.

(4) Upon receipt of notification of eligibility, the housing company shall provide the decrease in charges applicable to the capital assessment or voluntary capital contribution, and HPD shall reimburse the affected housing company in accordance with the procedures provided in subdivision (d) of this section in an amount equal to the total capital assessment or capital contribution.

(5)(i) Documentation of imposition of a capital assessment or voluntary capital contribution shall be provided by the affected housing company to HPD, in addition to any further information required by HPD to make a determination of eligibility under this subdivision.

(ii) A housing company which imposes a capital assessment or voluntary capital contribution shall provide notice to all persons affected by such capital assessment or voluntary capital contribution of the potential availability of a SCRIE subsidy pursuant to this subdivision. Such notice shall be included in the notice to such person of the imposition of such capital assessment or voluntary capital contribution.

(6)(i) Notification and documentation of any transfer of shares by an eligible head of household who has received a SCRIE subsidy under this subdivision shall be provided in writing to HPD by the affected housing company immediately upon the closing date of such transfer except in cases involving a succession of rights claim, in which case notification shall be made in writing within five days of approval of the succession claim.

(ii) The affected housing company shall be entitled to deduct from the amount to be paid to such eligible head of household for the sale of such shares all amounts previously covered by a SCRIE subsidy which are attributable to a capital assessment or voluntary capital contribution. Where there is a transfer of shares through succession rights and where the successor is not entitled to a SCRIE subsidy under this subdivision, the affected housing company shall be entitled to receive a payment from the successor in an amount equal to all SCRIE subsidies attributable to a capital assessment or voluntary capital contribution.

(iii) Such housing company shall not approve the transfer of shares unless it has received the payment required by subparagraph (ii) of this paragraph, or made the deduction therein authorized.

(iv) Payment by such housing company of the amount attributable to the capital assessment or voluntary capital contribution set forth in subparagraph (ii) of this subdivision shall be made to the Department of Finance through an adjustment in tax abatement status issued to the Department of Finance by HPD, or by remittance by such housing company of such amount directly to the Department of Finance and written notification to HPD of such payment by the housing company within 90 days of the collection thereof. Payments due to the City in accordance with this subparagraph shall be deemed a tax lien and may be enforced in any manner authorized for the collection of delinquent taxes on real property.

(7) The provisions of this section shall be applicable to an application pursuant to this subdivision except where in conflict with this subdivision, in which case, the provisions of this subdivision shall control.

NOTE

1. Statement of Basis and Purpose in City Record Sept. 14, 1999:

The amendments affect the rules relating to the Senior Citizen Rent Increase Exemption Program (SCRIE). The amendments implement changes in the law made by Chapter 366 of the laws of 1995 which increased the maximum SCRIE recipient income from $16,500 to $20,000. The amendments also implement changes in the law made by Chapter 737 of the laws of 1986 and Chapter 584 of the laws of 1987, which provided for an exemption to SCRIE recipients from increases in rent attributable to capital assessments or voluntary capital contributions.

CASE AND ADMINISTRATIVE NOTES

***** Current through December 2009 ****

28 RCNY 3-21

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 3 CITY-AIDED LIMITED PROFIT HOUSING COMPANIES

§3-21 Limited Profit Housing Companies Having Federally Insured Mortgages Pursuant to §223(f) of the National Housing Act.

(a) **General.** Certain limited profit housing companies have been refinanced under §223(f) of the National Housing Act through the New York City Housing Development Corporation (HDC). Such housing companies remain subject to the provisions of the Private Housing Finance Law and the rules and regulations governing city-aided limited profit housing companies, except as provided otherwise by agreement with, or regulations of, the U.S. Department of Housing and Urban Development (HUD). In general, all matters involving management, maintenance, and operation shall be supervised by HUD except as otherwise set forth by statute or in this section. Compliance with the requirements of the Private Housing Finance Law shall continue to be supervised by HPD. To the extent that HUD should relinquish authority over matters such as rent setting and management supervision, those responsibilities shall revert back to HPD.

(b) **Tenant/cooperator income and eligibility requirements.** Tenant/cooperator income and eligibility standards, as set forth in the Private Housing Finance Law and §3-02 of these rules apply to housing companies refinanced under §223(f). This includes, but is not limited to, rules regarding filing of applications, tenant/cooperator eligibility, maintenance of waiting lists, occupancy priorities, income verification at admission and during occupancy, occupancy standards and primary residence requirements.

Refinanced housing companies shall not be required, however, to submit applications to HPD for its prior approval. Instead, a post-audit of applications shall be conducted by HPD. Notwithstanding the foregoing, HPD reserves the right, where violations of law or of HPD rules are found, to reinstitute temporarily or permanently, a requirement of prior review and approval of all applications for admission to or transfer within a development. In addition, HPD and/or the housing company shall conduct income verification audits periodically either as a result of a

spot check or other procedures. Tenant/cooperators and members of their household selected for audit shall be required to provide certified copies of IRS or New York State income tax returns, as requested and shall assume the cost of such copies.

In refinanced housing companies which have "236" mortgage interest subsidy contracts, the housing companies are required to meet HUD income limits, where they differ from HPD, and any other federal law or regulation which may apply unless they are violative of New York State laws. HPD rules must be met regarding such things as waiting lists and submission of rent rolls. HUD does not prescribe the form of waiting list for "236" developments. If a "236" housing company maintains a single bound waiting list in chronological order, it shall also be required to maintain lists by bedroom size in chronological order for HPD.

(c) **Surcharge billing, collection and remittance.** Refinanced housing companies are obligated to bill and collect surcharges. HPD will continue to supervise the billing and collection of surcharges as required by the Private Housing Finance Law and §3-03 of this chapter. All agreements with managing agents must include a provision that it is the responsibility of the managing agent to bill and collect surcharges. Refinanced housing companies are obligated to recognize hardship cases as set forth in §3-03 of these rules.

(d) **Housing company funds and bonds.** The provisions of §3-04 apply to §223(f) housing companies.

(e) **Resale of cooperative shares.** The provisions of the Private Housing Finance Law and §3-06 of this chapter apply to mutual housing companies refinanced under §223(f). These include, but are not limited to, the provision that a mutual company electing to amend its by-laws regarding sale of shares, shall submit to HPD for its approval, a Board of Directors Resolution certified and acknowledged by the Secretary of the Corporation setting forth the adoption of the amendment and a fully executed copy of a by-law amendment certified by the Secretary of the Corporation.

In the case of §223(f) refinanced mutual housing companies, where the appliances were included as security for the insured mortgage, the outgoing shareholder shall be required to leave behind the appliances which were in place at the time of refinancing or to replace them with appliances of equal size and amenities.

(f) **Occupancy rights of family members and applicability of §235-f of the Real Property Law.** The provisions of §3-02(o) and (p) apply to housing companies refinanced under §223(f).

(g) **Joint ownership of shares.** The provisions of §3-06(c) of these rules [and regulations] apply to housing companies refinanced under §223(f).

(h) **Bequeathing of apartments.** In no event may the right of occupancy in a unit in a refinanced housing company be bequeathed to another. Upon the death of the tenant/cooperator, the shares must be returned to the mutual housing company which will arrange for a sale pursuant to §3-06(a) of this chapter. Notwithstanding the foregoing, eligible members of the tenant/cooperator's immediate family in occupancy may acquire such shares if they meet the requirements of §3-02(p) of this chapter.

(i) **Billing and collection of amounts due on subordinate mortgages.** HPD shall bill and collect amounts due pursuant to the terms and conditions of the Subordinate Mortgage executed by each housing company in connection with its §223(f) refinancing. Each housing company is required to submit on a timely basis an annual audited financial statement. Such statement shall indicate whether or not surplus cash, as defined in the Regulatory Agreement, is available. If surplus cash is available, and is required to be paid to the City of New York pursuant to the Disbursement Agreement, a payment equal to the amount of surplus cash shall accompany the submission of the audited financial statement.

(j) **Submissions.** The following documents are required to be submitted to HPD and HDC on a timely basis:

(1) Audited Financial Statement

(2) Annual Budget (HDC only)

(3) Surcharge Tabulation Sheets (HPD only)

(4) Income Affidavits (HPD only)

(5) Waiting Lists and Internal Transfer Lists (HPD only)

(6) Original Insurance Policies to HDC

(7) Copies of excess rent reports as required in the Federal 236 interest reduction subsidy program

(8) Data relating to Senior Citizen Rent Increase Exemption Program (HPD only)

(9) Rent Roll (at request of HPD)

(10) Data relating to compliance by the housing company with any applicable law, rules, regulation or administrative order of the city, state or federal government (at request of HPD)

(11) Amendments to Certificates of Incorporation, by-laws, and partnership agree- ments

(12) Any and all books and records of the housing company which HPD directs to be made available

(k) **Rent or carrying charge increases.** HUD will be responsible for the approval of all rent/carrying charge increases with respect to all refinanced developments. HPD and HDC shall be notified by the housing company of its request for a rent/carrying charge increase. HUD shall notify HPD and HDC of its approval of any rent/carrying charge increase. A revised rent/carrying charge roll shall be submitted to HPD and HDC subsequent to implementation of an increase.

(l) **Distributions of surplus cash.** All distributions of surplus cash by any housing company require the prior written approval by HPD.

(m) **Reserve requirements.** Reserve requirements and releases from reserve accounts are subject to HUD supervision and approval.

(n) **Annual physical inspection.** HPD reserves the right to conduct a physical inspection of each development at any time. A copy of any inspection report prepared by HDC will be provided to HPD.

(o) **Shelter rent certification.** HPD shall continue to certify Shelter Rent pursuant to §33(1)(d) of the Private Housing Finance Law. All housing companies must make timely submission of all data required to enable HPD to make such certification.

(p) **Notifications.** Notification of changes in Board of Directors, officers, managing agents, attorneys and accountants shall be provided promptly to HPD and HDC.

(q) **Transfer of ownership interests in rental developments.** All transfers of ownership interests in rental developments including changes in general partners are subject to prior written approval of HPD and HDC.

(r) **Terms of subordinate mortgage and disbursement agreement.** Nothing contained in these rules shall limit obligations of housing companies pursuant to the Private Housing Finance Law or pursuant to the mortgage closing documents applicable to each development, including, without limitations, the terms and conditions of the Subordinate Mortgage and of the Disbursement Agreement.

(s) **Managing agents agreements.** All managing agents' contracts must be sent to HDC for written approval

HDC will review and approve the selection of and agreements with managing agents of refinanced developments, including self-management, and renewals or extensions of prior managing agents' agreements. If HDC approves a managing agent's agreement, HDC will evidence its consent by letter or by executing the managing agent's agreement. HDC will submit the executed agreement to HUD for approval. HPD reserves the right, in conjunction with HDC, to review and approve agreements with managing agents of refinanced developments.

If HDC disapproves a managing agent's agreement, HDC will advise the owner of the refinanced project and HUD of the reasons for the disapproval.

(t) **Structural changes and major capital improvements.** In order to remodel, add to, alter, remove or demolish the project or any portion thereof, the owner of a refinanced project must

(1) notify HUD, HDC and HPD in writing, and

(2) obtain the prior written consent of HDC and HUD (and, where necessary, HPD) except that such notification and consent is not required to perform such minor repairs as do not require a permit from the City of New York Department of Buildings or to perform emergency repairs.

(u) **Lease terminations and renewals.** HPD will apply the procedures set forth in §3-18 of this chapter to all refinanced projects so that no eviction proceeding may be instituted against any tenant/cooperator continuing to pay his or her rent/carrying charges without the issuance by HPD of a certificate of eviction.

(v) **Notification of legal proceedings.** The housing company or managing agent shall notify HPD, HDC and the Tenants Association of any litigation by or against the housing company which would have a material effect upon the financial condition of the housing company. Failure to notify HPD or the Tenants Association shall in no event be deemed to afford a defense to litigation.

(w) **Removal of Board of Directors.** The provisions of the Private Housing Finance Law and §3-13 of this chapter apply to housing companies refinanced under §223(f).

(x) **Tenants Association.** The provisions of the Private Housing Finance Law and §3-17 of this chapter apply to rental housing companies refinanced under §223(f).

(y) **Senior citizen rent increase exemption program.** The provisions of the Private Housing Finance Law and §3-19 of this chapter apply to housing companies refinanced under §223(f).

(z) **Insurance.** Refinanced housing companies must meet insurance requirements of HUD, HDC and HPD. HPD shall be named as an Additional Insured.

CHAPTER 4 COMPANIES FORMED PURSUANT TO THE REDEVELOPMENT COMPANIES LAW OF THE STATE OF NEW YORK

§4-01 Reports.

Upon the completion of any project, as evidenced by the issuance of a temporary or permanent certificate of occupancy, each redevelopment company shall be required to file with the Department of Housing Preservation and Development (HPD):

(a) Within thirty (30) days of the expiration of each six (6) months of operation, a report certified by an officer, disclosing the following:

(1) A statement of dividends declared, furnishing the date of declaration, the amount of the dividend, persons to whom paid and the amount paid to each such person.

(2) A statement of the date and amount of any interest paid on income debentures or other obligations of the redevelopment company, disclosing date of payment, the amount of interest, persons to whom paid and the amount paid to each such person.

(3) All appropriate data relative to rental surcharges, including the name of the occupant surcharged, the apartment number and the amount of monthly surcharge.

(4) The name and residence address of each of the officers and directors of the redevelopment company and the date of their election.

(5) A brief summary of the action taken at any meeting of the Boards of Directors or stockholders of the redevelopment company during said period.

(6) The facts with relation to any changes in capitalization, including the issuance or redemption of capital stock, debentures or notes.

(7) The facts with relation to the transfer of the shares of stock of any cooperator (if same be a project owned on a cooperative basis), which shall include the names of the parties to the transfer and the date thereof, the apartment affected, the number of rooms and the sales price of said shares, or, if the project be a rental project, the date of any changes in tenancies, the apartment number, number of rooms and the old and new monthly rental.

(8) The date, amount and nature of expenditures for capital improvements.

(9) The date, amount and nature of single expenditures exceeding $500.00 for repairs.

(b) Within ninety (90) days after the close of each fiscal year of operation, a financial statement, in form approved or supplied by the Board, which will adequately represent the true financial condition of the redevelopment company.

(c) Within ten (10) days after the date of each meeting held by the stockholders of the Board of Directors of the redevelopment company, a copy of the minutes of the meeting.

CHAPTER 4 COMPANIES FORMED PURSUANT TO THE REDEVELOPMENT COMPANIES LAW OF THE STATE OF NEW YORK

§4-02 Limitations.

No company shall: (a) Enter into any contract for the payment of salaries to officers or employees, or for the construction or for the substantial repair, improvement or operation of projects without the prior written approval of the HPD.

(b) Issue any prospectus, information bulletin, lease or other document pertaining to the purchase of stock or occupancy of an apartment without the prior written approval of the HPD.

(c) Prior to the completions of a project, receive or collect deposits or payments for a place on an applicants' list without the prior written approval of the HPD and upon such terms and conditions as the HPD shall prescribe.

(d) After the project has been completed and after initial occupancy, receive or collect a deposit in excess of $50.00 for a place on a waiting list to obtain occupancy of an apartment, without the prior written approval of the HPD.

(e) Directly or indirectly, refuse, withhold from, or deny to any person or any of the dwellings or business accommodations in such projects or property or the privileges and services incident to the occupancy thereof on account of the race, color, creed, national origin or ancestry of any such person.

(f) Rent or offer to rent, or sell or offer to sell, any of its capital stock to any persons or families whose probable aggregate annual income at the time of admission exceeds eight times the rental, including the value or cost to them of heat, light, water and cooking fuel of the dwelling that may be furnished to such persons or families. The "probable

aggregate annual income" means the annual income of the chief wage earner of the family and his or her spouse or domestic partner. For purposes of this subdivision, a domestic partner shall mean a person who has registered a domestic partnership in accordance with applicable law with the City Clerk, or has registered such a partnership with the former City Department of Personnel pursuant to Executive Order 123 (dated August 7, 1989) during the period August 7, 1989 through January 7, 1993. (The records of domestic partnerships registered at the former City Department of personnel are to be transferred to the City Clerk.)

HISTORICAL NOTE

Section in original publication July 1, 1991.

Subd. (f) amended City Record June 8, 1998 eff. July 8, 1998. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record June 8, 1998:

Mayoral Executive Orders spanning the past two administrations have established several rights and procedures relative to domestic partnerships, including a procedure for City residents to register their domestic partnerships in the office of the City Clerk. Such orders have further provided, among other things, that (i) registered domestic partners are eligible for visitation rights in City hospitals and correction facilities; (ii) City employees with registered domestic partnerships are eligible for child care leave and bereavement leave on the same basis as those benefits are afforded to employees with regard to their spouses; and (iii) registered domestic partnership is evidence of the right to succession to tenancy rights in facilities operated by the New York City housing authority and the department of housing preservation and development. By the end of April, 1998, there were approximately 8,700 couples registered as domestic partners in New York City. More than 55 percent of those registered domestic partners who reported demographic information were heterosexual couples, and less than 45 percent were same sex couples. Almost forty percent of registered domestic partnerships have accessed City health benefits available to partners of City employees and retirees.

Consistent with the intent of such orders, and the Commissioner's authority pursuant to Charter §§1043 and 1802, the Department is now acting to provide that rules applicable to spouses, as specified herein, should now be extended to domestic partners.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 4 COMPANIES FORMED PURSUANT TO THE REDEVELOPMENT COMPANIES LAW OF THE STATE OF NEW YORK

§4-04 Verification of Tenant-Income Limitations.

(a) Each redevelopment company whose contract with The City of New York contains an income limitation for occupancy shall at the time of accepting an applicant for occupancy subject to the approval of the HPD, secure appropriate evidence of the fact that the income of the applicant is within the limits prescribed by the contract.

(b) The applicant shall furnish the information in an affidavit setting forth the aggregate annual income of the applicant and his spouse or domestic partner including a statement therein that the copy of the applicant's income tax report filed with the Internal Revenue Service for the last calendar year, submitted with the affidavit, is a true copy. The applicant shall furnish a power of attorney granting to the Board the right to examine or obtain copies of the original return. For purposes of this subdivision, a domestic partner shall mean a person who has registered a domestic partnership in accordance with applicable law with the City Clerk, or has registered such partnership with the former City Department of Personnel pursuant to Executive Order 123 (dated August 7, 1989) during the period August 7, 1989 through January 7, 1993. (The records of domestic partnerships registered at the former City Department of Personnel are to be transferred to the City Clerk.)

(c) The applicant shall be informed:

(1) that his application has been accepted conditioned on the fact that applicant's income will not exceed the permitted amount at the time of admission to the project which time will be calculated to be the period between sixty (60) and ninety (90) days prior to actual occupancy; and

(2) that a further affidavit will be required of him at that time; and

(3) that if the income of the applicant has increased to an amount above the permitted maximum, the application should be withdrawn immediately.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 4 COMPANIES FORMED PURSUANT TO THE REDEVELOPMENT COMPANIES LAW OF THE STATE OF NEW YORK

§4-05 Surcharges (Rental Procedure).

(a) Each redevelopment company whose contract with the City of New York contains an income limitation for occupancy shall:

(1) On April 15th of each year during occupancy, mail to each tenant, a notice or request for information as to the income of his family group during the preceding calendar year. Such notice shall request information to be furnished on a form approved by the HPD, and shall require a reply by the tenant on or before May 1st of such year.

(2) Furnish a tabulation of this information to the Board by May 15th of each year. The records on which the tabulation is based shall be kept available for inspection by the Board.

(b) Surcharges shall be imposed upon the tenants or cooperators, and collected from and after July 1st of each year on the basis of the best information available to the company, as approved by the HPD, and shall continue until revised with the approval of the HPD. Surcharge income shall be paid over to The City of New York as directed by the HPD.

(c) In the event that any tenant shall fail to supply the required information by May 1st, the income of such tenant shall be presumed to have exceeded the maximum allowed by law, and written notice shall thereupon be given to such tenant that the surcharge will be imposed against him on July 1st, unless facts are submitted by the tenant to warrant the removal of the surcharge. The rental surcharge shall be the amount provided in the contract and shall be calculated in the manner set forth therein.

(d) On and after July 1st of each year, no rental payment shall be accepted from any tenant in default under the foregoing requirements unless such payment includes such surcharge, and eviction proceedings shall be commenced by the redevelopment company against such tenant.

CHAPTER 4 COMPANIES FORMED PURSUANT TO THE REDEVELOPMENT COMPANIES LAW OF THE STATE OF NEW YORK

§4-06 Schedule of Fees.

(a) **Consideration or approval fee.** One-tenth of one of the estimated total project cost, payable one-third upon the filing of the proposed redevelopment plan with HPD, one-third upon preliminary approval of the plan by HPD, and one-third upon the approval of the plan by the Board of Estimate or its successor.

(b) **Construction supervision and audit fee.** Three-tenths of one percent of the total project cost up to $30,000,000 plus two-tenths of one percent of costs in excess of $30,000,000. The foregoing shall be payable on or before the certification of the total project cost by the HPD in such manner as the HPD shall require.

(c) **Management and general supervision fee.** $1.00 per annum for rental room, payable semi-annually, the first payment to be made six (6) months after the issuance of a Certificate of Occupancy on all of the residential buildings. Such payments shall be made until the termination of tax exemption on the real estate of the company.

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-01 Scope and Construction.

(a) **Scope.** This chapter governs the granting of tax exemption and tax abatement pursuant to §489 of the Real Property Tax Law of the State of New York, §11-243, formerly §J51-2.5 of the Administrative Code of the City of New York, and Chapter 61 of the New York City Charter, including the procedure for filing an application for tax exemption and tax abatement and the issuance of Certificates of Eligibility and Reasonable Cost by the Office of Tax Incentive Programs of the Department of Housing Preservation and Development.

(b) **Construction.** This chapter is to be construed to secure the effectuation of the purposes of §489 of the Real Property Tax Law and §11-243 of the Administrative Code and in accordance with the general principal of law that exemption statutes are strictly construed against the taxpayer applying for the exemption. Except as hereinafter provided, this chapter, as amended, applies to all applications pending on or submitted after the effective date.

HISTORICAL NOTE

Section in original publication July 1, 1991.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 27, 1998:

The Act authorizes HPD to promulgate Rules governing the administration of the program. The proposed changes

to the rules (i) bring the rules into conformance with amendments to the Act which became effective on June 15, 1993, (ii) provide procedures necessary to implement these amendments, (iii) further clarify implementation of the Act, (iv) provide modest increases to the allowances for certain items on the Itemized Cost Breakdown Schedule where warranted by inflation and (v) revise fees to place a penalty on uncollectible checks and charge a reasonable fee for declaratory rulings.

***** Current through December 2009 ****

28 RCNY 5-02

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-02 Definitions.

As used in this chapter, the following terms have the meanings indicated below.

Act. "Act" means §11-243 of the Administrative Code as amended.

Administrative Code. "Administrative Code" means the Administrative Code of the City of New York, as amended.

Alterations or improvements. "Alterations" or "improvements" means only those physical changes to an existing dwelling set forth in §5-08.

Attorney General. "Attorney General" means the Attorney General of the State of New York.

Bedroom. "Bedroom" means any living room as defined in §27-2004 of the Housing Maintenance Code and §4 of the Multiple Dwelling Law, after excluding the primary living room and the kitchen, except as provided in §5-03(e)(2)(ii) and in §5-03(e)(2)(iv).

Building. "Building" means a complete or substantially complete permanent improvement for occupancy or use within prior to the commencement of construction of alterations, improvements or conversion, provided such improvement is permanently affixed to the land, and that such improvement, exclusive of the land, has an assessed valuation of more than one thousand dollars ($1,000) for the fiscal year immediately preceding the commencement of construction, provided that such assessed valuation test shall not apply to alterations, improvements or conversions is

carried out with substantial governmental assistance.

Certificate of Eligibility and Reasonable Cost. "Certificate of Eligibility and Reasonable Cost" means the certificate issued by the Office pursuant to §5-05(g)(3).

Certified reasonable cost or CRC. "Certified reasonable cost" or "CRC" means the cost of a conversion or alterations or improvements certified by the Office to be eligible for the benefits of the Act pursuant to the procedures set forth in this chapter, as evidenced by the issuance by the Office of a "Certificate of Eligibility and Reasonable Cost."

City. "City" means the City of New York.

Class A multiple dwelling. "Class A multiple dwelling" means a Class A multiple dwelling as defined in §4 of the Multiple Dwelling Law, and shall include a garden-type maisonette dwelling project as defined below. A "Class A multiple dwelling used for single room occupancy" means a dwelling occupied pursuant to §248 of the Multiple Dwelling Law.

Class B multiple dwelling. "Class B multiple dwelling" means a Class B multiple dwelling as defined in §4 of the Multiple Dwelling Law.

Commencement of construction. (a) For work requiring a permit, "commencement of construction" means:

(1) the date of issuance of a permit by the Department of Buildings, or

(2) if physical alterations commenced prior to obtaining a required building permit, the actual start date, or

(3) for projects eligible pursuant to §5-03(a)(1), (3), (4), (9) or (10), the actual commencement of construction in good faith based on prior issuance of a permit by the Department of Buildings. Demolition work does not constitute "commencement of con- struction."

(b) If the issuance of a Building Permit by the Department of Buildings is not required by law, commencement of construction means the date any physical operation has commenced solely for the purpose of making eligible alterations or improvements. The Office may require that the commencement of construction date be confirmed by an affidavit from the owner, along with such other information as the Office may require to substantiate such date, including but not limited to, an affidavit of a registered architect or licensed professional engineer, a copy of the work contract, invoices, cancelled checks and a contractor's affidavit. If a building permit is not required and if the cost of the work claimed is less than five thousand dollars ($5000) the Office may, in its discretion, accept an owner's affidavit as to the date of commencement of construction, and waive some or all of the additional evidence or information. If an application contains a series of Major Capital Improvements, the commencement of construction date is that of the first major capital improvement for which benefits are claimed.

Commissioner. "Commissioner" means the Commissioner of the Department of Housing Preservation and Development or his or her designee.

Common area. "Common area" means the area in an existing dwelling other than the area which is within the interior walls of individual dwelling units.

Completion of construction. "Completion of construction" means the earlier of:

(i) the date of issuance or reissuance of a Permanent Certificate of Occupancy by the Department of Buildings;

(ii) the date of issuance of a Temporary Certificate of Occupancy by the Department of Buildings for all of the dwelling units therein, provided the only work remaining to secure a Permanent Certificate of Occupancy is work to be performed or completed in space to be used exclusively for non-residential purposes; or

(iii) the date of the issuance of a sign-off by the Department of Buildings as evidenced by the J-3, a computer printout or such other official documentation as may be required by the Department of Buildings and is acceptable to the Office if issued in connection with an eligible alteration, improvement or conversion; provided, however, that

(a) if none of the documents set forth above are required by law, "Completion of construction" shall mean that date on which physical operations to undertake alterations or improvements are concluded as confirmed by the submission of such information as the Office may require to substantiate such date, including but not limited to, a copy of the work contract, invoices, cancelled checks and a contractor's affidavit. If none of the documents set forth above are required by law and if the cost of the work claimed is less than five thousand dollars ($5,000), the Office may, in its discretion, accept an owner's affidavit as to the date of completion of construction and waive some or all of the additional evidence and information;

(b) if the applicant is a limited profit housing company organized pursuant to article two of the private housing finance law which owns and operates a planned unit development consisting of at least fifteen thousand (15,000) dwelling units. "Completion of construction" shall mean that date on which physical operations to undertake alterations or improvements are concluded as confirmed by the submission of such information as the Office may require to substantiate such date, including but not limited to, a copy of the work contract, invoices, cancelled checks and a contractor's affidavit, or, if the cost of the work claimed is less than five thousand dollars ($5,000), the Office may, in its discretion, accept an owner's affidavit as to the date of completion of construction and waive some or all of the additional evidence and information. Notwithstanding the foregoing, all required sign-offs including, but not limited to, the J-3 issued by the Department of Buildings, must be submitted to the Office before it issues a Certificate of Eligibility and Reasonable Cost pursuant to section 5-05(g)(3) of this chapter to such an applicant; and

(c) if an Alteration Type-1 Permit was issued to any applicant other than an applicant who is a limited profit housing company organized pursuant to article two of the private housing finance law which owns and operates a planned unit development consisting of at least fifteen thousand (15,000) dwelling units, the only acceptable evidence of completion of construction shall be the Temporary or Permanent Certificate of Occupancy.

Condominium. "Condominium" means any residential unit which is owned pursuant to the Condominium Act, Article IX-B of the Real Property Law, provided it is situated in a building which is a Class A multiple dwelling, and provided that such condominium has had a plan of condominium ownership accepted for filing by the Attorney General or has received a "no action" letter from the Attorney General, or has demonstrated that it is not subject to the requirements of §352(e) of the General Business Law.

Conversion. "Conversion" means only those items of work set forth in §5-08 which are necessary for the conversion of any building not a Class A multiple dwelling, into a Class A multiple dwelling. For purposes of eligibility for benefits, an interim multiple dwelling claiming benefits for conversion based on compliance with the standards of safety and fire protection set forth in Article 7-B of the Multiple Dwelling Law shall be deemed a Class A multiple dwelling.

Cooperative. "Cooperative" means any building which is operated for the benefit of persons or families who are entitled to occupancy by reason of ownership of stock, membership, or other indices of ownership in the corporate owner, or for the benefit of such persons or other families and other persons or families entitled to occupancy under applicable provision of law without ownership of stock, membership, or other indices of ownership in the corporate owner, provided, such cooperative has either had a plan of cooperative ownership accepted for filing by the Attorney General or has received a "no action" letter from the Attorney General, or has demonstrated that it is not subject to the requirements of §352(e) of the General Business Law.

Department of Buildings. "Department of Buildings" means the Department of Buildings of the City.

Department of Environmental Protection. "Department of Environmental Protection" means the Department of

Environmental Protection of the City.

Department of Finance. "Department of Finance" means the Department of Finance of the City.

Designated historic district or landmark site or structure. "Designated historic district or landmark site or structure" means an historic district or landmark site or landmark structure as designated by the Landmarks Preservation Commission of the City.

DHCR. "DHCR" means the New York State Division of Housing and Community Renewal.

Disposition of Funds Statement. "Disposition of Funds Statement" means written confirmation of funds actually advanced for construction under a building loan agreement made pursuant to Article 8, 8-a, 11, 12, 15 or 22 of the Private Housing Finance Law, or §312 of the United States Housing Act of 1964 (42 U.S.C. §1452 b), or the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. §12701 et seq.) or §696-a or §99(h) of the General Municipal Law, or any other City-supervised housing program, or, in the discretion of the Office, other governmentally supervised housing programs.

Existing dwelling. "Existing dwelling" means a Class A multiple dwelling, including a garden-type maisonette dwelling project, or one or two Class A dwelling units in a building over space used for commercial occupancy which was in existence prior to the commencement of construction of alterations or improvements for which tax exemption or tax abatement is claimed under the terms of the Act, provided that a valuation for the improvement of more than one thousand dollars ($1,000), exclusive of the land, appears on the annual record of assessed valuation of the City for the fiscal year immediately preceding the commencement of construction of alterations or improvements, and provided further that such assessed valuation test shall not apply if the alterations, improvements or conversion are carried out with substantial governmental assistance.

Floor area. "Floor area" of a building means the gross horizontal areas of all of the floors of a dwelling measured from the exterior faces of exterior walls or from the center line of party walls. "Floor area" of a dwelling unit means the gross floor area within the dwelling unit measured from the interior faces of the demising partitions or walls.

Garden-type maisonette dwelling project. A "garden-type maisonette dwelling project" shall mean a project consisting of a series of dwelling units which together and in their aggregate were arranged or designed to provide three or more apartments and are provided as a group collectively with all essential services such as, but not limited to, water supply, house sewers and heat, and which are in existence and operated as a unit under single ownership on the date upon which an application for the benefits of the Act is received by the Office, even though Certificates of Occupancy may have been issued for portions thereof as private dwellings.

General Business Law. "General Business Law" means the General Business Law of the State of New York.

Gross cubic content. "Gross cubic content" of a building means the volume within the exterior faces of the perimeter walls (or center line of party walls), above legal grade, and below the roof level, plus any legal residential space below grade level. Roof bulkheads or roof penthouses used exclusively for machinery or equipment shall not be included. New exterior stair towers or elevator shafts shall not be included, unless they substitute for existing stair or elevator space which is converted to residential space.

Hotel. "Hotel" shall mean those buildings defined as Hotels by §5-03(f)(4).

Housing Maintenance Code. "Housing Maintenance Code" means the Housing Maintenance Code of the City, constituting §27-2001 et seq. of the Administrative Code, as amended.

HPD. "HPD" means the Department of Housing Preservation and Development of the City.

HUD. "HUD" means the United States Department of Housing and Urban De- velopment.

Increase in gross cubic content. "Increase in gross cubic content" means any portion of a building that results from new construction as distinguished from alterations or improvements to the gross cubic content in existence immediately prior to commencement of construction.

Institutional lender. "Institutional lender" means any municipal, federal or state agency and any savings or commercial bank, life insurance company, public real estate investment company, pension fund or any other entity having assets in excess of fifty million dollars ($50,000,000), whose mortgage loans are subject to regulation of a federal or state agency.

Itemized Cost Breakdown Schedule. "Itemized Cost Breakdown Schedule" means the schedule set out in §5-08.

Landmark. "Landmark" means an improvement which has been designated as a landmark by the Landmarks Preservation Commission of the City or which is within the boundaries of a historic district designated by the Landmarks Preservation Commission of the City.

Major capital improvement or MCI. "Major capital improvement" or "MCI" means only those items of work designated as major capital improvements (MCI's) and set forth, preceded by an asterisk, in §5-08.

Minimum tax zone. "Minimum tax zone" means the area within the Borough of Manhattan in which tax abatement benefits are limited as set forth in §5-06(e)(2).

Moderate rehabilitation. "Moderate rehabilitation" means a scope of work in a substantially occupied Class A multiple dwelling which includes a major capital improvement in not less than one of the five categories set forth in §5-03(a)(6), and in which the certified reasonable cost, calculated as set forth in §5-03(a)(6), equals or exceeds $2,500 (two thousand five hundred dollars) per dwelling unit, and meets the notice and filing requirements set forth in §5-03(h)(1).

Mutual company. "Mutual company" shall have the same meaning as set forth in section two of the Private Housing Finance Law.

Non-targeted Area. "Non-targeted Area" means a geographic area in the city of New York that is not located in a Targeted Area.

Office. "Office" means the Office of Tax Incentive Programs of HPD, or any successor thereto authorized to administer this chapter.

Ordinary repairs. "Ordinary repairs" means those items of work listed in the Itemized Cost Schedule as ordinary repairs, i.e., those items not preceded by an asterisk.

Permanent residential use. "Permanent residential use" shall mean the lease of all residential units for residential purposes as set forth in §5-03(f)(4).

Private dwelling. "Private dwelling" means any building or structure which is either: (1) exclusively designed and occupied for residential purposes by not more than two families or

(2) for which the Department of Buildings has issued a Certificate of Occupancy which describes the building as intended exclusively for not more than two families. Private dwelling shall also be deemed to include a series of one or two-family dwelling units each of which faces or is accessible to a legal street or public thoroughfare, if each dwelling unit is equipped as a separate dwelling unit with all essential services, and if each such unit is arranged so that it may be approved as a legal one-family or two-family dwelling.

Private Housing Finance Law. "Private Housing Finance Law" means the Private Housing Finance Law of the State of New York.

Reasonable cost. "Reasonable cost" means the cost of a conversion, alteration or an improvement as conclusively determined and certified by the Office pursuant to this chapter.

Rehabilitation schedule. "Rehabilitation schedule" means the Itemized Cost Breakdown Schedule.

Rules. "Rules" means this chapter of the Rules of the City of New York.

Single room occupancy. "Single room occupancy" means occupancy in a multiple dwelling by one or more persons of a room or rooms without a private kitchen or kitchenette or a private bathroom or separate means of egress for occupants thereof to the public areas of the multiple dwelling.

Substantial governmental assistance. "Substantial governmental assistance" shall mean a project carried out with grants, loans or subsidies from any federal, state or local agency or instrumentality, including, without limitation, financing or insurance provided by the State of New York Mortgage Agency and New York City Residential Mortgage Insurance Corporation, but shall not include (1) taxable bonds issued by a federal, state, or local agency or instrumentality, (2) purchase money mortgages from a federal, state or local agency or instrumentality, or (3) any grant, loan or subsidy from a federal, state or local agency or instrumentality which does not specifically require a program of affordable housing (e.g., energy conservation grants). In the discretion of the Office, a below market sale by a Federal, state or local agency or instrumentality or a written agreement with a Federal, state or local agency or instrumentality for development of affordable housing shall qualify as a subsidy.

Substantial interest. "Substantial interest" as used in §5-03(h)(2) shall mean ownership of an interest of ten percent (10%) or more in a property or entity owning property or sponsoring a conversion, alteration or improvement.

Substantial rehabilitation. "Substantial rehabilitation" means any rehabilitation of a Class A multiple dwelling where the scope of work includes at least four of the systems listed in §5-03(a)(6)(i), or where, for City-owned buildings or buildings conveyed by deed from the Commissioner of Finance eligible for benefits under §5-03(a)(9), the scope of work includes rehabilitation work in at least four major systems in elevator buildings or three major systems in non-elevator buildings, and where major systems include heating, plumbing, electricity, elevator, windows and roof (replacement or covering with a new roof of at least seventy-five percent (75%) of the aggregate roof area), provided further that work done during City ownership or work financed by a City program but not eligible for benefits because outside of the required time limits, may be counted toward the required systems if the work was done and the system has a substantial remaining useful life at the time of application as evidenced by a certification by the Commissioner which may be based on such information as permits, sign-offs, disposition of funds statements, inspections or other program records.

Substantially occupied. "Substantially occupied" shall mean that at least sixty percent (60%) of the units in a building are occupied by permanent residential tenants immediately prior to the start of rehabilitation, during the entire period of rehabilitation (except for temporary periods of relocation in substantially governmentally assisted projects) and immediately subsequent to completion of construction of the rehabilitation.

Successor in interest. "Successor in interest" shall mean an institutional lender which originates or acquires an interest in a loan to finance alterations, improvements or a conversion eligible for benefits under this chapter and which acquires title to the alterations, improvements or conversion as result of the original owner's default on such loan, whether by mortgage foreclosure or deed in lieu of foreclosure.

Supervising agency. "Supervising agency" shall have the same meaning as set forth in section two of the Private Housing Finance Law.

Targeted Area. "Targeted Area" means a geographic area in the city of New York in the zip code listed below that has been determined by the department of health and mental hygiene to have high rates of children with environmental intervention blood lead levels:

Borough Zip Code Neighborhood Name

Bronx 10458 Belmont-Fordham-Bedford Park

Bronx 10468 University Heights-Kingsbridge

Brooklyn 11205 Fort Greene-Clinton Hill

Brooklyn 11206 Williamsburg-Bedford Stuyvesant

Brooklyn 11216 Bedford Stuyvesant

Brooklyn 11217 Park Slope-Boerum Hill

Brooklyn 11218 Kensington-Windsor Terrace

Brooklyn 11221 Bushwick-Bedford Stuyvesant

Brooklyn 11222 Greenpoint

Brooklyn 11225 Crown Heights-Prospect Lefferts

Brooklyn 11226 Flatbush

Brooklyn 11230 Midwood

Brooklyn 11233 Stuyvesant Heights-Ocean Hill

Brooklyn 11235 Sheepshead Bay-Brighton Beach

Brooklyn 11237 Bushwick

Brooklyn 11238 Prospect Heights

Manhattan 10026 South Central Harlem

Manhattan 10027 Manhattanville-Harlem

Manhattan 10031 Hamilton Heights

Manhattan 10032 South Washington Heights

Manhattan 10033 Middle Washington Heights

Queens 11102 Old Astoria

Queens 11385 Ridgewood-Glendale

Tax abatement exclusion zone. "Tax abatement exclusion zone" means the area within the Borough of Manhattan in which tax abatement benefits are limited as set forth in §5-06(e)(3).

Zoning Resolution. "Zoning Resolution" means the Zoning Resolution of the City, as amended.

Targeted area added City Record Jan. 6, 2006 §1, eff. Feb. 5, 2006. [See Note 3]

NOTE

1. Statement of Basis and Purpose in City Record Jan. 8, 1999:

Section 489 of the Real Property Tax Law and §11-243 of the Administrative Code allow HPD to promulgate rules regarding tax benefits under the program. The proposed changes are intended to assist in the City's effort to prevent abandonment of residential buildings, to authorize benefits for certain types of improvements to cogeneration facilities and to make certain technical corrections.

2. Statement of Basis and Purpose in City Record Dec. 24, 2003: This proposed amended rule gives large planned unit developments with at least 15,000 dwelling units that are owned and operated by limited profit housing companies organized under Private Housing Finance Law Article 2 (the "Mitchell-Lama" law) the flexibility to prove completion of construction by documentation other than required sign-offs, in order to be eligible for real property tax benefits under Real Property Tax Law §489 and New York City Administrative Code §11-243 (the "J-51" program). The proposed rule change is in recognition of the fact that the rehabilitation work being done at such communities is on a far more extensive scale, making the filing of the supplemental documentation necessary to complete a J-51 application a lengthier and more cumbersome process. For the very same reasons, HPD amended its J-51 rules in 2000 to give such developments twelve additional months to complete their J-51 applications so that they might qualify for these much needed tax exemptions/abatements. Nonetheless, such applicants would have to submit all required sign-offs before the Office would issue to them a Certificate of Eligibility and Reasonable Cost for J-51 benefits.

3. Statement of Basis and Purpose in City Record Jan. 6, 2006: The proposed rule amendments implement local law number 74 for the year 2005. Local Law No. 74 amended §11-243 of the New York City Administrative Code (the "J-51 Law") by extending J-51 tax benefits for the abatement of lead-based paint hazards in common areas as well as in an existing dwelling unit even if such unit is vacant, thereby also eliminating the requirement that the eligible unit be occupied by a child under the age of seven. The local law also requires HPD to establish two schedules of certified reasonable costs for items that are included in an abatement of lead-based paint hazards, one for targeted areas and one

for non-targeted areas. Such schedules must be promulgated within 180 days of the effective date of Local Law 74, shall be used for any such abatements that are commenced on or after August 2, 2004, and must be reviewed biennially. Finally, Local Law 74 eliminates the notice of intent requirement for the commencement of lead-based paint abatement work as well as the additional fee or penalty imposed for failure to file such notice with the Department of Finance at least 45 days prior to the commencement of such work.

4. Statement of Basis and Purpose in City Record Aug. 5, 2009: The rule amendments implement Local Laws 14 and 15 of 2007, which exempted Mitchell-Lama cooperative developments from the assessed valuation cap on J-51 benefits if they stayed in the Mitchell-Lama program for an additional fifteen years and which also made eligible for J-51 benefits work done for Mitchell-Lama developments with government subsidies provided that such developments also agreed to remain in the Mitchell-Lama program for an additional fifteen years.

FOOTNOTES

1

[Footnote 1]: * Chapter amended City Record Jan. 27, 1998 eff. Feb. 26, 1998. Note: Statement of Basis and Purpose. The Act authorizes HPD to promulgate Rules governing the administration of the program. The proposed changes to the rules (i) bring the rules into conformance with amendments to the Act which became effective on June 15, 1993, (ii) provide procedures necessary to implement these amendments, (iii) further clarify implementation of the Act, (iv) provide modest increases to the allowances for certain items on the Itemized Cost Breakdown Schedule where warranted by inflation and (v) revise fees to place a penalty on uncollectible checks and charge a reasonable fee for declaratory rulings.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 5-03

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-03 Eligible Projects and Eligibility Requirements.

(a) **Eligible projects.** Subject to the limitations relating to single room occupancy and permanent residential use set forth in §§5-03(f)(4), 5-04(a)(4) and 5-07(f)(1), the following classes of projects may be granted tax exemption and tax abatement:

(1) Conversion of any building or structure classified as a Class B multiple dwelling or a Class A multiple dwelling used for single room occupancy into a Class A multiple dwelling, but only if the conversion is carried out with substantial governmental assistance.

(2) Conversion of residential units covered by Article 7-C of the Multiple Dwelling Law in buildings classified as interim multiple dwellings pursuant to such article and registered with the New York City Loft Board to units which are in compliance with the standards of safety and fire protection set forth in Article 7-B of the Multiple Dwelling Law or to units which have a Certificate of Occupancy as part of a Class A multiple dwelling. Provided, that if only a portion of a building is eligible as an interim multiple dwelling, benefits shall be pro-rated between such portion and the remaining part of the building.

(3) Conversion of any non-residential building or structure situated in the borough of Manhattan into a Class A multiple dwelling, provided the building was a non-residential building immediately prior to the commencement of construction of the conversion, and provided further that if construction commenced on or after January 1, 1982, such conversion is permitted as-of-right by the Zoning Resolution.

(4) Conversion of any non-residential building or structure situated in the boroughs of the Bronx, Brooklyn,

Queens or Staten Island into a Class A multiple dwelling, provided the building was a non-residential building immediately prior to the commencement of construction of the conversion, and provided further that if commencement of construction occurred on or after October 1, 1983, such conversion is permitted as-of-right by the Zoning Resolution.

(5) Alterations or improvements to the exterior of a building visible from a public street, provided the alterations or improvements are made pursuant to a Permit for Minor Work, Certificate of Appropriateness, or Certificate of No Effect issued by the Landmarks Preservation Commission with respect to a landmark and the building or structure is otherwise eligible and either an existing dwelling or a building other than a private dwelling, which is being converted into a Class A multiple dwelling. Such alterations are eligible for the full amount spent on the required work whether or not the work qualifies as an MCI, provided, however, that each item of work must appear on the Itemized Cost Breakdown Schedule as set forth in §5-08.

(6) Alterations or improvements constituting a moderate rehabilitation of a substantially occupied Class A multiple dwelling, provided the project meets all the conditions set forth below:

(i) The scope of work must includes a major capital improvement in not less than one of the following five categories designated below:

(A) **Elevators:**

(a) Replacement of existing unit in its entirety;

(b) Replacement of traction machine;

(c) Replacement of one or two-speed controller; or

(d) Conversion of manual to automatic.

(B) **Heating:**

(a) Boiler and/or burner replacement; or

(b) Piping, heat, mains, risers, branches in all dwelling units.

(C) **Plumbing:**

(a) Piping (gas), risers and branches in all dwelling units;

(b) Piping (waste and vent), mains, risers branches in all dwelling units;

(c) Piping (water-main and risers), mains, risers, branches in all dwelling units; or

(d) Sprinklers, in entire building.

(D) **Wiring:**

(a) Adequate in all dwelling units; or

(b) New in all dwelling units.

(E) **Window and trim replacement:** provided that all the windows are replaced in at least ninety percent (90%) of all residential units; and

(ii) The scope of work must have an average certified reasonable cost of not less than two thousand five hundred

dollars ($2,500) for each dwelling unit in existence at the commencement of construction of the rehabilitation, comprised exclusively of major capital improvements, exclusive of any certified reasonable cost for ordinary repairs.

(iii) For the purpose of moderate rehabilitation, a Class A multiple dwelling is substantially occupied if at least sixty percent (60%) of the units are occupied by permanent residential tenants immediately prior to the start of rehabilitation, during the entire period of rehabilitation (except, in substantially governmentally assisted projects, for temporary periods of relocation pursuant to a governmentally supervised plan of temporary relocation) and immediately subsequent to completion of construction of the rehabilitation.

(7) Alterations or improvements to an existing dwelling; provided that such items of work are set forth in §5-08 and are necessary to eliminate presently existing unhealthy or dangerous conditions or to replace inadequate and obsolete sanitary facilities, including asbestos abatement to the extent required by any federal, state or local law.

(8) Alterations or improvements designated as energy conservation items in §5-08. In order to be eligible pursuant to this paragraph the building being altered or improved must be an existing dwelling.

(9) Alterations or improvements commenced on or after September 1, 1987 constituting a substantial rehabilitation of a Class A multiple dwelling or a conversion of a building or structure into a Class A multiple dwelling as part of a program to provide housing for low and moderate income households, provided that:

(i) such alterations or improvements or conversions shall be aided by a grant, loan or subsidy from any federal, state or local agency or instrumentality. For purposes of this paragraph, the term "low and moderate income households" shall mean households having an annual household income no greater than one hundred sixty-five percent (165%) of area median income for the Metropolitan Statistical Area as determined by HUD. Notwithstanding the foregoing sentence, HPD shall grant benefits to a building if no more than eighty percent (80%) of units are rented to households having an annual household income no greater than one hundred eighty percent (180%) of such area median income, provided at least twenty percent (20%) of the units in such building are rented to households with an annual household income no greater than eighty percent (80%) of such area median income.

(ii) Reserved.

(10) Conversion of a property classified under the zoning resolution as a non-profit institution with sleeping accommodations into a Class A multiple dwelling, but only if such conversion is carried out with substantial governmental assistance.

(11) Alterations or improvements to any private dwelling, or conversion of any private dwelling to a Class A multiple dwelling, or conversion of any multiple dwelling to a private dwelling, provided that in each instance the alterations, improvements or conversion are carried out with substantial governmental assistance.

(b) **Eligible items of work: major capital improvements.** (1) Items of work designated as major capital improvements in the itemized cost breakdown schedule contained in §5-08 shall be eligible for tax benefits. Except for purposes of §5-03(c)(1)(iii), any item of work set forth in §5-08 shall also be considered a major capital improvement if done pursuant to an Alteration Type-I Permit issued by the Department of Buildings or if it is part of the scope of work of a moderate rehabilitation.

(2) An existing dwelling shall not be eligible to receive tax abatement or tax exemption for any item of work designated as a major capital improvement if it is receiving tax abatement or tax exemption for the same or a similar major capital improvement at the time of application for tax benefits, except as provided in §5-04(b)(4).

