IntraLATA Presubscription Plan

NEW YORK INTRALATA TOLL PRESUBSCRIPTION PLAN

1. General

IntraLATA toll presubscription is a procedure whereby an end user or Pay Telephone Service Provider may select and designate an IntraLATA Toll Provider ("ITP" or "Company") to access IntraLATA toll calls without dialing an access code. The end user or Pay Telephone Service Provider may designate an ITP for IntraLATA toll, a different carrier for InterLATA toll, or the same carrier for both. This ITP is referred to as the end user or Pay Telephone Service Provider preferred IntraLATA toll provider.

Each carrier will have one or more access codes assigned to it for various types of service. When an end user of Pay Telephone Service Provider selects a carrier as its preferred IntraLATA toll provider, only one access code of that carrier may be incorporated into the switching system of the Telephone Company permitting access to that carrier by the end user of Pay Telephone Service Provider without dialing an access code. Should the same end user or Pay Telephone Service Provider wish to use other services of the same carrier, it will be necessary for the end user or Pay Telephone Service Provider wish to use other service soft the necessary access code(s) to reach that carrier's other service(s).

An ITP must use Feature Group D ("FGD") Switched Access Service to qualify as an IntraLATA toll provider. All ITPs must submit a Letter of Intent ("LOI") to the Telephone Company at least five (5) days prior to the IntraLATA toll-presubscription-conversion date or, if later, forty-five (45) days prior to the date on which the carrier proposed to begin participating in IntraLATA toll presubscription.

Selection of an ITP by an end user or Pay Telephone Service Provider is subject to the terms and conditions in B.

- 2. Presubscription Charge Application
 - 2.1 Initial Free Presubscription Choice for New Users

New end users who subscribe to service will be asked to select a primary ITP when they place an order for Telephone Company Exchange Service. If a customer cannot decide upon an IntraLATA toll carrier at the time, the customer will have thirty (30) days following completion of the service request to make an IntraLATA PIC choice without charge. In the interim, the customer will be assigned a "No-PIC" and will have to dial an access code to make IntraLATA toll calls. The free selection period available to new end users or Pay Telephone Service Providers is the period within thirty (30) days of installation of the new service.

Initial free selection available to new end user or Pay Telephone Service Providers are:

Designating an IPT as their primary carrier, thereby requiring no access code to access that ITP's service. Other carriers are accessed by dialing 101-XXXX or other required codes.

Choosing no carrier as a primary carrier, thus requiring 101-XXXX code dialing to access all ITPs. This choice can be made by directly contacting the Telephone Company.

Following a new end user's or Pay Telephone Service Provider's free selections, any change made more than thirty (30) (days after presubscription is implemented is subject to a nonrecurring charge, as set forth in the Company's tariff.

2.2 Charge for IntraLATA Toll Presubscription

After expiration of the initial free presubscription choice period for new customers, as specified above, the end user or IPT will be assessed an IntraLATA Toll presubscription charge as specified in the Company's tariffs.

2.3 Cancellation of IntraLATA Toll Presubscription by an ITP

If an ITP elects to discontinue Feature Group D service after implementation of the IntraLATA toll presubscription option, the ITP is obligated to contact, in writing, all end users or Pay Telephone Service Providers who have selected the canceling ITP as their preferred IntraLATA toll provider. The ITP must inform the end users or Pay Telephone Service Providers that it is canceling its Feature Group D service, request that the end user select a new ITP and state that the canceling ITP will pay the PIC change charge. The ITP must provide written notification to the Telephone Company that this activity has taken place.

- 3. End User/Pay Telephone Service Provider Charge Discrepancy ("Anti-Slamming Measure")
 - 3.1 When a discrepancy is determined regarding an end user's designation of a preferred IntraLATA toll carrier, the following applies depending upon the situation described:

A signed letter of authorization takes precedence over any order other than subsequent, direct customer contact with the Telephone Company.

