ATTACHMENT H

EXPLANATORY NOTES TO ATTACHMENT H

- 1. This Attachment H consists of: (a) a Department of Environmental Conservation "Full Environmental Assessment Form" ("EAF") for Verizon's offering of cable service in Pelham Manor, New York, with Part 1 filled in; (b) an EAF Addendum providing certain additional background information; and (c) exhibits to the Addendum, including maps showing environmentally relevant features of the franchise area and a list of sites included in the SPHINX database of historic sites, as described below.
- 2. The Attachment is submitted without prejudice to Verizon's positions that:
 (a) the activities for which it seeks approval in this proceeding are not "actions" under the State Environmental Quality Review Act ("SEQRA"), and that therefore no EAF is required; and (b) if an EAF is required in this case, a short-form EAF will suffice.
- 3. The EAF and the EAF Addendum are based on information in Verizon's possession or available to us through research in readily available sources. Beyond such sources, we have not undertaken any "new studies, research or investigation."
- 4. Historic site information was derived from the SPHINX database of the New York State Historic Preservation Office (*see* http://www.nysparks.state.ny.us/shpo/resources/ index.htm). Coastal area information was obtained from the New York State Geographic Information Systems Clearinghouse website (*see* http://www.nysgis.state.ny.us/gisdata/ inventories/details.cfm?DSID=317), as was flood plain data (*see* http://www.nysgis.state.ny.us/gisdata/inventories/details.cfm?DSID=246). Information on wetlands locations was obtained from the U.S. Fish & Wildlife Service National Wetlands Inventory (*see* http://www.fws.gov/nwi/) and the Cornell University Geospatial Information Repository (*see* http://cugir.mannlib.cornell.edu/mapbrowse.jsp?series=counties). Information on "critical environmental areas" was obtained from the website of the State Department of Environmental Conservation (http://www.dec.state.ny.us/website/dcs/seqr/cea/index.html). Information on National Natural Landmarks was obtained from the website of the National Park Service (*see* http://www.nature.nps.gov/nnl/Registry/USA_Map/States/NewYork/new_york.cfm).
- 5. In response to several questions in Part 1, Verizon has indicated that the question is "Not Applicable" ("N/A") to the confirmation that is the subject of the Petition. The activities to be undertaken pursuant to the franchise for which confirmation is sought involve the delivery of video programming and, thus, do not have a definite location or "area." To the extent any construction including line extensions, placement of drop wires, extensions, and repairs takes place after the franchise becomes effective, all of the locations within the franchise area at which such activity will occur cannot be known in advance.

-

¹ See Full Environmental Assessment Form at 2.

The information provided for contiguity to historic sites, etc., has been provided with respect to Verizon's FTTP facilities in the franchise area, even though it is Verizon's position that such facilities have been constructed pursuant to independent permissions and authorities.

617.20

Appendix A State Environmental Quality Review FULL ENVIRONMENTAL ASSESSMENT FORM

Purpose: The full EAF is designed to help applicants and agencies determine, in an orderly manner, whether a project or action may be significant. The question of whether an action may be significant is not always easy to answer. Frequently, there are aspects of a project that are subjective or unmeasurable. It is also understood that those who determine significance may have little or no formal knowledge of the environment or may not be technically expert in environmental analysis. In addition, many who have knowledge in one particular area may not be aware of the broader concerns affecting the question of significance.

The full EAF is intended to provide a method whereby applicants and agencies can be assured that the determination process has been orderly, comprehensive in nature, yet flexible enough to allow introduction of information to fit a project or action.

Full EAF Components: The full EAF is comprised of three parts:

We

- Part 1: Provides objective data and information about a given project and its site. By identifying basic project data, it assists a reviewer in the analysis that takes place in Parts 2 and 3.
- Part 2: Focuses on identifying the range of possible impacts that may occur from a project or action. It provides guidance as to whether an impact is likely to be considered small to moderate or whether it is a potentially-large impact. The form also identifies whether an impact can be mitigated or reduced.
- Part 3: If any impact in Part 2 is identified as potentially-large, then Part 3 is used to evaluate whether or not the impact is actually important.