(c) **Eligible items of work: ordinary repairs.** (1) Ordinary repairs are those items of work listed in the Itemized Cost Breakdown Schedule which are not preceded by an asterisk. The replacement of any component part of any item of work listed in §5-08 is also an ordinary repair. Ordinary repairs are not eligible for tax abatement unless they are:

(i) Made to a common area; and are

(A) Certified to have been started and completed within a twelve month period by an affidavit:

(a) of a registered architect or a licensed professional engineer; or

(b) by the applicant. Certification by the applicant must be substantiated to the satisfaction of the Office by cancelled checks or such other proof of payment as the Office shall require, contractors' affidavits and/or such other information as may be required by the Office to substantiate such completion of construction; and

(B) Made concurrently with a major capital improvement to such common area which requires a permit by the Department of Buildings. Ordinary repairs are made concurrently with a major capital improvement if they are started no earlier than sixty days before and no later than sixty days after the issuance of a building permit for the major capital improvement; or

(ii) Done pursuant to an Alteration Type-I Permit issued by the Department of Buildings; or

(iii) Done as part of a moderate rehabilitation pursuant to §5-03(a)(6) provided, however, that only major capital improvements shall be counted to meet the requirement of §5-03(a)(6)(ii) that the CRC for a moderate rehabilitation must equal or exceed an average of two thousand five hundred dollars ($2,500) per dwelling unit; or

(iv) In the case of projects described in §5-03(a)(9), done pursuant to an Alteration Type-II Permit.

(2) The certified reasonable cost for ordinary repairs may not exceed twice the amount actually expended on the designated concurrent major capital improvement, exclusive of any such ordinary repairs.

(3) An existing dwelling is not eligible to receive tax abatement for any item of work designated as an ordinary repair if the existing dwelling was receiving tax abatement for ordinary repairs pursuant to the Act as of the December thirty-first of the calendar year preceding the date of the application to the Office, unless the ordinary repair independently qualifies under this subdivision (c) as eligible for tax benefits. Tax abatement may not be received for repairs to any item for which benefits of tax abatement are already being received.

(d) **Time Requirements.** (1) In order to receive the tax benefits provided by the Act, eligible projects, except for conversions described in §5-03(a)(2), must be completed within thirty-six months following the commencement of construction, provided, however, a sixty month period for completion of construction following commencement of construction shall be available for alterations and improvements undertaken by a housing development fund company organized pursuant to Article 11 of the Private Housing Finance Law which:

(i) are carried out with substantial governmental assistance or

(ii) which are carried out in a property transferred from the City if alterations and improvements are completed within seven years after the date of transfer, provided that all such alterations, improvements or conversions must be completed in any event prior to December 31, 2007. Provided further, however, the Office may grant an extension of the project completion period for any project carried out with the assistance of grants, loans or subsidies from any federal, state or local agency or instrumentality if such alterations, improvements, or conversions are completed within sixty (60) months from commencement of construction.

(2) In a multi-building project, if all buildings are not completed within the thirty-six month period following commencement of construction, applications for benefits may be filed for separate buildings or separate groups of buildings which are on the same tax block and lot completed within such thirty-six month period, provided separate permits are in effect for each such filing; otherwise all work must be completed within such thirty-six month period.

(3) In order to receive the tax benefits provided by the Act, an application for certification of reasonable cost must

be filed with the Office not later than forty-eight months following the commencement of construction of the conversion, alteration or improvement, except that an application for benefits pursuant to §5-03(a)(2) must be filed not later than twelve months following completion of construction of the conversion.

(4) At the discretion of the Commissioner, an extension of the time to file to seventy-two months from the commencement of construction may be granted for any project carried out with substantial governmental assistance.

(5) An application for certification of reasonable cost must contain all documentation required by §5-05 and be completed and filed with the Office within twenty-four months of the initial filing date with the Office or the application shall be deemed withdrawn at the end of the tax quarter in which the twenty-fourth (24th) month falls, and no tax benefits shall be authorized for the conversion, alteration or improvements made thereunder. Provided, however, that for projects carried out with substantial governmental assistance and which have received a Temporary Certificate of Eligibility, the applicant must complete the application within one year of the completion of construction. Refer to §5-05 for detailed filing requirements. Applicants must notify the Office of any change of address and/or change of ownership of the property, and any change in the designated filing agent.

(6) Notwithstanding the provisions contained in paragraph five of this subdivision, an application for certification of reasonable cost must contain all documentation required by §5-05 and be completed and filed with the Office within thirty-six months of the initial filing date with the Office if the applicant is a limited profit housing company organized pursuant to article two of the private housing finance law which owns and operates a planned unit development consisting of at least fifteen thousand (15,000) dwelling units. If such application is not so completed and filed with the Office within thirty-six months of the initial filing date, the application shall be deemed withdrawn at the end of the tax quarter in which the thirty-sixth (36th) month falls, and no tax benefits shall be authorized for the conversion, alteration or improvements made thereunder.

(e) **Construction and maintenance requirements.** (1) In order to be eligible for tax benefits a building must be structurally sound and must comply with applicable laws including, but not limited to, the Building Code, the Multiple Dwelling Law, the Housing Maintenance Code and the Zoning Resolution.

(2) The following subparagraphs set forth the minimum number of bedrooms required by the Act.

(i) Buildings converted to Class A multiple dwellings, buildings where the configuration has been altered to increase the number of units, and existing dwellings which have been substantially rehabilitated must contain bedrooms in a number equal to seventy-five (75%) percent of the dwelling units contained therein in order to be eligible to receive tax benefits.

(ii) The bedroom count requirement set forth in subparagraph (i) above is not applicable to non-residential buildings or structures converted to Class A multiple dwellings when the resulting dwelling units therein contained an average floor area of one thousand square feet or more.

(iii) A substantial rehabilitation of an existing dwelling shall be exempt from the provisions of this paragraph (2) in the event that (A) the number of dwelling units in such existing dwelling is not thereby increased and (B) the number of bedrooms in such existing dwelling is not thereby reduced.

(iv) For purposes of the bedroom count requirement set forth in subparagraphs (i) and (ii) above, dwelling units which contain a combined living/dining/kitchen space in excess of three hundred and twenty-five square feet may be deemed to include both a kitchen and living room, so that any additional rooms may be considered bedrooms, under subparagraphs (i) and (ii) above.

(3) No building shall be eligible to receive benefits pursuant to the Act unless all of the dwelling units contained therein are Class A dwelling units as defined in §4 of the Multiple Dwelling Law, and have complete sanitary facilities and a complete kitchen or kitchenette for the exclusive use of the person or family residing in such unit, provided,

however, if a building contains both Class A and Class B units, benefits may be pro-rated as set forth in §5-03(f)(4). Class B units may be eligible to apply to the Office for tax benefits pursuant to § 11-244 of the Administrative Code.

(f) **Rent regulatory requirements.** (1) **Rent regulation generally mandatory.** In order to be eligible to receive tax benefits under the Act and for at least so long as a building is receiving the benefits of the Act, except for dwelling units which are exempt from such requirement pursuant to paragraph (2) below, all dwelling units in buildings or structures converted, altered or improved shall be subject to rent regulation pursuant to:

(i) the City Rent and Rehabilitation Law (§26-401 et seq. of the Administrative Code); or

(ii) the Rent Stabilization Law of 1969 (§26-501 et seq. of the Administrative Code); or

(iii) the Private Housing Finance Law; or

(iv) any federal law providing for rent supervision or regulation by HUD or any other federal agency; or

(v) the Emergency Tenant Protection Act of 1974.

(2) **Exemption from rent regulation.**

(i) Notwithstanding paragraph (1) above, dwelling units in multiple dwellings which are owned as cooperatives or condominiums and which are not regulated pursuant to any of such laws shall not be required to be subject to rent regulation.

(ii) Newly created dwelling units in a building for which a prospectus for condominium or cooperative formation has been submitted to the Attorney General at the time of application for benefits to the Office shall not be required to registered with DHCR, unless a plan of cooperative or condominium ownership has not been declared effective within fifteen (15) months of the date of the acceptance for filing of the plan of cooperative or condominium ownership with the Attorney General.

(3) **Deregulation of units.** (i) With respect to a dwelling unit in any building receiving benefits under the Act,

(A) such unit shall remain subject to rent regulation until the occurrence of the first vacancy after tax benefits are no longer being received for the building at which time the unit shall be deregulated, unless the unit is otherwise subject to rent regulation; or

(B) if each lease and renewal thereof for such unit for the tenant in residence at the time of the expiration of the tax benefits has included a notice in at least twelve point type informing such tenant that the unit shall become subject to deregulation upon the expiration of the tax benefits and stating the approximate date on which tax benefits are to expire, such dwelling unit shall be deregulated after tax benefits are no longer being received for the building, unless the unit is otherwise subject to rent regulation.

(ii) Rent regulation shall not be terminated by the waiver or revocation of tax benefits.

(iii) Rent regulation of dwelling units shall not be exempted or terminated other than as set forth in this subdivision (f) as long as benefits are in force.

(4) **Permanent residential use.** All dwelling units must be leased for permanent residential purposes for a term of not less than one year so long as tax benefits are in effect. Permanent residential use shall not include use as a hotel, dormitory, employee residence or facility, fraternity or sorority house, resort housing or any similar type of non-permanent housing. For purposes of this chapter, a "hotel" shall mean (i) any Class B multiple dwelling, as such term is defined in the Multiple Dwelling Law, (ii) any structure or part thereof containing living or sleeping accommodations which is used or intended to be used for transient occupancy, (iii) any apartment hotel or transient

hotel as defined in the Zoning Resolution, or (iv) any structure or part thereof which is used to provide short term rentals or owned or leased by an entity engaged in the business of providing short term rentals. For purposes of this definition, a lease, sublease, license or any other form of rental agreement for a period of less than six months shall be deemed to be a short term rental. Notwithstanding the foregoing, (i) a structure or part thereof owned or leased by a not-for-profit corporation for the purpose of providing governmentally funded emergency housing shall not be considered a hotel for purposes of this chapter, and (ii) benefits may be pro-rated by deducting out work attributable to Class B units in a building containing both Class A and Class B units, provided that all units in a building are registered with DHCR as rent stabilized or rent controlled units, and are utilized for permanent residential use.

(5) **Escalation clauses in leases.** Except for the notice referred to in subparagraph (i)(B) above, no lease for dwelling units which are registered with DHCR shall contain escalation clauses for real estate taxes or any other provisions for increasing the rent set forth in the lease, other than permitting an increase in rent pursuant to an order of DHCR or the Rent Guidelines Board.

(6) **Partial waiver of rent adjustments attributable to major capital improvements.** (i) As a requirement for claiming or receiving any tax abatement attributable to a major capital improvement, the owner of the property shall file with the Office, on the date any application for benefits is made, a declaration stating that in consideration of any tax abatement benefits which may be received pursuant to such application for alterations or improvements constituting a major capital improvement, such owner agrees to waive the collection of a portion of the total annual amount of any rent adjustment attributable to such major capital improvement which may be granted by DHCR pursuant to the rent stabilization code equal to one-half of the total annual amount of the tax abatement benefits which the property receives pursuant to such application with respect to such alterations or improvements. For example, an owner receiving a total rent adjustment over eighty-four months equal to $100,000 for a major capital improvement along with tax abatement of $100,000 for the same improvement would waive collection of $50,000 during such period. Such waiver shall commence on the date of the first collection of such rent adjustment, provided that, in the event that such tax abatement benefits were received prior to such first collection, the amount waived shall be increased to account for such tax abatement benefits so received. The entire amount shall be applied against the first annual rent adjustment, including any retroactive rent adjustments which may be granted by the applicable DHCR order, unless the amount exceeds such adjustments, in which event the excess shall be carried forward. The calculation of the amount attributable to the waiver shall be against the total rent adjustment for the eighty-four month period prior to the application of any annual percentage limitation applied by DHCR to defer collection of the total rent adjustment. In calculating rental adjustments pursuant to Rent Guidelines Board orders the amount of the waived rent shall not be included in the base rent. Following the expiration of a tax abatement for alterations or improvements constituting a major capital improvement for which a rent adjustment has been granted by DHCR, the owner may collect the full amount of annual rent permitted pursuant to such rent adjustment. A copy of such declaration shall be filed simultaneously with DHCR. Such declaration shall be binding upon such owner, and his or her successors and assigns.

(ii) The provisions of subparagraph (i) shall not apply to substantial rehabilitation of buildings vacant when alterations or improvements are commenced or to buildings rehabilitated with substantial governmental assistance.

(g) **Eligibility rules for cooperatives and condominiums.** (1) Buildings owned as cooperatives or condominiums are eligible for tax exemption pursuant to the Act, provided the work is eligible pursuant to §5-03(a).

(2) Eligibility for tax abatement is limited to: (i) Cooperatives and condominiums, for alterations and improvements completed prior to or within thirty-six months after the first closing in a condominium to a bona fide purchaser occurs or in the case of a cooperative thirty-six months from the date on which the first shares allocable to a unit are conveyed to a bona fide purchaser, or

(ii) Any cooperative or condominium in which dwelling units have been newly created by the substantial rehabilitation of a vacant building or the conversion of a non-residential building, or

(iii) Any cooperative or condominium, for alterations and improvements commenced on or prior to August 7, 1992 which meets the following requirements:

(A) Alterations or improvements to at least one building-wide Major Capital Improvement as set forth in §5-03(a)(6)(i) or a new roof (at least seventy-five percent (75%) of the aggregate roof area is replaced or covered with new roofing) are part of the application for benefits, and

(B) the actual assessed valuation of such multiple dwelling shall not exceed an average of thirty thousand dollars ($30,000) per dwelling unit at the time of commencement of construction of the alterations and improvements, and

(C) during the three years immediately preceding the commencement of construction of the alterations and improvements the average per room sale price of the dwelling units or the stock allocated to such dwelling units shall have been no greater than thirty-five percent (35%) of the maximum mortgage amount for a single family house eligible for purchase by the Federal National Mortgage Association, provided, that if an amount less than ten percent (10%) of the dwelling units or an amount of stock less than the amount allocable to ten percent (10%) of such dwelling units was transferred during such preceding three year period, eligibility for benefits shall be conditioned upon the multiple dwelling having an actual assessed valuation per dwelling unit of no more than twenty-five thousand dollars ($25,000) at the time of commencement of construction of any such alterations or improvements.

(D) Assessed valuation shall be actual assessed valuation and not the transitional assessed value.

(E) The maximum amount of tax abatement which may be applied against taxes due in any tax year by any cooperative or condominium claiming benefits under this §5-03(g)(2)(iii) shall be limited to two thousand five hundred dollars ($2,500) per dwelling unit.

(iv) Any cooperative or condominium, for work commenced after August 7, 1992 which meets the following requirements:

(A) the actual assessed valuation of such multiple dwelling shall not exceed an average of forty thousand dollars ($40,000) per dwelling unit at the time of the commencement of construction of the alterations and improvements, and

(B) during the three years immediately preceding the commencement of construction of the alterations and improvements the average per room sale price of the dwelling units or the stock allocated to such dwelling units shall have been no greater than thirty-five percent (35%) of the maximum mortgage amount for a single family house eligible for purchase by the Federal National Mortgage Insurance Corporation provided that if an amount less than ten percent (10%) of the dwelling units or an amount of stock less than the amount allocable to ten percent (10%) of such dwelling units was not transferred during such preceding three year period eligibility for benefits shall be conditioned upon the multiple dwelling having an actual assessed valuation per dwelling unit of no more than forty thousand dollars ($40,000) at the time of the commencement of construction of the alteration or improvement.

(C) Assessed valuation shall be actual assessed valuation and not the transitional assessed value.

(D) The maximum amount of tax abatement which may be applied against taxes due in any tax year by any cooperative or condominium claiming benefits under this §5-03(g)(2)(iv) shall be limited to two thousand five hundred dollars ($2,500) per dwelling unit.

(E) Notwithstanding anything to the contrary contained in this subparagraph (iv), the availability of any benefits pursuant to the Act to any multiple dwelling, building or structure owned and operated by a limited-profit housing company established pursuant to article two of the Private Housing Finance Law shall not be conditioned upon the assessed valuation of such multiple dwelling, building or structure, including land, as calculated as an average dollar amount per dwelling unit, at the time of commencement of the alterations or improvements; provided, however, that such limited-profit housing company (1) is organized and operating as a mutual company, (2) continues to be organized

and operated as a mutual company and to own and operate the multiple dwelling, building or structure receiving such benefits, and (3) has entered into a binding and irrevocable agreement with the commissioner of housing of the state of New York, the supervising agency, the New York city housing development corporation, or the New York state housing finance agency prohibiting dissolution or reconstitution of such limited-profit housing company pursuant to section thirty-five of the Private Housing Finance Law for not less than fifteen years from the commencement of such benefits.

(v) For purposes of determining the number of rooms in applying the limitations contained in §5-03(g)(2)(iii) and (iv), the number of zoning rooms shall be used unless there is no filing with the Department of Buildings indicating the number of zoning rooms, in which case the number shall be either:

(A) the room count as evidenced in the plan of cooperative or condominium ownership, or

(B) at the discretion of the Office, the room count as certified by a licensed architect.

(vi) Where the building is occupied in part for residential purposes and in part for non-residential purposes, the assessed valuation of the property shall be allocated by the Office between the residential and the non-residential portions based on pro rata square footage, unless the non-residential portion is on a separately assessed tax lot, and only the amount of valuation allocated to the residential portion shall be considered in computing the assessed valuation per dwelling unit for purposes of §5-03(g)(2)(iii) and (iv).

(h) **Special requirements for moderate rehabilitation and special non-harassment provisions.** (1) **Special requirements for moderate rehabilitation.**

(i) In order to be eligible for tax benefits pursuant to §5-03(a)(6), an applicant must:

(A) Not more than one hundred eighty days nor less than thirty days prior to the commencement of construction of rehabilitation, complete form MR-1 (notice to tenants) and send it by registered or certified mail, return receipt requested, to all tenants residing in the building to be rehabilitated and post a copy conspicuously in the building lobby; and

(B) Complete form MR-2 (affidavit that MR-1 was mailed) and file it with the Office not less than thirty days prior to the start of rehabilitation.

(ii) If more than one hundred eighty days elapse between the date Form MR-1 is mailed to any tenant and the date rehabilitation actually commences, new Forms MR-1 and MR-2 must be completed and mailed and posted and filed as required by subparagraphs (i) and (ii) of this paragraph (1) provided that, in the case of a loan program supervised by HPD, notice to HPD shall be unnecessary, and further provided that HPD may itself provide the required notice to tenants prior to commencement of construction in lieu of the MR-1 written notice and MR-2 affidavit.

(iii) In the discretion of the Office, in lieu of the requirements established by subparagraphs (i) and (ii) of this paragraph (1), the applicant may establish by proof satisfactory to the Office that it has provided notice to HPD and to the tenants residing in the building to be rehabilitated of (A) the proposed work prior to commencement of such work, (B) the identity of the owner's representative, and (C) the tenants' rights under applicable law with respect to such work.

(2) **Special non-harassment provisions.** In order to be eligible for any tax exemption pursuant to the Act, irrespective of the cost of the conversion, alteration or improvement, or to be eligible for tax abatement when the CRC per dwelling unit exceeds seven thousand five hundred dollars ($7,500) (including the cost of any conversion, alteration or improvement for which an abatement was approved within four years prior to commencement of construction of the contemplated project), the owner of the property shall file with the Office, not less than thirty days before the commencement of construction of the conversion, alteration or improvement (the "cut-off date"), an affidavit, or, at the time of application, a late filing affidavit or, where any information referred to in §5-03(h)(2)(i) below changes prior to applying for or claiming any benefit under this subdivision (h), an amended affidavit, setting forth the following

information:

(i) every owner or record and owner of a substantial interest in the property or entity owning the property or sponsoring the conversion, alteration or improvement;

(ii) a statement that none of such persons had, within the five years prior to the cut-off date, been found to have harassed or unlawfully evicted tenants by judgment or determination of a court or agency (including a non-governmental agency having appropriate legal jurisdiction) under the penal law, any state or local law regulating rents or any state or local law relating to harassment of tenants or unlawful eviction; and

(iii) any change in the information required to be set forth.

(3) No conversion, alteration or improvement subject to paragraph (2) of this subdivision (h) shall be eligible for tax exemption or tax abatement under the Act where:

(i) any affidavit required under paragraph (2) has not been filed; or

(ii) any such affidavit contains a willful misrepresentation or omission of any material fact; or

(iii) any person referred to in §5-03(h)(2)(i) has been found to have harassed or unlawfully evicted tenants until and unless the finding is reversed on appeal, provided that any such finding after the cut-off date shall not apply to or affect any tax abatement or exemption for the conversion, alteration or improvement covered by the affidavit.

NOTE

1. Statement of Basis and Purpose in City Record May 11, 2001:

This proposed amended rule gives large planned unit developments with at least 15,000 dwelling units that are owned and operated by limited profit housing companies organized under Private Housing Finance Law Article 2 (the "Mitchell-Lama" law) twelve additional months to complete their applications for real property tax benefits under Real Property Tax Law §489 and New York City Administrative Code §11-243 (the "J-51" program). The additional twelve months (other applications must be completed within twenty-four months from the date of filing) is in recognition of the fact that the rehabilitation work being done at such communities is on a far more extensive scale, making the filing of the supplemental documentation necessary to complete a J-51 application a lengthier and more cumbersome process. These extra twelve months will give such communities the additional time they need to prepare the necessary paperwork to qualify for much needed tax exemptions/abatements available pursuant to the J-51 program.

2. Statement of Basis and Purpose in City Record Nov. 30, 2004: The fee charged in connection with applications for tax exemption and abatement benefits under the J-51 Program (Real Property Tax Law §489 and New York City Administrative Code §11-243) has not been adjusted for almost thirteen years. The cost of administering J-51 benefits now significantly exceeds the fee. This increase will reduce, but not eliminate, the shortfall. Furthermore, the Tax Incentives Program itself now has the technology to search for hazardous or immediately hazardous violations when it is processing J-51 applications. Therefore, once these amendments take effect, HPD will no longer require an applicant to submit a Code Violation Search report from HPD's Division of Code Enforcement, or charge a fee for an applicant's failure to do so. Finally, the rule amendments reflect new federal rules that will take effect on October 28 implementing the Check Clearing for the 21st Century Act ("Check 21 Act"). The Check 21 Act lets banks use electronic-check processing efficiencies to cut an estimated $2 billion a year from the cost of moving, clearing and returning paper checks. Under the Check 21 Act, banks can warrant as an accurate and legible representation of the original check a brand new legal proof of payment called the "substitute check" (which is a special paper copy). The rule amendments enable HPD to accept instruments other than cancelled checks as proof of payment in order to determine the cost of the work performed.

3. Statement of Basis and Purpose in City Record Dec. 1, 2004: The State Legislature has enacted Chapter 418 of the Laws of 2002, which amends the Real Property Tax Law to extend the date by which a development must be completed to be eligible to receive J-51 benefits from December 31, 2003 to December 31, 2007. It also extended the ability of a local legislative body (City Council) to adopt the changes contained in the State-enabling legislation from June 1, 2003 to June 1, 2007. Finally, the State bill authorized the extension of enriched J-51 benefits to privately-owned substantially rehabilitated buildings if affordable housing is created in connection with a government subsidy, loan or grant. Last year, the City Council adopted Local Law 16 for the year 2003, which implemented chapter 418's amendments. The J-51 rules are being amended to reflect these changes.

4. Statement of Basis and Purpose in City Record Apr. 21, 2005: Real Property Tax Law §§421-a and 421-g both expressly state that hotels are not eligible for the respective tax exemption benefits. However, neither statute defines "hotel". Similarly, Administrative Code §11-243(r) provides for the withdrawal of J-51 benefits if a structure becomes operated exclusively for hotel use, but does not define "hotel". The proposed amendment clarifies that space owned or leased by a not-for-profit corporation for the purpose of providing governmentally funded emergency housing is not a hotel.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-04 Ineligible Projects, Items of Work.

(a) **Ineligible projects.** The tax benefits of the Act are not available to:

(1) Any tax lot which is receiving tax exemption or tax abatement under any other provision of state or local law for rehabilitation or new construction, including but not limited to §420-c, §421-a, §421-b, §421-g, and §488-a of the Real Property Tax Law, but not including the provisions of the Private Housing Finance Law as of the date that the Certificate of Eligibility is issued.

(2) Any building for which real estate taxes, water or sewer charges, payments in lieu of taxes, emergency repair or relocation liens are due and owing or not satisfied of record as of the last day of the tax quarter preceding the submission date of the Certificate of Eligibility to the Department of Finance, provided that a property rehabilitated by a loan pursuant to Article 8 or Article 15 of the Private Housing Finance Law shall not be ineligible pursuant to this section if there are no real estate taxes or water and sewer charges due and owing as of the last day of a tax quarter preceding commencement of construction of such rehabilitation. The benefits of tax exemption and tax abatement shall not be denied to any property pursuant to this section on account of unpaid real estate taxes, water or sewer charges provided the applicant or his predecessor in title has entered into an installment agreement with the City pursuant to §11-401 et seq. of the Administrative Code and all payments required by said installment agreement have been paid when due.

(3) Any multiple dwelling which results from the conversion of a private dwelling except as provided in §5-03(a)(11).

(4) The conversion, alteration or improvement, commenced on or after July 1, 1982, of any Class B multiple dwelling or Class A multiple dwelling used in whole or in part for single room occupancy regardless of the status or use of the building after the conversion, alteration or improvement, unless such conversion, alteration or improvement is carried out with substantial governmental assistance.

(5) Any property for which the improvement is assessed at one thousand dollars ($1,000) or less at the commencement of construction of alterations, improvements or conversion, provided that such assessed valuation test shall not apply if the alterations, improvements or conversion is carried out with substantial governmental assistance.

(6) Any building or structure that results from new construction as distinguished from rehabilitation, alterations, improvements or conversion, as evidenced by issuance of a building permit for new construction. In order for a building to be characterized as rehabilitated, altered, improved or converted, one of the following conditions must be met before, during and after construction:

(i) At least seventy-five percent (75%) of the total area of the original perimeter walls, but in any event at least fifty percent (50%) of the total area of the original non-party perimeter walls, must remain in place as perimeter walls in the building for which benefits are claimed; or

(ii) At least eighty percent (80%) of the original structural floor area of the building must remain in place as structural floor in the building for which benefits are claimed.

(7) The conversion of any building, or portion thereof.

(i) which is located within any district in the County of New York where a floor area ratio, as that term is defined in the Zoning Resolution, of fifteen or greater is permitted by said resolution, or

(ii) located in the City where residential conversion as-of-right is not permitted by said resolution, unless construction actually commenced in the County of New York prior to January 1, 1982, or in the Counties of Kings, Queens, Richmond or the Bronx prior to October 1, 1983, pursuant to an alteration permit, or unless the building is eligible for the benefits of the Act pursuant to §5-03(a)(2).

(8) Any conversion commenced on or after June 28, 1988 of any property classified under the Zoning Resolution as a non-profit institution with sleeping accommodations, unless such conversion is carried out with substantial governmental assistance.

(b) **Ineligible items of work.** The tax benefits of the Act are not available for:

(1) Alterations or improvements done in connection with the refinancing of a housing project pursuant to §223(f) of the National Housing Act, as amended.

(2) Any portion of a building that results from new construction as distinguished from alterations or improvements or which represents an increase in the gross cubic content of a building from the gross cubic content in existence immediately prior to commencement of construction.

(3) Any portion of a building occupied by stores, professional offices, community facilities or otherwise used for commercial or non-residential purposes pursuant to the classifications set forth in the Zoning Resolution.

(4) Any item of work if a building is receiving tax abatement for the same or a similar item of work at the time of application for the benefits of the Act, provided, however, that if an item or a system which was previously repaired is replaced in its entirety while the building is still receiving the benefits of the Act for such repair, tax benefits for the replacement shall be granted only to the extent that the certified reasonable cost of the replacement exceeds the amount of the previously granted certified reasonable cost attributable to the repair.

(5) An existing dwelling is not eligible to receive tax abatement for any item of work designated as an ordinary repair if the existing dwelling was receiving tax abatement for ordinary repairs pursuant to the Act as of the December thirty-first of the calendar year preceding the date of the application to the Office, unless the ordinary repair independently qualified under §5-03(c) as eligible for tax benefits. Tax abatement may not be received for repairs to any items for which benefits of tax abatement are already being received.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 5-05

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-05 Application Procedure: Documentation.

(a) **Application forms and filing.** Prescribed forms and applications are available from the Department of Housing Preservation and Development, Office of Tax Incentive Programs, 100 Gold Street, 1st Floor, New York, New York 10038. All applications must be submitted to the Office on forms approved by the Office. Only applications complete in all detail will be considered for certification of eligibility and reasonable cost. All forms must be filled out fully and legibly by the applicant and shall be typewritten or inscribed in permanent ink. Applications and supporting documentation may only be submitted to the Office for review and approval after the completion of construction of work and during the following four filing periods: February 1/March 15; May 1/June 15; August 1/September 15; November 1/December 15. If the fifteenth of March, June, September or December falls on a City holiday or on a weekend, the filing period shall end on the next business day.

(b) **Preliminary application.** All applicants who intend to apply for tax exemption and tax abatement when they complete conversion, alteration or improvements must file a notice of intent form (form J-11) with the Department of Finance which describes the work for which tax benefits will be claimed, estimates the cost of the work for which tax benefits will be claimed and estimates the cost of the work which will be eligible for tax benefits. Such form must be filed not less than 45 days prior to the commencement of construction. If the scope of the work or the estimated cost changes materially, applicants must file a revised form with the Department of Finance. Applicants who fail to comply with the provisions of this subdivision (b) must pay a penalty at the time of issuance of a Certificate of Eligibility and Reasonable Cost of five hundred dollars ($500) plus an amount equal to one percent (1%) of the amount stated on the Certificate of Eligibility and Reasonable Cost in excess of ten thousand dollars ($10,000), provided that HPD may waive the penalty for projects receiving substantial governmental assistance. The penalty prescribed by this §5-05(b) is

in addition to the normal filing fees prescribed in §5-05(f). Notwithstanding the foregoing, an applicant who performs an abatement of lead-based paint hazards shall not be required to file a notice of intent form (form J-11) with the Department of Finance prior to commencement of work, and no additional fee or penalty shall be due and owing HPD at the time of issuance of a certificate of eligibility and reasonable cost for failure to file such notice of intent.

(c) **Documentation required of all applicants.** All applicants must maintain documents relating to claimed costs as specified in §5-07(b), and all completed applications for final tax benefits must include the following documentation of the applicant's actual expenditures properly organized and collated in time sequence:

(1) Original and four copies of the application form; and

(2) one copy of the following:

(i) Paid bills, cancelled checks, installment agreements, and the work contract and any change orders, indicating work, location of building, and quantity in appropriate unit of measurement all in a form corresponding to the individual items on the Itemized Cost Breakdown Schedule so that the claimed costs can be audited by HPD against the specific items and allowances contained in such schedules; or

(ii) A disposition of funds statement or certification by the Commissioner of the cost of the work based upon other program records where the alterations, improvements, or conversions are undertaken aided by a loan made pursuant to Article 8, 8-a, 11, 12, 15 or 22 of the Private Housing Finance Law or §312 of the United States Housing Act of 1964 (42 U.S.C. §1452 b), or the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. §12701 et seq.) or §696-a or §99(h) of the General Municipal Law, or any other City-supervised housing program, or, in the discretion of the Office, other governmentally-supervised housing program; or

(iii) in the discretion of the Office, a certification by an independent certified public accountant of the cost of the conversion, alterations or improvements, in accordance with generally accepted auditing standards and based upon the books and records of the owner provided that the original records are retained as set forth in §5-07 and are available for audit purposes; or

(iv) in the case of applications for buildings under §5-03(a)(9), a designated special application form may be submitted including the general contract (if applicable), trade payment breakdown schedule and an HPD inspection report or an HPD-approved construction monitor's certificate of completion. The Office, upon receipt of appropriate documentation, may determine that each such project has incurred eligible costs of at least twenty thousand dollars ($20,000) in CRC per unit and grant a Certificate of Eligibility and Reasonable Cost for one hundred and fifty percent (150%) of such amount, i.e., thirty thousand dollars ($30,000) in CRC per unit; and

(3) Plans and amendments, if any, approved by the Department of Buildings; and

(4) Proof of commencement of construction:

(i) Copy of a building permit issued by the Department of Buildings; or

(ii) The Office may require that the date of commencement of construction be confirmed by an affidavit from the owner together with, at the discretion of the Office, such other information as the Office may require to substantiate such date, including but not limited to, an affidavit of a registered architect or licensed professional engineer, a copy of the work contract, invoices, cancelled checks or such other proof of payment as the Office shall require, and a contractor's affidavit. If a Permit from the Department of Buildings is not required and if the cost of the work claimed is less than ten thousand dollars ($10,000) the Office may, in its discretion, accept an owner's affidavit as to the date of the commencement of construction, and waive some or all of the additional evidence or information. If an application contains a series of major capital improvements, the commencement of construction date is that of the first major capital improvement for which benefits are claimed; and

(5) Proof of completion:

(i) A Permanent Certificate of Occupancy; or

(ii) A Temporary Certificate of Occupancy for all of the dwelling units therein, and an affidavit from a registered architect or licensed engineer and the owner that the only work remaining to secure a permanent Certificate of Occupancy is work to be performed or completed in space to be used exclusively for non-residential purposes; or

(iii) A sign-off by the Department of Buildings as evidenced by the J-3, a computer printout or such other official documentation as may be required by the Department of Buildings and is acceptable to the Office if issued in connection with an eligible alteration, improvement or conversion; or

(iv) If none of the above are required by law, completion of construction may be confirmed by the submission of such information as may be required by the Office, including but not limited to a copy of the work contract, invoices, cancelled checks or such other proof of payment as the Office shall require, disposition of funds statements, certification by the Commissioner based on program records or inspection, and a contractor's affidavit which confirm such completion of construction date to the satisfaction of the Office. If none of the documents set forth above are required by law and if the cost of the work claimed is less than ten thousand dollars ($10,000), the Office may, in its discretion, accept an owner's affidavit as to the date of completion of construction and waive some or all of the additional evidence and information.

(6) **Proof of compliance with the Housing Maintenance Code. (a)** For applications received on or before December 30, 2004: Unless a Certificate of Occupancy has been issued within one year of the date of submission of the application, for all units for which benefits are claimed, a report of search from the Division of Code Enforcement of the Department of Housing Preservation and Development dated no earlier than ninety days prior to the date of submission of an application is required. In lieu of the latter, a building profile from the Department of Housing Preservation and Development may be submitted indicating that there are no violations of record which are classified as hazardous or immediately hazardous. If hazardous or immediately hazardous violations of record appear, the applicant must either clear the violations of record or submit affidavits:

(i) from a registered architect, or a licensed professional engineer, certifying that the architect or engineer has inspected the premises and that work necessary to remove any hazardous or immediately hazardous violations has been completed. If a violation classified as hazardous or immediately hazardous was caused by a tenant and the tenant refuses to grant access to the applicant to correct the violation, such violation will not preclude eligibility provided the applicant can establish these facts with clear and con- vincing evidence; and

(ii) from the owner, certifying that the architect or engineer has inspected the premises and that work necessary to remove any hazardous or immediately hazardous violations has been completed. If a violation classified as hazardous or immediately hazardous was caused by a tenant and the tenant refuses to grant access to the applicant to correct the violation, such violation will not preclude eligibility provided the applicant can establish these facts with clear and convincing evidence.

(b) For applications received after December 30, 2004 for which a Certificate of Occupancy has not been issued within one year of the date of submission of such application for all units for which benefits are claimed: If a search by the Department of Housing Preservation and Development dated no earlier than ninety days prior to the date of submission of such application indicates that there are any violations of record which are classified as hazardous or immediately hazardous, the applicant must either clear the violations of record or submit affidavits:

(i) from a registered architect, or a licensed professional engineer, certifying that the architect or engineer has inspected the premises and that work necessary to remove any hazardous or immediately hazardous violations has been completed. If a violation classified as hazardous or immediately hazardous was caused by a tenant and the tenant refuses to grant access to the applicant to correct the violation, such violation will not preclude eligibility provided the applicant

can establish these facts with clear and con- vincing evidence; and

(ii) from the owner, certifying that the architect or engineer has inspected the premises and that work necessary to remove any hazardous or immediately hazardous violations has been completed. If a violation classified as hazardous or immediately hazardous was caused by a tenant and the tenant refuses to grant access to the applicant to correct the violation, such violation will not preclude eligibility provided the applicant can establish these facts with clear and convincing evidence.

(7) Applications for benefits pursuant to §§5-03(a)(2), (3) or (4) must provide proof of compliance with the relocation requirements of §11-243(z) of the Act.

(8) Department of Buildings Certification for Tax Exemption and Tax Abatement (Form J-3) or, if no permits from the Department of Buildings are required, at the option of the Office, alternative documentation to prove absence of Building Code violations.

(9) Proof that the building has been registered with HPD in accordance with the provisions of article two of subchapter four of the Housing Maintenance Code.

(10) (i) For applications received on or after March 19, 2006, an affidavit from the owner certifying that whenever any household appliance in any dwelling unit, or any household appliance that provides heat or hot water for any dwelling unit in the multiple dwelling, is installed or replaced with a new household appliance on or after March 19, 2006, such new appliance shall be certified as Energy Star. If applicable, such affidavit may instead certify (A) that an appropriately-sized Energy Star certified household appliance is not manufactured, such that movement of walls or fixtures would be necessary to create sufficient space for such appliance, and/or (B) that an Energy Star certified boiler or furnace of sufficient capacity is not manufactured.

(ii) For purposes of this paragraph (10), (A) "household appliance" shall mean any refrigerator, room air conditioner, dishwasher or clothes washer, within a dwelling unit in the multiple dwelling that is provided by the owner, and any boiler or furnace that provides heat or hot water for any dwelling unit in the multiple dwelling, and (B) "Energy Star" shall mean a designation from the United States Environmental Protection Agency or Department of Energy indicating that a product meets the energy efficiency standards set forth by the agency for compliance with the Energy Star program.

(d) **Additional documentation for buildings owned as cooperatives or as condominiums.** Buildings owned as cooperatives or condominiums must submit the following additional documentation:

(1) An opinion of counsel which states that the building is a legal cooperative or condominium and which has a prospectus accepted for filing by the Attorney General, or was formed prior to the date of prospectus was required by law, or is exempt for other reasons from the filing requirements; and

(2) If benefits are claimed under §5-03(g)(2)(i), evidence of the first sale of a condominium unit or shares of stock allocable to a cooperative unit in a form required by the Office; and

(3) A copy of the prospectus or offering plan which has been accepted for filing by the Attorney General, and all subsequent amendments which become effective prior to the time the Office issues a Certificate of Eligibility and Reasonable Cost for any cooperative or condominium eligible for tax abatement pursuant to §5-03(g).

(4) Provided, however, if benefits are being claimed under §5-03(g)(2)(iii) or §5-03(g)(2)(iv), evidence shall be submitted with respect to assessed valuation per unit and the average per room sale price during the three years preceding the application in a form prescribed by the Office.

(e) **Additional documentation for certain alterations or improvements.** Certain alterations and improvements

require the approval of designated agencies and such additional documentation as the Office shall require. The "Schedule of Required Information, Permits and Sign-offs" set forth in §5-09 of these rules contains a list of the documentation that the Office requires for specific alterations and improvements.

(f) **Filing Fees.** (1) Applicants must submit a non-refundable application fee with each application in the amount of five hundred ($500) dollars. Upon notification of a determination of reasonable cost in excess of ten thousand dollars ($10,000) and prior to issuance of the Certificate of Reasonable Cost, the applicant must pay an additional fee in an amount equal to one percent (1%) of the reasonable cost in excess of ten thousand dollars ($10,000). If applicable, the penalty prescribed by §5-05(b) must also be paid at this time.

(2) If a Code Violation Search report is not submitted with an application submitted on or before December 30, 2004 in accordance with §5-05(c)(6)(a), an additional non-refundable filing fee equal to the fee charged by the HPD Division of Code Enforcement, currently thirty dollars ($30), must be submitted to cover the cost of processing such search. This fee must be submitted simultaneously with the five hundred dollar ($500) application fee.

(3) Payment of all fees must be made by certified or cashier's check or a check from an attorney or owner/agent payable to the "NYC Department of Finance NYCJ51 Fee". In the event a check is returned unpaid, the applicant shall be assessed a fifty dollar ($50) processing fee and all further payments with respect to the application shall be made by certified or cashier's check.

(g) **Issuance of a certificate of eligibility.** (1) The Office shall review each application to determine if it is eligible for tax benefits in accordance with the provisions of these rules and the Act. The Office will inform an applicant if the file is incomplete; however, it is the applicant's responsibility to complete the application within twenty-four months of the initial filing date as provided in §5-03(d)(5). Provided, however, that for projects carried out with substantial governmental assistance and which have received a Temporary Certificate of Eligibility, the applicant must complete the application within one year of the completion of construction.

(2) The certified reasonable cost for all eligible items of work shall be calculated as follows:

(i) The certified reasonable cost for all eligible items of work shall be the lesser of the applicant's actual cost, or the allowance set forth in the Itemized Cost Breakdown Schedule.

(ii) The certified reasonable cost for all eligible items of work shall be reduced where such items are allocable in whole or part to, or service, ineligible portions of the building, if any, in the same ratio as the ineligible space bears to the aggregate floor area of the building.

(iii) For buildings eligible for enriched abatement as provided in §5-06(c)(1) the total certified reasonable cost shall not exceed the lesser of the owner's total actual expenditure or one hundred fifty percent (150%) of the total of the Itemized Cost Breakdown Schedule amounts set forth in §5-08.

(iv) For buildings subject to the dollar limit set forth in §5-06(d), the aggregate certified reasonable cost may not exceed the maximum eligible CRC set forth therein.

(v) In the event there is any identity of interest between the owner and the contractor, cost shall be determined based on subcontracts and the evidence of actual cost of labor and materials.

(3) The Office shall issue a Certificate of Eligibility and Reasonable Cost for all approved applications. Failure to produce satisfactory supporting documentation of the cost of an alteration, improvement or conversion, or any part thereof, or any of the items specified in this chapter may result in the denial of a Certificate of Eligibility and Reasonable Cost.

(h) **Filing procedure with the Department of Finance.** (1) For cooperatives and condominiums with an average

transitional assessed valuation per dwelling unit of less than forty thousand dollars ($40,000), in order to receive tax abatement beginning on the first day of any tax quarter, the applicant must file a Certificate of Eligibility and Reasonable Cost with the appropriate borough Office of the Real Property Assessment Bureau of the Department of Finance during the third month preceding the start of such tax quarter; i.e.: January 1 through January 31 for the tax quarter beginning April 1, April 1 through April 25 for the tax quarter beginning July 1, July 1 through July 31 for the tax quarter beginning October 1, October 1 through October 31 for the tax quarter beginning January 1.

(2) For cooperatives and condominiums with an average transitional assessed valuation per dwelling unit of forty thousand dollars ($40,000) or more, and for all other buildings receiving benefits, in order to receive tax abatement beginning on the first day of January or July of any year, the applicant must file a Certificate of Eligibility and Reasonable Cost with the appropriate borough office of the Real Property Assessment Bureau of the Department of Finance during the third or sixth month preceding the start of such tax period; i.e.: January 1 through January 31 or April 1 through April 25 for the tax period beginning July 1, or July 1 through July 31 or October 1 through October 31 for the tax period beginning January 1.

(3) The following documents must be filed with the Certificate of Eligibility and Reasonable Cost during the time periods indicated above:

(i) Department of Buildings Certification for Tax Exemption and Tax Abatement (Form J-3) or, if no permits from the Department of Buildings are required, at the option of the Office, alternative documentation to prove absence of Building Code violations;

(ii) Certified Tax Search or copy of Installment Agreement;

(iii) Department of Finance Application for Tax Exemption and Tax Abatement.

NOTE

1. Statement of Basis and Purpose in City Record Aug. 2, 2006:

The rule amendments require multiple dwelling registration in accordance with article two of subchapter four of the Housing Maintenance Code as a prerequisite for getting J-51 benefits. They also implement Local Law 107 of 2005, which require recipients of J-51 tax exemption benefits to purchase certain Energy Star certified household appliances.

The Act authorizes HPD to promulgate Rules governing the administration of the program. The proposed changes to the rules (i) bring the rules into conformance with amendments to the Act which became effective on June 15, 1993, (ii) provide procedures necessary to implement these amendments, (iii) further clarify implementation of the Act, (iv) provide modest increases to the allowances for certain items on the Itemized Cost Breakdown Schedule where warranted by inflation and (v) revise fees to place a penalty on uncollectible checks and charge a reasonable fee for declaratory rulings.

Rules of the City of New York

28 RCNY 5-06

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-06 Tax Exemption/Tax Abatement Commencement: Duration and Amount.

(a) **Tax Exemption.** (1) Except as provided in §489(9) of the Real Property Tax Law, for a period of fourteen years, or thirty-four years if the eligible project was a moderate rehabilitation or a project eligible under §5-03(a)(9), any increase in assessed valuation of properties which receive a Certificate of Eligibility and Reasonable Cost shall be exempt from taxation on any increase in assessed valuation resulting from the certified reasonable cost of the alteration, improvement or conversion performed pursuant to the Act. If the conversion, alteration or improvement results in an increase in the gross cubic content of the building, the portion of the building which represents the additional cubic content shall not be exempt from any increase in assessed valuation. In the case of fourteen year exemptions, any increase in assessed value which results from an alteration, improvement or conversion shall be fully exempt for ten years and such exemption shall be reduced by twenty per cent (20%) in each succeeding year. In the case of thirty-four year exemptions, any increase in assessed value which results from an alteration, improvement or conversion shall be fully exempt for thirty years and such exemption shall be reduced by twenty per cent (20%) in each succeeding year.

(2) The land improved by a building with a Certificate of Eligibility and Reasonable Cost shall not be exempt from an increase in assessed valuation. An increase in assessed valuation resulting from an alteration, improvement or conversion other than one made pursuant to the Act shall not be exempt.

(3) Tax exemption shall commence on the first day of July following the commencement of tax abatement with the following exceptions:

(i) If tax abatement commences on July first, tax exemption shall start at the same time; (ii) Tax exemption may commence on the first day of any tax quarter designated by the Office following the commencement of construction if

the property is:

(A) Aided by a loan made pursuant to Article 8, 8-a or 15 of the Private Housing Finance Law; or

(B) Aided by a loan made pursuant to §312 of the United States Housing Act of 1964 (42 U.S.C. §1452 b); or

(C) Started after July 1, 1983 by a housing development fund company organized under Article 11 of the Private Housing Finance Law and carried out either

(a) with substantial governmental assistance or

(b) in a property transferred from the City where alterations and improvements are completed within seven years of the date of such transfer; or

(D) Started after July 1, 1988 by or on behalf of a company not qualified under any of the above provisions, which is a not-for-profit corporation qualified pursuant to §501(c)(3) of the Internal Revenue Code and which has entered into a regulatory agreement with the HPD requiring operation of the property as housing for low and moderate income persons and families; or

(E) Started after July 1, 1992, and aided by a loan or grant under Article 11, 12 or 22 of the Private Housing Finance Law, §696-a (Article 16) or §99(h) of the General Municipal Law, or the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. §12701 et seq.).

(iii) A Temporary Certificate of Eligibility may be issued in the discretion of the Office for projects eligible for tax benefits pursuant to §5-06(a)(3)(ii) above.

(b) **Tax exemption limitation.** (1) Except for special circumstances enumerated in paragraph (4) of this subdivision (b), property in the Borough of Manhattan south of or adjacent to the south side of one hundred tenth street with an average assessed valuation per dwelling unit of thirty-eight thousand dollars ($38,000) or more after completion of construction, calculated by dividing the amount of the total assessed valuation of the residential portion of the property as determined under the Real Property Tax Law by the number of dwelling units in the building after completion of construction of the conversion, alteration or improvement, shall not be eligible for a tax exemption. The amount of assessed valuation that will be exempt from taxation shall be calculated pursuant to the following table:

Average Assessment per Dwelling Unit After Completion of Construction	Percent of Increased Assessment Exempt
$18,000 or less	100%
$18,001-$22,000	75%
$22,001-$26,000	50%
$26,001-$30,000	25%
$30,001-$37,999	0%
$38,000 or more	No exemption granted

(2) In calculating the amount of assessed valuation that will be exempt from taxation pursuant to the formula in paragraph (1) above, the full amount of total assessed valuation that does not represent increased assessed valuation shall be applied in such formula prior to the inclusion of any amount of increased assessed valuation.

(3) Where the real property is occupied in part for residential purposes and in part for non-residential purposes, unless the non-residential portion is on a separately-assessed tax lot, the assessed valuation of the property shall be allocated by the Office between the residential and non-residential portions based on pro rata square footage. In computing the total assessed valuation per dwelling unit under paragraph (1) above, only the amount of valuation so allocated to the residential portion shall be considered.

(4) Exception to Assessed Valuation Limitation to Allow Additional Affordable Housing Units.

(i) Notwithstanding the provisions in paragraph (1), the Office may reduce or remove the limitations on the exemption from taxation provided in such paragraph with respect to a particular property undergoing alteration or improvement, upon application of the property owner and a determination by the Commissioner that the increased benefit will increase the number of dwelling units that will be affordable to persons of low and moderate income, and the increased benefit is necessary to make economically viable units or to improve the quality of dwelling units that will be affordable to persons of low or moderate income.

(ii) As used in this paragraph (4), the term "persons of low or moderate income" shall mean persons who would qualify for housing subsidies pursuant to section two hundred thirty-five (§235) of the National Housing Act, as amended, at one hundred thirty-five percent (135%) of the income limitations provided therein. The term "affordable," when used in connection with persons of low or moderate income, shall mean that such persons shall not be required to spend more than thirty percent of their adjusted annual income for housing.

(iii) Upon receiving an application under this paragraph (4) in proper form, the Office shall immediately submit it to the community board for the area in which the project is located, which may, within forty-five days of receiving it and after a public hearing, make recommendations to the Office as to the application. The Office shall act on the application within sixty days of receiving it from the property owner in proper form, but not before expiration of the time for the community board to make its recommendations, unless the board has acted sooner.

