VIA EMAIL

Honorable Jaclyn A. Brillling
Secretary
New York State Public Service Commission
Three Empire State Plaza
Albany, New York 12223

Re: Case 07-M-0548 – Proceeding on Motion of the Commission Regarding an Energy Efficiency Portfolio Standard

Case 08-E-1129 – Petition of New York State Electric & Gas Corporation for Approval of an Energy Efficiency Portfolio Standard (EEPS) Utility-Administered Electric Energy Efficiency Program

Case 08-E-1130 – Petition of Rochester Gas and Electric Corporation for Approval of an Energy Efficiency Portfolio Standard (EEPS) Utility-Administered Electric Energy Efficiency Program

Case 09-G-0363 – Petitions for Approval of Energy Efficiency Portfolio Standard (EEPS) Gas Energy Efficiency Programs

Dear Secretary Brillling:

Pursuant to the New York State Public Service Commission's Order Approving Certain Commercial and Industrial Customer Energy Efficiency Programs with Modifications in Cases 08-E-1129, 08-E-1130 and 08-G-0363¹ and Pursuant to the New York State Public Service Commission's November 13, 2009 Order Approving Certain Commercial and Industrial Customer Energy Efficiency Programs with Modifications and Addressing Independent Program Administrator Filings in Cases 08-E-1129, 08-E-1130 and 09-G-0363², New York State Electric & Gas Corporation and Rochester Gas and Electric Corporation hereby file the "Monthly Scorecard Report" of key Non-Residential Commercial and Industrial Prescriptive Rebate

¹ Cases 08-E-1129, 08-E-1130 - Petitions of New York State Electric & Gas Corporation and Rochester Gas and Electric Corporation for Approval of an Energy Efficiency Portfolio Standard Utility-Administered Electric Energy Efficiency Program, and Case 09-G-0363, Petitions for Approval of Energy Efficiency Portfolio Standard (EEPS) Gas Energy Efficiency Programs, Order Approving Certain Commercial and Industrial Customer Energy Efficiency Programs with Modifications, at 41 (October 23, 2009).

² Cases 08-E-1129, 08-E-1130 - Petitions of New York State Electric & Gas Corporation and Rochester Gas and Electric Corporation for Approval of an Energy Efficiency Portfolio Standard Utility-Administered Electric Energy Efficiency Program, Order Approving Certain Commercial and Industrial Customer Energy Efficiency Programs with Modifications and Addressing Independent Program Administrator Filings, at 35 (November 13, 2009).

Honorable Jaclyn A. Brillling, Secretary
January 14, 2011

Page 2

Programs and Non-Residential Commercial and Industrial Custom Rebate Programs achievements for the month ending December 31, 2010.

Please direct any questions to me at telephone number 607-725-3936 or via email at jjfishgertz@nyseg.com.

Respectfully Submitted,

A handwritten signature in black ink, reading "Joni Fish-Gertz". The signature is fluid and cursive, with the first name "Joni" and last name "Fish-Gertz" clearly legible.

Joni Fish-Gertz
Manager, Programs

1. Program Status

Program Performance Goals

(a) Describe and discuss circumstances that may have an impact on the achievement of project performance goals (positive or negative).

Projects have been submitted for Prescriptive rebates program at both companies although some rebates had not been processed at the time of reporting. Therefore, a disparity may be noted between “Percent of Monthly Goal Acquired” and “Percent of total budget spent to date”. Over the last month, the Companies have continued to identify and mitigate potential market barriers, such as the 100 kW demand restriction for the Electric portion of the Custom Rebate Program.

(b) Describe and discuss other key aspects of program performance goals that were not discussed in (a).

Although it is anticipated that the Annual Energy Savings impact and program budget in 2010 will be short of the implementation plan goals, the overall program goals are expected to be achieved in 2011. Factors such as volatile economic conditions, unpredictable customer behavior, and inconsistent lead times make it difficult to predict short-term performance by utility, by program and by fuel-type. For this reason, the Companies instead are striving to reach the combined multi-year goals for each Prescriptive and Custom programs.

