Niagara Mohawk Power Corporation d/b/a National Grid (“National Grid” or the “Company”) submits this capital investment plan status report (“Report”) covering the period October 1, 2014 through December 31, 2014 (“Q3 FY15”). Pursuant to the Commission’s March 15, 2013 Order in Case 12-E-0201,<sup>1</sup> the Company is to provide periodic updates to the Department of Public Service (“DPS”) concerning its capital expenditures and construction work. This Report describes the investment and work completed through Q3 FY15, includes budget variance reports, budget and schedule change information for major projects, comparisons of budgets versus actual capital expenditures, status of specific installation commitments, in-year portfolio management of projects and programs, and compares actual spending against FY15 investment levels agreed in Case 12-E-0201.

Overall, through Q3 FY15, the Company spent \$345.4 million (76% of the \$452.4 million total FY15 investment plan) on electric transmission, sub-transmission and distribution capital investment. In Q3 FY15, the Company spent \$129.9 million compared to expected Q3 investment of \$120.3 million. Investment in Q3 by system is detailed below:

- Transmission FY15 actual spending for Q3 was \$38.6 million, which was below expected Q3 investment by \$13.0 million, or 25%. More detail is found in Section II of this Report.
- Sub-Transmission FY15 actual spending for Q3 was \$6.8 million, which was below expected Q3 investment by \$1.5 million, or 18%. More detail is found in Section III of this Report.
- Distribution FY15 actual spending for Q3 was \$84.5 million, which was above expected Q3 investment by \$24.1 million, or 40%. More detail is found in Section IV of this Report.

Sections II through IV of the Executive Summary provide information regarding significant projects completed, primary drivers for current capital investment, and address specific project variations for Transmission, Sub-Transmission and Distribution system projects. A summary of Q3 and YTD FY15 actual and planned spending is provided in the table below (\$000).

<sup>1</sup> Case 12-E-0201, Proceeding on Motion of the Commission as to the Rates, Charges, Rules and Regulations of Niagara Mohawk Power Corporation d/b/a National Grid for Electric Service, *Order Approving Electric and Gas Rate Plans in Accord with Joint Proposal* (issued and effective March 15, 2013).

	FY15 Capital Investment Plan (CIP) Level	FY15 Q3 Actual Spending	FY15 Q3 Expected Spend	Variance of Actual Q3 Spend to Expected	YTD FY15 Actual Spend	YTD FY15 Expected Spend	Variance of YTD FY15 Actual to Expected Spend
Transmission	\$ 176,300	\$ 38,584	\$ 51,595	\$ (13,011)	\$ 92,247	\$ 133,780	\$ (41,533)
Sub-Transmission	\$ 32,775	\$ 6,818	\$ 8,355	\$ (1,537)	\$ 21,989	\$ 24,340	\$ (2,351)
Distribution	\$ 243,279	\$ 84,500	\$ 60,365	\$ 24,135	\$ 231,193	\$ 189,964	\$ 41,229

The total FY15 CIP budget is \$452.4 million, which is \$5.1 million greater than the FY15 budget established in the December 7, 2012 Joint Proposal (“JP”) in Case 12-E-0201. This increase is due to the shift of \$5.1 million from the FY16 transmission budget to FY15 to accommodate the advancement of Five Mile Road station schedule and the purchase of a spare 115kV phase angle regulator for Inghams. The FY16 budget was correspondingly lowered by \$5.1 million.<sup>2</sup>

