Honorable Jaclyn A. Brillling
Secretary
New York State Public Service Commission
Three Empire State Plaza
Albany, NY 12223

Re: Case 07-M-0548 – Proceeding on Motion of the Commission Regarding an Energy
Efficiency Portfolio Standard

Case 07-G-0141 – Proceeding on Motion of the Commission as to the Rates, Charges,
Rules, and Regulations of National Fuel Gas Distribution Corporation for Gas
Service – Conservation Incentive Program

Dear Secretary Brillling,

Pursuant to the Energy Efficiency Portfolio Standard (“EEPS”) Report Submission
Guidelines issued September 13, 2010, attached please find the scorecard reports for National
Fuel Gas Distribution Corporation for the month of June 2011.

Any questions you may have regarding the attached can be directed to the undersigned at
(716) 857-7805.

Respectfully submitted,

Eric H. Meinel
General Manager, Rates & Regulatory Affairs

Program Administrator (PA) and Program ID ¹		National Fuel Gas Distribution Corporation		
Program Name		Residential Rebates	LIURP	Small Non Residential Rebates
Program Type ²		Appliance Rebates	Low Income Usage Reduction	Small Non Residential Rebates
Total Acquired First-Year Impacts This Month ³				
Net first-year annual kWh acquired this month ⁴				
Monthly Net kWh Goal (based on net first-year ^{annual} ⁵ kWh Goal)				
Percent of Monthly Net kWh Goal Acquired				
Net Peak ⁶ kW acquired this month				
Monthly Net Peak kW Goal				
Percent of Monthly Peak kW Goal Acquired				
Net First-year annual therms acquired this month		61,021	100,058	12,326
Monthly Net Therm Goal		NA	NA	NA
Percent of Monthly Therm Goal Acquired		NA	NA	NA
Net Lifecycle kWh acquired this month				
Net Lifecycle therms acquired this month		1,192,795	2,501,444	209,539
Total Acquired Net First-Year Impacts To Date				
Net first-year annual kWh acquired to date				
Net first-year annual kWh acquired to date as a percent of annual goal				
Net first-year annual kWh acquired to date as a percent of 8-year goal				
Net cumulative kWh acquired to date				
Net utility peak kW reductions acquired to date				
Net utility peak kW reductions acquired to date as a percent of utility annual goal				
Net utility peak kW reductions acquired to date as a percent of 8-year goal				
Net NYISO peak kW reductions acquired to date				
Net first-year annual therms acquired to date		7,383,074	995,180	1,066,804
Net first-year annual therms acquired to date as a percent of annual goal		NA	NA	NA
Net first-year annual therms acquired to date as a percent of 8-year goal		NA	NA	NA
Net cumulative therms acquired to date		144,319,172	24,879,508	18,135,668
Total Acquired Lifecycle Impacts To Date ⁷				
Net Lifecycle kWh acquired to date				
Net Lifecycle therms acquired to date		144,319,172	24,879,508	18,135,668
Committed ⁷ Impacts (not yet acquired) This Month				
Net First-year annual kWh committed this month				
Net Lifecycle kWh committed this month				
Net Utility Peak kW committed this month				
Net first-year annual therms committed this month		0	0	0
Net Lifecycle therms committed this month		0	0	0
Funds committed at this point in time		0	0	0
Overall Impacts (Acquired & Committed)				
Net first-year annual kWh acquired & committed this month				
Net utility peak kW acquired & committed this month				
Net First-year annual therms acquired & committed this month		7,383,074	995,180	1,066,804

Percent of applications received to date that have been processed	NA	NA	NA	
NOTES:				
<p>¹DPS Staff needs to work with utilities to develop a Program ID naming convention. However, a Program ID number is not required for the first report. Note that when developing program ID naming conventions, utilities would like to minimize computer programming/reporting costs that they might incur if the proposed naming conventions are complex or the utility’s current naming conventions require modification to Staff’s proposed format.</p> <p>²There is not currently a consistent list of program types but individual categories for common use by administrators could be developed.</p> <p>³First-year savings are defined as the annual savings expected from a given measure in the first year after installation. The annual savings are sometimes the result of annualizing estimated savings that are based on data that cover less than one year. <i>Acquired</i> kWh savings are defined as those savings that reported by the program administrator in program tracking databases and for which a rebate check has been sent to the participant on a specific date.</p> <p>⁴Regardless of the month in which a measure is installed within a given calendar year, the program is credited with the associated savings for the entire year.</p> <p>⁵Program Administrators should make best estimate of the annual goal even though the goal might in some cases cover two calendar years. Also, Staff wants administrators to try to be as accurate as possible in determining the <i>monthly</i> goals but does not want to mandate monthly goals, at least initially.</p> <p>⁶Peak is defined uniquely for each utility.</p> <p>⁷The lifecycle savings are tracked beginning in the <i>year</i> in which a given measure was installed. Over the period 2008-2015, PA’s must take into account the fact that savings from measures installed early in the period will vanish at the end of their useful life before the end of 2015. Thus, the lifecycle impacts acquired to date will be different for each month as a function of adding savings from measures in stalled in a given month and subtracting savings from measures installed earlier in the funding cycle that have reached the end of thier useful life.</p> <p>⁸Committed savings are defined as those for which funds have been encumbered by not yet spent. When the funds are spent (i.e., a rebate check has been sent to the participant on a specific date), the savings are then considered "acquired." Staff would like to see the program administrator’s best <i>estimate</i> of what they have committed. There should be some assumptions on how the administrator does that. Program administrators should forecast as accurately as possible and it should get more precise with program experience, e.g., the difference between achieved and committed should get closer over time.</p>

<p>⁹These are the budget categories to be used by companies when submitting the required energy efficiency program implementation plans. In its January 16, 2009 Order, the Commission directed Staff to provide definitions for the budget categories to be used in the preparation of these plans (See Order Approving “Fast Track” Utility-Administered Electric Energy Efficiency Program With Modification, at page 11). These categories are provided to promote consistency in budget construction and reporting among the utility plans.</p> <p>Companies should include a “description of expenditures within each category” (See Order Approving “Fast Track” Utility-Administered Electric Energy Efficiency Program With Modification, at page 11) and separately quantify each item within each category. These expenditures must include and identify all direct and indirect costs attributable to each program category. Companies must provide the basis of allocation for all indirect costs.</p> <p>Companies should identify whether each cost item is to be recovered through the SBC surcharge, base rates, or other recovery mechanism (e.g., monthly adjustment charges).</p>				
<p>¹⁰An application is processed once the PA has reviewed the application and made a decision whether to approve the incentive payment to the customer. Once the decision has been made to pay the incentive to the customer, these funds and their associated energy and demand impacts become "Committed."</p>				
<p>¹¹The application is approved once the decision has been made to pay the incentive to the customer. Note that these funds and their associated energy and demand impacts become "Committed" once this decision is made. Also note that for programs in which there are ases in which an application could be received, processed, and approved all in one day, then a "1" would be counted for each step in the tracking lifecycle.</p>