In order to achieve the *Forecast of net energy impacts*, paragraph (c) below, the Companies will roll over unspent 2010 Prescriptive program budgets into the 2011 program budgets as approved in Tables 1a and 2a of Appendix 2 in the October 23, 2009 Order Approving Certain Commercial and Industrial Customer Energy Efficiency Programs with Modifications and unspent 2010 Custom program budgets into the 2011 program budgets as approved in Tables 1 and 2 of Appendix 3 in the November 13, 2009 Order Approving Certain Commercial and Industrial Customer Energy Efficiency Programs with Modifications and Addressing Independent Program Administrator Filings.

(c) Forecast of net energy impacts.

NYSEG and RG&E Annual Energy Savings - Prescriptive Rebate Program

Year	NYSEG MWh	RG&E MWh	NYSEG Dt	RG&E Dt
Total 2010-2011	5,550	4,036	13,062	13,472

Source: Total 2010- 2011: Goal as reflected in the C&I Prescriptive Implementation Plan, December 22, 2009

NYSEG and RG&E Annual Energy Savings - Custom Rebate Program

Year	NYSEG MWh	RG&E MWh	NYSEG Dt	RG&E Dt
Total 2010-2011	15,634	9,586	12,328	12,048

Source: Total 2010-2011: Goal as reflected in the C&I Custom Implementation Plan, January 6, 2010

2) Program Implementation Activities

(a) Marketing Activities

During December, the Companies' Marketing and Sales (M&S) field personnel contacted 141 customers and trade allies to introduce and/or reinforce the C&I Rebate Program messages. Since July 1, M&S field personnel have made 1,840 contacts - comprised of both field visits and telephone calls - with customers and trade allies.

On December 6, 2010, the Companies began an online advertising campaign targeting the ***Business Journal*** published in the each utility's respective service area, including the Binghamton, Syracuse, Mohawk Valley, and Rochester markets. Additionally, the program is advertised on the Web pages of WBNG (Binghamton) and the Democrat and Chronicle (Rochester). The average banner click-through rate according to Google is 0.1%. This campaign is performing above the national click-through average in this reporting period with click-through rates ranging from 0.14% to 0.94%. This campaign runs through February 27.

In an effort to extend energy efficiency opportunities to as many qualifying customers as possible, the Companies continue co-marketing efforts in conjunction with other EEPS program offerings. For example, when Small Business Direct Installation (SBDI) Program field representatives identify a facility that falls outside of the 100 kW SBDI threshold, the customer is advised to contact the NYSEG or RG&E M&S representative regarding other energy efficiency programs, including the C&I Rebate Program. C&I Rebate Program overview sheets are provided. Additionally, C&I Rebate Program overview sheets, as well as two other more specific cut sheets - one for natural gas furnaces, boilers, and controls, and one for air conditioning and heat pumps - are provided to potentially interested Multi-family Program property owners/managers.

Following is a summary of community outreach events conducted during December:

Date	Topic	Location	Utility	Audience Type	Number of Attendees
12/08/2010	C&I Rebate/SBDI Programs	Victor	RG&E	Businesses – Ontario Office of Economic Development	14
12/10/2010	C&I Rebate Program	Ithaca	NYSEG	Tompkins County Climate Protection Initiative Community Organization	20
12/14/2010	C&I Rebate Program	Chazy	NYSEG	Customers – Miner Institute Dairy Days -Agriculture Organization	50

12/18/2010	EEPS Portfolio of Programs	Rochester	RG&E	Monroe County Energy Expo – Customers & Trade Allies	100
12/22/2010	C&I Rebate Program	Hopewell Junction	NYSEG	Realtors	5
12/27/2010	C&I Rebate Program	Liberty	NYSEG	Sales Managers – Trade Ally	5

The Companies will continue direct customer contact, monitor customer participation and consider additional introductory contacts, bill inserts, and advertising and/or general community presentations as needed to achieve program goals.

Extensive information about the program appears on the Companies' energy efficiency Web pages at:

<http://nyseg.com/UsageAndSafety/usingenergywisely/eeeps/cirp.html>

<http://www.rge.com/UsageAndSafety/usingenergywisely/eeeps/cirp.html>

(b) Evaluation Activities

Itron has been selected as the evaluation contractor for this program. A kick-off meeting was held with Itron, the evaluation manager, DPS staff and the program implementation coordinator. Itron has issued an initial data request for documents related to this program. Itron is preparing a detailed evaluation plan for submission to DPS staff.