THIS AREA FOR LEAD AGENCY USE ONLY

DETERMINATION OF SIGNIFICANCE -- Type 1 and Unlisted Actions

Upon review of t	ons of EAF completed for this project: he information recorded on this EAF (Parts 1 the magnitude and importance of each impa	Part 1 and 2 and 3 if appropria	Part 2 rte), and any other suppor mined by the lead agency	Part 3 rting information, and y that:
A.	The project will not result in any large and significant impact on the environment, the	d important impact(s) and refore a negative declara	d, therefore, is one which tion will be prepared.	h will not have a
В.	Although the project could have a signification this Unlisted Action because the mitigation a CONDITIONED negative declaration will	ation measures described	ment, there will not be a in PART 3 have been re	significant effect quired, therefore

PART 1--PROJECT INFORMATION Prepared by Project Sponsor

NOTICE: This document is designed to assist in determining whether the action proposed may have a significant effect on the environment. Please complete the entire form, Parts A through E. Answers to these questions will be considered as part of the application for approval and may be subject to further verification and public review. Provide any additional information you believe will be needed to complete Parts 2 and 3.

It is expected that completion of the full EAF will be dependent on information currently available and will not involve new studies, research or investigation. If information requiring such additional work is unavailable, so indicate and specify each instance.

Activities undertaken by Verizon pursuant to the authority aw	arded by the franchise.		······································

Please Complete Each Question--Indicate N.A. if not applicable

A. SITE DESCRIPTION

Physical setting of overall project, both developed and undeveloped areas. Present Land Use: Urban Industrial Commercial ✓ Residential (suburban) Rural (non-farm) Forest Agriculture Other . * Although Verizon does not believe that this question applies to the activities at ssue here, it has determined at Staff's request that its FTTP facilities constructed n the franchise area to date have an approximate length of 0.6 miles. The width Total acreage of project area: _____ acres. of the right-of-way varies by location, and Verizon cannot readily determine at this time the average width (and therefore the area) of the right-of-way used by Verizon. APPROXIMATE ACREAGE Meadow or Brushland (Non-agricultural) __ acres __ acres Forested acres acres Agricultural (Includes orchards, cropland, pasture, etc.) acres acres Wetland (Freshwater or tidal as per Articles 24,25 of ECL) acres acres Water Surface Area _ acres Unvegetated (Rock, earth or fill) acres acres Roads, buildings and other paved surfaces acres _ acres Other (Indicate type) _ acres _ acres What is predominant soil type(s) on project site? N/A a. Soil drainage: Well drained % of site Moderately well drained % of site. Poorly drained _____% of site If any agricultural land is involved, how many acres of soil are classified within soil group 1 through 4 of the NYS Land Classification System? _____ acres (see 1 NYCRR 370). Are there bedrock outcroppings on project site? N/A Yes What is depth to bedrock _____ (in feet) ** Parts of Verizon's FTTP network in the franchise area pass historic sites. Approximate percentage of proposed project site with slopes: N/A See Addendum. 10- 15%____% 15% or greater _____% Is project substantially contiguous to, or contain a building, site, or district, listed on the State or National Registers of Historic Places? ■ Yes ** Is project substantially contiguous to a site listed on the Register of National Natural Landmarks? What is the depth of the water table? (in feet) N/A Is site located over a primary, principal, or sole source aguifer? 10. Do hunting, fishing or shell fishing opportunities presently exist in the project area? N/A Yes

11. Does project site contain any species of plant or animal life that is identified as threatened or endang	ered? Yes No N/
According to:	
Identify each species:	
	•
12. Are there any unique or unusual land forms on the project site? (i.e., cliffs, dunes, other geological for	ormations?
Yes No N/A	
Describe:	
13 is the project site presently used by the community or solid-balance.	nmunity or neighborhood as an open space or recreation area? nown to be important to the community? Yes No N/A N/A hich it is tributary
Yes No N/A	area?
If yes, explain:	wanta a sa
14. Does the present site include scenic views known to be important to the community?	No N/A
15 Strooms within as analyze and a surface a	
15. Streams within or contiguous to project area: N/A	
Name of Stream and name of River to which it is tributary	
	WARRANT TO THE TAXABLE PROPERTY OF THE PROPERT
16. Lakes, ponds, wetland areas within or contiguous to project area: See Addendum.	
b. Size (in acres):	
	,