When two or more orders are received for an end user line generated by telemarketing, the date field on the mechanized record used to transmit PIC change information will be used as the PIC authorization date. The order with the latest application date determines customer choice.

3.2 Verification of Orders for Telemarketing

No ITP shall submit to the Telephone Company a PIC change order generated by outbound telemarketing unless, and until, the order has first been conformed in accordance with the following procedures:

3.2.1 The ITP has obtained the customer's written authorization to submit the order that explains what occurs when a PIC is changed and confirms:

3.2.1.A The customer's billing name and address and each telephone number to be covered by the PIC change order;

3.2.1.B The decision to change the PIC to the ITP; and

- 3.2.1.C The customer's understanding of the PIC change fee; or
- 3.2.2 The ITP has obtained the customer's electronic authorization, placed from the telephone number(s) on which the PIC is to be changed, to submit the order that confirms the information described in 3.2.1.A preceding to confirm the authorization; or
- 3.2.3 An appropriately qualified and independent third party operating in a location physically separate from the outbound telemarketing representative has obtained the customer's oral authorization to submit the PIC change order that confirms and includes appropriate verification date (e.g., the customer's date of birth or social security number).
- 3.2.4 The Company will follow the Federal Communications Commission and the New York Public Service Commission (if issued) regulations regarding slamming. The Company will not impose a penalty or charge for unauthorized IntraLATA toll provider changes.
- 4. PIC Switchback Options
 - 4.1 Customer denies requesting change of ITP.

When the Telephone Company is contacted by an end user who denies requesting a change in ITP primary PIC, the claim will be investigated and the end user will be credited the charge assessed for the disputed change in carrier, and will be switched back to the previous ITP at no charge, as warranted.

The ITP is in no way relieved of the FCC requirements for:

- 4.1.1 Verifying all PIC orders obtained by outbound telemarketing prior to submitting those orders, or
- 4.1.2 Instituting steps to obtain verification of orders submitted to the Company.

In addition, the end user has the option of initiating a complaint to the FCC or the Public Service Commission concerning Unauthorized changes in carrier. The complaint may be issued in writing to the New York Public Service Commission, 3 Empire State Plaza, Albany, New York 12223-1350.

4.2 Customer requests Switchback to Previous ITP PIC.

When the Telephone Company is notified by a customer that it would like to be switched back to the previous PIC, and the end user is not denying the authenticity of the most recent change to the current PIC, the Telephone Company will change the customers ITP back to the previous PIC and will bill the end user a PIC charge as specified in the Company's tariff.

4.3 IntraLATA Preferred Carrier Freeze Selection

The Company will offer a preferred carrier freeze option to all customers on a nondiscriminatory basis regardless of the customer's carrier selection at no charge to the end user. The preferred carrier freeze option prevents a change in the end-user's IntraLATA toll provider unless the end users request a change in carrier.

End users may request a preferred carrier freeze on their IntraLATA toll service as a means of protection from unauthorized IntraLATA PIC changes. The Company will only accept preferred carriers freezes either orally or in writing from end users. The preferred carrier freeze will be offered on a per line basis.

The Federal Communications Commission and the New York Public Service Commission accepted the use of three-way calls to remove PIC freezes when the customer's IntraLATA toll presubscription choice has been frozen. Carriers must still follow the verification procedures for PIC changes of the Federal Communications Commission (e.g., independent 3rd party verification, written letter of agency from customer, electronic authorization) and the New York Public Service Commission (if issued). The carriers will impose and/or lift preferred carrier freeze request in accordance with Chapter 1 of Title 47 of the Code of Federal Regulation, Section 64.1190.

4.4 Marketing of PIC Freeze Option

The Company will not market the PIC freeze option to customers within a ninety (90)day period after implementation, i.e., ninety (90) days following the Effective Date of this tariff. However, the freeze option is available during that period on customer request.

4.5 Informational Notice to Customers

The Company will provide written notification to customers of their IntraLATA presubscription options and rights within thirty (30) days of subscribing for service. Notification will not contain information on PIC-freeze service.