(c) Other Activities

None at this time.

3. Customer Complaints and/or Disputes

No NYS PSC complaints have been reported. Customer disputes are handled as they occur.

4. Changes to Subcontractors or Staffing

None at this time.

5. Additional Issues

None at this time.

Costs^{9,16}	
Total program budget	\$2,610,016
General Administration ¹³	Portfolio
Program Planning ¹³	Portfolio
Program Marketing ¹⁸	\$899
Trade Ally Training ¹⁸	\$303
Incentives and Services ^{14,18}	\$0
Direct Program Implementation ¹⁸	\$9,822
Program Evaluation ¹⁸	\$2,734
Total expenditures to date ¹⁷	\$134,975
Percent of total budget spent to date	5.17%
Participation^{15, 17}	
Number of program applications received to date	9
Number of program applications processed to date	9
Number of processed applications approved to date	2
Percent of applications received to date that have been processed	100.00%
DPS Staff Notes:	
<p>¹DPS Staff needs to work with utilities and NYSERDA to develop a Program ID naming convention. However, a Program ID number is not required for the first report. Note that when developing program ID naming conventions, utilities would like to minimize computer programming/reporting costs that they might incur if the proposed naming conventions are complex or the utility's current naming conventions require modification to Staff's proposed format.</p> <p>²There is not currently a consistent list of program type but individual categories for common use by administrators could be developed</p> <p>³First-year savings are defined as the annual savings expected from a given measure in the first year after installation (See Definition #1 in <i>Savings Definitions</i> Tab). The annual savings are sometimes the result of annualizing estimated savings that are based on data that cover less than one year. Acquired kWh savings are defined as those savings that reported by the program administrator in program tracking databases and for which a rebate check has been sent to the participant on a specific date.</p> <p>⁴Regardless of the month in which a measure is installed within a given calendar year, the program is credited with the associated savings for the entire year.</p> <p>⁵Program Administrators should make a best estimate of the annual goal even though the goal might in some cases cover two calendar years. Also, Staff wants administrators to try to be as accurate as possible in determining the monthly goals but does not want to mandate monthly goals, at least initially.</p> <p>⁶ Peak is defined uniquely for each utility.</p> <p>⁷The lifecycle savings are tracked beginning in the year in which a given measure was installed. Over the period 2008-2015, PA's must take into account the fact that savings from measures installed early in the period will vanish at the end of their useful life before the end of 2015. Thus, the lifecycle impacts acquired to date will differ for each month as a function of adding savings from measures installed in a given month and savings from measures installed earlier in the funding cycle that have reached the end of their useful life are no longer accumulated.</p> <p>⁸ Committed savings are defined as those for which funds have been encumbered by not yet spent. When the funds are spent (i.e., a rebate check has been sent to the participant on a specific date), the savings are then considered "acquired." Staff would like to see the program administrator's best <i>estimate</i> of what they have committed. Program administrators should forecast as accurately as possible and forecasts should get more precise with program experience, i.e., the difference between achieved and committed should narrow over time.</p>	

⁹These are the budget categories to be used by companies when submitting the required energy efficiency program implementation plans. In its January 16, 2009 Order, the Commission directed Staff to provide definitions for the budget categories to be used in the preparation of these plans (See Order Approving "Fast Track" Utility-Administered Electric Energy Efficiency Program With Modification, at page 11). These categories are provided to promote consistency in budget construction and reporting among the utility plans.

Companies should identify whether each cost item is to be recovered through the SBC surcharge, base rates, or other recovery mechanism (e.g., monthly adjustment charges).

¹⁰An application is *processed* once the PA has reviewed the application and made a decision whether to approve the incentive payment to the customer. Once the decision has been made to pay the incentive to the customer, these funds and their associated energy and demand impacts become "Committed."

¹¹The application is *approved* once the decision has been made to pay the incentive to the customer. Note that these funds and their associated energy and demand impacts become "Committed" once this decision is made. Also note that for programs in which there are cases in which an application could be received, processed, and approved all in one day, then a "1" would be counted for each step in the tracking lifecycle.

¹²See *CO₂ Reduction Values* tab.