(iv) The Office will not approve any application under this paragraph (4), unless the owner enters into an agreement with the City which guarantees that at least thirty percent (30%) of the apartments in the building receiving tax benefits shall be rented or sold to persons of low or moderate income at rentals or carrying charges not exceeding thirty percent (30%) of their annual income, and that such apartments will, on vacancy, be re-rented or re-sold to persons of low or moderate income for a period of no less than fifteen (15) years. Such units must be rehabilitated or newly created units resulting from substantial rehabilitation or conversion.

(5) For purposes of this subdivision (b), the assessed valuation shall be the actual assessed valuation not transitional assessed valuation.

(6) Further exceptions to assessed valuation limit. The following conversions, alterations, and improvements are not subject to the limitations set forth in paragraphs (1) and (2) of this subdivision (b).

(i) Alterations or improvements under §5-03(a)(6); and

(ii) Conversions of residential units covered by Article 7-C of the Multiple Dwelling Law under §5-03(a)(2); and

(iii) Alterations or improvements under paragraphs (5), (7) or (8) of §5-03(a) when carried out:

(A) with substantial governmental assistance, or with the aid of grants, loans or subsidies from any not-for-profit philanthropic organization one of whose primary purposes is providing housing affordable to persons of low or moderate income as defined in §5-06(b)(4)(ii); or

(B) with mortgage insurance by the New York City Residential Mortgage Insurance Corporation or the State of New York Mortgage Agency; or

(C) within the areas in New York County set forth in §5-10; or

(D) pursuant to a program established by the Federal Housing Administration, Federal National Mortgage Association, Federal Home Loan Mortgage Corporation or Government National Mortgage Association for the rehabilitation of existing multiple dwellings for persons of low or moderate income, or a program of mortgage insurance

for the rehabilitation of existing multiple dwellings pursuant to §223(f) of the National Housing Act, as amended, or a program of mortgage insurance established by the Federal Housing Administration for the rehabilitation of existing multiple dwellings for persons of low or moderate income; provided that properties receiving benefits under such programs are located in a neighborhood strategy area, as defined by HUD (24 CFR Part 881), or in one of the neighborhood preservation areas listed in §5-10.

(7) Assessed valuation limits for projects commenced prior to June 1, 1986. Conversions, alterations and improvements commenced after September 15, 1983 and before June 1, 1986 are subject to the exemption limitations set forth in §5-06(b) whether they are located in Manhattan or in any other Borough of the City, unless they qualify under one of the exceptions to the assessed valuation limit set forth in §5-06(b)(6), or are located in a designated neighborhood preservation area, as listed in §5-06(d)(3)(iii)(C). For purposes of this subdivision (b), the Clinton neighborhood preservation area is exempt from the assessed valuation limits of §5-06(b) only for conversions, alterations and improvements commenced prior to June 28, 1988.

(c) **Tax abatement.** (1) **Enriched abatement.** In the case of

(i) alterations or improvements carried out pursuant to §5-03(a)(6) which are carried out with substantial governmental assistance or with the aid of grants, loans or subsidies from any not-for-profit philanthropic organization one of whose primary purposes is providing low or moderate income housing or financed with mortgage insurance by the New York City Residential Mortgage Insurance Corporation or the State of New York Mortgage Agency or pursuant to a program established by the Federal Housing Administration for rehabilitation of existing multiple dwellings in a neighborhood strategy area, as defined by HUD (24 CFR Part 881); or

(ii) any conversion, alteration or improvement of property located in census tracts in which seventy-five percent (75%) or more of the population live in households which earn fifty percent (50%) or less of the median household income of the City, involving substantial governmental assistance; or

(iii) any alteration, improvement or conversion carried out pursuant to §5-03(a)(9);

the abatement of taxes on such property, including the land shall not exceed the lesser of the total actual cost of the alterations, improvements or conversion or one hundred fifty percent (150%) of the total certified reasonable cost of the alterations or improvements, and the annual abatement of taxes shall not exceed twelve and one-half percent (12.5%) of such certified reasonable cost.

(2) **Maximum annual and aggregate abatement.**

(i) In all cases not qualifying for the enriched abatement described in §5-06(c)(1), the maximum annual and aggregate abatement for each of the eligible projects listed in §5-03(a) is as follows:

Project	Maximum Annual Abatement		Maximum Total Abatement
	§5-03(a)(1)	8 1/3% of CRC	90% of CRC
*	§5-03(a)(1)	8 1/3% of CRC	50% of CRC
	§5-03(a)(2)	8 1/3% of CRC	90% of CRC
**	§5-03(a)(2)	8 1/3% of CRC	50% of CRC
	§5-03(a)(3)	8 1/3% of CRC	50% of CRC
	§5-03(a)(4)	8 1/3% of CRC	90% of CRC
***	§5-03(a)(5)	8 1/3% of CRC	90% of CRC
****	§5-03(a)(6)	8 1/3% of CRC	100% of CRC
	§5-03(a)(7)	8 1/3% of CRC	90% of CRC
*****	§5-03(a)(8)	8 1/3% of CRC	90% of CRC*
	§5-03(a)(10)	8 1/3% of CRC	90% of CRC

*****	§5-03(a)(11)	8 1/3% of CRC	90% of CRC
******	§5-03(a)(6)	121/2% of CRC	150% of CRC
******	§5-03(a)(9)	121/2% of CRC	150% of CRC

****** Conversions within the County of New York on any tax lot bordering on or south of 96th Street.

****** Conversions within the County of New York.

****** Only work specified on the Itemized Cost Breakdown Schedule is eligible for tax benefits. However, the CRC for such qualifying work shall be equal to the actual cost of the work. Notwithstanding the foregoing, the maximum allowable abatement may not exceed 50% of CRC if done in connection with a non-residential conversion located within the County of New York.

****** Non governmentally-assisted moderate rehabilitation.

****** Only eligible for 50% of CRC if done in connection with a non-residential conversion located within the County of New York.

****** Pursuant to §5-06(c)(1): governmentally-assisted moderate rehabilitation and substantial rehabilitation.

(ii) In cases qualifying for the enriched abatement described above in §5-06(c)(1), the maximum aggregate and annual abatement is:

(3) **Tax abatement shall commence as follows:**

(i) for cooperatives and condominiums with an average transitional assessed valuation per dwelling unit of less than forty thousand ($40,000) dollars, on the first day of the tax quarter following the filing of the Certificate of Eligibility and Reasonable Cost with the Real Property Assessment Bureau of the Department of Finance, except as provided in subparagraphs (ii) and (iii) below:

(ii) for cooperatives and condominiums with an average transitional assessed valuation per dwelling unit of forty thousand ($40,000) dollars or more, and for all other buildings, on the first day of January or July, whichever date next follows the filing of the Certificate of Eligibility and Reasonable Cost with the Real Property Assessment Bureau of the Department of Finance;

(iii) for property aided by a loan made pursuant to the authorities listed below or owned by a type of corporation listed below, on the first day of any tax quarter designated by the Office following the commencement of construction:

(A) Article 8, 8-a, or 15 of the Private Housing Finance Law or §312 of the United States Housing Act of 1964 (42 U.S.C. §1452b), or

(B) if commencement of construction occurred after July 1, 1988, by or on behalf of a not-for-profit corporation qualified pursuant to §501(c)(3) of the Internal Revenue Code and which has entered into a regulatory agreement with HPD requiring operation of the property as housing for low and moderate income persons and families, or

(C) if commencement of construction occurred after July 1, 1992, Article 11, 12 or 22 of the Private Housing Finance Law or §696-a (Article 16) or §99(h) of the General Municipal Law or the Cranston-Gonzalez National Affordable Housing Act (42 U.S.C. §12701 et seq.).

(4) Taxes may be abated each year by the amount specified in the §5-06(c), provided that in no event may taxes be abated for more than twenty years nor may the abatement in any twelve month period exceed the amount of taxes payable in such twelve month period.

(d) **Tax abatement limitations.** (1) **Dollar limit.** For conversions, alterations or improvements commenced on or after September 15, 1983, except in special circumstances enumerated in paragraphs (2) and (3) of this subdivision (d), the certified reasonable cost of a conversion, alteration or improvement eligible for abatement shall not exceed the amounts specified in the following table:

Number of Rooms Per Dwelling Units	Maximum Eligible CRC
21/2	$12,600
31/2	$15,000
41/2	$17,400
51/2	$19,800

(2) **Enriched dollar limit.** An abatement may exceed the limitations set forth in paragraph (1) of this subdivision (d) by a maximum of twenty-five percent (25%) of the applicable limitation if, upon written request of the applicant, the Office determines that:

(i) in the case of a conversion pursuant to paragraphs (1), (2), (3) or (4) of §5-03(a), the increased cost is necessary to comply with applicable law; or

(ii) in the case of an alteration or improvement pursuant to §5-03(a)(7), the increased cost is necessary to eliminate unhealthy or dangerous conditions or replace inadequate and obsolete sanitary facilities in a satisfactory manner; or

(iii) in the case of an alteration or improvement pursuant to §5-03(a)(8), the increased cost is necessary to conserve energy in a satisfactory manner; or

(iv) in the case of an alteration or improvement pursuant to §5-03(a)(5), the increased cost, to the extent such cost is not offset by any and all tax credits received as a result of the alteration or improvement, is necessary to comply with any provision of law regulating historic or landmark buildings or structures.

(3) **Exceptions to dollar limit.** The following conversions, alterations, and improvements are not subject to the limitations set forth in paragraphs (1) and (2) of this subdivision (d), but are subject to the limitations of paragraph (4) of this subdivision (d).

(i) alterations or improvements under §5-03(a)(6); and

(ii) conversions of residential units covered by Article 7-C of the Multiple Dwelling Law under §5-03(a)(2); and

(iii) alterations or improvements under paragraphs (5), (7) and (8) of §5-03(a) when carried out:

(A) with substantial governmental assistance or with the aid of grants, loans or subsidies from any not-for-profit philanthropic organization one of whose primary purposes is providing housing affordable to persons of low or moderate income as defined in §5-06(b)(4)(ii); or

(B) with mortgage insurance provided by the New York City Residential Mortgage Insurance Corporation or the State of New York Mortgage Agency; or

(C) within the areas set forth in §5-10; or

(D) pursuant to a program established by the Federal Housing Administration, Federal National Mortgage Association, Federal Home Loan Mortgage Corporation or Government National Mortgage Association for the rehabilitation of existing multiple dwellings for persons of low or moderate income, or a program of mortgage insurance for the rehabilitation of existing multiple dwellings pursuant to §223(f) of the National Housing Act as amended, or a

program of mortgage insurance established by the Federal Housing Administration for the rehabilitation of existing multiple dwellings for persons of low or moderate income; provided that properties receiving benefits under such programs are located in a neighborhood strategy area, as defined by HUD (24 CFR Part 881), or in one of the neighborhood preservation areas listed in §5-10.

(4) (i) Tax abatement for a multiple dwelling shall be available only if:

(A) for alterations and improvements commenced after June 28, 1988 and on or prior to June 15, 1993, the actual assessed valuation of such multiple dwelling, including land, does not exceed an average of thirty thousand dollars ($30,000) per dwelling unit at the time of commencement of construction of the alterations or improvements; or

(B) for alterations and improvements commenced after June 15, 1993, the actual assessed valuation of such multiple dwelling, including land, does not exceed an average of forty thousand dollars ($40,000) per dwelling unit at the time of commencement of construction of the alterations or improvements.

Unless the non-residential portion is a separately-assessed parcel, when the building is occupied in part for residential purposes and in part for non-residential purposes, the assessed valuation of the property shall be allocated by the Office between the residential and the non-residential portions based on pro rata square footage, and only the amount of valuation so allocated to the residential portion shall be considered in computing the assessed valuation per dwelling unit.

(ii) The limitations set forth in this paragraph (4) shall not apply to:

(A) multiple dwellings owned as a cooperative or condominium; or

(B) multiple dwellings in which units have been newly created by substantial rehabilitation of vacant buildings or conversions; or

(C) alterations or improvements under §5-03(a)(6); or

(D) conversions of residential units covered by Article 7-C of the Multiple Dwelling Law under §5-03(a)(2); or

(E) alterations or improvements under paragraphs (5), (7) and (8) of §5-03(a) when carried out:

(a) with substantial governmental assistance or with the aid of grants, loans or subsidies from any not-for-profit philanthropic organization one of whose primary purposes is providing housing affordable to persons of low or moderate income as defined in §5-06(b)(4)(ii); or

(b) with mortgage insurance provided by the New York City Residential Mortgage Insurance Corporation or the State of New York Mortgage Agency; or

(c) within the areas set forth in §5-10; or

(d) pursuant to a program established by the Federal Housing Administration, Federal National Mortgage Association, Federal Home Loan Mortgage Corporation or Government National Mortgage Association for the rehabilitation of existing multiple dwellings for persons of low or moderate income, or a program of mortgage insurance for the rehabilitation of existing multiple dwellings pursuant to §223(f) of the National Housing Act as amended, or a program of mortgage insurance established by the Federal Housing Administration for the rehabilitation of existing multiple dwellings for persons of low or moderate income; provided that properties receiving benefits under such programs are located in a neighborhood strategy area, as defined by HUD (24 CFR Part 881), or in one of the neighborhood preservation areas listed in §5-10.

(5) Tax abatement benefits shall not be available to any limited-profit housing company established pursuant to

article two of the Private Housing Finance Law to reduce taxes beneath the applicable statutory minimum tax, provided however, the benefits of the Act shall apply to alterations and improvements commenced after June 1, 1986 by any such company provided the project is otherwise eligible. Such multiple dwelling shall be eligible for benefits where at least one building-wide major capital improvement as set forth in §5-03(a)(6)(i) or a new roof (at least seventy-five percent (75%) of the aggregate roof area is replaced or covered with new roofing) or building-wide submetering of all individual dwelling units is part of the application for benefits. Furthermore, to the extent that such alterations or improvements are financed with grants, loans or subsidies from any federal, state or local agency or instrumentality, such multiple dwelling, building or structure, shall be eligible for benefits only if the limited-profit housing company has entered into a binding and irrevocable agreement with the commissioner of housing of the state of New York, the supervising agency, the New York city housing development corporation, or the New York state housing finance agency prohibiting the dissolution or reconstitution of such limited-profit housing company pursuant to section thirty-five of the Private Housing Finance Law for not less than fifteen years from the commencement of benefits. The abatement of taxes on such property, including the land, shall not be an amount greater than ninety percent (90%) of the certified reasonable cost of such alterations or improvements, nor greater than eight and one-third percent ($8\frac{1}{3}$%) of such certified reasonable cost in any twelve month period, nor be effective for more than twenty years. The annual abatement of taxes in any twelve month period shall in no event exceed fifty percent (50%) of the applicable exemption granted pursuant to article two of the Private Housing Finance Law or other applicable laws or fifty percent (50%) of payments required to be made in lieu of taxes in such twelve month period. Notwithstanding the foregoing, the annual abatement of taxes for alterations or improvements commenced prior to June 1, 1986, may not be applied to reduce the amount of taxes payable or the amount of payments required to be made in lieu of taxes in any twelve month period to an amount less than the minimum amount of taxes required to be paid pursuant to §3 of the Private Housing Finance Law (ten percent (10%) of shelter rent or assessed value at time of acquisition of the property by the housing company, whichever is higher).

(e) **Restricted eligibility projects.** (1) The following buildings shall be eligible for limited tax benefits as set forth herein

(i) **For any building:**

(A) in which conversion, alteration or improvement commences on or after January 1, 1982, and

(B) which is located in the County of New York within an area designated herein as a minimum tax zone, the benefits of the Act shall not be applied to abate or reduce the taxes upon the land portion of such real property, which shall continue to be taxed based upon the assessed valuation of the land and the applicable tax rate at the time such taxes are levied; provided, however, that the foregoing limitation with respect to abatement of taxes shall not apply:

(a) to any multiple dwelling which is eligible for benefits based upon moderate rehabilitation pursuant to §5-03(a)(6) or

(b) to any conversion, alteration or improvement which is carried out with substantial governmental assistance.

(ii) **For any building:**

(A) in which conversion, alteration or improvement commenced on or after January 1, 1982, and

(B) which is located in the County of New York within an area designated herein as a tax abatement exclusion zone, the benefits of the Act shall not be applied to abate or reduce the taxes upon such real property, which shall continue to be taxed based upon the assessed valuation of the land and the improvements and the applicable tax rate at the time such taxes are levied; provided, however, that the foregoing limitation shall not deprive such real property of any benefits of exemption from taxation of an increase in assessed valuation to which it is entitled pursuant to the Act, and provided further that the foregoing limitation with respect to abatement of taxes shall not apply:

(a) to any Alteration or Improvement designated herein as a major capital improvement, provided that the maximum amount of tax abatement which may be applied against taxes due in any tax year by any such multiple dwelling for any such alterations and improvements shall be limited to an amount not in excess of two thousand five hundred dollars ($2,500) per dwelling unit, or

(b) to any conversion, alteration or improvement which is carried out with substantial governmental assistance.

(2) The minimum tax zone in the County of New York is as follows: all tax lots now existing or hereafter created within the following designated area or adjacent or contiguous to either side of any street forming the boundary of such designated area, which area is bounded and described as follows: beginning at Central Park West and 86th Street; thence easterly along 86th Street to the East River; thence southerly along the easterly boundary of New York County to 23rd Street; thence westerly along 23rd Street to Third Avenue; thence southerly along Third Avenue to 14th Street; thence westerly along 14th Street to Broadway; thence southerly along Broadway to Houston Street; thence westerly along Houston Street to West Street; thence northerly along West Street to 14th Street; thence easterly along 14th Street to 9th Avenue; thence northerly along 9th Avenue to 57th Street; thence westerly along 57th Street to the Hudson River; thence northerly along the westerly boundary of New York County to 72nd Street; thence easterly along 72nd Street to Central Park West; thence northerly along Central Park West to 86th Street and Central Park West, which is the place of beginning.

(3) The tax abatement exclusion zone in the County of New York is as follows: all tax lots within the following designated area or adjacent or contiguous to either side of any street forming the boundary of such designated area or adjacent or contiguous to either side of any street designated as included in such area, which area is bounded and described as follows: beginning at the intersection of 96th Street and Central Park West; thence easterly to Park Avenue; thence southerly along Park Avenue to the intersection of Park Avenue and 72nd Street; thence easterly along 72nd Street to York Avenue; thence northerly along York Avenue to the Franklin Delano Roosevelt Drive; thence north-westerly along the Franklin Delano Roosevelt Drive to as far as 96th Street; thence easterly to the easterly border of New York County; thence southerly along such border to 34th Street; thence westerly along 34th Street to 8th Avenue; thence northerly, along 8th Avenue and Central Park West as far as 96th Street, which is the place of beginning. Additionally, the following north/south and east/west thoroughfares shall be included in the tax abatement exclusion zone; 96th Street between Central Park West and the East River; 86th Street between Central Park West and the East River; 79th Street between West End Avenue and the East River; 72nd Street between West End Avenue and the East River; West End Avenue from 72nd Street to 86th Street; and Riverside Drive from 72nd Street to 96th Street.

FOOTNOTES

1

[Footnote 1]: * Chapter amended City Record Jan. 27, 1998 eff. Feb. 26, 1998. Note: Statement of Basis

and Purpose. The Act authorizes HPD to promulgate Rules governing the administration of the program. The proposed changes to the rules (i) bring the rules into conformance with amendments to the Act which became effective on June 15, 1993, (ii) provide procedures necessary to implement these amendments, (iii) further clarify implementation of the Act, (iv) provide modest increases to the allowances for certain items on the Itemized Cost Breakdown Schedule where warranted by inflation and (v) revise fees to place a penalty on uncollectible checks and charge a reasonable fee for declaratory rulings.

Rules of the City of New York

28 RCNY 5-07

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-07 Record Keeping: Revocation of Tax Exemption/Tax Abatement.

(a) **Subpoenas, oaths, books and records.** For the purpose of determining the correctness of any application or certificate, the Commissioner may:

(1) Examine any books, papers, records or other data which may be relevant or material to such inquiry;

(2) Summon any person, including the owner or an officer or any employee of the owner, or any person having possession, custody or care of books, papers or records relating to the correctness of the application, to appear before the Commissioner or his designate at any time or place named in the summons or to produce such books, papers, records or other data and to give such testimony under oath, as may be relevant or material to such inquiry; and

(3) Take such testimony under oath as may be relevant to such inquiry.

(b) **Retention of books and records.** All books, records and documents listed in §5-05, together with all other documents, which in accordance with generally accepted auditing standards, may be used to substantiate entries in the applicant's books and records shall be kept at all times available for inspection by the Office and shall be retained for a period of at least three years from the date on which an applicant collects a Certificate of Eligibility except that (1) where an audit has been initiated and a final determination has not been rendered, such records shall be retained until such determination has been made and (2) where an applicant has entered into an installment arrangement with respect to payment for work comprising all or a part of the project, such records shall be retained until the later of (i) three years from the date on which the applicant collects the Certificate of Eligibility and (ii) one year following payment in full for the work comprising the project.

(c) **On-going program review.** To ensure that the Office will have sufficient current data to properly evaluate the program of tax exemption and tax abatement and effectively administer the program, the Office may, during the period of tax exemption and abatement, require owners to submit rental data, construction data and such other information as the Office deems necessary to carry out the functions delegated to it pursuant to the Act.

(d) **Preservation and inspection of records.** Records of each application shall be maintained by the Office. Records of approved applications are available for inspection and copying upon prior written request to the Office. Copies of records are available upon payment in advance of twenty-five cents ($0.25) per page.

(e) **Revocation or reduction of tax exemption and tax abatement for failure to substantiate claimed costs.** All applications are subject to post-audit by HPD.

(1) The Commissioner may, after notice pursuant to §5-07(g), reduce or revoke past or future tax exemption or tax abatement if he or she finds that the application for tax exemption or tax abatement, including all affidavits submitted in connection with the application, contains a false statement or false information as to a material matter or omits a material matter. It is the responsibility of the recipient of the benefits, whether the original applicant or any subsequent owner, including any condominium or cooperative, to document all claimed costs in a manner acceptable to HPD and in accordance with generally accepted auditing standards so that original checks or such other proof of payment as the Office shall require can be properly matched against the items on the Itemized Cost Breakdown Schedule and so that the auditors may examine original documentation for the cost of all supplies and the cost of all subcontracts. If, after notice of an opportunity to be heard and a request to produce documentation of claimed costs, a recipient of tax benefits hereunder fails to substantiate claimed costs to the satisfaction of HPD, the CRC shall be reduced or revoked as applicable. In the event that HPD determines on the basis of the total available evidence that the application contains a false statement or false information as to a material matter, or omits a material matter, all benefits hereunder shall be revoked.

(2) Tax benefits will not be revoked for failure to substantiate the amount of claimed costs after the expiration of three years from the date on which the applicant collects the Certificate of Eligibility from the Office, except that (1) where an audit has been initiated within the three-year period, but a final determination has not been rendered, or (2) where the applicant has not made payment in full for the work comprising the project within two years after the applicant has collected the Certificate of Eligibility, then such benefits may be revoked subsequent to such three year period.

(3) Tax benefits may be revoked in whole or in part at any time during the tax benefit period if there has been fraud or misrepresentation or for any violation of the Act or this chapter.

(4) If an institutional lender has become a successor in interest to the original owner of such building or structure, and, after diligent efforts to obtain original contracts, checks and other records normally reviewed by the Office to verify claimed costs, is unable to obtain part or all of such records, the Office shall permit the substitution, in whole or in part, of documentation certified by the institutional lender showing the amounts advanced by the institutional lender pursuant to the mortgage loan to finance such alterations or improvements along with such other documentation as the Office may require.

(f) **Additional grounds for revocation.** The Commissioner of the Department of Finance or the Commissioner of the Department of Housing Preservation and Development shall withdraw tax exemption and tax abatement granted to a building pursuant to the Act upon the happening of any of the following events:

(1) The building is operated for commercial or hotel or transient hotel use as indicated by, but not limited to, a lease or agreement for occupancy for periods of less than one year. Revocation shall be effective from the first tax period the prohibited use began.

(2) The real estate taxes and other charges having tax lien status with respect to the building (and land) total $1,000

or more and remain unpaid for one year after the same are due and payable to the City and the applicant or his or her predecessor in title has not entered into an installment agreement with the City which provides for the payment of delinquent taxes, assessments or other legal charges pursuant to §11-401 et seq. of the Administrative Code or has entered into an installment agreement but all payments required by said installment agreement have not been paid when due.

(3) The building ceases to be subject to the rent regulatory provisions of law set forth in §5-03(f)(1), unless the building is exempt from such provisions pursuant to §5-03(f)(2).

(4) During the periods prescribed by §5-07(b), the owner of any building receiving tax exemption or tax abatement, or any employee or agent of such owner, fails to appear and produce books, papers, records or other data required by §5-07(a) after being duly summoned to appear.

(5) Benefits granted hereunder shall not be withdrawn if within thirty (30) days after notice of a breach or omission pursuant to §5-07(g), the purported breach or omission has been cured or the owner has established to the satisfaction of the Office or the Department of Finance that it did not occur.

(g) **Notice of revocation or reduction.** Prior to revocation or reduction of tax exemption and tax abatement hereunder, notice of the breach or omission shall be given either by the Office or by the Department of Finance to the applicant by regular mail to the address to which the Department of Finance sends tax bills or to such other address for the applicant on record with the Department of Finance, and to the mortgagee if registered to receive tax bill from the Department of Finance. Benefits shall not be withdrawn if within thirty (30) days after notice of breach or omission the owner establishes that such breach or omission did not occur.

(h) **Non-discrimination.** No owner of any dwelling which is receiving the benefits of the Act, nor any agent, employee, manager, or officer of such owner shall directly or indirectly deny dwelling accommodations in such property, or any of the privileges or services incident to occupancy in violation of §11-243(k) of the Administrative Code.

(i) **Declaratory rulings.** A declaratory ruling with respect to an analysis of a specific or hypothetical site, project, fact pattern or document or an interpretation of the applicability of a specific provision of §489 of the Real Property Tax Law or §11-243 of the Administrative Code or these rules to an actual or hypothetical site, project, fact pattern or document or any other issue related to eligibility may be given in the discretion of the Office upon payment of a non-refundable fee in the amount of seven hundred fifty dollars ($750) payable at the time such declaratory ruling is requested in writing. In no event shall a declaratory ruling bind the Office as to the overall eligibility of a project for J-51 benefits. At the discretion of the Commissioner, this fee may be waived for projects supervised or funded by HPD or any other New York City or New York State agency or instrumentality.

(j) The Department of Finance shall use the following procedure to effect revocation and reinstatement of tax benefits for non-payment of real estate taxes:

(1) In January of each calendar year, the Department of Finance shall notify the owner of such outstanding real estate taxes (as defined in paragraph 2 of §5-07(f)) pursuant to §5-07(g) of these Rules. Following the date of this notification, the owner shall have sixty (60) days to pay such outstanding taxes. This shall constitute the first cure period.

(2) If the owner has paid such outstanding taxes during the first cure period (or entered into a valid installment agreement with the City), the tax exemption and/or abatement benefits shall continue on the property. If the owner has not paid such outstanding taxes before the expiration of the first cure period, the Department of Finance shall revoke all tax exemption and/or abatement benefits for the tax year commencing July 1 after the date of the beginning of the first cure period.

(3) Following the expiration of the first cure period, the Department of Finance shall again notify the owner of such outstanding real estate taxes (as defined in paragraph 2 of §5-07(f)) pursuant to §5-07(g) of these Rules. Following the date of this notification, the owner shall have ninety (90) days to pay such outstanding taxes. This shall constitute the second cure period.

(4) If the owner has paid such outstanding taxes during the second cure period (or entered into a valid installment agreement with the City), the Department of Finance shall, upon notification by the taxpayer, reinstate tax exemption and/or abatement benefits to the property for the tax year commencing July 1 after the date of the beginning of the first cure period. If the owner has not paid such outstanding taxes before the expiration of the second cure period, the property shall irrevocably lose all tax exemption and/or abatement benefits for such tax year, and the Department of Finance shall also revoke all tax exemption and/or abatement benefits for all tax years commencing on or after the second July 1 that follows the date of the beginning of the first cure period.

(5) Following the expiration of the second cure period, the Department of Finance shall again notify the owner of such outstanding real estate taxes (as defined in paragraph 2 of §5-07(f)) pursuant to §5-07(g) of these Rules. Following the date of this notification, the owner shall have one-hundred and eighty (180) days to pay such outstanding taxes. This shall constitute the third cure period.

(6) If the owner has paid such outstanding taxes during the third cure period (or entered into a valid installment agreement with the City), the Department of Finance shall reinstate the tax exemption and/or abatement benefits to the property for all tax years commencing on or after July 1 after the date of the beginning of the first cure period. If the owner has not paid such outstanding taxes before the expiration of the third cure period, the property owner shall irrevocably lose all J-51 tax exemption and/or abatement benefits awarded by HPD for such tax years.

(7) The Commissioner may exempt projects assisted with Substantial Governmental Assistance or projects supervised or monitored by HPD from the procedures in this subdivision by giving notice in writing to the Department of Finance, Attn: Director of Exemptions, provided, further, that projects exempted from these procedures shall continue to have tax exemption and/or abatement benefits revoked for the period of their tax delinquency for failure to pay real estate taxes pursuant to the provisions of §5-07(f)(2).

(8) All claims for reinstatement of J-51 tax exemption and/or abatement benefits resulting from revocations made prior to the effective date of these Rules must be made in writing to the Department of Finance, Property Exemption Unit, within one year of the effective date of these Rules.

(k) The revocation of benefits for noncompliance with the Act or this chapter shall not exempt any unit from continued compliance with the requirements of the Act or this chapter.

HISTORICAL NOTE

Section amended City Record Jan. 27, 1998 eff. Feb. 26, 1998. [See T28 §5-01 Note 1]

Subd. (e) par (3) amended City Record Nov. 21, 2007 §1, eff. Dec. 21, 2007. [See Note 2]

Subd. (f) par (2) amended City Record Nov. 20, 2000 §1, eff. Dec. 20, 2000. [See Note 1]

Subd. (f) par (5) amended City Record Nov. 20, 2000 §3, eff. Dec. 20, 2000. [See Note 1]

Subd. (g) amended City Record Nov. 20, 2000 §4, eff. Dec. 20, 2000. [See Note 1]

Subd. (h) amended City Record Nov. 21, 2007 §2, eff. Dec. 21, 2007. [See Note 2]

Subd. (j) added City Record Nov. 20, 2000 §2, eff. Dec. 20, 2000. [See Note 1]

Subd. (k) added City Record Nov. 21, 2007 §3, eff. Dec. 21, 2007. [See Note 2]

NOTE

1. Statement of Basis and Purpose in City Record Nov. 20, 2000:

Decribes these amendments as a Notice of Promulgation (which is a final notice) and as a Notice of Opportunity to Comment (Indicating that this is the first publication and not a final rule). It is included here as a final rule per Corporation Counsel. Also note further provisions of City Record Nov. 20, 2000:

The proposed rules add the installation of food waste disposers in multiple dwellings as a J-51 eligible, non-MCI plumbing item. Local Law 74 of 1997 permits food waste disposers to be installed in residential kitchens throughout the City, as of October, 1997. Research also indicates that such devices can divert substantial amounts of solid waste from the City's landfills and enrich the quality of the septic sludge the City produces, thereby improving the City's solid waste management function. The proposed rules also change the procedures for revocation of tax benefits and add a new procedure for re-instatement of tax benefits following revocation. These changes will make the process of revocation of J-51 tax benefits more efficient and less cumbersome for the Department of Finance, which implements all J-51 benefits awarded by HPD.

2. Statement of Basis and Purpose in City Record Nov. 21, 2007: The rule amendments would clarify that J-51 tax benefits may be revoked for any violation of Administrative Code §11-243 (the "J-51 Law") or the rules promulgated thereunder (Chapter 5 of Title 28 of the Rules of the City of New York), and that such revocation of benefits does not exempt any unit from continued compliance with the requirements of such provisions. The rules already expressly provide similarly for J-51's rent regulation requirements but not for its other requirements including, but not limited to, the prohibition against discriminating against persons because of race, religion, alienage or citizenship status, or the use of, participation in, or being eligible for a governmentally funded housing assistance program such as Section 8 (Administrative Code §11-243(k)). Finally, the rule amendments correct an incorrect statutory reference in 28 RCNY §5-07(h).

FOOTNOTES

1

[Footnote 1]: * Chapter amended City Record Jan. 27, 1998 eff. Feb. 26, 1998. Note: Statement of Basis and Purpose. The Act authorizes HPD to promulgate Rules governing the administration of the program. The proposed changes to the rules (i) bring the rules into conformance with amendments to the Act which became effective on June 15, 1993, (ii) provide procedures necessary to implement these amendments, (iii) further clarify implementation of the Act, (iv) provide modest increases to the allowances for certain items on the Itemized Cost Breakdown Schedule where warranted by inflation and (v) revise fees to place a penalty on uncollectible checks and charge a reasonable fee for declaratory rulings.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 5-08

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-08 Itemized Cost Breakdown Schedule.

The following allowances apply to alterations, improvements and conversions for which the commencement of construction occurred after June 1, 1997. For alterations, improvements and conversions for which commencement of construction occurred on or before June 1, 1997, the Itemized Cost Breakdown Schedule in effect as of the date of such commencement of construction shall apply, except in the case of asbestos abatement, for which the allowance set forth below shall apply to all applications pending on or submitted after November 1, 1997.

Maximum Allowance for All Buildings

(a) **General Construction.**

		Item	Units	Allowance
# *	(1)	Asbestos abatement1		See table
# *	(2)	Boiler room enclosure	sq. ft.	7.50
# *	(3)	Bulkhead	sq. ft.	8.50
	(4)	Ceiling, cellar (fireproof gyp bd)	sq. ft.	1.60
	(5)	Ceilings, gypsum board or plaster	rooms	280.
# *	(6)	Cement wash or parge water-proofing	sq. ft.	1.00
	(7)	Ceramic tile, bathroom2	bathrooms	750.
# *	(8)	Chimney, masonry	floors	1200.

# *	(9)	Compactor, see Item 39. Refuse		
#	(10)	Concrete, structural slab3	cu. yd.	500.
#	(11)	Concrete, structural foundation3	cu. yd.	250.
#	(12)	Concrete, flatwork4	sq. ft.	4.00
# *	(13)	Abatement of lead-based paint hazards5		See Itemized Cost Breakdown Schedule for Abatement of Lead-Based Paint Hazards in (h) below
	(14)	Demolition & removal allowance6	rooms	200.
		Doors (incl. frame and hardware)		
# *	(15)	Main entrance and lobby	set	4000.
# *	(16)	Hollow metal	doors	475.
	(17)	Wood Swing	doors	135.
	(18)	Bi-fold closet	Bi-fold	110.
	(19)	Sliding closet (2 doors)	set	125.
# **	(20)	Storm	doors	180.
	(21)	Dumbwaiters converted to closets	units	250.
	(22)	Dumbwaiters sealed	units	110.
	(23)	Entrance, stoops, steps, concrete	risers	225.
# *	(24)	Fire escapes	Flights	2000.
#	(25)	Floor joists (incl. sub floor)3	joists	165.
	(26)	Flooring, finished wood	rooms	500.
	(27)	Flooring, resilient w/ underlayment	rooms	450.
# **	(28)	Insulation, wall (thermal only)	sq. ft.	0.50
# **	(29)	Insulation, roof (thermal only)	sq. ft.	0.85
# *	(30)	Leaders and gutters	floors	40.
# *	(31)	Lintel replacement	units	250.
# *	(32)	Mailboxes	d.u.	50.
# *	(33)	Masonry	sq. ft.	7.50
# *	(34)	Parapet including coping	lin. ft.	135.
	(35)	Partitions, gypsum board or plaster	rooms	600.
	(36)	Partitions, framing	rooms	350.
# *	(37)	Pointing7	sq. ft.	2.00
# *	(38)	Railings, roof	lin. ft.	25.
# *	(39)	Refuse		
# *		chute, complete	floors	750.
# *		compactor, central unit	compactors	6800.
# *		recycling, base separating unit (turntable &/or diverter)	chutes	17000.
# *		recycling, floor control panel	floors	750.
# *	(40)	Roof surface	sq. ft.	1.25
	(41)	Skylight including screens8	units	1300.
	(42)	Stairs, steel	flights	2200.
#	(43)	Structural steel3	lbs.	1.50
# *	(44)	Window, single pane glass9	units	140.
# **	(45)	Window, insulating glass	units	175
# **	(46)	Window, insulating glass over 24 sf	sq. ft.	10.
# **	(47)	Window, storm with screen	units	65.

# *	(48)	Window guards, approved security	units	175
# *	(49)	Window guards, childproof	units	25.

(b) **Elevator.**

		Item	Units	Allowance
# *	(1)	New elevator, complete	unitsfloors	45,000+7000
# *	(2)	Convert manual to automatic10	units	7000.
		Elevator, partial		
# *	(3)	Motor11	motor	3500.
# *	(4)	Traction machine11	units	10,000.
# *	(5)	One-speed controller11	controller	6200.
# *	(6)	Two-speed or variable controller11	controller	8000.
# *	(7)	Cables	floors	400.
# *	(8)	Shaftway floor	doors	800.
# *	(9)	Floor call station	floors	200.
# *	(10)	Interlocks	interlocks	280.
# *	(11)	Door operator	units	2500.
# *	(12)	Car		
# *		Reline cab	units	4200.
# *		Top of car safety device	units	2800.

(c) **Plumbing.**

		Item	Units	Allowance
	(1)	Bathtubs12	tubs	450.
# *	(2)	Hot water heater/tank (input)	MBH	See table
# **	(3)	Insulation, pipe (also for heating)	lin. ft.	2.50
	(4)	Kitchen sink13	sink	175.
	(5)	Lavatory12	lavs	150.
		Piping		
# *	(6)	Water main, risers, branches	d.u.	1700.
# *	(7)	Waste and vent (complete)	d.u.	1500.
# *	(8)	Water service, street connect14	lin. ft.	110.
# *	(9)	Sewer, street connection	lin. ft.	200.
# *	(10)	Gas, risers and connections	d.u.	275.
# *	(11)	Sprinklers, heads only	heads	30.
# *	(12)	Sprinklers, piping and heads	heads	220.
# *	(13)	Standpipe	floor	600.
# *	(14)	Tank, water storage	gallon	1.50
	(15)	Water closets12	units	200.
	(16)	Food waste disposers13	units	300.

(d) **Heating.**

		Item	Units	Allowance
# **	(1)	Boiler-burner (output)15	MBH	See table
# **	(2)	Boiler (output)	MBH	See table

# **	(3)	Burner (output)15	MBH	See table
	(4)	Convectors or radiators	units	250
# *	(5)	Electronic boiler control system	units	2500.
	(6)	Exhaust duct (int. kit & bath only)	unit	310.
# *	(7)	Metal boiler stack	floors	400.
# *	(8)	Oil tank	gallon	See table
# *	(9)	Piping, heat mains, risers, branch	rooms	220.

(e) **Electric.**

	Item	Units	Allowance
# *	(1) All new apartment wiring	d.u.+room	400.+420.*
# *	(2) Apartment wiring only, adequate(risers and meters separate)16	d.u.	370.
# *	(3) Service equipment and risers16		
	Electric service equipment		
# *	with individual meter	entry+d.u.	1500.+160.
# *	with master meter	entry+d.u.	1500+110.
# *	Apartment panel	d.u.	300.
	Risers		
# *	with individual meter16	d.u.	500.
# *	with master meter16	d.u.	350.
# *	(4) Intercom, door opener	d.u.	100.
	(5) Outlet on new circuit	circuit	100.
# *	(6) Smoke detectors, hard wired	d.u.	100.
# *	(7) Submetering installation17	d.u.	280.
#	(8) Cogeneration equipment19	kilowatt	400

(f) **Moderate Rehabilitation Only.**

Item	Units	Allowance
(1) Kitchen cabinets18	lin. ft.	55.
(2) Kitchen cabinets, base & counter18	lin. ft.	70.
(3) Medicine cabinets inc. mirror12	units	85.
(4) Range (minimum 24 in. width)13	units	300.
(5) Refrigerator (min. 12 cf nominal)13	units	420.
(6) Steam or chemical cleaning	sq. ft.	0.80

(g) **Landmarks Projects Only**

Items of work listed on this schedule only per §5-03(a)(5)

Boiler/Burner Table
(maximum allowance)

Item	Output in MBH (thousand BTU per hour)		
	0-2,000 MBH	2,000-6,000 MBH	> 6,000 MBH
Boiler-burner15	$1,500.16.50/MBH	20,000.7.25/MBH	47,600.2.65/MBH
Burner15	$500.4.75/MBH	6000.2.00/MBH	8,300.1.65/MBH
Boiler (existingburner)	$1,000.11.75/MBH	14,000.5.25/MBH	39,300.1.00/MBH

Domestic Hot Water Table
(maximum allowance)

Input in MBH	Allowance
0-600	$460. 9.10/MBH
>600	$1,900. 6.70/MBH

Oil Tank Table
(maximum allowance)

Size in Gallons	Allowance
0-4000	$500. l.10/gal.
>4000	$2,900. .50/gal.

Asbestos Abatement Table
(maximum allowance)

Internal Linear Feet	$1600. + $10./linear ft.
Internal Square Feet	$1600. + $10./sq. ft.

(h) **Abatement of Lead-Based Paint Hazards**[5]

	Item	Units	Allowance for Non-targeted Areas	Allowance for Targeted Areas
# *	(1)	Inspection for Lead-Based Paint Hazards20	d.u.commonarea21	400. 400.
# *	(2)	Risk Assessment of Lead-Based Paint Hazards20	d.u.commonarea22	250. 250.
# *	(3)	Ceilings, lamination	rooms	320. 420.
# *	(4)	Ceilings, common area, lamination	sq. ft.	1.80 2.50
# *	(5)	Doors (incl. frame and hardware), main entrance and lobby	set	4600. 5000.
# *	(6)	Doors (incl. frame and hardware), hollow metal	doors	550. 800.
# *	(7)	Doors (incl. frame and hardware), wood swing	doors	155. 350.
# *	(8)	Doors (incl. frame and hardware), bi-fold closet	bi-fold	125. 300.
# *	(9)	Sliding closet (2 doors, incl. frame and hardware)	set	145. 300.
# *	(10)	Flooring, finished wood	rooms	575. 1250.
# *	(11)	Flooring, resilient w/underlayment	rooms	515. 585.
# *	(12)	Partitions, gypsum board or plaster	rooms	690. 1170.
# *	(13)	Partitions, common area	sq. ft.	1.80 2.50
# *	(14)	Stairs, steel (incl. risers, pans, railings, stringers, & newel posts), stripped	steps	45. 60.
# *	(15)	Window, insulating glass	units	200. 425.
# *	(16)	Window, insulating glass over 24 sf	sq. ft.	12. 30.
# *	(17)	Convectors or radiators, new	units	260. 275.
# *	(18)	Convectors or radiators, stripped	units	115. 150.
# *	(19)	Risers, stripped	lin. ft.	15. 20.
# *	(20)	Kitchen cabinets18	lin. ft.	65. 75.
# *	(21)	Kitchen cabinets, base & counter18	lin. ft.	80. 105.
# *	(22)	Medicine cabinets (incl. mirror)23	units	95. 125.
# *	(23)	Remove and install window sill	units	115. 150.
# *	(24)	Remove and install baseboard, wood molding	lin. ft.	2.50 3.50
# *	(25)	Remove and install closet shelf and pole	set	55. 75.

* Denotes Major Capital Improvement (MCI).

** Denotes Energy Conversation Items which shall also be considered Major Capital Improvements.

# Denotes that the item allowance may be reduced by proportion of non-residential space where the item serves both residential and non-residential space. (Items wholly within or serving the non-residential space receive no allowance.)

1. For (1) removal or encapsulation of any friable asbestos when done as part of a substantial rehabilitation requiring an alteration permit, or (2) for removal of asbestos Thermal System Insulation (TSI) on other rehabilitation or (3) for removal of other friable asbestos (and not roofing, siding or flooring) pursuant to a report from a certified asbestos inspector describing condition, quantity and location of asbestos containing materials to be removed including microscopic analysis. TSI shall mean insulation applied to heating, ventilation or air conditioning systems, hot or cold domestic water systems for the purpose of preventing heat transfer or water condensation. TSI shall include insulation on boilers, water tanks, air handling equipment and ducts, piping, pipe fittings or valves.

2. For bathroom with ceramic tile floor and full tile wainscot. Maximum one per apartment unless the apartment has two or more bedrooms. This item is eligible as an MCI if new water main, riser, and branch piping is installed throughout and if new ceramic tile and at least two new bathroom fixtures are installed in at least 90 percent of the bathrooms.

3. This item requires an affidavit from an engineer or architect certifying that he has personal knowledge of the installation and that the quantity claimed was installed. It also requires site photographs or other evidence satisfactory to HPD documenting the installation of the item.

4. This item includes inner walkways, courtyards, cellar slabs and the public sidewalk.

5. For construction commenced on or after August 2, 2004, requires (a) "an abatement" of lead-based paint hazards, as defined in 40 Code of Federal Regulations part 745 or any successor regulations, in any existing dwelling, including any vacant or occupied dwelling unit or any common area, and (b) proof of lead-based paint hazards pursuant to an "inspection" and/or "risk assessment", as defined in 40 Code of Federal Regulations part 745 or any successor regulations. Notwithstanding the foregoing, no such benefit shall be given for (a) any abatement performed to comply with a notice of violation issued for a violation of article fourteen of subchapter two of chapter two of title 27 of the Administrative Code, or (b) any abatement performed in a dwelling unit or in the common areas in such dwelling unless all of the lead-based paint hazards identified in such dwelling unit or in all of the common areas in such dwelling have been abated.

Furthermore, the deleading of lead-based paint hazards pursuant to a NYC Dept. of Health and Mental Hygiene order that is commenced prior to August 2, 2004 will continue to be eligible for J-51 benefits provided that there is an approved contract and sign-off. The allowance for such deleading of lead-based paint hazards will be per contract.

6. For substantial alterations and conversions only. The maximum quantity for this item is the number of new rooms created in the space where the demolition was done.

7. Not eligible if brickwork is covered by cement wash or other coating.

8. For skylights over 16 sq. ft. The maximum allowance for eligible skylights under 16 sq. ft. shall be 50 percent of allowance listed.

9. Not eligible without new or existing storm window.

10. Plus all other applicable partial elevator items listed.

11. For buildings over eight stories the approved quantity shall be equal to the actual quantity increased by 10 percent for each floor over eight.

12. Maximum of one per apartment unless the apartment has two or more bedrooms. This item is eligible as an MCI if new water main, riser, and branch piping is installed throughout and if new ceramic tile and at least two new bathroom fixtures are installed in at least 90 percent of the bathrooms.

13. Maximum of one per apartment.

14. For water service 2 1/2" in diameter or greater than approved length shall be equal to one and one-half times the actual installed length.

15. Oil, gas, or combination burner.

16. The "Adequate Wiring" MCI as set forth in the prior Rules has been divided into its components which consist of "Apartment wiring only, adequate," and "Service equipment and risers."

17. For submetering, the owner must comply with the rent decrease requirements of DHCR, and the project must consist of a building-wide submetering in all individual dwelling units.

18. The eligible length cannot exceed 8 feet in any apartment.

19. This item requires an affidavit from an engineer or architect certifying the installation of a natural gas-fired electric cogeneration system or the conversion or modification of an existing oil-fired cogeneration system to a natural gas-fired electric cogeneration system. Such affidavit also must provide that the waste heat from the cogeneration unit is used for heating domestic hot water or space heating or cooling of the residential units.

20 In order to qualify for benefits for Inspection for Lead-Based Paint Hazards or Risk Assessment of Lead-Based Paint Hazards, (a) the inspection or risk assessment must be an "inspection" or "risk assessment" as defined in 40 Code of Federal Regulations part 745 or any successor regulations, (b) the inspection or risk assessment must have determined that lead-based paint hazards exist in such dwelling, including any vacant or occupied dwelling unit or any common area, and (c) an "abatement" of lead-based paint hazards, as defined in 40 Code of Federal Regulations part 745 or any successor regulations, must have been performed in response to such inspection or risk assessment determination. Notwithstanding the foregoing, no such benefit shall be given for the inspection or risk assessment of a dwelling unit or common area if (a) any abatement performed in a dwelling unit or common area in response to such inspection or risk assessment determination was also performed to comply with a notice of violation issued for a violation of article fourteen of subchapter two of chapter two of title 27 of the Administrative Code, or (b) all of the lead-based paint hazards identified in such dwelling unit or in all of the common areas in such dwelling by such inspection or risk assessment have not been abated. Furthermore, such benefits for inspection or risk assessment of lead-based paint hazards shall only be given for such inspections or risk assessments commenced on or after August 2, 2004.

21 For dwellings with no more than three stories, the allowance for both non-targeted areas and targeted areas for inspection of all of the common areas in such dwelling is $400. For dwellings with four to six stories, the allowance for both non-targeted areas and targeted areas for inspection of all of the common areas in such dwelling is $800. For dwellings with at least seven stories, the allowance for both non-targeted areas and targeted areas for inspection of all of the common areas in such dwelling is $1200.

22 For dwellings with no more than three stories, the allowance for both non-targeted areas and targeted areas for risk assessment of all of the common areas in such dwelling is $250. For dwellings with four to six stories, the allowance for both non-targeted areas and targeted areas for risk assessment of all of the common areas in such dwelling is $300. For dwellings with at least seven stories, the allowance for both non-targeted areas and targeted areas for risk

assessment of all of the common areas in such dwelling is $400.

23 Maximum of one per apartment unless the apartment has two or more bathrooms.

NOTE

1. Statement of Basis and Purpose in City Record June 18, 2001:

At one time, the installation of new cogeneration equipment was eligible for tax benefits under the "J-51" program.