Distribution and Transmission Budget Change Report					12/31/2014
As of October 1, 2014 through December 31, 2014					
Summary of Projects That Required Approval For Additional Spend					
Project Name	Funding Number ID Number	Latest Project Sanction	Revised Sanction	Comments	
Solvay 22 Line – 34.5kV Refurbishment	C046685	\$1,236,000	\$1,575,000	Installation of additional swamp matting due to saturated conditions at 23 structure locations. Access to these structures was originally planned to be during frozen conditions.	
Porter 115kV Substation Upgrade	C028686	\$18,540,000	\$21,397,000	The root cause for the key variations is the project schedule. The deadline for completing the work at this station is December 2014. Completion of Preliminary Engineering was delayed, to address construction safety concerns, which put the December 2014 completion deadline in jeopardy.	
FR Summit Park Breaker R5540 DTT	C051139	\$131,000	\$180,000	Issues and delays at generation facility end of the DTT equipment, including telecom, resulted in additional manhours for testing and commissioning of the systems.	
*CR - Tully Ctr 53 Woodmancy Rd	C049713	\$575,000	\$973,885	Revised estimate is higher than original DOA by approximately \$399 k. Revised estimate is a "project grade estimate" based on a more stringent review of scope and resources, whereas the original estimate was based on a Preliminary level scope only. Detailed scope based on final engineering is: Rebuilding and conversion of 14,000' of OH distribution facilities of the Tully Center 53 feeder and installation of mid-span poles where necessary to accommodate the larger conductor from Pole 20 near Dutch Hill Rd to Pole 33-1 on Woodmancy Rd. 48 poles, 14,000' Bare AL 1/0 wire, 27,907' 1/0 AWG cable, matting required.	
West Adams R520 breaker replacement	C054506	\$123,200	\$195,264	The revised estimate is higher than the original DOA by \$72,064. This project was a result of a damage/failure >\$100K on 3/29/2014, requiring immediate response to address the issue, utilizing a conceptual scope to develop the initial estimate to replace the failed R520 breaker. The revised estimate is based upon actual scope completed to replace the failed R520 breaker and purchase a replacement spare breaker. Project was placed in-service 7/18/2014.	
Autumn Ridge, Phase 2, Watertown NY	C051469	\$145,503	\$167,000	Revised estimate is higher than most recent DOA by approximately \$22k. The overrun was caused by contractor change from Pinto to Syracuse Utilities at construction start. Syracuse Utilities came in about \$17k more than Pinto's estimate.	
NR-T.I.81452-Cross Island Rd	C022912	\$816,085	\$726,599	Revised estimate is lower than original DOA by approximately \$89 k. Revised estimate is a "project grade estimate" based on a more stringent review of scope and resources, whereas the original estimate was based on a Preliminary level scope only. Detailed scope based on final engineering is: Rebuild and convert 11,000' of single phase 4.8kV along Cross Island Rd to the intersection of Waterson Rd. First 9,000' rebuilt to 3 phase, remaining 2,000' 2 phase. 53 poles, 60,000' bare aluminum 1/0 AAAC wire, 14 OH transformers	
CR_Milton Avenue 26657-Overload	C049184	\$240,000	\$262,216	Revised estimate is higher than original DOA by approximately \$22 k. Revised estimate is a "project grade estimate" based on a more stringent review of scope and resources, whereas the original estimate was based on a Preliminary level scope only. Detailed scope based on final engineering is: Replacement of existing feeder 26657 and 26658 cables from Milton substation to riser pole per loading. 2,150' 15 kV 1000 KCMIL copper cable.	
CR- LHH 44 2012 NYS PSC action item	CD00987	\$191,406	\$258,901	Revised estimate is higher than original DOA by approximately \$67 k. Revised estimate is a "project grade estimate" based on a more stringent review of scope and resources, whereas the original estimate was based on a Preliminary level scope only. Detailed scope based on final engineering is: Reconductor approx. 5,500' of 2 - #6 A CCW Primary with 2 - 1/0 AL Treewire, 15 poles	
CR- Reconductor 12861	C048591	\$262,500	\$318,467	Revised estimate is higher than original DOA by approximately \$56 k. Revised estimate is a "project grade estimate" based on a more stringent review of scope and resources, whereas the original estimate was based on a Preliminary level scope only. Detailed scope based on final engineering is: Reconductor 1300' rear lot of 3-#4 CU to 3-1/0 AL, I-81 crossing, extend 1/0 N, 13 poles, 1-15kV 3 ph loadbreak switch	
EJ West 51 - Scofield Rd. 53 Single	CD00256	\$101,061	\$114,000	Revised estimate is higher than DOA by approximately \$13K. Largely due to the Harlan invoice had additional charges applied against this in change orders - the Actuals vs the Estimated Harlan charges are \$10,771.51 higher than originally estimated. Project is a miss due to the Harlan actual charges being higher (along with associated sales tax and capital OH charges) due to needing to install rock anchors on poles 17 & 19 and needing to hand dig the secondary riser on pole 18 & 20.	
CR- Nile 51 Glen Cove reconductorin	CD00917	\$654,778	\$898,308	Revised estimate is higher than DOA by approximately \$244K. This overrun is due to FY14 and FY15 adjustment entries in the amount of approximately \$240K applied to the actual project spending. The adjustment entries were reviewed to ensure appropriate allocation of costs to projects. These adjustments were necessary to correct capital, removal and operation expense charges incorrectly classified following the implementation of SAP.	
Bethlehem L10, L14 Relay Upgrade	C045624	\$517,000	\$755,600	Revised estimate is higher than original DOA by approximately \$239k. Revised estimate is a "project grade estimate" based on a more stringent review of scope and resources, whereas the original estimate was a design and engineering estimate only.	
NR_T.I. 81455-Mils Road-Overloaded.	CD01135	\$170,250	\$210,000	Revised estimate is higher than most recent DOA by approximately \$40K. Revised estimate is a project grade estimate based on a more stringent review of scope and resources. Specifically, additional labor and equipment charges; flex track for the work; 80 hrs. In addition, in FY14, adjustment entries were made in the amount of \$27,919 applied to the actual project spending. The adjustment entries were reviewed to ensure appropriate allocation of costs to projects. These adjustments were necessary to correct capital, removal and operation expense charges	
Orangeville Substation - Upgrade By	CD00703	\$69,307	\$99,787	The revised estimate is higher than the original DOA by \$30,450. The original DOA request was based on the estimated cost for engineering and procurement of major equipment. This revised estimate is based on the "Project Grade Estimate" which reflects the final engineering scope and includes the cost to construct, energize and project closeout.	
Trinity 16452 - Myrtle Ave Conversi	C046427	\$400,000	\$342,135	Revised estimate is lower than original DOA by approximately \$58k. Revised estimate is a "project grade estimate" based on a more stringent review of scope and resources, whereas the original estimate was a design and engineering estimate only. Detailed scope based on final engineering is: Convert existing 4.16kV to 3 phase 13.2kV. - Install/replace 31 poles, Install 1500' Secondary 1/0 Triplex, 4000' 336.4 Cable, 37 OH Transformers, 2 Padmount Transformers