Utility Notes:

¹³ Portfolio Costs are not included in the program budget or actual costs. Consistent with the Companies' July 9, 2009 letter to the Secretary in Cases 07-M-0548 et al. ("July 9 letter") and the Companies' prior and subsequent energy efficiency program submittals, Portfolio Costs are incremental and are incurred as a result of the Companies' ongoing active participation in the New York State Public Service Commission's ("Commission") energy efficiency proceedings. Portfolio Costs allow the Companies to jointly provide efficient support for the complete suite of specific energy efficiency programs ultimately approved by the Commission.

¹⁴ Incentives and services costs are reported based on Company payment of invoices received from program implementation contractors for incentive payments made to program participants. They will thus lag the actual issuance of incentive payments to program participants.

¹⁵ Impacts are calculated using actual installed measure information for all measures.

¹⁶ All program costs identified in this section are recovered through the SBC surcharge unless otherwise noted.

¹⁷ Information presented here may include changes to previously filed monthly scorecard tables based on: review of additional information, reconsideration of eligibility decisions made by the implementation contractor during prior reporting periods, or other factors.

¹⁸ Data contained in these fields reflects the most recent month's expenditures in the respective category, as reported in the companies' accounting systems, not "to date" information.

Acquired kWh savings are defined as those savings that reported by the program administrator in program tracking databases and for which a rebate check has been sent to the participant on a specific date.</p> <p>⁴Regardless of the month in which a measure is installed within a given calendar year, the program is credited with the associated savings for the entire year.</p> <p>⁵Program Administrators should make a best estimate of the annual goal even though the goal might in some cases cover two calendar years. Also, Staff wants administrators to try to be as accurate as possible in determining the monthly goals but does not want to mandate monthly goals, at least initially.</p> <p>⁶ Peak is defined uniquely for each utility.</p> <p>⁷The lifecycle savings are tracked beginning in the year in which a given measure was installed. Over the period 2008-2015, PA's must take into account the fact that savings from measures installed early in the period will vanish at the end of their useful life before the end of 2015. Thus, the lifecycle impacts acquired to date will differ for each month as a function of adding savings from measures installed in a given month and savings from measures installed earlier in the funding cycle that have reached the end of their useful life are no longer accumulated.</p> <p>⁸ Committed savings are defined as those for which funds have been encumbered by not yet spent. When the funds are spent (i.e., a rebate check has been sent to the participant on a specific date), the savings are then considered "acquired." Staff would like to see the program administrator's best <i>estimate</i> of what they have committed. Program administrators should forecast as accurately as possible and forecasts should get more precise with program experience, i.e., the difference between achieved and committed should narrow over time.</p>	

⁹These are the budget categories to be used by companies when submitting the required energy efficiency program implementation plans. In its January 16, 2009 Order, the Commission directed Staff to provide definitions for the budget categories to be used in the preparation of these plans (See Order Approving "Fast Track" Utility-Administered Electric Energy Efficiency Program With Modification, at page 11). These categories are provided to promote consistency in budget construction and reporting among the utility plans.

Companies should identify whether each cost item is to be recovered through the SBC surcharge, base rates, or other recovery mechanism (e.g., monthly adjustment charges).

¹⁰An application is *processed* once the PA has reviewed the application and made a decision whether to approve the incentive payment to the customer. Once the decision has been made to pay the incentive to the customer, these funds and their associated energy and demand impacts become "Committed."

¹¹The application is *approved* once the decision has been made to pay the incentive to the customer. Note that these funds and their associated energy and demand impacts become "Committed" once this decision is made. Also note that for programs in which there are cases in which an application could be received, processed, and approved all in one day, then a "1" would be counted for each step in the tracking lifecycle.

¹²See *CO₂ Reduction Values* tab.

Utility Notes:

¹³ Portfolio Costs are not included in the program budget or actual costs. Consistent with the Companies' July 9, 2009 letter to the Secretary in Cases 07-M-0548 et al. ("July 9 letter") and the Companies' prior and subsequent energy efficiency program submittals, Portfolio Costs are incremental and are incurred as a result of the Companies' ongoing active participation in the New York State Public Service Commission's ("Commission") energy efficiency proceedings. Portfolio Costs allow the Companies to jointly provide efficient support for the complete suite of specific energy efficiency programs ultimately approved by the Commission.

¹⁴ Incentives and services costs are reported based on Company payment of invoices received from program implementation contractors for incentive payments made to program participants. They will thus lag the actual issuance of incentive payments to program participants.