Although conversions of existing cogeneration systems continued to receive J-51 tax benefits, new installations were removed from the Itemized Cost Breakdown Schedule because of concerns about air pollution and the particular technology as well as because of a dearth of applications. However, the installation of new cogeneration equipment is currently eligible for benefits under the City of New York's Industrial and Commercial Incentives Program ("ICIP"). Furthermore, the Public Service Commission ("PSC") has recently stated that on-site generation of electricity is more efficient and has a lower environmental impact than utility generation. The PSC has stated that when larger customers choose to cogenerate, the efficiency of resource consumption (fuel use) increases because the thermal energy incidental to electric generation is captured, and that the potential for improvement of environmental emissions increases when industry self-generates or cogenerates with state-of-the-art equipment operating under current, more stringent environmental requirements. HPD's Division of Architecture, Construction and Engineering concurs with the PSC's current viewpoint, and is especially concerned about recent documentation indicating that there is or will be a shortage of generating capacity in New York City. As such, the amended rules would extend tax benefits to the installation of new residential cogeneration equipment using natural gas.

Title 28 Housing Preservation and Development

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-09 Additional Documentation for Certain Alterations or Improvements.

Applications for alterations requiring a new or amended Certificate of Occupancy must include: (a) PW-1, PW-1A, PW-1B and Initial Work Permits; and (b) final Certificate of Occupancy; (c) such additional documentation as may be applicable or re- quested.

The following major capital improvements require the approval of designated agencies on the forms indicated below, and such additional documentation as the Office shall require. The forms listed herein may be revised or added to by the Department of Buildings, in which case the Office will require the forms as revised. If a Borough Office was not using any of the referenced forms when documentation was obtained, the Office may require the forms then in effect or as listed in the prior Rules and Regulations.

(a) **Asbestos abatement.**

(1) Asbestos Inspection Report (ACP-7) or Asbestos Removal Plan.

(b) **Adequate wiring, new wiring or new service.**

(1) Certificate of Electrical Inspection (Form BEC 16A, DOB) or contractor's affidavit if the Certificate is not applicable.

(c) **Boiler/burners: boiler and oil burner replacement.**

(1) Notice of Proposed Steam or Hot Water Boiler Installation for boilers serving 6 units or more and over 350,000

BTUs (B form 900A signed by a boiler inspector, DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) For boilers with a capacity of 350,000 BTUs or more, approved Application for Certificate of Operation (APC 5-0, stamped) or Certificate of Registration (APC 501), (Bureau of Air, Noise and Hazardous Materials, DEP); and

(4) Certificate of Electrical Inspection (Form BEC 16A, for Bulletin 8, Bureau of Electrical Control, DOB) or contractor's affidavit if the Certificate is not applicable (e.g., if boiler only); and

(5) Certificate of Approval for Oil Burning Installation (B Form 16A, Sign-off, DOB).

(d) **Boiler/burners: boiler and gas burner or boiler and combination gas and oil burner.**

(1) Schedule B Plumbing (PW-1B) and/or Notice of Proposed Steam or Hot Water Boiler I installation (B form 900A signed by a boiler inspector) (DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) For boilers with a capacity of 350,000 BTUs or more, approved Application for Certificate of Operation (APC 5-0, stamped) or Certificate of Registration (APC 501), (Bureau of Air, Noise and Hazardous Materials, DEP); and

(4) Certificate of Electrical Inspection (Form BEC 16A, for Bulletin 8, Bureau of Electrical Control, DOB) or contractor's affidavit if the Certificate is not applicable.

(e) **Boiler/burners: boiler only.**

(1) If burner is oil-fired, documents (1) through (5) in paragraph (c) above; or

(2) If burner is gas-fired, documents (1) through (4) of paragraph (d) above; or

(3) If burner is gas- and oil-fired, documents (1) through (4) of paragraph (d) above.

(f) **Boiler/burners: burner upgrading.**

(1) Approved Application for Certificate of Operation (APC 5-0, stamped, Bureau of Air, Noise and Hazardous Materials, DEP).

(g) **Boiler/burners: new central heating system.**

(1) Plan/Work Approval Application with Schedule C Heating & Combustion Equipment for oil or Schedule B Plumbing for gas (PW-1 with PW-1C or PW-1B), or computer printout showing scope of work (DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) Certificate of Electrical Inspection (Form BEC 16A, for Bulletin 8, Bureau of Electrical Control, DOB) or contractor's affidavit if the Certificate is not applicable; and

(4) Approved Application for Certificate of Operation (APC 5-0, stamped, Bureau Air, Noise and Hazardous Materials, DEP); and

(5) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(h) **Boiler enclosure.**

(1) Initial Work Permit or PW-2 (DOB); and

(2) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(i) **Chimney.**

(1) Initial Work Permit or PW-2 (DOB); and

(2) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(j) **Compactor: conversions to central and upgrading of incinerators.**

(1) Initial Work Permit or PW-2 (DOB); and

(2) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(3) For replacement compactor, submit affidavit attesting to the replacement.

(k) **Compactor: new or refuse chute.**

(1) Initial Work Permit or PW-2 (DOB); and

(2) Computer print-out showing plumbing sign-off or B Form 505 (DOB) or Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(l) **Deleading (removal of lead paint).**

(1) Violation Notice, Approved Contract and Violation Dismissal (Department of Health)

(m) **Elevator installation: replacement or upgrading (except replacement of hoist cables).**

(1) Approved Elevator application/Permit (ELV-1, DOB); and

(2) Sign-off by a DOB inspector (Form 73), or a stamped Elevator Inspection/Test Report by Approved Private Elevator Inspection Agency (ELV-3, DOB); and

(n) **Fire escapes.**

(1) Initial Work Permit or PW-2 (DOB); and

(2) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(o) **Hot water heater or hot water tank.**

(1) Plan/Work Approval Application with Schedule B Plumbing (PW-1 with PW-1B), or computer printout showing scope of work (DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(4) For boilers with a capacity of 350,000 BTUs or more, approved Application for Certificate of Operation (APC 5-0, stamped) or Certificate of Registration (APC 501), (Bureau of Air, Noise and Hazardous Materials, DEP).

(p) **Landmarks preservation work permit.**

(1) Permit for Minor Work or Certificate of Appropriateness as applicable and Notice of Compliance (Landmarks Preservation Commission); and

(2) Description of Landmarks Preservation work listed on or attached to the R-2 form available from the J-51 Office.

(q) **Oil tank installation.**

(1) Plan/Work Approval Application with Schedule C Heating & Combustion Equipment (PW-1 with PW-1C), or computer printout showing scope of work (DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) Certificate of Approval for Oil Burning Installation (B Form 16A, Sign-off, DOB).

(r) **Piping: gas.**

(1) Plan/Work Approval Application with Schedule B Plumbing (PW-1 with PW-1B) or computer printout showing scope of work (DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) Computer printout showing plumbing sign-off or B Form 505 (DOB); and

(4) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(s) **Piping: waste and vent.**

(1) Plan/Work Approval Application with Schedule B Plumbing (PW-1 with PW-1B) or computer printout showing scope of work, (DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) Computer printout showing plumbing sign-off or B Form 505 or Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(t) **Piping: water mains and risers.**

(1) Plan/Work Approval Application with Schedule B (PW-1 with PW-1B) or computer printout showing scope of work, (DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) Computer printout showing plumbing sign-off or B Form 505 (DOB) or Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(u) **Sealing dumbwaiters.**

(1) Initial Work Permit or PW-2 or Plan/Work Approval Application or computer printout showing scope of work (PW-1, DOB); and

(2) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(v) **Sewer (street connection).**

(1) Street Opening Permit from the Bureau of Sewers (DEP) or Bureau of Highways (Department of Transportation) as applicable.

(w) **Sprinkler (new or relocated) plumbing and drainage.**

(1) Plan/Work Approval Application with Schedule B Plumbing (PW-1 with PW-1B) or computer printout showing scope of work, (DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(x) **Standpipes.**

(1) Plan/Work Approval (PW-1) or computer printout showing scope of work, (DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

(y) **Structural items not physically verifiable.**

(1) Affidavit from an architect or engineer specifying the nature, quantity and location of work done (e.g. number of floor joists installed, cubic yards of structural concrete used, pounds of structural steel used, etc.). In addition, length, size and placement of steel beams may be required. Photographs of new floor joists in place are recommended.

(z) **Water service (street connection).**

(1) Street-Opening Permit (Bureau of Highways, DOT)

(aa) **New water storage tank (no permit required for replacement, submit affidavit attesting to replacement).**

(1) Plan/Work Approval Application with Schedule B Plumbing (PW-1 with PW-1B) or computer printout showing scope of work DOB); and

(2) Initial Work Permit or PW-2 (DOB); and

(3) Letter of Completion for DIR. 14 on work done pursuant to permit or computer printout showing the sign-off date (DOB).

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 5*1 J51 TAX EXEMPTION AND TAX ABATEMENT

§5-10 Neighborhood Preservation Program Areas.

AREAS IN THE COUNTY OF BRONX:

MOTT HAVEN: The area bounded by East 159th Street; Third Avenue; East 161st Street; Prospect Avenue; East 149th Street; Jackson Avenue; Bruckner Expressway; Major Deegan Expressway; Morris Avenue; East 149th Street and Park Avenue.

ALDUS GREEN: The area bounded by East 169th Street; East 167th Street; Westchester Avenue; Sheridan Expressway; Longfellow Avenue; Randall Avenue; Tiffany Street; Longwood Avenue; Bruckner Expressway; East 149th Street; and Prospect Avenue.

MORRISANIA: The area bounded by Cross Bronx Expressway; Park Avenue; East 174th Street; Washington Avenue; Cross Bronx Expressway; Arthur Avenue; Crotona Park North; Waterloo Place; East 175th Street; Southern Boulevard; Cross Bronx Expressway; Sheridan Expressway; East 167th Street; East 169th Street; Prospect Avenue; East 161st Street; Third Avenue; East 159th Street; Park Avenue; and Webster Avenue.

HIGHBRIDGE-CONCOURSE: The area bounded by Washington Bridge-Cross Bronx Expressway; Webster Avenue; Park Avenue; East 149th Street; and the Harlem River.

WEST TREMONT: The area bounded by West Fordham Road; East Fordham Road; Webster Avenue; Cross Bronx Expressway; George Washington Bridge; and the Harlem River.

BELMONT-BRONX PARK SOUTH: The area bounded by Southern Boulevard; Bronx Park South; Boston Road; East 180th Street; Bronx River Parkway; Cross Bronx Expressway; Crotona Parkway; East 175th Street; Waterloo Place; Crotona Park North; Arthur Avenue; Cross Bronx Expressway; Washington Avenue; East 174th Street; Park Avenue; Cross Bronx Expressway; and Webster Avenue.

KINGSBRIDGE: The area bounded by Van Cortlandt Park South; West Gun Hill Road; Jerome Avenue; Bainbridge Avenue; East 211th Street and its prolongation; Conrail right of way; Bedford Park Boulevard; Webster Avenue; East Fordham Road; West Fordham Road; the Harlem River; Marble Hill Avenue; West 230th Street; Riverdale Avenue; Greystone Avenue; Waldo Avenue; Manhattan College Parkway; and Broadway.

SOUND VIEW: The area bounded by the Cross Bronx Expressway; Bronx River Parkway; East Tremont Avenue; White Plains Road; Randall Avenue; Olmstead Avenue; Lacombe Avenue; Westchester Creek; East River; Bronx River; Westchester Avenue; and Sheridan Expressway.

PELHAM PARKWAY: The area bounded by Adee Avenue; Mathews Avenue; Williamsbridge Road; Pelham Parkway South; Yates Avenue; Lydig Avenue; Williamsbridge Road; Neil Avenue; Bogart Avenue; East Tremont Avenue; Bronx River Parkway; and Bronx Park East.

AREAS IN THE COUNTY OF KINGS (BROOKLYN):

WILLIAMSBURG: The area bounded by Metropolitan Avenue; Union Avenue; Conselyea Street; Wood Point Road; Frost Street; Morgan Avenue; Meserole Street; Bushwick Avenue; Flushing Avenue; Union Avenue; Division Avenue; and the East River.

BEDFORD-STUYVESANT: The area bounded by Myrtle Avenue; Broadway; Ralph Avenue; Atlantic Avenue; and Nostrand Avenue.

BUSHWICK: The area bounded by Flushing Avenue; Cypress Avenue; Menahan Street; St. Nicholas Avenue; Gates Avenue; Wyckoff Avenue; Eldert Street; Irving Avenue; Chauncey Street; Central Avenue; property line of the Cemetery of the Evergreens; Conway Street; and Broadway.

EAST-NEW YORK: The area bounded by Jamaica Avenue; Elderts Lane; Atlantic Avenue; Fountain Avenue; New Lots Avenue; and Sheffield Avenue.

SOUTH BROOKLYN (A): The area bounded by The Buttermilk Channel; Congress Street; Hicks Street; Hamilton-Gowanus Parkway; the Gowanus Canal; and the Gowanus Bay.

SOUTH BROOKLYN (B): The area bounded by Fourth Avenue; Pacific Street; Flatbush Avenue; Sixth Avenue; and 15th Street.

SUNSET PARK: The area bounded by the Upper New York Bay; the Gowanus Bay; 15th Street; Prospect Park S.W.; Coney Island Avenue; Caton Avenue; Fort Hamilton Parkway; 37th Street; Eighth Avenue; Long Island Railroad right of way; Gowanus Expressway; 64th Street; Shore Parkway; and the Long Island Railroad right of way.

CROWN HEIGHTS: The area bounded by Pacific Street; Vanderbilt Avenue; Atlantic Avenue; Ralph Avenue; East New York Avenue; Utica Avenue; Winthrop Street; Flatbush Avenue; Parkside Avenue; Ocean Avenue; Empire Boulevard; Washington Avenue; Eastern Parkway; Grand Army Plaza; and Flatbush Avenue.

CONEY ISLAND: The area bounded by the Coney Island Creek; Stillwell Avenue; the Boardwalk West; and West 37th Street.

FLATBUSH: The area bounded by Parkside Avenue; Flatbush Avenue; Winthrop Street; New York Avenue; Clarendon Road; East 31st Street; Newkirk Avenue; Nostrand Avenue; Foster Avenue; New York Avenue; Avenue H;

Flatbush Avenue; Avenue K; and Coney Island Avenue.

EAST FLATBUSH: The area bounded by Clarkson Avenue; Utica Avenue; East New York Avenue; East 98th Street; Church Avenue; Ralph Avenue; Clarendon Road; and New York Avenue.

BROWNSVILLE: The area bounded by Broadway; Rockaway Avenue; Atlantic Avenue; East New York Avenue; Christopher Avenue; Glenmore Avenue; Powell Street; Sutter Avenue; Van Sinderen Avenue; Dumont Avenue; Junius Street; Livonia Avenue; Stone Avenue; Linden Boulevard; Rockaway Avenue; Hegeman Avenue; Hopkinson Avenue; Riverdale Avenue; East 98th Street; East New York Avenue; Ralph Avenue; Atlantic Avenue; and Saratoga Avenue.

AREAS IN THE COUNTY OF NEW YORK (MANHATTAN):

LOWER EAST SIDE: The area bounded by East 14th Street; the East River; Delancey Street; Chrystie Street; East Houston Street; and Avenue A.

MANHATTAN VALLEY: The area bounded by Cathedral Parkway (West 110th Street); Central Park West; West 100th Street; and Broadway.

EAST HARLEM: The area bounded by East 142nd Street; the Harlem River; East 96th Street; and Fifth Avenue.

CENTRAL HARLEM: The area bounded by West 145th Street; the Harlem River; Fifth Avenue; Cathedral Parkway (West 110th Street); Morningside Avenue; West 123rd Street; St. Nicholas Avenue; West 141st Street; and Bradhurst Avenue.

HAMILTON HEIGHTS: The area bounded by West 155th Street; Bradhurst Avenue; West 141st Street; Convent Avenue; West 140th Street; Amsterdam Avenue; West 133rd Street; and Riverside Drive.

WASHINGTON HEIGHTS: The area bounded by the Harlem River; Teunissen Place; West 230th Street; Marble Hill Lane; the Harlem River; West 155th Street; and the Hudson River.

AREAS IN THE COUNTY OF QUEENS:

HALLETS POINTS: The area bounded by the East River-East Channel, Hallets Cove and Pot Cove; Hoyt Avenue South; 21st Street; 31st Avenue; Vernon Boulevard; and 35th Avenue.

JACKSON HEIGHTS-CORONA-EAST ELMHURST: The area bounded by Grand Central Parkway; Long Island Railroad right of way; 110th Street; Corona Avenue; Long Island Expressway; Junction Boulevard; Roosevelt Avenue; and Brooklyn-Queens Expressway East.

RIDGEWOOD: The area bounded by Grand Avenue; Rust Street; 59th Drive; 60th Street; Bleecker Street; Forest Avenue; Myrtle Avenue; the Long Island Railroad right of way; and Queens-Brooklyn boundary line.

JAMAICA SOUTH: The area bounded by the Long Island Railroad right of way; New York Boulevard; Southern Parkway (Sunrise Highway) and Van Wyck Expressway.

FAR ROCKAWAY: The area bounded by the Jamaica Bay-Mott Basin; Queens-Nassau boundary line; Far Rockaway Beach; Beach 32nd Street; and Norton Drive.

AREAS IN THE COUNTY OF RICHMOND (STATEN ISLAND):

PORT RICHMOND: The area bounded by the Kill Van Kull; Jewett Avenue and its prolongation; Forest Avenue; and the Willow Brook Expressway.

NEW BRIGHTON: The area bounded by the Kill Van Kull; Westervelt Avenue; Brook Street; Castleton Avenue; and North Randall Avenue and its prolongation.

STAPLETON: The area bounded by Victory Boulevard; the Upper New York Bay; Vanderbilt Avenue; Van Duzer Street; Cebra Avenue; and St. Pauls Avenue.

FOX HILLS: The area bounded by Vandervilt Avenue; the Upper New York Bay; the Staten Island Rapid Transit Railway right of way; and the Staten Island Expressway.

Rules of the City of New York

28 RCNY 6-01

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-01 Scope; Construction; Definitions.

(a) **Scope of rules.** This chapter governs the grant of tax exemption pursuant to §421-a of the Real Property Tax Law of the State of New York, including the procedure for filing an application for tax exemption and the issuance of Preliminary and Final Certificates of Eligibility by the Office of Development of the Department of Housing Preservation and Development. Upon issuance of the Certificate of Eligibility, the calculation and implementation of the tax exemption are under the jurisdiction of the Department of Finance.

(b) **Construction.** This chapter is to be construed to secure the effectuation of the purposes of §421-a of the Real Property Tax Law and §11-245 of the Administrative Code and in accordance with the general principle of law that exemption statutes are to be strictly construed against the taxpayer applying for the exemption.

(c) **Definitions.** As used in this chapter, the following terms shall have the following meanings:

Act. "Act" shall mean §421-a of the Real Property Tax Law, as amended.

Adjusted monthly rent. "Adjusted monthly rent" shall mean the rent payable per month as provided in the first effective lease upon initial occupancy of a rental dwelling unit of a multiple dwelling after completion of construction assisted by exemption under the Act, not inclusive of charges for parking or electricity, gas, cooking fuel and other utilities other than heat and hot water.

Administrative Code. "Administrative Code" shall mean the Administrative Code of the City of New York.

Affordable units. "Affordable units" shall mean units created and rented in accordance with §6-08 of this chapter.

Aggregate floor area. "Aggregate floor area" shall mean the sum of the gross horizontal areas of all of the floors of a dwelling or dwellings and accessory structures on a lot measured from the exterior faces of exterior walls or from the center line of party walls.

Annual schedule of reasonable costs. "Annual schedule of reasonable costs" shall mean the amounts determined by the Department to be reasonable for the maintenance and operation of a multiple dwelling in such categories and classifications attached to these rules as Appendix A.

Certificate of Eviction. "Certificate of Eviction" shall mean a certificate of eviction granted by the city rent agency pursuant to §26-408 of the Administrative Code.

Commencement of construction. "Commencement of construction" shall mean the date upon which excavation and the construction of initial footings and foundations commences in good faith. An architect or professional engineer licensed in the State of New York shall certify that such construction commenced on such date and that such construction was thereafter completed without undue delay. Notwithstanding the foregoing, construction shall not commence prior to issuance by the Department of Buildings of either (i) a building or alteration permit for the construction of an entirely new multiple dwelling, the footprint of which consisted entirely of vacant and unimproved land upon such date, or (ii) an alteration permit for the construction of a new multiple dwelling above, and on an entirely separate tax lot from, one or more existing structures which are to be retained, provided that only the floor area attributable to the new multiple dwelling, and any eligible commercial, community facility or accessory use space within such new structure shall be eligible for benefits under the Act. Any such new multiple dwelling shall comply with all other applicable statutory and regulatory requirements.

Commissioner. "Commissioner" shall mean the Commissioner of the Department of Housing Preservation and Development, or his or her designee, or the chief executive officer of any successor agency thereto authorized to administer these rules.

Completion of construction. "Completion of construction" shall mean the date upon which either a Temporary Certificate of Occupancy is issued for all residential areas in the multiple dwelling or a Permanent Certificate of Occupancy is issued for the entire building.

Construction. "Construction" shall mean the construction of a new building which is a Class A multiple dwelling.

Demolished. "Demolished" shall mean the total destruction of a building or structure by razing or otherwise.

Department. "Department" shall mean the Department of Housing Preservation and Development of the City of New York or any successor agency or department thereto.

Department of Buildings. "Department of Buildings" shall mean the Department of Buildings of the City of New York or any successor agency or department thereto.

Eligible debt-financed project. "Eligible debt-financed project" shall mean a project that may be encumbered by a lien or mortgage, where (A) such project is not obtaining low income housing tax credits pursuant to §42(b)(1)(A) of the Internal Revenue Code of 1986, as amended (nine percent (9%) reservation), (B) any lien or mortgage encumbering such project provides that it is expressly subject and subordinate to the Written Agreement entered into with the Department, and (C) the average household income of the units in such project does not exceed eighty percent (80%) of median income.

Floor area of commercial, community facilities, and accessory use space. "Floor area of commercial, community facilities, and accessory use space" shall mean the gross horizontal areas of all the floors or any portion thereof of a

multiple dwelling or dwellings and accessory structures or spaces on a lot measured from the exterior faces of exterior walls of commercial or community facilities or accessory uses as such uses are defined in the Zoning Resolution; (See Article 1, Chapter 2). Notwithstanding the foregoing, parking areas which are not part of the building such as uncovered outdoor parking areas and open space beneath a building (including access roads) shall not be considered accessory use space. Provided that, for properties for which a final certificate of eligibility is issued on or after November 3, 1995 accessory use space shall not include accessory parking space located not more than twenty-three feet above the curb level.

Geographic exclusion area. "Geographic exclusion area" shall mean that area of Manhattan described in §6-02(c)(10) of this chapter.

Hotel. "Hotel" shall mean (i) any Class B multiple dwelling, as such term is defined in the Multiple Dwelling Law, (ii) any structure or part thereof containing living or sleeping accommodations which is used or intended to be used for transient occupancy, (iii) any apartment hotel or transient hotel as defined in the Zoning Resolution, or (iv) any structure or part thereof which is used to provide short term rentals or owned or leased by an entity engaged in the business of providing short term rentals. For purposes of this definition, a lease, sublease, license or any other form of rental agreement for a period of less than six months shall be deemed to be a short term rental. Notwithstanding the foregoing, a structure or part thereof owned or leased by a not-for-profit corporation for the purpose of providing governmentally funded emergency housing shall not be considered a hotel for purposes of this chapter.

Low and moderate income. "Low and moderate income" shall mean a household income not exceeding 100 percent of median income. For purposes of this chapter, low income households shall be deemed to be those at 60 percent or less of median income and moderate income households shall be those between 60 and 100 percent of median income, provided, however, that the average household income in any group of affordable units shall not exceed 80 percent of median income.

Median income. "Median income" shall be calculated in accordance with the regulations of the United States Department of Housing and Urban Development governing eligibility for occupancy as a lower income family, by size of family, in the metropolitan statistical area, which includes the City of New York, for purposes of §8 of the United States Housing Act of 1937, as amended.

Multiple dwelling or building. "Multiple dwelling" or "building" shall mean a dwelling which is, or is to be, lawfully occupied as the residence or home of three or more families living independently of one another, whether individual dwelling units herein are rented or owned as a cooperative or condominium.

Negotiable Certificate. "Negotiable Certificate" shall mean a document issued by the Department which certifies that the bearer is entitled to the benefits of the Act for a specified number of units within the geographic exclusion area, provided that all program requirements have been met.

Office. "Office" shall mean the Office of Tax Incentive Programs of the New York City Department of Housing Preservation and Development or any successor thereto.

Prior assessed valuation. "Prior assessed valuation" shall mean the taxable assessed valuation in effect pursuant to §1805-(3) of the Real Property Tax Law, exclusive of any exemption, of a tax lot (land and improvements) during the tax year preceding the tax year of Commencement of Construction.

Program for the development of affordable housing. "Program for the development of affordable housing" shall mean housing which complies with the requirements of a grant, loan or subsidy from any federal, state or local agency or instrumentality to provide no less than twenty percent of its units as units affordable to and occupied by or affordable to and available for occupancy by individuals or families whose incomes do not exceed a specified limit and which has been approved by the commissioner pursuant to this chapter.

Public project. "Public project" shall mean a building developed with substantial governmental assistance or a building developed pursuant to a regulatory agreement with a Federal, state or local agency or instrumentality requiring the development of affordable housing.

Residential building. "Residential building" shall mean a structure or part thereof lawfully occupied in whole or part as the home, residence or sleeping place of one or more persons.

Room Count. "Room Count" shall be calculated in the following manner: Each dwelling unit with at least one room which either (i) contains no cooking facilities and measures at least one hundred and fifty (150) square feet, or (ii) contains cooking facilities and measures at least two hundred and thirty (230) square feet, shall count as two and one-half rooms. Every other room in the dwelling unit separated by either walls or doors, including bedrooms, shall count as an additional room, plus one-half room for a balcony, provided, however, that kitchens, cooking facilities, bathrooms or corridors shall not count as an additional room. To be included in the calculation of "room count," a room must meet the requirements of habitability as provided in Administrative Code §§27-746 and 27-751.

Single room occupancy. "Single room occupancy" shall mean occupancy in a multiple dwelling by one or more persons of a room or rooms either without a lawful kitchen or kitchenette or without a lawful bathroom or without separate means of egress for occupants thereof to the public areas of the multiple dwelling.

Substantial governmental assistance. "Substantial governmental assistance" shall mean grants, loans or subsidies provided to any building or buildings on the same zoning lot or, if only a portion of such zoning lot is being granted benefits pursuant to the Act, to any building or buildings on such portion of such zoning lot, by any federal, state or local agency or instrumentality pursuant to a program for the development of affordable housing, provided that (1) as determined by the commissioner, each of the buildings on such zoning lot or portion thereof is part of the same project, (2) each of the buildings on such zoning lot or portion thereof is part of the same application for benefits pursuant to the Act, (3) the periods of construction and final real property tax exemption benefits granted pursuant to the Act for all of the buildings on such zoning lot or portion thereof being granted benefits pursuant to the Act shall commence simultaneously, and (4) no final real property tax exemption benefits shall be granted pursuant to the Act for any buildings on such zoning lot or any portion thereof being granted benefits pursuant to the Act until receipt of a certificate of occupancy or a temporary certificate of occupancy for the residential portions of the building or buildings on such zoning lot containing the units affordable to and occupied by or affordable to and available for occupancy by individuals or families whose incomes do not exceed a specified amount. Such subsidies may include allocations of low income housing tax credits and, in the discretion of the Department, below market sales or sales subject to evaporating purchase money mortgages by a federal, state or local agency or instrumentality, but shall not include permanent financing provided through the State of New York Mortgage Agency, purchase money mortgages, or mortgage insurance.

Written Agreement. "Written Agreement" shall mean a document issued by the Department pursuant to §6-08(l) of the Rules.

Zoning lot. "Zoning lot" shall mean a "zoning lot" as defined in §12-10 of the Zoning Resolution.

Zoning Resolution. "Zoning Resolution" shall mean the Zoning Resolution of the City of New York, as amended.

NOTE

1. Statement of Basis and Purpose in City Record July 8, 1996:

The rules are being promulgated pursuant to City Charter Section 1802(6) and in order to comply with the City Administrative Procedure Act. Section 421-a(3) of the Real Property Tax Law authorizes HPD to issue rules for the program. The amended rules deal with application deadlines and fees for declaratory rulings, conform the Rules to Chapter 692 of the Laws of 1995 and offer a new definition of "Commencement of Construction".

2. Statement of Basis and Purpose in City Record July 30, 1998: Section 421-a of the Real Property Tax Law authorizes the Department of Housing, Preservation and Development to promulgate rules governing tax exemption. The amended Rules note changes in the low income housing production aspect of 421-a.

3. Statement of Basis and Purpose in City Record Dec. 10, 2004: Real Property Tax Law ("RPTL") §§421-a and 421-g both expressly state that hotels are not eligible for the respective tax exemption benefits. However, neither statute defines "hotel." Similarly, Administrative Code §11-243(r) provides for the withdrawal of J-51 benefits if a structure becomes operated exclusively for hotel use. The legislative history of RPTL §421-a indicates that the statute was enacted to address the housing shortage in New York City by encouraging new construction of safe and decent dwelling units. In other words, the statute was intended to encourage the new construction of rent regulated apartments for permanent residency, and it specifically excluded hotels. RPTL §489, as implemented by Administrative Code §11-243, was intended to encourage the rehabilitation of permanent housing. RPTL §421-g similarly was intended to encourage the conversion of nonresidential buildings to residential buildings for permanent residents in Lower Manhattan. Since none of the operative statutes defines "hotel", HPD has relied upon regulatory definitions that have not always been consistent. Furthermore, the term "hotel" is defined in a different manner in other sources of legal authority such as the Zoning Resolution, the Building Code and the Multiple Dwelling Law. The proposed amendments are intended to promote legislative intent by incorporating various types of transient occupancy into the regulatory definition of "hotel". Furthermore, the amendments will accomplish the added purpose of conforming the regulations that apply to the RPTL §421-a, RPTL §421-g and RPTL §489 (J-51) programs. The amendment to the definition of "Commencement of Conversion" contained in the 421-g rules conforms the provision to the extender enacted in RPTL §421-g by Chapter 261 of the Laws of 2000. The amendment to 28 RCNY §6-02(c)(7) conforms that provision to the local law provision contained in Administrative Code §11-245(c). In Local Law 42 of 2003, the City Council authorized projects in Manhattan located in FAR 15 zones to get 421-a benefits if they are commenced prior to December 1, 2007.

4. Statement of Basis and Purpose in City Record July 5, 2007: Section 421-a of the Real Property Tax Law has provided tax benefits for the construction of new residential buildings in the City of New York since 1971. Under Real Property Tax Law §421-a, new multiple dwellings that meet all of the statutory and regulatory requirements are eligible for a partial tax exemption that consists of up to three years of construction period benefits and 10, 15, 20 or 25 years of partial tax exemption after construction. One hundred percent of increases in assessed valuation are exempt from taxation during the construction period, and the regular benefit period does not commence until after the entire construction period benefits term has run. Currently, HPD cannot grant extensions for the filing of any applications for a Preliminary Certificate of Eligibility and can only grant extensions for the filing of applications for a Final Certificate of Eligibility to projects developed with substantial governmental assistance. HPD may currently grant extensions for the completion of applications for Final Certificates of Eligibility for good cause shown. For purposes of the application filing and completion deadlines, the rule amendments add a new definition of public project to incorporate buildings developed with substantial governmental assistance as well as buildings developed pursuant to a regulatory agreement with a Federal, state or local agency or instrumentality requiring the development of affordable housing. With this amendment, developments like inclusionary housing projects that do not get governmental grants, loans or subsidies, would be eligible for extensions that apply to other governmentally assisted projects. The rule amendments allow HPD to grant filing extensions of up to four years to such public projects for Preliminary Certificate of Eligibility and Final Certificate of Eligibility applications. These amendments are intended to avoid fiscal disasters at such projects and the attendant drain on public funds if their representatives fail to meet the appropriate deadlines. The rule amendments also

allow HPD to grant filing extensions for Final Certificate of Eligibility applications of up to two years in the case of a building that is not a public project where the applicant has established that it reasonably relied upon the representations of third parties that the benefits of the Act would be available. HPD would retain the discretion for good cause shown to grant completion extensions for Final Certificate of Eligibility applications for all projects. The rule amendments also provide that Final Certificate of Eligibility applications must include evidence satisfactory to the Office of Tax Incentive Programs in a form approved by the Department that a rental building owner has registered the building and any occupied units with DHCR and, if the building is not fully occupied, an affidavit stating that the owner shall register the remaining units as they become occupied and submit proof of such registration upon the earlier to occur of occupancy of the last remaining unit or one year from the date of Completion of Construction. These provisions are intended to account for the fact that DHCR requires building owners to register rental units within 90 days of occupancy and not all RPTL §421-a rental buildings are rented up at the time that HPD is ready to issue a Final Certificate of Eligibility. By requiring such owners to provide proof of registration within a fixed time frame, HPD can ensure that the applicant is complying with RPTL §421-a's rent registration requirements.

Rules of the City of New York

***** Current through December 2009 ****

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-02 Eligibility.

(a) **Eligibility.** Partial tax exemption will only be granted to multiple dwellings which are eligible projects and which meet all the eligibility requirements of this section.

(b) **Eligible projects.** The tax benefits of the Act are available to:

(1) new multiple dwellings located outside the geographic exclusion area containing not less than three (3) dwelling units provided construction is commenced before December 31, 2007;

(2) new multiple dwellings located in the geographic exclusion area if the commencement of construction occurred on or before November 29, 1985 and if such building is completed no later than December 31, 2000 and only to the extent the building receives a permanent Certificate of Occupancy indicating that it was built pursuant to architectural, structural, and mechanical plans approved by the Department of Buildings on or before November 29, 1985; and

(3) new multiple dwellings located in the geographic exclusion area if the commencement of construction occurred after November 29, 1985 and before December 28, 2010, only if construction is carried out with substantial governmental assistance or if affordable units are created in accordance with the requirements of §6-08 of this chapter.

(c) **Ineligible projects.** The tax benefits of the Act are not available to:

(1) Any building or structure which is receiving tax exemption and/or tax abatement under any other provision of

state or local law for new construction, conversion or rehabilitation, including but not limited to, §§488-a and 489 of the Real Property Tax Law and §§11-243 and 11-244 of the Administrative Code, and Article 16 of the General Municipal Law; provided however, that if a building or structure is divided into condominium units, and a condominium unit within the building is entitled to receive permanent tax exemption under any statute under which exemption is granted based on the exempt status of the owner, the granting of such an exemption shall not prevent the remaining condominium unit or units from receiving §421-a exemption.

(2) Any multiple dwelling which results from the conversion or rehabilitation of any building or structure;

(3) Any building or portion thereof which after the completion of construction is used as a hotel, as that term is defined herein;

(4) Any building or portion thereof which after the completion of construction is used for single room occupancy, as that term is defined herein;

(5) Any multiple dwelling situated on land which is mapped as a public park provided, however, that this exclusion from eligibility for exemption shall not apply to any land which has been mapped as a public park but which, for a period of ten years or more after the date of such mapping, has not been acquired by the state or the city in which such land is located and with respect to which land the Department of Parks and Recreation has determined that such land is not required for public park purposes, and that such department has no intention of acquiring such land and that no funds have been allocated for such purpose;

(6) Any multiple dwelling situated on land which was utilized for ten or more consecutive years immediately prior to October first, nineteen hundred seventy-one as a "private park" as hereinafter defined. A private park is a privately owned zoning lot in a densely developed area having a minimum size of four thousand square feet, free of all developments and containing only trees, grass, benches, walkways and passive recreational facilities including structures incidental thereto which has been used and maintained during said period for such passive recreational activity by the general public without charge with the consent and participation of the owner thereof;

(7) Any multiple dwelling, or portion thereof, the construction of which commenced on or after November twenty-ninth, nineteen hundred eighty-five and which is located within any district in the county of New York where a maximum base floor area ratio, as that term is defined in the Zoning Resolution, of fifteen or greater was permitted as of right by provisions of such resolution in effect on April fourteenth, nineteen hundred eighty-two; provided, however, that this rule shall no longer be applicable to the extent to which such local law restriction is modified or repealed.

(8) Any multiple dwelling the footprint of which is located in whole or in part within any area in the county of New York designated by the Zoning Resolution in effect on the date of commencement of construction as either a manufacturing district or a mixed-use district except to the extent that such multiple dwellings in a mixed-use district could be constructed for residential purposes, as of right, pursuant to the Zoning Resolution, unless construction actually commenced prior to January first, nineteen hundred eighty-two; this restriction is in accordance with City policy of preservation of these districts for mainly non-residential purposes: provided, however, that this restriction shall not apply to multiple dwellings for which construction commenced after the effective date of these rules.

(9) For purposes of paragraphs (7) and (8) above, the obtaining of a variance or special permit to allow residential construction in a manufacturing or mixed-used district shall not render the newly constructed Class A multiple dwelling eligible for tax benefits under the Act. In addition, to the extent the zoning lot of a project includes any building or structure located in such non-eligible district that is not to be demolished, the partial tax exemption shall be reduced by an amount equal to the area of the portion of the zoning lot which is located in such ineligible area.

(10) Except for multiple dwellings qualifying for the benefits of the Act pursuant to §6-08 of this chapter:

(i) any project commenced, as that term is defined herein, after November 29, 1985 and before March 7, 2006

within the geographic exclusion area, bounded and described as follows: Beginning at the intersection of the bulkhead line in the Hudson River and 96th Street extended; thence easterly to 96th Street and continuing along 96th Street to its easterly terminus; thence easterly to the intersection of 96th Street extended and the bulkhead line in the East River; thence southerly along said bulkhead line to the intersection of said bulkhead line and 14th Street extended; thence westerly to 14th Street and continuing along 14th Street to Broadway; thence southerly along Broadway to Houston Street; thence westerly along Houston Street to Thompson Street; thence southerly along Thompson Street to Spring Street; thence westerly along Spring Street to Avenue of the Americas; thence northerly along Avenue of the Americas to Vandam Street; thence westerly along Vandam Street to Varick Street; thence northerly along Varick Street to Houston Street; thence westerly along Houston Street and continuing to its westerly terminus; thence westerly to the intersection of Houston Street extended and the bulkhead line in the Hudson River; thence northerly along said bulkhead line to the intersection of said bulkhead line and 11th Avenue extended; thence northerly to 11th Avenue and continuing along 11th Avenue to 14th Street; thence easterly along 14th Street to 10th Avenue; thence northerly along 10th Avenue to 28th Street; thence easterly along 28th Street to 9th Avenue; thence northerly along 9th Avenue to 33rd Street; thence easterly along 33rd Street to 8th Avenue; thence northerly along 8th Avenue to 34th Street; thence easterly along 34th Street to 7th Avenue; thence northerly along 7th Avenue to 41st Street; thence westerly along 41st Street and continuing to its westerly terminus; thence westerly to the intersection of 41st Street extended and the bulkhead line in the Hudson River; thence northerly along said bulkhead line to the place of beginning;

(ii) any project commenced, as that term is defined herein, on or after March 7, 2006 and before May 11, 2007 within the geographic exclusion area, bounded and described as follows: Beginning at the intersection of the bulkhead line in the Hudson River and 96th Street extended; thence easterly to 96th Street and continuing along 96th Street to its easterly terminus; thence easterly to the intersection of 96th Street extended and the bulkhead line in the East River; thence southerly along said bulkhead line to the intersection of said bulkhead line and 14th Street extended; thence westerly to 14th Street and continuing along 14th Street to Broadway; thence southerly along Broadway to Houston Street; thence westerly along Houston Street to Thompson Street; thence southerly along Thompson Street to Spring Street; thence westerly along Spring Street to Avenue of the Americas; thence northerly along Avenue of the Americas to Vandam Street; thence westerly along Vandam Street to Varick Street; thence northerly along Varick Street to Houston Street; thence westerly along Houston Street and continuing to its westerly terminus; thence westerly to the intersection of Houston Street extended and the bulkhead line in the Hudson River; thence northerly along said bulkhead line to the intersection of said bulkhead line and 11th Avenue extended; thence northerly to 11th Avenue and continuing along 11th Avenue to 14th Street; thence easterly along 14th Street to 10th Avenue; thence northerly along 10th Avenue to 30th Street; thence westerly along 30th Street to 11th Avenue; thence northerly along 11th Avenue to 41st Street; thence westerly along 41st Street and continuing to its westerly terminus; thence westerly to the intersection of 41st Street extended and the bulkhead line in the Hudson River; thence northerly along said bulkhead line to the place of beginning; or

(iii) any project commenced, as that term is defined herein, on or after May 11, 2007 and before July 1, 2008 within the geographic exclusion area, bounded and described as follows: Beginning at the intersection of the bulkhead line in the Hudson River and 96th Street extended; thence easterly to 96th Street and continuing along 96th Street to its easterly terminus; thence easterly to the intersection of 96th Street extended and the bulkhead line in the East River; thence southerly along said bulkhead line to the intersection of said bulkhead line and 14th Street extended; thence westerly to 14th Street and continuing along 14th Street to Broadway; thence southerly along Broadway to Houston Street; thence westerly along Houston Street to Thompson Street; thence southerly along Thompson Street to Spring Street; thence westerly along Spring Street to Avenue of the Americas; thence northerly along Avenue of the Americas to Vandam Street; thence westerly along Vandam Street to Varick Street; thence northerly along Varick Street to Houston Street; thence westerly along Houston Street and continuing to its westerly terminus; thence westerly to the intersection of Houston Street extended and the bulkhead line in the Hudson River; thence northerly along said bulkhead line to the intersection of said bulkhead line and 30th Street extended; thence easterly along 30th Street to 11th Avenue; thence northerly along 11th Avenue to 41st Street; thence westerly along 41st Street and continuing to its westerly terminus; thence westerly to the intersection of 41st Street extended and the bulkhead line in the Hudson River;

thence northerly along said bulkhead line to the place of beginning; or

(iv) any project commenced on or after July 1, 2008 within the geographic exclusion area as defined pursuant to §6-09 of this chapter except as otherwise provided in such §6-09.

(d) **Duration of exemption.** Eligible buildings may receive a ten, fifteen, twenty or twenty-five year tax exemption, as described herein. In order to qualify for such benefits, the multiple dwelling must meet the eligibility requirements described below for each level of exemption.

(1) Only the ten year exemption is available to buildings located within the geographic exclusion area described in §6-02(c)(10), above, and such buildings shall be eligible to receive such benefits only if each building meets one of the following conditions: (i) construction is carried out with substantial governmental assistance, or

(ii) the Department has imposed a requirement or has certified pursuant to §6-08 herein that 20 percent (20%) of the units are affordable to persons of low and moderate income, or

(iii) pursuant to an agreement with the Department, in conformity with the requirements of §6-08 herein, housing units affordable to persons of low and moderate income are either newly constructed or substantially rehabilitated off-site.

(2) The ten year exemption is available to buildings located outside the geographic exclusion area but in Manhattan on tax lots south of or adjacent to either side of 110th Street, the construction of which commenced on or after July 1, 1985, except that the fifteen year exemption shall be available to such buildings if:

(i) construction is carried out with substantial governmental assistance; or

(ii) the Department has imposed a requirement or has certified pursuant to herein that 20 percent (20%) of the units are affordable to persons of low and moderate income.

(3) The fifteen year exemption is available to buildings located in the boroughs of the Bronx, Brooklyn, Queens, Staten Island and in Manhattan north of 110th Street, the construction of which commenced on or after July 1, 1985, unless such multiple dwellings are eligible for the twenty-five year exemption described in (5) below.

(4) The twenty year exemption is available in the borough of Manhattan for buildings on tax lots now existing or hereafter created south of or adjacent to either side of one hundred tenth street which commenced construction after July 1, 1992 and before December 28, 2010, only if:

(i) construction is carried out with substantial governmental assistance; or

(ii) the Department has imposed a requirement or has certified pursuant to §6-08 herein that 20 percent (20%) of the units are affordable to families of low and moderate income.

(5) The twenty-five year exemption is available to buildings located in the boroughs of the Bronx, Brooklyn, Queens, Staten Island or Manhattan north of 110th Street, the construction of which commenced on or after July 1, 1985, if the multiple dwelling:

(i) is located in one of the following areas:

(A) Neighborhood Preservation Program Areas as determined by the Department as of June 1, 1985, or

(B) Neighborhood Preservation Areas as determined by the New York City Planning Commission as of June 1, 1985, or

(C) an area eligible for mortgage insurance provided by the Rehabilitation Mortgage Insurance Corporation (REMIC) as of May 1, 1992, or

(D) an area receiving funding for a neighborhood preservation project pursuant to the Neighborhood Reinvestment Corporation Act (42 U.S.C. §180 et seq.) as of June 1, 1985, or

(ii) meets one of the following conditions:

(A) is constructed with substantial governmental assistance, or

(B) is a building where the Department has imposed a requirement or has certified that 20 percent (20%) of the units contained in that multiple dwelling are affordable to persons of low and moderate income, exclusive of those units created pursuant to §6-08 herein.

(e) **Construction requirements.** To be eligible for partial tax exemption, a multiple dwelling must meet the following requirements:

(1) It shall contain at all times not less than the number of dwelling units specified in §6-02(b)(1). A multiple dwelling containing the requisite number of dwelling units may include: garden type maisonette dwelling projects containing a series of attached dwelling units which are provided as a group collectively with all essential services such as, but not limited to, water supply and house sewers, and which units are located on a site or plot under common ownership, including ownership as a condominium; and buildings erected at the same time with common exterior walls, provided that in each case such buildings are operated as a unit under a single ownership, notwithstanding that Certificates of Occupancy were issued by the Department of Buildings for separate portions thereof covering less than the requisite number of units.

(2) If a multiple dwelling contains more than one hundred dwelling units, not less than ten percent of the dwelling units in such multiple dwelling shall contain at least four and one-half rooms and, in addition, not less than fifteen percent shall contain at least three and one-half rooms. The number of rooms in a dwelling unit shall be computed in accordance with the definition of "room count" contained in subdivision (c) of §6-01 of this chapter. Those units consisting of four and one-half rooms or more, to the extent that they comprise ten percent of all units in the multiple dwelling, shall not be included as part of the units which must contain three and one-half rooms, comprising a total of fifteen percent of all the units in the multiple dwelling. This room count requirement may be waived in writing at the discretion of the Department:

(i) where the multiple dwelling is to provide housing for the elderly; or

(ii) upon the filing of adequate documentation from which the Department determines that compliance with the room count requirement would impose an undue and unreasonable economic hardship. The necessity of alteration of existing construction shall not in itself be deemed such a hardship.

(3) If construction of a new multiple dwelling commences on or after August 1, 1981 and such construction takes place on land which, immediately prior to the commencement of construction, was improved with a residential building or buildings that have since been substantially demolished, and the new building or buildings contain more than twenty dwelling units, then such new building or buildings shall contain at least five dwelling units for each Class A dwelling unit in existence immediately prior to the demolition preceding construction. The calculation of the ratio of new to old units shall be made based on the entire site included in the 421-a application. For purposes of this paragraph, "immediately prior to the commencement of construction" shall be deemed to be a date which is one month prior to the commencement of construction.

(f) **Site requirements.** (1) To be eligible for partial tax exemption, the land upon which an eligible project is located must have been vacant, predominantly vacant, under-utilized, or improved with a non-conforming use on the

operative date. The operative date shall be:

(i) thirty-six months prior to the commencement of construction, if construction commences on or after August 1, 1981; or

(ii) October 1, 1971, if construction commenced before August, 1981.

(2) If only part of the land upon which an otherwise eligible project is located satisfies the requirement set forth in paragraph (1), above, or if only part of a building or structure on said land would satisfy that requirement, partial tax exemption shall be available in accordance with the following formula:

(i) If fifty-one percent (51%) or more of the area of the land satisfies the requirement set forth above, then the partial tax exemption shall be reduced by an amount equal to the percent of the area of the site which does not satisfy that requirement;

(ii) If less than fifty-one percent (51%) of the area of the land satisfies the requirement set forth above, then the entire site is ineligible for partial tax exemption hereunder.

(3) **Definitions.** For the purpose of this subdivision (f), the following definitions are applicable:

Actual Assessed Valuation. "Actual assessed valuation" shall mean the assessed valuation of a tax lot without reference to §1805(3) of the Real Property Tax Law.

Land improved with a non-conforming use. "Land improved with a nonconforming use" is defined in the same manner as that term was defined in the Zoning Resolution in effect on the operative date.

Predominantly vacant. "Predominantly vacant" land is a plot of land on which not more than fifteen percent (15%) of the lot area contained enclosed, permanent, improvements. Fences, sheds, garage attendant's booths, pier bulkheads, lighting fixtures and similar items, or any improvement having an Actual Assessed Value of less than $2,000 shall not constitute an enclosed, permanent improvement.

Under-utilized. "Under-utilized" land is land or space which was under-utilized by virtue of the fact that:

(A) It was improved with a residential building or buildings

(a) whose room count in occupied dwelling units numbered not more than seventy percent of the room count in dwelling units in the new building or buildings; or

(b) whose aggregate floor area was no greater than seventy percent of the aggregate floor area of the new building or buildings.

(c) provided, however, that buildings commenced prior to the effective date of these rules shall be governed by the rules in effect at the time of commencement.

(B) It consisted of air rights above a public roadway, waterway, railroad right of way, public buildings, or other similar property used by the general public, provided that the public building was used by the general public on the operative date and continues to be so used and classified after the completion of the eligible construction, and provided further that "public building" shall mean structures or parts of structures in which persons congregate for civic, political, educational, religious or recreational purposes, or in which persons are harbored to receive medical, charitable or other care or treatment, or in which persons are held or detained by reason of public or civic duty, or for correctional purposes, including among others, court houses, schools, colleges, libraries, museums, exhibition buildings, lecture halls, churches, assembly halls, lodge rooms, club houses with more than five sleeping rooms, dance halls, theatres, bath houses, hospitals, asylums, armories, fire houses, police stations, jails and passenger depots; or

(C) Construction commenced on or after November 29, 1985 and before May 12, 2000 on land that was improved with a non-residential building or buildings

(a) each of which contained:

(1) no more than the permissible floor area ratio for non-residential buildings in the zoning district in question, and

(2) a floor area ratio which was twenty percent (20%) or less of the maximum floor area ratio for residential buildings for such zoning district, or

(b) each of which had an actual assessed valuation equal to or less than twenty percent (20%) of the actual assessed valuation of the land on which the building or buildings were situated, or

(c) which, by reason of the building's configuration or substantial structural defects not brought about by deferred maintenance practices or intentional conduct, could no longer be functionally or economically utilized, on the operative date, in the capacity in which it was formerly utilized.