17	. Is the site served by existing public utilities?
	a. If YES, does sufficient capacity exist to allow connection?
	b. If YES, will improvements be necessary to allow connection?
18	Is the site located in an agricultural district certified pursuant to Agriculture and Markets Law, Article 25-AA, Section 303 and 304? Yes No
19	. Is the site located in or substantially contiguous to a Critical Environmental Area designated pursuant to Article 8 of the ECL, and 6 NYCRR 617? Yes No * See Addendum
20	. Has the site ever been used for the disposal of solid or hazardous wastes? Yes No N/A
В.	Project Description
1.	Physical dimensions and scale of project (fill in dimensions as appropriate).
	a. Total contiguous acreage owned or controlled by project sponsor: N/A acres.
	b. Project acreage to be developed: N/A acres initially; N/A acres ultimately.
	c. Project acreage to remain undeveloped: N/A acres.
	d. Length of project, in miles: * (if appropriate) * See response to Item 2 on Page 3.
	e. If the project is an expansion, indicate percent of expansion proposed. N/A %
	f. Number of off-street parking spaces existing N/A; proposed N/A
	g. Maximum vehicular trips generated per hour: N/A (upon completion of project)?
	h. If residential: Number and type of housing units: N/A
	One Family Two Family Multiple Family Condominium
	Initially
	Ultimately
	i. Dimensions (in feet) of largest proposed structure:N/A height;N/A width;N/A length.
	j. Linear feet of frontage along a public thoroughfare project will occupy is? N/A ft.
2.	How much natural material (i.e. rock, earth, etc.) will be removed from the site? N/A tons/cubic yards.
3.	Will disturbed areas be reclaimed Yes No No
	a. If yes, for what intended purpose is the site being reclaimed?
	b. Will topsoil be stockpiled for reclamation? Yes No
	c. Will upper subsoil be stockpiled for reclamation?
1.	How many acres of vegetation (trees, shrubs, ground covers) will be removed from site?

5.	will any mature rorest (over 100 years old) or other locally-important vegetation be removed by this pr	oject?
6.		* Although it is Verizon's position that any further
7.	If mouthing the control of the contr	FTTP construction activity in the franchise area is
		being undertaken pursuant to independent authority,
	b. Anticipated date of commencement phase 1: month year, (including demolition) ^r	rather than pursuant to the
	The state of the s	franchise, Verizon expects to complete its build out as
		required by the franchise.
8.	. Will blasting occur during construction? Yes No	
9.	Number of jobs generated: during constructionN/A; after project is complete N/A	
10	O. Number of jobs eliminated by this project N/A	
11	1. Will project require relocation of any projects or facilities? Yes No	
	If yes, explain:	
12	2. Is surface liquid waste disposal involved? Yes No	
	a. If yes, indicate type of waste (sewage, industrial, etc) and amount	
	b. Name of water body into which effluent will be discharged	
13.	Is subsurface liquid waste disposal involved? Yes No Type	·
14.	. Will surface area of an existing water body increase or decrease by proposal? Yes No	
	If yes, explain:	
15.	. Is project or any portion of project located in a 100 year flood plain?	
16.	. Will the project generate solid waste? Yes No	
	a. If yes, what is the amount per month? tons	
	b. If yes, will an existing solid waste facility be used? Yes No	
	c. If yes, give name; location	
	d. Will any wastes not go into a sewage disposal system or into a sanitary landfill?	0

е.	If yes, explain:
L_	
17.	. Will the project involve the disposal of solid waste? Yes No
	a. If yes, what is the anticipated rate of disposal? tons/month.
	b. If yes, what is the anticipated site life? years.
18.	Will project use herbicides or pesticides? Yes
19.	Will project routinely produce odors (more than one hour per day)?
	Will project produce operating noise exceeding the local ambient noise levels? Yes No
	Will project result in an increase in energy use? Yes No
	If yes, indicate type(s)
	If water supply is from wells, indicate pumping capacity <u>N/A</u> gallons/minute.
	Total anticipated water usage per day <u>N/A</u> gallons/day.
4.	Does project involve Local, State or Federal funding? Yes No
lf <u>y</u>	yes, explain:

If the action is in the Coastal Area, and you are a state agency, complete the Coastal Assessment Form before proceeding with this assessment.