¹⁵ Impacts are calculated using actual installed measure information for all measures.

¹⁶ All program costs identified in this section are recovered through the SBC surcharge unless otherwise noted.

¹⁷ Information presented here may include changes to previously filed monthly scorecard tables based on: review of additional information, reconsideration of eligibility decisions made by the implementation contractor during prior reporting periods, or other factors.

¹⁸ Data contained in these fields reflects the most recent month's expenditures in the respective category, as reported in the companies' accounting systems, not "to date" information.

The annual savings are sometimes the result of annualizing estimated savings that are based on data that cover less than one year. Acquired kWh savings are defined as those savings that reported by the program administrator in program tracking databases and for which a rebate check has been sent to the participant on a specific date.</p> <p>⁴Regardless of the month in which a measure is installed within a given calendar year, the program is credited with the associated savings for the entire year.</p> <p>⁵Program Administrators should make a best estimate of the annual goal even though the goal might in some cases cover two calendar years. Also, Staff wants administrators to try to be as accurate as possible in determining the monthly goals but does not want to mandate monthly goals, at least initially.</p> <p>⁶ Peak is defined uniquely for each utility.</p> <p>⁷The lifecycle savings are tracked beginning in the year in which a given measure was installed. Over the period 2008-2015, PA's must take into account the fact that savings from measures installed early in the period will vanish at the end of their useful life before the end of 2015. Thus, the lifecycle impacts acquired to date will differ for each month as a function of adding savings from measures installed in a given month and savings from measures installed earlier in the funding cycle that have reached the end of their useful life are no longer accumulated.</p> <p>⁸ Committed savings are defined as those for which funds have been encumbered by not yet spent. When the funds are spent (i.e., a rebate check has been sent to the participant on a specific date), the savings are then considered "acquired." Staff would like to see the program administrator's best <i>estimate</i> of what they have committed. Program administrators should forecast as accurately as possible and forecasts should get more precise with program experience, i.e., the difference between achieved and committed should narrow over time.</p>	

⁹These are the budget categories to be used by companies when submitting the required energy efficiency program implementation plans. In its January 16, 2009 Order, the Commission directed Staff to provide definitions for the budget categories to be used in the preparation of these plans (See Order Approving "Fast Track" Utility-Administered Electric Energy Efficiency Program With Modification, at page 11). These categories are provided to promote consistency in budget construction and reporting among the utility plans.

Companies should identify whether each cost item is to be recovered through the SBC surcharge, base rates, or other recovery mechanism (e.g., monthly adjustment charges).

¹⁰An application is *processed* once the PA has reviewed the application and made a decision whether to approve the incentive payment to the customer. Once the decision has been made to pay the incentive to the customer, these funds and their associated energy and demand impacts become "Committed."

¹¹The application is *approved* once the decision has been made to pay the incentive to the customer. Note that these funds and their associated energy and demand impacts become "Committed" once this decision is made. Also note that for programs in which there are cases in which an application could be received, processed, and approved all in one day, then a "1" would be counted for each step in the tracking lifecycle.

¹²See *CO₂ Reduction Values* tab.

Utility Notes:

¹³ Portfolio Costs are not included in the program budget or actual costs. Consistent with the Companies' July 9, 2009 letter to the Secretary in Cases 07-M-0548 et al. ("July 9 letter") and the Companies' prior and subsequent energy efficiency program submittals, Portfolio Costs are incremental and are incurred as a result of the Companies' ongoing active participation in the New York State Public Service Commission's ("Commission") energy efficiency proceedings. Portfolio Costs allow the Companies to jointly provide efficient support for the complete suite of specific energy efficiency programs ultimately approved by the Commission.

¹⁴ Incentives and services costs are reported based on Company payment of invoices received from program implementation contractors for incentive payments made to program participants. They will thus lag the actual issuance of incentive payments to program participants.

¹⁵ Impacts are calculated using actual installed measure information for all measures.

¹⁶ All program costs identified in this section are recovered through the SBC surcharge unless otherwise noted.

¹⁷ Information presented here may include changes to previously filed monthly scorecard tables based on: review of additional information, reconsideration of eligibility decisions made by the implementation contractor during prior reporting periods, or other factors.