(D) Except as provided in subparagraph (E) of this paragraph, commencement of construction occurred on or after May 12, 2000 and before October 30, 2002 on land that was improved with a non-residential building or buildings

(a) each of which contained:

(1) no more than the permissible floor area ratio for non-residential buildings in the zoning district in question, and

(2) a floor area ratio which was seventy-five percent (75%) or less of the maximum floor area ratio for residential buildings for such zoning district, or

(b) each of which had an actual assessed valuation equal to or less than seventy-five percent (75%) of the actual assessed valuation of the land on which the building or buildings were situated, or

(c) which, by reason of the building's configuration, or substantial structural defects not brought about by deferred maintenance practices or intentional conduct, could no longer be functionally or economically utilized, on the operative date, in the capacity in which it was formerly utilized.

(E) Commencement of construction occurred on or after May 12, 2000 and before October 30, 2002 on a tax lot now existing or hereafter created which is located south of or adjacent to either side of 110th Street in the borough of Manhattan and on land that was improved with a non-residential building or buildings

(a) each of which contained:

(1) no more than the permissible floor area ratio for non-residential buildings in the zoning district in question, and

(2) a floor area ratio which was fifty percent (50%) or less of the maximum floor area ratio for residential buildings in such zoning district, or

(b) each of which had an actual assessed valuation equal to or less than fifty percent (50%) of the actual assessed valuation of the land on which the building or buildings were situated, or

(c) which, by reason of the building's configuration, or substantial structural defects not brought about by deferred maintenance practices or intentional conduct, could no longer be functionally or economically utilized, on the operative date, in the capacity in which it was formerly utilized.

(F) Except as provided in subparagraph (G) of this paragraph, commencement of construction occurred on or after

October 30, 2002 on land that was improved with a nonresidential building or buildings

(a) each of which contained:

(1) no more than the permissible floor area ratio for non-residential buildings in the zoning district in question, and

(2) (i) a floor area ratio which was seventy-five percent (75%) or less of the maximum floor area ratio for residential buildings in such zoning district, or (ii) if the land was not zoned to permit residential use on the operative date, had a floor area ratio which was seventy-five percent (75%) or less of the floor area ratio of the residential building which replaces such non-residential building; or

(b) each of which had an actual assessed valuation equal to or less than seventy-five percent (75%) of the actual assessed valuation of the land on which the building or buildings were situated, or

(c) which, by reason of the building's configuration, or substantial structural defects not brought about by deferred maintenance practices or intentional conduct, could no longer be functionally or economically utilized, on the operative date, in the capacity in which it was formerly utilized.

(G) Commencement of construction occurred on or after October 30, 2002 on a tax lot now existing or hereafter created which is located south of or adjacent to either side of 110th Street in the borough of Manhattan and on land that was improved with a non-residential building or buildings

(a) each of which contained:

(1) no more than the permissible floor area ratio for non-residential buildings in the zoning district in question, and

(2) (i) a floor area ratio which was fifty percent (50%) or less of the maximum floor area ratio for residential buildings in such zoning district, or (ii) if the land was not zoned to permit residential use on the operative date, had a floor area ratio which was fifty percent (50%) or less of the floor area ratio of the residential building which replaces such non-residential building; or

(b) each of which had an actual assessed valuation equal to or less than fifty percent (50%) of the actual assessed valuation of the land on which the building or buildings were situated, or

(c) which, by reason of the building's configuration, or substantial structural defects not brought about by deferred maintenance practices or intentional conduct, could not longer be functionally or economically utilized, on the operative date, in the capacity in which it was formerly utilized.

Vacant. "Vacant" land is land, including land under water, which contains no enclosed, permanent improvement. Fences, sheds, garage attendant's booths, piers, bulkheads, lighting fixtures, and similar items, or any improvement having an Actual Assessed Value of less than $2,000 shall not constitute an enclosed, permanent improve- ment.

(g) **Rent regulatory requirements.** To be eligible for partial tax exemption the land upon which the eligible project is located must meet the following letting, rental and occupancy requirements:

(1) If a building which, on December 31, 1974, contained more than twenty-five occupied dwelling units administered under the City Rent and Rehabilitation Law, the Rent Stabilization Law of nineteen hundred sixty-nine, or the Emergency Tenant Protection Act of nineteen hundred seventy-four, is displaced, or any unit therein is displaced, the new multiple dwelling will be eligible for partial tax exemption only if a Certificate of Eviction was issued for at least one dwelling unit in the displaced building. If only one unit is displaced as the result of eligible construction, the Certificate of Eviction must pertain to that displaced unit. Notwithstanding the foregoing, the sale, transfer or utilization of air rights over residential buildings which were not demolished shall not be construed as a displacement within the purview of this subdivision (g).

(2) Notwithstanding the provisions of any local law for the stabilization of rents in multiple dwellings or the Emergency Tenant Protection Act of 1974, the rents of a unit shall be fully subject to regulation under such local law or such Act, unless exempt under such local law or such act from regulation by reason of the cooperative or condominium status of the unit, for the entire period during which the property is receiving tax benefits pursuant to the Act, or for the period any such applicable local law or such Act is in effect, whichever is shorter. Thereafter, such rents shall continue to be subject to such regulation to the same extent and in the same manner as if this subdivision (g) had never applied thereto, except that for dwelling units in buildings completed, as that term is defined herein, on or after January 1, 1974, such rents shall be deregulated if:

(i) with respect to dwelling units located in multiple dwellings completed after January 1, 1974 such unit becomes vacant after the expiration of the lease for the unit in effect when such benefit period or applicable law or Act expires, provided, however, such unit shall not be deregulated if the Commissioner of the New York State Division of Housing and Community Renewal or a court of competent jurisdiction finds the unit became vacant because the owner thereof or any person acting on his or her behalf engaged in any course of conduct, including but not limited to, interruption or discontinuance of essential services which interfered with or disturbed or was intended to interfere with or disturb the comfort, repose, peace or quiet of the tenant in his use or occupancy of such unit, and that upon such finding in addition to being subject to any other penalties or remedies permitted by law, the owner of such unit shall be barred from collecting rent for such unit in excess of that charged to the tenant, if the tenant so desires, in which case the rent of such tenant shall be established as if such tenant had not vacated such unit, or compliance with such other remedy, including, but not limited to, all remedies provided for by the emergency tenant protection act of nineteen seventy-four for rent overcharge or failure to comply with any order of the Commissioner of the New York State Division of Housing and Community Renewal, as shall be determined by said Commissioner to be appropriate; provided, however, that if a tenant fails to accept any such offer of restoration of possession, such unit shall return to rent stabilization at the previously regulated rent.

(ii) with respect to dwelling units located in multiple dwellings with became subject to the rent stabilization provisions of the Act on or after July 1, 1984, the lease for the unit expires after such tax benefit period expires, provided that each lease and renewal thereof for such unit for the tenant entitled to a lease at the time of such deregulation contained a notice in at least twelve (12) point type informing such tenant that the unit shall be subject to deregulation upon the expiration of such benefit period and stated the approximate date on which such benefit period was expected to expire. If each lease and renewal thereof has not contained such notice, a unit covered by such lease shall be subject to subdivision (i) above even though it became subject to the rent stabilization provisions of the Act on or after July 1, 1984. This subdivision (ii) shall not apply to any unit in any multiple dwelling which was subject to the rent stabilization provisions of the Act prior to July 1, 1984, notwithstanding any contrary provision in any lease or renewal thereof.

(3) Notwithstanding paragraph (2) above, dwelling units in multiple dwellings owned as cooperatives or condominiums which are exempt from such provisions of law shall not be required to be subject to the provisions of law set forth in that paragraph (2) during the time period specified therein. Newly created dwelling units in a building for which a prospectus for condominium or cooperative formation has been submitted to the Attorney General at the time of application for benefits to the Office, shall not be required to be registered with the New York State Division of Housing and Community Renewal, provided that an affidavit has been filed with the Office stating that the sponsor will register the building and all units as they become occupied, with the New York State Division of Housing and Community Renewal within fifteen months from the date of issuance of a Final Certificate of Eligibility if a cooperative or condominium plan has not been declared effective by that time.

(4) The offering by the owner to all tenants in rental dwelling units in the multiple dwelling, of an initial lease of at least two years; unless the dwelling unit's rent is regulated by local laws, such as §26-401 of the Administrative Code, which do not provide for the offering of leases for fixed terms. This requirement shall not preclude a shorter lease where requested by the tenant, or where a lease of at least two years is specifically prohibited by the terms of a Department of Housing and Urban Development regulatory agreement for an insured subsidized project, or where, through foreclosure,

title to a building eligible for partial tax exemption pursuant to the Act is held subsequently by the Department of Housing and Urban Development.

(5) No lease for dwelling units subject to the Rent Stabilization Law or Emergency Tenant Protection Act which are registered with the New York State Division of Housing and Community Renewal shall contain escalation clauses for real estate taxes or any other provisions for increasing the rent set forth in the lease other than permitting an increase in rent pursuant to an order of the New York State Division of Housing and Community Renewal or the Rent Guidelines Board; or an increase of 2.2 percent pursuant to §6-04(b) of this chapter.

NOTE

1. Statement of Basis and Purpose in City Record July 18, 2003:

The State Legislature recently enacted Chapter 349 of the Laws of 2002, which extends the benefits of Real Property Tax Law §421-a from construction commenced before December 31, 2003 to construction commenced before December 31, 2007. Conforming amendments need to be made to HPD's rules governing the Real Property Tax Law §421-a program. In addition, the City Council recently enacted local law number 29 for the year 2002. This local law provides an alternative to the second part of the underutilization site eligibility test for sites improved with a non-residential building on the Operative Date that were not then zoned to permit residential use. Such sites will instead have to demonstrate that the non-residential building on the site on the Operative Date had a floor area ratio of less than or equal to 75% (or 50% in the case of tax lots south of or adjacent to 110th Street in Manhattan) of the new residential building replacing it. Again, the amendments to HPD's §421-a rules conform to this legislative change. Recent amendments to the New York City Zoning Resolution have left HPD without a method of calculating the initial two and one-half rooms under the definition of "room count" contained in Real Property Tax Law §421-a(1)(d). By amending the definition of "room count," the rule change would fill this void and no statutory amendment would be necessary. The remaining amendments relating to "room count" are for conforming purposes to ensure that the method of calculating rooms provided in the new "room count" definition is utilized for all of the relevant purposes.

RPTL §421-a(2)(c)(iii) provides that "in the event that, immediately prior to the commencement of new construction, such land was improved with a residential building or buildings that have since been substantially demolished, and the new building or buildings contain more than twenty dwelling units, then such new construction shall contain at least five dwelling units for each class A dwelling unit in existence immediately prior to the demolition preceding construction." The amendment to 28 RCNY §6-02(e)(3) would make the rule more consistent with the statutory provision. Finally, the RPTL §421-a Affordable Housing Program enables new multiple dwellings in the Geographic Exclusion Area to receive RPTL §421-a tax benefits through the purchase of negotiable certificates. These negotiable certificates are generated by the off-site construction, conversion or substantial rehabilitation of affordable units. The developers of these affordable units must submit a request for a written agreement with HPD. This request must be accompanied by certain documents that HPD must approve and which will thereafter be incorporated into this written agreement, known as "The 421-a Written Agreement for Creation of Affordable Housing." The amendment to 28 RCNY §6-08(l)(15) will require that HPD also approve a document that developers already have been required to submit: a financial statement describing the proposed sources and uses of all funds for the project.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-03 Local Community Planning Board Review.

(a) **Submission of application to local community board.** An applicant for partial tax exemption pursuant to the Act whose project contains more than twenty dwelling units shall send a complete copy of the application for a Preliminary Certificate of Eligibility and supporting papers by certified mail or hand delivery to the local Community Planning Board for the area in which such project is located within ten days of submission of the application to the Department. A copy of the receipt shall be hand delivered or mailed to the Department for annexation to the application no later than ten days after the date appearing on such receipt.

(b) **Standards for review.** The local Community Board shall have a forty-five day period after receipt of such application and supporting papers to file objections with the Department as to the applicant's eligibility for partial tax exemption hereunder. Such objections, if any, may only be based upon an applicant's eligibility under subdivision two of §421-a of the Real Property Tax Law or the applicant's failure to comply with the eligibility requirements in §6-02 of these regulations. The local Community Board may, in its own discretion and within the forty-five day period, hold a public hearing to determine whether any objections as to eligibility should be filed. Nothing contained in this section shall preclude a final determination of ineligibility of an applicant by the Department prior to the expiration of the forty-five day period.

(c) **Notification to community board.** In the event the local Community Board files objections, the Department shall make a determination thereon and notify such Community Board within forty-five days after receipt of the objections.

(d) **Review of projects containing more than one hundred fifty dwelling units.** Where a project contains more than one hundred fifty dwelling units, the local Community Board may, within thirty days of the receipt of a copy of an applicant's notification, request the Department to hold a public hearing solely on the question of the applicant's eligibility under subdivision two of §421-a of the Real Property Tax Law or the applicant's failure to comply with the eligibility requirements in §6-02 of this chapter. If such request is made, the Department shall hold a hearing before the Commissioner or other person or persons whom he or she may designate, make a determination, and notify the Community Board within forty-five days after such hearing.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-04 Determination of Initial Rent; Rent Increases.

(a) **Determining the initial adjusted monthly rent and the comparative adjusted monthly rent for rental dwelling units.** No certification of eligibility shall be issued by the Department until the Department determines the initial adjusted monthly rent to be paid by tenants residing in rental dwelling units contained within the multiple dwelling. Except for affordable units, the initial adjusted monthly rent is determined in accordance with the provisions of paragraph (3) below.

(1) The total expenses of the multiple dwelling shall be determined by the Department in order to calculate the initial adjusted monthly rent. Total expenses shall mean the annual total of the following:

(i) An amount for the annual cost of operation and maintenance, as established pursuant to the Annual Schedule of Reasonable Costs; plus,

(ii) An amount for vacancies, contingency reserves and management fees as established pursuant to the Annual Schedule of Reasonable Costs; plus,

(iii) Projected real property taxes to be levied on the multiple dwelling and the land on which it is situated at the time of estimated initial occupancy; plus,

(iv) Fourteen percent of the total project cost, as determined pursuant to §6-05(b)(1)(i) and the Annual Schedule of Reasonable Costs, which amount will include debt service; less,

(v) The estimated annual income to be derived from any Floor Area of Commercial, Community Facilities, and Accessory Use Space in the multiple dwelling.

(2) The adjusted monthly rent per room shall be determined by the Department by dividing the total expenses as determined pursuant to paragraph (1) above by twelve (12) and then dividing that amount by the Room Count as defined in subdivision (c) of §6-01 of this chapter; i.e.,

Total Expenses 12	=	Total Monthly Expenses	Total Monthly Expenses Room Count	=	Adjusted Monthly Rent Per Room

(3) The The initial adjusted monthly rent for each dwelling unit shall be determined by the Department by multiplying the adjusted monthly rent per room to be determined pursuant to paragraph (2) above by the Room Count, as defined in subdivision (c) of §6-01 of this chapter, of each rental dwelling unit. Adjustments to the initial adjusted monthly rent per room to be determined pursuant to paragraph (2) above by the Room Count, as defined in subdivision (c) of §6-01 of this chapter, of each rental dwelling unit. Adjustments to the initial adjusted monthly rent for any dwelling unit may be allowed by the Department provided that the total of the rentals charged in the multiple dwelling do not exceed the total expenses of such multiple dwelling, as determined pursuant to paragraph (1) above; i.e.,

Adjusted Monthly Rent Per Room × Room Count Per Dwelling Unit	=	Initial Adjusted Monthly Rent for Such Dwelling Unit

(b) **Rent increases.** The owner of a multiple dwelling receiving partial tax exemption may insert in each lease to be effective during the period of gradual diminution of tax exemption, as defined in §6-06(e) of this chapter, a provision for an annual rent increase over the initial adjusted monthly rental at a rate not to exceed 2.2 percent per annum on the anniversary date of the first lease for the unit provided, however, that no increase shall be permitted pursuant to this subdivision (b) unless specifically provided for in each affected lease, and provided further that no more than one such increase per unit may be charged or collected in each given year regardless of the number of lease renewals or new leases which may pertain to that unit. The initial 2.2 percent escalation and all subsequent escalations shall be based solely on the actual rental amount in effect (regardless of whether the legal regulated rent may be greater) at the commencement of the period during which the increase may be charged and shall not be compounded from year to year but rather shall remain constant based on said rent. In addition, the increase shall be independent of any other escalation authorized by the Rent Guidelines Board and shall not be considered or included when a Rent Guidelines Board increase is effected, making the latter increase effective upon the base rent, excluding the 2.2 percent escalation. The maximum increase permitted by this subdivision (b) is 19.8 percent over the actual rental amount in effect at the commencement of the period during which the increase may be charged. The maximum increase permitted by this subdivision (b) may be charged in each year following the expiration of the tax benefit period, but shall not exceed 19.8 percent, or that amount charged in the last year of the exemption period, and shall not become part of the base rent.

(c) **Annual rent schedule.** Each year the owner shall make available to the Office a schedule of rents for each unit in the building.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-05 Application Procedure; Documentation.

(a) **Application forms.** All prescribed forms and applications must be obtained from the Department of Housing Preservation and Development, Office of Tax Incentive Programs, 3rd Floor, 150 William Street, New York, New York 10038. All applications shall be submitted to the Department on such form or forms as shall be prescribed by the Department. Only applications complete in all detail shall be considered for a Certificate of Eligibility. All forms must be filled out fully and legibly by the applicant and shall be typewritten or inscribed in permanent ink.

(b) **Preliminary Certificate of Eligibility; documentation.** An application for a Preliminary Certificate of Eligibility must be made to the Office after the commencement of construction but prior to the issuance of either a Temporary Certificate of Occupancy for all residential areas or a Permanent Certificate of Occupancy. For a public project, the Department may grant an extension of up to four years for filing the application for a Preliminary Certificate of Eligibility. The application for a Preliminary Certificate of Eligibility shall consist of an affidavit in the form required by the Office and shall include the following:

(1) A sworn statement by the owner (if the owner is other than an individual, the statement must be certified by the chief executive officer or managing partner of the owner), together with certifications by certified public accountants, appraisers, engineers and architects where required by this chapter, attesting to the accuracy of information provided to the Department concerning the eligibility of a project under §6-02 of this chapter and the initial adjusted monthly rent required by the Act for each rental dwelling unit contained within the multiple dwelling. This sworn statement shall include, as a minimum, a statement of the following:

(i) Total project cost of the newly constructed building and a breakdown of the costs:

(A) Land acquisition cost or purchase price shall be certified to by an independent certified public accountant or by an appraisal of value of the land and any improvements thereon prepared by an independent appraiser found to be qualified by the Department if the land was purchased more than two years prior to the date of the commencement of construction or in the event that the land was obtained by other than purchase; provided further that in the event the land is leased and not purchased, rent attributable to the development period shall be included in total project cost.

(B) Site preparation costs not covered by an appraisal in subparagraph (A) above shall be certified to by an affidavit from a licensed architect or engineer on a date not more than ninety days prior to the filing of an application for a Preliminary Certificate of Eligibility, and an estimate of the balance of such costs to be incurred prepared by such a licensed engineer or architect. The application for a Final Certificate of Eligibility shall contain a statement of all site preparation costs incurred, which shall be certified to by an independent certified public accountant. Site preparation costs may include, but are not limited to, costs expended to demolish structures. Site preparation costs may also include relocation expenses, which may be independently certified to by the owner or applicant;

(C) A good faith estimate of construction costs as well as an estimate prepared by a licensed engineer of any abnormal, unique or special foundation costs which may be incurred;

(D) An allowance for off-site costs, including but not limited to legal, engineering, and architectural fees, insurance, interest and taxes during construction, title and mortgage fees;

(E) Specific other amounts which would ordinarily and customarily be incurred in connection with the construction of an eligible project.

(ii) Compliance with eligibility requirements including:

(A) Statement of the conditions of the site as of thirty-six months prior to the commencement of construction, or as of October 1, 1971, as required by this chapter, along with sufficient documentation to demonstrate the conditions of the site to the satisfaction of the Department;

(B) A statement of the number of occupied dwelling units in existence on the site on December 31, 1974;

(C) A statement, if the construction is to include more than twenty dwelling units, that the building will provide no less than five Class A dwelling units for each Class A dwelling unit in existence on the site immediately prior to the commencement of new construction; as required by this chapter;

(D) A statement that the new multiple dwelling will contain not less than three dwelling units;

(E) A statement that not less than ten percent of the dwelling units in the new multiple dwelling will contain at least four and one-half rooms and that no less than fifteen percent of such dwelling units will contain at least three and one-half rooms, as determined pursuant to §6-02(d) hereof, if the multiple dwelling is to contain more than one hundred dwelling units, unless such requirements are waived in writing by the Department;

(F) The submission to the Department of one set of plans approved by the Department of Buildings, as evidenced by a seal of the Department of Buildings thereon or an architect's affidavit that such plans are so approved.

(G) If construction commenced on or before November 29, 1985, sufficient documentation to demonstrate to the satisfaction of the Department the condition of the site on November 29, 1985.

(H) If construction commenced after November 29, 1985 and is located within the geographic exclusion area,

(a) written certification by the Department in accordance with §6-08 herein, that 20 percent (20%) of the units

contained in that building will be affordable to persons of low and moderate income; or

(b) written certification by the Department, in accordance with §6-08 herein, that construction is being carried out with substantial governmental assistance; or

(c) a copy of a written agreement with the Department for the construction or substantial rehabilitation of housing units affordable to persons of low and moderate income on another site, such agreement expressly providing that the creation of said units is intended to meet the requirements of §6-08 herein; or,

(d) Negotiable Certificates issued pursuant to §6-08, herein, evidencing the bearer's entitlement to the benefits of the Act for the units for which the applicant is seeking tax benefits.

(iii) The date upon which it is estimated that initial occupancy will commence.

(2) A statement of intention that the owner will register all rental units with the New York State Department of Housing and Community Renewal prior to initial occupancy and will offer initial leases of not less than two years to tenants of such stabilized units, or such shorter term as the tenant requests, or a statement that the multiple dwelling is to be owned as a cooperative or condominium.

(3) A certified copy of a Certificate of Eviction, if required by §6-02(f) herein.

(4) A schedule of proposed initial rents for each rental dwelling unit in the building. No requests for revision of this schedule will be considered once a Final Certificate of Eligibility has been issued for the building in question.

(c) **Filing fees.** A non-refundable deposit toward a non-refundable filing fee for each multiple dwelling for which application is made for benefits hereunder shall be paid at the time of the filing of the application for a Preliminary Certificate of Eligibility. The deposit shall be in the amount of one hundred ($100) dollars and shall form part of the non-refundable filing fee of four-tenths (4/10) of one percent (.4%) of the total project cost as determined pursuant to §6-05(b) herein, or four-tenths (4/10) of one percent (.4%) of the total project sell-out price, if the building will be owned as a cooperative or condominium, as stated in the last amendment to the offering plan accepted for filing by the New York State Attorney General, at the option of the applicant, less any fees paid to the Department pursuant to §6-08(k)(3), herein, which resulted in the issuance of a written agreement. Payment of the balance of this fee shall be made no later than ninety days after approval of the application for a Preliminary Certificate of Eligibility. If payment is not made within such time, a late fee of an additional one-tenth (1/10) of one percent (.1%) of the total project cost, as determined pursuant to §6-05(b) herein shall be charged. In no event shall any Preliminary Certificate of Eligibility be issued prior to full payment of all filing fees deemed by the Department to be outstanding.

These fees shall apply to all applications where the first Certificate of Eligibility, for such application, whether Preliminary or Final, is issued after the effective date of these rules. All other applications shall be subject to the fees defined by the rules in effect immediately prior to promulgation of these rules.

Payment shall be made by a certified or cashier's check payable to the Commissioner of the Department of Finance of the City of New York. If the application for a Final Certificate of Eligibility includes an increase in the amount of the total project cost, an additional filing fee shall be paid based upon such increase in the total project cost as is approved by the Department.

(d) **Final Certificate of Eligibility: documentation.** (1) The owner must file an application for a Final Certificate of Eligibility which shall consist of an affidavit in the form required by the Commissioner and shall include the following:

(i) A sworn statement of the actual total project cost of the newly constructed building. Such actual project cost may be approved by the Department as the total project cost of such building provided all of the items comprising such

actual total project cost are certified to by a certified public accountant licensed by the State of New York, and further provided that such actual total project cost does not exceed the specific costs determined by the Department pursuant to its promulgated Annual Schedule, plus any allowable abnormal, unique or special foundation costs which may be incurred. In the event that costs relating to commercial portions of the building are incomplete, an estimate of such costs may be accepted tentatively by the Office, provided a supplemental accountant's certification is provided after such costs have been determined. If additional fees are owed on the basis of such supplemental certification, benefits are subject to revocation if the fees are not paid. Where such costs differ from the original cost certification filed with the application for a Preliminary Certificate of Eligibility, such sworn statement shall include

(A) the difference in costs, and

(B) the reason or basis for such difference in costs;

(ii) A revised schedule of proposed initial rents, if any, containing any modification of the original schedule filed with the application for a Preliminary Certificate, for each rental dwelling unit in the building. No requests for revision to this schedule will be considered once a Final Certificate of Eligibility has been issued for the building in question;

(iii) (A) Evidence satisfactory to the Office in a form approved by the Department that the owner of rental dwelling units has registered the building and any occupied units with the New York State Division of Housing and Community Renewal, and, if the building is not fully occupied, an affidavit stating that the owner shall register all remaining units as they become occupied and shall submit proof of such registration of all remaining units in a form approved by the Department upon the earlier to occur of (1) the occupancy of the last remaining unit, or (2) one year from the date of Completion of Construction; or (B) if the project is to be owned and operated as a cooperative or a condominium, a statement by the owner that if the prospective cooperative or condominium plan has not been declared effective for filing at a time fifteen months after the issuance of a Final Certificate of Eligibility, such owner will register these rental units with the New York State Division of Housing and Community Renewal no later than fifteen calendar days after such fifteen month period.

(iv) A statement of the date of completion of the building.

(v) If construction commenced after November 29, 1985 within the geographic exclusion area, and construction was not carried out with substantial governmental assistance, a copy of the Written Agreement and proof of compliance with the requirements of §6-08 herein, including a Permanent Certificate of Occupancy for all new or substantially rehabilitated units or a Temporary Certificate of Occupancy for the entire residential portion of a building or buildings located outside the geographic exclusion area which was constructed or rehabilitated pursuant to an agreement with the Department to qualify the building located within the geographic exclusion area for the benefits of the Act. Proof of compliance shall include the requisite number of Negotiable Certificates in accordance with the ratios set forth in §6-08(b).

(vi) In the event that through no fault of the applicant, and due to unforeseen circumstances which are beyond the control of the applicant, construction of the off-site units which was promptly commenced and has been diligently proceeding has not been completed before the completion of the building applying for benefits pursuant to the Act, the Department, in its sole discretion, may permit the applicant to submit a Letter of Credit equal to 150 percent of the Department approved estimate of the cost of completing the off-site units. The written agreement with the Department will be amended to provide a new completion date, after which the Department shall have the authority to use the proceeds of the Letter of Credit to complete the construction.

(vii) Proof that the multiple dwelling has been registered with the Department in accordance with the provisions of article two of subchapter four of the Housing Maintenance Code.

(viii)(A) For applications received on or after December 19, 2006, an affidavit from the owner certifying that whenever any household appliance in any dwelling unit, or any household appliance that provides heat or hot water for

any dwelling unit in the multiple dwelling, is installed or replaced with a new household appliance on or after December 19, 2006, such new appliance shall be certified as Energy Star. If applicable, such affidavit may instead certify (a) that an appropriately-sized Energy Star certified household appliance is not manufactured, such that movement of walls or fixtures would be necessary to create sufficient space for such appliance, and/or (b) that an Energy Star certified boiler or furnace of sufficient capacity is not manufactured.

(B) For purposes of this subparagraph (viii), (a) "household appliance" shall mean any refrigerator, room air conditioner, dishwasher or clothes washer, within a dwelling unit in the multiple dwelling that is provided by the owner, and any boiler or furnace that provides heat or hot water for any dwelling unit in the multiple dwelling, and (b) "Energy Star" shall mean a designation from the United States Environmental Protection Agency or Department of Energy indicating that a product meets the energy efficiency standards set forth by the agency for compliance with the Energy Star program.

(ix) For applications received for any projects that commence construction on or after December 28, 2007, an affidavit from the owner certifying that either (A) all building service employees employed or to be employed at the building shall receive the applicable prevailing wage for the duration of such building's tax exemption pursuant to the Act, or (B) such project contains less than fifty dwelling units, or (C) at initial occupancy, at least fifty percent (50%) of the dwelling units in the multiple dwelling will be affordable to individuals or families with a gross household income at or below one hundred twenty-five percent (125%) of the area median income and that any such rental units will remain affordable for the entire period during which they receive benefits pursuant to this Act.

(2) The application for a Final Certificate of Eligibility must be filed as follows:

(i) for a multiple dwelling to be owned as a rental, the application must be filed prior to occupancy of the building, but no earlier than the date of the application for a Preliminary Certificate of Eligibility.

(ii) for a multiple dwelling to be owned as a condominium or a cooperative, the application must be filed prior to the first taxable status date following the completion of construction. In the event such application is not timely filed, benefits of the Act shall be revoked pursuant to §6-07(e)(5) herein only where the failure to file such application has resulted in the extension of the construction benefit period beyond the actual period of construction.

(iii) (A) For a public project, the Department may grant an extension of up to four years for filing the application for a Final Certificate of Eligibility, provided that to the extent to which the failure to file such application has resulted in the extension of the construction benefit period beyond the actual period of construction for such public project, the construction benefit period shall be retroactively adjusted so that it is coterminous with the actual construction period.

(B) For a building which is not a public project, the Department may grant an extension of up to two years for filing the application for a Final Certificate of Eligibility where the applicant has established that it reasonably relied upon the representations of third parties that the benefits of the Act would be available, provided that to the extent to which the failure to file such application has resulted in the extension of the construction benefit period beyond the actual period of construction for such building, the construction benefit period shall be retroactively adjusted so that it is coterminous with the actual construction period.

(3) The applications for a Final Certificate of Eligibility must be completed by the applicant as follows:

(i) for a multiple dwelling containing one hundred units or less, within ninety days following the issuance of a permanent certificate of occupancy or a temporary certificate of occupancy covering all residential space.

(ii) for a multiple dwelling containing more than one hundred units, within one hundred and eighty days following the issuance of a permanent certificate of occupancy or a temporary certificate of occupancy covering all residential space.

(iii) where an extension has been granted under paragraph (2)(iii) of this subdivision, the application must be completed (A) within ninety days of the filing thereof for a multiple dwelling containing one hundred units or less, or (B) within one hundred and eighty days of the filing thereof for a multiple dwelling containing more than one hundred units.

(4) Reserved.

(5) In the event that all the required documents are not timely filed, benefits of the Act may be revoked pursuant to §6-07(e)(5) herein. An application shall be deemed complete when all items delineated in §6-05 have been submitted, as well as any other documents which the Office may request.

(6) Notwithstanding the provisions contained in paragraph (3) of this subdivision, the Office may grant an extension to complete an application for a Final Certificate of Eligibility for good cause shown.

(e) **Issuance of a Certificate of Eligibility.** (1) Upon receipt of the application for a Preliminary Certificate of Eligibility the Department shall determine the initial adjusted monthly rent and the comparative adjusted monthly rent with respect to rental dwelling units contained within the multiple dwelling pursuant to §6-04(a) herein. Upon the Commissioner's determination that a multiple dwelling is entitled to partial tax exemption hereunder the Department shall issue a Preliminary Certificate of Eligibility to be delivered by the applicant to the appropriate borough officer of the Property Division of the Department of Finance together with his, her or its application to the Department of Finance for partial tax exemption. Such certification shall be conditioned upon the filing and approval of an application for a Final Certificate of Eligibility as herein provided.

(2) Upon receipt of the application for a Final Certificate of Eligibility and either a Temporary Certificate of Occupancy for all residential areas in the multiple dwelling or a Permanent Certificate of Occupancy, and upon the Commissioner's determination that a multiple dwelling is entitled to partial tax exemption hereunder, the Department shall issue a Final Certificate of Eligibility to be delivered by the owner to the appropriate borough officer of the Property Division of the Department of Finance between February 1st and March 15th, together with his, her or its application to the Department of Finance for partial tax exemption.

(f) **Voluntary withdrawal.** Once an application for a Preliminary Certificate of Eligibility or a Final Certificate of Eligibility has been approved, an owner may withdraw the application only if (i) all taxes which would have been owed absent the exemption are paid to the City, with all interest accrued thereon, and (ii) the building for which the application was made is substantially incomplete or unoccupied by residential tenants.

(g) **Declaratory rulings.** A declaratory ruling with respect to an analysis of a specific or hypothetical site, project, fact pattern or document or an interpretation of the applicability of a specific provision of the 421-a statute or Rules to an actual or hypothetical site, project, fact pattern or document or any other issue related to eligibility may be given in the discretion of the Office upon payment of a non-refundable fee in the amount of $1,500 payable at the time such declaratory ruling is requested in writing. In no event shall a declaratory ruling bind the Office as to the overall eligibility of a project for 421-a benefits.

NOTE

1. Statement of Basis and Purpose in City Record May 17, 2004:

Section 421-a of the Real Property Tax Law has provided tax benefits for the construction of new residential buildings in the City of New York since 1971. Under Real Property Tax Law §421-a, new multiple dwellings that meet all of the statutory and regulatory requirements are eligible for a partial tax exemption that consists of up to three years of construction period benefits and 10, 15, 20 or 25 years of partial tax exemption after construction. One hundred percent of increases in assessed valuation are exempt from taxation during the construction period, and the regular benefit period does not commence until after the entire construction period benefits term has run. The amendments to the 421-a rules establish more reasonable filing and completion deadlines for an application for a final certificate of eligibility. They also give HPD discretion to grant extensions for the completion of such applications for good cause shown.

The final certificate of eligibility signifies the completion of the multiple dwelling and, consequently, the end of construction period benefits. Thereafter, the regular tax exemption benefits period starts to run. Those 421-a applications pending on the effective date of these amendments for multiple dwellings that already have received a permanent certificate of occupancy or a temporary certificate of occupancy covering all residential space will have six months to file and to complete their applications for a final certificate of eligibility.

2. Statement of Basis and Purpose in City Record May 18, 2007: These proposed rule amendments implement Local Law 107 of 2005, which requires recipients of 421-a tax exemption benefits to purchase certain Energy Star certified household appliances. The proposed rule amendment also now requires multiple dwelling registration in accordance with article two of subchapter four of the Housing Maintenance Code as another prerequisite to getting Real Property Tax Law §421-a benefits.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 6-06

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-06 The Tax Exemption.

(a) **Taxes on prior assessed valuation not subject to exemption.** Taxes on the assessed value of land receiving benefits under this section, and any improvements thereon, during the tax year preceding the commencement of construction are not eligible for exemption under the Act. Tax exemption under the Act is not available until the tax year following the first year taxable status date following commencement of construction. The Prior Assessed Valuation remains subject to taxation at the prevailing rate from year to year.

(b) **Diminution of tax exemption for excess commercial space.** As of July 1, 1975, in the event the multiple dwelling contains Floor Area of Commercial, Community Facility and/or Accessory Use Space which exceeds twelve percent (12%) of the Aggregate Floor Area, there shall be a diminution of the tax exemption in an amount equal to the ratio of Floor Area of Commercial, Community Facility and/or Accessory Use Space in excess of twelve percent (12%) of the Aggregate Floor Area to the Aggregate Area. Where a project contains a separately assessed parcel such as a residential condominium located above a separately owned commercial space, the proportionate reduction of tax exemption resulting from Commercial, Community Facility and Accessory Use Space in excess of twelve percent (12%) shall be allocated entirely to the non-residential parcel or parcels up to the point that no exemption exists for any such parcel before applying the reduction in exemption to the residential space, provided, however, that such allocation shall only be made with respect to properties for which a preliminary application for benefits is received after July 26, 1993 or for which a final application is received after such date if no preliminary application was received.

(c) **Exemption during construction.** Multiple Dwellings which satisfy all of the requirements set forth herein and have received a Preliminary Certificate of Eligibility shall be exempt from real property taxes, other than assessments

for local improvements, upon any increase in assessed valuation over the Prior Assessed Valuation during the statutorily defined period of construction, or for a period of three years, whichever is less, provided that taxes shall be paid in each tax year in which full or partial exemption is in effect on the Prior Assessed Valuation, as defined in §6-01(c) herein.

(d) **Exemption after construction.** After the first taxable status date immediately following the completion of construction any increase in assessed valuation over the Prior Assessed Valuation of eligible multiple dwellings which have received a Final Certificate of Eligibility shall be exempt from real property taxes, other than assessments for local improvements, for either ten, fifteen, twenty or twenty-five consecutive tax years, as provided in §6-02(d) herein, pursuant to the following schedules. In addition, owners must pay full taxes on the Prior Assessed Valuation, as defined in §6-01)(c) herein.

TEN YEAR EXEMPTION

Year	Percent of Increased Assessed Valuation Which is Exempt
First	100%
Second	100%
Third	80%
Fourth	80%
Fifth	60%
Sixth	60%
Seventh	40%
Eighth	40%
Ninth	20%
Tenth	20%
Eleventh	0%

FIFTEEN YEAR EXEMPTION

Year	Percent of Increased Assessed Valuation Which is Exempt
First through Eleventh	100%
Twelfth	80%
Thirteenth	60%
Fourteenth	40%
Fifteenth	20%
Sixteenth	0%

TWENTY YEAR EXEMPTION

Year	Percent of Increased Assessed Valuation Which is Exempt
First through Twelfth	100%
Thirteenth and Fourteenth	80%
Fifteenth and Sixteenth	60%
Seventeenth and Eighteenth	40%
Nineteenth and Twentieth	20%
Twenty-first	0%

TWENTY-FIVE YEAR EXEMPTION

Year	Percent of Increased Assessed Valuation Which is Exempt
First through twenty-first	100%
Twenty-second	80%
Twenty-third	60%
Twenty-fourth	40%
Twenty-fifth	20%
Twenty-sixth	0%

(e) **Period of gradual diminution of tax exemption.** Solely for purposes of §6-04(b) of this chapter, the period of gradual diminution of tax exemption shall be the following:

(1) For the ten year benefit period, the ten years beginning in the first year of exemption after completion of construction.

(2) For the fifteen year benefit period, the five years beginning in the eleventh year of exemption after completion of construction.

(3) For the twenty year benefit period, the eight years beginning in the thirteenth year after completion of construction.

(4) For the twenty-five year benefit period, the five years beginning in the twenty-first year of exemption after completion of construction.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-07 Record Keeping; Revocation of Tax Exemption; Discrimination Prohibited.

(a) **Collection of data; subpoenas; testimony.** At any time subsequent to the filing of an application and during the period of tax exemption, the Department may:

(1) Examine any books, papers, records or other data which may be relevant or material to the tax exemption requested or granted;

(2) Summon any person, including, but not limited to, the owner or an officer, director, member or employee of the owner, or any person having, or having had, possession, custody or control of books, papers or records relating to the tax exemption requested or granted, or any person or firm that participated in the construction of the building, to appear before the Commissioner or his or her designee at the time or place designated in the summons or to produce such books, papers or records or other data, and to give such testimony under oath as may be relevant or material to the tax exemption requested or granted.

(b) **Availability of books and records; revocation.** All books, records and documents required by §6-05 herein, or which relate to or support the application made pursuant to this chapter as well as an annual schedule of rents for each unit in the building, as required by §6-04(c) herein, shall be kept by the owner and made available for inspection by the Department until the expiration of the tax exemption requested or granted. Failure to make books, records or documents, including an annual schedule of rents for each unit in the building, available upon request may result in the prospective or retroactive revocation of tax exemption benefits.

(c) **Preservation of records.** The Department shall maintain a complete file of all records, documents, notices and correspondence relating to each application. Pursuant to the provisions of the Freedom of Information Law, these records shall be open to public inspection upon prior written request to the Department of Housing Preservation and Development, Freedom of Information Record Access Officer, 100 Gold Street, 9th Floor, New York, N.Y. 10038. Records are available for inspection by members of the general public and a copy of an application or any part thereof, shall be furnished to any person upon payment of the prevailing charge.

(d) **False or misleading applications; revocation.** If the applicant has furnished information which is incorrect or misleading in any substantial respect or which fails to comply with this chapter or requirements imposed by the New York State Division of Housing and Community Renewal and if the breach or omission has not been cured within the time prescribed in §6-07(h), below, the Department may revoke any Preliminary or Final Certificate of Eligibility, retroactively or prospectively.

(e) **Additional grounds for revocation.** The Commissioner of the Department of Finance or the Commissioner of the Department of Housing Preservation and Development may withdraw tax exemption granted to a building pursuant to the Act upon the happening of any of the following events:

(1) The multiple dwelling is operated primarily for commercial, hotel, or single room occupancy use. Revocation shall be effective from the first tax quarter in which the prohibited use began;

(2) The real estate taxes or water or sewer charges with respect to the building (and land) remain unpaid for one year after the same are due and payable to the City unless the applicant or his, her or its predecessor in title has entered into an installment agreement with the City which provides for the payment of delinquent taxes, assessments or other legal charges pursuant to §11-401 et seq. of the Administrative Code and all payments required by said installment agreement have been paid when due. Revocation shall be effective from the first tax quarter in which taxes were unpaid;

(3) The building ceases to be subject to the provisions of law set forth in §6-02(g)(2) unless the building is exempt from such provisions pursuant to §6-02(g)(3). Revocation shall be effective on the date of such cessation;

(4) Any person subject to be summoned by virtue of §6-07(a) fails to appear and produce books, papers, records or other data as required by said section, after being duly summoned to appear. Revocation shall be retroactive to start of construction;

(5) The applicant fails to satisfy any time requirement set forth herein. Revocation shall be retroactive to start of construction.

(6) The applicant fails to establish to the satisfaction of the Department that affordable units created to qualify a building for the benefits of the Act which have not been transferred to a qualified not-for-profit organization are being maintained as affordable and in a habitable condition pursuant to the requirements of §6-08 herein.

(7) The multiple dwelling qualified for the benefits of the Act on the basis of Negotiable Certificates, and the Department finds that the units which were the basis for the issuance of the Negotiable Certificates which have not been transferred to a qualified not-for-profit organization are not being maintained as affordable and in a habitable condition pursuant to the requirements of §6-08 herein.

(8) The Department finds that a rental building located in the geographic exclusion area which qualified for the benefits of the Act pursuant to §6-08(b) herein has been converted to cooperative or condominium ownership prior to the expiration of the partial tax exemption.

(f) **Discrimination prohibited: revocation.** No owner of a multiple dwelling which is receiving the benefits of the Act, nor any agent, employee, manager or officer of such owner shall directly or indirectly deny to any person any of the dwelling accommodations in such property or any of the privileges or services incident to occupancy thereto in

violation of the anti-discrimination provisions of §8-107 of the Administrative Code. The practice of any discrimination as described herein shall result in the revocation of benefits under the Act, retroactive to the date of such practice. Nothing contained in this subdivision (f) shall restrict such consideration in the development of housing accommodations for the lawful purpose of providing for the special needs of a particular group.

(g) **Initial occupancy of designated units not by persons of low and moderate income or not affordable; revocation.** No owner of a multiple dwelling located within the geographic exclusion area, which is receiving the benefits of the Act only because the requisite number of affordable units has been created, nor any employee, manager, or officer of such owner shall, at initial occupancy, or upon vacancy, directly or indirectly, rent such affordable unit to any person ineligible for such occupancy or, at any time during the tax benefit period, rent fewer than the number of units required by the Department pursuant to §6-08 herein at a cost affordable to persons of low and moderate income. Any such practice shall result in the revocation of benefits under the Act, retroactive to commencement of construction.

(h) **Notice and procedure upon revocation.** The Department shall serve, by ordinary mail, a Notice of Revocation or Reduction on the applicant and any subsequent owner or mortgagee, which has previously registered with the Department for the receipt of such notice, that said applicant, owner or mortgagee has furnished incorrect or misleading information of a substantial nature, or has omitted information of a material nature, or is in violation of one or more provisions of the Act or this chapter. The notice will provide a brief description of the violation alleged. The applicant, owner or mortgagee shall have ninety (90) days to cure the violation or, alternatively, may request an informal hearing within thirty (30) days from the date of the notice to rebut the allegations therein. Upon the applicant's, owner's or mortgagee's failure to cure or rebut within the time prescribed, the Department shall advise the Department of Finance that a Certificate of Eligibility has been revoked or that the amount of exemption is to be reduced. The Department of Finance shall retroactively or prospectively withdraw or reduce tax exemption granted to an eligible multiple dwelling. In the case of a retroactive revocation, the Department of Finance shall reinstate the amount of taxes which have been exempted and charge interest at the rate prescribed by the Administrative Code to be calculated from the day on which such taxes would have been payable but for the exemption.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-08 Affordable Housing Construction Requirements.

(a) **Multiple dwellings affected.** Within the geographic exclusion area described in §6-02(c)(10) herein, the benefits of the Act are available only to multiple dwellings which would otherwise be eligible for benefits of the Act pursuant to the provisions of these rules and where construction commenced on or before November 29, 1985, unless such construction is carried out with substantial governmental assistance, or the owner thereof complies with the requirements of this section.

(b) **Number of affordable units required to be created.** A multiple dwelling located in the geographic exclusion area which would otherwise be eligible pursuant to the provisions of these rules and not constructed with substantial government assistance may qualify for benefits under the Act by the method described in either paragraph (1), (2), (3), (4), (5), or (6) of this §6-08(b). The ratio of the number of affordable units to be created to the number of units in a multiple dwelling located within the geographic exclusion area seeking the benefits of the Act are listed below.

[See tabular material in printed version]

(1) Obtaining the certification of the Department that twenty percent (20%) of the units contained in the multiple dwelling applying for benefits pursuant to the Act shall be rented to persons of low and moderate income as defined by this chapter at rents to be determined by the Department pursuant to this section.

(2) Entering into a written agreement with the Department on or before December 31, 1990 to create through new construction on a site or sites meeting the requirements of §6-02(f), herein, Class A dwelling units to be rented to

persons of low and moderate income as defined by this chapter at rents to be determined by the Department pursuant to this section numbering at least twenty percent (20%) of the units in the multiple dwelling located within the geographic exclusion area seeking benefits pursuant to the Act.

(3) Entering into a written agreement with the Department on or before December 31, 1990 to substantially rehabilitate an existing Class A multiple dwelling, the residential portion of which is vacant, to be rented to persons of low and moderate income as defined by this chapter at rents to be determined by this section. The number of units to be substantially rehabilitated shall be in accordance with the following ratios:

(i) twenty-five percent (25%) of the number of units contained in the multiple dwelling or dwellings located within the geographic exclusion area which will be owned as a rental; or

(ii) thirty percent (30%) of the number of units contained in the multiple dwelling or dwellings located within the geographic exclusion area which will be owned as a cooperative or condominium.

(4) Entering into a Written Agreement with the Department on or after January 1, 1991 to create Class A dwelling units through new construction on a site or sites meeting the requirements of §6-02(f) herein, to convert an existing non-residential building to a Class A multiple dwelling, or to substantially rehabilitate an existing Class A multiple dwelling building, the residential portion of which is vacant and has been entirely vacant for not less than three years, to be rented to:

(i) persons of low income as defined by this chapter at the rents to be determined by the Department pursuant to this chapter numbering at least twenty percent (20%) of the units in the multiple dwelling located within the geographic exclusion area seeking benefits pursuant to the Act.

(ii) persons of moderate income as defined by this chapter at rents to be determined by this section numbering at least tweny-five percent (25%) of the units in the multiple dwelling located within the geographic exclusion area seeking benefits pursuant to the Act.

(iii) homeless persons are referred by the Department or by the Human Resources Administration, numbering at least sixteen and six-tenths percent (16.6%) of the units in the multiple dwelling located within the geographic exclusion area seeking benefits pursuant to the Act.

(5) Entering into a written agreement with the Department to create through new construction or substantial rehabilitation Single Room Occupancy units to be rented to persons of low and moderate income as defined by these rules at rents to be determined by the Department pursuant to this section. The number of units to be created shall be in accordance with the following ratios:

(i) forty-two percent (42%) of the number of units contained in the multiple dwelling or dwellings located within the geographic exclusion area which will be owned as a rental; or

(ii) fifty-one percent (51%) of the number of units contained in the multiple dwelling or dwellings located within the geographic exclusion area which will be owned as a cooperative or condominium.

(6) If the average size of the residential units contained in the multiple dwelling or dwellings located within the geographic exclusion area seeking benefits pursuant to the Act exceeds 1,200 square feet, the Department shall increase the number of affordable units which must be created pursuant to paragraphs (2), (3), (4) or (5) of §6-08(b) by multiplying that number of units by the ratio of the average square footage to 1200 square feet unless the average square footage per unit of the low and moderate income units is equal to those of the multiple dwelling in the geographic exclusion area and the developer is the same for the geographic exclusion area units and the affordable units.

(7) If the number of low and moderate income units to be created exceeds 130, two out of every three units in

excess of 130 must be rented to moderate income households as defined in this chapter, and must number twenty-five percent (25%) of the number of the units in the multiple dwelling located within the geographic exclusion area seeking the benefits of the Act; and one out of every three units in excess of 130 must be rented to low income households as defined in this section, and must number twenty percent (20%) of the number of units in the multiple dwelling located within the geographic exclusion area seeking the benefits of this Act.