PART 2 - PROJECT IMPACTS AND THEIR MAGNITUDE

Responsibility of Lead Agency

General Information (Read Carefully)

- In completing the form the reviewer should be guided by the question: Have my responses and determinations been reasonable? The reviewer is not expected to be an expert environmental analyst.
- ! The Examples provided are to assist the reviewer by showing types of impacts and wherever possible the threshold of magnitude that would trigger a response in column 2. The examples are generally applicable throughout the State and for most situations. But, for any specific project or site other examples and/or lower thresholds may be appropriate for a Potential Large Impact response, thus requiring evaluation in Part 3.
- ! The impacts of each project, on each site, in each locality, will vary. Therefore, the examples are illustrative and have been offered as guidance. They do not constitute an exhaustive list of impacts and thresholds to answer each question.
- ! The number of examples per question does not indicate the importance of each question.
- ! In identifying impacts, consider long term, short term and cumulative effects.

Instructions (Read carefully)

- a. Answer each of the 20 questions in PART 2. Answer Yes if there will be any impact.
- b. Maybe answers should be considered as Yes answers.
- c. If answering **Yes** to a question then check the appropriate box(column 1 or 2)to indicate the potential size of the impact. If impact threshold equals or exceeds any example provided, check column 2. If impact will occur but threshold is lower than example, check column 1.
- d. Identifying that an Impact will be potentially large (column 2) does not mean that it is also necessarily **significant**. Any large impact must be evaluated in PART 3 to determine significance. Identifying an impact in column 2 simply asks that it be looked at further.
- e. If reviewer has doubt about size of the impact then consider the impact as potentially large and proceed to PART 3.
- f. If a potentially large impact checked in column 2 can be mitigated by change(s) in the project to a small to moderate impact, also check the **Yes** box in column 3. A **No** response indicates that such a reduction is not possible. This must be explained in Part 3.

		1 Small to Moderate Impact	2 Potential Large Impact	3 Can Impact Be Mitigated by Project Change
	Impact on Land			
	Proposed Action result in a physical change to the project			
site?	NO YES			
Ex	camples that would apply to column 2 Any construction on slopes of 15% or greater, (15 foot rise per 100 foot of length), or where the general slopes in the project area exceed 10%.			Yes No
•	Construction on land where the depth to the water table is less than 3 feet.			Yes No
•	Construction of paved parking area for 1,000 or more vehicles.		A CONTRACTOR OF THE CONTRACTOR	Yes No
•	Construction on land where bedrock is exposed or generally within 3 feet of existing ground surface.			Yes No
•	Construction that will continue for more than 1 year or involve more than one phase or stage.			Yes No
•	Excavation for mining purposes that would remove more than 1,000 tons of natural material (i.e., rock or soil) per year.			Yes No

			1 Small to Moderate Impact	2 Potential Large Impact	3 Can Impact Be Mitigated by Project Change
	•	Construction or expansion of a santary landfill.			Yes No
	•	Construction in a designated floodway.			Yes No
	•	Other impacts:			Yes No

	Small to Moderate Impact	Potential Large Impact	Can Impact Be Mitigated by Project Change
IMPACT ON PUBLIC HEALTH			
18. Will Proposed Action affect public health and safety? NO YES			
 Proposed Action may cause a risk of explosion or release of hazardous substances (i.e. oil, pesticides, chemicals, radiation, etc.) in the event of accident or upset conditions, or there may be a chronic low level discharge or emission. 			Yes No
 Proposed Action may result in the burial of "hazardous wastes" in any form (i.e. toxic, poisonous, highly reactive, radioactive, irritating, infectious, etc.) 			Yes No
 Storage facilities for one million or more gallons of liquefied natural gas or other flammable liquids. 			Yes No
 Proposed Action may result in the excavation or other disturbance within 2,000 feet of a site used for the disposal of solid or hazardous waste. 			Yes No
Other impacts:			Yes No
IMPACT ON GROWTH AND CHARACTER OF COMMUNITY OR NEIGHBORHOOD 19. Will Proposed Action affect the character of the existing community? NO YES			
 Examples that would apply to column 2 The permanent population of the city, town or village in which the project is located is likely to grow by more than 5%. 			Yes No
 The municipal budget for capital expenditures or operating services will increase by more than 5% per year as a result of this project. 			Yes No
 Proposed Action will conflict with officially adopted plans or goals. 			Yes No
Proposed Action will cause a change in the density of land use.			Yes No
 Proposed Action will replace or eliminate existing facilities, structures or areas of historic importance to the community. 			Yes No
 Development will create a demand for additional community services (e.g. schools, police and fire, etc.) 			Yes No

			1 Small to Moderate Impact	2 Potential Large Impact	3 Can Impact Be Mitigated by Project Change
	•	Proposed Action will set an important precedent for future projects.			Yes No
	•	Proposed Action will create or eliminate employment.			Yes No
	•	Other impacts:			Yes No
20.		nere, or is there likely to be, public controversy related to potential erse environment impacts?			