¹⁸ Data contained in these fields reflects the most recent month's expenditures in the respective category, as reported in the companies' accounting systems, not "to date" information.

Program Administrator (PA) and Program ID¹	RG&E Non-Residential Commercial & Industrial Rebate Program
Program Name	RG&E Non-Residential Commercial & Industrial CUSTOM Program
Program Type²	Custom GAS Rebate
Total Acquired First-Year Impacts This Month^{3,15}	
Net first-year annual kWh acquired this Month ⁴	NA
Monthly Net kWh Goal (based on net first-year annual ⁵ kWh Goal)	NA
Percent of Monthly Net kWh Goal Acquired	NA
Net Peak ⁶ kW acquired this Month	NA
Monthly Net Peak kW Goal	NA
Percent of Monthly Peak kW Goal Acquired	NA
Net First-year annual therms acquired this month	0
Monthly Net Therm Goal	18,071
Percent of Monthly Therm Goal Acquired	0.00%
Net Lifecycle kWh acquired this month	NA
Net Lifecycle therms acquired this month	0
Total Acquired Net First-Year Impacts To Date^{15,17}	
Net first-year annual kWh acquired to date ¹⁵	NA
Net first-year annual kWh acquired to date as a percent of annual goal	NA
Net first-year annual kWh acquired to date as a percent of 8-year goal	NA
Net cumulative kWh acquired to date	NA
Net utility peak kW reductions acquired to date	NA
Net utility peak kW reductions acquired to date as a percent of utility annual goal	NA
Net utility peak kW reductions acquired to date as a percent of 8-year goal	NA
Net NYISO peak kW reductions acquired to date	NA
Net first-year annual therms acquired to date	0
Net first-year annual therms acquired to date as a percent of annual goal	0.00%
Net first-year annual therms acquired to date as a percent of 8-year goal	NA
Net cumulative therms acquired to date	0
Total Acquired Lifecycle Impacts To Date^{7,15,17}	
Net Lifecycle kWh acquired to date	NA
Net Lifecycle therms acquired to date	0
Committed⁸ Impacts (not yet acquired) This Month¹⁵	
Net First-year annual kWh committed this month	NA
Net Lifecycle kWh committed this month	NA
Net Utility Peak kW committed this month	NA
Net first-year annual therms committed this month	0
Net Lifecycle therms committed this month	0
Funds committed at this point in time	\$0
Overall Impacts (Acquired & Committed)¹⁵	
Net first-year annual kWh acquired & committed this month	NA
Net utility peak kW acquired & committed this month	NA
Net First-year annual therms acquired & committed this month	0

Costs^{9,16}	
Total program budget	\$553,100
General Administration ¹³	Portfolio
Program Planning ¹³	Portfolio
Program Marketing ¹⁸	\$135
Trade Ally Training ¹⁸	\$57
Incentives and Services ^{14,18}	\$0
Direct Program Implementation ¹⁸	\$1,566
Program Evaluation ¹⁸	\$202
Total expenditures to date ¹⁷	\$19,777
Percent of total budget spent to date	3.58%
Participation^{15,17}	
Number of program applications received to date	2
Number of program applications processed to date	2
Number of processed applications approved to date	0
Percent of applications received to date that have been processed	100.00%
DPS Staff Notes:	
<p>¹DPS Staff needs to work with utilities and NYSERDA to develop a Program ID naming convention. However, a Program ID number is not required for the first report. Note that when developing program ID naming conventions, utilities would like to minimize computer programming/reporting costs that they might incur if the proposed naming conventions are complex or the utility's current naming conventions require modification to Staff's proposed format.</p> <p>²There is not currently a consistent list of program type but individual categories for common use by administrators could be developed</p> <p>³First-year savings are defined as the annual savings expected from a given measure in the first year after installation (See Definition #1 in <i>Savings Definitions</i> Tab). The annual savings are sometimes the result of annualizing estimated savings that are based on data that cover less than one year. Acquired kWh savings are defined as those savings that reported by the program administrator in program tracking databases and for which a rebate check has been sent to the participant on a specific date.</p> <p>⁴Regardless of the month in which a measure is installed within a given calendar year, the program is credited with the associated savings for the entire year.</p> <p>⁵Program Administrators should make a best estimate of the annual goal even though the goal might in some cases cover two calendar years.