(c) **Location of affordable units.** Dwelling units created to satisfy the requirements of this section must be contained in a multiple dwelling located on a site or sites outside of the geographic exclusion area, except those affordable units contained in the multiple dwelling, located within the geographic exclusion area, seeking benefits of the Act. In addition, where a written agreement was executed on or after January 1, 1991, dwelling units created to satisfy the requirements of this chapter may also be located on a site or sites within the geographic exclusion area. Sites outside of the geographic exclusion area may be either privately owned or owned by the City of New York. The development of City owned sites must be carried out pursuant to the provisions of §6-08(d).

(d) **Development of City-owned sites.** (1) An applicant for benefits pursuant to this Act who wishes to create the required number of low and moderate income units on a vacant City-owned site may be offered a site or sites pursuant to a method to be established by the Department. Such method shall make available parcels which will yield the necessary number of low and moderate income units.

(2) The following procedures apply to the substantial rehabilitation or conversion of City-owned sites or to new construction on vacant City-owned parcels:

(i) All construction shall be performed by the developer under a license agreement with the City. At no time will title to the multiple dwelling be conveyed to the developer. All hard and soft development costs will be borne by the developer.

(ii) After a permanent Certificate of Occupancy has been issued for the multiple dwelling or dwellings, the Department shall convey title to the multiple dwelling or dwellings to a qualified not-for-profit organization in whose catchment area the project is located. Disposition will be for $1 per multiple dwelling through ULURP or UDAAP. If the building is located in the catchment area for more than one local and/or city-wide qualified not-for-profit group, the Department will select the group to whom the building will be sold.

(iii) one hundred percent (100%) of the units in the multiple dwelling or dwellings must be affordable units.

(iv) ten percent (10%) of the units must be provided for homeless families. Referrals will be made by HPD/HRA by agreement with the not-for-profit organization, which shall provide the not-for-profit organization with the ability to screen prospective tenants.

(e) **Ownership of affordable units.** (1) All affordable units created pursuant to this section must be owned as rentals, for either 20 years or as long as the building containing the affordable units receives real estate tax benefits, whichever is longer.

(2) Buildings containing affordable units created on privately owned sites may be owned by either a for-profit or a qualified not-for-profit organization.

(i) In the event ownership of the affordable units is retained by a for-profit owner, the owner of the building receiving the benefits of the Act as a result of satisfaction of the requirements of this section shall have the ongoing responsibility for insuring the continuing maintenance and operation of the affordable units in a habitable condition. Should an owner fail to maintain such units as affordable or in a habitable condition, pursuant to §6-07(e)(6), (7) and (8) of this chapter, benefits of the Act received by the multiple dwelling located in the geographic exclusion area shall be revoked retroactive to the start of construction. Upon receipt of a Notice of Revocation pursuant to §6-07(h) of this chapter, the owner shall have a ninety day period to cure such violation.

(ii) The developer of the affordable units on privately owned sites may elect to transfer ownership of the off-site units to a qualified not-for-profit organization is a New York State corporation experienced in the management of low income housing and approved in writing by the Department in accordance with the purpose of this section. In that event, the developer must convey title to a qualified not-for-profit for $1.00 per multiple dwelling. The not-for-profit owner shall assume the ongoing responsibility for insuring the continuing maintenance and operation of the affordable units in a habitable condition. Failure of the not-for-profit to maintain such units as affordable or in a habitable condition shall not result in a revocation of the tax benefits received by the multiple dwellings located in the geographic exclusion area.

(iii) A developer creating affordable units on a privately-owned site with the assistance of the Federal Low Income Housing Credit under §42 of the Internal Revenue Code of 1986 may retain ownership of such units if the developer enters into a management contract with a qualified managing agent approved in writing by the Department and conforms to the requirements of this section. Failure of the managing agent to maintain such units as affordable or in a habitable condition shall not result in a revocation of the tax benefits received by the multiple dwelling located in the geographic exclusion area.

(A) The management contract must be approved by the Department and shall be for twenty years or for the length of the real estate tax benefits on the affordable units, whichever is longer. The developer must obtain the prior written approval of the Department to substitute another qualified managing agent if, during the term of the contract, the relationship with the original manager is severed for any reason.

(B) The affordable units must remain as rent stabilized units for twenty years or the length of the real estate tax benefits on such affordable units, whichever is longer. Thereafter, upon each vacancy the affordable units may be deregulated according to the following schedule:

Year After Expiration of Lower Income Housing Plan	Maximum % of Units that can be at Market
One	0%
Two	0%
Three	20%
Four	20%
Five	40%
Six	40%
Seven	60%
Eight	60%
Nine	80%
Ten	80%
Eleven	100%

(C) The developer shall enter into an agreement with the Department to fund two reserve funds. The first shall create sufficient funds for maintenance and operation of the affordable housing units to the extent to which maintenance and operating expenses exceed income available from the rent roll, and shall be created in accordance with §6-08(f)of this section. The second covers capital improvement costs and will require the developer to deposit with the City a Capital Improvement Escrow Fund equal to 1 percent (1%) of total development costs. The developer will be required to replenish the fund within sixty (60) days of any drawing down. Interest will accrue to such Fund, which will be held by the Department. The not-for-profit can draw on this escrow fund upon authorization by the Department if the developer fails to make necessary capital repairs. Neither the Department nor the City shall have any liability as Escrow Agent; the Department's determination of withdrawal of funds shall be binding on all parties.

(D) If HPD approves a not-for-profit manager, the developer must enter into a purchase option contract with the not-for-profit for the period of the affordable housing plan. This option contract shall state that the not-for-profit manager may purchase the affordable units for $1 if the owner abandons the project. Evidence of abandonment shall include failure by the developer to meet the maintenance and operating expenses, failure to replenish the Capital Improvement Escrow Fund, or failure to make necessary repairs. Further, if during the time of the Federal Low Income Housing Credit, such credit is revoked and recaptured due to failure by the developer to comply with the applicable provisions of the Internal Revenue Code and any applicable regulations, then the not-for-profit may exercise the purchase option listed above. If the developer retains ownership through the end of the affordable housing plan, then the Capital Improvement Escrow Fund is paid to the developer upon expiration of the affordable housing plan. If the developer abandons the development before the end of the expiration of the affordable housing plan, then the Capital Improvement Escrow Fund is transferred to the not-for-profit. The purchase option contract may provide for an automatic termination of the contract if HPD approves termination of the not-for-profit as managing agent. In the absence of a not-for-profit manager, HPD may require the owner to enter into a purchase option contract with a not-for-profit acceptable to HPD which would take effect in the event of abandonment.

(f) **Special reserve account.** The developer of affordable units necessary to qualify a multiple dwelling within the geographic exclusion area for benefits of the Act, which shall not be owned by the for-profit developer of such multiple dwelling, must create a special operating reserve fund. The fund shall be in the amount of $2.25 for each square foot of affordable housing contained in such new, newly converted or substantially rehabilitated multiple dwelling or dwellings, including a pro rata share of common space of buildings not entirely lower income. The fund shall be placed in a blocked account which will be administered by the Department. This reserve fund is separate from the normal building reserve fund built into the rent roll that will be accumulated over time and will be available only on a program-wide basis to cover unanticipated increases in the costs of operating and maintaining units in general. Once an expenditure from the fund has been authorized on a programmatic basis, the dollars can be drawn down on a project-by-project basis. There will be a separate account for each project. Notwithstanding the above, the reserve fund may also be drawn down, with the approval of the Department, in the event of unusual occurrences not normally covered by the normal building reserves.

(g) **Construction requirements.** (1) Affordable Class A dwelling units created through new construction must meet the standards set forth in the Department's "Design Guidelines For Housing-New Construction" and "Standard Specifications" ("Design Guidelines") (applicant should obtain the most recent edition of the Design Guidelines from the Department). In addition, such dwelling units must satisfy one of the following requirements:

(i) Unless the affordable units are created under §6-08(b)(3) or §6-08(b)(5), 50 percent (50%) of the units must contain two or more bedrooms, and in all cases average square footage and bedroom mix must be equally distributed with respect to all income levels; or

(ii) For multiple dwellings that commence construction before December 28, 2007, such affordable units must be located in the same building and must contain the same average square footage and bedroom mix of all residential units contained in such multiple dwelling. For multiple dwellings that commence construction on or after December 28, 2007, if the affordable units are created in accordance with §6-08(b)(1) and unless preempted by federal requirements, (A) all affordable units must have a comparable number of bedrooms and a unit mix proportional to the market rate units contained in such multiple dwelling, or (B) at least fifty percent (50%) of the affordable units must have two or more bedrooms and not more than fifty percent (50%) of the remaining affordable units can be smaller than one bedroom, or (C) the floor area of the affordable units must be no less than twenty percent of the total floor area of all dwelling units in such multiple dwelling.

(2) Affordable Class A dwelling units created through substantial rehabilitation or conversion must meet the standards set forth in the Department's "Design Guidelines For Housing-Substantial Rehabilitation" and "Standard Specifications." ("Design Guidelines") (applicant should obtain the most recent edition of the Design Guidelines from the Department).

(i) In order for the rehabilitation of a vacant multiple dwelling or the conversion of a non-residential building to qualify under §6-08(b)(4) of these rules, the scope of work must include but is not limited to the following:

(A) Beam replacement, to the extent required by the Department

(B) New subflooring

(C) New partition framing

(D) New sheetrock walls and ceilings

(E) New windows

(F) New finish flooring, roofing and insulation

(G) New kitchen cabinets

(H) New baths with ceramic tile finishes

(I) New interior and exterior doors (wood and metal)

(J) New finish carpentry

(K) New plumbing

(L) New heating

(M) New electrical

(N) New elevators (where applicable)

(0) Masonry repairs, to the extent required by the Department

(P) New fire escapes, to the extent required by the Department

(Q) Concrete site work, to the extent required by the Department

(ii) At least fifty percent (50%) of the affordable units created pursuant to this paragraph shall contain two or more bedrooms each, except that the Department may reduce the bedrooms requirements when, in the sole opinion of the Department, existing structural elements preclude compliance. If the Department approves a reduction in the number of bedrooms, the developer will be required to rehabilitate or create through conversion additional units in a room and bedroom configuration which is acceptable to the Department, to compensate for the number of bedrooms and square footage which would have been obtained had the bedroom requirement been met. For the purposes of computation, the Department will require three studios or two one-bedroom units to be built for every two-bedroom unit lost. The Department will seek the solution which results in creating apartments with the highest bedroom count possible, consistent with the Department's policy of creating housing which meets the needs of families.

(3) Single Room Occupancy Units created to conform to §6-08(b)(5) must conform to the Department's Single Room Occupancy Guidelines (applicant should obtain the most recent edition of the Guidelines from the Department).

(h) **Income and occupancy requirements.** All units created pursuant to this section must, at initial occupancy, be affordable to low and moderate income households, as defined in this chapter. Such units must be rented to households earning no more than four times the annual rent for the dwelling unit established pursuant to §6-08(i), herein, and must be rented to households that consist of the minimum number of people as specified below:

Bedroom Size	Minimum Number of People
0	1
1	1
2	2
3	4

(i) **Initial rents; re-rentals.** (1) For projects permitted to assume debt pursuant to §6-08(o)(2), the Department shall establish initial rents for individual units as provided in subparagraph (i). For all other projects, initial rents shall be established as provided in subparagraph (ii).

(i) Units rented to persons of low income are not to exceed 30% of 55% of median income. Units rented to persons of moderate income are not to exceed the average of 30% of 75% of median income, provided that no initial annual rent will be established for any unit in a moderate or mixed income project which exceeds 30% of 95% of annual median income. The Department shall establish a total rent roll for units created pursuant to this section based upon program-wide standards for the amount necessary for maintenance, operation, administration, creation of normal reserve accounts, debt service, and in consideration of the income level to be served. For the purpose of determining median income, the following family sizes shall be imputed:

Number of Bedrooms	Imputed Family Size
0	1.0
1	1.5
2	3.0
3	4.5
4	6.0

(ii) The Department shall establish a total rent roll for units created pursuant to this section based upon program-wide standards for the amount necessary for maintenance, operation, administration and the creation of normal reserve accounts, and in consideration of the income level to be served. For affordable units being constructed under any of the options in this section, the managing agent may set rents higher than the allowable rent roll only with the prior written approval of the Department and only as long as no household is charged more than thirty percent (30%) of their annual income for rent. Such rents shall be the higher of the rents in effect when the Written Agreement for Creation of Affordable Housing is entered into or when construction of the affordable housing units commences. The initial rents for individual units will be determined by the managing entity, and must be affordable to low and moderate income families, as defined in this chapter. In no case shall the initial rent of any affordable unit exceed 30% of 100% of median income.

(2) Upon initial occupancy, all units created pursuant to this section must be registered with the New York State Division of Housing and Community Renewal. Such units must remain rent stabilized for the entire period during which such units receive real estate tax benefits under any New York State or New York City tax abatement and/or exemption programs, or for 20 years, whichever is longer.

(3) Future rent increases may not exceed the increases established by the Rent Guidelines Board.

(4) Upon vacancy, units must be re-rented at no more than the legal stabilized rent. All units must be rented to families earning no more than four times such annual rent.

(5) Tenants holding a lease and in occupancy of any unit created pursuant to this section at the expiration of the rent stabilization period pursuant to paragraph (2) of this subdivision (i) shall have the right to remain as rent stabilized tenants for the duration of their occupancy. Once units become vacant after termination of benefits, the owner of such units shall have the option to de-stabilize such rents.

(6) Tenant incomes and rents must be certified to the Department by the owner of the multiple dwelling containing the affordable units following initial rent up. Thereafter, the owner of such multiple dwelling must certify to the Department tenant incomes and rents for all re-rentals after vacancies on an annual basis, but no later than January 31 for each calendar year ending December 31.

(7) For the purposes of this subsection (i), "rent" shall mean gross rent, as defined for the purposes of the federal low income housing tax credit program, and shall include utilities. In the event that utilities are charged separately, gross rent shall be reduced accordingly.

(j) **Second tier rents.** As an additional protection against future insolvency of units created pursuant to this section and owned by a qualified not-for-profit organization, the Department will also register with the New York State Division of Housing and Community Renewal a second level of rents. This second tier of rents will be set by the Department at or very close to the maximum rents affordable to moderate income families as defined in this chapter. Implementing the second tier of rents for any unit will be allowed on vacancy only with the Department's written permission. The Department will give its permission after a finding that the project has been efficiently managed and the need for second tier rents are a result of factors outside the control of the not-for-profit owner, but in any event, in the following cases only:

(1) When the project's financial feasibility is threatened by a significant unanticipated rise in maintenance and operating expenses that cannot be covered by the rent roll and available reserves; or

(2) When a significant, unanticipated expense occurs in the building that cannot be covered by the rent roll and available reserves; or

(3) When rents rise faster than the income of the tenants who are paying 30 percent (30%) of their income in rent and where the increased rent(s) on the vacant unit(s) are used to maintain the rents for existing tenants at 30 percent (30%) of their income.

(k) **Time requirements; filing fees.** (1) The written agreement with the Department for the creation of affordable units pursuant to this section must be entered into prior to the commencement of construction of such affordable units.

(2) Such written agreement may be entered into after the commencement of construction of the multiple dwelling or dwellings located in the geographic exclusion area seeking benefits of this Act.

(3) Any request for a written agreement pursuant to §6-08(1) herein shall be accompanied by a filing fee of $100 for each proposed unit of affordable housing, which fee shall be non-refundable but shall be applied to the filing fee for the tax benefits for the affordable units, as established by §6-05(c) herein and §5-05(f) of Title 28 of the Rules of the City of New York governing tax exemption and abatement pursuant to §11-243 of the Administrative Code (J-51).

(l) **Request for written agreement.** The following shall be required to be submitted to the Department with any request for a written agreement. Once approved, all documents will be incorporated into the agreement, the complete package to be referred to as The 421-a Written Agreement for Creation of Affordable Housing:

(1) A cover sheet identifying:

(i) the applicant

(ii) if a corporate entity, the principals in that entity

(iii) the location of the affordable housing units

(iv) the location, if known, of the multiple dwelling located within the geographic exclusion area seeking benefits of the Act.

(2) A statement that the units are intended to entitle a project to receive benefits of the Act and that such units will be rented in compliance with all provisions of this chapter.

(3) Proof of control of the site of the affordable units including:

(i) if privately owned, deed or contract of sale; or

(ii) if a city-owned building is to be rehabilitated or converted,

(A) proof of selection of site; and

(B) endorsed license agreement with the City to permit the rehabilitation or con- version.

(4) Preliminary building plans as approved by the Department, indicating a site plan of the low and moderate income building, total size of the building and the size and configuration of the dwelling units to be contained in the building.

(5) A scope of work indicating the extent of rehabilitation or scope of new construction or conversion.

(6) Identification of the owner of the affordable units created on privately owned sites: (i) if a for-profit owner, the name of the ownership entity and principals.

(ii) a not-for-profit owner, the name of not-for-profit and evidence of pre-quali- fication.

(7) A marketing plan for tenant selection and apartment rental. The marketing plan shall identify specific organizations or institutions, such as Community Boards, not-for-profit organizations, senior citizen centers, religious institutions, etc., which shall advertise the availability of the affordable units and must be in accordance with the Department's marketing guidelines, which can be obtained from the Department. All marketing efforts must meet equal opportunity and fair housing guidelines.

(8) A statement that a rental multiple dwelling located within the geographic exclusion area which qualified for benefits under the Act pursuant to §6-08(b)(3), (4) or (6) of this section will not be converted to cooperative or condominium ownership during the period of partial tax exemption. Conversion may be permitted by the Department subsequent to the expiration of the period of partial tax exemption where the affordable units are owned by a for-profit organization only if the conversion sponsor:

(i) enters into a Written Agreement with the Department to provide for the maintenance and operation of the affordable units for the remainder of the 20 years or the period during which such units receive tax benefits under any New York State or New York City tax abatement or exemption program, whichever is longer, or

(ii) transfers the ownership of the affordable units to a not-for-profit organization qualified by the Department.

(9) Where affordable units are created pursuant to §6-08(b)(1) herein, a statement that such units will not be converted to condominium or cooperative ownership for 20 years, or as long as the buildings containing the affordable units receive tax benefits under any tax abatement or tax exemption program from the State of New York or the City of New York, whichever is longer.

(10) Where the affordable units will be owned by for-profit organization, except those units meeting the requirments of §6-08, a statement that the recipient of the benefits of this Act will be responsible for the maintenance and operation of the units in a habitable condition. If the units will be owned by a not-for-profit organization as permitted under §6-08(e)(2)(iii) of this chapter, the developer shall be required to fund a reserve fund in the amount of $2.25 for each square foot of affordable housing provided, in the same manner as that described in §6-08(f), and a Capital Improvement Escrow Fund in accordance with §6-08(e)(2)(iii).

(11) For units to be owned by a not-for-profit organization, an agreement to fund a blocked reserve account, in an amount specified by this section and administered by the Department, or to create such a fund should the units owned by a for-profit organization be transferred to a not-for-profit in the future.

(12) An agreement to submit to the Department, within five days of their execution or issuance by another City agency:

(i) a construction contract for the creation of the lower income units between the applicant and the entity chosen to carry out the construction;

(ii) final approved plans by the Department of Buildings;

(iii) the altered building application and alteration permit for substantial rehabilitations and conversions or the new building permit for new construction;

(iv) a temporary certificate of occupancy for the entire residential portion of the building or the permanent certificate of occupancy.

(13) An agreement that changes or amendments made to any document included in this plan must obtain the prior approval of the Department.

(14) A filing fee in the amount of $100 for each proposed unit of affordable housing.

(15) A financial statement describing proposed sources and uses of all funds for the project, as approved by the Department.

(m) **Certification; negotiable certificates.** (1) After the Department determines that a request for Written Agreement is complete and satisfies all requirements of this section, the Department shall approve the request for a Written Agreement. The Written Agreement will provide for the granting of benefits of this Act for a specified number of dwelling units contained in a multiple dwelling located within the exclusion area. Such Written Agreement must be submitted to the Department with the application for benefits of the Act for the multiple dwelling located in the geographic exclusion area. In the event benefits of the Act are granted based upon a Written Agreement, failure to satisfy the conditions contained in such Written Agreement will result in a revocation of any benefits received by the multiple dwelling located in the exclusion area.

(2) Upon the submission to the Department of a permanent Certificate of Occupancy for, or the temporary Certificate of Occupancy for the entire residential portion of, the building containing the affordable units created pursuant to this section, the Department shall conduct a site inspection. Following that site inspection and upon satisfaction that all terms of the Written Agreement and of this section have been met, the Department shall issue the Negotiable Certificates representing the completion of the affordable units.

(3) Such Negotiable Certificate shall be required prior to the issuance of the Final Certificate of Eligibility for a multiple dwelling located within the geographic exclusion area pursuant to §6-05(e) of this chapter, unless at the sole option of the Department, pursuant to §6-05(d)(l)(vi) of this chapter, a Letter of Credit has been submitted to the Department.

(4) Such Negotiable Certificate shall provide that a specified number of dwelling units containing up to an average size of twelve hundred square feet to be constructed in the geographic exclusion area shall be eligible to receive benefits of the Act.

(5) In the event that the benefits of the Act are to be transferred to more than one building located within the geographic exclusion area, and at the written request of the applicant, the Negotiable Certificate shall be "drawn down"

by the amount required for each transfer, and a new Negotiable Certificate, endorsed by the applicant, shall be issued for each transfer. Application for the benefits of the Act must be accompanied by the original Negotiable Certificate and a copy of the Certificate of Completion.

(n) **Governmental assistance to affordable units.** (1) Affordable units created pursuant to §6-08(b) herein may not be the recipient of any other as-of-right or discretionary government benefit, consideration or assistance, excluding tax exempt financing, federal low income housing tax credits, and real estate tax benefits enumerated in paragraph (3) of this subdivision (n).

(2) Affordable units created to satisfy the low and moderate income housing requirements of any other governmental benefit, consideration or assistance except tax exempt financing, federal low income housing tax credits, and real estate tax benefits enumerated in paragraph (3) of this subdivision (n) shall not be considered as being created to satisfy the requirements of this section. Units created pursuant to §6-08(b)(i) herein shall not also qualify as affordable units under this section.

(3) In order to qualify a multiple dwelling located within the geographic exclusion area for benefits under the Act, affordable units created by rehabilitation or conversion must receive a Certificate of Eligibility for the benefits of §11-243 or 11-244 of the Administrative Code or §421-g of the Real Property Tax Law, and affordable units created by new construction must receive a Certificate of Eligibility for the benefits of the Act, unless such units obtain tax exemption pursuant to §420-a or 420-b of the Real Property Tax Law, §696 of the General Municipal Law, or §577 of the Private Housing Finance Law.

(4) Affordable units created pursuant to §6-08(b)(2) through §6-08(b)(5) of these rules may not be used, or have been used, to satisfy a requirement to create low or moderate income housing imposed by a federal, state, or local agency or instrumentality or pursuant to a court or administrative order or decree (unless such requirement is imposed solely as a condition to receiving bond financing or federal low income housing tax credits for the property containing the affordable units).

(5) Notwithstanding anything to the contrary contained in this subdivision, affordable units created to satisfy the requirements of the inclusionary housing program established pursuant to the New York City Zoning Resolution may be used to qualify a multiple dwelling in the geographic exclusion area for the benefits of the Act if at least twenty percent (20%) of the units contained in the multiple dwelling applying for such benefits are affordable to persons of low and moderate income as defined by this chapter.

(o) **Mortgage and debt limitations.** (1) In the case of a project which qualifies for tax benefits pursuant to §6-08(b)(1), any lien or mortgage encumbering one or more low and moderate income units in such project shall expressly provide that it is subject and subordinate to the Written Agreement imposing the restrictions required by this §6-08, commencing upon issuance of a Final Certificate of Eligibility for such tax benefits.

(2) Projects undertaken pursuant to either §6-08(b)(4)(i), §6-08(b)(4)(ii), or §6-08(b)(4)(iii) may be encumbered with a lien or mortgage, provided the amount of debt placed on the project permits rents for such units to comply with the provisions of §6-08(i) and such lien or mortgage expressly provides that it is subject and subordinate to the Written Agreement.

NOTE

1. Statement of Basis and Purpose in City Record Aug. 20, 1997:

The proposed rules: (1) enable conversions of existing, non-residential buildings, to meet the affordable housing requirements of §6-08 of such rules, (2) clarify existing provisions prohibiting affordable units constructed or rehabilitated in order to satisfy a requirement imposed by a governmental entity or court orer from meeting the

affordable housing requirements of §6-08 of such rules, and (3) include the recently-authorized §421-g (Lower Manhattan Residential Conversion Program) and §577 of the Private Finance Housing Law as two of the possible forms of real estate tax exemption for the affordable units created pursuant to §6-08 of such rules.

The rules are being proposed pursuant to City Charter §1802(6) and in order to comply with the City Administrative Procedure Act. Section 421-a(3) of the Real Property Tax Law authorizes HPD to issue rules for the program.

2. Statement of Basis and Purpose in City Record June 5, 2007: This rule amendment would clarify that affordable units created to satisfy the requirements of the Inclusionary Housing Program under the New York City Zoning Resolution would qualify a multiple dwelling in the Geographic Exclusion Area for extended benefits pursuant to Real Property Tax Law §421-a if at least 20% of the units are affordable to low and moderate income persons. In other words, the proposed rule amendment affirms that inclusionary housing units are carved out of the "double dipping" prohibition currently applicable to projects in the Geographic Exclusion Area.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 6-09

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-09 New Eligibility Requirements.

(a) **Definitions.** For purposes of this section 6-09, the following terms shall have the following meanings:

Affordability requirement. "Affordability requirement" shall mean that not less than twenty percent of the onsite units in such multiple dwelling are GEA 60% AMI units or GEA SGA units.

Applicable deadline. "Applicable deadline" shall mean, unless otherwise exempted pursuant to the Act, (a) with respect to a multiple dwelling within the geographic exclusion area, June 30, 2008, and (b) with respect to the limitations on benefits imposed pursuant to paragraph five of subdivision b of this section, December 27, 2007.

Commence. "Commence" shall mean:

(a)(1) the later to occur of (i) the date upon which a new metal or concrete structure to be incorporated into the multiple dwelling that shall perform a load bearing function for such multiple dwelling is installed; or (ii) the date upon which a building or alteration permit for the multiple dwelling (based upon architectural, plumbing and structural plans approved by the Department of Buildings) was issued by such department; or

(2) if a project includes new residential construction and the concurrent conversion, alteration or improvement of a pre-existing building or structure, the later to occur of (i) the date upon which the actual construction of the conversion, alteration or improvement of the pre-existing building or structure begins; or (ii) the date upon which an alteration permit for the multiple dwelling (based upon architectural, plumbing and structural plans approved by the Department

of Buildings) on which the actual construction of the conversion, alteration or improvement takes place, was issued by such department;

(b) provided, however, that (1) with respect to subparagraph (1) of paragraph (a), if piles or caissons are required, "commence" shall mean the later to occur of (i) the date upon which at least one fully driven pile or caisson is installed; or (ii) the date upon which a building or alteration permit for the multiple dwelling (based upon architectural, plumbing and structural plans approved by the Department of Buildings) was issued by such department; and

(2) with respect to both subparagraphs (1) and (2) of paragraph (a):

(i) such installation of a new metal or concrete structure or such beginning of the actual construction of the conversion, alteration or improvement of the pre-existing building or structure, respectively, and such issuance of a building or alteration permit, must both have occurred in order for the multiple dwelling to meet this definition of "commence"; and

(ii) for multibuilding projects, each multiple dwelling in such multibuilding project shall be deemed to "commence" (A) with respect to subparagraph (1) of paragraph (a), on the later to occur of (1) the date upon which a new metal or concrete structure to be incorporated into the first multiple dwelling in such multibuilding project that shall perform a load bearing function for such multiple dwelling is installed; or (2) the date upon which a building or alteration permit for the first multiple dwelling in such multibuilding project (based upon architectural, plumbing and structural plans approved by the Department of Buildings) was issued by such department, provided that all of the multiple dwellings in such multibuilding project have been issued by the Department of Buildings a building or alteration permit (based upon architectural, plumbing and structural plans approved by such department) on or before the applicable deadline, and the periods of construction and final real property tax exemption benefits granted pursuant to the Act shall commence simultaneously for all of the multiple dwellings in such multibuilding project; and (B) with respect to subparagraph (2) of paragraph (a), on the later to occur of (1) the date upon which the actual construction of the conversion, alteration or improvement of the first pre-existing building or structure in such multibuilding project begins; or (2) the date upon which an alteration permit for the first multiple dwelling in such multibuilding project (based upon architectural, plumbing and structural plans approved by the Department of Buildings) on which the actual construction of the conversion, alteration or improvement takes place, was issued by such department, provided that all of the multiple dwellings in such multibuilding project have been issued by the Department of Buildings a building or alteration permit (based upon architectural, plumbing and structural plans approved by such department) on or before the applicable deadline, and the periods of construction and final real property tax exemption benefits granted pursuant to the Act shall commence simultaneously for all of the multiple dwellings in such multibuilding project; and

(iii) if the architectural, plumbing and structural plans approved by the Department of Buildings in conjunction with the issuance of the first such building or alteration permit are thereafter amended to provide for more than a thirty-five percent (35%) increase (the "35% standard") in the floor area of such multiple dwelling as defined pursuant to the Act, the construction of such multiple dwelling shall be deemed to have commenced on the date upon which such amended plans are filed with such department, provided, however, that, in the case of a multibuilding project that meets the requirements of clause (ii) of this paragraph (2), any such increase in the floor area may be distributed amongst the multiple dwellings in such multibuilding project in any manner permitted under the Zoning Resolution and the 35% standard may be applied to such multibuilding project on an aggregate rather than a single building basis; and

(iv) the construction of any such multiple dwelling also must be completed without undue delay. For purposes of this definition of "commence", (A) if a project consists of one multiple dwelling and such multiple dwelling is completed within thirty-six (36) months from the later to occur of (1) the date of the installation of a new metal or concrete structure or of the beginning of the actual construction of the conversion, alteration or improvement of the pre-existing building or structure, respectively, (2) the date upon which a building or alteration permit for the multiple dwelling (based upon architectural, plumbing and structural plans approved by the Department of Buildings) was issued by such department, or (3) December 28, 2007, such multiple dwelling shall be deemed to have been completed without

undue delay, and (B) if a project meets the requirements of clause (ii) of this paragraph (2), if all of the multiple dwellings in such multibuilding project are completed within thirty-six (36) months from the later to occur of (1) the date of the installation of a new metal or concrete structure for the first multiple dwelling in such multibuilding project or of the beginning of the actual construction of the conversion, alteration or improvement of the first pre-existing building or structure in such multibuilding project, respectively, (2) the date upon which a building or alteration permit for the first multiple dwelling (based upon architectural, plumbing and structural plans approved by the Department of Buildings) was issued by such department, or (3) December 28, 2007, all of the multiple dwellings in such multibuilding project shall be deemed to have been completed without undue delay. Where construction is not completed within such thirty-six (36) month period and an architect or professional engineer has certified that such construction was completed without undue delay, the Department will not merely rely on such certification. In order to determine whether such construction was, in fact, completed without undue delay, the Department will consider the following factors: (i) the extraordinary size and/or complexity of the construction project; (ii) strikes or other unavoidable labor stoppages of substantial duration and severity; (iii) industry-wide shortages of construction materials of substantial duration and severity; (iv) substantial damage to completed construction work caused by fire or other casualty, (v) inability, despite diligent and continuous efforts, to obtain financing for the construction of such project, and (vi) mortgage foreclosure proceedings or other lien enforcement litigation by a lender with regard to such project. In each case, the Department will consider such factors and determine whether construction could reasonably have been completed in a materially shorter period of time.

(c) Where it is determined in accordance with this definition of "commence" that a multiple dwelling commenced construction on or after December 28, 2007 with respect to paragraph five of subdivision (b) of this section or July 1, 2008 with respect to paragraphs one, three or six of subdivision (b) of this section, respectively, this definition of "commence" shall supersede the definition of "commencement of construction" contained in §6-01 of this chapter.

Common charges or carrying charges. "Common charges or carrying charges" shall mean the estimated amounts contained in the offering plan accepted by the office of the Attorney General of the State of New York for filing.

Geographic exclusion area or GEA. "Geographic exclusion area" or "GEA" shall mean the boundaries for any geographic exclusion areas set forth in §421-a of the Real Property Tax Law and §11-245 of the Administrative Code that are effective on or after July 1, 2008.

GEA 60% limit. "GEA 60% limit" shall mean (A) for a multiple dwelling owned and operated as a rental, (1) incomes at the time of initial occupancy that do not exceed sixty percent of the area median incomes adjusted for family size, and (2) rents at the time of initial occupancy that do not exceed thirty percent of sixty percent of the area median incomes adjusted for family size, minus the amount of any applicable utility allowance, and (B) for a multiple dwelling owned and operated as a condominium or cooperative development by individual condominium unit owners or shareholders, (1) incomes at the time of initial occupancy that do not exceed sixty percent of the area median incomes adjusted for family size, and (2) sales prices at the time of initial sales that result in mortgage payments, including both principal and interest calculated at the prevailing rate and assuming that the mortgage constitutes 90% of the purchase price, and common charges or carrying charges, respectively, that collectively do not exceed thirty percent of sixty percent of the area median incomes adjusted for family size.

GEA SGA limit. "GEA SGA limit" shall mean (A) for a multiple dwelling owned and operated as a rental, (1) incomes at the time of initial occupancy that do not exceed one hundred twenty percent of the area median incomes adjusted for family size and, where such a multiple dwelling contains more than twenty-five units, incomes at the time of initial occupancy that do not exceed an average of ninety percent of the area median incomes adjusted for family size, and (2) rents at the time of initial occupancy that do not exceed thirty percent of one hundred twenty percent of the area median incomes adjusted for family size, minus the amount of any applicable utility allowance, and, where such a multiple dwelling contains more than twenty-five units, rents at the time of initial occupancy that do not exceed an average of thirty percent of ninety percent of the area median incomes adjusted for family size, minus the amount of any applicable utility allowance, or (B) for a multiple dwelling owned and operated as a condominium or cooperative

development by individual condominium unit owners or shareholders, (1) incomes at the time of initial occupancy that do not exceed one hundred twenty-five percent of the area median incomes adjusted for family size, and (2) sales prices at the time of initial sales that result in mortgage payments, including both principal and interest calculated at the prevailing rate and assuming that the mortgage constitutes 90% of the purchase price, and common charges or carrying charges, respectively, that collectively do not exceed thirty percent of one hundred twenty-five percent of the area median incomes adjusted for family size.

GEA 60% AMI unit. "GEA 60% AMI unit" shall mean (A) if a multiple dwelling is owned and operated as a rental, a unit that, upon its initial rental and upon all subsequent rentals of the unit after a vacancy, complies with the GEA 60% limit, or (B) if a multiple dwelling is owned and operated as a condominium or cooperative development by individual condominium unit owners or shareholders, a unit that, upon the initial sale of such unit, complies with the GEA 60% limit.

GEA SGA unit. "GEA SGA unit" shall mean (A) if a multiple dwelling is owned and operated as a rental, a unit that, upon its initial rental and upon all subsequent rentals of the unit after a vacancy, complies with the GEA SGA limit, or (B) if a multiple dwelling is owned and operated as a condominium or cooperative development by individual condominium unit owners or shareholders, a unit that, upon the initial sale of such unit, complies with the GEA SGA limit.

Multibuilding project. "Multibuilding project" shall mean a project that consists of more than one multiple dwelling where the multiple dwellings are contiguous and are under common ownership. For purposes of this definition of "multibuilding project", multiple dwellings shall be deemed to be (a) "contiguous" if such multiple dwellings are on tax lots that (1) are adjacent for at least ten linear feet, or, (2) but for the intervention of streets or street intersections, would be adjacent for at least ten linear feet and front the same street or intersection, and (b) "under common ownership" if at the date of commencement of construction, each of the multiple dwellings in such multibuilding project is owned and/or controlled directly or indirectly by the same individual or entity.

Onsite. "Onsite" shall mean situated within a building or buildings on the same zoning lot, or, if only a portion of such zoning lot is being granted benefits pursuant to the Act, situated within a building or buildings on such portion of such zoning lot; provided, however, that (1) each of the buildings on such zoning lot or portion thereof is part of the same application for benefits pursuant to the Act, (2) the periods of construction and final real property tax exemption benefits granted pursuant to the Act for all of the buildings on such zoning lot or portion thereof being granted benefits pursuant to the Act shall commence simultaneously, and (3) no final real property tax exemption benefits shall be granted pursuant to the Act for any of the buildings on such zoning lot or any portion thereof being granted benefits pursuant to the Act until receipt of a certificate of occupancy or a temporary certificate of occupancy for the residential portions of the building or buildings on such zoning lot containing the GEA 60% AMI units and/or the GEA SGA units.

Party in interest. "Party in interest" shall mean any person or entity holding an ownership, ground lease, mortgage, or other security interest, or holding any other interest which may be converted to such interest, in the real property containing the multiple dwelling receiving the benefits pursuant to the Act.

Prevailing rate. "Prevailing rate" shall mean the single family mortgage rate for a thirty-year fixed rate loan established by the Federal Home Loan Mortgage Association and the Federal National Mortgage Association that is either (1) for purposes of the application for a Preliminary Certificate of Eligibility, quoted for the month in which the construction of such multiple dwelling commences, or (2) for purposes of the application for a Final Certificate of Eligibility, quoted for the month in which the first certificate of occupancy or temporary certificate of occupancy for the first unit in such multiple dwelling that is owned and operated as a condominium or cooperative development by individual condominium unit owners or shareholders, is issued.

Utility allowance. "Utility allowance" shall mean an allowance set forth by the Department for the payment of utilities where the tenant of a GEA 60% AMI unit or a GEA SGA unit is required to pay all or a portion of the utility

costs with respect to such unit in addition to any payments of rent.

(b) **Multiple Dwellings Affected.** (1) Unless otherwise exempted pursuant to the Act, a multiple dwelling within the geographic exclusion area that commences construction on or after July 1, 2008 and which would otherwise be eligible for the benefits of the Act, is only eligible if:

(i) not less than twenty percent of the onsite units in such multiple dwelling are GEA 60% AMI units; or

(ii) the construction of such multiple dwelling is carried out with substantial governmental assistance provided pursuant to a program for the development of affordable housing and not less than twenty percent of the onsite units in such multiple dwelling are GEA SGA units; or

(iii) such multiple dwelling has purchased negotiable certificates in order to entitle it to the benefits of the Act for a specified number of units in the geographic exclusion area; provided, however, that such negotiable certificates were generated by a Written Agreement with the Department entered into prior to December 28, 2007 pursuant to §6-08(b)(4) of this chapter.

(2) For thirty-five years from the completion of construction, all GEA 60% AMI units and GEA SGA units in multiple dwellings must (i) if they are owned and operated as rentals, remain rent stabilized and allow tenants holding a lease and in occupancy at the expiration of such thirty-five year period to remain as rent stabilized tenants for the duration of their occupancy, (ii) comply with the affordability requirement, and (iii) upon the renewal of leases or at any time during the term of the lease, be rented to existing tenants for the lesser of (A) the rents permitted under the Rent Stabilization Law of 1969 and the Emergency Tenant Protection Act of 1974 and all regulations promulgated in connection thereto (collectively, "Rent Stabilization Laws"), or (B) 30% of the applicable income limit for such GEA 60% AMI unit or GEA SGA unit, respectively, minus the amount of any applicable utility allowance, provided, however, that no increase authorized pursuant to 28 RCNY §6-04(b) of this chapter and no exemption or exclusion from any requirement of the Rent Stabilization Laws, including, but not limited to, any exemption or exclusion from the rent limits, renewal lease requirements, registration requirements, or other provisions of the Rent Stabilization Laws due to (a) the vacancy of a unit where the rent exceeds a prescribed maximum amount, (b) the fact that tenant income and/or unit rent exceed prescribed maximum amounts, (c) the nature of the tenant, or (d) any other factor, may be applied to any such GEA 60% AMI unit or GEA SGA unit during such thirty-five year period. Furthermore, the lease for each such unit owned and operated as a rental and for the renewal thereof must contain a notice in at least twelve (12) point type stating the approximate date on which such thirty-five year period is expected to expire and informing such tenant that after such thirty-five year period, (i) the unit will no longer have to comply with the affordability requirement and (ii) if the tenant is holding a lease and in occupancy at the expiration of such thirty-five year period, such tenant shall have the right to remain as a rent stabilized tenant for the duration of such tenant's occupancy. The rent stabilization and lease rider requirements contained in §6-02(g) of this chapter shall continue to apply to the multiple dwellings owned and operated as a rental containing such GEA 60% AMI units or GEA SGA units to the extent that they do not conflict with this paragraph.

(3) Unless otherwise exempted pursuant to the Act, the owner of a multiple dwelling that is located within the geographic exclusion area and that commences construction on or after July 1, 2008:

(i) when filing an application for a Preliminary Certificate of Eligibility pursuant to §6-05(b) of this chapter, must submit (A) written certification that it meets the affordability requirement, or (B) if such multiple dwelling is qualifying for benefits pursuant to subparagraph (iii) of paragraph (2) of this subdivision, and subject to the provisions contained in §6-08(m)(1) of this chapter, submit either (a) a copy of a Written Agreement with the Department for the construction or substantial rehabilitation of housing units affordable to persons of low and moderate income on another site that meet the requirements of §6-08 of this chapter, or (b) the negotiable certificates issued pursuant to § 6-08 of this chapter, evidencing the bearer's entitlement to the benefits of the Act for the units for which the owner is seeking tax benefits.

(ii) when filing an application for a Final Certificate of Eligibility pursuant to §6-05(d) of this chapter for a multiple dwelling that contains GEA 60% AMI units or GEA SGA units, submit evidence satisfactory to the Office that a restrictive declaration in a form satisfactory to the Office (A) has been executed by all parties in interest, (B) has been recorded against the real property containing the multiple dwelling receiving benefits pursuant to the Act, and (C) provides that the GEA 60% AMI units or the GEA SGA units in such building must for thirty-five years from the completion of construction (1) comply with the affordability requirement, and (2) if such multiple dwelling is owned and operated as a rental, remain rent stabilized and allow tenants holding a lease and in occupancy at the expiration of such thirty-five year period to remain as rent stabilized tenants for the duration of their occupancy.

(iii) when filing an application for a Final Certificate of Eligibility pursuant to §6-05(d) of this chapter for a multiple dwelling that contains GEA 60% AMI units or GEA SGA units and unless the dwelling units in such multiple dwelling are marketed under the Department's monitoring, submit an affidavit from the owner containing such information as the Department may require to certify that such units will be marketed pursuant to a fair and open process in accordance with the Department's marketing guidelines, and that either (A) residents of the community board where the multiple dwelling for which benefits are being granted pursuant to the Act is located shall, upon initial occupancy, have priority for the purchase or rental of 50% of the GEA 60% AMI units or 50% of the GEA SGA units, respectively, or (B) such multiple dwelling does not have to comply with such community priority requirement because the community priority requirement is preempted by federal requirements that such owner has specified in such affidavit.

(iv) in addition to the record keeping requirements contained in §6-07 of this chapter, must retain all books, records and documents relating to the GEA 60% AMI units or GEA SGA units, including an annual schedule of rents for each such rental unit for thirty-five years from the completion of construction of such multiple dwelling, and a schedule of the initial sales prices for each such home ownership unit for six years from the completion of construction of such multiple dwelling, and make them available for inspection by the Department.

(4) In addition to the grounds for revocation provided pursuant to §6-07 of this chapter, the Commissioner of the Department of Finance or the Commissioner of the Department of Housing Preservation and Development may withdraw tax exemption granted to a building pursuant to the Act, retroactively or prospectively, upon its failure to comply with any of the provisions of this §6-09.

(5) Unless otherwise exempted pursuant to the Act, any multiple dwelling that commences construction on or after December 28, 2007 and which would otherwise be eligible for the benefits of the Act, is only eligible if: (i) such multiple dwelling contains at least four dwelling units as set forth in the certificate of occupancy, unless the construction of such multiple dwelling is carried out with substantial governmental assistance provided pursuant to a program for the development of affordable housing; and

(ii) if such new multiple dwelling is situated in (a) a Neighborhood Preservation Program Area as determined by the Department as of June 1, 1985, or (b) a Neighborhood Preservation Area as determined by the New York City Planning Commission as of June 1, 1985, or (c) an area that was eligible for mortgage insurance provided by the Rehabilitation Mortgage Insurance Corporation (REMIC) as of May 1, 1992, or (d) an area receiving funding for a neighborhood preservation project pursuant to the Neighborhood Reinvestment Corporation Act (42 U.S.C. Sections 8101 et seq.) as of June 1, 1985, such new multiple dwelling shall no longer be eligible for the benefits available pursuant to §421-a(2)(a)(iii) of the Act unless either (a) the construction is carried out with substantial governmental assistance provided pursuant to a program for the development of affordable housing, or (b) the Department has imposed a requirement or has certified that at least twenty percent of the onsite units in such multiple dwelling are affordable to and occupied by or affordable to and available for occupancy by individuals or families whose incomes at the time of initial occupancy do not exceed eighty percent of the area median incomes adjusted for family size, provided, however, that of such units, no more than a number equal to five percent of the number of units which commenced construction in buildings receiving tax benefits pursuant to the Act in the previous calendar year shall be affordable to and occupied by or affordable to and available for occupancy by individuals or families whose incomes at

the time of initial occupancy are between sixty percent and eighty percent of the area median incomes adjusted for family size.

(6) Unless otherwise exempted pursuant to the Act, any multiple dwelling that commences construction on or after July 1, 2008 and which would otherwise be eligible for benefits pursuant to the Act, shall be subject to the provisions of subdivision 9 of the Act imposing an exemption cap on such multiple dwelling.

(7) Eligible multiple dwellings that meet the requirements of paragraphs (1) or (5) (ii) of this subdivision (b) may receive a ten, fifteen, twenty or twenty-five year tax exemption, as described herein. In order to qualify for such benefits, the multiple dwelling must meet the eligibility requirements described below for each level of exemption.

(i) Only the ten year exemption is available to multiple dwellings located in Manhattan on tax lots now existing or hereafter created south of or adjacent to either side of 110th street if such multiple dwelling meets the requirements of subparagraph (iii) of paragraph (1) of this subdivision (b).

(ii) Only the fifteen year exemption is available to multiple dwellings located in the boroughs of the Bronx, Brooklyn, Queens, Staten Island and in Manhattan north of 110th Street if such multiple dwelling meets the requirements of subparagraph (iii) of paragraph (1) of this subdivision (b).

(iii) The twenty year exemption is available in the borough of Manhattan for buildings on tax lots now existing or hereafter created south of or adjacent to either side of one hundred tenth street only if such multiple dwelling meets the requirements of subparagraph (i) or (ii) of paragraph (1) of this subdivision (b) or the requirements of subparagraph (ii) of paragraph (5) of this subdivision (b).

(iv) The twenty-five year exemption is available to multiple dwellings located in the boroughs of the Bronx, Brooklyn, Queens, Staten Island or Manhattan north of 110th Street only if such multiple dwelling meets the requirements of subparagraph (i) or (ii) of paragraph (1) of this subdivision (b) or the requirements of subparagraph (ii) of paragraph (5) of this subdivision (b).

NOTE

1. Statement of Basis and Purpose in City Record May 20, 2008:

These rule amendments provide regulatory guidance for the new affordability requirements for the expanded Geographic Exclusion Area and some of the new limitations on eligibility for benefits pursuant to Real Property Tax Law §421-a throughout the City of New York as enacted by Local Law 58 of 2006, Chapters 618, 619 and 620 of the Laws of 2007, and Chapter 15 of the Laws of 2008 (hereinafter "State Amendments").

Local Law 58 of 2006 eliminates as-of-right 25 year 421-a benefits for projects located in NPP/REMIC areas and

now provides that projects located in these areas will only get 25 years of benefits if they meet on-site affordability requirements or receive substantial governmental assistance pursuant to an affordable housing program. It also eliminates 421-a benefits for three-unit buildings unless they are constructed with substantial governmental assistance pursuant to an affordable housing program. Finally, Local Law 58 expands the boundaries of the Geographic Exclusion Area and eliminates the negotiable certificate program. Now, affordable units must be provided onsite in order for projects in the Geographic Exclusion Area to be eligible to receive 421-a real property tax exemption benefits. In order to ascertain which projects are subject to the new requirements, Local Law 58 refines the definition of "commencement of construction" and now requires not only an architect or professional engineer's certification that excavation and construction of initial footings and foundations has commenced in good faith after the issuance of a building or alteration permit based upon architectural, plumbing and structural plans, but also an architect or professional engineer's certification that such construction has been completed without undue delay.

The State Amendments, among other things, further expand the boundaries of the Geographic Exclusion Area. They also mandate specified income limits for buildings to qualify for benefits within the expanded Geographic Exclusion Area. If no substantial governmental assistance is utilized, at least 20% of the units must at initial rental or sale and at all subsequent rentals upon vacancy be affordable to individuals or families whose incomes are at or below 60% of area median income. If construction is carried out with substantial governmental assistance provided pursuant to a program for the development of affordable housing, at least 20% of the units must meet one of the following requirements: (a) initial and subsequent rentals in buildings with 25 units or less must be affordable to individuals or families whose incomes are at or below 120% of area median income, (b) initial and subsequent rentals in buildings with more than 25 units must be affordable to individuals or families whose incomes are at or below 120% of area median income and cannot exceed an average of 90% of area median income, or (c) homeownership units at initial sale must be affordable to individuals or families whose incomes are at or below 125% of area median income.

The State Amendments impose a requirement that residents of the community board in which the building receiving 421-a benefits is located be given priority for the purchase or rental of 50% of the affordable units. They also require the affordable units in the Geographic Exclusion Area to meet one of the following requirements unless they are otherwise preempted by federal requirements: (a) have a comparable number of bedrooms as market rate units and a unit mix proportional to market rate units, (b) at least 50% of the affordable units must have two or more bedrooms and no more than 50% of the remaining units can be smaller than one bedroom, or (c) the floor area of affordable units must be no less than 20% of the total floor area of all dwelling units. Furthermore, affordable rental units in the Geographic Exclusion Area must now be kept affordable and rent stabilized for 35 years, and after such 35 year period, tenants with leases may remain as rent stabilized tenants for the duration of their occupancy.