If Any Action in Part 2 Is Identified as a Potential Large Impact or If you Cannot Determine the Magnitude of Impact, Proceed to Part 3

Part 3 - EVALUATION OF THE IMPORTANCE OF IMPACTS

Responsibility of Lead Agency

Part 3 must be prepared if one or more impact(s) is considered to be potentially large, even if the impact(s) may be mitigated.

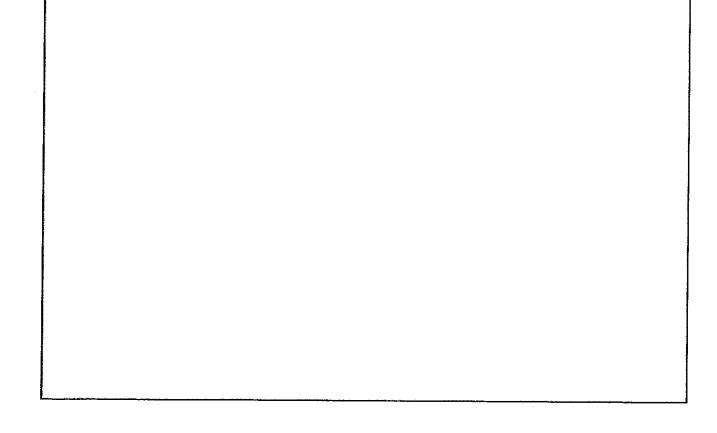

Instructions (If you need more space, attach additional sheets)

Discuss the following for each impact identified in Column 2 of Part 2:

- 1. Briefly describe the impact.
- 2. Describe (if applicable) how the impact could be mitigated or reduced to a small to moderate impact by project change(s).
- 3. Based on the information available, decide if it is reasonable to conclude that this impact is important.

To answer the question of importance, consider:

- ! The probability of the impact occurring
- ! The duration of the impact
- ! Its irreversibility, including permanently lost resources of value
- ! Whether the impact can or will be controlled
- ! The regional consequence of the impact
- ! Its potential divergence from local needs and goals
- ! Whether known objections to the project relate to this impact.

ADDENDUM TO ENVIRONMENTAL ASSESSMENT FORM RELATING TO CONFIRMATION OF A CABLE TELEVISION FRANCHISE FOR THE VILLAGE OF PELHAM MANOR (WESTCHESTER COUNTY), NEW YORK

Setting

The Village of Pelham Manor is located in the Town of Pelham in Westchester County. As of the 2000 Census, the Village had a population of 5,466 within a total area of 1.37square miles.

The Village is not within an agricultural district, nor is it substantially contiguous to a National Natural Landmark. The Village may contain or be substantially contiguous to critical environmental areas. A list of sites included in the SPHINX database of historic sites is attached. It is Verizon's policy to conform to all applicable laws and regulations in placing its facilities, including any special requirements that may be applicable to historic sites, districts, or landmarks.

The Village of Pelham Manor is located above aquifers. The Village is within a coastal area. It has designated wetlands areas and designated 100 year flood plains. Verizon's FTTP extensions and drop wires will be placed only to serve existing or future residences and businesses and will be consistent with physical arrangements for the provision of non-video communications services (voice, data), and other types of utility service, to such areas. Video programming will be delivered over existing distribution routes and supporting structures. Moreover, cable service is already provided within the franchise area by the incumbent, Cablevision. Thus, Verizon's construction activities would not impact otherwise undeveloped areas.

Four maps are included with this addendum. The first map shows the franchise area, tidal wetlands, and the coastal area boundary. The second map shows the freshwater wetlands, lakes and ponds. The third map shows the 100-year flood plains in the area. The fourth map shows the aquifers in the area.

