Cablevision has taken several steps to improve system operation and has achieved several goals, outlined below:

1. Cablevision founded in 1973 began offering cable TV service to 1,500 homes in Hicksville. Today Cablevision serves more than 750,000 homes across Long Island employs more than 5,000 Islanders. OptimumTV – Cablevision's fiber backbone supported system, is the leading technology in providing superior picture quality, increased channel capacity and expanded programming services. Programming on Optimum includes local proprietary programming like News 12 and News12 Traffic & Weather, MSG Varsity High School programming.
2. Cablevision continues to upgrade and enhance its state-of-the-art fiber optic cable system and head-end. The system servicing the residents in the Village was completed in 1999 and continues to be upgraded. With the use of fiber technology, subscribers receive improved picture quality, virtually uninterrupted by weather-related problems and Cablevision's "iO" – interactive Optimum television. iO provides the opportunity for additional channels including video on demand and HD programming. Cablevision has raised the standard of excellence in virtually every area of service, from signal delivery to customer service. To provide a more reliable system, Cablevision's Stand by Power/Status Monitoring capabilities keep the service in operation in the event of a power failure. 24-hour status monitoring provides the technicians with up-to-the-minute information on any power-related problem.
3. Cablevision has implemented an extensive preventative maintenance program. This program, in conjunction with a head-end upgrade effort, has allowed us to reduce our service call ratio dramatically to .37 per subscriber per year.
4. The battery operated stand-by power for the Long Island System keeps the cable system operating for approximately 4 hours in the event of a power failure. As a result, Cablevision has experienced a significant reduction in power related outages, resulting in a reduction in subscriber cable outage time.
5. Cablevision's 750 MHz fiber optic network telecommunications system stretches across Long Island improving audio visual quality and reducing outages. The fiber optic head-end located at the Hicksville Technical Center is a state-of-the art operation and serves as a model for the cable industry.
6. Cablevision implemented an Installation Repair Program within the system. This program has decreased the number of multiple trips to customers and has increased time appointments to allow for four-hour windows.
7. Cablevision is committed to promoting a partnership between cable and the schools in its community. To reinforce that commitment, Cablevision provides up to five free cable television outlets and one free Internet outlet to every Long Island school.
8. Cablevision supports hundreds of Long Island community based organizations through cash contributions and/or the production and airing of public service announcements and community service programming on its cable system.