The State Amendments require buildings receiving 421-a benefits to pay their building service employees prevailing wages unless they contain less than 50 dwelling units or at least 50% of their units are affordable to persons at or below 125% of area median income and, where rental units, will remain affordable throughout the 421-a benefit period. They also impose an exemption cap on 421-a benefits for those buildings not entitled to extended 421-a benefits or that are not otherwise exempt.

The rule amendments address these aspects of Local Law 58 and the State Amendments in a new §6-09 and leave intact those provisions that remain applicable Citywide and in the preexisting Geographic Exclusion Area. In order to ensure that the mandated affordability requirements are met, they additionally stipulate the authorized rents to be charged at initial and subsequent occupancy of rental units and the initial sales prices of homeownership units. They also impose a Citywide requirement that substantial governmental assistance be pursuant to a program for the development of affordable housing and provide further definition of what constitutes an affordable housing program. Finally, they articulate which boundaries of the Geographic Exclusion Area are applicable at designated time periods prior to July 1, 2008, after which the boundaries will be statutorily defined, and conform the unit and bedroom mix requirements in the existing Geographic Exclusion Area to those that will apply elsewhere in the expanded Geographic Exclusion Area pursuant to the State Amendments.

2. Statement of Basis and Purpose in City Record June 12, 2009: These rule amendments address the current crisis in the financial markets by authorizing the Department, when it is determining whether a project has been completed without undue delay, to consider certain financial difficulties such as mortgage foreclosure or the inability to obtain the necessary financing to complete a project.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 6 TAX EXEMPTION PURSUANT TO §421-A OF THE REAL PROPERTY TAX LAW AND §11-245 OF THE ADMINISTRATIVE CODE OF THE CITY OF NEW YORK

§6-10 Applicability of Certain Provisions.

Except as otherwise specifically provided therein, the amendments to this chapter six that became effective on June 19, 2008, shall only apply to multiple dwellings that commence construction on or after July 1, 2008. For purposes of determining when any such multiple dwelling has commenced construction, the definition of "commence" in such amendments shall apply and, where it is determined that such multiple dwelling commenced construction on or after July 1, 2008, the definition of "commence" in such amendments shall supersede the definition of "commencement of construction" contained in §6-01 of this chapter.

HISTORICAL NOTE

Section added City Record Apr. 23, 2009 §4, eff. May 23, 2009. [See Note 1]

NOTE

1. Statement of Basis and Purpose in City Record Apr. 23, 2009:

These proposed rule amendments provide that the new construction requirements for affordable units created in accordance with 28 RCNY §6-08(b)(1) adopted by amendments that took effect on June 19, 2008 ("June 19 Amendments") apply to multiple dwellings that commence construction on or after December 28, 2007. They also clarify the title of §6-09, also added by the June 19th Amendments, because such amendments also relate to certain changes to the 421-a requirements pursuant to Local Law 58 of 2006, which took effect on December 28, 2007. The

proposed rule amendments revise the definition of "commence" in the June 19th Amendments by adding a provision that specifies that, under certain circumstances, such definition supersedes the definition of "commencement of construction" in §6-01 of the 421-a rules. Finally, the proposed rule amendments add a new applicability provision to Chapter 6 that relates specifically to the June 19 Amendments. Unless the June 19 Amendments specifically provide otherwise, they will only be applicble to multiple dwellings that commence construction on or after July 1, 2008 and the definition of "commence" in such amendments would then supersede the definition of "commencement of construction" in §6-01 of the 421-a rules."

On July 1, 2008, many major revisions to the Real Property Tax Law §421-a tax exemption program took effect. The new applicability provision would accomplish a more judicious implementation of the new requirements for benefits.

28 RCNY 6 - APPENDIX A

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

APPENDIX A ANNUAL SCHEDULE OF REASONABLE COSTS

APPENDIX A ANNUAL SCHEDULE OF REASONABLE COSTS

(a) **Construction costs.** The construction cost component of the Total Project Cost, excluding land acquisition costs, site preparation costs, and off-site costs, shall be determined by the use of the latest available Calculator Valuation Guide, published by Calculator Inc., or a comparable publication designated by the Office. Applicants whose construction costs include unique and special costs and are therefore at variance with the Calculator Valuation Guide will be required to produce detailed documentation establishing these costs. Except in cases where such unique costs are approved, the Construction Costs Allowance will be limited to the maximum established by the Calculator Valuation Guide, minus the Builder's Fee.

(b) **Off-site and other costs.** In recognition of the fact that off-site costs, including but not limited to legal, engineering, and architectural fees, insurance, interest and taxes during construction, and title and mortgage fees, may vary greatly with the size of a project, these costs as well as such other amounts as are ordinarily incurred in connection with the construction, conversion or rehabilitation of a multiple dwelling, will be reviewed and analyzed independently with respect to each building.

(c) **Operating and maintenance schedule.** (1) **Real estate taxes.** Projected real estate taxes shall equal the actual assessed value of the property in the tax year prior to the start of construction multiplied by the projected tax rate for the tax year in which completion is expected. The projected tax rate shall be determined by increasing the current tax rate at the time the application is received by 5 percent for each year between such current year and the projected year of completion.

(2) **Replacement reserve.** The replacement reserve shall equal six-tenths of 1 percent of construction costs

approved pursuant to item (a) of the Annual Schedule of Reasonable Costs.

(3) **Other operating and maintenance expense maximum allowances.** The schedule of maximum allowances listed below shall apply except when the schedule amounts for each commodity shall be increased or decreased on a compounded annual basis for each year between publication of these rules and the year of projected project completion based upon the Price Indices of Operating Costs (PIOC) percentages published annually by the Rent Guidelines Board for each commodity. For the purposes of projecting future allowances in years for which the PIOC is not available, the Office will apply the percentage for the most recent year for which the Index is available for each subsequent year prior to the estimated completion date. The office will allow the lesser of the owner's claimed costs and the maximum allowance listed below for each commodity.

[See tabular material in printed version]

1. Categories are defined as specified by the Price Index of Operating Costs published by the Rent Guidelines Board.

2. To qualify for a Labor allowance, applicants must submit a list of all personnel to be employed in the maintenance and operation of each building along with corresponding projected wage and salary data. Projects with five units or less are not eligible for the Labor allowance.

3. Available only when the owner pays apartment gas bills.

4. Does not include electricity within apartments.

(d) **Vacancy reserve and management and administration fee.** The vacancy reserve allowance and the management and administration fee shall together be equal to 9 percent of the sum of the expenses determined pursuant to §§6-04(a)(1)(i), (iii), and (iv) of this Chapter less the amount determined pursuant to §6-04(a)(1)(v) of this Chapter.

(e) **Room calculation.** For purposes of this Appendix A's schedule of maximum allowances, the number of rooms shall be calculated in accordance with the definition of "room count" contained in subdivision (c) of §6-01 of this chapter.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 7 PARTIAL TAX EXEMPTION FOR PRIVATE DWELLINGS PURSUANT TO §421-B OF THE REAL PROPERTY TAX LAW

§7-01 Definitions.

The following terms shall have the following meaning:

Act. "Act" means §421-b of the Real Property Tax Law as amended.

Commencement of new construction. "Commencement of new construction" means the date upon which the foundation is started in good faith as certified in an affidavit by a licensed architect or professional engineer after the issuance of a new building permit by the Department of Buildings based upon plans approved by the Department of Buildings.

Commencement of reconstruction. "Commencement of reconstruction" means the date upon which work begins in good faith after the filing of a building notice with the Department of Buildings or the issuance of an alteration permit where required.

Commissioner. "Commissioner" means the Commissioner of the Department of Housing Preservation and Development of the City of New York or the chief executive officer of a successor thereto authorized to administer this chapter, or such representative of said Department as shall have been duly designated by the Commissioner to act on his behalf.

Completion of new construction. "Completion of new construction" means the date a Certificate of Occupancy is issued by the Department of Buildings for lawful residential use.

Completion of reconstruction. "Completion of reconstruction" means the date all work necessary to complete reconstruction is completed. Such completion may be confirmed by:

(1) Issuance or reissuance of a Certificate of Occupancy; or

(2) Issuance of a Letter of Completion by the Department of Buildings; or

(3) Issuance of a Certificate of Completion or Compliance or other evidence of completion by a City agency other than the Department of Buildings; or

(4) If none of the above is required by law, an affidavit by a registered architect, licensed professional engineer or attorney certifying to the date of completion or an affidavit by the applicant if the cost of work is less than five thousand ($5,000) dollars.

Department. "Department" means the Department of Housing Preservation and Development of the City of New York.

Office. "Office" means the Office of Development of the Department of Housing Preservation and Development of the City of New York or any successor thereto authorized to administer this chapter.

Prior assessed valuation. "Prior assessed valuation" means the total assessed value of a tax lot (land and improvements) during the tax year immediately preceding the tax year of Commencement of New Construction or Commencement of Reconstruction.

Private dwelling. "Private dwelling" means a building or structure, including the land upon which it is situated, which is designed and occupied exclusively for residence purposes by not more than two families living independently of each other with separate cooking facilities.

Reconstruction. "Reconstruction" means reconstruction, alteration or improvement of a Private Dwelling if the actual cost thereof is not less than forty (40%) percent of Prior Assessed Valuation.

§7-03 Amount and Duration of Tax Exemption.

(a) **Taxes on prior assessed valuation not subject to exemption.** Taxes on prior assessed valuation are not eligible for exemption under the Act. The prior assessed valuation is subject to taxes at the tax rate in effect from time-to-time.

(b) **Exemption during construction or reconstruction.** (1) Eligible projects which have received a Preliminary Certificate of Eligibility shall be exempt from taxes (other than assessments for local improvements) upon any increase in assessed valuation over the prior assessed valuation for the period specified in paragraph (2) of this §7-03(b).

(2) The period of exemption shall commence upon the first day of the tax year immediately following the taxable status date (January 25th) after the commencement of construction or reconstruction and shall extend for two years after commencement of construction or reconstruction, unless construction or reconstruction is completed in less than two years in which case the period of exemption will terminate on the first day of the first tax year following completion of construction or reconstruction.

(c) **Exemption after construction or reconstruction.** Following the period specified in paragraph (2) of §7-03(b), an increase in assessed valuation over the prior assessed valuation of eligible projects which have received a Final Certificate of Eligibility shall be exempt from taxes (other than assessments for local improvements) for eight consecutive tax years pursuant to the following schedule:

CHAPTER 7 PARTIAL TAX EXEMPTION FOR PRIVATE DWELLINGS PURSUANT TO §421-B OF THE REAL PROPERTY TAX LAW

§7-04 Revocation of Tax Exemption.

(a) **False or misleading application.** If the applicant has furnished information which is incorrect or misleading in any substantial respect or which fails to comply with these regulations and if the breach or omission has not been cured within ninety (90) days, or such lesser time as may be designated by the Office, after notice has been given to the applicant and any subsequent owner or mortgagee of the private dwelling registered with the Office, the Office shall revoke a Preliminary or Final Certificate of Eligibility.

(b) **Failure to complete within required time.** If the applicant fails to complete construction or reconstruction within the time provided in paragraph (2) of §7-03(b), the Office shall revoke a Preliminary Certificate of Eligibility.

(c) **Non-conforming use.** If the Office determines that a private dwelling is not being used for residential purposes at any time after two years of tax exemption received pursuant to these regulations, the Office shall revoke a Preliminary or Final Certificate of Eligibility.

(d) **Procedure upon revocation.** The Office shall advise the Department of Finance that a Preliminary or Final Certificate of Eligibility has been revoked. The Department of Finance shall prospectively withdraw tax exemption granted to an eligible project unless revocation occurred pursuant to §7-04(a) in which case the Department of Finance shall reinstate the amount of taxes which have been exempted, together with interest, at the rate of fifteen (15%) percent per annum to be calculated from the day on which such taxes would have been payable but for the exemption.

(e) **Criminal penalties.** In addition to revocation of tax exemption, applicants who submit applications which

contain false statements or false information may be subject to criminal penalties as provided in Article 175 of the Penal Law.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 7 PARTIAL TAX EXEMPTION FOR PRIVATE DWELLINGS PURSUANT TO §421-B OF THE REAL PROPERTY TAX LAW

§7-05 Application Procedure.

(a) **General requirements.** All applicants must file an application for a Final Certificate of Eligibility. An application for a Preliminary Certificate of Eligibility must also be filed if tax exemption during new construction or reconstruction is requested. Applicants who do not file an application for a Preliminary Certificate of Eligibility shall be required to furnish the information required in an application for a Preliminary Certificate of Eligibility and pay the Preliminary Certificate of Eligibility filing fee at the time they submit their application for a Final Certificate of Eligibility. All applications must be filed with the Director of Tax Incentive Programs, 100 Gold Street, New York, N.Y. 10038 between March 16 and January 31. The Office will not accept applications between February 1 and March 15.

(b) **New construction: Preliminary Certificate of Eligibility.** An application for a Preliminary Certificate of Eligibility shall be filed within ninety (90) days of commencement of new construction and prior to the issuance of a Temporary Certificate of Occupancy or a Certificate of Occupancy. The application shall include:

(1) A non-refundable filing fee in the amount of one hundred twenty-five ($125) dollars for each newly constructed private dwelling.

(2) Applicant's affidavit in the form required by the Department which shall certify that plans have been submitted to and approved by the Department of Buildings.

(3) Proof to the satisfaction of the Office of the Eligible Project's Prior Assessed Valuation.

(4) An affidavit by a licensed architect or professional engineer as to the date of commencement of new construction.

(c) **Reconstruction: Preliminary Certificate of Eligibility.** An application for a Preliminary Certificate of Eligibility shall be filed within ninety (90) days of the date of Commencement of Reconstruction. The application shall include:

(1) A non-refundable filing fee in the amount of ten ($10) dollars for each reconstructed private dwelling.

(2) Applicant's certification as to the date of commencement of reconstruction and that the cost of reconstruction will be not less than forty (40%) percent of the prior assessed valuation.

(3) Applicant's certification of the cost or estimated cost of reconstruction and prior assessed valuation.

(d) **New construction: Final Certificate of Eligibility.** An application for a Final Certificate of Eligibility shall be filed within ninety (90) days of issuance of a Certificate of Occupancy. The application shall include:

(1) A copy of the building permit.

(2) A copy of the Certificate of Occupancy.

(e) **Reconstruction:Final Certificate of Eligibility.** An application for a Final Certificate of Eligibility shall be filed within ninety (90) days of completion of reconstruction. The application shall include:

(1) Confirmation of completion of reconstruction.

(2) Proof to the satisfaction of the Office that the actual cost of reconstruction is not less than forty (40%) percent of the prior assessed valuation which shall include but not be limited to: copies of paid bills, cancelled checks and work contracts.

(3) Copy of building permit or alteration permit where required.

(f) **Filing with the Department of Finance.** Upon receipt of the application for a Preliminary or Final Certificate of Eligibility, and upon the Office's determination that a private dwelling is entitled to tax exemption pursuant to the Act, the Office shall issue a Preliminary or Final Certificate of Eligibility. Applicants shall file with the Preliminary Certificate of Eligibility and the Final Certificate of Eligibility with the appropriate Borough officer of the Real Property Assessment Bureau of the Department of Finance on the next following February 1 through March 15 filing period, together with an application to said Department for tax exemption.

(g) All applicants for a Preliminary or Final Certificate of Eligibility must, in addition to the timely filing of an application, provide all of the required documentation for such application on or before December 31, 2010.

(h) Notwithstanding anything to the contrary contained in this section, the Department may waive the filing deadlines for an application for a Final Certificate of Eligibility set forth in §§7-05(d) and 7-05(e) of this chapter if (1) the Department, in its sole discretion, determines that the owner of such private dwelling reasonably relied upon a representation by the seller of such private dwelling that the seller would file or had filed the application for the Final Certificate of Eligibility, and (2) the owner of such private dwelling provides all of the required documentation for such application on or before December 31, 2010.

NOTE

1. Statement of Basis and Purpose in City Record Sept. 22, 2006:

HPD's rules require applications for Final Certificates of Eligibility for 421-b tax benefits to be filed within 90 days of issuance of a Certificate of Occupancy for a new private dwelling. The rule amendment allows HPD to waive the filing deadline for such applications in certain instances in order to ensure that homeowners who purchase private dwellings with the reasonable expectation that their new homes will be eligible for 421-b benefits are not penalized due to the seller's misrepresentations regarding the filing of a 421-b application. The rule amendments also provide that all of the required documentation for any application for a Preliminary or Final Certificate of Eligibility must be filed on or before December 31, 2008.

2. Statement of Basis and Purpose in City Record Sept. 5, 2008: The RPTL §421-b tax incentive program currently applies to residences which commence construction before July 1, 2006. The program was not extended by the Legislature, so its application has ceased with the exception of unfinished units, which were previously required to obtain a certificate of occupancy by July 1, 2008. However, the State Legislature recently extended the deadline for completion of projects eligible for RPTL §421-b benefits from July 1, 2008 to July 1, 2009. The reason for this extension was that the downturn in the housing market coupled with the difficulty involved in obtaining construction financing had prevented some builders from completing projects which were commenced in compliance with the RPTL §421-b program. In 2006, HPD adopted rule amendments that allowed it to waive the filing deadline for RPTL §421-b applications in certain instances in order to ensure that homeowners who purchase private dwellings with the reasonable expectation that their new homes will be eligible for 421-b benefits are not penalized due to the seller's misrepresentations regarding the filing of a 421-b application. The 2006 rule amendments also provided that all of the required documentation for any application for a Preliminary or Final Certificate of Eligibility must be filed on or before December 31, 2008. Due to the above-mentioned completion extension, HPD is now extending the deadline for filing required documentation for such tax exemption benefits from December 31, 2008 to December 31, 2009.

3. Statement of Basis and Purpose in City Record Sept. 18, 2009: The RPTL §421-b tax incentive program currently applies to residences which commence construction before July 1, 2006. The program was not extended by the Legislature, so its application has ceased with the exception of unfinished units, which were previously required to obtain a certificate of occupancy by July 1, 2009. However, the State Legislature recently extended the deadline for completion of projects eligible for RPTL §421-b benefits from July 1, 2009 to July 1, 2010. The reason for this extension was that the downturn in the housing market coupled with the difficulty involved in obtaining construction financing had prevented some builders from completing projects which were commenced in compliance with the RPTL §421-b program. In 2006, HPD adopted rule amendments that allowed it to waive the filing deadline for RPTL §421-b applications in certain instances in order to ensure that homeowners who purchase private dwellings with the reasonable expectation that their new homes will be eligible for 421-b benefits are not penalized due to the seller's misrepresentations regarding the filing of a 421-b application. The 2006 rule amendments also provided that all of the required documentation for any application for a Preliminary or Final Certificate of Eligibility must be filed on or before December 31, 2008. The State Legislature previously extended the completion deadline to July 1, 2009 and HPD

amended its rules accordingly to extend to deadline for submission of documentation to December 31, 2009. Due to the above-mentioned additional completion extension, HPD is now extending the deadline for filing required documentation for such tax exemption benefits from December 31, 2009 to December 31, 2010.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 8-01

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 8*1 TAX LIEN SALES AND IN REM FORECLOSURE AFFECTING DISTRESSED PROPERTIES AND CERTAIN OTHER PROPERTIES

§8-01 Scope; Definitions.

Administrative Code §§11-301 et seq. and Administrative Code §§11-401 et seq. establish a procedure for sale of tax liens and a procedure for the Commissioner of Finance to deliver a deed conveying a tax delinquent property to a qualified Third Party after final judgment is rendered in an in rem foreclosure action. These rules clarify the circumstances under which certain property may be removed from tax lien sales and how Third Parties may be qualified and selected to acquire property from the Commissioner of Finance pursuant to a judgment rendered in an in rem foreclosure action.

Affiliate. "Affiliate" shall mean (a) any Person that has, directly or indirectly, a five percent (5%) or greater ownership interest in a Third Party, or any Person in which a Third Party, any partner or shareholder of a Third Party, or any partner or shareholder of any Person that is a partner or shareholder of a Third Party, has a five percent (5%) or greater ownership interest, and (b) any individual who is a member of the immediate family (whether by birth or marriage) of an individual who is an Affiliate, which includes for purposes of this definition a spouse, a domestic partner as defined in City Charter §1150(13), a brother or sister of the whole or half blood (including an individual related by or through legal adoption) of such individual or his/her spouse or domestic partner, a lineal descendant or ancestor (including an individual related by or through legal adoption) of any of the foregoing, or a trust for the benefit of any of the foregoing. Ownership of or by a Third Party referred to in this definition includes beneficial ownership effected by ownership of intermediate entities.

Distressed Property. "Distressed Property" shall mean any parcel of class one or class two real property that is subject to a tax lien or liens with a lien or liens to value ratio, as determined by the Commissioner of Finance, equal to

or greater than fifteen percent and that meets one of the following two criteria:

(a) such parcel has an average of five or more hazardous or immediately hazardous violations of record of the Housing Maintenance Code per dwelling unit; or

(b) such parcel is subject to a lien or liens for any expenses incurred by HPD for the repair or the elimination of any dangerous or unlawful conditions therein, pursuant to Administrative Code §27-2144, in an amount equal to or greater than one thousand dollars.

HPD. "HPD" shall mean the Department of Housing Preservation and Development.

Neighborhood Preservation Consultant. "Neighborhood Preservation Consultant" shall mean an organization under contract with HPD to undertake activities in connection with the Third Party Transfer Process within a particular area.

Not-for-profit Qualified Developer. "Not-for-profit Qualified Developer" shall mean a not-for-profit entity that has been found eligible by HPD to participate in the Third Party Transfer Process.

Person. "Person" shall mean any natural person, business entity, trust or estate, or any federal, state, county or municipal government or any bureau, department or agency thereof; and any fiduciary acting in such capacity on behalf of any of the foregoing.

Regulatory Agreement. "Regulatory Agreement" shall mean an agreement between HPD and a Third Party selected for conveyance of property pursuant to the Third Party Transfer Process that restricts or conditions the use of such property.

Rules. "Rules" shall mean these Rules.

Tenants. "Tenants" shall mean legal residential Tenants of a property that is subject to the Third Party Transfer Process. Squatters and other unlawful occupants are not Tenants.

Third Party. "Third Party" shall mean an entity or individual that may be deemed qualified and selected by the Commissioner of HPD as eligible to acquire a property pursuant to the Third Party Transfer Process.

Third Party Transfer Process. "Third Party Transfer Process" shall mean the process under which certain properties are transferred to Third Parties pursuant to Administrative Code §§11-401 et seq. and these Rules.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 8*1 TAX LIEN SALES AND IN REM FORECLOSURE AFFECTING DISTRESSED PROPERTIES AND CERTAIN OTHER PROPERTIES

§8-02 Procedures for Distressed Property.

(a) The Commissioner of Finance shall, not less than sixty days preceding the date of the sale of a tax lien or tax liens, submit to the Commissioner of HPD a description by block and lot, or by such other identification as the Commissioner of Finance may deem appropriate, of any parcel of class one or class two real property on which there is a tax lien that may be sold by the City. The Commissioner of HPD shall determine, and advise the Commissioner of Finance, not less than ten days preceding the date of the sale of a tax lien or tax liens, whether any such parcel is a Distressed Property as defined in §8-01 of these Rules. Any tax lien on a parcel so determined to be a Distressed Property shall not be included in such sale.

In connection with a subsequent sale of a tax lien or tax liens, the Commissioner of Finance may, not less than sixty days preceding the date of the sale, resubmit to the Commissioner of HPD a description by block and lot, or by such other identification as the Commissioner of Finance may deem appropriate, of any parcel of class one or class two real property that was previously determined to be a Distressed Property pursuant to these Rules and on which there is a tax lien that may be included in such sale. The Commissioner of HPD shall determine, and advise the Commissioner of Finance, not less than ten days preceding the date of the sale, whether such parcel remains a Distressed Property. If the Commissioner of HPD determines that the parcel is not a Distressed Property, then the tax lien on the parcel may be included in such sale.

(b) The Commissioner of HPD may periodically review whether a parcel of class one or class two real property remains a Distressed Property. If the Commissioner determines that the parcel is not a Distressed Property as defined in these Rules, then the tax lien on the parcel may be included in a tax lien sale.

(c) The Commissioner of HPD may recommend to the Commissioner of Finance that a tax lien on a parcel of property other than a Distressed Property should not be included in a tax lien sale. The Commissioner of Finance, may, in his or her sole discretion, exclude such tax lien on such parcel from a tax lien sale, in accordance with the recommendation of the Commissioner of HPD.

28 RCNY 8-03

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 8*1 TAX LIEN SALES AND IN REM FORECLOSURE AFFECTING DISTRESSED PROPERTIES AND CERTAIN OTHER PROPERTIES

§8-03 Qualification and Selection of a Third Party.

(a) In an in rem foreclosure action, the court shall make a final judgment authorizing the award of possession of any parcel of class one or class two real property described in the list of delinquent taxes not redeemed or withdrawn from the in rem foreclosure action as provided in Chapter 4 of Title 11 of the Administrative Code and as to which no answer is interposed as provided in such chapter, and authorizing the Commissioner of Finance to prepare, execute and cause to be recorded a deed conveying full and complete title to such property either to the City or to a Third Party deemed qualified and selected by the Commissioner of HPD.

(b) Such Third Party shall be deemed qualified and shall be selected pursuant to such criteria as are established in these Rules. The Commissioner of HPD shall not deem qualified any Third Party who has been finally adjudicated by a court of competent jurisdiction, within seven years of the date on which such Third Party would otherwise be deemed qualified, to have violated any section of articles one hundred fifty (relating to arson), one hundred seventy-five (relating to offenses involving false written statements), one hundred seventy-six (relating to insurance fraud), one hundred eighty (relating to bribery not involving public servants, and related offenses), one hundred eighty-five (relating to fraud on creditors) or two hundred (relating to bribery involving public servants and related offenses) of the Penal Law or any similar laws of another jurisdiction, or who has been suspended or debarred from contracting with the City or any agency of the City pursuant to §335 of the Charter, during the period of such suspension or debarment.

(c) Other bases for disqualification of a Third Party may include, but shall not be limited to, any of the following:

(1) Record of Housing Maintenance Code violations, including, but not limited to class B and class C violations,

legal proceedings to enforce the Housing Maintenance Code including, but not limited to, litigation by HPD's Housing Litigation Bureau, or Emergency Repair Program charges with respect to any real property owned or managed by a Third Party or such Third Party's spouse or domestic partner, as defined in City Charter §1150(13), or by any Affiliate of such Third Party or of such Third Party's spouse or domestic partner;

(2) Arrears on taxes, water and sewer charges, or other governmental charges or tax, mortgage, or lien foreclosure or enforcement proceedings with respect to any real property owned by a Third Party or such Third Party's spouse or domestic partner, as defined in City Charter §1150(13), or by any Affiliate of such Third Party or of such Third Party's spouse or domestic partner;

(3) Arrears or defaults on other governmental obligations;

(4) Default or poor performance on a government contract;

(5) Re-designation or termination of negotiations after selection for a government project or contract;

(6) Non-responsibility determination by a government agency;

(7) Conviction or pending charges of fraud, bribery, grand larceny, any other felony, arson, or tenant harassment;

(8) Any other similar facts which demonstrate to HPD that a Third Party is not qualified for selection.

(d) HPD may select a Third Party for conveyance of a property pursuant to the Third Party Transfer Process by any method which it determines will best meet the purposes of such process, including, without limitation, selection:

(1) by a request for qualifications process;

(2) by a request for proposals process;

(3) from a pre-qualified list;

(4) by a request for offer process; or

(5) by a direct selection of an entity judged by HPD to be qualified.

(e) In selecting a Third Party, HPD shall consider:

(1) residential management experience;

(2) financial capacity;

(3) rehabilitation experience;

(4) ability to work with government and community organizations;

(5) neighborhood ties;

(6) ability to finance or obtain financing for the required rehabilitation; (7) whether the Third party is a not for profit organization or neighborhood-based-for-profit individual or organization;

(8) intent and ability to improve, manage and maintain the property to be transferred;

(9) whether an application has been submitted under sponsorship of a Not-for-profit Qualified Developer on behalf of the Tenants for eventual ownership by the Tenants of a property that is subject to an in rem judgment of foreclosure.

(i) Such an application must be submitted to HPD in such form as HPD shall approve, on or before the date that is specified by HPD in the written notice to Tenants made pursuant to subdivision (c) of §8-04 of these rules; (ii) Such application must be sponsored by a Not-for-profit Qualified Developer and accompanied by a letter from such Not-for-profit Qualified Developer indicating that the Not-for-profit Qualified Developer is applying for transfer of the foreclosed property, is prepared to acquire, manage and rehabilitate the foreclosed property, and is sponsoring the Tenants in their effort to eventually own such property; and

(iii) Such application shall only be considered where: (A) the foreclosed property contains at least 10 residential units, (B) such property is at least 50 percent occupied; and (C) the application is signed by 60% of the Tenant households of such property; and

(10) any other factors that HPD deems relevant to such selection.

NOTE

1. Statement of Basis and Purpose in City Record Sept. 30, 2005:

These rules amend provisions relating to the timing of the notice provided to tenants of buildings that are in an **in rem** foreclosure action and setting the deadline for submission of tenant petitions. The Department of Housing Preservation and Development (HPD) sends a notice to tenants to inform them about the **in rem** action and about options that may be available to them under the Third Party Transfer Program. The proposed rules remove the specific time periods within which the notice must be sent and within which the deadline for submissions of tenant petitions must be set. Both time periods were tied to the date of entry of the foreclosure judgment. However, since the date of entry of the judgment is within the court's discretion and is generally not controlled by the agency, it has sometimes proved difficult to strictly adhere to the regulatory time periods. With these amendments HPD has the flexibility to continue to provide ample time for notification to tenants and submission of tenant petitions.

2. Statement of Basis and Purpose in City Record July 18, 2008: The proposed amendments clarify criteria for submission of a tenant petition application under sponsorship of a not-for-profit entity during the Third Party Transfer process. The amendments also clarify an interim evaluation period for buildings where a tenant petition application has been submitted, to ensure that the tenants in such buildings receive training and are made aware of the milestones that must be met for the building to eventually transfer to tenant ownership. Finally, the rules clarify the process for notifying tenants of buildings that are subject to a supplemental judgment of foreclosure.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 8*1 TAX LIEN SALES AND IN REM FORECLOSURE AFFECTING DISTRESSED PROPERTIES AND CERTAIN OTHER PROPERTIES

§8-04 Third Party Transfer Process.

(a) After the four-month period following the entry of a final in rem judgment with respect to a parcel of real property, but prior to expiration of the time set forth in Administrative Code §§11-401 et seq. for the conveyance of title to such real property to a Third Party following such judgment, HPD may:

(1) request the Commissioner of Finance to execute a deed to a Third Party selected by HPD; or

(2) take such other action as may be permitted by Administrative Code §§11-401 et seq. as HPD deems appropriate.

(b) If HPD selects a Third Party to acquire a property, HPD may arrange a closing date and may deliver the deed to the Third Party provided that the proposed conveyance has not been disapproved pursuant to Administrative Code §11-412.2.

(c) HPD will provide a written notice to Tenants of properties that are the subject of an in rem judgment of foreclosure and eligible for the Third Party Transfer Program. Such notice will advise Tenants of the foreclosure action, briefly describe the Third Party Transfer Program, and advise Tenants of an opportunity to apply for eventual ownership of such property under the sponsorship of a Not-for-profit Qualified Developer. Such notice shall be provided prior to entry of such judgment for such property and will be posted in a common area of the property, provided, however, that in the case of a property that is subject to a supplemental judgment of foreclosure due to a default in an installment agreement or a property that is subject to a summary judgment of foreclosure due to dismissal of an owner answer, such

notice shall be provided prior to entry of such judgment or as soon as practicable thereafter. In addition, HPD will make an effort to place such notice beneath the doors of individual units in such properties.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 8*1 TAX LIEN SALES AND IN REM FORECLOSURE AFFECTING DISTRESSED PROPERTIES AND CERTAIN OTHER PROPERTIES

§8-06 Interim Evaluation Period.

(a) A property that has been transferred to a Third Party for which a Not-for-profit Qualified Developer has sponsored a Tenant application pursuant to §8-03(e)(9) of these rules shall be subject to an interim evaluation period during which progress toward eventual ownership by Tenants will be monitored by HPD.

(b) No later than thirty days after transfer to a Third Party of a property for which a Not-for-profit Qualified Developer has sponsored a Tenant application pursuant to §8-03(e)(9) of these rules, such Not-for-Profit Qualified Developer shall inform the Tenants that the property has entered into an interim evaluation period, and shall provide information to the Tenants about the process toward eventual ownership by the Tenants. Such Not-for-Profit Qualified Developer shall make training available to such Tenants, no later than ninety days after such transfer. The training may include courses in building management, maintenance, and managing building finances. HPD may also provide notice to the Tenants regarding commencement of the interim evaluation period.

(c) The interim evaluation period shall include certain milestones for achievement which shall form the basis for HPD to either permit the property to move forward toward eventual ownership by Tenants, or to remove the property from the process toward such ownership. HPD shall evaluate progress toward eventual ownership by Tenants using the following milestones:

(i) whether Tenants have cooperated with the Third Party and Not-for-Profit Qualified Developer in renewing leases or establishing new leases where none exists;

(ii) whether at least 80% of the Tenants are actively paying rent;

(iii) whether Tenants have cooperated with relocation plans, where applicable;

(iv) whether Tenants have attended training programs offered by the Not-for-Profit Qualified Developer; and

(v) any additional factors that HPD considers appropriate in evaluating the tenants' progress toward ownership, provided that HPD notifies the Tenants of any such additional factors.

(d) Such interim evaluation period shall commence upon transfer of the property to the Third Party and shall continue upon the transfer of the property to the Not-for-Profit Qualified Developer. Such interim evaluation period shall end when any required rehabilitation of the property has been completed and permanent loan conversion has taken place, or at the conclusion of such longer period as HPD shall determine with notice to the Tenants.

(e) HPD shall evaluate compliance with the milestones listed in subdivision (c) of this section at regular intervals, and shall inform Tenants and the Not-for-Profit Qualified Developer of its findings. HPD may at any time remove a property from the process toward eventual ownership by Tenants based upon its evaluation. If HPD has not removed the property from such process, at the completion of the interim evaluation period it shall make a determination for such property pursuant to §8-07 of these rules.

§8-07 Transfer from Not-for-Profit Qualified Developer to Tenant Ownership.

(a) Unless a determination has otherwise already been made, HPD shall make a determination whether or not to approve the transfer from a Not-for-Profit Qualified Developer to Tenant ownership upon completion of the interim evaluation period. HPD will consider the following criteria when making such determination:

(1) That an application was submitted to HPD pursuant to and in accordance with §8-03(e)(9) of these rules;

(2) The time period that has elapsed since transfer of the property to the Not-for-profit Qualified Developer;

(3) Whether the property has been rehabilitated and permanent loan conversion has taken place;

(4) The number of Tenants who have signed a petition affirming that there is a functioning tenant organization, that they wish to own the property, and that they understand the extent of the responsibilities of ownership of the property;

(5) The amount of time that a Tenant organization has been in existence at the property;

(6) The number of members of the Tenant organization who have participated in any training offered by HPD, including, but not limited to, courses in building management, maintenance, and managing building finances;

(7) The number of Tenants who have attended a presentation by HPD regarding ownership of the property;

(8) The level of Tenant interest in ownership as indicated through subscriptions to buy units;

(9) The record of payment of all existing loans, status of rent payments, and adequacy of management of the property;

(10) HPD's evaluation of the progress made toward tenant ownership during the interim evaluation period as set forth in §8-06 of these rules; and

(11) Any other criteria that HPD deems relevant to the request, including, but not limited to, any information provided to it by the Not-for-profit Qualified Developer.

NOTE

1. Statement of Basis and Purpose in City Record Apr. 8, 2002:

The rules amend Chapter 8 of Title 28 of the rules of the Department of Housing Preservation and Development (HPD) concerning tax liens and **in rem** foreclosure actions.

The amendments provide for a notice to be given to tenants of properties that are subject to an **in rem** foreclosure judgment and are eligible for the Third Party Transfer Program. The notice informs the tenants about HPD's Third Party Transfer Program. The rule provides a time frame for issuing the notice, the content of the notice and the manner of communicating it to the tenants. The amendments also prescribe an application process that will allow tenants interested in eventual ownership of their property to apply to HPD under sponsorship of a Not-for-profit Qualified Developer. Finally, the amendments provide criteria to be used to determine when consent will be given to transfer of title to a property in the Third Party Transfer Program to a tenant association that applied for eventual ownership under the sponsorship of a Not-for-profit Qualified Developer.

NOTE

1. Statement of Basis and Purpose in City Record Dec. 7, 2006:

The adopted rules amend certain sections of the Department's rules relating to removal of violations issued pursuant to the Housing Maintenance Code. The rules establish a new fee schedule for Dismissal Request applications based upon the dwelling classification and the number of violations subject to the re-inspection. The fee schedule reflects additional costs to the Department as the scope of a re-inspection broadens. The rules also provide for a longer time for completion of the re-inspection during the period from October 1st to May 31st, when the Department's inspectors are responding to critical complaints of lack of heat and hot water. The rules also add unpaid emergency repair charges to the list of circumstances for which the Department may reject a Dismissal Request application. Finally, the rules make certain other technical changes.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 9 REMOVAL OF VIOLATIONS ISSUED PURSUANT TO THE HOUSING MAINTENANCE CODE

§9-06 Exceptions to the Dismissal Request Procedure.

(a) The application for a Dismissal Request by an owner or managing agent who is otherwise eligible to apply for a Dismissal Request pursuant to the foregoing provisions may be rejected by the Department where the building that is the subject of the application is a building for which:

(1) there is pending Department-related litigation; or

(2) there is an uncollected judgment arising from Department-related litigation; or

(3) there is an unpaid emergency repair charge for repairs performed by or on behalf of the Department.

HISTORICAL NOTE

Section amended City Record Dec. 7, 2006 §4, eff. Jan. 6, 2007. [See T28 §9-03 Note 1]

Section amended City Record Sept. 9, 1997 eff. Oct. 9 1997.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 10 ADMINISTRATION OF APPLICATIONS FOR CERTIFICATIONS OF NO HARASSMENT*1

§10-01 Definitions.

Whenever used in this chapter:

Administrative Code. "Administrative Code" shall mean the New York City Administrative Code.

Access authorizer. "Access authorizer" shall mean the person who authorizes HPD to enter the property, which person shall be an individual natural person who either (i) has legal possession of all common areas of the property, or (ii) is authorized to sign on behalf of and bind the persons or entities who have legal possession of all common areas of the property.

Affidavit of no future harassment. "Affidavit of no future harassment" shall mean an affidavit affirming that no future harassment will occur at the property during the period for which a certification or waiver remains in effect.

Applicant. "Applicant" shall mean the person who executes an application, which person shall be an individual natural person who is either (i) an owner, or (ii) a principal or officer of an owner who is authorized to sign on behalf of and bind such owner.

Application. "Application" shall mean an application for a certification, waiver, or exemption submitted to HPD, unless the context clearly indicates reference to an application for a permit submitted to DOB.

Building loan contract. "Building loan contract" shall have the meaning set forth in §22 of the Lien Law.

Certification. "Certification" shall mean a certification of no harassment.

Commencement of substantial work. "Commencement of substantial work" shall mean (i) if the alterations and/or demolition work for which a certification or waiver was granted is financed by a recorded building loan contract, the date upon which a lender has advanced funds in an amount that is not less than 50% of the total amount of such building loan contract and actual construction work has commenced at the property using such funds, or (ii) if the alterations and/or demolition work for which a certification or waiver was granted is not financed by a building loan contract, the actual performance and payment of not less than 50% of the total cost of such alteration and/or demolition work.

Commissioner. "Commissioner" shall mean the Commissioner of HPD or his or her designee.

DHCR. "DHCR" shall mean the Division of Housing and Community Renewal of the State of New York.

DOB. "DOB" shall mean the Department of Buildings of the City of New York.

Dwelling unit. "Dwelling unit" shall mean a dwelling unit or rooming unit, as such terms are defined in Administrative Code §27-2004.

Exemption. "Exemption" shall mean a determination by HPD that a certification pursuant to the terms of the Administrative Code or the Zoning Resolution is not required.

Fee. "Fee" shall mean a sum in the amount of (i) $500 if the property contains 1 to 10 dwelling units, (ii) $1,500 if the property contains 11 to 30 dwelling units, (iii) $2,500 if the property contains 31 to 50 dwelling units, and (iv) $3,500 if the property contains more than 50 dwelling units, which amount is a fee to offset all or part of the administrative cost to HPD of processing the application.

HPD. "HPD" shall mean the Department of Housing Preservation and Development of the City of New York.

Inquiry period. "Inquiry period" shall mean (i) with respect to an application submitted pursuant to any provision of the Zoning Resolution, the period of time therein defined as the inquiry period, and (ii) with respect to an application submitted pursuant to Administrative Code §28-107.1 et seq. and Administrative Code §27-2093, a period commencing three years prior to submission of the application and ending on the date that HPD issues a final determination on the application.

Luxury hotel. "Luxury hotel" shall mean a single room occupancy multiple dwelling in which the rent on May 5, 1983, exclusive of governmentally assisted rental payments, charged for 75% or more of the total number of occupied individual dwelling units was more than 55 dollars per day for each unit rented on a daily basis, or more than 250 dollars per week for each unit rented on a weekly basis or more than 850 dollars per month for each unit rented on a monthly basis. For computation purposes, the rental value of units which were vacant on May 5, 1983 shall be deemed to be the rent charged for comparable occupied units in the property on such date.

Owner. "Owner" shall mean (i) the holder of title to the property, (ii) a contract vendee of title to the property, or (iii) the lessee pursuant to a net lease of the entire property with an unexpired term of not less than ten years from the date of submission of the application.

Property. "Property" shall mean the real property that is the subject of an application.

Residential kitchen. "Residential kitchen" shall mean (i) a kitchen that is located within a dwelling unit, or (ii) a kitchen serving residential occupants that is not located within a dwelling unit.

Residential bathroom. "Residential bathroom" shall mean (i) a bathroom that is located within a dwelling unit, or (ii) a bathroom serving residential occupants that is not located within a dwelling unit.

Waiver. "Waiver" shall mean a waiver of the requirement for a certification pursuant to the terms of the Administrative Code.

Zoning Resolution. "Zoning Resolution" shall mean the New York City Zoning Resolution, as amended.

HISTORICAL NOTE

Section repealed and added (former §10-02) City Record Nov. 13, 2007 §1, eff. Dec. 13, 2007. [See Chapter 10 footnote]

Inquiry period amended City Record Jan. 29, 2009 §1, eff. Feb. 28, 2009. [See Note 1]

DERIVATION

Former §10-02 in original publication July 1, 1991.

NOTE

1. Statement of Basis and Purpose in City Record Jan. 29, 2009:

These rules make technical corrections to internal citations of the Administrative Code of the City of New York to ensure their accuracy.

CASE AND ADMINISTRATIVE NOTES

¶ 1. Under this section, as amended, the inquiry ends on the date of the Commissioner's final determination. Therefore, SRO owner's post-filing acts and omissions may be considered for evidence of harassment. **Dep't of Housing Preservation & Development v. Avid,** OATH Index No. 801/08 (Apr. 4, 2008).

FOOTNOTES

1

[Footnote 1]: * Chapter repealed and added City Record Nov. 13, 2007 §1, eff. Dec. 13, 2007. Note: Statement of Basis and Purpose.

These rules repeal and replace former Chapter 10 governing processing of applications for certifications of no harassment for single room occupancy multiple dwellings by the Department of Housing Preservation and Development pursuant to the Administrative Code. The rules update and consolidate the procedure to process all applications for certifications of no harassment pursuant to the Administrative Code and the Zoning Resolution. The Zoning Resolution was amended to include new harassment provisions for three zoning districts, and the harassment provisions for one other district were amended as well. The rules implement the new and amended provisions.

***** Current through December 2009 ****

28 RCNY 10-02

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 10 ADMINISTRATION OF APPLICATIONS FOR CERTIFICATIONS OF NO HARASSMENT*1

§10-02 Scope of Rule.

(a) The requirements of this chapter apply to certifications, exemptions, and waivers pursuant to Administrative Code §28-107.1 et seq., Administrative Code §27-2093, Zoning Resolution §96-110, Zoning Resolution §93-90, Zoning Resolution §98-70, Zoning Resolution §23-013, and any subsequently enacted provision of the Administrative Code or Zoning Resolution which authorizes HPD to make determinations concerning certifications, exemptions, or waivers.

(b)(1) With regard to single room occupancy multiple dwellings, a certification shall be required where mandated pursuant to Administrative Code §28-107.1 et seq. and Administrative Code §27-2093. In accordance with the authority of the Commissioner pursuant to Administrative Code §28-107.3(4) to prescribe by regulation other types of alteration work, a certification shall be required where the application and plans filed with DOB seek to:

(i) increase or decrease the number of dwelling units;

(ii) alter the layout, configuration or location of any portion of a dwelling unit;

(iii) increase or decrease the number of residential kitchens or residential bathrooms;

(iv) alter the layout, configuration or location of any portion of a residential kitchen or residential bathroom;

(v) demolish or change the use or occupancy of any dwelling unit and/or any portion of the building serving the dwelling units.

(2) Where the application and the accompanying plans submitted to DOB do not provide for any such changes, a

certification shall not be required pursuant to Administrative Code §28-107.3(4), but may be required pursuant to other provisions of Administrative Code §28-107.1 et seq. or pursuant to the Zoning Resolution.

(c) With regard to properties located in the Special Clinton District defined in Article XI, Chapter 6 of the Zoning Resolution (§96-00 et seq.), a certification shall be required where mandated pursuant to the terms of such Article and Zoning Resolution §96-110.

(d) With regard to multiple dwellings located in the anti-harassment area defined in Zoning Resolution §93-90 (Hudson Yards/Garment Center), a certification shall be required where mandated pursuant to the terms of such section.

(e) With regard to multiple dwellings located in the anti-harassment area defined in Zoning Resolution §23-013 (Greenpoint-Williamsburg), a certification shall be required where mandated pursuant to the terms of such section and New York City Zoning Resolution §93-90.

(f) With regard to multiple dwellings located in the anti-harassment area defined in Zoning Resolution §98-70 (West Chelsea), a certification shall be required where mandated pursuant to the terms of such section and New York City Zoning Resolution §93-90.

28 RCNY 10-03

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 10 ADMINISTRATION OF APPLICATIONS FOR CERTIFICATIONS OF NO HARASSMENT*1

§10-03 Application.

(a) An application shall contain such information, in such form, as HPD shall require.

(b) An application shall be executed by an applicant. If the applicant is not an access authorizer, the application shall also be executed by an access authorizer.

(c) An application may be submitted to HPD (i) by hand delivery on business days, during such hours and in such location as HPD shall determine, (ii) by mail, or (iii) by private courier.

(d) The submission of any application shall be accompanied by certified check, bank check, or money order in the amount of the fee made payable to New York City Department of Finance.

(e) Following the submission of an application, HPD may request any additional information that HPD determines is relevant to the certification. If HPD sends a written request for additional information to the applicant by regular or certified mail at the address of the applicant set forth in the application, and HPD does not receive such additional information within thirty days following the mailing of such request, HPD may (i) reject the application, or (ii) review the application without such information and draw a negative inference with respect to the missing information.

(f) An application shall be deemed to be complete when the completed application, the fee, and the necessary supporting documentation have been received and acknowledged as sufficient by HPD.

(g) If HPD determines at any time that an application contains a material misstatement of fact, HPD may reject

such application and bar the submission of a new application for a period not to exceed three years.

(h) HPD may refuse to accept, or to act upon, an application for a certification pursuant to the Zoning Resolution where HPD finds at any time that (i) taxes, water and sewer charges, emergency repair program charges, or other municipal charges remain unpaid with respect to the multiple dwelling, (ii) the multiple dwelling has been altered either without proper permits from DOB or in a way that conflicts with the certificate of occupancy for the multiple dwelling (or, where there is no certificate of occupancy, any record of HPD indicating the lawful configuration of the multiple dwelling) and such unlawful alteration remains uncorrected; or (iii) HPD has previously denied an application pursuant to the Zoning Resolution.

(i) If any information stated in an application changes at any time before HPD makes a final determination, the applicant shall promptly update the application with such new information and submit it to HPD. If such changed information includes any facts that would render the original applicant ineligible to submit the application, HPD may require that the amended application be executed by an individual who is at that time eligible to submit the application.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 10 ADMINISTRATION OF APPLICATIONS FOR CERTIFICATIONS OF NO HARASSMENT*1

§10-05 Initial Determination.

(a) Upon the completion of the investigation of an application for a certification, HPD shall either (i) reject such application as provided in §10-03 of this Chapter, (ii) determine that there is not reasonable cause to believe that harassment occurred during the inquiry period at the property, (iii) determine that there is reasonable cause to believe that harassment occurred during the inquiry period at the property, or (iv) determine that DHCR or a court having jurisdiction has found that there has been harassment, unlawful eviction, or arson at the property during the inquiry period.

(b) If HPD rejects an application as provided in §10-03 of this Chapter, HPD shall send written notice of such determination to the applicant.

(c) If HPD determines that there is not reasonable cause to believe that harassment occurred during the inquiry period at the property, HPD shall (i) send written notice of such determination to the applicant, and (ii) grant the certification in accordance with the terms of §10-08 of this Chapter.

(d) If HPD determines that there is reasonable cause to believe that harassment occurred during the inquiry period at the property, HPD shall send written notice of such determination to the applicant and shall comply with the procedures set forth in §10-06 and §10-07 of this Chapter.