Description of Potential Construction Activities

The Commission is being asked to approve the Village's award of a cable television franchise to Verizon. The franchise will enable Verizon to deliver video programming to subscribers over its FTTP network, which is also used for the provision of voice and data services. It is Verizon's position that the construction, extension, modification, and repair of the facilities comprising the FTTP network are independently authorized, do not require franchise authority, and are thus not included within any "action" (within the meaning of SEQRA) for which approval is sought in this proceeding. Nevertheless, at Staff's request, Verizon is

¹ Attached is a page from the State Department of Environmental Conservation web site that lists critical environmental areas designated by the County of Westchester. We do not know whether any of the County-designated areas (*e.g.*, certain watersheds) include land within the Village.

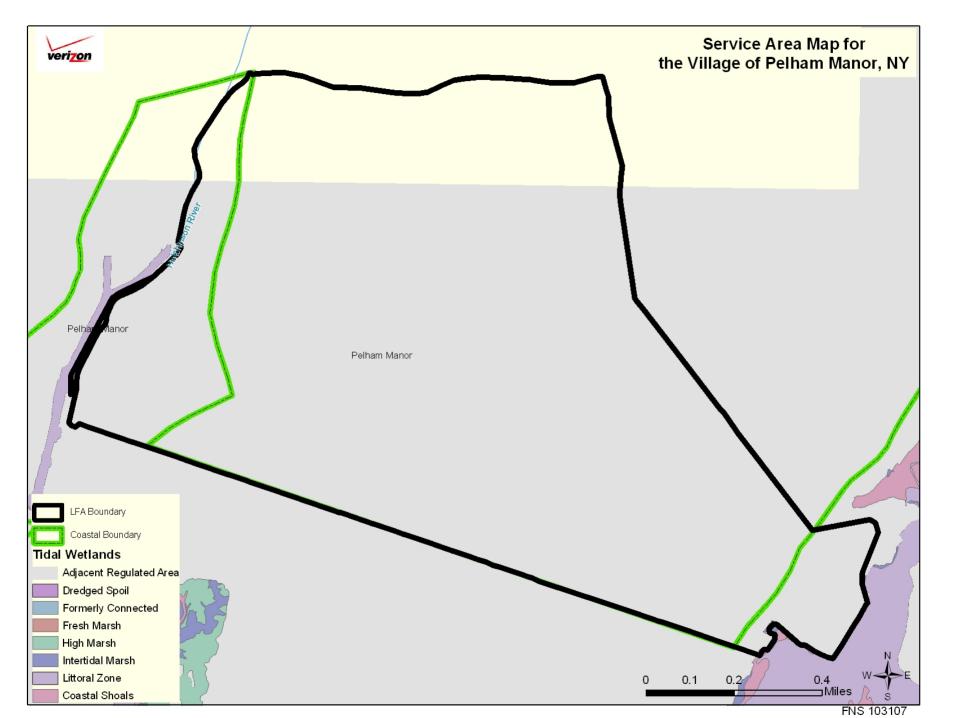

providing the following information concerning work on Verizon's FTTP facilities that may be undertaken in the Village subsequent to the Commission's approval of the franchise.

Extensions of Verizon's FTTP network may take place in the Village of Pelham Manor following the award of the franchise. FTTP construction in the Village's rights-of-way would relate to facilities that will also be used for Verizon's voice and data services. (Any equipment that is utilized exclusively for the provision of cable services in the Village will be located in Verizon's central offices.) Verizon has completed the construction of its FTTP network to approximately 84% of the current households in the franchise area.