(e) If HPD determines that DHCR or a court having jurisdiction has found that there has been harassment, unlawful eviction, or arson at the property during the inquiry period, HPD may deny the certification without a hearing and issue a final determination in accordance with §10-07 of this Chapter. In such event, HPD may combine the initial

determination pursuant to this section and the final determination pursuant to §10-07 of this Chapter into a single document.

§10-06 Hearing.

(a) When HPD has determined in accordance with §10-05(d) of this Chapter that there is reasonable cause to believe that harassment occurred at the property during the inquiry period, HPD shall schedule a hearing before the Office of Administrative Trials and Hearings at which the applicant will have an opportunity to challenge such determination.

(b) HPD shall serve a notice of hearing by regular mail upon the applicant and any other individual or entity as determined by HPD. Such notice shall state the date, time, and location of hearing and shall inform the applicant that he or she may be represented by counsel and may present witnesses and other evidence.

(c) Upon conclusion of such hearing, the hearing officer shall make a report and recommendation to the Commissioner whether an application should be granted or denied.

(d) Notwithstanding anything to the contrary in this section or these rules, an applicant may waive its right to a hearing before the Office of Administrative Trials and Hearings.

§10-09 Waiver or Exemption.

(a) Notwithstanding any provision of these rules to the contrary, if an application is for a waiver or exemption, (i) HPD may, but shall not be required to, waive the fee, and (ii) if HPD does not waive the fee, but subsequently grants such waiver or exemption, HPD may, but shall not be required to, return such check or money order to the applicant.

(b) Notwithstanding any provision of these rules to the contrary, HPD may grant a waiver or exemption at any point following the submission of an application therefor.

(c) A waiver or exemption shall be effective for such period and subject to such conditions as HPD shall determine, which period and conditions, if any, shall be stated in such waiver or exemption. Such waiver or exemption shall apply to any plan approval, any alteration or demolition permit application, or any renewal of a permit issued for such plan approval, alteration or demolition permit application that is submitted to DOB during such period which complies with such conditions, if any.

(d) HPD shall not issue a waiver unless, in accordance with Administrative Code §27-2093(e), the current title holder of record of the property (i) was the title holder of record of the property prior to May 5, 1983, (ii) entered into a contract of sale for the purchase of the property which was recorded prior to May 5, 1983, (iii) held a mortgage on the property recorded prior to May 5, 1983 and thereafter acquired the property as a result of the foreclosure of such mortgage, or (iv) is a lending organization described in Administrative Code §27-2093(e)(2)(ii), granted a mortgage commitment on the property recorded prior to May 5, 1983, thereafter granted a mortgage on the property pursuant to such commitment, and thereafter acquired the property as a result of the foreclosure of such mortgage.

(e) HPD shall not issue a waiver unless HPD has received an affidavit of no future harassment executed by one or more individual natural persons who are either (i) all of the owners of the property, or (ii) principals or officers of all of the owners of the property who are authorized to sign on behalf of and bind such owners.

CHAPTER 10 ADMINISTRATION OF APPLICATIONS FOR CERTIFICATIONS OF NO HARASSMENT*1

§10-10 Suspension and Rescission.

(a) HPD may rescind a certification, waiver, or exemption at any time if HPD determines that the application for such certification, waiver, or exemption contained a material misstatement of fact.

(b) If HPD determines that there is reasonable cause to believe that harassment has occurred after the date that HPD issued a certification or a waiver, HPD may suspend such certification or waiver. If the certification or waiver was granted solely pursuant to the Administrative Code, HPD shall not suspend such certification or waiver pursuant to the preceding sentence unless HPD determines that there is reasonable cause to believe that such harassment occurred before commencement of substantial work.

(1) If HPD determines that there is reasonable cause to believe that harassment has occurred after the date that HPD issued a certification or a waiver, HPD shall deliver a notice of suspension to the applicant and to the owner and will refer the matter for hearing at the Office of Administrative Trials and Hearings.

(2) HPD shall serve a notice of hearing by regular mail upon the applicant and any other individual or entity as determined by HPD. Such notice shall state the date, time, and location of hearing and shall inform the applicant that he or she may be represented by counsel and may present witnesses and other evidence.

(3) Upon conclusion of such hearing, the hearing officer shall make a recommendation to the Commissioner whether or not the certification should be rescinded.

(4) The Commissioner shall make a final determination whether to rescind such certification, and shall provide the

applicant with written notice of such determination.

CASE AND ADMINISTRATIVE NOTES

¶ 1. ALJ permitted employees of tenants' advocacy group to testify about statements made by deceased tenant because rules permit "any person" to submit information about harassment after a certificate of no harassment has been issued. Group was not appearing as counsel for the deceased tenant but as an interested person. **Dep't of Housing Preservation & Development v. 331 West 22nd Street LLC**, OATH Index No. 912/06, mem. dec. (Dec. 29, 2006).

¶ 2. HPD may rescind a certificate of no harassment if it can show that harassment occurred after the certificate was issued but before substantial work has commenced. SRO building owner failed to show substantial work had commenced, as defined in this section. **Dep't of Housing Preservation & Development v. 331 West 22nd Street LLC**, OATH Index No. 912/06, mem. dec. (Dec. 29, 2006).

¶ 3. Substantial work has commenced upon the payment of the first advance by a lender on a building loan contract which is financing the alterations or demolition for which a certificate of no harassment or waiver was granted. SRO owner did not establish substantial work as loan received was not a building loan contract, as defined in section 2(13) of the Lien Law because the loan was not secured by a mortgage on the property, nor was it duly acknowledged or filed with the county clerk. **Dep't of Housing Preservation & Development v. 331 West 22nd Street LLC**, OATH Index No. 912/06, mem. dec. (Dec. 29, 2006).

¶ 4. Substantial work may be established under this section by proof of actual expenditure of more than fifty percent of the total cost of the alteration or demolition. Although the rule states that substantial work has occurred upon an "actual expenditure of more than fifty percent of the total cost of alteration or demolition," ALJ finds that clause is modified by the phrase "for which a certificate of no harassment or waiver was granted," included in the previous sentence. ALJ rejected SRO building owner's argument that proof of expenditure of more than fifty percent of the total cost of the demolition establishes substantial work where the owner expended less than 50 percent of the total cost of the work to be done (demolition and construction) under the certificate of no harassment. **Dep't of Housing Preservation & Development v. 331 West 22nd Street LLC**, OATH Index No. 912/06, mem. dec. (Dec. 29, 2006).

FOOTNOTES

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 11-01

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 11 [Lead-Based Paint Abatement; Dwellings; Children]*1

§11-01 Definitions.

Whenever used in this chapter:

(a) Abatement. "Abatement" shall mean any set of measures designed to permanently eliminate lead-based paint or lead-based paint hazards. Abatement includes: (i) the removal of lead-based paint and dust lead hazards, the permanent enclosure or encapsulation of lead-based paint, the replacement of components or fixtures painted with lead-based paint, and the removal or permanent covering of soil-lead hazards; and (ii) all preparation, cleanup, disposal and post abatement clearance testing associated with such measures. Abatement does not include renovation, remodeling, landscaping or other activities, when such activities are not designed to permanently eliminate lead-based paint hazards, but, instead, are designed to repair, restore, or remodel a given structure or dwelling, even though these activities may incidentally result in a reduction or elimination of lead-based paint hazards. Furthermore, abatement does not include interim controls, operations and maintenance activities, or other measures and activities designed to temporarily, but not permanently, reduce lead-based paint hazards.

(b) Applicable age. "Applicable age" shall mean under seven years of age for at least one calendar year from August 2, 2004. Upon the expiration of such one year period, in accordance with the procedures by which the health code is amended, the board of health may determine whether or not the provisions of article 14 of the housing maintenance code should apply to children of age six, and based on this determination, may redefine "applicable age" for the purposes of some or all of the provisions of such article 14 to mean under six years of age. In the event that the board of health makes such determination, the term "applicable age" shall mean under six years of age.

(c) CFR. "CFR" shall mean the Code of Federal Regulations.

(d) Chewable surface. "Chewable surface" shall mean a protruding interior window sill in a dwelling unit in a multiple dwelling where a child of applicable age resides and which is readily accessible to such child. "Chewable surface" shall also mean any other type of interior edge or protrusion in a dwelling unit in a multiple dwelling, such as a rail or stair, where there is evidence that such other edge or protrusion has been chewed or where an occupant has notified the owner that a child of applicable age who resides in that multiple dwelling has mouthed or chewed such edge or protrusion.

(e) Commissioner. "Commissioner" shall mean the Commissioner of the New York city department of housing preservation and development or of its successor agency.

(f) Common area. "Common area" shall mean a portion of a multiple dwelling that is not within a dwelling unit and is regularly used by occupants for access to and egress from any dwelling unit within such multiple dwelling.

(g) Contractor. "Contractor" shall mean any person engaged to perform work that disturbs lead-based paint pursuant to this chapter.

(h) Department. "Department" shall mean the New York city department of housing preservation and development or its successor agency.

(i) Deteriorated subsurface. "Deteriorated subsurface" shall mean an unstable or unsound painted subsurface, an indication of which can be observed through a visual inspection, including, but not limited to, rotted or decayed wood, or wood or plaster that has been subject to moisture or disturbance.

(j) Disturb. "Disturb" shall mean any action taken, which breaks down, alters or changes lead-based paint. Lead-based paint disturbances shall include, but not be limited to wet sanding or scraping or routine painting and maintenance.

(k) Door. "Door" shall mean every door in a dwelling unit including, but not limited to, the entrance door to the unit, closet doors, and cabinet doors where such cabinets are affixed to the walls of the dwelling unit.

(l) Encapsulation. "Encapsulation" shall mean the application of a covering or coating that acts as a barrier between the lead-based paint and the environment and that relies for its durability on adhesion between the encapsulant and the painted surface, and on the integrity of the existing bonds between paint layers and between the paint and the substrate. Encapsulation may be used as a method of abatement if it is designed and performed so as to be permanent. Only encapsulants approved by the New York state department of health or by another federal or state agency or jurisdiction which the department has designated as acceptable may be used for performing encapsulation.

(m) Enclosure. "Enclosure" shall mean the use of rigid, durable construction materials that are mechanically fastened to the substrate in order to act as a barrier between lead-based paint and the environment.

(n) Firm. "Firm" shall mean a company, partnership, corporation, sole pro- prietorship, association, or other business entity that performs lead-based paint activities to which the United States environmental protection agency has issued a certificate of approval pursuant to 40 CFR 745.226(f).

(o) Friction surface. "Friction surface" shall mean any painted surface that touches or is in contact with another surface, such that the two surfaces are capable of relative motion and abrade, scrape, or bind when in relative motion. Friction surfaces shall include, but not be limited to, window frames and jambs, doors, and hinges.

(p) HEPA-vacuum. "HEPA-vacuum" shall mean a vacuum cleaner device equipped with a high efficiency particulate air filter capable of filtering out monodispersive particles of 0.3 microns or greater in diameter from a body of air at 99.97 percent efficiency or greater.

(q) Housing maintenance code. "Housing maintenance code" shall mean chapter two of title 27 of the administrative code of the city of New York.

(r) Impact surface. "Impact surface" shall mean any interior painted surface that shows evidence, such as marking, denting, or chipping, that it is subject to damage by repeated sudden force, such as certain parts of door frames, moldings, or baseboards.

(s) Lead-based paint hazard. "Lead-based paint hazard" shall mean any condition in a dwelling or dwelling unit that causes exposure to lead from lead-contaminated dust, from lead-based paint that is peeling, or from lead-based paint that is present on chewable surfaces, deteriorated subsurfaces, friction surfaces, or impact surfaces that would result in adverse human health effects.

(t) Lead-based paint. "Lead-based paint" shall mean paint or other similar surface coating material containing 1.0 milligrams of lead per square centimeter or greater, as determined by laboratory analysis, or by an x-ray fluorescence analyzer. If an x-ray fluorescence analyzer is used, readings shall be corrected for substrate bias when necessary as specified by the performance characteristic sheets released by the United States environmental protection agency and the United States department of housing and urban development for the specific x-ray fluorescence analyzer used. X-ray fluorescence readings shall be classified as positive, negative or inconclusive in accordance with the United States department of housing and urban development "Guidelines for the Evaluation and Control of Lead-Based Paint Hazards in Housing" (June 1995, revised 1997) and the performance characteristic sheets released by the United States environmental protection agency and the United States department of housing and urban development for the specific x-ray fluorescence analyzer used. X-ray fluorescence readings that fall within the inconclusive zone, as determined by the performance characteristic sheets, shall be confirmed by laboratory analysis of paint chips, results shall be reported in milligrams of lead per square centimeter and the measure of such laboratory analysis shall be definitive. If laboratory analysis is used to determine lead content, results shall be reported in milligrams of lead per square centimeter. Where the surface area of a paint chip sample cannot be accurately measured or if an accurately measured paint chip sample cannot be removed, a laboratory analysis may be reported in percent by weight. In such case, lead-based paint shall mean any paint or other similar surface-coating material.

(u) Lead-contaminated dust. "Lead-contaminated dust" shall mean dust containing lead at a mass per area concentration of 40 or more micrograms per square foot on a floor, 250 or more micrograms per square foot on window sills, and 400 or more micrograms per square foot on window wells, or such more stringent standards as may be adopted by the department of health and mental hygiene.

(v) Lead contaminated dust clearance test. "Lead contaminated dust clearance test" shall mean a test for lead-contaminated dust on floors, window wells, and window sills in a dwelling, that is made in accordance with §27-2056.11 of the housing maintenance code.

(w) Peeling. "Peeling" shall mean that the paint or other surface-coating material is curling, cracking, scaling, flaking, blistering, chipping, chalking or loose in any manner, such that a space or pocket of air is behind a portion thereof or such that the paint is not completely adhered to the underlying surface.

(x) Permanent. "Permanent" shall mean an expected design life of at least 20 years.

(y) Remediation or Remediate. "Remediation" or "Remediate" shall mean the reduction or elimination of a lead-based paint hazard through the wet scraping and repainting, removal, encapsulation, enclosure, or replacement of lead-based paint, or other method approved by the commissioner of the department of health and mental hygiene.

(z) Removal. "Removal" shall mean a method of abatement that completely eliminates lead-based paint from surfaces.

(aa) Replacement. "Replacement" shall mean a strategy or method of abatement that entails the removal of

building components that have surfaces coated with lead-based paint and the installation of new components free of lead-based paint.

(bb) Rule or rules. "Rule" or "rules" shall mean a rule or rules promulgated pursuant to §1043 of the New York city charter.

(cc) Stabilization. "Stabilization" means repairing any physical defect in the substrate of a painted surface that is causing paint deterioration, and removing loose paint and other material from the surface to be treated.

(dd) Substrate. "Substrate" shall mean the material directly beneath the painted surface out of which the components are constructed, including wood, drywall, plaster, concrete, brick or metal.

(ee) Turnover. "Turnover" shall mean the occupancy of a dwelling unit subsequent to the termination of a tenancy and the vacatur by a prior tenant of such dwelling unit. Such term shall not mean temporary relocation of an occupant for purposes of performing work pursuant to article 14 of the housing maintenance code.

(ff) Underlying defect. "Underlying defect" shall mean a physical condition in a dwelling or dwelling unit that is causing or has caused paint to peel or a painted surface to deteriorate or fail, such as a structural or plumbing failure that allows water to intrude into a dwelling or dwelling unit.

(gg) Wet sanding or wet scraping. "Wet sanding" or "wet scraping" shall mean a process of removing loose paint in which the painted surface to be sanded or scraped is kept wet to minimize the dispersal of paint chips and airborne dust.

(hh) Window. "Window" shall mean the non-glass parts of a window, including but not limited to any window sash, window well, window jamb, window sill, or window molding.

(ii) Work. "Work" shall mean any activity performed in accordance with article 14 of the housing maintenance code that disturbs paint.

(jj) Work area. "Work area" shall mean that part of a building where paint is being disturbed.

[Footnote 1]: * Chapter 11 repealed and added City Record July 2, 2004 eff. Aug. 1, 2004. Chapter heading supplied by editor. Note: Statement of Basis and Purpose in City Record July 2, 2004: The purpose of these rules is to implement Article 14 of the Housing Maintenance Code relating to lead poisoning prevention and control. Among the many provisions, the rules detail the responsibilities of owners of multiple dwellings and occupants of dwelling units in which children under the applicable age reside with reference to the prevention of

lead-based paint hazards, maintenance of painted surfaces in such dwelling units, notification and investigation for the presence of children and of lead-based paint hazards and the correction of lead-based paint hazards and lead-based paint hazard violations using trained workers and safe work practices. The rules also specify work practices to be used by owners when disturbing lead paint or paint of unknown lead content in multiple dwelling units where a child of applicable age resides. Other provisions concern procedures for certification of correction of violations, exemption from the presumption of lead paint, applications for postponements of time to perform work to remediate violations, recordkeeping requirements, and audit of building records by the Department under certain circumstances. Finally, these rules amend the J-51 rules to provide for benefits when an abatement of lead-based paint hazards is performed under the specified circumstances. These rules repeal and replace the rules promulgated pursuant to former LL #38 of 1999.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 11 [Lead-Based Paint Abatement; Dwellings; Children]*1

§11-03 Notice Inquiring About the Residency of a Child of Applicable Age.

(a) Notice upon signing of a lease, including a renewal lease, if any, or upon any agreement to lease or at the commencement of occupancy if there is no lease.

(1) The owner of a multiple dwelling erected prior to January first, nineteen hundred sixty or of a multiple dwelling erected on or after January first, nineteen hundred sixty and before January first, nineteen hundred seventy-eight, where an owner has actual knowledge of the presence of lead-based paint, shall provide to an occupant of a dwelling unit at the signing of a lease, including a renewal lease, if any, or upon any agreement to lease, or at the commencement of occupancy if there is no lease, a notice in English and Spanish inquiring whether a child of applicable age resides or will reside therein. If there is a lease, such notice will be attached as a rider to the lease. In addition, such owner shall deliver to the occupant at the time the occupant signs a lease, if any, or upon any agreement to lease, or, at the commencement of occupancy if there is no lease, the pamphlet developed by the department of health and mental hygiene pursuant to §17-179(b) of the administrative code of the city of New York. Such notice shall be printed on a single form, the content of which shall be as specified in Appendix A hereto, and shall be printed in not less than ten point type, and shall bear the title "Prevention of Lead-based Paint Hazards-Inquiry Regarding Child". Such notice shall be in duplicate, one copy of which will be for the occupant's records, and one copy of which will be returned to the owner. Such notice shall be kept for a period of ten years from the date of receipt by the owner or transferred to a subsequent owner and maintained by such subsequent owner during such time period, and made available to the department upon request. The notice provided at the signing of a lease, or upon any agreement to lease, or at the commencement of occupancy if there is no lease, shall also contain a statement, signed by such owner, stating that he or she has complied with the provisions concerning apartments at turnover pursuant to §27-2056.8 of Article 14

of the housing maintenance code and §11-05 of these rules, and that he or she has delivered such pamphlet developed by the department of health and mental hygiene to the occupant.

(2) No occupant in a dwelling unit in such multiple dwelling shall refuse or unreasonably fail to provide accurate and truthful information regarding the residency of a child of applicable age therein, nor shall an occupant refuse access to the owner at a reasonable time and upon reasonable prior notice to any part of the dwelling unit for the purpose of investigation and repair of lead-based paint hazards.

(3) Where an occupant has responded to the notice provided by the owner pursuant to paragraph (1) of this subdivision by indicating that no child of applicable age resides therein or has failed to respond to such notice, if a child of applicable age subsequently comes to reside in such dwelling unit at any time during the immediately following year prior to the delivery of the annual notice by the owner pursuant to subdivision (b) of this section, the occupant shall have the duty to inform the owner in writing that such child has come to reside therein.

(b) **Annual Notice.**

(1) Each year an owner of a multiple dwelling erected prior to January first, nineteen hundred sixty shall cause to be delivered to each residential unit a notice in English and Spanish inquiring as to whether a child of applicable age resides therein and advising the occupant of his or her duty to report the presence of such child in writing.

(2) Such notice shall be delivered as provided in §27-2056.4(e) of article 14 of the housing maintenance code, no earlier than January first and no later than January sixteenth, provided, however, that if such notice is enclosed with the January rent bill, such notice may be delivered no sooner than December fifteenth and no later than January sixteenth.

(3) Such notice shall be printed on a single form, the content of which shall be as specified in Appendix B hereto, and shall be printed in not less than ten point type, and shall bear the title "Prevention of Lead-based Paint Hazards-Inquiry Regarding Child". Such notice may be combined with the annual window guard notice required by 24 RCNY Chapter 12 in a form approved by the department of health and mental hygiene. Such notice shall be in duplicate, one copy of which will be for the occupant's records, and one copy of which will be returned to the owner. Such notice shall be kept for a period of ten years from the date of receipt by the owner or transferred to a subsequent owner and maintained by such subsequent owner during such time period, and made available to the department upon request.

(4) Upon receipt of such notice, the occupant shall have the duty to deliver a written response to the owner indicating whether a child of applicable age resides in the dwelling unit, by February fifteenth of the year in which the notice is sent. Where an occupant has responded to the notice provided by the owner pursuant to paragraph one of this subdivision by indicating that no child of applicable age resides therein, or has failed to respond to such notice, if a child of applicable age subsequently comes to reside in such dwelling unit at any time prior to delivery of the next annual notice, the occupant shall have the duty to inform the owner in writing that such child has come to reside therein.

(5) If, subsequent to the delivery of such annual notice, the owner does not receive a written response by February fifteenth, and does not otherwise have actual knowledge as to whether a child of applicable age resides therein, then the owner shall at reasonable times and upon reasonable notice inspect the occupant's dwelling unit to ascertain whether a child of applicable age resides therein. Where, between February sixteenth and March first of that year the owner has made reasonable attempt to gain access to the dwelling unit and was unable to gain access, the owner shall notify the department of health and mental hygiene of that circumstance in writing.

(c) The wording of the notices specified in this section shall not be altered or varied in any manner, unless otherwise approved by the department or the department of health and mental hygiene, provided, however, that such owner may provide such notice in any languages in addition to English and Spanish as such owner believes will be of assistance in ensuring communication of the content of such notice to the occupants of the multiple dwelling.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 11 [Lead-Based Paint Abatement; Dwellings; Children]*1

§11-04 Investigation for Lead-based Paint Hazards.

(a) In any dwelling unit in a multiple dwelling erected prior to January first, nineteen hundred sixty where a child of applicable age resides, and in any dwelling unit in a multiple dwelling erected on or after January first, nineteen hundred sixty and before January first, nineteen hundred seventy-eight, where a child of applicable age resides and the owner has actual knowledge of the presence of lead-based paint, and in common areas of such multiple dwellings, the owner shall cause a visual inspection to be made for peeling paint, chewable surfaces, deteriorated subsurfaces, friction surfaces and impact surfaces. A visual inspection for lead-based paint hazards shall include every surface in every room in the dwelling unit, including the interiors of closets and cabinets. Such inspection shall be undertaken at least once a year and more often if necessary, such as when, in the exercise of reasonable care, an owner knows or should have known of a condition that is reasonably foreseeable to cause a lead-based paint hazard, or an occupant makes a complaint concerning a condition that is likely to cause a lead-based paint hazard or requests an inspection, or the department issues a notice of violation or orders the correction of a violation that is likely to cause a lead-based paint hazard.

(b) An owner shall maintain or transfer to a subsequent owner records of inspections of dwelling units performed pursuant to this section. Such records shall include the location of such inspection and the results of such inspection for each surface in each room, as specified in subdivision (a) of this section, and the actions taken as a result of such inspection pursuant to §11-02 of these rules. If an owner claims an inability to gain access to the unit for such inspection, such records shall contain a statement describing the attempt made to gain access, including, but not limited to providing a written notice to the tenant, delivered by certified or registered mail, or by first class mail with proof of mailing from the United States Postal Service, informing the tenant of the necessity of access to the dwelling unit to

perform the inspection, and the reason why access could not be gained. Such records shall be kept for a period of ten years from either the date of completion of the inspection, or from the date of the last attempt to gain access by the owner, or transferred to a subsequent owner and maintained by such subsequent owner during such time period, and made available to the department upon request. In addition, the owner shall make such records available to the occupant of such dwelling unit upon request.

(c) Nothing in this section shall be deemed to preclude an owner from conducting any additional types of inspections for lead-based paint hazards, provided, however, that such owner shall correct any lead-based paint hazards identified pursuant to such inspection in accordance with the work practices specified in §11-06 of these rules.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 11 [Lead-Based Paint Abatement; Dwellings; Children]*1

§11-05 Turnover of Dwelling Units.

(a) Upon turnover of any dwelling unit in a multiple dwelling erected prior to January first, nineteen hundred and sixty, or of a dwelling unit in a private dwelling erected prior to January first, nineteen hundred and sixty where each dwelling unit is to be occupied by persons other than the owner or the owner's family, the owner shall within such dwelling unit have the responsibility to:

(1) remediate all lead-based paint hazards and any underlying defects, when such underlying defects exist;

(2) make all bare floors, window sills, and window wells in the dwelling unit smooth and cleanable;

(3) provide for the removal or permanent covering of all lead-based paint on all friction surfaces on all doors and door frames; and

(4) provide for the removal or permanent covering of all lead-based paint on all friction surfaces on all windows, or provide for the installation of replacement window channels or slides on all lead-based painted friction surfaces on all windows.

(b) Such work shall be performed in the time period commencing with the vacancy of the unit and shall be completed prior to reoccupancy of such unit. All work performed pursuant to this section shall be performed using the applicable safe work practices set forth in §11-06(g)(3) of these rules.

(c) An owner shall maintain or transfer to a subsequent owner records of work performed in dwelling units

pursuant to this section in accordance with the recordkeeping requirements of §11-06(c) of these rules. In addition, the owner shall make such records available to the new occupant of such dwelling unit upon request.

(d) An owner shall certify that he or she has complied with §27-2056.8 of article 14 of the housing maintenance code and this section in the notice provided to an occupant upon signing of lease, if any, or upon any agreement to lease, or at the commencement of occupancy if there is no lease pursuant to subdivision (a) of §11-03 of these rules.

HISTORICAL NOTE

Section repealed and added City Record July 2, 2004 eff. Aug. 1, 2004. [See Chapter 11 footnote]

DERIVATION

Former §11-05 Owner's Duty to Inspect repealed and added City Record Oct. 13, 1999 eff. Nov.

12, 1999.

Section in original publication July 1, 1991.

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 11 [Lead-Based Paint Abatement; Dwellings; Children]*1

§11-06 Safe Work Practices.

(a) **Filing procedures.** Not less than ten days prior to commencement of work that will disturb lead-based paint pursuant to §27-2056.11(a)(2)(ii) of article 14 of the housing maintenance code, an owner shall file with the department of health and mental hygiene a notice of the commencement of the work. Such notice shall be signed by the owner or by a representative of the firm performing the work. Where work is required to be commenced in a lesser period of time than that specified herein for the filing of a notice of commencement of work, then such filing shall be made as soon as practicable but prior to the commencement of work. Such notice shall be in a form satisfactory to or prescribed by the department of health and mental hygiene and shall set forth at a minimum the following information:

(1) The name, address and telephone number of the owner of the premises in which the lead-based paint work is to be performed;

(2) The address of the building and the specific location of the lead-based paint work within the building;

(3) The name, address and telephone number of the firm who will be responsible for performing the work;

(4) The date and time of commencement of the work, working or shift hours, and the expected date of completion;

(5) A complete description and identification of the surfaces and structures, and surface areas, subject to the work; and

(6) Any changes in the information contained in the notice required by this section shall be filed with the

department of health and mental hygiene prior to commencement of work, or if work has already commenced, within 24 hours of any such change.

(b) **Licensing and training.**

(1) **Abatement.** All work conducted as part of an abatement as defined in this chapter shall be performed by firms and personnel certified to perform lead-based paint activities in accordance with regulations issued by the United States environmental protection agency at subpart L of 40 CFR part 745 for the abatement of lead hazards, or successor rule.

(2) Work ordered by the department to correct a lead-based paint hazard violation in accordance with §27-2056.11(a)(1) of article 14 of the housing maintenance code, or work performed pursuant to §27-2056.11(a)(2)(ii) of article 14 of the housing maintenance code, shall be performed in accordance with the following requirements:

(i) **Firm requirements.** Firms conducting such work shall be certified to perform lead abatement by the United States environmental protection agency in accordance with subpart L of 40 CFR part 745 for the abatement of lead hazards, or successor rule.

(ii) **Worker requirements.** Workers conducting such work shall be trained, at a minimum, in accordance with the regulations issued by the United States department of housing and urban development at 24 CFR §35.1330(a)(4), or successor rule, or under an equivalent program approved by the department or the department of health and mental hygiene.

(iii) **Clearance dust testing.** No person shall perform a lead-contaminated dust clearance test pursuant to this section unless such person is a third party, who is independent of the owner and any individual or firm that performs such work. All personnel performing lead-contaminated dust clearance testing after completion of such work shall be trained, at a minimum, in accordance with regulations issued by the United States department of housing and urban development at 24 CFR §35.1340(b)(1), or successor rule, or under an equivalent program approved by the department or the department of health and mental hygiene.

(3) Work performed in accordance with §27-2056.11(a)(2)(i) of article 14 of the housing maintenance code, shall be performed in accordance with the following requirements:

(i) **Worker requirements.** Workers conducting such work shall be trained under regulations issued by the United States department of housing and urban development at 24 CFR §35.1330(a)(4), or successor rule, or under an equivalent program approved by the department or the department of health and mental hygiene.

(ii) **Clearance dust testing.** No person shall perform a lead-contaminated dust clearance test pursuant to this section unless such person is a third party, who is independent of the owner and any individual or firm that performs such work. Personnel performing lead-contaminated dust clearance testing after completion of such work shall be trained in accordance with regulations issued by the department of housing and urban development at 24 CFR §35.1340(b)(1), or successor rule, or under an equivalent program approved by the department or the department of health and mental hygiene.

(4) Work performed in a dwelling unit upon turnover in accordance with §27-2056.8 of article 14 of the housing maintenance code. No person shall perform a lead-contaminated dust clearance test pursuant to this paragraph unless such person is a third party, who is independent of the owner and any individual or firm that performs the work upon turnover. Personnel performing lead-contaminated dust clearance testing after completion of such work shall be trained in accordance with regulations issued by the department of housing and urban development at 24 CFR §35.1340(b)(1), or successor rule, or under an equivalent program approved by the department or the department of health and mental hygiene.

(c) **Recordkeeping.** An owner shall keep a record of the following information for all work performed pursuant to

this section:

(1) The name, address, and telephone number of the person or entity who performed the work; the start date and completion date for the work;

(2) A copy of all licenses and training certificates, required pursuant to subdivision (b) of this section, for the firms and personnel who performed work and lead-contaminated dust clearance testing;

(3) The location of the work performed in each room including a description of such work and invoices for payment for such work;

(4) Results of lead-contaminated dust clearance tests analyzed by an independent laboratory certified by the state of New York;

(5) Checklists completed pursuant to (g)(1)(ix)(F)**(f)** when occupants are allowed temporary access to a work area; and

(6) Such records shall be maintained by such owner for a period of ten years from the date of completion of such work or transferred to a subsequent owner and maintained by such subsequent owner during such time period, and made available to the department upon request.

(d) **Work methods.**

(1) **Minimizing dust dispersion.** Work that disturbs lead-based paint as defined in this chapter shall be carried out in such a manner as to minimize the penetration or dispersal of lead contaminants or lead-contaminated materials from the work area to other areas of the dwelling unit and building or adjacent outdoor areas.

(2) An area designated as a clean changing area shall be segregated from the work area by a physical barrier to prevent the penetration or dispersal of lead contaminants or lead-contaminated materials from the work area to other areas of the dwelling unit and building and to prevent occupant exposure to materials containing lead.

(3) Repair of lead-based paint hazard violations may be performed by wet sanding, wet scraping, removal, enclosure, encapsulation, replacement or abatement except where otherwise specified in article 14 of the housing maintenance code or these rules.

(e) **Prohibited methods.** The following methods shall not be used while performing work in accordance with these rules that disturbs lead-based paint or paint of unknown lead content:

(1) Open flame burning or torching.

(2) Machine sanding or grinding without HEPA local exhaust control.

(3) Abrasive blasting or sandblasting without HEPA local exhaust control.

(4) Heat guns operating above 1100 degrees Fahrenheit or charring the paint.

(5) Dry sanding or dry scraping.

(6) Paint stripping in a poorly ventilated space using a volatile stripper that is a hazardous substance in accordance with regulations of the United States consumer product safety commission at 16 CFR §1500.3, and/or a hazardous chemical in accordance with the United States occupational safety and health administration regulations at 29 CFR §§1910.1200 or 1926.59, as applicable to the work.

(f) **Work practices and surface finishing.**

(1) All tools and materials used when disturbing paint shall be used in accordance with the manufacturer's instructions.

(2) Wet sanding, wet scraping, removal, enclosure, encapsulation, replacement, abatement and other maintenance and repair activities shall be performed using standard construction and treatment methods, and in accordance with manufacturer's instructions, where applicable.

(3) All surfaces where paint has been disturbed shall be sealed and finished with appropriate materials. Underlying surface substrates shall be dry and protected from future moisture before applying a new protective coating or paint, and all paints and coatings shall be applied in accordance with the manufacturer's recommendations.

(g) **Occupant protection.**

(1) **Work ordered by the Department to correct a lead-based paint hazard violation in accordance with §27-2056.11(a)(1) of article 14 of the housing maintenance code, or work performed pursuant to §27-2056.11(a)(2)(ii) of article 14 of the housing maintenance code.**

(i) **Postings.** The following information shall be conspicuously posted no later than twenty-four hours prior to beginning work and shall remain in place until the work area has been cleared for re-occupancy:

(A) Notice of commencement of work information submitted to the department of health and mental hygiene pursuant to §27-2056.11(a)(2)(ii) of article 14 of the housing maintenance code. Such information shall be posted at the entrance to the dwelling and at the entrance to the dwelling unit.

(B) A warning sign of at least 8-1/2" by 11" with letters at least one inch high, reading as follows: WARNING: LEAD WORK AREA-POISON-NO SMOKING OR EATING. Such information shall be posted adjacent to the work area.

(ii) **Pre-cleaning and protecting moveable items.** All floors, moveable furniture, draperies, carpets, or other objects in the work area shall be HEPA-vacuumed or washed; all moveable items shall then be moved out of the work area or otherwise covered with two layers of six-mil disposable polyethylene sheeting before work begins. Such sheeting shall be taped together with waterproof tape, and taped to the floors or bottom of the walls or baseboards, so as to form a continuous barrier to the penetration of dust.

(iii) **Sealing vents.** Forced-air systems within the room where work that disturbs lead-based paint is occurring shall be turned off and covered with two layers of six-mil polyethylene sheeting and waterproof tape to prevent lead contamination and lead dispersal to other areas.

(iv) **Affixing doorway entrance flap.** After all moveable objects have been removed, the work area shall be sealed off from non-work areas by taping with waterproof tape, two layers of disposable, six-mil polyethylene sheeting over every entrance or doorway to the work area, as follows: To deter the dispersal of lead dust one sheet shall be taped along all sides of the doorway and a slit shall be cut down the middle of the sheeting, leaving intact at least six inches of sheeting on the top and six inches of sheeting on the bottom of the doorway. A second sheet of polyethylene large enough to cover the doorway, shall be attached to the top of the doorway in the room or area where work is being conducted and shall act as a flap opening into the work area.

(v) **Covering floors.** The floor of the work area shall be covered with at least two sheets of disposable six-mil polyethylene sheeting. Such sheeting shall be taped together with waterproof tape, and taped to the bottom of the walls or baseboard, so as to form a continuous barrier to the penetration of dust to the floor. The furniture and non-moveable furnishings, such as counters, cabinets, and radiators in the work area shall be removed or covered with such taped

sheeting.

(vi) **Sealing openings.** All openings, including windows, except those required to be open for ventilation, not sealed off or covered in accordance with subdivision (g)(1)(iii) of the section, shall be sealed with two layers of six-mil polyethylene sheeting and waterproof tape to prevent the penetration or dispersal of lead contaminants or lead-contaminated material.

(vii) **Instructing occupants.** Occupants shall be instructed by the owner and contractor to avoid entering the work area until final clearance levels have been achieved.

(viii) **Hazardous materials.** All paints, thinners, solvents, chemical strippers or other flammable materials shall be delivered to the building and maintained during the course of the work in their original containers bearing the manufacturer's labels, and all material safety data sheets, as may be required by law, shall be on-site and shall be made available upon request to the occupants of the dwelling unit.

(ix) **Clean-up and lead-contaminated dust clearance testing procedures.**

(A) **Daily clean-up.** At the completion of work each day, the work area shall be thoroughly wet-mopped or HEPA-vacuumed. No polyethylene sheeting, drop cloths, or other materials that are potentially hazardous to young children or infants shall be accessible outside the work area. In addition, any work area and other adjoining area exposed to lead or lead-contaminated materials shall be cleaned as follows:

(a) Large debris. Large demolition-type debris (e.g., door, windows, trim) shall be wrapped in six-mil polyethylene, sealed with waterproof tape, and moved to the area designated for trash storage on the property to be properly disposed of in a lawful manner.

(b) Small debris. Small debris shall be HEPA-vacuumed or wet swept and collected. Before wet sweeping occurs, the affected surfaces shall be sprayed with a fine mist of water to keep surface dust from becoming airborne. Dry sweeping is prohibited. The swept debris and all disposable clothing and equipment shall be placed in double four-mil or single six-mil plastic bags which shall be sealed and stored with other contaminated debris in the work area and shall be properly disposed of in a lawful manner.

(c) Clean-up adjacent to the work area. On a daily basis, as well as during final clean-up, the area adjacent and exterior to the work area shall be examined visually to ensure that no lead debris has escaped containment. Any such debris shall be wet swept and HEPA-vacuumed, collected and disposed of as described above.

(d) Supply storage. Upon finishing work for the day, all rags, cloths and other supplies used in conjunction with chemical strippers or other flammable materials, or materials contaminated with lead dust or paint shall be stored at the end of each work day in sealed containers or removed from the premises, in a lawful manner.

(B) **Final clean-up.** Final cleaning shall be performed as follows, in the following sequence:

(a) The final cleaning process shall start no sooner than one (1) hour after lead-based paint disturbance activities have been completed, but before repainting, if necessary.

(b) First, all polyethylene sheeting shall be sprayed with water mist and swept prior to removal. Polyethylene sheeting shall be removed by starting with upper-level polyethylene, such as that on windows, cabinets and counters, folding the corners, ends to the middle, and placing in double four-mil or single six-mil plastic bags. Plastic bags shall be sealed and properly disposed of in a lawful manner.

(c) Second, all surfaces in the work area shall be HEPA-vacuumed. Vacuuming shall begin with ceilings and proceed down the walls to the floors and include furniture and carpets.

(d) Third, all surfaces in the work area shall be washed with a detergent solution. Washing shall begin with the ceiling and proceed down the walls to the floor. Wash water shall be properly disposed of in a lawful manner.

(e) Fourth, all surfaces exposed to lead dust generated by the lead-based paint disturbance process shall be HEPA-vacuumed again. Vacuuming shall begin with ceilings and proceed down the walls to the floors and include furniture and carpets.

(f) Fifth, all surfaces shall be inspected to ensure that all surfaces have been cleaned and all visible dust and debris have been removed. If all visible dust and debris have not been removed, affected surfaces shall be re-cleaned.

(C) **Final inspection.** After final clean-up, and re-painting if necessary, has been completed, a final inspection shall be made by a third party retained by the owner who is independent of the owner and the contractor. The final clearance evaluation shall include a visual inspection and lead-contaminated dust clearance testing. Three wipe samples shall be collected and tested from each room or area where work has been conducted; one wipe sample contaminated dust clearance samples shall be collected and tested from the floor in rooms or areas immediately adjacent to the work area.

(D) **Clearance for re-occupancy.** Lead-contaminated dust levels in excess of the following constitute contamination and require repetition of the clean-up and testing process in all areas where such levels are found. Areas where every lead-contaminated dust sample result is below the following levels may be cleared for re-occupancy:

Floors: 40 micrograms of lead per square foot.

Window Sills: 250 micrograms of lead per square foot.

Window Wells: 400 micrograms of lead per square foot.

Only upon receipt of laboratory test results showing that the above dust lead levels are not exceeded in the dwelling may the work area be cleared for permanent re-occupancy. However, temporary access to work areas may be allowed, provided that clean-up is completed and dust test samples have been collected in compliance with this section. The owner shall provide all lead-contaminated dust clearance test results to the occupants of the dwelling or dwelling unit.

(E) **Relocation.** An owner shall request that an occupant temporarily relocate from a unit pending completion of work where it appears that work cannot be performed safely with occupants in residence. Such owner shall offer a suitable, decent, safe and similarly accessible dwelling unit that does not have lead-based paint hazards to such occupants for temporary relocation. Unreasonable refusal by such occupants to relocate pursuant to such offer shall constitute a refusal of access under housing maintenance code §§27-2009 and 27-2056.4(b), and, where applicable, 9 NYCRR §2524.3(e). Relocation shall not be required provided that work can be done safely with occupants in residence, and provided further that at the end of each day of work, the work area is properly cleaned as specified in subdivision (g)(1)(ix)(A) of this section; occupants have safe access to areas adequate for sleeping; occupants have bathroom and kitchen facilities available to them; occupants have safe access to entry/egress pathways; and the work does not create other safety hazards (e.g., exposed electrical wiring or holes in the floor).

(F) **Temporary access to the work area when occupants not relocated.** When occupants are not relocated, temporary access may be allowed to areas in which work is in progress after work has ceased for the day, provided that at the end of each work day: **(a)** Any work area to be accessed is properly cleaned as specified in the daily clean-up requirements of subdivision (g)(1)(ix)(B)**(b)** through **(d)** and **(f);**

(b) There are no safety hazards (including, but not limited to, exposed electric wiring or holes in the floor) or covered vents;

(c) Floor coverings containing leaded dust and debris and hazardous materials are removed;

(d) Floors in the work area are re-covered with a non-skid floor covering securely taped to the floor;

(e) Work areas are prepared in accordance with the requirements above when work recommences; and

(f) At the end of each workday, and before access is permitted, a checklist indicating compliance with these conditions is completed and signed by the person responsible for overseeing the work. No person shall make a false, untrue or misleading statement or forge the signature of another person on any document or record required to be prepared pursuant to these rules.

(g) Temporary access in accordance with these provisions may be allowed for no longer than five days. If work has not resumed within five days, temporary access may continue only if the person responsible for overseeing the work has repeated the actions required by clauses **(a)** through **(f)** of this subparagraph (F). Nothing herein shall extend the time for compliance with any violation issued pursuant to article 14 of the housing maintenance code.

(2) **Work performed in accordance with §27-2056.11(a)(2)(i) of article 14 of the housing maintenance code that disturbs lead-based paint.**

(i) **Postings.** A warning sign shall be posted in accordance with subdivision (g)(1)(i)(B) of this section and caution tape shall be placed across the entrance to the work area.

(ii) **Pre-cleaning and protecting moveable items.** All floors, moveable furniture, draperies, carpets, or other objects in the work area shall be HEPA-vacuumed or washed; all moveable items shall then be moved out of the work area or otherwise covered with polyethylene plastic or equivalent sheeting. All plastic or equivalent sheeting used during the performance of the work shall be of sufficient thickness and durability to prevent tearing during the performance of the work. Such sheeting shall be of sufficient length and width to prevent dust and other debris generated by the work from spreading to areas unprotected by such sheeting. Such sheeting must be adequately secured to prevent movement of the sheeting during the performance of the work.

(iii) **Covering floors.** The floor of the work area shall be covered with polyethylene plastic or equivalent sheeting. All plastic or equivalent sheeting used during the performance of the work shall be of sufficient thickness and durability to prevent tearing during the performance of the work. Such sheeting shall be of sufficient length and width to prevent dust and other debris generated by the work from spreading to areas unprotected by such sheeting. Such sheeting must be adequately secured to prevent movement of the sheeting during the performance of the work. Multiple layers of polyethylene sheeting shall be used as needed to prevent dust from contaminating the floor.

(iv) **Sealing openings.** Where applicable, forced air systems in the work area shall be turned off and any openings in the work area shall be sealed with polyethylene or equivalent sheeting to prevent the penetration or dispersal of lead contaminants or lead-contaminated material.

(v) **Instructing occupants.** Occupants shall be instructed by the owner and contractor to avoid entering the work area until final clean up has been completed.

(vi) **Hazardous materials.** All paints, thinners, solvents, chemical strippers or other flammable materials shall be delivered to the building and maintained during the course of the work in their original containers bearing the manufacturer's labels, and all material safety data sheets, as may be required by law, shall be on-site and shall be made available upon request to the occupants of the dwelling unit.

(vii) Clean-up and lead-contaminated dust clearance testing shall be conducted in accordance with subdivision (g)(1)(ix) of this section.

(viii) Relocation and temporary access to work areas when occupants are not relocated, where provided, shall be performed in accordance with (g)(1)(ix)(E) and (F) of this section.

(3) **Work performed in a dwelling unit on turnover in accordance §27-2056.8 of article 14 of the housing maintenance code.**

(i) **Preparation.** The procedures described in subdivision (g)(2)(i)-(iv) of this section shall be followed.

(ii) **Clean-up.** At the completion of work, the work area shall be thoroughly wet-mopped or HEPA-vacuumed and a visual examination shall be conducted in the work area and the area adjacent and exterior to the work area. Any noted lead-contaminated dust or debris shall be wet-mopped or HPEA-vacuumed. All rags, cloths and other supplies used in conjunction with chemical strippers or other flammable materials, or materials contaminated with lead dust or paint shall be stored at the end of each work day in sealed containers or removed from the premises, in a lawful manner.

(iii) **Lead-contaminated dust clearance testing.** Lead-contaminated dust clearance testing shall be conducted in accordance with subdivision (g)(1)(ix)(C)-(D) of this section.

HISTORICAL NOTE

Note: Statement of Basis and Purpose in City Record July 2, 2004: The purpose of these rules is to implement Article 14 of the Housing Maintenance Code relating to lead poisoning prevention and control. Among the many provisions, the rules detail the responsibilities of owners of multiple dwellings and occupants of dwelling units in which children under the applicable age reside with reference to the prevention of lead-based paint hazards, maintenance of painted surfaces in such dwelling units, notification and investigation for the presence of children and of lead-based paint hazards and the correction of lead-based paint hazards and lead-based paint hazard violations using trained workers and safe work practices. The rules also specify work practices to be used by owners when disturbing lead paint or paint of unknown lead content in multiple dwelling units where a child of applicable age resides. Other provisions concern procedures for certification of correction of violations, exemption from the presumption of lead paint, applications for postponements of time to perform work to remediate violations, recordkeeping requirements, and audit of building records by the Department under certain circumstances. Finally, these rules amend the J-51 rules to provide for benefits when an abatement of lead-based paint hazards is performed under the specified circumstances. These rules repeal and replace the rules promulgated pursuant to former LL #38 of 1999.

Rules of the City of New York

***** Current through December 2009 ****

28 RCNY 11-07

RULES OF THE CITY OF NEW YORK

Title 28 Housing Preservation and Development

CHAPTER 11 [Lead-Based Paint Abatement; Dwellings; Children]*1

§11-07 Presumption.

(a) In any multiple dwelling erected prior to January first, nineteen hundred sixty, it shall be presumed that the paint or other similar surface-coating material in any dwelling unit where a child of applicable age resides or in the common areas of such multiple dwelling is lead-based paint.

(b)(1) The presumption established in this section may only be rebutted as provided in paragraph (2) of this subdivision by the registered owner, registered officer or director of a corporate owner or by a registered managing agent of such multiple dwelling by submitting to the department:

(i) a sworn written statement, supported by lead-based paint testing or sampling results, including a description of the testing methodology and manufacturer and model of instrument used to perform such testing or sampling;

(ii) a sworn written statement by the person who performed the testing if performed by an employee or agent of the owner which shall include a copy of the certificate of training as a certified lead-based paint inspector or risk assessor as provided in subdivision (d) of this section;

(iii) a copy of the inspection report provided by the person who performed the testing or sampling which shall include a description of the surfaces in each room where such testing or sampling was performed; and

(iv) a copy of the results of such testing and/or such laboratory tests of paint chip samples performed by an independent laboratory certified by the state of New York where such testing has been performed.

(2) Such written statement and all supporting documentation shall be submitted to the department not later than six (6) days before the date set for correction in the notice of violation in accordance with paragraph (1) of this subdivision, and may only be submitted to rebut the presumption where the department has not performed an XRF test prior to issuing such violation. Receipt by the department of a complete application in accordance with this subdivision including such written statement and such supporting documentation shall toll the time period to correct the violation. Receipt of an incomplete application shall not toll the time period for correction of the violation.

(3) The department shall notify the registered owner, registered officer or director of a corporate owner or registered managing agent of such multiple dwelling of its determination in writing, and, if the department determines that such presumption has not been rebutted, such notice shall set a date for correction of the violation.

(c) Where testing or sampling is performed to rebut the presumption established in this section, the performance of such testing shall be in accordance with the definition for lead-based paint established in §11-01(s) of these rules and §27-2056.2(7) of article 14 of the housing maintenance code. Laboratory analysis for paint chip samples shall be permitted only where XRF tests fall within the inconclusive zone for the particular XRF machine or where the configuration of the surface or component to be tested is such that an XRF machine cannot accurately measure the lead content of such surface or component. Laboratory tests of paint chip samples, where performed, shall be reported in mg/cm^2, unless the surface area of a paint chip sample cannot be accurately measured, or if an accurately measured paint chip sample cannot be removed, in which circumstance the laboratory test may be reported in percent by weight. Where paint chip sampling has been performed, the sworn written statement by the person who performed the testing shall include a statement that such sampling was done in accordance with 40 CFR §745.227 or successor provisions.

(d) Testing performed to rebut the presumption may only be performed by a person who has been certified as a lead-based paint inspector or risk assessor in accordance with subparts L and Q of 40 CFR part 745 or successor provisions and such testing shall be performed in accordance with 40 CFR §745.227(a) and (b) or successor provisions.