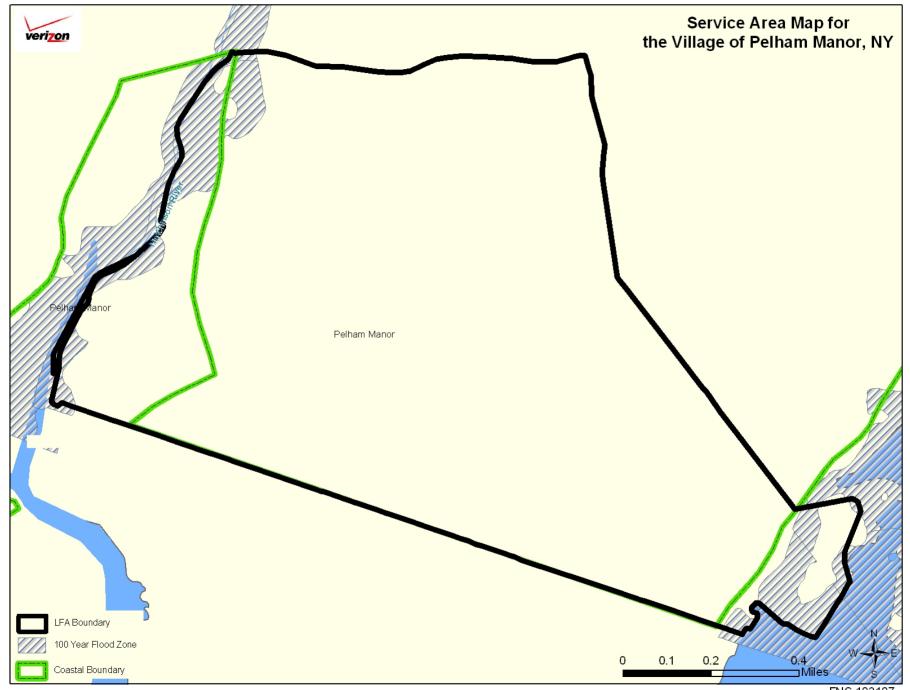

When a Verizon subscriber requests the FiOSSM voice, data, and/or video services that are available over the FTTP network, fiber drop wire is run to the subscriber's home. There are 1,909 households within the Village of Pelham Manor that could potentially be served with fiber drops.² In terms of the potential environmental impact of drop placement activities, the fiber drops that are associated with FTTP do not differ in any significant respect from the copper drops that Verizon routinely installs, maintains and on occasion replaces in connection with its current services. Moreover, fiber drops will be deployed to customers who request other FiOS services even if such customers do not elect to purchase FiOS video.

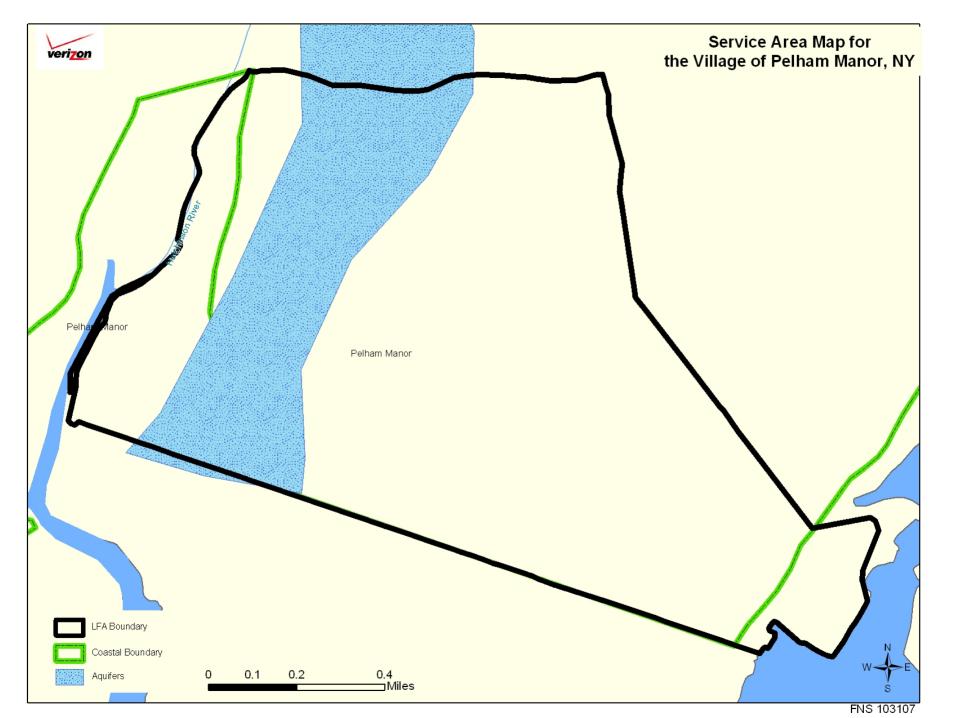

² In general, Verizon's outside plant may include both aerial and underground facilities. Some of the work related to the extension of FTTP facilities and the placement of drops may therefore be underground.
